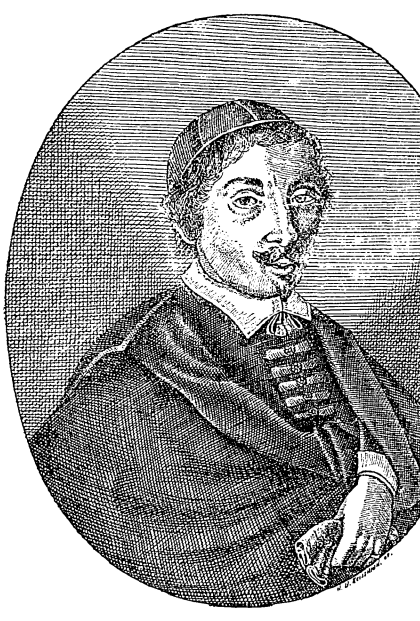
10. Jacob Judah Aryeh Leon Templo: Ḥakam, translator of the Psalms, and heraldic expert; of Marano descent; son of Abraham de Leon; born in 1603 at Hamburg, where he taught Talmud for several years; died after 1675. He became ḥakam in Middelburg and, after 1643, in Amsterdam, where he was engaged also as teacher in the Talmud Torah. He vocalized the entire Mishnah which was printed in 1646 at the establishment of Manasseh ben Israel.

Jacob Judah caused a great stir by a plan, drawn by him, of Solomon's Temple, which was exhibited before Charles II. of England and of which the author published a short, comprehensive description in Spanish entitled "Retrato del Templo de Selomoh" (Middelburg, 1642). This was translated into Dutch in the same year; into French in 1643; and by himself into Hebrew in 1650, with the title "Tabnit Hekal." Duke August of Brunswick, and more particularly his wife Elizabeth, wished a German translation of this description and entrusted the task to Prof. Johann Saubert of Helmstädt. Some one else published such a translation in 1665, and Saubert therefore wrote a Latin translation in that year. An English version appeared in 1778, done by M. P. Decastro, a relative of Templo's, and in whose possession the plan was then held.

In 1647 Jacob Judah wrote "Tratado de la Arca del Testamento" (Amsterdam, 1653). His treatise on the cherubim, their form and nature, written in Latin in 1647, appeared in Spanish under the title "Tratado de los Cherubim" (Amsterdam, 1654); and his description of Moses' tabernacle, written in 1647 in Dutch, was published under the title "Retrato del Tabernaculo de Moseh" (Amsterdam, 1654), and in English (1675). His last work was a Spanish paraphrase of the Psalms, which was printed with the text, under the title "Las Alabanças de Santitad" (Amsterdam, 1671), and, as is stated in the introduction, was written in seven months. The work was dedicated to Isaac Senior Teixeyra, financial agent, in Hamburg, of Queen Christina of Sweden, and was extolled by many ḥakamim, scholars, and poets in Hebrew, Latin, and Spanish verses.



Jacob Judah Aryeh Leon Templo.

Jacob Judah wrote also a dialogue ("Colloquium Middelburgense") between a rabbi and a Christian scholar on the value of the Christian dogmas; and he left in manuscript "Disputaciones con Diferentes Theologos de la Cristiandad." He was a skilful draftsman. The coat of arms of the English Grand Lodge of Masons with the motto קדש ליהוה, now "Holiness to the Lord," is the work of the "famous and learned Hebrewist, architect, and brother, Rabi Jacob Jehudah Leon." He drew also more than 200 figures and vignettes to illustrate Talmudical subjects, which his son **Solomon** gave to Surenhusius for his Latin translation of the Mishnah.

14. **Judah Ḥayyim Leão (Leon)**: Ḥakam and leader in prayer in the synagogue of the Portuguese community in Hamburg. After forty years of active service he was pensioned in 1656, and his son-in-law, Isaac Namias, was appointed his successor.

Bibliography: Grunwald, *Portugiesengräber auf Deutscher Erde*, p. 106.

15. **M. (P.) de Leon**: Lived in Surinam. In collaboration with others, he wrote in 1791 "Geschiedenis der Kolonie van Suriname" (Amsterdam, 1791; 2d ed. *ib.* 1802).

Bibliography: *Publications Am. Jew. Hist. Soc.* iv. 6.

16. **Manuel de Leon (Leão)**: Marano; writer of Spanish and Portuguese poems; born in Leiria; died in Amsterdam after 1712. His published works are: "Triumpho Lusitano Aplausos Festivos . . . Nos Augustos Desposorios do Inclyto D. Pedro Segundo com a Ser. Maria Sofia Isabel de Baviera, Monarcas de Portugal" (Brussels, 1688), a poem consisting of ninety-three verses, with a description of festivities held at Lisbon Oct. 11–25, 1687, and dedicated to D. Geronimo Nuñez da Costa, Portuguese agent in Amsterdam; "El Duelo de los Aplausos, y Triumpho de los Triumphos, Retrato de Guilielmo III., Monarcha Britanico" (The Hague, 1691); "Examen de Obrigaçoens. Testifica hum Filho, que os Pays Engendrão, Amão, Doutrinão os Filhos por Dependencia. Discursos Morales Deduzidos da Sagrada Escritura" (Amsterdam, 1712); "Gryfo Emblematico, Enigma Moral. Dedicado a Diego de Chaves" (*ib.* 1712). His "Certamen de las Musas en los Desposorios de Francisco Lopes Suasso, Barão de Auverne" is extant in manuscript in Amsterdam.

Bibliography: Barbosa Machado, *Bibl. Lusit.* iii. 293; Kayserling, *Sephardim*, pp. 315 *et seq.*; idem, *Bibl. Esp.-Port.-Jud.* p. 57.

17. **Meïr de Leon**: Lived in Amsterdam; translated Verga's "Shebeṭ Yehudah" into Spanish under the title "La Vara de Juda" (Amsterdam, 1640; 2d ed. *ib.* 1744).

18. **Samuel de Leon (Lião)**: Member of the college Keter Torah in Amsterdam. He was the author of the "Questoins [Questoẽs] com Suas Repostas, que Propor na Academia de Queter Tora," Hamburg, 1679, and of a writing preserved in manuscript, under the title "Libro de Diversas Questoins e Suas Repostas, Comp. por my . . . y Respond. em Yesiba."

Bibliography: Steinschneider, *Catalog der Hebräischen Handschriften in der Stadtbibliothek zu Hamburg*, p. 167; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 59.

19. **Samuel Judah Leon Templo**: Brother of Solomon Raphael Judah (No. 20), mentioned by

Daniel Levi de Barrios. In 1682 he was teacher at the school, founded by Abraham da Fonseca, of the society Maskil el Dal in Amsterdam.

20. Solomon Raphael Judah Leon Templo: Ḥakam, preacher, and press-corrector in Amsterdam; died *c.* 1733. He was a son of Jacob Judah Leon (No. 10); and a pupil of Isaac Aboab da Fonseca. Together with David Nuñes Torres, he corrected the enlarged edition of Maimonides' "Yad ha-Ḥazaḳah" which appeared in Amsterdam in 1703. His published works include, besides several sermons in Portuguese: "Resit Hohmá, Principio da Sciencia, ou Grammatica Hebrayca por hum Methodo Breve, Facil e Distincto para Uzo das Escolas" (*ib.* 1703); "Orden de las Oraciones y Rogativas Compuestas para Pedir Piedades Sobre las Enfermedades. Traduzido por Selomoh R. J. Leon Templo" (*ib.* 1727).

After his death his son Isaac published a little book by him entitled "Masseket Halakah le-Mosheh mi-Sinai" (Amsterdam, 1734), on the hermeneutical rules of the Talmud, at the end of which the regulations for the Passover feast are given in rimes of four lines.

LEON DE BAGNOLS. See Levi b. Gershon.

LEON, DAVID CAMDEN DE: American physician and surgeon; born in South Carolina in 1813; died at Sante Fé, N. M., Sept. 3, 1872; brother of Edwin de Leon. He was educated in South Carolina and at the University of Pennsylvania (M.D. 1836). Shortly after graduation he entered the United States army as assistant surgeon (1838) and served with distinction in the Seminole war. For several years afterward he was stationed on the Western frontier. He served throughout the Mexican war, and was present at most of the battles. At Chapultepec he earned the sobriquet of "the Fighting Doctor," and on two occasions led a charge of cavalry after the officer commanding had been killed or wounded. For his distinguished services and for his gallantry in action he twice received the thanks of Congress. He was then assigned to frontier duty, and in 1856 he became surgeon, with the rank of major.

De Leon was personally opposed to secession; but, like most Southern officers in the regular army, he resigned his commission at the outbreak of the Civil war and tendered his services to the Confederacy. De Leon organized the medical department for the Confederate government and was its first surgeon-general. At the close of the war he went to Mexico, but soon returned to New Mexico, where he had been stationed for several years, and where he owned property. He continued in practise there until his death. He was a man of considerable general culture and was esteemed as a writer.

LEON, EDWIN DE: American diplomat and journalist; born at Columbia, S. C., 1818; died in 1891; brother of David Camden de Leon. His father, a physician, removed to Columbia, S. C., and was mayor of that city for several years. De Leon graduated from South Carolina College and studied law, but soon turned to literature and politics. He became an active collaborator on the "Southern Review," the "Magnolia," the "Southern Literary Messenger," and other periodicals. Removing to Savannah, Ga., he took editorial charge of the "Savannah Republican" and made it a political factor in the state; his next charge was the Columbia (S. C.) "Telegraph," a daily.

At the invitation of a committee of Southern members of Congress, De Leon established, in Washington, D. C., "The Southern Press," which soon became the organ of the Southern people and secured a large circulation during the early fifties. For his services during the Pierce campaign, that president appointed him consul-general to Egypt, which position he filled for two terms with marked success. At the commencement of the Crimean war, an order was issued by the Porte expelling all Greeks from the Ottoman dominion. The Greeks in Egypt appealed to De Leon, who took them under the protection of the American flag, guaranteed their good behavior, and insisted that they should not be interfered with. The home government approved his course, and Congress paid him the compliment of ordering the printing of his despatches. The King of Greece tendered him the grand cross of the Order of San Sauveur, but Leon declined on the ground that it was antirepublican.

De Leon rendered conspicuous services in protecting American missionaries at Jaffa, and for this he received for the second time the thanks of the State Department. Through his influence American commerce with Egypt was largely extended and American machinery introduced into that country. It was during his incumbency of the consul-generalship that he heard of the secession of his native state from the Union. He at once forwarded his resignation. Returning home, he ran the blockade and made his way to New Orleans. Thence he proceeded to Richmond and reported to Jefferson Davis, volunteering for military duty. Davis sent him instead on a confidential mission to Europe to secure the recognition of the Southern Confederacy by foreign powers. De Leon refused any salary or remuneration for his services, but advanced from his own purse considerable sums for the use of the Confederacy. He again ran the blockade, reached Nassau, and arrived in England in July, 1862. As diplomatic agent he was received in the highest circles, both in England and in France, and personally pleaded the cause of the Confederacy with Lord Palmerston and the emperor Napoleon.

His despatches to the Southern government were intercepted, however, and were published by order of Lincoln's secretary of state, Seward.

Through his friend Thackeray, De Leon became a member of the Garrick Club and a contributor to the "Cornhill Magazine." After the Civil war De Leon returned to America and settled in New York. He frequently contributed to the leading magazines, chiefly on Eastern topics. Among his works are: "Thirty Years of My Life on Three Continents";

"The Khedive's Egypt"; "Under the Star and Under the Crescent"; "Askaros Kassis, the Copt," a novel, republished in England.

LEON JOSEPH OF CARCASSONNE: Physician; lived toward the end of the fourteenth century and at the beginning of the fifteenth. He devoted himself to the translation from the Latin into Hebrew of medical works. Among his numerous translations three are still extant in manuscript: (1) a commentary on the ninth book (Pathology) of Razi by Gerard de Solo; (2) "Meyashsher ha-Mathḥilim," a manual of medicine by Gerard de Solo; (3) a chapter on the relation between astronomy and medicine, attributed to Hippocrates.

LEON, LEONTIN. See Judah ben Meïr ha-Kohen.

LEON HA-LEVI: Provençal Jew who wrote a Purim parody under the pseudonym **Labi ha-Levi** because he feared that the Orthodox Jews would condemn his work. The treatise, called "Megillat Setarim," on "Midrash ha-Nabi ha-Labi ha-Lewi" (Venice, 1552), contains three sections, entitled respectively "Pereḳ Ḥabaḳḳuḳ," "Hakkol Ḥayyabin," and "Mi-she-Niknas Adar," and is similar in plan to a Talmud treatise with so-called Rashi and Tosafot. It is full of humor. Another work of his, "Sefer Ḥabaḳḳuḳ" (*ib.* 1552), is a parody of the Pentateuch and the prophetic style, representing a contest between "Karmi" (wine) and "Be'eri" (water). This work was likewise intended for Purim.

LÉON LÉVY BRUNSWICH (LHÉRIE). See Brunswich, Léon Lévy.

LEON, MESSER DAVID BEN MESSER (known also as **David ben Judah**): Italian rabbi; flourished in the fifteenth and sixteenth centuries. He studied at Naples in the school of his father, Messer Leon, author of "Libnat ha-Sappir," and received at the age of eighteen his rabbinical diploma from German and French Talmudic authorities. Soon afterward he went to Padua, where he studied under Judah Minz, who granted him a new rabbinical diploma. He then betook himself to Turkey, and while sojourning at Salonica, where he prepared for publication his "'En ha-Ḳore," he was called to the rabbinate of Avlona at a salary of 70 florins a year. The community possessed three congregations of various nationalities, and Leon officiated successively in the three synagogues on every third Saturday. In the very first year of his rabbinate dissensions on account of a ritual question arose which caused the separation of the Portuguese and Catalonian Jews from the Castilians. Toward the end of his second year in Avlona a quarrel broke out among the Sephardim and the Portuguese. Leon, who sided with the Portuguese, had for antagonists Abraham Ḥarbon and Abraham de Collier. Excommunications were launched by both parties even on the Day of Atonement.

His Works.

Leon was a prolific writer, and produced works in many branches of secular science, as well as on distinctively Jewish subjects. With the exception of two, all remained unpublished. Most of them are no longer extant, and are known only from quotations. Leon preferred to clothe his philosophy in the garb of the Cabala, in which he was an adept; but he was too much of a philosopher to become involved in the abysses of mysticism. In his cabalistic work "Magen Dawid," still extant in manuscript, he freely quotes the Greek and the Arabic philosophers. For him Plato was the greatest cabalist. This philosopher, Leon claimed, lived at the time of the prophet Jeremiah, who was his teacher.

Leon wrote also the following works: "Abir Ya'aḳob," on medicine and other sciences; "Sefer ha-Derashot," sermons arranged in the order of the sections of the Pentateuch (according to Neubauer, it is identical with the "Tif'eret Adam" quoted in Leon's commentary on Lamentations); "Menorat ha-Zahab," also extant in manuscript, probably a haggadic commentary on Lamentations; "'En ha-Ḳore," a commentary on the "Moreh Nebukim," criticizing the commentary of Isaac Abravanel; "Miktam le-Dawid," a cabalistic work mentioned in the "'En ha-Ḳore"; "Sod ha-Gemul," in which he shows that the Israelites, unlike other nations, are not under a special sign of the zodiac; refutations of Albo's criticisms of Aristotle; "Shebaḥ ha-Nashim," still extant in manuscript (according to Steinschneider, "Hebr. Bibl." xix. 83, identical with the commentary on Prov. xxxi.); "Tehillah le-Dawid" (published by the author's grandson Aaron le-Bet David, Constantinople, 1577), in three parts: (1) on the excellence of the Law; (2) on the elements of faith, which latter is superior to speculative reasoning; (3) on the principles of God, the divine attributes, providence, free will, etc.; a halakic decision on the ritual question which caused the division of the various congregations of Avlona, published by S. Bernfeld, under the title "Kebod Ḥakamim," Berlin, 1899 (Meḳiẓe Nirdamim).

Leon was considered as a high Talmudic authority, and was consulted on halakic questions. Two of his decisions have been preserved (Elijah Mizraḥi, Responsa, No. 47; Neubauer, "Cat. Bodl. Hebr. MSS." No. 834). In one of his works Leon mentions a commentary of his own on Moses of Coucy's "Sefer Miẓwot Gadol" ("Semag"). Parma MS. de Rossi No. 1395 ("Cat. Perreau," No. 19) contains a scientific treatise by Leon. In the introduction to this treatise Leon says that he wrote many poems in Hebrew and in the "Christian language," meaning thereby Latin or Italian. Shabbethai Bass, without indicating any source, gives, in his "Sifte Yeshenim," the following titles of works attributed to Leon: "Bet Dawid"; "Kisse Dawid"; "Nefesh Dawid"; "Ḳol Adonai ba-Koaḥ"; and "Naḥal 'Adanim."

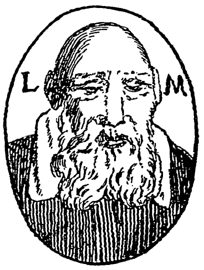
G. I. Br.

LEON (JUDAH ARYEH) OF MODENA: Italian scholar, rabbi, and poet; son of Isaac of Modena and Diana Rachel; born April 23, 1571, at Venice; died there March 24, 1648. He was a descendant of a prominent French family. His grandfather **Mordecai** became distinguished both as a physician and as a philanthropist, and was raised by Charles V. to the rank of Knight of the Order of the Golden Fleece. Leon was a precocious child. His father, who was then in good circumstances, gave him a complete education, not neglecting even such worldly accomplishments as singing and dancing. Leon's masters were successively Azriel Bassola, Hezekiah Galico, Hezekiah Finzi, and Samuel Archevolti. At the age of twelve Leon translated into Hebrew verse the first canto of Ariosto's "Orlando Furioso," and about a year and a half later he wrote his dialogue against gambling, which passed through ten editions and was translated into Latin, French, German, and Judæo-German. Even at this early age he was not only well versed in Hebrew and rabbinical literature, but was conversant with the classics and possessed a fair knowledge of mathematics, philosophy, and natural history.

There was, however, one thing that nature had denied to this highly gifted youth—a stable character. Like all poets, he lived upon his emotions. By the irony of fate, Leon, who had fulminated against gambling, developed a passion for all games of hazard, and, being too weak to overcome it, attributed the fault to the astral influences under which he had been born. This passion, which is probably accountable for his inconsistencies, had a large share in the misfortunes which filled his life. He had scarcely reached maturity when his father became impoverished, and Leon had to seek his own livelihood. In 1590 he married, and won a living by teaching. After the death of his father, in 1592, he settled at Venice, where he was appointed (1594) member of the rabbinate and preacher. In the latter capacity he was especially successful; his addresses in Italian attracted large audiences, including Christian priests and noblemen. Leon's successes as an orator and poet won for him the consideration of the Christian scholastic world, and admitted him to the highest Venetian circles. He had among his pupils Louis Eselin (a nobleman of the French court), the Archbishop of Lodève, John Plantanit, Jacob Gaffarelli, and Giulio Morosini.

Family Misfortunes.

Besides preaching and teaching, Leon exercised not less than twenty-six professions (press-corrector, notary, bookseller, etc.); but all his resources were swallowed up in gaming, and his material condition was rendered thereby a source of perpetual anxiety. To his monetary troubles was added a series of family disasters. Of his three sons, **Mordecai,** who was endowed with great ability, died at the age of twenty-six; **Zebulon** was killed in a brawl with his comrades; the third, **Isaac,** after having led a life of dissipation, emigrated to Brazil, and was never thereafter heard from. Of his two daughters, one died during his lifetime; the second lost her husband, and she and her family became thereby dependent upon Leon for support. In 1641 Leon's wife became insane, and remained in that state until her death. Amid all these trials Leon continued to study, write books, compose poems, relieve the distresses of others, so far as that was in his power, and—gamble. This last occupation involved him, in 1631, in a struggle with the leaders of the community, who launched an excommunication against any that should play cards, or take part in any other game of hazard, within the period of six years. On this occasion Leon wrote a brilliant dissertation, in which he demonstrated that the leaders had acted against the Law; the excommunication was accordingly revoked.



Leon of Modena.

The community of Venice in the seventeenth century must have been animated by a spirit of tolerance, for Leon continued to remain a member of the rabbinate until his death, although no doubt could be entertained as to his anti-Talmudic sympathies after the publication, in 1635, of his "Bet Yehudah" (known also under the title "Ha-Boneh"). This work contains all the haggadot omitted by the "'En Ya'aḳob"; in the accompanying commentary Leon points out the differences between the religious customs of the Jews of Palestine and of those living in other countries, showing thereby that the rabbis and scholars of any period have the right to modify Talmudic institutions (Shab. i.). He derides the haggadot, although he concedes that some of them contain salutary moral teachings. In the "Bet Yehudah," Leon went no further than to show his preference for religious reform; but he attacked traditional Judaism in a pseudonymous work entitled "Ḳol Sakal"; this work, either because in the meantime he had actually changed his views, or because he desired more thoroughly to conceal its authorship, he later endeavored to refute in another work entitled "Sha'agat Aryeh," which remained unfinished.

Attacks Traditionalism.

The "Ḳol Sakal" comprises three treatises, subdivided into chapters. In the first treatise the author deals with the existence of God, the Creation, the purpose of the world, reward and punishment, and the divine origin of the Law. In the second treatise he criticizes rabbinical interpretation of the Law. He contends that, like the Karaites, the Rabbis often followed the letter of the Law to the neglect of its spirit. He asserts that the use of phylacteries is not commanded by Biblical law; that the operation of circumcision is not performed in the manner prescribed; and that rabbinical interpretation is often in direct opposition to the Law. That there was no traditional interpretation before Antigonus is seen from the existence of various sects during the time of the Second Temple. The third treatise enumerates the laws which must be reformed in order to bring the later Judaism into harmony with the Law, and render it spiritual and Biblical. The author proposes the simplification of the prayers and synagogal service, the abolition of many rites, the relaxation of Sabbath festivals, of Passover, and even of the ritual of the Day of Atonement. Fasting should not be carried beyond the ordinary physical and spiritual powers of the individual concerned. The dietary laws should be abrogated, or at least simplified; the prohibition against drinking wine with those of other creeds, obedience to which exposed Jews to derision, should be abolished.

The "Ḳol Sakal" and "Sha'agat Aryeh" were published by Isaac Reggio under the title "Beḥinat ha-Ḳabbalah" (Göritz, 1852). A discussion arose at the time of its appearance as to whether the "Ḳol Sakal" was written by Leon himself or whether, as is pretended in the "Sha'agat Aryeh," it proceeded from a certain Amittai ibn Raz of Alkala. It has even been suggested with some plausibility that both these works, instead of being written by Leon, were merely attributed to him by I. S. Reggio (see Deutsch, "Theory of Oral Tradition," p. 39; "Epochs of Jewish History," pp. 23 *et seq.*, New York, 1894). But a comparison between the ideas expressed by Leon in his "Bet Yehudah" and elsewhere and those expounded in the "Ḳol Sakal" leaves little doubt as to his authorship. Indeed, several of the criticisms, as, for instance, those concerning circumcision and the second day of festivals, are found expressed in the same terms in Leon's "Magen we-Ẓinnah" (published by A. Geiger, Breslau, 1856), which contains answers to eleven objections to the rabbinical interpretation of the Law brought, according to Leon, by a Marano of Hamburg.

Attacks Cabala.

Though brilliantly written, these works are of comparatively little value; neither criticisms nor refutations are profound enough to survive thorough investigation. Far superior is Leon's "Ari Nohem" (published by Fürst, Leipsic, 1840), which contains an attack upon the Cabala. It is divided into three parts, comprising altogether thirty-one chapters. Leon first demonstrates that Cabala can not be considered as a science, and then shows that the Zohar, on which it is based, is a modern composition. In addition to the works cited, Leon wrote:

Sur me-Ra'. A dialogue between Eldad and Medad on games of hazard. Venice, 1596; Prague, 1615; Leyden, 1656. Translated into Latin by Aug. Pfeifer (Wittenberg, 1665) and by Thomas Hyde (Oxford, 1698, 1702, 1767); into German, with the Hebrew title "Ẓaḥḳan Mellumad we-Mitḥareṭ," by Fr. Abb. Christiani (Leipsic, 1683; Frankfort-on-the-Main, 1713; Fürth, 1723); into Judæo-German, with the Hebrew title "Ẓaḥḳan Mussari," by Asher Anshel (Amsterdam, 1698); into French by Carmoly (Paris, 1841).

Sod Yesharim. One hundred enigmas and remedies. Venice, 1594; Verona, 1647; Amsterdam, 1649; Frankfort-on-the-Main, 1702. Another edition gives neither date nor place of publication.

Ẓemaḥ Ẓaddiḳ. An ethical work, translated from the Latin, with moral sayings taken from Bible and Talmud. Venice, 1600; Wilna, 1855; New York, 1899.

Midbar Yehudah. Twenty-one sermons. Venice, 1602.

Galut Yehudah. Explanations, in Italian, of all the difficult expressions found in the Bible, in the sayings of the Fathers, and in the Haggadah of Passover; preceded by a number of grammatical rules. Venice, 1612. Republished at Padua and Venice in 1640, with an Italian-Hebrew vocabulary entitled "Pi Aryeh."

Leb Aryeh. A method of mnemonics applicable in all sciences, with the 613 commandments according to Maimonides. Venice, 1612; Wilna, 1886.

Bet Leḥem Yehudah. An index of the sources of all the passages found in the "'En Ya'aḳob." Venice, 1625; Prague, 1705.

Ẓebi Esh. An abridgment of Isaac Abravanel's commentary on the Haggadah of Passover, with an Italian translation. Venice, 1629, 1664, 1695; Sulzbach, 1774, 1834; with a German translation, Fürth, 1804.

Tefillot Yesharim. Prayers and seliḥot for all occasions.

Ben Dawid. Controverting the doctrine of metempsychosis. Included by Eliezer Ashkenazi in the "Ṭa'am Zeḳenim." Frankfort-on-the-Main, 1855.

Magen wa-Ḥereb. Attacks upon Christian dogmas. Published in part, together with the "Magen we-Ẓinnah," by A. Geiger, Breslau, 1856.

Ha-Abot bi-Yehudah. Commentary on the Pirḳe Abot.

Commentaries on the Pentateuch, the Five Scrolls, the books of Samuel, Proverbs, and the Passover Haggadah.

Rashi's commentaries on Proverbs and the books of Job and Daniel. Included in the "Biblia Rabbinica."

Pitron ha-Millot. Explanations of the special terms used in logic and philosophy.

Ḥibbur. Models of Hebrew composition; a Hebrew translation of Ecclesiastes and the books of Maccabees, etc.

Derashot. Four hundred sermons.

Commentary on the Hafṭarot.

Mibḥar Yehudah. The nature of the work is unknown.

Pesaḳim. Halakic decisions on synagogal music. Venice, 1605; Vienna, 1861. Published as a supplement to "Ben Chananja," 1861, No. 27. On the excommunication launched by the leaders of the community of Venice against all games of hazard. Venice, 1631. Contained also in "Paḥad Yiẓḥaḳ," *s.v.* חרם. On the use of ordinary straps for phylacteries. Included in the responsa "Debar Shemuel," of Samuel Aboab, No. 19.

Leḳeṭ Yehudah. Collection of halakic consultations.

Shire Yehudah. Collection of Hebrew poems. Neubauer, "Cat. Bodl. Hebr. MSS." No. 2185.

Ḥayye Yehudah. Autobiography; published in part by Isaac Reggio, in the introduction to the "Beḥinat ha-Ḳabbalah," and in part by Geiger.

Historia dei Riti Ebraici, Vita e Osservanze degli Hebrei di Questi Tempi. Paris, 1637; Venice, 1638, 1673, 1678, 1687, 1715. Written, at the request of an English nobleman, for James I.; translated into English by Ed. Chilmead (London, 1650) and by S. Ockley (*ib.* 1707, 1753); into French by Recared Simon (Paris, 1671, 1681, 1710); into Dutch by Aug. Gedaret (Amsterdam, 1683); into Latin by J. Val. Grossgebauer (Frankfort-on-the-Main, 1693); into Hebrew, under the title "Shulḥan 'Aruk," by Solomon Rubin, with notes by A. Jellinek (Vienna, 1867).

Ziḳne Yehudah. Responsa, cited by Moses Ḥagiz in his "Leḳeṭ ha-Ḳemaḥ." It is, perhaps, identical with "Leḳeṭ Yehudah."

Oẓar ha-Ḥayyim. On the Cabala.

The following are of doubtful authorship: "Or Ṭob," explanations of difficult Hebrew words (Amsterdam, 1675 [Venice, 1681, under the title "Or Luz"; *ib.* 1701, under the title "Or Lustru"]), and "Parashot ha-Kesef," a commentary on four sections of the Pentateuch (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2549). Steinschneider attributes also to Leon the work on chess entitled "Ma'adanne Melek." Leon edited a great number of works, which he provided with prefaces, poems, and approbations; and he assisted the musical composer Solomon de Rossi in the publication of his work on synagogal music.

LEON, MOSES (BEN SHEM-ṬOB) DE: Cabalistic writer; author, or redactor, of the Zohar; born at Leon, Spain, about 1250; lived in Guadalajara, Valladolid, and Avila; died at Arevalo in 1305, while returning to his home. He was familiar with the philosophers of the Middle Ages and with the whole literature of mysticism, and knew and used the writings of Solomon ibn Gabirol, Judah ha-Levi, Maimonides, etc. He knew how to charm with brilliant and striking phrases without expressing any well-defined thought. He was a ready writer and wrote several mystical and cabalistic works in quick succession. In the comprehensive "Sefer ha-Rimmon," written in 1287 and still extant in manuscript, he treated from a mystical standpoint the objects and reasons for the ritual laws, dedicating the book to Levi ben Todros Abulafia. In 1290 he wrote "Ha-Nefesh ha-Ḥakamah," or "Ha-Mishḳal" (Basel, 1608, and frequently found in manuscript), which shows even greater cabalistic tendencies. In this work he attacks the philosophers of religion and deals with the human soul as "a likeness of its heavenly prototype," with its state after death, with its resurrection, and with the transmigration of souls. "Sheḳel ha-Ḳodesh" (written in 1292), another book of the same kind, is dedicated to Todros ha-Levi Abulafia. In the "Mishkan ha-'Edut," or "Sefer ha-Sodot," finished in 1293, he treats of heaven and hell, after the apocryphal Book of Enoch; also of atonement. He wrote as well a cabalistic explanation of the first chapter of Ezekiel.

Toward the end of the thirteenth century Moses de Leon wrote or compiled a cabalistic midrash to the Pentateuch full of strange mystic allegories, and ascribed it to Simeon ben Yoḥai, the great saint of the Tannaim. The work, written in peculiar Aramaic, is entitled "Midrash de R. Shimeon ben Yoḥai," better known as the Zohar. The book aroused due suspicion at the outset. The story runs that after the death of Moses de Leon a rich man from Avila offered the widow, who had been left without means, a large sum of money for the original from which her husband had made the copy, and that she then confessed that her husband himself was the author of the work. She had asked him several times, she said, why he had put his teachings into the mouth of another, but he had always answered that doctrines put into the mouth of the miracle-working Simeon ben Yoḥai would be a rich source of profit. Others believed that Moses de Leon wrote the book by the magic power of the Holy Name. At any rate the contents of the book have been accepted and approved by all cabalists, and can by no means be regarded as mere inventions and forgeries of Moses de Leon.

LEONTE (JUDAH) BEN MOSES: Roman rabbi; died in 1216. In the name of the community of Rome he sent a halakic decision to Judah ben Kalonymus of Speyer for approval ("Shibbole ha-Leḳeṭ," ii. 75; comp. Buber's introduction, note 87). The Roman manuscript Maḥzor contains eleven seliḥot which bear the signature of Leonte. One of these, beginning with אנהים במר אידתי, for the seventeenth day of Tammuz, is included in the Roman printed Maḥzor.

LEONTOPOLIS (Greek, *Λεόντων πόλις* = "lion city"): Place in the nome of Heliopolis, Egypt, situated 180 stadia from Memphis; famous as containing a Jewish sanctuary, the only one outside of Jerusalem where sacrifices were offered. Aside from a somewhat uncertain allusion of the Hellenist Artapanus (in Eusebius, "Præparatio Evangelica," ix. 23), only Josephus gives information of this temple (more explicitly in his "Antiquities" of the Jews than in his "Jewish War"). The Talmudic accounts are entirely confused. The establishment of a central sanctuary in Egypt was not due to the disorders that arose in Palestine under Antiochus IV., Epiphanes, to the desecration of the sanctuary at Jerusalem, to the supplanting of the legitimate family of priests by the installation of Alcimus, nor to the personal ambition of Onias IV., but to the vast extent of the Jewish diaspora in Egypt itself.

It would appear from the account of Josephus in the "Jewish War" (i. 1, § 1), and more especially from the fact that Onias is called in the same work (vii. 10, § 2) "the son of Simon," that the temple of Leontopolis was built by Onias III., who drove the sons of Tobias from Jerusalem, and who fled to Egypt, Syria's ancient rival, when Antiochus IV. attacked that city. But this account is contradicted by the story that Onias III. was murdered at Antioch in 171 B.C. (II Macc. iv. 33). Josephus' account in the "Antiquities" is therefore more probable, namely, that the builder of the temple was a son of

Founded by Onias IV.

Spuriousness of the Onias Letters.

the murdered Onias III., and that, a mere youth at the time of his father's death, he had fled to the court of Alexandria in consequence of the Syrian persecutions, perhaps because he thought that salvation would come to his people from Egypt ("Ant." xii. 5, § 1; *ib.* 9, § 7). Ptolemy VI. Philometor was King of Egypt at that time. He probably had not yet given up his claims to Cœle-Syria and Judea, and gladly gave refuge to such a prominent personage of the neighboring country. Onias now requested the king and his sister and wife, Cleopatra, to allow him to build a sanctuary in Egypt similar to the one at Jerusalem, where he would employ Levites and priests of his own race (*ib.* xiii. 3, § 1); and he referred to the prediction of the prophet Isaiah (Isa. xix. 19) that a Jewish temple would be erected in Egypt ("Ant." *l.c.*). Josephus then quotes two documents: Onias' letter to the royal couple, and the king's answer to Onias. Both of these, however, appear spurious, on the following grounds: Onias refers in his letter to his military exploits in Cœle-Syria and Phenicia, although it is not certain that the general Onias and the priest Onias are identical. His assertion that a central sanctuary is necessary because a multiplicity of temples causes dissension among the Jews evidences imperfect knowledge of the Jewish religious life; and, finally, his request for the ruined temple of the goddess Bubastis, because a sufficient supply of wood and sacrificial animals would be found there, seems unwise and improbable for a suppliant who must first obtain compliance with his principal request. It seems strange, furthermore, that in the second letter the pagan king points out to the Jewish priest that the proposed building of a temple is contrary to the law, and that he consents only in view of Isaiah's prophecy. Both letters were apparently written by a Hellenistic Jew. Only this can be stated as a fact, that the temple of Leontopolis was built on the site of a ruined temple of Bubastis, in imitation of the temple at Jerusalem, though smaller and less elaborate (*ib.* xiii. 3, § 3). The statement in "B. J." vii. 10, § 2 of Onias' argument that by the building of this temple the whole Jewish nation would be brought to turn from the Syrians to the Ptolemies seems very plausible, and may have given rise to the assertion made in the letters that there were dissensions among the Jews. The "fortress" (*ὀχύρωμα*) of the temple of Bubastis may be explained by the statement, which seems credible, that Onias built a fortress (*φρούριον*) around the temple in order to protect the surrounding territory, which now received the designation "Oneion" ("B. J." vii. 10, § 3).

The Onias temple was not exactly similar to the Temple at Jerusalem, being more in the form of a high tower; and as regards the interior arrangement, it had not a candelabrum, but a hanging lamp. The building had a court (*τέμενος*) which was surrounded by a brick wall with stone gates. The king endowed the temple with large revenues (*ib.*)—a fact that may have suggested to the writer of the letters mentioned above the wealth of wood and sacrificial animals.

Sacrifices Made There.

The reputation which the temple of Onias enjoyed is indicated by the fact that the Septuagint changes the phrase "city of destruction" (Isa. xix. 18) to "city of righteousness" (*πόλις ἀσεδέκ*). It may be taken for granted that the Egyptian Jews sacrificed frequently in the temple of Leontopolis, although at the same time they fulfilled their duty toward the Temple at Jerusalem, as Philo narrates that he himself did ("De Providentia," in Eusebius, *l.c.* viii. §§ 14, 64).

In the Talmud the origin of the temple of Onias is narrated with legendary additions, there being two versions of the account (Men. 109b). It must be noted that here also Onias is mentioned as the son of Simon, and that Isaiah's prophecy is referred to. In regard to the Law the temple of Onias (בית חוניו, handed down in the name of Saadia Gaon as חוניי) was looked upon as neither legitimate nor illegitimate, but as standing midway between the worship of YHWH and idolatry (Men. 109a; Tosef., Men. xiii. 12–14); the possibility of the priests of Onias being admitted to officiate at Jerusalem was explicitly stated, while one passage even expresses the view that sacrificial worship was permissible in the temple of Onias (Meg. 10a). The opinion was prevalent among the Rabbis that the temple of Onias was situated at Alexandria—an error that is repeated by all the chroniclers of the Middle Ages. This temple is also sometimes confounded with the Samaritan temple on Mount Gerizim ("Yuḥasin," ed. London, pp. 11b, 13b; Azariah dei Rossi, "Me'or 'Enayim," ed. Mantua, xxi. 89a; Gans, "Ẓemaḥ Dawid," ed. Offenbach, ii. 10; Heilprin, "Seder ha-Dorot," ed. Warsaw, 1891, i. 116).

According to Josephus, the temple of Leontopolis existed for 343 years, though the general opinion is that this number must be changed to 243. It was closed either by the governor of Egypt, Lupus, or by his successor, Paulinus, about three years after the destruction of the Temple at Jerusalem; and the sacrificial gifts, or rather the interior furnishings, were confiscated for the treasury of Vespasian ("B. J." vii. 10, § 4), the emperor fearing that through this temple Egypt might become a new center for Jewish rebellion. No ruins have so far been discovered of this temple, once so famous; perhaps the present Tell al-Yahudi marks its site (Ebers, "Durch Gosen zum Sinai," pp. 497 *et seq.*).

G. S. Kr.

LEOPARD (Heb. "namer"): A ferocious carnivorous mammal. Several allusions are found in the Old Testament to this animal and its characteristics; *e.g.*, its fierceness, Isa. xi. 6; its agility and swiftness, Hab. i. 8; its cunning, Jer. v. 6 and Hos. xiii. 7; its unchangeable spots as a type of immutability, Jer. xiii. 23; as an emblem of one of the "great monarchies," Dan. vii. 6. The leopard (*Felis pardus*) is still met with in the forest of Gilead, round the Dead Sea, and in the mountains; the chetah (*Guepardajubata*) is of less frequent occurrence in Palestine. The former frequency of the leopard there may perhaps be inferred from the place-names "Beth-nimrah" (Num. xxxii. 3, 36) and "Nimrim" (Jer. xlviii. 34), the latter perhaps identical with the modern Nimerah (comp. also the "mountains of leopards," Cant. iv. 8).

In the Talmud the namer is classed with the wolf, lion, etc., for dangerousness and ferocity (Sanh. 2a and parallels). Following the ancient conception of the leopard as a hybrid between a panther or pard and the lioness (hence the name "leo-pardus"), some of the rabbis believed it to be the issue of the boar and lioness (comp. Bartenora to the admonition of Ab. v. 5: "Be firm like a leopard to do the will of thy Father in heaven"). The namer is a type of immodesty (Ḳid. 70a). Its term of gestation is said to be three years (Bek. 8a).

LEPROSY (צרעת): Chronic skin-disease characterized by ulcerous eruptions and successive desquamations of dead skin.—**Biblical Data:** According to the Levitical text, the characteristic features of leprosy were: (1) bright white spots or patches on the skin the hair on which also was white; (2) the depression of the patches below the level of the surrounding skin; (3) the existence of "quick raw flesh"; (4) the spreading of the scab or scall.

Comparison with Modern Leprosy.

There are two forms of modern leprosy—the tubercular, or nodular, and the anesthetic, or nervous; generally both forms are present. The nodular form begins, as a rule, as round or irregularly shaped spots, commonly of a mahogany or sepia color. These often disappear, and are followed by the appearance of nodules. In an advanced stage the face is covered with firm, livid, nodular elevations: the nose, lips, and ears are swollen beyond their natural size, the eyelashes and eyebrows are lost, and the eyes are staring; the whole producing a hideous disfigurement. As the disease progresses, insensibility of the skin and paralysis ensue, and the fingers and toes may rot away.

In the Biblical description, one is immediately impressed by the absence of all allusion to the hideous facial deformity, the loss of feeling, and the rotting of the members. If such conspicuous manifestations had existed they could not possibly have escaped observation. The Levitical code prescribed that the several examinations of the person suspected should be made at intervals of seven days, thus enabling the priest to note the progress of the disease. Leprosy is an exceedingly slow disease, particularly in the beginning, and a fortnight would show absolutely no change in the vast majority of cases. Moreover, the "lepra Hebræorum" was a curable disease. When the leper was cured the priest made an atonement before the Lord, and expiatory sacrifices in the form of a sin-offering and a trespass-offering were made also. Modern leprosy is, except in isolated instances, incurable.

Nature of "Ẓara'at."

The probabilities are that "ẓara'at" comprised a number of diseases of the skin, which, owing to the undeveloped state of medical science at that period, were not distinguished. The white spots, upon which so much diagnostic stress was laid, were in all likelihood those of vitiligo, a disease quite common in tropical countries, and characterized by bright white spots, the hairs on which also become white. Vitiligo begins as small patches, which slowly spread, often involving ultimately large areas of the body's surface. The disease is harmless, but most disfiguring in those of swarthy complexion.

In the Septuagint "ẓara'at" is translated by "lepra." It is reasonable to assume that the Hebrews attached the same meaning to "ẓara'at" that the Greeks did to "lepra," which is derived from "lepros" (= "rough" or "scaly"). According to the medical writings of Ægineta, Ætius, Actuarius, Oribasus, and others, lepra was uniformly regarded as a circular, superficial, scaly eruption of the skin; in other words, their lepra was the psoriasis of modern times. There is absolutely nothing in the Greek description of lepra that suggests even in a remote manner the modern leprosy. The Greeks, in speaking of true leprosy, did not use the term "lepra," but "elephantiasis." It is evident, therefore, that they meant by "lepra" an affection distinct and apart from the disease of leprosy as now known. The confusion and obscurity that have enveloped this subject for centuries have resulted from the use of different terms in successive ages to designate the same disease, and from the total change in the meaning and application of the word "lepra."

Segregation.

There is much reason to believe that the segregation of lepers was regarded, at any rate at certain periods, more in the light of a religious ceremonial than as a hygienic restriction. Ẓara'at was looked upon as a disease inflicted by God upon those who transgressed His laws, a divine visitation for evil thoughts and evil deeds. Every leper mentioned in the Old Testament was afflicted because of some transgression. "Miriam uttered disrespectful words against God's chosen servant Moses, and, therefore, was she smitten with leprosy. Joab, with his family and descendants, was cursed by David for having treacherously murdered his great rival Abner. Gehazi provoked the anger of Elisha by his mean covetousness, calculated to bring the name of Israel into disrepute among the heathen. King . . . Uzziah was smitten with incurable leprosy for his alleged usurpation of priestly privileges in burning incense on the golden altar of the Temple" (Kalisch). It would have been quite natural for the people by a posteriori reasoning to have regarded persons afflicted with ẓara'at as transgressors; they had violated the laws of God and their transgressions had been great, else they would not have been so afflicted.

Writers who hold the view that the exclusion of lepers had chiefly a religious significance conclude from these facts that lepers were obliged to remain outside the camp because they were regarded as likely to morally infect others. As long as the signs of the disease remained upon them they were obliged to live outside the camp. It is reasonable to believe that, although Biblical and modern leprosy are, in all probability, not the same disease, the present custom of segregating lepers had its origin and stimulus in the Biblical example of segregating those afflicted with ẓara'at. Had the Bible never been written it is probable that lepers would to-day be permitted to go in and out among their fellows unhindered, for leprosy is a much less actively communicable disease than several other well-known affections in the case of which segregation is not practicable.

The Biblical description of leprosy of garments and houses is strikingly analogous in its wording to that of leprosy of persons. The passages in Leviticus (xiii. 47-59) are at present inexplicable in the light of modern science. The probabilities are that the description refers to stains upon garments produced by pus and blood from boils and ulcers of various kinds. Thus alone could the greenish and reddish stains be accounted for. That the description in Lev. xiv. 33-48 could not have applied to a leprosy of walls of houses is beyond reasonable doubt: such conceptions may possibly be ascribed to Oriental fancy and love of metaphor. Chemical incrustations and mildew were doubtless in this manner endowed with the symptoms of a living and spreading disease.

E. G. H. J. F. S.

——**In the Talmud:** The subject of leprosy is treated chiefly in the treatise Nega'im. The Talmud maintains that Lev. xiii. 1 *et seq.* refers generally to any disease that produces sores and eruptions on the skin (Sifra 60a). The following epitomizes the Talmudic treatment of leprosy:

Not Contagious.

1. Leprosy was not considered contagious. While all peoples of antiquity, from earliest times up to some centuries after the Talmudic period, held (as at the present day; Katzenelenson, in "Ha-Yeḳeb," p. 75, St. Petersburg, 1894) that leprosy was contagious, the Talmudic writers treated it as not contagious. The following evidences this: (1) The Mishnah does not consider a leprous pagan or an unnaturalized proselyte ("ger toshab") ritually unclean (Neg. iii. 1, xi. 1). (2) If a bridegroom, on his wedding-day, observes symptoms of leprosy on his skin, he is not required to submit himself for examination at once, but he may postpone it until the seven days of his nuptials are over. Similarly, one who is affected with it during the holy days may postpone examination until they are over (Neg. iii. 2). Under other circumstances, one afflicted with leprosy is forbidden intercourse with his wife (Ḥul. 141a). (3) The Mishnah says that doubtful cases (with two exceptions) are not to be considered unclean (Ḥul. 9b *et seq.*). (4) The Bible commands that if the priest finds white hair on the parts affected he shall declare the subject unclean, for the white hair is a certain symptom of leprosy. But the Mishnah says that if the hair is plucked out before the examination takes place the person is clean (Neg. viii. 4). It was not, then, fear of contagion that led to regarding the leper as unclean.

2. Talmudic tradition, basing its definitions on the etymology of the Biblical terms used, knows of four different degrees of white in cases of leprosy, but not of "neteḳ" (Lev. xiii. 30). "Baheret" is of the whiteness of snow; the second degree recognized is of the whiteness of lime; "se'et" is of the color of the white of an egg; and the next degree of whiteness is that of white wool. The Mishnah adds, also, some intermediate shades; but it calls "bahaḳ" all those beyond the four shades in question (Neg. i. 1-3).

Limited Leprosy.

3. While the Bible divides the disease into "white leprosy" and "ulcerous leprosy" ("miḥyah"), the Mishnah divides it into "limited" ("ḳeṭannah") and "extended" ("gedolah") leprosy (Neg. viii. 9). Accordingly it expounds Lev. xiii. 9-11 as referring to "limited" leprosy, and Lev. xiii. 12 *et seq.* as applying to "limited" leprosy which has extended, and as such has become clean.

Leprosy if "extended" at the outset is to be treated as limited leprosy (Neg. viii. 7); extension does not render leprosy clean, unless following upon a disease which has shown sure symptoms of real leprosy (Neg. viii. 3). Leprosy should, moreover, be considered extended only when it invades the face (Neg. x. 9) and, if the individual is bald and beardless, the scalp and chin (Neg. vi. 8, viii. 5). If, after the scales of leprosy have spread over nearly the whole body, a bleeding and scaleless ulcer (miḥyah) is observed, the subject is unclean. Similarly, if the scales, having covered almost the whole body, fall off in one place and uncover an old bleeding ulcer, the subject is unclean (Neg. viii. 2).

The bleeding ulcer must be of the size of a lentil in order to render one unclean, in cases both of "limited" and of "extended" leprosy. In case the ulcer develops on the extremities of the body, as on the fingers or toes, or on the ears, nose, breast, etc., the person is not considered unclean (Neg. vi. 7). But if this ulcer had once been covered with scales and had then become open again, the person is unclean, unless the remaining scales are smaller than a "gruel" ("geris"; Neg. viii. 1). Finally, the miḥyah does not make a person unclean if it invades a place previously affected by a "sheḥin" or a burn, or if it develops on the hairy parts of the body, or in the recesses and cavities (Neg. vi. 8). When it settles on parts from which the hair has fallen out, or on parts previously affected by sheḥin or a burn, but which have become entirely healed before the appearance of the leprosy, two cases are to be distinguished, according as the miḥyah has previously been covered with scales or not; in the latter case it does not render the subject unclean.

Consequent on Burns.

4. In regard to leprosy consequent upon sheḥin or a burn (Lev. xiii. 18-28), the Mishnah maintains: (1) If the sheḥin or the burn has not been healed before the appearance of the scales of leprosy, the person is clean (Neg. ix. 2). (2) Where these affections have become completely healed before the appearance of leprosy, only that is to be considered as leprosy which invades parts of the body never before diseased (*ib.*). (3) Finally, leprosy consequent upon sheḥin or a burn is not rendered unclean by the development of a miḥyah, and one so affected can be isolated for seven days once only, not twice, as in the case of an ordinary leper (Neg. iii. 4).

5. In regard to leprosy on the scalp and chin (Lev. xiii. 29 *et seq.*), the Mishnah contains the following:

(1) The symptoms of leprosy here (*i.e.*, leprous scales) may present any color; but in any other part of the body only one or more of the four degrees of white can be presented (Sifra 60a). (2) As the Mishnah distinguishes a "limited" and an "extended" leprosy, so it distinguishes a "limited" and an "extended" neteḳ (Neg. x. 9). (3) The neteḳ does not become unclean in consequence of the presence of a miḥyah, but through the presence of fine white or yellow hair, and through the extension of the disease ("pisyon"; Neg. x. 1). (4) Finally, if the hair of the head or of the chin has fallen out, those parts are to be treated like other parts of the body (Neg. x. 10).

In the Talmud the classification or definition of leprosy and of its symptoms seems to be determined not by medical ideas, but by a literal and indiscriminating adherence to the letter of the Levitical law; Talmudic sages were satisfied merely with communicating the Biblical decisions. The Rabbis appear at times even to confuse true leprosy with eczema.

J. A. S. W.

——**In Modern Times:** Leprosy among Jews is seldom mentioned in modern medical literature. Zombacco ("Bul. de la Société d'Anthropologie de Paris," Oct., 1891) states that the disease is very frequent among the Jews of Constantinople. Buschan, quoting this statement ("Globus," lxvii. 61), argues that the predisposition of the Jews to leprosy is a racial characteristic hereditarily transmitted from the ancient Hebrews to the modern Israelites. In support of this he mentions that the Karaites of Constantinople have not been observed by Zombacco, during his twenty years of medical practise among them, to suffer from leprosy. These Jews Buschan considers Jews only by religion, not by virtue of blood-relationship to the Semites. Ethnically he considers them as derived from the Chazars and other peoples of "Finnic" blood. On the other hand, the Rabbinic Jews of Constantinople, who are derived from "Syro-Arabic Semitic" race, have been often observed by Zombacco to suffer from the disease. He further states that the Mohammedans, Christians, Greeks, Armenians, and other non-Jews in Constantinople are free from it, notwithstanding the fact that they come in contact with the Jews. All this tends to show that the alleged predisposition of the Jews to leprosy is an ethnic trait.

This allegation, based as it is on very scanty evidence, is not confirmed by any other observer. In Russia, where in some provinces leprosy is endemic, the Jews are not observed to be frequently affected, while in some Oriental countries the evidence available tends to show that, on the contrary, the Jews are peculiarly free from leprosy. Thus, Nicholas Senn, speaking of leprosy in Jerusalem, says: "Most of the lepers are Arabs; and the Jews are singularly free from this disease. . . . Among the 47 inmates [of the Jesus Hilfe Hospital] there is only one Jew. Dr. Einsler, during his long and extensive practise in Jerusalem, has seen only five Jews affected with leprosy; and of these one came from Salonica and of the remainder two from Morocco. It seems that the Jerusalem Jews have in the course of time acquired an immunity from this disease, notwithstanding the increase of poverty and unsanitary surroundings" (N. Senn, "The Hospitals in Jerusalem," in "American Medicine," iv. 509-512).

LERIDA (Catalan, **Leyda**; **Ilerda**): City in Catalonia, which as early as the fourteenth century had an important Jewish community possessed of several privileges. Thus, it was exempted from the general obligation to provide the royal court, during its presence in the city, with beds and the necessaries of life. Again, the Jews of Lerida, at the earnest request of the representatives of the congregation, were not compelled to attend the conversion sermons of Maestre Huesca and other Dominicans. In 1306 the congregation was granted permission by the king to receive into its membership ten Jewish families driven from France. The Shepherd persecutions brought great affliction to the community. Seventy Jews surrendered their possessions to the commander of the city, "so that he might bring them in safety to Aragon; but when they got outside the city he slew them with his sword." Eight years later the Jews had to defend themselves against attacks upon their lives. The hatred of the Christians was a constant source of menace to them. In 1325 the right to prepare Passover cakes was refused to them, so that they had to turn to the king for assistance.

The Jews of Lerida engaged in industry and carried on an extensive commerce; they had one large synagogue and several small ones. In 1269 "Nasi Azday" (Ḥasdai) was appointed as rabbi, whom in the following year the king presented with a building-plot. In 1275 the communal laws ("taḳḳanot") were sanctioned by the king. The ominous year 1391 was for the Jews of Lerida one of great calamity. The massacre occurred there Aug. 13; seventy-eight Jews being killed, while most of the survivors accepted baptism. The neophytes transformed the synagogue into a church under the name "S. Maria del Milagro"; in the fifteenth century it was still almost exclusively attended by neophytes. With 1391 the real "aljama" in Lerida ceased; Jews in scant numbers probably continued to live in the city, enjoying the old privileges, but they no longer constituted a congregation. The city soon felt the decline of the taxes formerly paid by the Jews. In 1410 the city council entered into negotiations with the Jews for the purpose of reimposing part of these taxes; but this led to no result.

The poet Joseph bar Sheshet ben Latimi (1308) and the physician Abraham, who, Sept. 12, 1468, performed an operation on King Juan of Aragon for cataract, lived in Lerida.

LERMA, JUDAH BEN SAMUEL: Spanish Talmudist; flourished in the middle of the sixteenth century. He was the author of "Leḥem Yehudah," a commentary on Pirḳe Abot, and of "Derush 'al ha-Neshamah," a treatise on the soul, published together under the former title (Sabbionetta, 1554).

In the preface Lerma laments the burning of the Talmud in Italy, which occurred in 1554, under Pope Julius III. According to Zedner ("Cat. Hebr. Books Brit. Mus." p. 551), the 1554 edition is the second; in that case either the whole preface or the part relating to the burning of the Talmud is an addition. Judah ben Samuel Lerma must not be confounded with Judah Lerma, rabbi of Belgrade (as seems to have been done by Steinschneider and other authorities), who was a pupil of Jehiel Bassani and belonged, therefore, to the seventeenth century. Lerma was the author of a large number of responsa, which, with the exception of thirty, were destroyed by fire; these thirty were rescued from the flames by Lerma's pupil, Simḥah b. Gershon ha-Kohen, who published them, adding a preface, under the title "Peleṭat Bet Yehudah" (Venice, 1647).

Bibliography: Conforte, *Ḳorc ha-Dorot*, pp. 40b, 51b; Fuenn, *Keneset Yisrael*, p. 408; Fürst, *Bibl. Jud.* ii. 233; Steinschneider, *Cat. Bodl.* col. 1337.

J. M. Sel.

LERNER, ḤAYYIM ẒEBI: Russian grammarian and teacher of Hebrew; born at Dubno 1815; died at Jitomir 1889. His early education in Bible and Talmud he received from his father. At the age of thirteen he was married. In 1833, when Wolf Adelsohn went to Dubno and gathered around him a circle of Maskilim, to whom he taught Hebrew grammar and philosophy, Lerner became one of his disciples. He went to Odessa in 1835 and entered the model school of Bezaleel Stern, where Simḥah Pinsker was his teacher in Hebrew grammar. In the same school he also acquired a thorough knowledge of the Russian, German, French, and Italian languages. In 1838 Lerner returned to Dubno and became a teacher of Hebrew; from 1841 to 1849 he taught in Radzivilov; on Nov. 16 of the latter year he was appointed government teacher of the Jewish public school of Berdychev; and in 1851 he was appointed teacher of Hebrew at the rabbinical school of Jitomir, in which position he remained until the school was closed by the government (July 1, 1873).

Lerner's reputation among Hebrew grammarians was founded on his "Moreh ha-Lashon." It is written in a pure, popular Hebrew, and follows the system of grammar of European tongues, enabling the student to acquire the language more easily than did the works of his predecessors. The first edition appeared in 1859; six editions were issued during Lerner's lifetime; and many more have appeared since his death. Lerner was criticized for having adopted his methods from his teacher Pinsker; he himself acknowledged his indebtedness in the second edition of his work (p. 136, note).

Besides this grammar, Lerner wrote "Diḳduḳ Lashon Aramit" (Warsaw, 1875), an Aramaic grammar; "Ma'amar Toledot ha-Diḳduḳ" (Vienna, 1876); and a translation of S. D. Luzzatto's "Diḳduḳ Leshon Talmud Babli" (St. Petersburg, 1880). He left in manuscript: "Yalḳut," a collection of commentaries on the Bible and Rashi, together with critical and literary articles; "Arba' Middot," on the Baraita of the thirty-two Middot; and a Hebrew translation of Young's "Night Thoughts" and other poems.

Bibliography: *Ha-Meliẓ*, 1889, Nos. 76-79; Sokolov, *Sefer ha-Shanah*, i. 62; idem, *Sefer Zikkaron*, p. 66.

H. R. M. R.

LERNER, JOSEPH JUDAH (OSSIP): Russian journalist; born Jan. 1, 1849, at Berdychev; educated at the gymnasium of Jitomir. In 1866 he went to Odessa, where he studied law for a year, and then entered upon a journalistic career. He served for ten years on the staff of the "Odeski Vyestnik," acting as war correspondent for that paper during the Russo-Turkish war of 1877-78. In Bucharest he published during the war a daily paper, "Zapiski Grazhdanina." In 1880 he founded at Odessa a Jewish theater, for which he wrote many plays in Judæo-German. The years 1883 and 1884 he spent in Germany and France as correspondent of the Moscow daily "Russkiya Vyedomosti," writing articles for other Russian papers also. In Hebrew Lerner published: a short sketch on the Chazars (Odessa, 1866); "Ma'amar Biḳḳoret" (*ib.* 1867), a criticism upon Gottlobers; "Yamim mi-Ḳedem" (*ib.* 1868), a tale of Jewish life in Russia; and articles on various topics of the time. Of his dramas in Judæo-German may be mentioned "Zhidovka," "Ḥanukkah," and "Der Fetter Moshe Mendelssohn" (Warsaw, 1889).

Lerner wrote many articles in Russian on the Jewish question, a list of which is to be found in "Sistematicheski Ukazatel," etc., St. Petersburg, 1893. In 1902 Lerner published "Yevrei Novorossiskavo Kraya," a historical sketch of the life of the Jews in South Russia, which, however, is rather a memoir than a history.

Lerner, who has recently become a convert to Christianity, is now (1904) residing in Odessa.

H. R. M. R.

LERNER, MAIER: German rabbi; born in Galicia 1857. He studied in Berlin under Hildesheimer, became rabbi at Winzenheim, Alsace (1884-1890), and preacher for the Federation of Synagogues in London (1890-94), and, since 1890, has been chief rabbi of Altona. He wrote "Anlage und Quellen des Bereschit Rabba" (Berlin, 1882) and has contributed to various periodicals ("Berliner's Magazin für die Wissenschaft des Judenthums," "Der Israelit," "Jüdische Presse," "Jewish World," etc.). His literary work is devoted almost exclusively to the defense of Orthodox Judaism. Lerner married a daughter of Hirsch Plato, a son of Samson R. Hirsch.

Bibliography: Dukesz, *Iwoh Lemoschaw*, Cracow, 1903.

D.

LEROY-BEAULIEU, HENRI JEAN BAPTISTE ANATOLE: French historian; born at Lisieux in 1842. The first works that appeared from his pen were "Une Troupe des Comédiens" and "Essai sur la Restauration de nos Monuments Historiques Devant l'Art et Devant le Budget" (1866). In 1867 he went to Russia to study the political and economic organization of the Slavic peoples, the result of his studies being published under the title "L'Empire des Tsars et les Russes" (3 vols., Paris, 1882-89). In 1881 he was appointed professor of contemporaneous history and of Oriental affairs at L'Ecole Libre des Sciences Politiques, and in 1887 he became a member of the Académie des Sciences Morales et Politiques. From 1883 to 1891 he represented the canton of Auberive in the Conseil Général of the department of Haute-Marne.

In 1879 Leroy-Beaulieu published a critical analysis of the political situation under the Second Empire, entitled "Un Empereur, Un Roi, Un Pape, Une Restauration," and in 1884, under the title "Un Homme d'Etat Russe. Nicolas Milutine," a historical novel vividly depicting the great reformation due to the emancipation of the Russian serfs by Alexander II. Of his other political writings may be mentioned: "Les Catholiques Libéraux, l'Eglise et le Libéralisme de 1830 à Nos Jours" (Paris, 1885); "La France, la Russie et l'Europe" (*ib.* 1888); "La Révolution et le Libéralisme" (*ib.* 1890); "La Papauté, le Socialisme et la Démocratie" (*ib.* 1892); "L'Antisémitisme" (*ib.* 1897); "Les Doctrines de la Haine, l'Antisémitisme, l'Antiprotestantisme, l'Anticlericalisme" (*ib.* 1902). Of chief interest to the Jewish world, however, is his work "Israël chez les Nations" (1893). In this work the author embodies the result of a thorough study of the conditions governing the Russian Jews, and, while he is not lavish of his praise of the oppressed, he is emphatic in maintaining that nothing but emancipation can improve them mentally and morally. "All the virtues that the Jews possess are their own, while their vices are largely due to persecutions by Christian nations."

In the beginning of 1904 Leroy-Beaulieu went to the United States to deliver a series of lectures at some of the American universities (Harvard, Pennsylvania, etc.). The Jewish community of New York, during his sojourn in that city, tendered him a testimonial of appreciation of his vigorous war against anti-Semitism in France, and of his scholarly defense of Jewish character and traditions. Leroy-Beaulieu is a chevalier of the Legion of Honor.

LESSEE. See Landlord and Tenant.

LESSER, ADOLF: German physician and writer on medical jurisprudence; born at Stargard, province of Pomerania, Prussia, May 22, 1851; graduated from Berlin University in 1875. From 1877 to 1884 he was assistant in the pharmacological institute of that university, and from 1879 to 1886 physician at Klinnsmann's lunatic asylum. In 1881 he became privat-docent in pharmacology at the university. In 1886 he was appointed physician-in-chief ("Stadtphysikus") to the board of health of Breslau, at the university of which city he was appointed assistant professor in 1887.

Of Lesser's numerous essays contributed to the medical journals may be mentioned: "Experimentelle Untersuchungen über den Einfluss Einiger Arsenverbindungen auf den Thierischen Organismus," in Virchow's "Archiv"; "Ueber die Localen Befunde beim Selbstmorde Durch Erhängen" and "Ueber die Wichtigsten Sectionsbefunde bei dem Tode Durch Ertrinken in Dünnflüssigen Medien," in the "Vierteljahresschrift für Gerichtliche Medizin."

Lesser is the author also of the well-known "Atlas der Gerichtlichen Medizin," 1884-92, and "Zur Lehre vom Abort," "Zur Lehre von den Kopfverletzungen Neugeborener," and "Erkrankungen Sowie Præ- und Postmortale Verletzungen des Halses," in Neisser's "Stereoskopischer Medizinischer Atlas."

Bibliography: Pagel, *Biog. Lexikon*, s.v., Vienna, 1901.

LESSER, ALEXANDER: Polish painter; born at Warsaw 1814; died there 1884. He was educated at the Warsaw lyceum and studied art at Warsaw University, at the Academy of Dresden (1833-35), and at Munich under Cornelius and Schnorr (1842). He devoted himself mainly to painting scenes from Polish history; and in search of historical material he made extensive tours through Germany, France, Belgium, and England. Among his historical paintings the best known are: "Wincent Kadlubek," "Skarbek Habdank," "The Young Boleslaw," "The Wry-Mouthed," and "Wanda and Jadwiga." For his "forty portraits of Polish kings" (reproductions published at Warsaw in 1860) he was elected a member of the Cracow Academy of Science.

Lesser was also active as an art critic and as a writer of historical sketches, contributing to the Polish periodicals "Klosy," "Tygodrik Illustrowany," and others.

Bibliography: Orgelbrand, *Encyklopedja Powszechna*, ix.

LESSER, EDMUND: German physician; born at Neisse May 12, 1852; educated at the universities of Berlin, Bonn, and Strasburg (M.D. 1876). He became assistant at the dermatological clinic at Breslau; in 1882 established himself as privat-docent at the University of Leipsic; was appointed assistant professor in the University of Bonn in 1892; in 1896 became chief physician of the syphilitic department at the Charité Hospital at Berlin; and in 1897 was appointed chief of the newly founded dermatological and syphilitic dispensary of the university in that city.

Of Lesser's works may be mentioned, besides his "Lehrbuch der Haut- und Geschlechtskrankheiten" (10th ed. 1890): "Ueber Syphilis Maligna"; "Beiträge zur Lehre vom Herpes Zoster"; "Ueber Nebenwirkungen bei Injectionen Unlöslicher Quecksilberverbindungen"; "Ueber Syphilis Insontium"; "Ueber Ischias Gonorrhoica"; "Die Aussatzhäuser des Mittelalters"; and "Zur Geschichte des Aussatzes."

LESSER, LOUIS: German soldier; born at Neustadt about 1850; served in the Second Brandenburg Dragoons in the Franco-Prussian war. On Nov. 18, 1870, while on patrol work between Sens and Villeneuve, his comrades being dispersed in various directions, he was surprised by six of the enemy. He stood his ground, and on the return of his comrades advanced and captured the captain of the francs-tireurs who had attacked him.

S. J.

LESSER, LUDWIG: German poet, editor, and publicist; born at Rathenow, province of Brandenburg, Prussia, Dec. 7, 1802; died at Berlin Dec. 2, 1867. When very young he went to Berlin, and became a regular contributor to most of the literary periodicals of that city (often under the pseudonym "Ludwig Liber"). The humorist Saphir was attracted by Lesser's work and personality, and secured him for his literary staff. The two became very firm friends, and in 1827 they founded the Literarische Sonntags-Verein. Lesser wrote "Chronik der Gesellschaft der Freunde in Berlin zur Feier Ihres Fünfzigjährigen Jubiläums" (Berlin, 1842).

A selection of Lesser's poems was published under the title "Ausgewählte Dichtungen," Berlin, 1870; and the gold medal for art and science was conferred upon him by King Frederick William III. A characteristic epigram by him, of which the following is a free translation, gives some measure of his power:

One thing to Life you owe:
Struggle, or seek for rest.
If you're an anvil, bear the blow;
If a hammer, strike your best.

Lesser was devoted to the interests of the Jews: he was one of the founders of the Jüdischer Kulturverein, of a society for the aid of Jewish teachers, and of the Berlin Reform congregation.

Bibliography: R. Lesser, in preface to *Ausgewählte Dichtungen*.

S. M. Co.

LESSING, GOTTHOLD EPHRAIM: German poet and critic; born Jan. 22, 1729, at Kamenz, Upper Lusatia; died Feb. 15, 1781, at Brunswick.

Toleration and a striving after freedom of thought led him to condemn all positive religions in so far as they laid claim to absolute authority, and to recognize them merely as stages of historical development. A natural consequence of this principle was his sympathetic attitude toward the Jews; for he deemed it inconsistent with the dictates of religious liberty to exclude for religious reasons a whole race from the blessings of European culture.

In his comedy "Die Juden," one of his earliest dramatic works, he stigmatized the dislike of the Gentiles for the followers of the Jewish religion as a stupid prejudice. He went herein further than any other apostle of toleration before or after him. The full development and final expression of his views on this problem, however, are found in his drama and last masterpiece, "Nathan der Weise" (1779), Lessing thus beginning and ending his dramatic career as an advocate of the emancipation of the Jews.

The figure of *Nathan*, modeled in the main on that of his friend Moses Mendelssohn, was bound to convince the world that the tenets of toleration and humanity could be enunciated even by a representative of the race so bitterly hated by the world. The legend of the three rings, in which Christianity, Islam, and Judaism are allegorically represented as brothers, each deeming to possess the original magic ring, but all of them having, in reality, been cheated of it, clearly indicates that Lessing wished to represent the Jew as a man, and not Judaism as a dogmatic system. The prize of supremacy is not awarded to this or that confession, but to humanity and morality, which are not bound to any particular faith.

Lessing's "Nathan" had a liberating effect on the Jews in more ways than one. In the first place, the mere fact that he chose the Jew *Nathan* as his mouthpiece could not pass unnoticed, and was sure to act as a hindrance to persecution; and, secondly, he stimulated the ethical consciousness of the Jews themselves, who could not fall below the standard set up by a noble non-Jew.

While Lessing condemned the belief in positive revelation, he accepted its general concept, seeing in the dogmatic teachings of both the Old and New Testaments efficient educational instruments for the moral elevation of mankind.

In short, Lessing raised Judaism in the esteem of the European nations not only by showing its close connection with Christianity, but also by demonstrating the importance of Mosaism in the general religious evolution of humanity. It was really Lessing who opened the doors of the ghetto and gave the Jews access to European culture. In a certain sense he awakened Moses Mendelssohn to the consciousness of his mission; and through Mendelssohn Lessing liberated Judaism from the most heavy chains of its own forging.

As a Biblical critic Lessing is equaled by none of his contemporaries, and by very few of his predecessors.

S. M. Frie.

LESSMANN, DANIEL: German historian and poet; born at Soldin, Neumark, Jan. 18, 1784; committed suicide at a place between Kropstadt and Wittenberg Sept. 2, 1831. He attended the Joachimsthal'sche Gymnasium in Berlin, and had begun the study of medicine when the war of the allied powers against Napoleon broke out in 1813. He fought in the ranks, was wounded at the battle of Lützen (May 2, 1813), and on recovering remained in the field until the end of the war. When peace was restored he resumed his medical studies. He went as private teacher to Vienna, and removed later to Italy, remaining some time in Verona.

In 1824 he settled in Berlin and devoted himself to literary work, contributing to various periodicals sketches of life in southern countries, historical studies, short stories, and poems. A collection of his poems was published under the title "Amathusia," Berlin, 1824. In 1826 his "Zwölf Wanderlieder eines Schwermüthigen" appeared in Berlin, and four years later another volume was issued under the title "Gedichte," *ib.* 1830. In his poetry there is easily discernible the influence of Heine, with whom he was on friendly terms, and in whose letters to Moser there are frequent references to Lessmann.

Lessmann's contributions to imaginative prose literature include the novels "Louise von Halling," 2 vols., *ib.* 1827, which attracted the attention of Goethe, and "Die Heidemühle," published in two volumes seven years after his death. To Lessmann belongs much of the credit for the introduction of modern Italian literature into Germany through his translation of Manzoni's "I Promessi Sposi," and of "La Monaca di Monza," by Giovanni Rossini.

His important historical work was the "Mastino della Scala: Ein Beitrag zur Gesch. der Oberitalienischen Staaten im Mittelalter," *ib.* 1828. In 1829 and 1830 appeared successively the two volumes of "Biographische Gemälde," which included historical studies of Philip the Beautiful, Alfonso Albuquerque, Innocent III., and Prince Michael Glinski. Much of the "Nachlass," 2 vols., *ib.* 1837–38, is devoted to valuable historical work. Lessmann left in manuscript a voluminous "Weltgeschichte des Alterthums," which has never been published.

His seven years of literary activity were years of profound melancholy. Lessmann had high aspirations and great ambition. He dreamed of securing some position of eminence; and it appears, from the answer of Moser to one of Heine's letters, that in 1824 Lessmann adopted Christianity in order that he might realize his hopes. Nothing came of all his efforts in this direction; and he fell into a state of despondency, which is reflected in his poetry and in his "Wanderbuch eines Schwermüthigen," 2 vols., *ib.* 1831–32. One day Lessmann left Berlin on the pretext of taking a pedestrian tour to Leipsic and Dresden, and was found hanged by his own act.

LETTER-CARRIERS, JEWISH: Jews carried letters to their coreligionists, apart from the regular post. In those business centers where a large Jewish population existed, such as Hamburg, Prague, Gross Glogau, Polish Lissa, Breslau, and Frankfort-on-the-Main, Jews, and at times even Jewesses, are found acting as letter-carriers under state control. It was necessary to employ them in the postal service, as it was almost impossible for Christian letter-carriers to deliver letters addressed in Hebrew. Another reason may have been the fact that the Jews, in their relations with the post, were subject to exceptional laws.

The only detailed notices of Jewish letter-carriers are furnished by the archives of Breslau and Frankfort; but the position of the letter-carriers in these places was no doubt typical of their status elsewhere. The Jewish letter-carrier, or "Post-Jude," in Breslau, is first mentioned in a document dated Dec. 13, 1722, which, however, allows the inference that the office had existed for many years before that date. It was maintained until the Silesian wars, after which time Breslau was no longer included in the imperial postal district of Habsburg.

The Jewish letter-carrier of Breslau, as he neither took any oath of office nor received any salary, was not really a government official. His whole income consisted merely of the postage paid by the recipients of the letters. As, however, there were no fixed postal rates, the amount received was so small that the letter-carrier had to pursue in addition some other occupation. That the postal authorities tolerated this state of affairs is shown by the fact that when the letter-carrier was absent on other business, his wife was allowed to take his place.

The first mention of a Jewish letter-carrier in Frankfort-on-the-Main occurs in a decree dating from the middle of the eighteenth century, and setting forth the regulations which the Jews must observe in their relations with the Thurn and Taxis post; but in Frankfort, too, the office had existed before that time. From 1748 until 1846 it was held by members of the same family, and it was abolished owing to altered conditions. The nephew and assistant of the Jews' letter-carrier who was then in office remained in the Thurn and Taxis service with the same rights and duties, and in 1867 was taken over into the Prussian service.

In Frankfort, as in Breslau, the Jewish letter-carrier received no pay, but two kreutzers were collected from the addressee for every ordinary letter, and six kreutzers for a registered letter. In proportion as international commerce developed and the Jewish interests therein increased, the income of the letter-carrier became correspondingly larger. The last incumbent of the office had a yearly income of 5,000 gulden, out of which, in very busy times, he had to pay his assistants 150 florins each. Besides, when other posts, such as that of Hesse-Cassel, became united to that of Thurn and Taxis, he was required to pay Count Thurn and Taxis 400 gulden yearly. He ultimately retired on a pension of 1,600 florins.

LETTER-WRITING AND LETTER-WRITERS: The art of conveying information by letter ("miktab," "iggeret," "sefer") was unknown to the Hebrews in the first stages of their history. From the times of the Patriarchs to those of King Saul the Bible mentions only messengers who transmitted orally the communications entrusted to them (comp. Num. xxiv. 12; Judges xi. 13; I Sam. xi. 9). The first letter recorded is that written by David to Joab and sent by the hand of Uriah (II Sam. xi. 23, 25). David and his successors had special secretaries ("soferim") charged with the writing of letters and circulars; and these secretaries occupied an exalted position in the state. The Kenites living at Jabez were noted for their skill in writing (comp. I Chron. ii. 55). As among the Greeks and Romans, it seems to have been customary among the ancient Hebrews to seal a letter sent to a prominent person. To show his slight respect for the prophet's personality, Sanballat sends an open letter to Nehemiah (Neh. vi. 5).

In Talmudic Times.

With the expansion of commerce in Talmudic times the use of letters became a necessity, and nearly every town had its official letter-writer (לבלר = "libellarius"). The Rabbis forbade a scholar to reside in a city where there was no such functionary (Sanh. 17a). The Talmud has preserved the original text of two letters: one was addressed by the community of Jerusalem to that of Alexandria and refers to the sojourn of Judah ben Ṭabbai in the latter city; the other was sent by Gamaliel I. to the Jews of Upper and Lower Galilee and treated of the intercalation of an additional month in the year (Yer. Ḥag. ii.; Sanh. 11b). Besides letters of information or of friendship, there are traces in the Talmud of consultatory letters dealing with scientific subjects (comp. Ḥul. 95a). To this class belongs that important branch of rabbinical literature which is known by the name "She'elot u-Teshubot" (Responsa), and which developed after the geonic period (see Joel Müller, "Briefe und Responsen in der Vorgaonischen Jüdischen Litteratur," in "Jahresbericht der Lehranstalt für Jüdische Wissenschaft," Berlin, 1886).

Style and Composition.

The epistolary style varied according to the country. In the East it was modeled after that of the Arabs, who exercised care in the elaboration of their letters. The first, often the greater, part of the letter, usually written in rimed prose and adorned with Biblical quotations, formed a kind of introduction in which the writer attributed to his correspondent all the virtues conceivable to the imagination of an Oriental. In western countries expression was more moderate: the use of titles, however, was general, as it still is among the conservative Jews in Russia, Poland, and Galicia. The least important rabbi is addressed as the "Great Gaon," "Great Light," "Wonder of the Generation," "Pillar of Israel," or with similar extravagant epithets. Like the Arabs, the Jews in the Middle Ages neglected to place the date at the head of their letters; in modern times the custom was established of giving, after the formula ב"ה (= "With the help of God"), with which the letter began, the day of the week, the Sabbatical section (sometimes also the day of the month), and the place. "Friday" was usually followed by the abbreviation עש"ק (= "eve of the holy Sabbath"). The secrecy of letters was assured in the tenth century by R. Gershon (Me'or ha-Golah), who declared under the ban any one who should open without permission a letter not addressed to him.

Celebrated Collections.

The most famous letters in Jewish literature—because of both their contents and the prominence of their writers—are: that of Ḥasdai ibn Shaprut to the king of the Chazars; "Iggeret R. Sherira Gaon," on the sequence of tradition and the redaction of the Talmud; the various letters of Maimonides inserted in the "Pe'er ha-Dor"; the letters exchanged between the French rabbis and scholars and those of Spain on the study of philosophy ("Minḥat Ḳena'ot"); "Iggeret al-Tehi ka-Aboteka," addressed by Profiat Duran to En Bonet; the collection of letters on Shabbethai Ẓebi published by Ẓebi Ashkenazi (Ḥakam Ẓebi), Moses Ḥagiz, and Jacob Emden. As a curiosity, mention may be made of the letter addressed by the rabbis of Jerusalem to the alleged descendants of Moses ("Bene Mosheh," Amsterdam, 1731). The most noteworthy letters of modern times are: those of Moses Mendelssohn ("Iggerot RaMaD," Vienna, 1792); of Naphtali Herz Wessely included in the "Megalleh Ṭamirin" (*ib.* 1819); of J. Perl written in the style of "Epistolæ Obscurorum Virorum"; "Iggeret YaSHaR," by Isaac Samuel Reggio (*ib.* 1834); "Iggerot ShaDaL," by Luzzatto (Przemysl, 1883); and "Miktabe YaGeL," by Judah Löb Gordon (Warsaw, 1894).

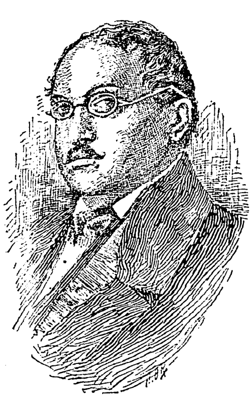
Formularies for Letters.

From the sixteenth century Jewish literature was enriched with a number of formularies of Hebrew and Judæo-German letters. The first of this kind was the "Iggeret Shelomim," published at Augsburg in 1534 and republished with a Latin translation by Buxtorf the Younger at Basel in 1603. The characteristic features of this formulary, as of all the others published until 1820, were the stilted and bombastic style, the misuse of Biblical and Talmudical quotations, and the extravagance of the headings of the letters. In the "'Iṭṭur Soferim" (see the list below), for instance, there is such a heading; which, rendered into English, it reads thus: "His [the correspondent's] cheeks are as a bed of spices [Cant. v. 13], a ladder on which angels of God are ascending and descending [Gen. xxviii. 12]. He is of a reliable character; keeps secrets; shows power to Jew and Gentile; he is a righteous man upon whom the world is based." As a model of a business letter, in which the writer has to inform his correspondent that some salt which had been purchased is on the road, the "Ẓaḥut ha-Meliẓah" (see below) gives the following: "And he looked back from behind him and became a pillar of salt on the road," etc. (comp. Gen. xix. 26). A new era in letter-writing was inaugurated by Shalom ha-Kohen. In his formula "Ketab Yosher" (see below) he endeavored to do away with the obsolete forms and to cause the young, for whom his formulas are intended, to adopt a modern style of writing. He was followed in this endeavor by many writers of talent who produced formularies of real literary value. The following is a list of formularies published up to the last years of the nineteenth century:

אגרת שלומים, anonymous. Augsburg, 1534; Basel, 1603.
בריפשטעללער, in Judæo-German, by Judah Löb Liondor. Wilna, 1820, 1844, 1846.
בריף לעהרער, in Judæo-German, by Hirsch Liondor. Wilna, 1855.
דביר, by Mordecai Aaron Günzburg. Wilna, 1844; 2d ed., 1855.
דברני ספר, by Abraham Israel Kukelstein. Wilna, 1895.
חליפות אגרות, by H. Baueli. Wilna, 1866.
יד ועט, by Tobias Shapiro. Wilna, 1891.
כתב יושר, by Shalom ha-Kohen. Vienna, 1820; Wilna, 1858.
כתב יושר החדש, anonymous. Warsaw, 1869, 1871.
כתב ישראל, by Israel Segal. Sudilkov, 1796.
כתב נבחר, by Moses of Lemberg. Cracow, 1659; Prague, 1705.
לשון למודים, by Eliakim Mellamed. Amsterdam, 1686.
מגלת ספר, by Eliezer Beër Silbermann. Johannisberg, 1854.
מבטח עוז, in Hebrew and Judæo-German, by Azriel Selig Galin, Warsaw, 1889.
מכתב לבני הנעורים, by Baer Friedmann. Berdychev, 1890.
מכתב משלש, in Hebrew, Judæo-German, and Russian, by Feigensohn. Wilna, 1882.
מכתב משלש עם מרוץ אגרת החדש, by Abraham Jacob Paperna. Warsaw, 1884.
מכתבי בני קדם, by M. Letteris. Vienna, 1867.
מכתבי נעורים, by Israel Beer Riesberg. Warsaw, 1887.
מכתבי עברית, in Hebrew and Judæo-German, by S. Neumann. Vienna, 1815, 1834.
מכתבי עברית, in Hebrew and Judæo-German, anonymous. Lemberg, 1860.
מכתבי עברית, by Israel Busch. Vienna, 1847.
מכתבי עברית, by Israel Knöpflemacher. Vienna, 1855.
מכתבי שפת קודש, by Emanuel Bondi. Prague, 1857.
מכתבים בספר, by Lazar Isaac Shapiro. Warsaw, 1871.
מכתבים ללמד, by Naphtali Maskileison. Warsaw, 1876.
מכתבי השלם, by Abraham Markus Pjurko. Warsaw, 1872.
מערכת מכתבים, by Paradiesthal. Warsaw, 1853.
מפתח בית דוד, by David Zamosc. Breslau, 1823.
מריץ אגרות, in Hebrew and Russian, by A. J. Paperna. Warsaw, 1874, 1876.
עט סופר, by Moses Cohen. Fürth, 1691.
עט סופר, by Ẓemaḥ Landau. Wilna, 1830, 1833.
עט סופר החדש, by Ẓemaḥ Landau. Wilna, 1835, 1844, 1848.
עט עברי, by Tobias Shapiro. Warsaw, 1878.
עטור סופרים, by Moses Landsberg. Hamburg, 1721, and many other editions.
צחות המליצה, by Wolf Buchner. Prague, 1805.
קביצת מכתבים, by Ḥayyim Wittkind. Warsaw, 1873.

קסת הסופר, by Jacob Lapin. Berlin, 1857.
קרית סופר, by Mordecai Aaron Günzburg. Wilna, 1835, 1847, 1855; Warsaw, 1837, 1883.
שבט סופר, by Mendel Dolitzky. Vienna, 1883.
תולדות אדם, anonymous. Frankfort-on-the-Main, 1736.

G. I. Br.



Meïr Halevi Letteris.

LETTERIS, MEÏR HALEVI (MAX): Austrian scholar and poet; born Sept. 13, 1800, at Zolkiev; died at Vienna May 19, 1871. He was a member of a family of printers that originally came from Amsterdam. At the age of twelve he sent a Hebrew poem to Nachman Krochmal, who was then living at Zolkiev. Subsequently he made the acquaintance of Krochmal, who encouraged him in his study of German, French, and Latin literature. In 1826 he entered the University of Lemberg, where for four years he studied philosophy and Oriental languages. In 1831 he went to Berlin as Hebrew corrector in a printing establishment, and later in a similar capacity to Presburg, where he edited a large number of valuable manuscripts, and to Prague, where he received the degree of Ph.D. (1844). In 1848 he settled finally in Vienna.

Letteris' chief poetical work in German, "Sagen aus dem Orient" (Carlsruhe, 1847), consisting of poetic renderings of Talmudic and other legends, secured for him, though for a short time, the post of librarian in the Oriental department of the Vienna Imperial Library. His reputation as the foremost poet of the Galician school is based on his volume of poems "Tofes Kinnor we-'Ugab" (Vienna, 1860), and especially on his Hebrew version of "Faust," entitled "Ben Abuya" (*ib.* 1865). He has exerted a considerable influence on modern Hebrew poetry. One of his best poems is his Zionistic song "Yonah Ḥomiyyah," which has become very popular. His numerous translations are of incontestable value, but his original poems are as a rule too prolix. His Hebrew prose is correct, though heavy.

Besides the works already mentioned the following deserve special notice: "Dibre Shir" (Zolkiev, 1822) and "Ayyelet ha-Shaḥar" (*ib.* 1824), including translations from Schiller and Homer, and poems by Letteris' father; "Ha-Ẓefirah" (Zolkiev and Leipsic, 1823), a selection of poems and essays; "Palge Mayim" (Lemberg, 1827), poems; "Gedichte" (Vienna, 1829), German translations from the Hebrew; "Geza' Yishai" (Vienna, 1835), Hebrew translation of Racine's "Athalie"; "Shelom Ester" (Prague, 1843), Hebrew translation of Racine's "Esther"; "Spinoza's Lehre und Leben" (Vienna, 1847); "Neginot Yisrael," Hebrew rendering of Frankel's "Nach der Zerstreuung" (*ib.* 1856); and "Bilder aus dem Biblischen Morgenlande" (Leipsic, 1870).

He was the editor of "Wiener Vierteljahrsschrift," with a Hebrew supplement, "Abne Nezer" (*ib.* 1853), and of "Wiener Monatsblätter für Kunst und Litteratur" (*ib.* 1853).

LETTERS IN EVIDENCE. See Evidence.

LEVANDA, LEV OSIPOVITCH: Russian author; born at Minsk 1835; died at St. Petersburg 1888. Levanda graduated from the rabbinical school in Wilna in 1854; was appointed instructor in the government school of his native town; and held the position of adviser on Jewish affairs ("learned Jew") to the governor-general of Wilna. He began his literary career early in life. In the fifties he was a contributor to the "Minskiya Gubernskiya Vyedomosti"; in 1860 he published in "Razsvyet," edited by Osip Rabinovitch, his "Depo Bakaleinyikh Tovarov"; in 1861 he began to publish in "Sion" his "Drug Bernar." He contributed to many periodicals, among them "Vilenskiya Gubernskiya Vyedomosti," of which he was the editor; "St. Peterburgskiya Vyedomosti"; and "Vilenski Vyestnik." In the last-named appeared his story "Samuel Gimpels." In 1876 he published a collection of sketches under the title "Ocherki Proshlavo," followed later by a number of stories, such as "Chetyre Guvernera," "Lyubitelski Spektakl," "Iz Dobravo Staravo Vryemeni," etc., in "Russki Yevrei," "Yevreiskoe Obozrenie," and "Voskhod." In 1876, also, he took active part in the publication of Landau's "Yevreiskaya Biblioteka." To this period belong his "Goryacheye Vryemya," "Gnyev i Milost Magnata," and "Avraam Yosefovich." In the eighties Levanda continued his literary activities with great zeal, publishing many letters and articles bearing on the Jewish question, besides two novels, "Ispovyed Dyeltza" and "Bolshoi Remiz," and other stories in "Nedyelya" and elsewhere.

Most of Levanda's writings deal with Jewish life and Jewish problems. He took a deep interest in everything that concerned his coreligionists, and rendered many a service to the Jews of Lithuania. He exposed (1863) the false witnesses in a trial of several Jews of the government of Kovno on the charge of ritual murder. He was at first a warm advocate of assimilation, and upbraided the Jews for their apathy and ignorance, stating his views in a series of novels and belletristic sketches. Later, his views underwent a change, and Levanda began to see that the salvation of the Russian Jew was not in assimilation. Levanda was a keen observer, a skilful but dry narrator, and possessed an intimate knowledge of Jewish life. His best novels are those which have no object, as "Ocherki Proshlavo" (1875), "Tipy i Siluety" ("Voskhod," 1881), "Avraam Yosefovich" ("Voskhod," 1885, 1887), etc. In his novel "Goryacheye Vryemya" (Yevreiskaya Biblioteka, 1871-73), which treats of the Polish insurrection, the author combats the idea of assimilation, which had for a while carried away the Jews of Poland. After the riots of 1881 Levanda became an advocate of the Palestinian movement. His works are enumerated in the "Sistematicheski Ukazatel," etc., St. Petersburg, 1892.

H. R. J. G. L.

LEVEN, MANUEL: French physician; born in 1831. He studied in Paris at the Lycée Henri IV., and in 1851 entered the Institut Agronomique at Versailles. In the following year this institution was suppressed on suspicion of republicanism, and Leven, while lecturing on science at the Lycée Bonaparte, began his medical studies (M.D. 1860; his thesis, "Rapports de l'Idiotie et du Crétinisme," gained a gold medal from the Société Médicopsychologique of Paris). In 1863 he was appointed physician to the Compagnie du Chemin de Fer du Nord, and in 1870-71 was ambulance-surgeon of the ninth arrondissement of Paris and of the Bataillon du Chemin de Fer du Nord, receiving the military ribbon of the Legion of Honor in 1871. From 1871 to 1878 he was a member of the Board of Health of Paris, and from 1873 to 1889 head physician of the Hôpital Rothschild. Leven is especially noteworthy for his work in gastric pathology. He is the author of "Traité des Maladies de l'Estomac," 1879; "L'Hygiène des Israélites," 1883; "Estomac et Cerveau," 1884; "La Névrose," 1887; "Système Nerveux et Maladies," 1893; and "La Vie, l'Ame, et la Maladie," 1902.

Leven is known also as a philanthropist. Together with Eugène Manuel he founded, in 1848, the first night-school for Jewish apprentices, which developed into a manual-training school; and he has been the president of its administrative council since 1879. He is also one of the founders of the Alliance Israélite Universelle, vice-president of the Comité des Ecoles Israélites, member of the Comité de Refuge du Plessis-Piquet (an agricultural school), and chevalier of the Order of Isabella the Catholic.

S. J. KA.

LEVEN, NARCISSE: French lawyer and communal worker; born at Urdingen, on the Rhine, Oct. 15, 1833; educated at the Lycée Henri IV. and at the Faculty of Law in Paris. For five years he was the secretary of Adolphe Crémieux, and he was an active member of the group which opposed Napoleon III. and which included Jules Ferry, Spuller, and Hérold. During the Franco-German war he was general secretary of the Ministry of Justice, but he resigned on the retirement of its minister, Adolphe Crémieux, and has since refused all government positions. From 1880 to 1887 he was a member of the Municipal Council of Paris, of which he became vice-president.

Leven took an active part in the founding of the Alliance Israélite Universelle, becoming successively its secretary, vice-president (1883-98), and, after S. Goldschmidt's death, president. He is, in a certain sense, the historian of the Alliance, both through his clear and exhaustive reports and through the orations he has delivered at the funerals of his colleagues. For thirty-six years he has been a member of the Jewish Consistory of Paris, becoming its vice-president on the death of Michel Erlanger. He is a member also of the committees of the Rabbinical Seminary and the Ecole de Travail, and is president of the Jewish Colonization Association.

S. J. KA.

LEVENSON, PAVEL YAKOVLEVICH: Russian lawyer; born at Kamenetz, Podolia, 1837; died at St. Petersburg Jan. 16, 1894. In 1863 he went to St. Petersburg, where he devoted himself chiefly to law. In 1871 he graduated at the university there, and in 1877 became an advocate in the circuit court of justice.

Levenson contributed articles on Jewish subjects to the "Voskhod" and to other journals, was one of the editors of the "Suebny Vyestnik," and was editor of the department of criminology of the "Journal Grazhdanskavo i Ugolovnavo Prava." He was also the author of the biographies of Boccaria and Benthan in "Pavlenkovs Biografii Zamyechatelnykh Lyudei." His brother was **Osip Levenson**, advocate in the circuit court of Moscow (d. 1895). Osip was the musical critic of the Moscow daily "Russkiya Vyedomosti"; his articles were afterward published in Moscow under the titles "V Kontzert Zalye" (1880-81) and "Iz Oblasti Muzyki" (1885).

H. R. A. S. W.

LEVENTRITT, DAVID: American lawyer and judge; born at Winnsboro, South Carolina, Jan. 31, 1845; A.B. 1864, Free Academy (now College of the City of New York), and LL.B. 1871, University of the City of New York. He practised law in New York, acting as special counsel for the city in important condemnation proceedings; and since Jan. 1, 1899, he has been a justice of the Supreme Court of the state of New York.

Leventritt was for a number of years vice-president of the Aguilar Free Library, and is associated with many of the Jewish charitable institutions in New York city.

A.

LEVERTIN, OSKAR IVAR: Swedish poet and critic; born at Gryt, East Gotland, July 17, 1862; educated at the University of Upsala (Ph.D. 1882), where, in 1889, he was appointed docent; four years later he became professor of literature at the University of Stockholm. His early work, "From the Riviera: Sketches from the Coast of the Mediterranean," and the collections of stories, "Småmynt" and "Konflikter, Nya Noveller" (1885), though realistic in tendency, are distinguished for exuberance of imagination. "Lifvets Fiender" (1891) marks a change in manner, and in "Legender och Visor," a volume of poems, he appears as a pronounced romanticist. These poems attracted much attention by their sentiment and finished form, and the succeeding volume, "Nya Dikter," placed Levertin in the front rank of Swedish romantic poets. His novel "Magistrarne Österås" appeared also in Germany. He is also a critic and essayist, his principal productions in this field being: "Teater och Drama Under Gustaf III."; "Gustaf III., som Dramatisk Författare"; "Johan Welander"; "Fran

Gustaf III. Dagar"; "Svenska Gestalter"; "Diktare och Drömmare"; etc.

s. J. Wo.

LEVETUS, CELIA (CELIA MOSS): English writer; born at Portsea 1819; died at Birmingham 1873; daughter of Joseph and Amelia Moss of Portsea. At the age of eighteen Celia, in conjunction with her sister **Marion,** published a volume of poems bearing the title "Early Efforts. By the Misses Moss of the Hebrew Nation" (1838; 2d ed. 1839). The work was dedicated to Sir George Staunton. The next joint work in which the sisters engaged was the "Romance of Jewish History" (1840). This was published by subscription, among the subscribers being Sir Edward Bulwer Lytton, to whom the work was dedicated, and Lord Palmerston. The "Romance" was followed by "Tales of Jewish History" (1843).

The above-mentioned works were written in London, where the two sisters had settled in order to take up the profession of teaching. Besides publishing various poems and short stories, the two sisters founded "The Sabbath Journal" (1855), which, however, had only a brief existence. Subsequently Celia Moss married Lewis Levetus of Birmingham, to which city she removed, and for a time her literary efforts ceased. Her last work, "The King's Physician" (London, 1873), was written during the long and painful illness which ended in her death.

J. I. H.

LEVI (לוי).—Biblical Data: Third son of Jacob by Leah and one of the twelve Patriarchs of the tribes of Israel; born at Padan-aram (Gen. xxix. 34, xxxv. 23; I Chron. ii. 1). The name is derived from לוה (= "to be joined"; "Now this time will my husband be joined unto me," Gen. xxix. 34). Levi joined Simeon in the destruction of the Shechemites to avenge the honor of their sister Dinah, for which both were severely censured by their father (Gen. xxxiv. 25-30). When Jacob called his sons together to bless them, Levi and Simeon, notwithstanding their plea that they had acted in defense of their sister, were again condemned (Gen. xxxiv. 31, xlix. 5-7). Levi had one daughter, Jochebed, the mother of Moses, and three sons; he emigrated with them to Egypt with his father and brothers, and died there at the age of 137 years (Gen. xlvi. 8, 11 *et seq.*; Ex. i. 1-2; ii. 1; vi. 16, 20).

J. M. Sel.

——In Apocryphal and Rabbinical Literature: Levi, as ancestor of the priestly tribe chosen to guard the Sanctuary and the Law, appears prominently in both apocryphal and rabbinical literature. At variance with Gen. xxix. 34 and Num. xviii. 2, 4, the name "Levi" is interpreted as "the one who joins the sons to their Father in heaven" (Gen. R. lxxi. 5; see another interpretation in Ex. R. i. 4). He was "separated" by his father, Jacob, in accordance with the latter's vow (Gen. xxviii. 22), as the tenth son, either by counting from the youngest upward or by some more complicated process, and so consecrated to the priesthood (Book of Jubilees, xxii. 3-10; Targ. Yer. to Gen. xxxii. 25; Gen. R. lxx. 7; comp. Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," p. 97; comp. Pirḳe R. El. xxxvii., according to which he was consecrated by the archangel Michael). In the Testaments of the Twelve Patriarchs (Levi, 1-9) are described two visions Levi had—before and after he had avenged the crimes perpetrated by Hamor, the son of Shechem. In the first vision he saw the seven heavens with all their mysterious contents, and after the secrets of the Messianic time and the Judgment Day had been disclosed to him he received a sword and a shield with which to make war against the Amorites. In the vision following the extermination of the Shechemites he beheld seven angels bringing him the seven insignia of the priesthood, of prophecy, and of the judgment, and after they had anointed him and initiated him into the priesthood they disclosed to him the threefold glory of his house: the prophecy of Moses, the faithful servant of the Lord; the priesthood of Aaron, the high priest, and his descendants; and the possession of the royal scepter and the priesthood together (in the Maccabean dynasty) after the pattern of Melchizedek: high priests, judges, and scribes. His grandfather Isaac instructed him in the law of God and in the statutes of priesthood. In Jubilees, xxxi. 12-17, also, Levi is told by Isaac, with reference to John Hyrcanus, of the future greatness and threefold glory of his house (see Charles, "Book of Jubilees," p. 187; comp. Targ. Yer. to Deut. xxxiii. 11).

Visions.

The twofold rôle in which Levi is represented in Deut. xxxiii. 8-11 (verse 11 originally followed verse 7, Judah's blessing) appealed with special force to the age of John Hyrcanus, who was both high priest and warrior-king, victorious over the Gentiles. Accordingly, in the war of the sons of Jacob against the Amorites, which forms a parallel to the war of the Maccabees against the surrounding tribes, Levi also took part (see Midr. Wayissa'u in Jellinek, "B. H." iii. 1-5; "Chronicles of Jerahmeel," p. 83, Gaster's transl. 1899; Jubilees, xxxiv. 1-9; Test. Patr., Judah, 3-5). In the Prayer of Asenath Levi is described as a prophet and saint who forecasts the future while reading the heavenly writings and who admonishes the people to be God-fearing and forgiving. He was entrusted with the secret writings of the ancients by his father, Jacob, in order to keep them in his family for all generations to come (Jubilees, xlv. 16).

The Tribe.

The epithet "thy pious [A. V. "holy"] one" given to Levi, and the whole passage of Deut. xxxiii. 8-10, furnish the haggadic support for the characterization of Levi, as well as of the tribe of Levi, as superior to the rest in piety. Accordingly it is said (Sifre, Deut. 349-351; Sifre, Num. 67; Tan., Beha'aloteka, ed. Buber, p. 13; Midr. Teh. to Ps. i. 14; Ex. R. xv. 1; Num. R. iii., vii. 2, xv. 9) that in Egypt and in the wilderness the Levites observed the Abrahamitic rite and the whole Law; in the Holy Land they even abstained from work in order to devote themselves to contemplation (θεωρία) and to prayer (Tan., Wayera, ed. Buber, p. 4; Num. R. v. 1). In other words, they were the ancient Ḥasidim, the elect ones (Num. R. iii. 2, 4, 8, 11; xv. 9). Levi, the father of the tribe, accordingly displayed this spirit of piety in his own household; he married Milkah, of the daughters of Aram, of the (holy) seed of the Terahites (Jubilees, xxxiv. 20; Test. Patr., Levi, 11). The names he gave to his sons—Gershon, Kehat, and Merari—are interpreted in the sight of their future destiny (*ib.* Levi, 11; Num. R. iii. 12). When his daughter Jochebed ("God giveth glory") was born to him he was already "the glorified of God" among his brethren (Test. Patr., Levi, 11).

J. K.

LEVI (לוי), **TRIBE OF.—Biblical Data:** The tribe of Levi was descended from the patriarch Levi, the third son of Jacob and Leah (Gen. xxix. 34). Levi shared in Simeon's treachery toward the men of Shechem (Gen. xxxiv. 25–30), in consequence of which, it was thought, his descendants were scattered in Israel (Gen. xlix. 5–7). At the time of the descent into Egypt there were only three sons of Levi (Gen. xlvi. 11); these had become at the time of the Exodus a numerous tribe, which then was chosen for the priesthood and the service of the sanctuary (Ex. vi. 16 *et seq.*; Num. i. 49–54, iii. 6 *et seq.*). According to Leviticus and Numbers a wide distinction existed at this time between the house of Aaron, which constituted the priesthood, and the remainder of the Levites, to whom the more menial duties of the religious service were assigned (comp. Num. xvi. 8–11, and LEVITES).

Cities of Levites.

In the blessing of Moses, Levi is mentioned only in connection with priestly functions (Deut. xxxiii. 8–11). At the settlement the Levites are said to have received no definite domain (Josh. xiii. 14), but scattered cities were assigned them in territory belonging to other tribes. From the portion of Simeon and Judah they received Hebron, Libnah, Jattir, Eshtemoa, Holon, Debir, Ain, Juttah, and Beth-shemesh; in the territory of Benjamin their cities were Gibeon, Geba, Anathoth, and Almon; from Ephraim they took Shechem, Gezer, Kibzaim, and Beth-horon; from Dan, Eltekeh, Gibbethon, Aijalon, and Gath-rimmon (comp. I Chron. vi. 69, where two of these cities are ascribed to Ephraim and two are not mentioned); from the tribe of Manasseh, Tanach, Gath-rimmon, Golan, and Beeshterah; from Issachar, Kishon, Dabareh, Jarmuth, and En-gannim; from Asher, Mishal, Abdon, Helkath, and Rehob; from Naphtali, Kedesh, Hammoth-dor, and Kartan; from Zebulun, Jokneam, Kartah, Dimnah, and Nahalal; from Reuben, Bezer, Jahazah, Kedemoth, and Mephaath; and from Gad, Ramoth in Gilead, Mahanaim, Heshbon, and Jazer (Josh. xxi. 11–39; comp. I Chron. vi. 55–81). When these cities are compared with those said to have been left to the other tribes, one is impressed with the fact that, if the Levites received all these, together with their suburbs, they must have had a better and more commanding inheritance than had any of their brethren.

In Early Sources.

In striking contrast with this splendid inheritance attributed to the Levites by Joshua and the Chronicler is the non-appearance of the Levites in any important rôle during the period of the Judges. They are not mentioned in the Song of Deborah, nor do they appear elsewhere in Judges until the appendix, where two individual Levites are mentioned (comp. Judges xvii. 7, xviii. 30, and xix. 1). Under David and Solomon, according to the accounts in Samuel and Kings, the Levites exercised the priestly functions, though not to the exclusion of others from such functions. For example, Samuel, an Ephraimite (I Sam. ix. 13), and the sons of David (II Sam. viii. 18) offered sacrifices. From this time to the Exile the Levitical priests held much the same position as they held in the time of Solomon. They exercised their priestly functions, but were by no means, except in rare instances, the dominating influence. In the post-exilic period, as Chronicles, Ezra, and Nehemiah show, they became a dominant element in the Jewish community.

——**Critical View:** The problem presented by the Biblical data is this: What is the relation of the clan mentioned in such passages as Gen. xlix. 5–7 to the priests of a later time? In seeking a solution of this problem it should be noted that in J, the oldest source, the patriarch Levi merited his father's curse, in consequence of which the tribe was divided and scattered (comp. Gen. xxxiv. 30, 31). In narrating a crisis in the life of Moses the same writer mentions the "sons of Levi" (Ex. xxxii. 26–28), but in such a way that the phrase may refer either to the descendants of the patriarch or to men who possessed the qualities of a "levi." Later, a narrative that is ascribed to J by some critics (*e.g.*, Moore, in "S. B. O. T.") tells how a Levite of Beth-lehem-judah became a priest at the shrine at Dan (Judges xvii. 9, xviii. 30). This representation of J would seem to mean that misfortune overtook a clan known as that of Levi, that its members became scattered, and that they were held in such high esteem as priests that they gradually appropriated the priestly offices.

In the Source E.

E has almost nothing to say of Levites. According to him, apparently, Moses and Aaron were of one of the tribes of Joseph, and he uses "Levite" to describe not the member of a clan, but a man especially eligible to the priesthood, distinctly stating that one such man belonged to the clan Judah (Judges xvii. 7; comp. "S. B. O. T."). If the patriarch Levi was mentioned in this source, the passage in question has not been transmitted. E, apparently, knew no such patriarch, and supposed that a priest might come from any tribe and that he received the designation "Levite" for other reasons than those of descent.

P, the latest of the sources in the Pentateuch, distinctly connects the tribe of Levi with the priesthood, bridging all the gaps with extensive genealogies, dividing the various services of the sanctuary among the different descendants of the patriarch, and assigning to each class of descendants its respective cities in Canaan (Josh. xxi.). Of these three representations, P's can not be correct. The whole tenor of the history in Judges and Samuel contradicts P's assertion that the Levites received all these cities at the time of the conquest, as well as his view that the religious office was, in any exclusive sense, in the hands of the Levites. Gezer, for example, was not in Israel's possession until the

Not in Possession of Gezer.

time of Solomon (I Kings ix. 16). Recent exploration has shown it to have been the site of a great temple of Astarte ("Pal. Explor. Fund, Quarterly Statement," Jan., 1903, pp. 23 *et seq.*). This temple, too, was on the level of the pre-exilic Israelitish city, and may have been used by the Hebrews of the period. Other Levitical cities in the list, like Kadesh in Naphtali, Ashtaroth in Bashan, and Hebron, can be proved to have been old shrines which in the pre-exilic period were still in use. If the information contained in the sources known were more complete, it probably could be shown that P's whole system of Levitical cities is a post-exilic explanation of the fact that important sanctuaries had existed at these points in pre-exilic times, and that they had thus become the centers where Levites resided in large numbers.

P's whole conception is, therefore, untrustworthy. Recent critics are divided in opinion, some believing, with J, that there was actually a tribe of Levi, which became scattered and gradually absorbed the priestly office, others adopting the apparent view of E that "levi" was a general term for a priest, and then supposing that the existence of the clan Levi was assumed in order to explain the origin of the priestly class. Lagarde ("Orientalia," ii. 20; "Mittheilungen," i. 54), Baudissin ("Priesterthum," p. 72), and Budde ("Religion of Israel to the Exile," pp. 80 *et seq.*) may be cited as critics who have advocated this latter view. If Hommel and Sayce were consistent, they might be placed in the same class, for if the term came from contact with the Minæan Jethro, as they believe, it would not be found in Israel before the time of Moses. This inference, however, they do not draw. The former view (which has been called the view of J), that there was an actual tribe of Levi, has the support of Wellhausen ("History of Israel," pp. 141–147; "Prolegomena zur Gesch. Israels," 5th ed., pp. 137–145), Stade ("Gesch." i. 152–157), Dillmann ("Commentary on Genesis," ii. 458; "Alttestamentliche Theologie," pp. 128 *et seq.*), Nowack ("Lehrbuch der Hebräischen Archäologie," ii. 92 *et seq.*), Cornill ("Hist. of Israel," p. 46), Marti (in Kayser's "Alttestamentliche Theologie," 3d ed., pp. 72, 95 *et seq.*), Guthe ("Gesch. des Volkes Israel," pp. 21–47 *et seq.*), and Holzinger ("Genesis," in Marti's "K. H. C." p. 257).

It is probable that there was an old clan which was overtaken by misfortune and scattered. Sayce points out ("Patriarchal Palestine," p. 239) that the "Lui-el" of the list of Rameses III. is parallel to "Joseph-el" and "Jacob-el" of Thothmes III.'s list, and so may point to a habitat of the tribe of Levi. It is quite possible that the priestly order originated quite independently of this tribe, however, and afterward was erroneously identified with it. In the present state of knowledge it is impossible to tell whether the view of J or of E more nearly represents the truth.

Origin of Name.

The origin of the name "Levi" has been quite variously explained. (1) In Gen. xxix. 34, J regards it as from the stem לוה ("to join"), and explains it by Leah's hope that her husband would now be joined to her. (2) Lagarde (*l.c.*) derives it from the same stem, but explains it as referring to Egyptians who, like Moses, attached themselves to the Israelites when they left Egypt. (3) Baudissin (*l.c.*) derives it in the same way, but refers it to those who were attached to, or accompanied, the ark. (4) Budde (*l.c.*) gives it the same derivation, but applies it to those who attached themselves to Moses in some great religious crisis. (5) Hommel ("Aufsätze und Abhandlungen," i. 30; "Süd-Arabische Chrestomathie," p. 127; "Ancient Hebrew Tradition," pp. 278 *et seq.*) derives it from the Minæan "lawi'u" (= "priest"); with this Mordtmann ("Beiträge zur Minäischen Epigraphik," p. 43) and Sayce ("Early Hist. of the Hebrews," p. 80) agree. (6) Wellhausen ("Prolegomena," 5th ed., p. 141) suggests that it is a gentilic name formed from the name of Levi's mother, Leah; in this opinion Stade ("Gesch." i. 152), Gray ("Hebrew Proper Names," p. 96), Nöldeke (hesitatingly; in "Z. D. M. G." xl. 167), Gunkel ("Genesis," p. 301), and Luther (Stade's "Zeitschrift," xxi. 54) concur. (7) Jastrow ("Jour. Bib. Lit." xi. 120 *et seq.*) connects "Levi" with "Laba" of the El-Amarna tablets. "Laba" he connects with the word לביא ("lion"), thus making Levi the "lion" tribe. (8) Skipwith (in "J. Q. R." xi. 264) connects "Levi" with "leviathan," making it refer to the coils of the serpent. This variety of opinion illustrates and emphasizes the present uncertainty concerning the origin and existence of the tribe, which results from the scanty evidence.

E. G. H. G. A. B.

LEVI I. See LEVI B. SISI.

LEVI II.: Palestinian scholar of the third century (third amoraic generation); contemporary of Ze'era I. and Abba b. Kahana (Yer. Ma'as. iii. 51a). In a few instances he is quoted as Levi b. Laḥma (Ḥama; comp. Yer. R. H. iv. 59a with R. H. 29b; Yer. Ta'an. ii. 65a with Ta'an. 16a; see Rabbinovicz, "Diḳduḳe Soferim," to Ber. 5a, Ta'an. *l.c.*, Zeb. 53b). In later midrashim the title "Berabbi" is sometimes added to his name (Pesiḳ. R. xxxii. 147b; Num. R. xv. 10; Tan., Beha'aloteka, 6; comp. Pesiḳ. xviii. 135a; Tan., *l.c.* ed. Buber, p. 11; see LEVI BAR SISI). He quotes halakic and homiletic utterances by many of his predecessors and contemporaries; but as he quotes most frequently those of Ḥama b. Ḥanina, it may be conjectured that he was the latter's pupil, though probably he received instruction at Johanan's academy also. In this academy he and Judah b. Naḥman were alternately engaged to keep the congregation together until Johanan's arrival, and each was paid for his services two "selas" a week. On one occasion Levi advanced the theory that the prophet Jonah was a descendant of the tribe of Zebulun, deducing proof from Scripture. Soon after Johanan lectured on the same subject, but argued that Jonah was of the tribe of Asher. The next week being Judah's turn to lecture, Levi took his place and reverted to the question of Jonah's descent, proving that both Johanan and himself were right: on his father's

Views About Jonah.

side Jonah was descended from Zebulun; on his mother's, from Asher. This skilful balancing of their opposing opinions so pleased Johanan that he declared Levi capable of filling an independent lectureship, and for twenty-two years thereafter Levi successfully filled such an office (Gen. R. xcviii. 11; Yer. Suk. v. 55a). This incident seems to indicate that Levi's earlier years were spent in poverty; later, however, he seems to have been better circumstanced, for he became involved in litigations about some houses and consulted Johanan on the case (Yer. Sanh. iii. 21d).

Fame as Haggadist.

Levi's name but rarely appears in halakic literature, and then mostly in connection with some Scriptural phrase supporting the dicta of others (see Yer. Ber. i. 2c, 3d *et seq.*; Yer. Ter. iv. 42d [where his patronymic is erroneously given as "Ḥina"]). In the Haggadah, on the contrary, he is one of the most frequently cited. In this province he became so famous that halakists like Ze'era I., who had no special admiration for the haggadist (Yer. Ma'as. iii. 51a), urged their disciples to frequent Levi's lectures and to listen to them attentively, for "it was impossible that he would ever close a lecture without saying something instructive" (Yer. R. H. iv. 59b; Yer. Sanh. ii. 20b). In these lectures he would frequently advance different interpretations of one and the same text, addressing one to scholars and the other to the masses (Gen. R. xliv. 4; Eccl. R. ii. 2). Sometimes he would discuss one subject for months in succession. It is reported that for six months he lectured on I Kings xxi. 25—"There was none like unto Ahab, which did sell himself to work wickedness in the sight of the Lord." Then he dreamed that Ahab appeared to him and remonstrated with him: "Wherein have I sinned against thee and how have I offended thee that thou shouldst continually dwell on that part of the verse which refers to my wickedness and disregard the last part, which sets forth the mitigating circumstance—'whom Jezebel his wife stirred up'?" (הסתה = "instigated," "incited"). During the six months following, therefore, Levi spoke as Ahab's defender, lecturing from the same verse, but omitting the middle clause (Yer. Sanh. x. 28b).

String of Pearls.

Levi divided all haggadists into two classes: those who can string pearls (*i.e.*, cite apposite texts) but can not perforate them (*i.e.*, penetrate the depths of Scripture), and those who can perforate but can not string them. Of himself, he said that he was skilled in both arts (Cant. R. i. 10). Once, however, he so provoked Abba b. Kahana by what was a palpable misinterpretation that the latter called him "liar" and "fabricator." But it is authoritatively added that this happened once only (Gen. R. xlvii. 9). He and Abba were lifelong friends, and the latter manifested his admiration for his colleague's exegesis by publicly kissing him (Yer. Hor. iii. 48c).

To render Scriptural terms more intelligible Levi frequently used parallels from cognate dialects, especially from Arabic (Gen. R. lxxxvii. 1; Ex. R. xlii. 4; Cant. R. iv. 1); and to elucidate his subject he would cite popular proverbs and compose fables and parables. Thus, commenting on Ps. vii. 15 (A. V. 14), "He . . . hath conceived mischief, and brought forth falsehood," he says: "The Holy One having ordered Noah to admit into the ark pairs of every species of living beings, Falsehood applied, but Noah refused to admit him unless he brought with him his mate. Falsehood then retired to search for a mate. Meeting Avarice, he inquired, 'Whence comest thou?' and on being told that he too had been refused admission into the ark because he had no mate, Falsehood proposed that they present themselves as mates. But Avarice would not agree to this without assurance of material gain; whereupon Falsehood promised him all his earnings, and Avarice repeated the condition agreed upon. After leaving the ark Avarice appropriated all of Falsehood's acquisitions, and when the latter demanded some share of his own, Avarice replied, 'Have we not agreed that all thy earnings shall be mine?' This is the lesson: Falsehood begets falsehood" (Midr. Teh. to Ps. vii. 15; Hamburger ["R. B. T." *s.v.* "Fabel"] erroneously ascribes this fable and several others to Levi bar Sisi). Levi became known among his contemporaries as מרא דשמעתא (= "master of traditional exegesis"; Gen. R. lxii. 5).

LEVI, AARON. See Montezinos, Antonio.

LEVI, ABRAHAM: German traveler; born at Horn, in the principality of Lippe, in 1702; died at Amsterdam Feb. 1, 1785. At the age of five he was sent to Brog, near Lemgo, for the sake of his studies, and he stayed there till 1714, when he returned home. He then acquired a passion for traveling, and in 1719, when only seventeen years old, he definitely left the parental home in order to execute his plan.

Levi traveled through Germany, Bohemia, Moravia, Hungary, Austria, and the whole of Italy. Full of youthful ardor, he did not leave unnoticed the most trivial circumstance. He mentions among other things the synagogues of Frankfort, and the riches of his relative Samson Wertheimer of Vienna. He wrote an account of his travels in Judæo-German (published by Roest in "Isr. Letterbode"), adding a Hebrew poem describing ten of the most noteworthy events and giving an acrostic on his name. The poem is followed by explanatory notes, also in Hebrew. Levi's narrative is interesting in that it gives statistics and customs of the Jews in small localities not mentioned by other historians or travelers.

Bibliography: Roest, in *Isr. Letterbode*, x. 148 *et seq.*

S. S. M. Sel.

LEVI BEN ABRAHAM BEN ḤAYYIM: French encyclopedist; champion of the liberal party in Provence in the struggle for the study of secular sciences; born at Villefranche-de-Confluent, Roussillon, between 1240 and 1250; died at or near Arles soon after 1315. He was descended from a scholarly family. His father, Abraham ben Ḥayyim, was a synagogal poet, and rabbi in Narbonne, which place he left about 1240 to settle finally in Villefranche. Levi's uncle Reuben ben Ḥayyim, also, like his grandfather, was a scholar. A son of this Reuben ben Ḥayyim was, probably, Samuel ben Reuben of Beziers, who took Levi's part, although in vain, in his conflict with the orthodox party in Provence. Levi himself was the maternal grandfather of the philosopher Levi ben Gershon of Bagnols.

Life.

Levi ben Abraham was instructed in Bible and Talmud, and in secular sciences as well, and was soon drawn into the rationalistic current of the time. One of his teachers was a certain R. Jacob, whom he cites as his authority for an astronomical explanation, and who may have been Jacob ben Machir ibn Tibbon. It is probable, also, that Levi was instructed by his uncle Reuben ben Ḥayyim, from whom he quotes an explanation of Gen. i. 3 (Vatican MS. cxcii. 56b).

Levi left his native city (probably on account of poverty, which oppressed him almost throughout his life), remained for a short time in Perpignan, and then went to Montpellier, where, in 1276, he was engaged in literary pursuits, and earned a scanty living by teaching languages and lecturing. During the heat of the controversy over the study of secular sciences he was at Narbonne, in the house of the wealthy Samuel Sulami, who was prominent both as a poet and a scholar. Levi enjoyed his hospitality until, yielding to the pressure of the opposing party, represented especially by Solomon ben Adret, Samuel Sulami asked his guest to leave. The latter then sought shelter with his cousin Samuel ben Reuben in Beziers (see "Minḥat Ḳena'ot," No. 41), but was persecuted, apparently, even there. He was excommunicated by the orthodox party, yet, after the conflict was over, in 1315, he found rest and quiet at Arles, where he remained until his death. He has been identified by some with Levi of Perpignan, whom Judah Mosconi, in his supercommentary to Ibn Ezra, characterizes as one of the most prominent of scholars (see Berliner's "Magazin," iii. 148 [Hebr. part, p. 41]).

Works.

Steinschneider points out that a large portion of the scientific works written in Arabic were made accessible in Hebrew translations in the first half of the thirteenth century, and that the entire realm of knowledge began to be treated in encyclopedias in the second half of the same century. Levi ben Abraham wrote two such encyclopedic works, which show the range of knowledge of an educated rationalistic Provençal Jew of that period. The first of these is the "Batte ha-Nefesh weha-Leḥashim," the title of which is taken from Isa. iii. 20. It is a rimed compendium, didactic in tone, of the various sciences, in ten chapters and 1,846 lines, with a few explanatory notes and a preface, also in rimed prose. In the preface to this work, which is frequently found in manuscripts, Levi demonstrates the usefulness of his compendium by pointing out the difficulties which those who are not well acquainted with general literature must surmount in order to acquire a knowledge of the sciences, which are scattered through all sorts of books. He had long cherished the thought of compiling an encyclopedia, but had always been deterred by the fear that the task would prove beyond his power; at last, in 1276, strength was promised him in a vision, whereupon he began the work at Montpellier.

His Encyclopedia.

Levi was compelled, by the nature of the work, to limit himself to giving the conclusions of the chief authorities, particularly of Maimonides, whom he follows step by step. Ch. i. treats of ethics. In the paragraphs treating of the history of the diffusion of learning, the author expresses the view that the Greeks and Arabs derived almost their entire scientific culture from the ancient Hebrews, a theory which justified the reading of Greco-Arabic ideas into the Bible (Steinschneider). The following chapters treat of logic (ii.), the Creation (iii.), the soul (iv.), prophecy and the Messianic period (v.; the coming of the Messiah will occur in the year 1345), the mystic theme of the "Merkabah," the divine throne-chariot (vi.), numbers (vii.), astronomy and astrology (viii.), physics (ix.), and metaphysics (x.). After the author himself had found it necessary to provide the difficult verses with explanatory notes (which are not found in all the manuscripts), Solomon de Lunas, probably identical with Solomon ben Menahem Prat (or Porat), wrote, about 1400, a commentary to the "Batte ha-Nefesh weha-Leḥashim."

His "Liwyat Ḥen."

The second work of Levi was the "Liwyat Ḥen" or "Sefer ha-Kolel," a "comprehensive book" (encyclopedia). The dates of its beginning and completion are unknown, but it must have been written before the outbreak of the controversy mentioned above. It is divided into two "pillars," called "Jachin" and "Boaz" (after I Kings vii. 21), the first containing five treatises, and the second one. Since no complete manuscript of this work has yet been discovered, any analysis of its contents is naturally uncertain. According to Steinschneider, its six treatises are as follows: (1) logic or arithmetic (?); (2) geometry; (3) astronomy and astrology; (4) physics (?), psychology, and the "theory of intellect"; (5) metaphysics; (6) theology, prophecy, the mysteries of the Law, and belief and the Creation. In the third treatise, the most complete (Paris MS. No. 1047; Vatican MS. No. 383; Neubauer, "Cat. Bodl. Hebr. MSS." No. 2028, and additamenta), the astrological writings of Abraham ibn Ezra are slavishly followed, and the prediction is made that the Messiah will appear in the year 1345. The last, or theological, treatise, which is extant at Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 1285, 2023), Parma (MS. de Rossi No. 1346), and Rome (Vatican MS. No. 2893), naturally had a greater circulation, and, on account of the author's rationalistic interpretation of the Scriptures, aroused much more opposition than the other sections of the work, which aimed at nothing original and included only what could be found elsewhere.

The teachings which Levi ben Abraham promulgated, both by pen and by speech, although not original with him, naturally aroused the anger of the orthodox. In his hands Abraham and Sarah became symbols of "matter" and "intellect"; the four kings against whom Abraham went to war represented the four faculties of man; Joshua's miracles were symbolically interpreted: they were not actual occurrences; the possibility of a supernatural revelation was doubted; and there were other and similar doctrines that poisoned the naively credulous and religious mind.

Opposition to His Views.

Orthodox resentment was first shown at Narbonne, where Levi was residing in the house of Samuel Sulami. It mattered little that Levi "was in general very reserved and was communicative only to those who shared his views" ("Minḥat Ḳena'ot," No. 121), and that it was not known with certainty whether he was to be reckoned among the orthodox or among the heretics; nor yet that he always put off Don Vidal Crescas, who, although he opposed his teachings, was his personal friend, and had often, but vainly, asked him for his writings. Equally unavailing were his observance of the ceremonial law and his pretense that he occupied himself with philosophical questions only for the sake of being able to cope with heretics (*ib.* No. 14). Poverty compelled Levi, "who was born under an unlucky star," to teach at this dangerous and critical period and thereby spread his doctrines. Solomon ben Adret, therefore, then the champion of the orthodox party, felt constrained to attack this "arch-heretic, condemned by the voices of all." "A Mohammedan is dearer far to me than this man," he wrote (*ib.* No. 14; see J. Perles, "R. Salomo ben Abraham ben Adereth," p. 25), "who is not ashamed to say openly that Abraham and the other patriarchs have ceased to exist as real personages and that their places have been filled by philosophical concepts. . . . Levi and his adherents are enemies not only of Judaism, but of every positive religion." In his reply to Levi's letter, in which the latter endeavored to clear himself of the charges brought against him, Solomon ben Adret advised Levi in friendly terms to confine himself to Talmudic sciences; this Levi plainly did not wish to do, and thus he brought excommunication upon himself.

Levi expanded and revised his "Liwyat Ḥen" in Sept., 1315, at Arles, and the manuscript (Vatican MS. No. cxcii.) was discovered by Steinschneider ("Hebr. Bibl." 1869, p. 24).

In addition to these works Levi wrote three others —"Sodot ha-Torah," "Sefer ha-Tekunah," and an astrological treatise. The "Sodot ha-Torah" (Paris MS. No. 1066), which probably was an exposition of the mysteries contained in the Ten Commandments, and which was written before 1276, is said to be lost, but it was probably incorporated, in a revised form, in his "Liwyat Ḥen." The "Sefer ha-Tekunah," on astronomy and chronology, consisted of forty chapters and was written in 1276. The treatise on predictive astrology is entitled "Sha'ar ha-Arba'im be-Koḥot ha-Kokabim," "the fortieth chapter" of the preceding book, although it forms a separate work. They were edited at the same time. The great dependence on Abraham ibn Ezra's astrological opinions shown in this treatise would suggest that it may be the compendium which Levi is said to have made of Ibn Ezra's works. All these smaller treatises seem to have been merely preparatory to the "Liwyat Ḥen," in which they are used.

J. M. Sc.

LEVI, BENEDIKT: German rabbi; born at Worms Oct. 14, 1806; died at Giessen April 4, 1899; son of Samuel Wolf Levi, a member of the Sanhedrin of Paris and rabbi of Mayence from 1807 until his death in 1813. Benedikt Levi, who was destined for a rabbinical career, received his early Talmudic education from Rabbis Gumpel Weismann, Ephraim Kastel, and Löb Ellinger. Having prepared himself under the tuition of Michael Creizenach, he entered the University of Würzburg (1824) and attended at the same time the lectures on Talmud of Abraham Bing, rabbi in that city. Three years later he entered the University of Giessen, where he took the degree of Ph.D. When A. A. Wolf was called from Giessen to Copenhagen, Levi was appointed (1829) his successor, remaining in that rabbinate for sixty-seven years.

Levi, who was an advocate of moderate Reform, published, in addition to various addresses and sermons, the essays "Beweis der Zulässigkeit des Deutschen Choralgesanges mit Orgelbegleitung beim Sabbathlichen Gottesdienste der Synagoge" (in Weiss's "Archiv für Kirchenrecht," 1833; republished separately, Offenbach, 1833) and "Das Programm der Radicalen Reformgemeinde Giessens Beleuchtet" (Giessen, 1848). Several minor treatises by him appeared in "Allg. Zeitung des Judenthums," "Der Volkslehrer," and other periodicals.

S. M. K.

LEVI, BORACH (Joseph Jean François Elie): Convert to Christianity; born at Hagenau in 1721; son of a Jewish commissary. He went to Paris in March, 1751, to follow up a lawsuit, and while there became a convert to Christianity, and was baptized Aug. 10, 1752. He attempted to win over his wife, whom he had left behind at Hagenau, but she refused, though she was forced by the law of the time to surrender her two daughters; they were baptized ten years afterward. He endeavored to gain permission to marry again, though he refused to give a Jewish bill of divorce to his wife. He obtained from the bishops of Verdun and Metz canonical opinions that a baptized Jew might marry a Christian if his wife refuses to be converted with him, and he attempted to get the curé of his town to cry the banns for his marriage with one Anne Thaevert. The curé refused, and a long series of lawsuits ensued. The whole question of the validity of a Jewish marriage was raised, and the technical difficulty which presented itself to the canonical lawyers was the possibility of Levi's wife becoming Christian after he had married a Christian woman. Parliament refused to give him relief (Jan. 2, 1758).

No more is known of him, though several legal memorials were written on the curious case.

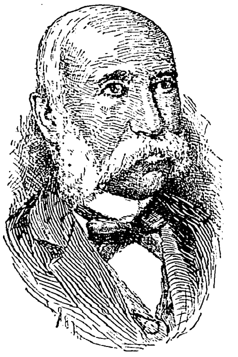
J.

LEVI, CARLO: Italian physiologist; born at Genoa March 26, 1866; educated at the University of Modena (M.D. 1889). In 1888 he was appointed tutor, and later assistant professor, of experimental physiology at the University of Modena; in 1893 he assumed charge of the classes in special physiology, and in 1897 of the classes in histology, at the veterinary college connected with the same institution. In 1904 he was appointed editor of "L'Idea Sionista"; he is also vice-president of the Modena chapter of the Dante Alighieri Society. He has written papers on Jewish medical statistics, on physical culture, and on other scientific subjects for various periodicals, including the "Congresso Medico Internazionale di Roma" (1894) and the "Congresso Internazionale di Fisiologia a Torino" (1901), and has published lectures on experimental, technical, and veterinary physiology.

S. U. C.

LEVI, DAVID: Italian poet and patriot; born at Chieri 1816; died at Venice Oct. 18, 1898. Educated at the Jewish schools of his native town and Vercelli, he for a short time followed a mercantile career. In 1835 he went to the University of Parma, and later to that of Pisa, but he had to leave the latter on account of a duel in which he wounded a fellow student whom he had challenged for having made an insulting remark about the Jews. Having passed his examination as doctor of law, he went in 1839 to Paris. The university ideals of a united, free Italy had found a strong follower in Levi, who had become a member of the Irredentist society La Giovane Italia. In Paris he belonged to the circle of Italian patriots; and, on returning to Italy, he soon became one of the leaders in the political movement for the secession of northern Italy from Austria and for the union of all the Italian states.



David Levi.

Settling in Venice, Levi took part in the Lombardic rebellion against Austria of 1848-49. In 1850 he removed to Turin. After the Franco-Italian-Austrian war of 1859, when the Italian provinces of Austria were united with the Italian kingdom (1860), he was elected to the Italian assembly at Florence, where as a member of the Liberal party he championed the cause of equality of rights and religious freedom. He was a member of the National Assembly until 1879, when, being defeated, he retired from politics.

Levi wrote many poems, especially during his stay at Venice, and a large number of political and war songs, among these the well-known ode to Pope Pius IX., who in 1846, upon his election to the papal chair, was hailed as liberator, but who in 1849 changed his political views and became strongly reactionary. Through all Levi's works his great love for Italy and for Judaism is evident.

Levi was the author of: "Patria ed Affetti" (Venice, 1849), a collection of poems; "Gli Martiri del 1799" (Turin, 1850), a drama; "Martirio e Redenzione" (*ib.* 1859); "Del Navarra a Magenta" (*ib.* 1866; revised ed., 1884, with a fantastic allegorical dialogue as a second part); "Vita di Pensiero" (Milan, 1875); "Vita d'Azione" (Turin, 1882); "Il Semitismo" (*ib.* 1884); "La Mente di Michelangelo" (*ib.* 1890); "Giordano Bruno" (*ib.* 1894).

Levi's principal work, however, is the great drama "Il Profeta." Its theme Levi describes in his introduction as follows: "I intend to hold a mirror before my contemporaries, in which they may see their errors, faults, and mistakes, and thereby learn to despise them; at the same time placing before them a high ideal, which they should strive to live up to." To this end he selected the story of Jeremiah. The drama treats in five acts of the war between Zedekiah and Nebuchadnezzar. *Jeremiah* foresees the fall of Jerusalem, if the people do not give up their worship of Baal, repent of their sins, and return to the only true God. *Jeremiah* the prophet and *Ananias*, the priest of Baal, respectively exhort and try to persuade the king and the Jews to follow them. *Ananias* is successful; *Jeremiah* is thrown into prison; and Jerusalem falls when attacked by the invading army. The Temple is destroyed, and the Jews are led into captivity. *Jeremiah's* prophecy is fulfilled.

When *Jeremiah* is thrown into prison his daughter *Rachel* falls into the hands of *Ananias*, who tries to win her for himself. His suit proving unsuccessful, he orders her to be sacrificed to Moloch, when God intercedes. Lightning kills *Ananias*, and *Rachel* is liberated by her lover, *Emanuel*. The last words of *Ananias* are: "Uno Infinito hai vinto" (end of Act 3). *Emanuel* joins the ranks of the defender of Jerusalem, is mortally wounded, and dies in the arms of his beloved. Spiritually Jewdom has conquered over heathendom, and *Rachel* has returned pure to her lover; but physically Jewdom is defeated. *Rachel* loses her lover and must go into exile; this exile will, however, purify not the Jews alone, but through them the world, and will prepare man for a better future.

The dialogue which follows the drama in the 1884 edition has very little connection with it. It is sustained by *Emanuel*, the representative of prophetism, and by *Ahasuerus*, the representative of mankind, and treats mainly of Rome.

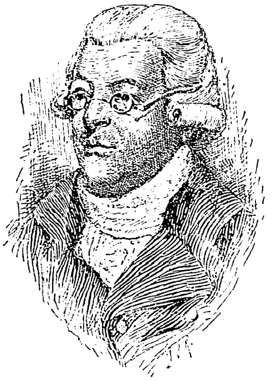
S. F. T. H.

LEVI, DAVID: Hebraist and author; born in London 1742; died 1801. He was destined by his parents for the rabbinate; but the design was abandoned, and he was apprenticed to a shoemaker. Subsequently he set up in business for himself as a hatter; but, meeting with considerable losses, he abandoned this business and turned his attention to dressing the material for men's hats. Meantime he continued to pursue his studies in Hebrew, especially in the Prophets.

From 1783 to 1797 Levi was busily engaged in issuing a series of works (a list of which is given below) dealing with Jewish theology, grammar, and ritual. He rendered great services to the London Jews in translating their prayers into English and in vindicating their faith against the onslaughts of Dr. Priestley and Thomas Paine. His works present a remarkable instance of industry and perseverance under adverse conditions. During the latter part of his life he followed the business of a printer.



David Levi.

Among Levi's literary works were: "Rites and Ceremonies of the Jews" (London, 1783); "Lingua Sacra" (3 vols., 1785–87), a Hebrew dictionary and grammar; letters to Dr. Priestley (1787–89) in reply to the latter's "Letters to the Jews"; "The Pentateuch in Hebrew and English" (1789). He wrote also "Translations of the Hebrew Prayers and Services into English" (1789–93), which he undertook at the request of the representatives of the Portuguese Jews; "Dissertations on the Prophecies" (vol. i. 1793). In controversy with believers and unbelievers he wrote "Letters to Mr. Halhed on the Subject of the Prophecies of Brothers" (1795) and "Letters to Thomas Paine, in Answer to His 'Age of Reason'" (New York, 1797). Here he attempts to show that the divine mission of the Prophets is fully established by the present dispersion of the Jews. In 1794 he published a translation of the Seder service.

Levi was also poet in ordinary to the synagogue, and furnished odes when required on several public celebrations, as, for instance, on the king's escape from assassination in 1795.

J. G. L.

LEVI, EUGENIA: Italian authoress; born Nov. 21, 1861, at Padua; educated in that city, and in Florence and Hanover. In 1885 she was appointed professor at the Royal High School for Young Ladies at Florence.

She has written many essays and studies for the Italian journals and has published the following works: "Ricorditi," anthology of Italian prosaists and poets from Dante Alighieri to Giosuè Carducci (Florence, 1888; 5th ed. 1899); "Dai Nostri Poeti Viventi" (Florence, 1891; 2d ed. 1896); "Dai Giornale di Lia" (Rome, 1892); "Rammentiamocci" (Florence, 1893); "Dante . . . di Giorno in Giorno" (*ib.* 1894; 3d ed. 1898), a collection of quotations from Dante; "Pensieri d'Amore" (*ib.* 1894; 3d ed. 1900); "Fiorita di Canti Tradizionali del Popolo Italiano" (*ib.* 1895); "Deutsch," a translation of standard German works (*ib.* 1899).

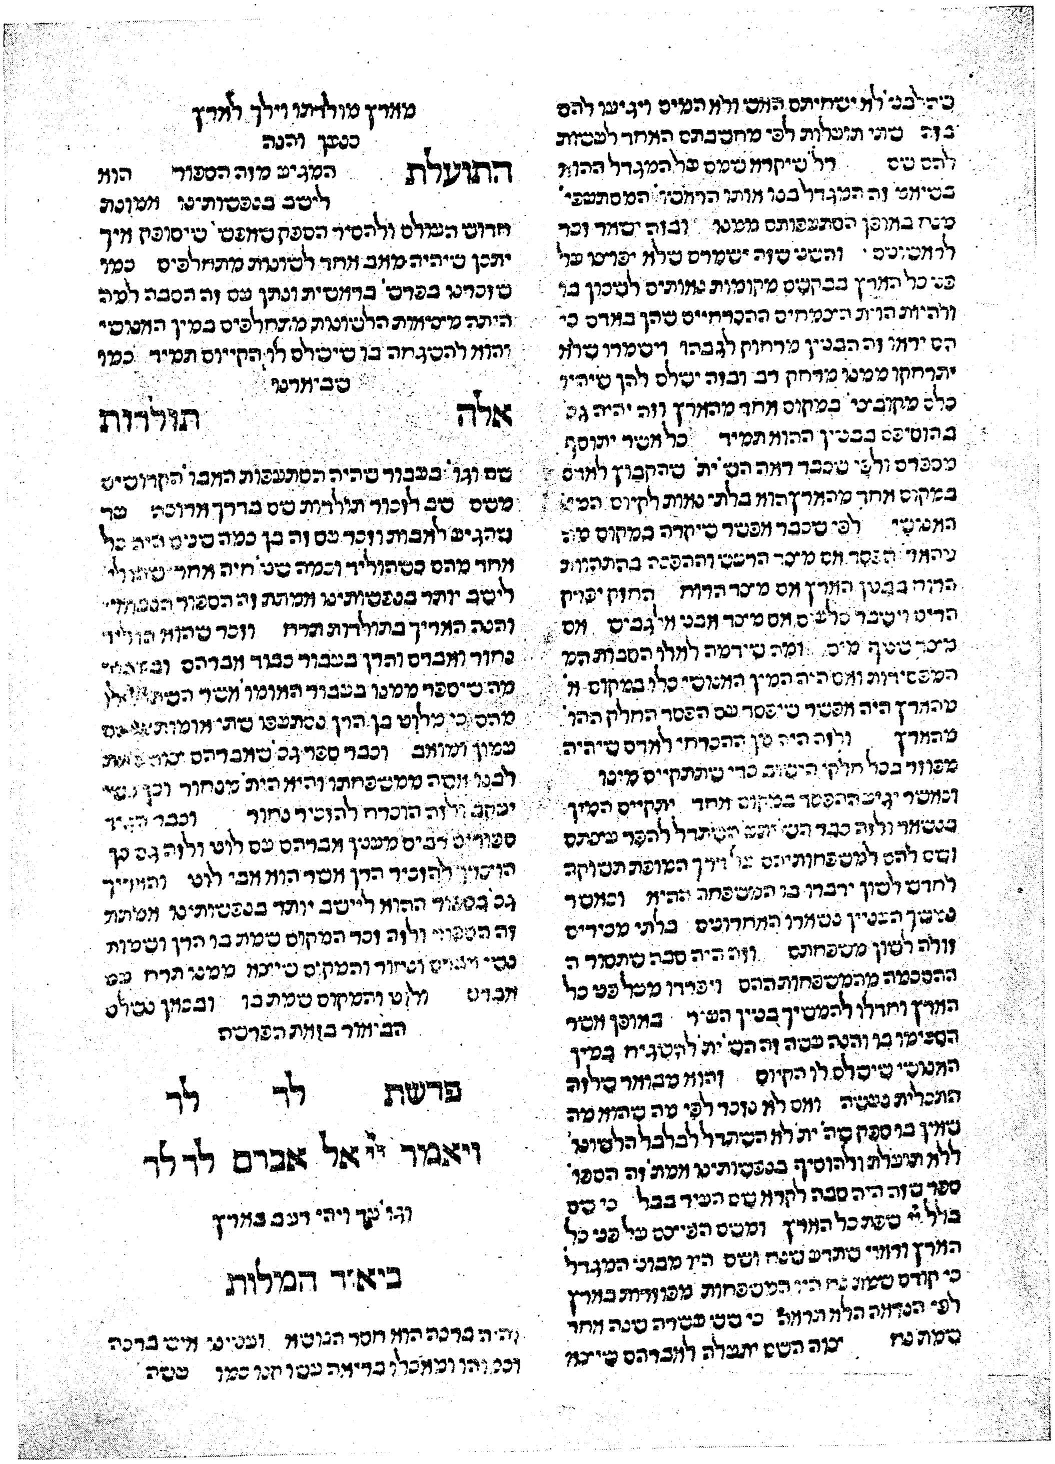
S. F. T. H.

LEVI BEN GERSHON (RaLBaG, commonly called **Gersonides**; known also as **Leon de Bagnols,** and in Latin as **Magister Leo Hebræus):** French philosopher, exegete, mathematician, and physician; born at Bagnols in 1288; died April 20, 1344. Abraham Zacuto ("Yuḥasin," ed. Filipowski, p. 224) states that Levi died at Perpignan in 1370; but the exact date of his death is given as above by Petrus of Alexandria, who translated in 1345 a note by Levi on the conjunction of Saturn with Jupiter (see Steinschneider in "Hebr. Bibl." vii. 83–84). "Gershuni," the Hebrew equivalent of "Gersonides," was first used to designate Levi b. Gershon by David Messer Leon (*c.* 1500). Levi was a descendant of a family of scholars. According to Zacuto (*l.c.*), his father was Gershon b. Solomon, the author of "Sha'ar ha-Shamayim" (but see Steinschneider, "Hebr. Uebers." p. 9, and Gross, "Gallia Judaica," p. 94); according to Zacuto (*l.c.*), Ibn Yaḥya ("Shalshelet ha-Ḳabbalah," p. 83, Warsaw, 1889), Conforte ("Ḳore ha-Dorot," p. 19a), and Azulai ("Shem ha-Gedolim," i.), Naḥmanides was Levi's maternal grandfather. As Levi himself, in his commentary on the Pentateuch (on Ex. xxxiv. 9), quotes Levi ha-Kohen as his grandfather, and as Levi b. Gershon is not known to have been a priest, this Levi ha-Kohen was apparently his mother's father. It was therefore suggested by Carmoly (Jost's "Annalen," i. 86) that Naḥmanides was the maternal grandfather of Levi's father. Levi was doubly related to Simon b. Ẓemaḥ Duran. Besides being a cousin of Judah Delesfils, Duran's grandfather, he married the latter's sister (Duran, "Tashbeẓ," i., No. 134; see Steinschneider, "Hebr. Bibl." *l.c.*).

His Versatility.

Very little is known of Levi's life beyond the fact that he lived now in Orange, now in Avignon, now in a town called in Hebrew עיר האזוב = "the city of hyssop" (comp. Isidore Loeb in "R. E. J." i. 72 *et seq.*, who identifies the last-named town with Orange). In spite of Ben Adret's ban on those who taught philosophy to the young, Levi was early initiated into all its branches; and he was not thirty years old when he began to write the "Milḥamot Adonai," the philosophical work which brought him so much renown. Isaac de Lattes (Preface to "Sha'are Ẓiyyon") writes: "The great prince, our master Levi b. Gershon, was the author of many valuable works. He wrote a commentary on the Bible and the Talmud; and in all branches of science, especially in logic, physics, metaphysics, mathematics, and medicine, he has no equal on earth." Though a distinguished Talmudist, Levi never held a rabbinical office. He earned a livelihood most probably by the practise of medicine.

In his commentary on the Bible, Levi makes frequent comparisons of Hebrew and Arabic words, while he speaks of Latin as the language of the Christians (commentary on I Sam. xvi. 6). Neubauer ("Les Ecrivains Juifs Français," p. 249)



PAGE FROM THE FIRST EDITION OF LEVI BEN GERSHON'S COMMENTARY TO THE PENTATEUCH, MANTUA, BEFORE 1480.

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

concludes, contrary to the assumption of Isidore Weil ("Philosophie Religieuse de Lévi-ben-Gerson," p. 15, Paris, 1868), that Levi knew Latin well, but not Arabic.

Although Levi lived in Provence, where, under the protection of the popes, the Jews suffered less than in other provinces of France, yet he sometimes laments over the sufferings of the Jews, which, he says, "are so intense that they render meditation impossible" (Preface to "Milḥamot"). In an epilogue to his commentary on Deuteronomy written in 1338 (Paris MS. No. 244) he says he was unable to revise his commentary on the Pentateuch at Avignon, as he could not obtain there a copy of the Talmud.

His Works.

Levi was the author of the following philosophical works: (1) "Milḥamot Adonai" (Riva di Trenta, 1560), mentioned above, begun in 1317 and finished in 1329 (see below). (2) Commentary on the Pentateuch (Mantua, 1476–80). (3) Commentary on the Earlier Prophets (Leiria, 1494). The philosophical essence of these two commentaries was published separately under the title "To'aliyyot" (Riva di Trenta, 1550 and 1564 respectively). Commentaries (4) on Job (Ferrara, 1477), (5) on Daniel (n.d.; n.p.), on Proverbs (Leiria, 1492), (6) on Canticles, Esther, Ecclesiastes, and Ruth (Riva di Trenta, 1560); (7) "Sefer ha-Heḳḳesh ha-Yashar," a treatise on syllogisms; (8) commentary on the Middle Commentaries and the résumés of Averroes, all of them finished about 1321 (the part of this commentary which refers to Porphyry's Isagoge to the categories, and to the treatise on interpretation, was translated into Latin by Jacob Mantino and published in the first volume of the works of Aristotle with the commentaries of Averroes); (9) "Sefer ha-Mispar," called also "Ma'aseh Ḥosheb," a treatise on algebra, which Levi finished in 1321, when, he says, he was thirty-three; (10) a treatise on astronomy, originally forming the first part of the fifth section of the "Milḥamot," but omitted by the editor, who considered it a separate work (see below); (11) commentary on the introduction to, and books i., iii.–v. of, Euclid, probably the work referred to by Joseph Solomon Delmedigo (see Geiger, "Melo Ḥofnayim," p. 12, Hebr.). (12) "Dillugim," astrological note on the seven constellations, in which Levi refers to his "Milḥamot"; (13) "Meshiḥah," on a remedy for the gout (Parma MS. De Rossi No. 1189; Neubauer, "Cat. Bodl. Hebr. MSS." No. 2142, 37). Levi wrote also the following rabbinical works: (14) "Sha'are Ẓedeḳ," commentary on the thirteen hermeneutic rules of Ishmael b. Elisha, printed in the "Berit Ya'aḳob" of Jacob b. Abraham Faitusi (Leghorn, 1800). (15) "Meḥoḳeḳ Safun," commentary on the haggadah in the fifth chapter of Baba Batra, mentioned by Solomon b. Simeon Duran ("Milḥemet Miẓwah," p. 23). Neubauer (*l.c.* p. 253) considers it doubtful whether the authorship of this work can be correctly ascribed to Levi. (16) Commentary on Berakot, mentioned by Levi in his commentary on Deuteronomy. (17–18) Two responsa signed by Levi b. Gershon, one concerning "Kol Nidre" and mentioned by Joseph Alashkar of Tlemçen, the other mentioned by Isaac de Lattes (Responsa, i. 88), and its authorship declared doubtful by Neubauer (*l.c.*). The Parma MS. No. 919 contains a liturgical confession beginning אלהי בשתי and attributed to Levi.

The following works are erroneously attributed to Levi b. Gershon: commentary on Averroes' "De Substantia Orbis," which seems to have been written by Moses of Narbonne; "Awwat Nefesh," a commentary on Ibn Ezra's commentary on the Pentateuch (comp. Benjacob, "Oẓar ha-Sefarim," p. 31); "Magen Yeshu'ot," a treatise on the Messiah; "Yesod ha-Mishnah" (Wolf, "Bibl. Hebr." iii. 650); ritual institutions ("taḳḳanot"; Parma MS. De Rossi No. 1094); commentary on Bedersi's "Beḥinat 'Olam."

His Astronomy.

Some description may be given here of Levi's astronomical treatise. It has been said that this was originally included in the "Milḥamot." It is probably the one referred to under the title "Ben Arba'im le-Binah" by Abraham Zacuto ("Tekunnat Zekut," ch. vi.), in allusion to Levi's being forty years old when he finished it. Steinschneider (in Ersch and Gruber, "Encyc." section ii., part 43, p. 298) calls it simply "Sefer Tekunah." It consists of 136 chapters. After some general remarks on the usefulness of astronomy and the difficulties attending its study, Levi gives a description of an instrument which he had invented for precise astronomical observations and which he calls "megalleh 'amuḳḳot." In the ninth chapter, after having devoted to this instrument two poems (published by Edelmann in "Dibre Ḥefeẓ," p. 7), he exposes the defects of the systems of Ptolemy and Al-Bitruji, and gives at length his own views on the universe, supporting them by observations made by him at different times. He finished this work Nov. 24, 1328, but revised it later, and completed it by adding the results of observations made up to 1340. The ninety-ninth chapter includes astronomical tables, which were commented on by Moses Botarel. This work was highly praised by Pico de Mirandola, who frequently quoted it in his "Disputationes in Astrologiam." Its importance is also apparent from the fact that the part treating of the instrument invented by Levi (ch. iv.–xi.) was translated into Latin by order of Pope Clement VI. (1342). Later the whole work was translated into Latin, and the beginning was published by Prince Boncompagni ("Atti dell' Academia dei Nuovi Lincei," 1863, pp. 741 *et seq.*).

M. Sel.

——**As Philosopher:** The position of Levi ben Gershon in Jewish philosophy is unique. Of all the Jewish Peripatetics he alone dared to vindicate the Aristotelian system in its integrity, regardless of the conflict existing between some of its doctrines and the principal dogmas of Judaism. Possessed of a highly developed critical sense, Levi sometimes disagrees with Aristotle and asserts his own views in opposition to those of his master, Averroes; but when, after having weighed the pros and cons of a doctrine, he believes it to be sound, he is not afraid to profess it, even when it is directly at variance with an accepted dogma of Jewish theology. "The Law," he says, "can not prevent us from considering to be true that which our reason urges us to believe" (Introduction to the "Milḥamot," p. 6).

His Unique Position.

Coming after Maimonides, Levi treated only of those philosophical questions which the author of the "Moreh Nebukim," because of his orthodoxy, either solved in direct opposition to Aristotelian principles, or explained by such vague statements that the student was left in the dark as to Maimonides' real opinion on the subject. These questions are: the immortality of the soul; prophecy; God's omniscience; divine providence; the nature of the celestial spheres; and the eternity of matter. To the solution of these six philosophical problems Levi devoted his "Milḥamot Adonai." The work comprises six main divisions, each subdivided into chapters. The method adopted by Levi is that of Aristotle: before giving his own solution of the question under discussion he presents a critical review of the opinions of his predecessors. The first main division opens with an exposition of the theories of Alexander of Aphrodisias, Themistius, Averroes, and of certain philosophers of his time, concerning Aristotle's doctrine of the soul. Aristotle's own treatment of this subject is, indeed, very obscure; for while asserting ("De Anima," ii. 1) that the soul is the first entelechy of the organic body, and consequently can not be separated from it any more than form can be separated from matter, he maintains (*ib.* iii. 5) that of the two elements of the soul, the passive intellect and the active intellect, the latter is immortal. To reconcile these two conflicting statements, Alexander of Aphrodisias, in his paraphrase of Aristotle's book on the soul, makes a distinction between the material intellect (νοῦς ὑλικὸς), which, like matter, has only a potential existence, and the acquired intellect (νοῦς ἐπικτητός), which latter is the material intellect when, by study and reflection, it has passed from potentiality into actuality, and has assumed an effective existence. The cause of this transition is the universal intellect, which is God Himself. But as the relation between God and the soul is only temporary, divine intervention ceases at death, and the acquired intellect lapses into nothingness. This psychological system, in which a mere physical faculty of a substance that has nothing spiritual in its essence may by a gradual development become something immaterial and permanent, is rejected by Themistius. For him the intellect is an inherent disposition which has for its substratum a substance differing entirely from that of the body. Averroes, in his treatise on the intellect, combines the two systems, and enunciates the opinion that the intellect is a mere potentiality so long as it is in the body, but that it becomes an actual substance as soon as it leaves the body. According to some contemporaries of Levi the intellect is a faculty which is self-existent.

Views on the Soul.

After a thorough criticism of these various opinions, Levi gives his own view on the nature of the intellect. The intellect, he says, which is born with man, is but a mere faculty that has for a substratum the imaginative soul, this latter being allied to the animal soul. This faculty, when put in motion by the universal intellect, begins to have an effective existence by the acquired ideas and conceptions with which it identifies itself; for the act of thinking can not be separated from the object of the thought. This identification of the intellect with the intelligible constitutes the acquired intellect ("sekel ha-nikneh"), which is to the original faculty what form is to matter. But does the acquired intellect cease to exist with the death of the body? This question is closely connected with that of the nature of universals. If, as asserted by the realists, universals are real entities, the acquired intellect, which consists of conceived ideas that have a real existence, may survive the body; but if, as maintained by the nominalists, nothing exists but individuals, and universals are mere names, immortality is out of the question. In opposition to Maimonides ("Moreh," iii. 18) Levi defends the theory of the realists and maintains thereby the principle of immortality.

On Prophecy.

The second division of the "Milḥamot" is devoted to philosophy. It was intended to supplement and correct some statements made by Aristotle in his unfinished work "De Sensu et Sensibili," which contains two chapters on divination. While Maimonides (*l.c.* ii. 32-48) treated only of the psychological side of the problem, "What are the requisites of prophecy?" Levi considered also the metaphysical phase, "Is prophecy possible?"; "Is the admissibility of prescience not absolutely incompatible with the belief in man's freedom of will?" To answer the first question there is, according to Levi, no need of speculative demonstrations. That there are men endowed with the faculty of foreseeing the future is, he considers, incontestable. This faculty is found not only in prophets, but also in soothsayers, visionaries, and astrologers. He cites the case of a sick man personally known to him, who, though without any medical knowledge, dreamed of the remedy which would cure him. Levi himself claimed to have received in dreams, on many occasions, solutions to puzzling metaphysical problems.

But prescience implies also predestination. This, however, seems to conflict with freedom of the will. To refute this objection, Levi endeavors to demonstrate that, though all sublunary events are determined by the celestial bodies, man may by his freedom of will and his intelligence annul such determinations. After having reconciled prediction with the principle of free will, he defines the nature of prescience and establishes a distinction between prophecy and other kinds of divination. In prophetic visions, he says, it is the rational faculty which is put into communication with the universal intellect, and therefore the predictions are always infallible; while in divination the receptive faculty is the imaginative power, and the predictions may be often chimerical. Thus, like Maimonides, Levi holds that the origin of prophetic perceptions is the same as that of ordinary science—the universal intellect. But, while the author of the "Moreh" counts among the requisites of prophecy a fertile imagination, Levi maintains that the greatness of the prophet consists precisely in his faculty of so checking the exercise of imagination that it may not disturb the dictates of reason. Another point of disagreement between Maimonides and Levi is the question whether intellectual and moral perfections are alone sufficient to insure to their possessor prophetic vision. For Maimonides the special will of God is the sine qua non for prophecy; for Levi moral and intellectual perfections are quite sufficient.

God's Omniscience.

The most interesting part of the "Milḥamot" is the third main division, which treats of God's omniscience. As is known, Aristotle limited God's knowledge to universals, arguing that if He had knowledge of particulars, He would be subject to constant changes. Maimonides rejects this theory, and endeavors to show that belief in God's omniscience is not in opposition to belief in His unity and immutability. "God," he says, "perceives future events before they happen, and His perception never fails. Therefore no new ideas can present themselves to Him. He knows that such and such an individual will be born at such a time, will exist for such a period, and will then return into non-existence. The coming into existence of this individual is for God no new fact; nothing has happened that He was unaware of, for He knew this individual, such as he now is, before his birth" ("Moreh," i. 20).

As to the objections made by the Peripatetics to the belief in God's omniscience; namely, how is it conceivable that God's essence should remain indivisible, notwithstanding the multiplicity of knowledge of which it is made up; that His intelligence should embrace the infinite; that events should maintain their character of contingency in spite of the fact that they are foreseen by the Supreme Being—these, according to Maimonides, are based on an error. Misled by the use of the term "knowledge," men believe that whatever is requisite for their knowledge is requisite for God's knowledge also. The fact is that there is no comparison whatever between man's knowledge and that of God, the latter being absolutely incomprehensible to human intelligence. This theory is severely criticized by Levi, who affirms that not reason but religion alone dictated it to Maimonides. Indeed, Levi argues there can be no doubt that between human knowledge and God's knowledge there is a wide difference in degree; but the assumption that there is not the slightest analogy between them is unwarranted. When the nature of God is characterized by means of positive determinations, the soul is taken as the basis of reasoning. Thus science is attributed to God, because man also possesses it to a certain extent. If, then, as Maimonides supposes, there is, except in name, no likeness between God's knowledge and man's knowledge, how can man reason from himself to God? Then, again, there are attributes which can be predicated of God, as, for instance, knowledge and life, which imply perfection, and others which must be denied to Him, as, for instance, corporeality and motion, because these imply imperfection. But, on the theory of Maimonides, there is no reason for the exclusion of any attribute, since, applied to God, all attributes necessarily lose their significance. Maimonides is indeed consistent, and excludes all positive attributes, admitting only negative ones; but the reasons given by him for their distinction are not satisfactory.

Having thus refuted Maimonides' theories both of God's omniscience and of the divine attributes, Levi gives his own views. The sublime thought of God, he says, embraces all the cosmic laws which regulate the evolutions of nature, the general influences exercised by the celestial bodies on the sublunary world, and the specific essences with which matter is invested; but sublunary events, the multifarious details of the phenomenal world, are hidden from His spirit. Not to know these details, however, is not imperfection, because in knowing the universal conditions of things, He knows that which is essential, and consequently good, in the individual.

Divine Providence.

In the fourth division Levi discusses the question of divine providence. Aristotle's theory that humanity only as a whole is guided and protected by a divine providence, admits the existence of neither prophecy nor divination. Nor can every individual be the object of the solicitude of a special providence; for this is (1) against reason, because, as has been demonstrated, the divine intelligence embraces only universals, and it is inadmissible that evil can proceed from God, the source of all good; (2) against experience, because one often sees the righteous borne down by miseries, while the wicked are triumphant; (3) against the sense of the Torah, which when warning men that their rebellions will be followed by disasters, because God will hide His face from them, implies that the calamities which will overtake them will come as the consequence of their having been left without protection from the vicissitudes of fate. Levi, therefore, arrives at the conclusion that some are under the protection and guidance of the general providence, and others under a special, individual providence. It is incontestable, he says, that a general, beneficent providence cares for all sublunary beings. Upon some it bestows certain bodily organs which enable them to provide themselves with the necessaries of life and to protect themselves from danger; to others it gives a nature which enables them to avoid that which would harm them. It is also demonstrated that the higher a being stands in the scale of creation the more organs it possesses for its preservation and defense; in other words, the greater is the solicitude and protection bestowed upon it by the Creator. Those species of animals which more nearly resemble man participate in the solicitude of providence to a greater extent than that part of animality which forms the connecting-link between the animal and vegetable kingdoms. If, then, the degree of participation by a being in the protection of the divine providence is proportioned to the degree of its development, it is obvious that the nearer one comes to the active intelligence, the more is he the object of the divine solicitude. Thus those who strive to develop the faculties of the soul enjoy the care of a special, individual providence, while those who grope in ignorance are guarded only by the general providence.

Relation to the Intellect.

There is, however, one great objection to this theory; namely, there can be no question of a special providence if God knows only generalities. To meet this antinomy Levi defines the nature of the special providence. All the events, he says, all the phenomena of this world, good as well as evil, are due to the influences of the celestial bodies. The various effusions of these bodies are regulated by eternal, immutable laws; so that the demiurgic principle, which knows these laws, has a perfect knowledge of all the phenomena which affect this world, of the good and evil which are in store for mankind. This subjection to ethereal substances, however, is not absolute; for man by his free will can, as stated above, annul their determinations. But in order to avert their mischievous emanations he must be warned of the danger. This warning is given by the divine providence to mankind at large; but as it is perceived only by those whose intellect is fully developed, the divine providence benefits individuals only.

Astronomy, Physics, and Metaphysics.

The fifth division comprises three parts treating respectively of astronomy, physics, and metaphysics. The astronomical part, which forms of itself a considerable work of 136 chapters, was not included in the published edition of the "Milḥamot," and is still in manuscript. As has been said above, it was translated by order of Pope Clement VI. into Latin and enjoyed such a high reputation in the Christian scientific world that the astronomer Kepler gave himself much trouble to secure a copy of it.

The second part is devoted to the research of the final causes of all that exists in the heavens, and to the solution of astronomical problems, such as whether the stars exist for themselves, or whether they are only intended to exercise an influence upon this world; whether, as supposed by Ptolemy, there exists above the starred spheres a starless one which imparts the diurnal motion to the inferior heavens, or whether, as maintained by Averroes, there is none; whether the fixed stars are all situated in one and the same sphere, or whether the number of spheres corresponds to that of the stars; how the sun warms the air; why the moon borrows its light from the sun and is not luminous of itself.

In the third part Levi establishes the existence first of an active intellect, then of the planetary intelligences, and finally the existence of a primary cause, which is God. According to him, the best proof of the existence of an efficient and final cause is the phenomenon of procreation. Without the intervention of an efficient intelligence there is no possibility of explaining the generation and organization of animated beings.

The Spheres.

But is there only one demiurgic intelligence, or are there many? After reviewing the various existing opinions on the subject, Levi concludes: (1) that the various movements of the heavenly bodies imply a hierarchy of motive principles: (2) that the number of these principles corresponds to that of the spheres; (3) that the spheres themselves are animated and intelligent beings, accomplishing their revolutions with perfect cognition of the cause thereof. In opposition to Maimonides, he maintains that the various intelligences did not emanate gradually from the first, but were all the direct effect of the primary cause. Can not this primary cause, however, be identified, as supposed by Averroes, with one of the intelligences, especially with that which bestows motion upon the most exalted of the spheres, that of the fixed stars? This, says Levi, is impossible, first because each of these intelligences perceives only a part of the universal order, since it is confined to a limited circle of influences; if God, then, were the mobile of any sphere there would be a close connection between Him and His creatures.

Creation.

The last division deals with creation and with miracles. After having refuted the arguments advanced by Aristotle in favor of the eternity of the world, and having proved that neither time nor motion is infinite, Levi demonstrates: (1) that the world had a beginning; (2) that it has no end; and (3) that it did not proceed from another world. In the order of nature, he says, the whole earth was covered by water, which was enveloped by the concentric sphere of air, which, in turn, was encompassed by that of fire. Was it, he asks, as Aristotle supposes, the absorbent heat of the sun which caused the water to recede and the land to appear? In that case the southern hemisphere, where the heat is more intense, ought to present a similar phenomenon. It is, therefore, obvious that it was due to the action of a superior agent. From the fact that the world had a beginning one must not, however, infer that it will have also an end; on the contrary, it is imperishable like the heavenly bodies, which are its sources of life and motion, and of which the substances, being immaterial, are not subject to the natural laws of decay.

Having thus demonstrated that the world is not eternal "a parte ante" and is eternal "a parte post," Levi gives his own view of creation. He chooses a middle position between the theory of the existence of a primordial cosmic substance and that of a creation "ex nihilo," both of which he criticizes. According to him, there existed from eternity inert undetermined matter, devoid of form and attribute. At a given moment God bestowed upon this matter (which till then had only a potential existence) essence, form, motion, and life; and from it proceeded all sublunary beings and all heavenly substances, with the exception of the separated intelligences, which were direct emanations of the Divinity.

Miracles.

In the second part of the last division Levi endeavors to demonstrate that his theory of creation agrees with the account of Genesis; and he devotes the last chapters of the "Milḥamot" to the discussion of miracles. After having defined from Biblical inferences their nature, he demonstrates that the actual performer of miracles is neither God nor prophet, but the active intellect. There are, he says, two kinds of natural laws: those which regulate the economy of the heavens and by which the ethereal substances produce the ordinary sublunary phenomena, and those which govern the special operations of the demiurgic principle and by which are produced the extraordinary phenomena known as miracles. Like freedom of the will in man, this faculty was given by God to the active intellect as a corrective of the influences of the celestial bodies, which are sometimes too harsh in their inflexibility. The supernatural as literally understood does not exist, since even a prodigy is a natural effect of a primordial law, though it is distinguished from other sublunary events by its origin and its extreme rarity. Thus a man of a highly developed intellect may foresee the accomplishment of a certain miracle which is only the result of a providential law conceived and executed by the active intellect. Miracles are subjected, according to Levi, to the following laws: (1) their effect can not remain permanently and thus supersede the law of nature; (2) no miracle can produce self-contradictory things, as, for instance, an object that shall be both totally black and totally white at the same time; (3) no miracle can take place in the celestial spheres. When Joshua said, "Sun, stand thou still upon Gibeon" (Josh. x. 12), he merely expressed the desire that the defeat of the enemy should be completed while the sun continued to shine on Gibeon. Thus the miracle consisted in the promptness of the victory. Nor is the going backward of the shadow on the dial of Ahaz (II Kings xx. 9; Isa. xxxviii. 8) to be understood in the sense of the sun's retrogression: it was the shadow which went backward, not the sun.

Philosophy in His Commentaries.

The conclusions arrived at in the "Milḥamot" were introduced by Levi in his Biblical commentaries, where he endeavored to reconcile them with the text of the Law. Guided by the principle laid down but not always followed by Maimonides, that a philosophical or a moral teaching underlies every Biblical narrative, Levi adopted the method of giving the literal meaning and then of summing up the philosophical ideas and moral maxims contained in each section. The books of Job, Canticles, and Ecclesiastes are mainly interpreted by him philosophically. Jerusalem, according to him, symbolizes man, who, like that city, was selected for the service of God; "the daughters of Jerusalem" symbolize the faculties of the soul; and Solomon represents the intellect which governs all. Ḳohelet (Ecclesiastes) presents an outline of the ethics both of Aristotle and of his opponents, because moral truth can not be apodictically demonstrated. In opposition to the philosophical exegetes of his time, Levi, however, did not allegorize the historical and legislative parts of the Bible; but he endeavored to give a natural explanation of the miracles.

Opposition.

Levi's philosophical theories, some of which influenced Spinoza (comp. "Theologico-Politicus," ch. ii., where Spinoza uses Levi's own terms in treating of miracles), met with great opposition among the Jews. While Ḥasdai Crescas criticized them on philosophical grounds, others attacked them merely because they were not in keeping with the ideas of orthodoxy. Isaac ben Sheshet (Responsa, No. 45), while expressing admiration for Levi's great Talmudical knowledge, censures his philosophical ideas, which he considers to be heresies the mere listening to which is sinful in the eyes of a pious Jew. Abravanel (commentary on Josh. x.) blames Levi in the harshest terms for having been so outspoken in his heretical ideas. Some zealous rabbis went so far as to forbid the study of Levi's Bible commentaries. Among these were Messer Leon Judah and Judah Muscato; the latter, applying to them Num. i. 49, says: "Only thou shalt not number the tribe of Levi, neither bring his Commentaries among the children of Israel" (Commentary on the "Cuzari," p. 4). Shem-Ṭob perverted the title "Milḥamot Adonai" (= "Wars of God") into "Milḥamot 'im Adonai" (= "Wars with God"); and by this corrupted title Levi's work is quoted by Isaac Arama and by Manasseh ben Israel, who attack it in most violent terms.

K. I. Br.

LEVI, HERMANN: Musical director; born at Giessen, Germany, Nov. 7, 1839; died at Munich May 13, 1900. His mother was a pianist of distinction. He studied under Vincenz Lachner at Mannheim (1852–1855), and at the Leipsic Conservatorium, principally under Hauptmann and Rietz (1855–58). In 1859 he became musical director at Saarbrücken, and in 1861 conductor of the German opera at Rotterdam, from which city he was summoned in 1864 to Carlsruhe, where in his capacity as court kapellmeister he aroused general attention by his masterly conducting of the "Meistersinger" (Feb., 1869).

In 1872 Levi received the appointment of court kapellmeister at Munich; and it was his thoroughly conscientious and excellent work here—notably his production of "Tristan and Isolde" in Nov., 1881—that induced Richard Wagner to select him as the conductor of "Parsifal" at the Bayreuth Music Festival of 1882. Appointed "General-Musikdirektor" at Munich in 1894, he resigned this position in 1896 owing to ill health, and was pensioned by the government.

As the foremost director of his time, Levi conducted the musical performances during the Bismarck-Feier and also on the occasion of the tricentenary celebration of the birth of Orlando di Lasso. He was the first to produce the trilogy "Der Ring der Nibelungen" after its performance at Bayreuth in 1876; and his masterly interpretation of the Wagnerian dramas contributed to make Munich for many years a permanent musical center for these works. Levi was a convert to Christianity.

Bibliography: Heinrich Porges, in *Musikalisches Wochenblatt*, pp. 334–336, Leipsic, 1900.

S. J. So.

LEVI, ISAAC, YOM-ṬOB, and JACOB: Sons of Abigdor ha-Levi Laniatore of Padua; founded a Hebrew printing establishment at Rome in 1518, which received special privileges from the pope through the intercession of Cardinal Egidio di Viterbo. There Elijah Levita's ס'ההרכבה was printed within eighteen days (with imperfect letter-press, owing to haste, as the colophon complains); this was followed by his tables of inflections, now lost, and by his "Baḥur." The press soon closed. In 1525 Jacob published at Trino in Piedmont a prayer-book according to the Italian ritual.

Bibliography: Steinschneider, *Cat. Bodl.* col. 2901; Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 115.

J. I. E.

LEVI ISAAC BEN MEÏR: Russian rabbi of the first half of the nineteenth century. After having been rabbi at Selichow and Pinsk, Levi Isaac was called to the rabbinate of Berdychev, where he wrote "Ḳedushshat Lewi" (Berdychev, 1816), the first part of which contains a homiletic commentary on the Pentateuch, with collectanea, the second being miscellaneous in character. He wrote also a commentary on the "Sefer ha-Zekirut," a compilation by Raphael b. Zechariah Mendel of ethical writings, based on the Biblical passages beginning with "Zakor" (Wilna and Grodno, 1835).

Bibliography: Benjacob, *Oẓar ha-Sefarim*, pp. 156, 517; Fürst, *Bibl. Jud.* ii. 243.

K. M. Sel.

LÉVI, ISRAEL: French rabbi and scholar; born at Paris July 7, 1856. He was ordained as rabbi by the Rabbinical Seminary of Paris in 1879; appointed assistant rabbi to the chief rabbi of Paris in 1882; professor of Jewish history and literature at the Paris Seminary in 1892; lecturer on Talmudic and rabbinic literature at the Ecole Pratique des Hautes Etudes in 1896.

During 1894–95 Lévi was director of "Univers Israélite." He is one of the leading spirits of the Société des Etudes Juives. On its organization in 1880 he was elected secretary and general manager of the "Revue des Etudes Juives," and in 1892 took charge of its bibliographical section. He has contributed to this journal papers on the Haggadah, the Talmudic and midrashic legends, Jewish folk-lore, the religious controversies between Jews and Christians, as well as on the history of the Jews in France.

Lévi has published in addition the following works: "La Légende d'Alexandre dans le Talmud et le Midrasch" (1884); "Trois Contes Juifs" (1885); "Le Roman d'Alexandre" (Hebrew text, with introduction and notes, 1887); "Les Juifs et l'Inquisition dans la France Méridionale" (1891); "Textes Inédits sur la Légende d'Alexandre" (in the "Steinschneider Festschrift"); "Relations Historiques dans le Talmud sur Alexandre" (in the "Kaufmann Gedenkbuch"); "Les Dix-huit Bénédictions et les Psaumes de Salomon"; "L'Ecclésiastique ou la Sagesse de Jésus, Fils de Sira," original Hebrew text, with notes and translation (part i., ch. xxxix. 15–xlix. 11; 1898; part ii., ch. iii. 6–xvi. 26; parts of ch. xviii., xix., xxv., and xxvi.; xxxi. 11–xxxiii. 3, xxxv. 19–xxxviii. 27, xlix. 11 to the end; 1901; the Académie des Inscriptions et Belles Lettres, on June 6, 1902, awarded to this last-named work one-half of the "Prix Delalande"); "Ecclesiasticus," class-room edition, Hebrew text, with English notes and English-Hebrew vocabulary, in "Semitic Studies Series," ed. Gottheil and Jastrow, 1903.

Bibliography: Moïse Schwab, *Répertoire des Articles Relatifs à l'Histoire et à la Littérature Juives Parus dans les Periodiques de 1783 à 1898*, pp. 228-231, Paris, 1899 (Supplement, 1903).

S. J. Ka.

LEVI BEN JAPHETH (HA-LEVI) ABU SA'ID: Karaite scholar; flourished, probably at Jerusalem, in the first half of the eleventh century. Although, like his father, he was considered one of the greatest authorities among the Karaites, who called him "Al-Shaikh" (the master), no details of his life are to be found in the Karaite sources. There even exists confusion in regard to his identity; in some of the sources he is confounded with his brother, or his son Sa'id (comp. Pinsker, "Liḳḳuṭe Ḳadmoniyyot," p. 119), and also with a Mohammedan scholar named Abu Hashim (Aaron ben Joseph, "Mibḥar," Paris MS.). Levi wrote in Arabic a comprehensive work on the precepts, parts of a Hebrew translation ("Sefer ha-Miẓwot") of which are still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 857; Steinschneider, "Cat. Leyden," No. 22; St. Petersburg MSS., Firkovich collection, No. 613). This work, which was used by nearly all the later Karaite codifiers, contains valuable information concerning the differences between the Karaites and the Rabbinites (in whose literature the author was well versed), and the dissensions among the Karaites themselves. Thus in the section dealing with the calendar, in which the year 1007 is mentioned, Levi states that in Irak the Karaites in their determination of New-Year, resembled the Rabbinites in so far as, like them, they took for their basis the autumnal equinox, while in some places the Karaites adopted the Rabbinite calendar completely.

Levi distinguishes between the views, in regard to the calendar, of the earlier and the later Rabbinites, and counts Saadia, whom he frequently attacks with the utmost violence, among the latter. In the treatise on ẓiẓit Levi says that he drew his material from the works of his father and of his predecessors. He excuses the inadequacy of treatment marking some parts of the work on the ground of the lack of sources and of the various trials and sicknesses he had suffered during its composition.

Levi's "Muḳaddimah," an introduction to the pericopes of the Pentateuch, is no longer in existence. A fragment, on Deut. i., of the Hebrew translation of Moses ben Isaiah Firuz was in the Firkovich collection and was published by Pinsker, but was lost during the Crimean war. He wrote also a short commentary on the Earlier Prophets, a fragment of which, covering the first ten chapters of Joshua, still exists (Brit. Mus. Or. No. 308). Steinschneider believes it possible that Levi was also the author of the short commentary on Psalms found in the British Museum (No. 336). According to Ali ben Sulaiman, Levi made a compendium of the lexicon "Agron" of David ben Abraham; however, this is contested by Abu al-Faraj, who asserts that the compendium was prepared by David himself.

K. I. Br.

LEVI, JEDIDIAH B. RAPHAEL SOLOMON: Rabbi at Alessandria and Sienna; died 1790: author of hymns for the reconsecration of the synagogue at Sienna 1786; these hymns were printed in "Seder Zemirot we-Limmud," Leghorn, 1786.

Bibliography: Steinschneider, *Cat. Bodl.* col. 1289; Mortara, *Indice*, p. 33.

D. I. E.

LEVI, JUDAH: Influential Jew at Estella, Navarre, from 1380 to 1391. In 1380 and the following years he was commissioned, with Samuel Amarillo, to collect the tax of five per cent on all real estate in the district of Estella which within the preceding fifty years had been sold or rented by Jews to Christians or Moors without the permission of the king. In 1391 he, with Yuze Orabuena and Nathan Gabay, occupied the position of farmer-general of taxes. He was engaged also in banking and exchange. He appeared frequently at court in connection with business of the king's, and always took the part of his coreligionists. He was utterly impoverished during the last years of his life, as may be seen from the letter of Benveniste ibn Labi (Vienna MSS. p. 205). The king, in view of Levi's needy condition and in recognition of his services, granted him a yearly pension of sixty florins from the state treasury. After his death, which occurred about 1392, he was unjustly stigmatized as a heretic.

Bibliography: Jacobs, *Sources*, Nos. 1458, 1477, 1533, 1536; Kayserling, *Gesch. der Juden in Spanien*, i. 57, 89; Grätz, *Gesch.* viii. 413.

G. M. K.

LEVI BEN LAḤMA: Palestinian haggadist of the third century. He seems to have been a pupil of Simeon ben Laḳish, whose haggadot he transmitted (Ber. 5a); but he transmitted some haggadot of Ḥama b. Ḥanina also (R. H. 29b; Zeb. 53b). Ta'an. 16a records three haggadic controversies between Levi b. Ḥama and Ḥanina, the former being supposed by Heilprin ("Seder ha-Dorot," ii.) and Bacher ("Ag. Pal. Amor." i. 354, *passim*) to be identical with Levi b. Laḥma. One of Levi's own haggadot asserts that Job was a contemporary of Moses, inferring this from a comparison of Ex. xxxiii. 16 with Job xix. 23 (B. B. 15a).

S. S. M. Sel.

LEVI, LEO NAPOLEON: American lawyer and communal worker; born Sept. 15, 1856, at Victoria, Texas; died in New York Jan. 13, 1904. Destined for a commercial career, Levi was sent to New York to take a commercial course, but manifesting no interest in his father's business, he returned to Victoria in 1871, and in 1872 entered the University of Virginia at Charlottesville, Va., to study law. He won the debater's medal and the essayist's medal in one year. Levi returned, after having finished his studies, to Texas, but being only slightly over twenty years old, he had to resort to proceedings to remove his disabilities so that he could without delay be admitted to the bar. In 1878 Levi stumped the state of Texas on behalf of Gustav Sleicher, who was running for Congress and was elected, defeating Judge Ireland. Although he refused to hold a political office, Levi always took an active interest in public affairs both in Texas and in New York, to which latter state he removed in 1899, establishing a law-office in New York city.

Leo Napoleon Levi.

His main activity, however, was as a communal worker, especially in his connection with the B'nai B'rith, of which he became president in 1900. In 1887 Levi addressed an "open letter" to the American rabbinate, under the title "Tell Us: What Is Judaism?" The replies being unsatisfactory, he answered his own interrogation in the pamphlet "Judaism in America." His last public act was in connection with the petition to the Russian government drawn up in protest against the Kishinef massacre of April 19–20, 1903 (see "Report of the Executive Committee of the I. O. B. B. for 1902–3"; Isidor Singer, "Russia at the Bar of the American People," 1904, ch. iii.; Cyrus Adler, "The Voice of America on Kishineff," 1904).

A. S.

LEVI, LEONE: English political economist; born in Ancona, Italy, in 1821; died in London May 7, 1888. Levi went to England at an early age, was converted to Christianity, and became a member of the English bar (1859). He devoted much time and energy to the organizing of chambers of commerce. In 1850 he published his "Commercial Law of the World"; in 1852 he was appointed to the chair of commercial law in King's College, London. Levi was an active member of the council of the Royal Statistical Society, and contributed to its journal many papers bearing on the industrial occupations of the people. In 1887 he attended the congress of European statisticians at Rome. It was owing to Levi's suggestion of the benefits which would result from the possession of an international commercial code that the acts were passed (1858) whereby the mercantile laws of the United Kingdom were made uniform on many points.

Levi was the author of: "Taxation, How It Is Raised and How It Is Expended" (1860); "History of British Commerce and of the Economic Progress of the British Nation from 1863 to 1870" (2d ed. 1878); "Work and Pay"; "War and Its Consequences." He also delivered a number of public lectures and contributed many economic articles to journals and magazines. He was created doctor of political and economic science by the University of Tübingen in 1861, and was a fellow of the Society of Antiquaries and of the Royal Geographical Society; the King of Italy conferred upon him the rank of cavalier of St. Maurice and St. Lazarus and the Order of the Crown of Italy.

J. G. L.

LEVI, LEONE: Italian author and journalist; born at Nizza-Monferrato in 1823; died at Turin Nov. 8, 1876; educated at the Collegio Foà at Vercelli. Although a man of affairs and a lawyer, he still found time to devote himself to literature, his most important work being his "Lampi della Società Contemporanea," a faithful delineation of modern life. His "Massime a Casaccio," as well as his "Il Tempio di Torino" (his last work), was published in the "Corriere Israelitico" of Triest.

BIBLIOGRAPHY: *Corriere Israelitico*, 1876-77, p. 185; Mortara, *Indice*.

S. U. C.

LEVI, LIONELLO: Italian philologist; born at Triest June 22, 1869; educated at the gymnasium of Triest and the universities of Pisa, Rome (Ph.D. 1891), and Berlin. He has been teacher of literature, later of classical philology, at the gymnasia of Benevento (1891–93), of Rome (1893–95), of Modena (1896), and of Parma since 1896. In 1895 he became lecturer on Greek literature at the University of Rome, and in 1896 of Bologna.

Levi has contributed to several journals essays on Greek and Latin literature, and is the editor of Lucian's "Peregrinus" (Berlin, 1892) and of three of the recently discovered odes of Bacchylides (Parma, 1899).

S. F. T. H.

LEVI, MORITZ: American educator; born Nov. 23, 1857, at Sachsenhausen, Waldeck; educated at the University of Michigan (graduated 1887) and at the Sorbonne, Paris. He became junior professor of the Romance languages at the University of Michigan in 1902. He has edited "L'Avare" of Molière (1900) and "I Promessi Sposi" of Manzoni (1901), and has compiled (with V. E. François) a French reader (1896). A.

LEVI, MOSE GIUSEPPE: Italian physician; born at Guastalla 1796; died at Venice Dec. 27, 1859. He graduated as doctor of medicine from the University of Padua in 1817 and settled in Venice, where he practised until his death.

Levi was the author of: "Saggio Teorico-Pratico Sugli Aneurismi Interni," Venice, 1822, which essay received the prize from the Royal Academy of Naples; "Dizionario Compendiato delle Scienze Mediche," *ib.* 1827-32; "Dizionario Classico di Medicina e Chirurgia," *ib.* 1832–40 (the two last-named being translations from the French); "Enciclopedia delle Scienze Mediche," *ib.* 1834-47; "Ricordi Interno agl' Incliti Medici"; "Chirurghi in Venezia Dopo il 1740," *ib.* 1840; "Encyclopedia Anatomica," *ib.* 1847; "Dizionario Economico della Scienze Mediche," *ib.* 1856 (incomplete). He translated also: Albert's "Hautkrankheiten," Venice, 1835; the works of Hippocrates, with Latin text, *ib.* 1838; and Burdach's "Physiologie," *ib.* 1845. He further wrote the following biographical works: "Aglietti," 1836; "A. S. Ruggieri," 1836; "G. Tommasivi," 1847; and "J. Penolazzi," 1856.

LEVI, MOSE RAFFAELE: Italian physician; born at Triest Aug. 9, 1840; died at Florence March 10, 1886. After graduating from the University of Padua (1862) he became assistant at the General Hospital in Venice. In 1868 he was one of the founders of the maritime hospital for scrofulous children at the Lido of Venice, at which institution he was physician-in-chief till 1873; he then removed to Padua, where he became privat-docent at the university and practised medicine, treating especially the diseases of children.

In 1878 he was appointed chief departmental physician at the General Hospital at Venice, lecturing there upon pediatrics. This position he resigned on account of illness in 1881, and then left Venice. In 1884 he was appointed professor of pediatrics at the University of Florence.

Levi from 1864 was collaborator and from 1873 to 1879 editor-in-chief of the "Giornale Veneto di Scienze Mediche." He wrote many essays in the medical journals of Italy. Among his works may be mentioned: "La Patologia Cellulare Considerata ne' Suoi Fondamenti e nelle Sue Applicazioni," Venice, 1863 (German transl., Brunswick, 1864); "Della Frequenza della Tenia per l'Uso Medico della Carne," etc., *ib.* 1865; "Due Case di Sifilide Cerebrali," *ib.* 1879; "Della Emiglobinuria ad Accessi Freddo," *ib.* 1881.

LEVI, NATHANIEL: Australian merchant and politician; born at Liverpool, England, Jan. 20, 1830. In 1853 he went to the gold-fields in Victoria; in 1858, having settled in Melbourne, he joined the firm of John Levi & Sons. In 1860 he was elected member of the Legislative Assembly for Maryborough, being the first Jew elected to Parliament in Victoria. While in the Legislative Assembly he took great interest in the abolition of the tea and sugar duties, in the taxation of uncultivated lands, and in the forming of labor loan-laws. In 1892 he was elected member of the Legislative Council. In 1885 he founded "The Melbourne Daily News." Levi was treasurer and president of the Melbourne Hebrew Congregation for many years, and has been connected with all the chief Jewish communal institutions of the city.

J.

LEVI, RAPHAEL: German mathematician; died May 17, 1779, in Hanover, whither his father, Jacob Joseph Levi, a poor pedler, had gone with him, then a boy of eight years, and had died a few days after their arrival. The orphan lad was provided for at the Israelitische Armenschule. At one time Leibnitz had occasion to hear some of his observations in respect to building materials, and was struck by the strong intellectual power which they manifested. He became very much interested in him, and himself instructed him in the higher mathematics. A portrait of Levi has been preserved in the Leibnitzhaus.

Of Levi's published works the following may be mentioned: "Zwei Logarithmische Tafeln," Hanover, 1747; "Vorbericht vom Gebrauche der Neuerfundenen Logarithmischen Wechseltabellen mit Fortsetzung," Leipsic, 1748; "Supplement zu dem Vorbericht," etc., Hanover, 1748; "Tekunat ha-Shomayim: Ueber Astronomie und Kalender-kunde, Namentlich Commentirung der Talmudischen und Rabbinischen Aussprüche Darüber, um Hilkot Kiddush ha-Hodesh Maimuni's zu Verstehen. Dazu Noten und Glossen von Mose ben Jekutiel," Amsterdam, 1756; and "Neue Compendiöse Allg. Cours- und Wechsel-Tafeln," etc. Several of his minor writings remained unpublished; but, from material contained in them, Simon Waltsch (Simeon ben Nathan Naṭa') issued a commentary on Maimonides' rules for the calendar, Berlin, 1786.

LEVI BEN SHEM-ṬOB: Portuguese convert; lived at the end of the fifteenth century; notorious for his hostility to his former coreligionists. According to Abraham b. Solomon of Torrutiel (Neubauer, "M. J. C." i. 113-114), it was Levi b. Shem-Ṭob (Shem Ra') who advised King Emanuel of Portugal to close all the synagogues and forbid the Jews to attend prayers. This order not proving effective, King Emanuel, on the advice of Levi, issued another (April, 1497), ordering the baptism of all Jewish children (Zacuto, "Yuḥasin," p. 227, ed. Filipowski). Levi is identified by some scholars with a certain Antonio who was chief surgeon of King John II., and who wrote a pamphlet entitled "Ajudo da Fé Contra os Judeos" (Kayserling, Gesch. der Juden in Portugal," p. 86).

LEVI, SIMḤAH ARYEH BEN EPHRAIM FISCHEL: Russian Hebraist and author of the nineteenth century; born at Hrubieszow, government of Warsaw. He wrote a double commentary on Job, preceded by a preface and two poems (Lemberg, 1833); and "Dibre Purim" (Zolkiev, 1834), an epic poem, the central figures in which are Ahasuerus and Esther. He began the compilation, on original lines, of a Hebrew dictionary entitled "Memalle," of which only the letter א appeared (Warsaw, 1839). Benjacob criticized this work severely in "Pirḥe Ẓafon" (ii. 201-208, Wilna, 1844).

H. R. M. Sel.

LEVI B. SISI (SISYI; SUSYI): Palestinian scholar; disciple of the patriarch Judah I. and school associate of his son Simeon ('Ab. Zarah 19a); one of the semi-tannaim of the last decades of the second century and of the early decades of the third. He assisted Judah in the compilation of the Mishnah and contributed baraitot (Yoma 24a). Many of Levi's baraitot were eventually embodied in a compilation known as "Ḳiddushin de-Be Lewi" (Ḳid. 76b; B. B. 52b). In the Babylonian Gemara Levi is seldom quoted with his patronymic, and neither in that nor in the Jerusalem Gemara nor in the Midrashim is he quoted with the title of "Rabbi." Keeping this in mind, the student of rabbinics will easily determine whether passages written under the name "Levi" without a patronymic must be credited to Levi bar Sisi or to a younger namesake who is almost always cited as "R. Levi" (see LEVI II). But although Levi bar Sisi is not given the title "Rab," he was highly esteemed among the learned, and in many instances where an anonymous passage is introduced with the statement למדין לפני חכמים (= "it was argued before the sages") it is to be understood that the argument referred to was advanced by Levi before Judah I. (Sanh. 17b; comp. Men. 80b; Me'i. 9b; see Rashi and Tos. *ad loc.*).

Judah I. later spoke of Levi bar Sisi as of an equal. But the latter did not always succeed in impressing the public. At the request of a congregation at Simonias to send it a man who could act at once as lecturer, judge, superintendent of the synagogue, public scribe, and teacher, and attend to the general congregational affairs, Judah I. sent Levi. When, however, Levi entered on office he signally failed to satisfy the first requirement. Questions of law and of exegesis were addressed to him, and he left them unanswered. The Simonias congregation charged the patriarch with having sent it an unfit man, but the patriarch assured it that he had selected for it a man as able as himself. He summoned Levi and propounded to him the questions originally propounded by the congregation; Levi answered every one correctly. Judah thereupon inquired why he did not do so when the congregation submitted those questions; Levi answered that his courage had failed him (Yer. Yeb. xii. 13a; comp. Yeb. 105a; Gen. R. lxxxi. 2). A late midrash speaks of him as a Biblical scholar and good lecturer (Pesiḳ. xxv. 165b).

After Judah's death Levi retired with Ḥanina b. Ḥama from the academy, and when Ḥanina received his long-delayed promotion Levi removed to Babylonia, whither his fame had preceded him (Shab. 59b; see ḤANINA B. ḤAMA). He died in Babylonia, and was greatly mourned by scholars. In the course of a eulogy on him delivered by Abba bar Abba it was said that Levi alone was worth as much as the whole of humanity (Yer. Ber. ii. 5c).

LEVI, SOLOMON B. ISAAC: Rabbi and scholar of the sixteenth century. He was born in Smyrna, became director of the academy 'Eẓ Ḥayyim at Salonica, and went subsequently to Venice. He was versed in philosophy, natural sciences, and mathematics as well as in the Talmud and the Halakah, and was eminent as a preacher. He wrote a large number of devotional and halakic works, including the following: "Leb Abot," commentary to Abot (Salonica, 1565 and 1571); "Dibre Shelomoh," five sermons for each of the weekly sections and feast-days (Venice, 1596); "Leḥem Shelomoh," commentary to the Talmud, the Midrash, and the Zohar (*ib*

1597); responsa to the Ṭur and the Shulḥan 'Aruk (Salonica, 1652); "Leb Shelomoh," similar in contents to the preceding.

LÉVI, SYLVAIN: French Orientalist; born at Paris March 28, 1863. He received his education at the Ecole des Hautes Etudes, where he became "agrégé ès lettres" in 1886. Here, too, three years later he was appointed "maître de conférences" in Sanskrit; and in the following year his duties were so extended as to include lecturing on the religions of India in the section for the science of religion. Of both these departments he is now (1904) the director. In 1889 Lévi was promoted to be "chargé de cours" in Sanskrit in the Faculty of Letters; and the next year he received the degree of "docteur ès lettres," presenting as his thesis "Quid de Græcis Veterum Indorum Monumenta Tradiderint." The same year saw the publication of his "Théâtre Indien," which is the standard work on its subject. In 1894 Lévi was appointed professor of Sanskrit in the Collège de France, a position which he still holds.

In addition to the two works already mentioned, Lévi has edited and translated the first eight chapters of Kshemendra's "Bṛhatkathamanjari" (Paris, 1886), and has published a treatise entitled "La Doctrine du Sacrifice dans les Brahmaṇas" (*ib.* 1898). He is also the author of numerous briefer studies, especially in the "Journal Asiatique," as well as of many reviews of Oriental books; and he is a collaborator on the "Revue Critique" and "La Grande Encyclopédie," to which he has contributed a large number of articles dealing with the literature and religion of India.

Lévi has been president of the Société de Linguistique de Paris and of the Société des Etudes Juives; he is also a member of the committee of the Alliance Israélite Universelle. In 1897 he was sent on a mission to India by the Ministry of Public Instruction.

LEVI-CATELLANI, ENRICO: Italian lawyer; born at Padua June 12, 1856; educated at the university there. In 1885 he was appointed assistant professor, and in 1890 professor, of international law at the same university. Levi-Catellani is a corresponding member of the Padua Regia Accademia di Scienze, Lettere ed Arti and of the Regio Istituto Veneto di Scienze, Lettere ed Arti, and a member of the Association for the Reform and Codification of International Law, at London, and of the Institut de Droit International. He is the author of the following works: "Le Colonie e la Conferenza di Berlino" (Turin, 1885); "Storia del Diritto Internazionale Privato" (*ib.* 1895); "Della Riforma agl' Istituti della Cittadinanza e della Naturalizazione," a paper read at the fourth congress of Italian lawyers; "La Dottrina Platonica delle Idee e il Concetto di Società Internazionale," in the Fr. Schupfer Memorial Volume; "Realtà ed Utopie delle Pace" (Turin, 1899); and numerous articles in literary and scientific journals.

LEVI-PEROTTI, GIUSTINA: A poetess, supposed to be of Sassoferrato, and assumed, until recently, to have addressed to Petrarch a sonnet beginning "Io Vorrei pur Drizzar Queste Mie Piume." This poem, to which Petrarch is said to have replied with his sonnet "La Gola, il Sonno, e l'Oziose Piume," was published for the first time in 1504 by G. A. Gilio, who, however, attributed it to Ortensia di Guglielmo of Fabriano. It was republished by Tommasini, who attributed it to Giustina ("Petrarca Redivivus," p. 111). Subsequently it was included in various collections of poetry, down to 1885. Although Crescimbeni, Tiraboschi, and Zeno doubted the authenticity of the sonnet, scholars like Quadrio and, with some hesitation, Foscolo accepted it. Morici concludes that the sonnet is the work of some cinquecentist, and that Giustina Levi-Perotti never existed.

LEVIAS, CASPAR: American Orientalist; born in Szagarren Feb. 13, 1860; received his elementary education in Russia and his collegiate training at Columbia College, New York (A.M.), and Johns Hopkins University, Baltimore; he was fellow in Oriental languages at the former (1893–94) and fellow in Semitic languages at the latter university (1894–95). Since 1895 Levias has been instructor at the Hebrew Union College, Cincinnati, Ohio. His published works are as follows: "A Grammar of the Aramaic Idiom Contained in the Babylonian Talmud," Cincinnati, 1900; "The Justification of Zionism," 1899. Besides these, Levias has published a large number of essays, chiefly on philological subjects, in "The American Journal of Semitic Languages" (in which his Talmudic grammar first appeared) and in the "Hebrew Union College Journal."

A.

LEVIATHAN AND BEHEMOTH: Names of gigantic beasts or monsters described in Job xl. The former is from a root denoting "coil," "twist"; the latter is the plural form of "behemah" =

"beast."—**Biblical Data:** Ever since Bochart ("Hierozoicon," iii. 705), "behemoth" has been taken to denote the hippopotamus; and Jablonski, to make it correspond exactly with that animal, compared an Egyptian form, "p-ehe-mu" (= "water-ox"), which, however, does not exist. The Biblical description contains mythical elements, and the conclusion is justified that these monsters were not real, though the hippopotamus may have furnished in the main the data for the description. Only of a unique being, and not of a common hippopotamus, could the words of Job xl. 19 have been used: "He is the first [A. V. "chief"] of the ways of God [comp. Prov. viii. 22]; he that made him maketh sport with him" (as the Septuagint reads, *πεποιημένον ἐγκαταπαίζεσθαι*; A. V. "He that made him can make his sword to approach unto him"; comp. Ps. civ. 26); or "The mountains bring him forth food; where all the beasts of the field do play" (Job xl. 20). Obviously behemoth is represented as the primeval beast, the king of all the animals of the dry land, while leviathan is the king of all those of the water, both alike unconquerable by man (*ib.* xl. 14, xli. 17-26). Gunkel ("Schöpfung und Chaos," p. 62) suggests that behemoth and leviathan were the two primeval monsters corresponding to Tiamat (= "the abyss"; comp. Hebr. "tehom") and Kingu (= Aramaic "'akna" = serpent") of Babylonian mythology. Some commentators find also in Isa. xxx. 6 ("bahamot negeb" = "beasts of the south") a reference to the hippopotamus; others again, in Ps. lxxiii. 22 ("I am as behemoth [="beasts"; A. V. "a beast"] before thee"); but neither interpretation has a substantial foundation. It is likely that the leviathan and the behemoth were originally referred to in Hab. ii. 15: "the destruction of the behemoth [A. V. "beasts"] shall make them afraid" (comp. LXX., "thee" instead of "them").

E. G. H. K.

——**In Rabbinical Literature:** According to a midrash, the leviathan was created on the fifth day (Yalḳ., Gen. 12). Originally God produced a male and a female leviathan, but lest in multiplying the species should destroy the world, He slew the female, reserving her flesh for the banquet that will be given to the righteous on the advent of the Messiah (B. B. 74a). The enormous size of the leviathan is thus illustrated by R. Johanan, from whom proceeded nearly all the haggadot concerning this monster: "Once we went in a ship and saw a fish which put his head out of the water. He had horns upon which was written: 'I am one of the meanest creatures that inhabit the sea. I am three hundred miles in length, and enter this day into the jaws of the leviathan'" (B. B. *l.c.*). When the leviathan is hungry, reports R. Dimi in the name of R. Johanan, he sends forth from his mouth a heat so great as to make all the waters of the deep boil, and if he would put his head into paradise no living creature could endure the odor of him (*ib.*). His abode is the Mediterranean Sea; and the waters of the Jordan fall into his mouth (Bek. 55b; B. B. *l.c.*).

The body of the leviathan, especially his eyes, possesses great illuminating power. This was the opinion of R. Eliezer, who, in the course of a voyage in company with R. Joshua, explained to the latter, when frightened by the sudden appearance of a brilliant light, that it probably proceeded from the eyes of the leviathan. He referred his companion to the words of Job xli. 18: "By his neesings a light doth shine, and his eyes are like the eyelids of the morning" (B. B. *l.c.*). However, in spite of his supernatural strength, the leviathan is afraid of a small worm called "kilbit" (כלבית), which clings to the gills of large fishes and kills them (Shab. 77b).

In the Messianic Times.

The leviathan is prominent in the haggadic literature in connection with the advent of the Messiah. Referring to Job xl. 30 (Hebr.), "and the pious ones [חברים] shall make a banquet of it," R. Johanan says that at the time of the resurrection a banquet will be given by God to the righteous, at which the flesh of the leviathan will be served (B. B. *l.c.*). Even the hunting of the leviathan will be a source of great enjoyment to the righteous. Those, says R. Judan bar Simon, who have not taken part in pagan sports will be allowed to participate in the hunting of the leviathan and of the behemoth (Lev. R. xiii. 3). Gabriel will be charged with the killing of the monster; but he will not be able to accomplish his task without the help of God, who will divide the monster with His sword. According to another haggadah, when Gabriel fails, God will order the leviathan to engage in a battle with the ox of the mountain ("shor habar"), which will result in death to both of them (B. B. 75a; Pesiḳ. p. 188b). Not only will the flesh of the leviathan furnish food for the table of the righteous, but there will be a great supply of it in the markets of Jerusalem (B. B. *l.c.*). From the hide of the leviathan God will make tents for the pious of the first rank, girdles for those of the second, chains for those of the third, and necklaces for those of the fourth. The remainder of the hide will be spread on the walls of Jerusalem; and the whole world will be illuminated by its brightness (*ib.*).

Symbolical Interpretation.

These haggadot concerning the leviathan are interpreted as allegories by all the commentators with the exception of some ultraconservatives like Baḥya ben Asher ("Shulḥan Arba'," ch. iv., p. 9, col. 3). According to Maimonides, the banquet is an allusion to the spiritual enjoyment of the intellect (commentary on Sanh. i.). The name, he says, is derived from לוה ("to join," "to unite"), and designates an imaginary monster in which are combined the most various animals ("Moreh," iii., ch. xxiii.). In the cabalistic literature the "piercing leviathan" and the "crooked leviathan" (Isa. xxvii. 1), upon which the haggadah concerning the hunting of the animal is based, are interpreted as referring to Satan-Samael and his spouse Lilith ("'Emeḳ ha-Melek," p. 130a), while Ḳimḥi, Abravanel, and others consider the expressions to be allusions to the destruction of the powers which are hostile to the Jews (comp. Manasseh ben Israel, "Nishmat Ḥayyim," p. 48; see also Kohut, "Aruch Completum," *s.v.* "Leviathan," for other references, and his essay in "Z. D. M. G." vol. xxi., p. 590, for the parallels in Persian literature). The haggadic sayings obtained a hold on the imagination of the poets, who introduced allusions to the banquet of the leviathan into the liturgy.

S. S. I. Br.

——**In Apocryphal Literature:** Both leviathan and behemoth are prominent in Jewish eschatology. In the Book of Enoch (lx. 7–9), Enoch says:

> "On that day [the day of judgment] two monsters will be produced: a female monster, named 'Leviathan,' to dwell in the depths of the ocean over the fountains of the waters; but the male is called 'Behemoth,' who occupies with his breast a waste wilderness named 'Dendain' [read "the land of Naid" after LXX., ἐν γῇ Ναιδ = בארץ נוד, Gen. iv. 16], on the east of the garden, where the elect and the righteous dwell. And I besought that other angel that he should show me the might of these monsters; how they were produced on one day, the one being placed in the depth of the sea and the other in the main land of the wilderness. And he spake to me: 'Thou son of man, dost seek here to know what is hidden?'" (Charles, "Book of Enoch," p. 155; comp. "the secret chambers of leviathan" which Elihu b. Berakel the Buzite will disclose, Cant. R. i. 4).

According to II Esdras vi. 49–53, God created on the fifth day the two great monsters, leviathan and behemoth, and He separated them because the seventh part of the world which was assigned to the water could not hold them together, and He gave to the behemoth that part which was dried up on the third day and had the thousand mountains which, according to Ps. l. 10, as understood by the haggadists ("the behemoth [A. V. "cattle"] upon a thousand hills"; comp. Lev. R. xxii.; Num. R. xxi.; and Job xl. 20), furnish behemoth with the necessary food. To the leviathan God gave the seventh part of the earth filled with water; and He reserved it for the future to reveal by whom and at what time the leviathan and the behemoth should be eaten.

In the Syriac Apocalypse of Baruch, xxix. 4, also, the time is predicted when the behemoth will come forth from his seclusion on land and the leviathan out of the sea, and the two gigantic monsters, created on the fifth day, will serve as food for the elect who will survive in the days of the Messiah.

Among the Gnostics.

Behemoth and leviathan form in the Gnostic system of the Ophites and others two of the seven circles or stations which the soul has to pass in order to be purged and to attain bliss (Hippolytus, "Adversus Omnes Hæreses," v. 21; Origen, "Contra Celsum," vi. 25). As if the meat of the "wild ox" behemoth and the fish leviathan were not deemed sufficient for the great banquet of the righteous in the future, a fowl was added, *i.e.*, the "ziz" (A. V. "the wild beasts" of the field), mentioned in Ps. l. 11 after the account of the behemoth in verse 10, and understood by the Rabbis to signify a gigantic bird (B. B. 73b). Thus the Apocalypse of Simeon b. Yoḥai (Jellinek, "B. H." iii. 76) has the three animals, the monster ox behemoth, the fish leviathan, and the gigantic bird ziz, prepared for the great banquet. This tradition, however, indicates Persian influence, for it is of the Parsee cosmology that the existence of such primeval representatives of the classes of animals is a part. There are four such species mentioned in "Bundahis," xviii.-xix.: (1) "the serpent-like Kar fish, the Arizh of the water, the greatest of the creatures of Ahuramazda," corresponding to the leviathan; (2) the three-legged ass Khara, standing in the midst of the ocean ("Yasna," xli. 28); it is mentioned in the Talmud as the "unicorn ḳeresh," "ṭigras" (*i.e.*, "thrigaṭ" = "three-legged"), the gazel of the heights (Ḥul. 59b), and forms, under the name "Ḥarish," in Mohammedan eschatology a substitute for behemoth and leviathan (see Wolff, "Muhammedanische Eschatologie," 1872, pp. 174, 181); (3) the ox Hadhayosh, from which the food of immortality is prepared, and which forms the parallel of behemoth; and (4) the bird Chamrosh, the chief of the birds, which lives on the summit of Mount Alburz (comp. "Bundahis," xix. 15); compare also Simurgh (Avesta "Saena Meregha," eagle-bird, griffin, Hebraized "Bar Yokneh"), the fabulous giant-bird, which the Rabbis identified with ziz (see Windischman, "Zoroastrische Studien," pp. 91–93; West, "Pahlavi Texts," in Max Müller, "S. B. E." v. 65–71).

E. G. H. K.

LEVIN, EMANUEL BORISOVICH: Russian teacher and communal worker; born at Minsk Dec. 15, 1820; educated at the Molodechensk school for the nobility (1836–41). He taught in G. Klaczko's private school at Wilna from 1842 to 1844, and at the public schools of Minsk from 1846 to 1851. Having passed his examinations in 1848, he received an appointment in the Jewish government school at Proskurov, Podolia (1851–52), and subsequently in the rabbinical school at Jitomir (1853–57).

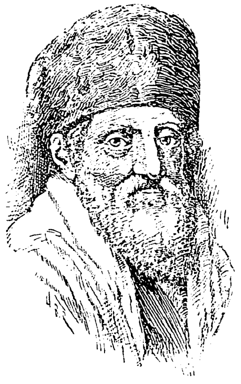
In 1859 Levin settled in St. Petersburg, where he became one of the first members of the Society for the Promotion of Culture Among the Jews of Russia, of which he acted as secretary until 1872, when he became an honorary member. Since 1895 Levin has been a member of the historical committee of the society and one of the collaborators of the "Regesty i Nadpisi." Levin was elected a member of the Imperial Russian Geographical Society in 1870; and he is also a member of the Society for the Promotion of Commerce and Industry. In 1895 Levin was made an honorary citizen by the Russian government for his "Code of Laws Concerning the Jews."

Levin's other works include: a Russian grammar in Hebrew, Wilna, 1846; "Moiseyevo Brachnoye Pravo," St. Petersburg, 1875, on the marriage laws according to the Talmud and the rabbinical literature, translated from Hebrew sources; "Svod Uzakoneni o Yevreyakh, *ib.* 1885; "Perechen Ogranichitelnykh Zakonov o Yevreyakh v Yevreyakh o Rossii" (*ib.* 1890), both on the disabilities of the Jews in Russia; "Sboraik Ogranichitelnikh Zakonov o Yevreyakh," *ib.* 1902, on the same subject. He published also the text of the Pirḳe Abot with Russian translation and notes, *ib.* 1868.

H. R. S. M. G.

LEVIN, HIRSCHEL BEN ARYEH LÖB (called also **Hirschel Löbel** and **Hart Lyon**): German rabbi; born at Rzeszow, Galicia, in 1721; died at Berlin Aug. 26, 1800. His father (known also as Saul Levin) was rabbi at Amsterdam; and on his mother's side Hirschel was a nephew of Jacob

Emden. Although he occupied himself also with secular sciences and philosophy, Levin paid special attention to Hebrew grammar and literature, and composed several Hebrew poems. Levin was a distinguished Talmudist, and in 1751, when he was only thirty years old, he threw himself into the struggle between Emden and Eybeschütz, naturally siding with the former. His epistles against Eybeschütz made such an impression that in 1756 he was elected chief rabbi of the London congregation of German and Polish Jews. In 1760 Jacob Ḳimḥi having published at Altona a responsum in which he charged the London butchers ("shoḥeṭim") with negligence in regard to their duties, Levin warmly defended them. The wardens of his synagogue, however, refused him permission to make a public reply to Ḳimḥi's charges; he therefore resigned in 1763, and accepted the rabbinate of Halberstadt. It would appear, from the letter in which the community of Halberstadt offered him the rabbinate, that Levin's resignation was occasioned by the neglect of Biblical and Talmudic studies by the Jews of London. He afterward became rabbi of Mannheim; and in 1772 he was appointed chief rabbi of Berlin. He was a great friend of Mendelssohn.



Hirschel Levin.

In 1778 Levin gave his approbation to Mendelssohn's German translation of the Pentateuch. In the preceding year the Prussian government had ordered Levin to make a résumé in German of the Jewish civil laws, such as those on inheritance, guardianship, and marriage, and to present it to the royal department of justice. Levin, not having a thorough knowledge of the German language, applied to Mendelssohn to do the work. Mendelssohn, accordingly, wrote his "Ritualgesetze der Juden," printed under Levin's superintendence, 1778.

Despite his toleration and enlightenment, Levin, instigated by the rabbis of Glogau and Lissa, began in 1782 to persecute Naphtali Herz Wessely for his "Dibre Shalom we-Emet" (Landshuth, "Toledot Anshe ha-Shem," p. 85; Kayserling, "Mendelssohn," p. 307). He prohibited the printing of that work, and insisted upon the expulsion of the author from Berlin. But Wessely's friends prevailed on Levin to desist from attacking Wessely, while Mendelssohn at the same time gave Levin to understand that the press in Germany was free to everybody.

Levin wrote: Epistles against Eybeschütz, printed by one of Emden's pupils, in the "Sefat Emet u-Leshon Zehorit," Altona, 1752; glosses on Pirḳe Abot, printed with Emden's commentary to Pirḳe Abot, Berlin, 1834; notes to the "Sefer Yuḥasin" and "Sefer ha-Ḥinnuk," some of which were published in Kobak's "Jeschurun." Some of his poetry was published in "Ha-Maggid" (xiv.) under the title "Naḥalat Ẓebi." Finally, three manuscript volumes of his responsa are to be found in the library of the London Bet ha-Midrash, bearing the numbers 24 to 26.

LEVIN, ISRAEL SOLOMON: Danish grammarian and linguist; born in Randers 1810; died in Copenhagen 1883. He graduated from Randers high school, and afterward was employed as editor of a critical journal and as a translator of novels.

Levin was the author of several works on Danish grammar, notably "Dansk Lyd og Kjönslære" (1844), and of two novels, "Krigsfortællinger for Menigmand" and "Nogle Træk af Livet i Hamburg" (1848).

LEVIN, JACOB: Galician Hebraist; born at Brody in 1844. In 1865 he became coeditor with Werber on the Hebrew paper "'Ibri Anoki," in which he published a series of articles on the position of the Jews in Russia before Alexander II. In 1880 he produced a didactic poem entitled "Hitpatteḥut Tebel," on the evolution of religion and philosophy. Levin had previously translated into Hebrew Schiller's "Die Braut von Messina" under the title "Medanim Ben Aḥim" (Brody, 1868).

LEVIN, JOSHUA HÖSCHEL BEN ELIJAH ZEEB: Lithuanian Talmudist and author; born at Wilna July 22, 1818; died at Paris Nov. 15, 1883. After studying Talmud and rabbinics under Elijah Kalischer, Levin settled in Volozhin, where he lectured on Talmud and wrote several works. In 1871 he was called to the rabbinate of Praga, near Warsaw. Toward the end of his life Levin went to Paris with the intention of proceeding thence to the Holy Land; but at the request of Israel Salant he remained in the French capital and became preacher for the Russo-Polish community there.

Levin was the author of many works, of which the following have been published at Wilna: "Haggahot," notes on the Midrash Rabbah; "'Aliyyot Eliyahu" (1856), a biography of Elijah Wilna; "Ma'yene Yehoshua'," a commentary on Pirḳe Abot, printed in the "Ruaḥ Ḥayyim" of Ḥayyim Volozhin (1859); "Ẓiyyun Yehoshua'" (1859), a complete concordance to both Talmuds; "Tosefot Sheni le-Ẓiyyon," glosses to the Mishnah; "Peleṭat Soferim" (1863), novellæ and essays; "Dabar be-'Itto" (1878), discussions and explanations on halakic matters.

S. S. M. Sel.

LEVIN, JUDAH LÖB (JEHALEL): Hebrew poet; born at Minsk, Russia, 1845. He studied Talmud under Rabbi Ḥayyim Selig and other prominent rabbis. At the age of sixteen he read through the entire Talmud. He was then married to the daughter of a Ḥasid; and under the influence of his new surroundings he began the study of the Zohar and other mystical literature. In 1868 he went to Kiev as teacher in the house of Lazar Brodski, where he studied German and Russian. He was also made treasurer of the Brodski flour-mills. In 1887 he was appointed treasurer of the Brodski sugar-refinery in Tomashpol, Podolia, where he is now (1904) residing.

Levin began to write Hebrew poetry at the age of ten; and he has contributed extensively during the last thirty years to the Hebrew periodicals "Ha-Meliẓ," "Ha-Ẓefirah," "Ha-Maggid," "Ha-Asif," and "Ha-Shaḥar." His first collection of verse, entitled "Sifte Renanim" (Jitomir, 1871), contains mostly occasional poems. In 1877 his "Kishron ha-Ma'aseh" appeared, first in "Ha-Shaḥar" (vols. vii., xviii.), and then in book form. It contains four large poems throwing light on the social condition of the Jews of Russia. They are socialistic in tendency. In another volume of "Ha-Shaḥar" (lxxx.) he published "Elḥanan," an epic poem in three parts, also concerning the social condition of the Russian Jews. Levin's style is affected and lacks brilliancy. In 1883 he translated Disraeli's "Tancred" into Hebrew under the title "Nes la-Goyim." The translation was much criticized by Frischman in "'Al ha-Nes," Warsaw, 1883.

H. R. J. G. L.

LEVIN, LEWIS CHARLES: American politician and writer; born at Charleston, S. C., Nov. 10, 1808; died in Philadelphia March 14, 1860. When still a youth he went to Woodville, Miss., where he became a school-teacher and studied law. After having been wounded in a duel he left that town and practised law successively in Maryland, Kentucky, Louisiana, and Pennsylvania. In 1838 he settled in Philadelphia and was there admitted to the bar. There he edited the "Temperance Advocate," and soon became known as a writer and speaker in the interest of the Temperance party. He was instrumental in the formation of the Native American party in 1843, and founded in its support in Philadelphia the "Sun," of which daily paper he became the editor. In 1845 he was elected to Congress, retaining his seat until 1851. He became a member of several committees and was chairman of the committee on naval affairs.

Bibliography: C. Adler, in *American Jewish Year Book*, 5661 (1900-1).

A. F. T. H.

LEVIN, MENDEL (called also **Lefin** and **Satanower**): Polish scholar and author; born in Satanow, Podolia, about 1741; died in Mikolayev, in the same province, 1819. He was educated for a Talmudist, but became interested in secular studies after reading J. S. Delmedigo's "Elim," which opened for him the hitherto unknown world of science. He went to Berlin, and there, being attracted by the brilliant circle of Jewish scholars of which Moses Mendelssohn was the central figure, he remained for several years. From Berlin he went to Brody, where he exerted much influence over Perl, Krochmal, and other early representatives of the Haskalah in Galicia. Later he lived in the palatial home of Joshua Zeitlin in Ustye, government of Moghilef, at the same time that Baruch ben Jacob resided there. He removed thence to Mikolayev, which belonged to the estate of Prince Adam Czartoryski, who engaged him as teacher for his children. M. Letteris saw an essay on Kant's philosophy written by Mendel in French for Czartoryski.

Levin's works are: "Moda' la-Binah," with an approbation by Mendelssohn (Berlin, 1789); "Refu'ot ha-'Am" (Zolkiev, 1794; 2d ed. Lemberg, 1851), popular medicine translated from the French by Tisot; "Ḥeshbon ha-Nefesh" (Lemberg, 1809; Wilna, 1844; Warsaw, 1852), practical ethics, after Franklin; "Masse'ot ha-Yam" (Zolkiev, 1818), travels on the sea, after Campe. His paraphrase of Tibbon's translation of the "Moreh Nebukim" in popular rabbinical Hebrew was published by M. Suchastover (Zolkiev, 1829), and his introduction to that work, entitled "Elon Moreh," by H. S. Slonimski (Odessa, 1867). Mendel was also the author of a Yiddish translation of Proverbs (Tarnopol, 1816), which innovation called forth a satirical work against him by Tobiah Feder ("Ḳol Meḥaẓeẓim," Berdychev, 1816). He translated also Ecclesiastes into the same dialect; but the work was not published till long after his death (Odessa, 1873).

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, pp. 277–278, Wilna, 1860; idem, *Safah le-Ne'emanim*, p. 140, Wilna, 1881; *Ha-Meassef* (Letteris ed., 1862), i. 96–97; Stanislavski, *Mendel Levin*, in *Voskhod*, 1881, No. 3, pp. 116-127; Zeitlin, *Bibl. Post-Mendels.* pp. 202–204.

H. R. P. Wi.

LEVIN, MORITZ: German rabbi; born 1843 at Wongrowitz, Posen. He studied at the University of Berlin, and was prepared for his rabbinical career by private teachers. After officiating as rabbi for a short time at Zurich, he went in 1872 in a similar capacity to Nuremberg. Since 1884 he has been preacher of the Reform congregation in Berlin.

Levin is the author of: "Gott und Seele nach Jüdischer Lehre," Zurich, 1871; "Der Gottesdienst des Herzens. Israelitisches Gebetbuch für Oeffentliche und Privatandacht," 2 vols., 1872; "Lehrbuch der Biblischen Geschichte und Literatur," 3d ed., 1897; "Iberia," Berlin, 1892; "Bar Kochba," 1892 (2d ed., 1904); "Lehrbuch der Jüdischen Geschichte und Literatur," 3d ed., 1900; "Die Israelitische Religionslehre, Systematisch Dargestellt," 1892 (2d ed., 1900); "Die Reform des Judentums. Festschrift zur Feier des 50-Jährigen Bestehens der Jüdischen Reformgemeinde in Berlin," 1895. S.

LEVIN, POUL THEODOR: Danish author; born in Copenhagen June 17, 1869; educated at the University of Copenhagen (Ph.D. 1898). Levin, who has become widely known as a literary critic, has written two dramatic works—"Antoinette" and "Sejr" (Copenhagen, 1895 and 1899). In 1894 he published "Dansk Litteraturhistorie i Omrids," a history of Danish literature, followed later by several general essays in the same field, among which are "Ovid's Ungdomsdigtning" (1897) and "Egne og Stæder" (1899).

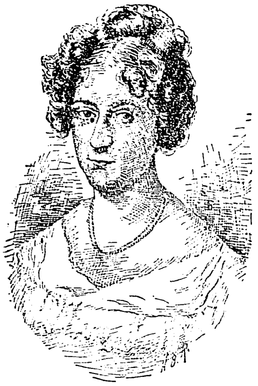
S. F. C.

LEVIN (ROBERT), RAHEL ANTONIE FRIEDERIKE: German writer; born at Berlin June 19, 1771; died there March 7, 1833. Her home life was uncongenial, her father, a wealthy jeweler, being a strong-willed man and ruling his family despotically. She was very intimate with Dorothea and Henriette, daughters of Moses Mendelssohn. Together with them she knew Henriette Herz, with whom she later became most intimately associated, moving in the same intellectual sphere. Rahel's home became the meeting-place of men like Schlegel, Schelling, Steffens, Schack, Schleiermacher, Alexander and Wilhelm von Humboldt, Lamotte-Fouqué, Baron Brückmann, Ludwig Tieck, Jean Paul Richter, and F. von Gentz. During a visit to Carlsbad in 1795 she was introduced to Goethe, whom she again saw in 1815, at Frankfort-on-the-Main.



Rahel Levin.

After the death of her father in 1806 she lived successively in Paris, Frankfort-on-the-Main, Hamburg, Prague, and Dresden. This period was one of misfortune for Germany; Prussia was reduced to a small kingdom and her king was in exile. Secret societies were formed in every part of the country with the object of throwing off the tyranny of Napoleon; Rahel herself belonged to one of these societies. In 1814 she married, in Berlin, Karl August Varnhagen von Ense (b. Feb. 21, 1785, at Düsseldorf; d. at Berlin Oct. 10, 1858), after having been converted to Christianity. At the time of their marriage, Varnhagen, who had fought in the Austrian army against the French, belonged to the Prussian diplomatic corps, and their house at Vienna became the meeting-place of the Prussian delegates to the Vienna Congress. She accompanied her husband in 1815 to Vienna, and in 1816 to Carlsruhe, where he was Prussian representative. After 1819 she again lived in Berlin, where Varnhagen had taken up his residence after having been retired from his diplomatic position.

Though not a productive writer herself, Rahel was the center of a circle of eminent writers, scholars, and artists in the Prussian capital. A few of her essays appeared in print in "Das Morgenblatt," "Das Schweizerische Museum," and "Der Gesellschafter," and in 1830 her "Denkblätter einer Berlinerin" was published in Berlin. Her correspondence with David Veit and with Varnhagen von Ense was published in Leipsic, in 1861 and 1874–75 respectively.

Rahel always showed the greatest interest in her former coreligionists, endeavoring by word and deed to better their position, especially during the anti-Semitic outburst in Germany in 1819. On the day of her funeral Varnhagen sent a considerable sum of money to the Jewish poor of Berlin.

The poet **Ludwig Robert** was a brother of Rahel, and with him she corresponded extensively; her sister **Rosa** was married to Karl Asser.

LEVIN, ẒEBI HIRSCH. See LEVIN, HIRSCHEL BEN ARYEH LÖB.

LEVINSOHN, ANNA HENRIETTE: Danish operatic singer; born in Copenhagen Jan. 8, 1839; died there March 22, 1899. She made her début at the Kongelige Theater in Copenhagen on Dec. 20, 1860, when she, as *Nannette* in "Den Lille Rödhætte," completely won the hearts of her audience by her sympathetic impersonation of the guileless girl. She became "royal actress" in 1866, and was, on her retirement in 1879, appointed court singer ("Kongelig Kammersangerinde"). Her repertoire included: *Rosina* in "Barberen," *Susanna* in "Figaro's Bryllup," *Papagena* in "Trylleflöjten," *Anna* in "Jægerbruden," *Benjamin* in "Joseph og Hans Brödre," *Siebel* in "Faust," and *Venus* in "Tannhäuser."

S. F. C.

LEVINSOHN, ISAAC BAER: Russian-Hebrew scholar and writer; born at Kremenetz Oct. 13, 1788; died there Feb. 12, 1860. His father, Judah Levin, was a grandson of Jekuthiel Solomon, who settled in Kremenetz and acquired considerable wealth, and a son of Isaac, who had married the daughter of Zalman Cohen, famed for his wealth and scholarship. Levinsohn's father was a wealthy merchant and was popular among Jews and Gentiles alike. He was a master of Polish, wrote fluently in classical Hebrew (at that time a rare accomplishment), and was a thorough Talmudic scholar. At the age of three Levinsohn was sent to the heder, where he soon manifested unusual aptitude for learning; and at nine he composed a cabalistic work that elicited the praise of scholars and rabbis ("Bet Yehudah," ii. 126, note 2). At ten he was versed in Talmudic lore, and knew the Old Testament by heart. He also studied and mastered the Russian language, an unusual achievement for a Russian Jew of that time. Thanks to his great mental power and industry, he rapidly familiarized himself with the rabbinical literature. At eighteen he married and settled in Radzivilov, supporting himself by teaching and translating; his married life, however, was unhappy, and he divorced his wife.

His Verse.

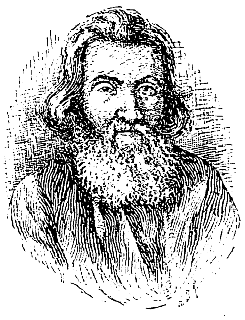
Some of Levinsohn's first literary efforts were in the domain of Hebrew poetry. Among others, he wrote a patriotic poem on the expulsion of the French from Russia, which was transmitted to the minister of the interior by General Giers, the commandant of the Radzivilov garrison. Levinsohn himself regarded his verses as mere literary exercises, did not attempt to print them, and the greater part of them were lost. Excessive study brought on nervous disorders, and Levinsohn journeyed to Brody, then the center of the Jewish Haskalah, in order to consult the local physicians. There the future reformer of the Russian Jews found a congenial atmosphere in the circle of the Maskilim. He soon made the acquaintance of Dr. Isaac Erter, the Hebrew satirist, and later of Solomon Löb Rappoport. Though engaged as a bookkeeper in the local bank, he found time to continue his studies. Before long he passed the teacher's examinations and was appointed to teach Hebrew at the gymnasium of Tarnopol. There he soon became intimate with the scholar Joseph Perl, through whose influence he secured an instructorship at the Hebrew college of Brody.

His Writings.

Levinsohn's new position brought him into close relations with Nachman Krochmal of Zolkiev, an authority on all questions of rabbinical learning and Jewish custom. In 1817 he submitted to Krochmal his first critical studies, entitled "Ha-Mazkir," and Krochmal was so favorably impressed with the work that he offered to contribute toward the expense of publication. Unfortunately, it was never printed, and only a part of it was incorporated in "Te‘uddah" and "Bet Yehudah." In 1820 Levinsohn prepared, for the benefit of the Russian youth, the first Hebrew grammar, entitled "Yesode Lashon Russiya." The necessary means being lacking, this was never published and the manuscript was lost.

About this time he wrote a satire on the Ḥasidim entitled "Dibre Ẓaddiḳim." Returning to Kremenetz in the same year, he began his "Te‘uddah be-Yisrael," a work destined to leave an indelible impression on a whole generation of Russian Jews. It was finished in 1823, but was not published until 1828. The book attempted to solve many problems of contemporary Jewish life in Russia. It urged the study of the Scriptures before the Talmud, and the necessity of studying secular languages, particularly that of the Fatherland. It urged also the study of science and literature, and the great importance for the Jews of engaging in agricultural and industrial work. It strongly counseled the abandoning of petty trading and of other uncertain sources of livelihood.

Levinsohn's good advice, however, did not please the Hasidim, who opposed him in many ways and so embittered his existence that he was compelled to leave Kremenetz. Repairing to Berdychev, he became private tutor in the family of a wealthy Jew, and, gathering about him a circle of progressive friends, he organized a society for the promotion of culture. Regarding it as his special mission to carry enlightenment to the young generation, he resided successively in Ostrog, Nemirov, and Tulchin. On his way to the last-named place Levinsohn stopped at Kaminka, the estate of Prince Witgenstein, the Russian field-marshal. When the prince heard of Levinsohn's arrival he invited him to his house, assigned him a suite of rooms, and kept him there through the entire summer. The field-marshal liked to pass his evenings in conversation with the learned Jew, and often followed the latter's advice.



Isaac Baer Levinsohn.

In 1823 Levinsohn was compelled by failing health to return to Kremenetz. Soon after his arrival there he was confined to his bed by a sickness that kept him bedridden for twelve years. Notwithstanding this he never resigned himself to mental inactivity, and during these long years of suffering he made himself familiar with Arabic, Greek, and Syriac, and studied the classics, political economy, and philosophy.

Questioned by Prince Lieven.

In 1827, a year before the appearance of "Te‘uddah," Levinsohn presented the manuscript, with an explanatory statement, to the Russian government, which accepted it with much favor, and awarded Levinsohn, on the representations of D. N. Bludov, a thousand rubles "for a work in Hebrew having for its object the moral education of the Jewish people." In the same year the minister of public instruction, Prince Lieven, submitted to Levinsohn thirty-four questions on Jewish religion and history, among them the following: "What is the Talmud?" "Who was the author of it?" "When, where, and in what language was it written?" "Have the Jews other books of such authority?" "Is there anything sensible in the Talmud? It is stated that it is full of improbable legends and fables." "How could the authors of the Talmud permit themselves to add to, or detract from, the commandments of the Torah, which forbids that?" "What is the object of the numerous rites that consume so much useful time?" "Is it true that the Jews are the descendants of those Pharisees whom the lawgiver of the Christians had accused of lying and superstition?" "Is it true that the Talmud forbids the Jews the study of foreign languages and science, as well as the pursuit of agricultural occupations?" "What is Ḥasidism, and who was its founder?" "In what towns mainly do the Ḥasidim reside?" "Do the Jews possess schools or learned books?" "How do the Jewish masses regard their schools?" "Can the condition of the Jews be improved? and, if so, by what means?" "What Messiah is it that the Jews are expecting?" "Is it true that the Jews expect to rule the entire world when the Messiah arrives, and that members of other religions will be excluded from participation in the after-life?" "How can a Jew be admitted into Christian society and be accorded full civic rights when he keeps himself aloof from the Christians and takes no interest in the welfare of the country where he resides?" Levinsohn referred the minister to his "Te‘uddah" and to other works in various languages, transmitted to him concise answers to his questions, and promised to write a book in which these questions would be discussed in detail.

In 1828 "Te‘uddah" saw the light. "It was not the yearning for fame," says Levinsohn in the preface, "that impelled me to write this book. . . . Friends seeking truth and light asked me to point out to them the true way of life; they wish to know what learning, aside from the Talmud and its commentaries, it is necessary for a Jew to acquire for the perfection and refinement of his nature as a man and a Jew."

Scope of His "Bet Yehudah."

Levinsohn now undertook his larger work, "Bet Yehudah," which was "to expose to Christian eyes the world of Jewish spiritual life founded on the principles of highest morality, a world then unknown to Russian Christians." He wished, also, to make his work of educational value to the Jewish people, so that uninstructed coreligionists would see Judaism in its true light. At the same time he found himself obliged to exercise great care in the treatment of the subject in order to avoid creating undue antagonism. Levinsohn presents in his "Bet Yehudah" a wonderfully clear and logical exposition of Jewish religious philosophy. According to him the Jewish religion may be summed up in two principles of belief: faith in one God, which involves the negation of idol-worship; and love of one's neighbor. He shows by numerous citations that the latter means the love not only of one Jew for another, but the love for any neighbor, irrespective of faith. He presents a history of the various Jewish sects, enumerates the contributions of the Jews to learning and civilization, and at the end suggests a plan for the reorganization of Jewish education in Russia. He urges the necessity of founding rabbinical seminaries fashioned after the German institutions, training the Jewish youth in religious and secular learning, opening elementary Jewish schools throughout the Pale, abolishing the institution of melammedim, and establishing agricultural and industrial schools.

"Bet Yehudah" exerted a powerful influence on the Jews of Russia and gave a plan of action to the progressive elements in the Russian Jewry. The book acquired renown outside of Russia also. It was translated into Polish, and the scholar Geiger read several chapters of it before an audience in the Breslau synagogue. But though "Bet Yehudah" was completed in 1829, it remained unpublished until 1838.

Refutes Charges of Blood Accusation.

About this time the Jewish community of Zaslavl in Volhynia was accused of ritual murder; many families were imprisoned, and the entire community was in despair. Levinsohn's opponents then laid aside their enmity and turned to him as the only man capable of proving the falsity of the accusation. In spite of his sickness Levinsohn began his "Efes Dammim," in defense of the accused Jews. But the necessary means not being forthcoming, he was obliged to spend his own money in collecting material and information. "The purpose of my book," says Levinsohn, "is to acquit the Jews before the eyes of Christians, and to save them from the false accusation of using Christian blood." "Efes Dammim" is written in the form of a dialogue between a patriarch of the Greek Church in Jerusalem, Simias, and the chief rabbi in the Jewish synagogue there. The book shows the remarkable dialectic talent of the author. It was completed in 1834, published in 1837, republished three times, and was translated into English at the time of the "Damascus Affair" in 1840, at the instance of Sir Moses Montefiore and Crémieux. It was translated also into Russian (1883) and German (1884; another German edition appeared in 1892). In another polemical work, "Yemin Ẓidki," Levinsohn proves the absurdity of the accusations against Judaism and the Talmud. This work was left by him in manuscript.

Other polemical works written by Levinsohn are "Aḥiyyah Shiloni ha-Ḥozeh" (Leipsic, 1841) and "Ta'ar ha-Sofer" (Odessa, 1863). "Aḥiyyah Shiloni ha-Ḥozeh" is directed against the work of the English missionary McCaul entitled "The Paths of the World" (London, 1839), and constitutes an introduction to Levinsohn's larger work "Zerubbabel," completed in 1853. This latter work was published, in part, by his nephew David Baer Nathansohn (Leipsic, 1863); the entire work was published later in Warsaw (1876). This work, which occupied twelve years, and was continued through sickness and suffering, was not only a defense of Judaism, but also an exposition of the value of traditional law in the Jewish religion, and of the great wisdom and moral force of its expounders and teachers. The "Ta'ar ha-Sofer" is directed against the Karaites.

Levinsohn as a Philologist.

In addition to these, Levinsohn wrote on Hebrew etymology and comparative philology. In this field he published "Bet ha-Oẓar," the first and second parts of which appeared in Wilna in 1841; the first part is entitled "Shorashe Lebanon," and includes studies of Hebrew roots; the second part comprises articles on various subjects, and "Abne Millu'im," a supplement to "Bet Yehudah." After Levinsohn's death Nathansohn published "Toledot Shem" (Warsaw, 1877) and "Ohole Shem" (Warsaw, 1893), both containing philological studies arranged in alphabetical order, and also corrections of Ben Zeb's "Oẓar ha-Shorashim," which was republished by Letteris. Levinsohn left a number of works in manuscript, including "Pittuḥe Ḥotam," on the period of the Canticles; "Yizre El," miscellaneous essays; "Be'er Yiẓḥaḳ," correspondence with contemporary scholars; "Eshkol ha-Sofer," letters, poetry, and humorous papers.

Levinsohn labored assiduously for the well-being of his coreligionists in Russia. He worked out and submitted to the government various projects for the amelioration of the condition of the Jews, such as the plan he submitted to the crown prince Konstantin in 1823, his memorandum to the minister of education in 1831, his project in regard to the censorship of Jewish books in 1833, and his plan for the establishment of Jewish colonies in 1837. Nicholas I. gave the last careful consideration. It is known, also, that the emperor wrote Levinsohn a personal letter in regard to this plan, but its contents are not known. The establishment of Jewish agricultural colonies in Bessarabia in 1838–39 and later and the organization of Jewish educational institutions undoubtedly owed much to Levinsohn's suggestions. The government appreciated his services, and, besides monetary rewards, offered him important positions, which he declined. The failure of his health compelled him to decline also appointment as member of the Jewish commission that sat in St. Petersburg in 1843, and in 1853 he again refused an appointment as member of the special commission on Jewish affairs. The following words were inscribed, at his own request, on his tombstone: "Out of nothing God called me to life. Alas, earthly life has passed, and I shall sleep again on the bosom of Mother Nature, as this stone testifies. I have fought the enemies of God not with the sharp sword, but with the Word. That I have fought for truth and justice before the Nations, 'Zerubbabel' and 'Efes Damim' bear witness." Levinsohn has been called "the Mendelssohn of Russia."

H. R.

LEVINSON-LESSING, FEODOR (FRANZ) YULYEVICH: Russian geologist; born 1861. He graduated from the physico-mathematical faculty of the University of St. Petersburg in 1883, was placed in charge of the geological collection in 1886, and was appointed privat-docent at St. Petersburg University in 1889. In 1892 he became professor, and the next year dean, of the physico-mathematical faculty of Yuryev University. Aside from his work on petrography he published also essays in other branches of geology, the result of scientific journeys throughout Russia. In various periodicals more than thirty papers have been published by him, the most important being the following: "Olonetzkaya Diabazovaya Formatziya" (in "Trudy St. Peterburgskavo Obschestva Yestestvoyvedeniya," xix.); "O Fosforitnom Chernozyome" (in "Trudy Volnoekonomicheskavo Obschestva," 1890); "O Nyekotorykh Khimicheskikh Tipakh Izvyerzhonykh Porod" (in "Vyestnik Yestestvoznaniya," 1890); "Geologicheskiya Izslyedovaniya v Guberlinskhikh Gorakh" (in "Zapiski Mineralnavo Obschestva"); "Die Variolite von Yalguba" ("Tscherm. Mineral. Mitt." vi.); "Die Mikroskopische Beschaffenheit des Jordanalit" (*ib.* ix.); "Etudes sur le Porphirite de Deweboyu" (in "Bulletin de Société Belge de Géologie"); "1 et 2 Notes sur la Structure des Roches Eruptive" (*ib.*); "Note sur les Taxites et les Roches Elastiques Volcaniques" (*ib.*); "Les Ammonée de la Zone à Sporadoceras Munsteri" (*ib.*); "Petrographisches Lexicon" (2 parts, 1893–95); "Tablitzy dlya Mikroskopicheskikh Opredeleni Porodoobraznykh Mineralov." The last was published in English by Gregory.

LEVINSTEIN, GUSTAV: German manufacturer and writer; born in Berlin May, 1842. After graduating from the Köllnisches Gymnasium in Berlin he went to England, where he and his brothers founded an anilin-dye factory at Manchester. Returning to Berlin, he entered the university and studied philosophy. He owns factories in southern France, though living in Berlin. He has at various times taken up his pen in behalf of Judaism and Jewish rights. Of his works the following may be mentioned: "Wissenschaftlicher Antisemitismus," directed against Paulsen (Berlin, 1896); "Der Glaube Israels" (*ib.* 1896); "Die Taufe" (*ib.* 1899); "Professor Paulsen und die Judenfrage" (*ib.* 1897); "Die Forderung des Sonntag-Gottesdienstes: Antwort auf das Gutachten des Rabbinats und den Beschluss der Repräsentanten-Versammlung," in support of supplementary Sunday services (*ib.* 1898); "Ueber die Erlösung des Judenthums," against Benediktus Levita (*ib.* 1900); "Professor Ladenburg und der Unsterblichkeitsgedanke im Judenthum" (*ib.* 1904).

S. M. K.

LEVINTHAL, BERNHARD LOUIS: Russian-American rabbi; born at Kovno, Russia, May 12, 1864. He was educated at the rabbinical schools of Kovno, Wilna, and Byelostok, and received rabbinical diplomas from Rabbi Isaac Elchanan Spector and Rabbi Samuel Mohilever in 1888. He emigrated to the United States in 1891, and shortly after his arrival there was appointed minister of six Russian congregations in Philadelphia. Levinthal helped to found various communal institutions in Philadelphia and is vice-president of the Union of Orthodox Rabbis of America, and honorary vice-president of the Federation of American Zionists.

LEVIRATE MARRIAGE (Hebr. "yibbum"): Marriage with a brother's widow. This custom is found among a large number of primitive peoples, a list of which is given by Westermarck ("History of Human Marriage," pp. 510–514). In some cases it is the duty of a man to marry his brother's widow even if she has had children by the deceased, but in most cases it occurs when there are no children, as among the Hindus ("Institutes of Manu," v. 59–63). Among the Hebrews marriage with a brother's widow was forbidden as a general rule (Lev. xviii. 16, xx. 21), but was regarded as obligatory (Deut. xxv. 56) when there was no male issue, and when the two brothers had been dwelling on the same family estate. The surviving brother could evade the obligation by the ceremony of Ḥaliẓah. The case of Ruth is not one of levirate marriage, being connected rather with the institution of the Go'el; but the relations of Tamar with her successive husbands and with Judah are an instance (Gen. xxxviii.). If the levirate union resulted in male issue, the child would succeed to the estates of the deceased brother. It would appear that later the levirate marriage came to be regarded as obligatory only when the widow had no children of either sex. The Septuagint translates "ben" (son) in the passage of Deuteronomy by "child," and the Sadducees in the New Testament take it in this sense (Mark xii. 19; comp. Josephus, "Ant." iv. 8, § 23).

By Talmudic times the practise of levirate marriage was deemed objectionable (Bek. 13a), and was followed as a matter of duty only. To marry a brother's widow for her beauty was regarded by Abba Saul as equivalent to incest (Yeb. 39b). Bar Ḳappara recommends ḥaliẓah (Yeb. 109a). A difference of opinion appears among the later authorities, Alfasi, Maimonides, and the Spanish school generally upholding the custom, while R. Tam and the

Northern school prefer ḥaliẓah (Shulḥan 'Aruk, Eben ha-'Ezer, 165). The marriage was not necessary if the brother left a child by another marriage, even if such a child were on the point of death (*l.c.* 157). A change of religion on the part of the surviving brother does not affect the obligation of the levirate, or its alternative, the ḥaliẓah (Isaac b. Sheshet, Responsa, i. 2), yet the whole question has been profoundly affected by the change from polygamy to monogamy due to the taḳḳanah of Gershom ben Judah (see Marriage).

The Samaritans followed a slightly different course, which may indicate an earlier custom among the Hebrews; the former practised the levirate only when the woman was betrothed and the marriage had not been consummated (Ḳid. 65b). The Karaites appear to have followed the same practise, and Benjamin Nahawendi, as well as Elijah Bashyaẓi, favored it ("Adderet Eliyahu, Nashim," p. 93a).

It has been suggested by Kalisch ("Leviticus," ii. 362–363) that the prohibition in Leviticus is of later date than the obligation under certain conditions in Deuteronomy, but it is equally possible that the Leviticus prohibition was a general one, and the permission in Deuteronomy only an exception when there was no male issue. J. F. Maclennan ("Studies in Ancient History," i. 109–114) suggested that the existence of levirate marriage was due to polyandry among the primitive Hebrews, and has been followed by Buhl ("Sociale Verhaltnisse," p. 34) and Barton ("Semitic Origins," pp. 66–67); but this is rather opposed to the Hebraic conditions, for it would be against the interests of the surviving brother to allow the estate to go out of his possession again. There is, besides, no evidence of polyandry among the Hebrews.

LEVISOHN, GEORGE (MORDECAI GUMPEL LEIVE): German surgeon; born in Berlin of a family known as "Schnaber"; died in Hamburg Feb. 10, 1797. He evinced an early aptitude for study, and attended the school of David Fränkel, chief rabbi of Berlin. Levisohn chose the medical profession, to which he devoted himself with enthusiasm. He left Germany for England, and, after studying under John Hunter, was appointed physician at the hospital of the Duke of Portland. Being called to Sweden by Gustavus III., he occupied for some time the position of professor at the University of Upsala. Gustavus thought highly of him, and he translated, at the king's command, from English into Swedish his medical and polemical works. Levisohn left the court in 1781 and returned to Germany, where he published German translations of most of his English medical works. Three years later (1784) he went to Hamburg, and, being well received, settled there and followed his profession with remarkable success.

The large number of his daily patients did not prevent him from prosecuting with zeal his medical, philosophical, and theological studies. In 1785–86 he published two medical journals, and during the following years labored at his great work on religious philosophy. He was then engaged for five years in physical researches. His works are: "Ma'amar ha-Torah we-Ḥokmah" (London, 1771), a philosophical treatise (this work caused its author to be regarded in the light of a dangerous innovator); "An Essay on the Blood" (*ib.* 1776); "Epidemical Sore Throat" (*ib.* 1778); "Beschreibung der Londonischen Medicinischen Praxis den Deutschen Aerzten Vorgelegt . . . mit einer Vorrede von T. C. A. Theden" (Berlin, 1782); "The Passions and Habits of Man, and Their Influence on Health" (Brunswick, 1797–1801); "Derek ha-Ḳodesh ha-Ḥadashah," a Hebrew grammar.

LEVISOHN, MORDECAI GUMPEL. See Levisohn, George.

LEVISON, ESAIAS: Danish educationist and author; born in Copenhagen April 22, 1803; died there March 23, 1891; educated at the University of Copenhagen (B.A. 1823). In 1824 Levison was appointed tutor at the Jewish school in Copenhagen, in which position he remained till within two years of his death. He published several religious educational works, of which the following may be mentioned: "Kortfattet Forklaring over Lærebogen i Religionen for Ungdommen af den Mosaiske Troesbekjendelse" (Copenhagen, 1825); "Bibelske Fortællinger" (*ib.* 1827); a Jewish prayer-book, with Hebrew text and Danish translation (*ib.* 1833). Levison translated into Danish Bulwer Lytton's "Paul Clifford." For two years (1837–38) he acted as coeditor of "Borgervennen," a Danish political periodical, to which he contributed several articles. In 1837 the University of Kiel conferred upon him the honorary degree of Ph.D.

S. F. C.

LEVISON, FERDINAND EMANUEL: Danish physician; born in Copenhagen Nov. 9, 1843; educated at the University of Copenhagen (M.D. 1868). He was successively assistant physician at Frederik's Hospital, the Lying-in Hospital, and the Almindeligt (Communal) Hospital in Copenhagen. In 1887 he was appointed guardian of the poor, which position he still (1904) occupies. Levison is an energetic advocate of cremation; the first Danish society for cremation was founded (1881) at his initiative, and he has ever since officiated as its president.

LEVITA, ELIJAH (known also as **Elijah ben Asher ha-Levi Ashkenazi, Elijah Baḥur, Elijah Medaḳdeḳ,** and **Elijah Tishbi**): Grammarian, Masorite, and poet; born at Neustadt, near Nuremberg, in 1468; died at Venice Dec., 1549.

From his childhood Elijah showed a predilection for Biblical studies and Hebrew grammar. He settled early in Venice; but in 1504 he was at Padua, earning a livelihood by instructing Jewish children in Hebrew. At the request of his pupils he wrote a commentary to Moses Ḳimḥi's "Mahalak"; but a

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

certain Benjamin Colbo, to whom Elijah had given the manuscript to transcribe, published the work at Pesaro under his own name. Colbo interspersed the annotations with excerpts from another work; and in this form Elijah's first production was most incorrectly printed. In spite of this, however, it became the favorite manual for students of the Hebrew language, both among Jews and Christians. It was soon reprinted several times at Pesaro, and made its way into Germany and France, where also it was reprinted; it was translated into Latin by Sebastian Münster (Basel, 1531, 1536). It was not until 1546 that Elijah, urged by his friends, claimed the authorship of the work and published a corrected edition of it at Venice. During his stay in Padua, Elijah published in German a version of the Baba Buch.

Grammarian.

The relatively happy circumstances enjoyed by Elijah at Padua did not long continue. In 1509 the city was taken and sacked by the army of the League of Cambray, and Elijah, losing everything he possessed, had to leave the place. He betook himself to Rome, and having heard of the scholarly and liberal-minded Ægidius of Viterbo, general of the Augustine Order, who was studying Hebrew, he called upon him. This prelate, in exchange for Hebrew lessons from Elijah, offered to maintain him and his family. For thirteen years Elijah remained in the palace of the cardinal, writing works which spread his reputation, giving lessons in Hebrew, and, in turn, taking lessons in Greek from the cardinal. During this period Elijah produced the "Sefer ha-Baḥur," a grammatical treatise written at the request of the cardinal, to whom it was dedicated, and first published at Rome in 1518 (2d ed. Isny, 1542, and many subsequent reissues). As the author explains in his preface, he called the work "Baḥur" because that was his surname, and further because the word denoted both "youth" and "excellent." The treatise is divided into four parts, each of which is subdivided into thirteen sections, corresponding to the thirteen articles of the Jewish creed; while the total number of sections, fifty-two, represents the numerical value of "Elijah," his name. The first part discusses the nature of the Hebrew verbs; the second, the changes in the vowel-points of the different conjugations; the third, the regular nouns; and the fourth, the irregular ones.

In the same year (1518) Elijah published tables of paradigms for beginners, entitled "Luaḥ be-Diḳduḳ ha-Po‘alim weha-Binyanim"; and a work, on the irregular words in the Bible, entitled "Sefer ha-Harkabah." Desiring to explain every intricacy and anomaly in the Hebrew language, but fearing that too many digressions might prevent his grammar from becoming a popular manual, he in 1520 published dissertations on various grammatical subjects under the general title "Pirḳe Eliyahu." This he divided into four parts: the first, "Pereḳ Shirah," discussing in thirteen stanzas the laws of the letters, the vowel-points, and the accents; the second, "Pereḳ ha-Minim," written in prose, treating of the different parts of speech; the third, "Pereḳ ha-Middot," discussing the various parts of speech; and the fourth, "Pereḳ ha-Shimmushim," treating of the servile letters. Like his preceding works, it was translated into Latin and published by Sebastian Münster.

Proof-Reader and Tutor.

In 1527 misfortune again overtook Elijah; he was driven from his studies when the Imperialists sacked Rome, and lost all his property and the greater part of his manuscripts. He then returned to Venice, and was engaged by the printer Daniel Bomberg as corrector of his Hebrew press. To the income derived from this employment was added that earned by tuition. Among his pupils was the French ambassador George de Selve, afterward Bishop of Lavaur, who by generous pecuniary assistance placed Elijah in a position to complete his great Masoretic concordance "Sefer ha-Zikronot," on which he had labored for twenty years. This work, which De Selve, to whom it was dedicated, sent to Paris to be printed at his expense, has for some unknown reason never been published, and is still extant in manuscript in the Bibliothèque Nationale, Paris. An attempt to edit it was made by Goldberg in 1875, but he got no farther than אנכי. The introduction and the dedication to it were published by Frensdorf in Fraenkel's "Monatsschrift" (xii. 96–108). Still the "Sefer ha-Zikronot," to which Elijah often refers as his chef-d'œuvre, made a good impression in Paris, and Elijah was offered by Francis I. the position of professor of Hebrew at the university there, which he declined, being unwilling to settle in a city forbidden to his coreligionists. He declined also invitations from several cardinals, bishops, and princes to accept a Hebrew professorship in Christian colleges.

"Massoret."

Two years after the completion of the "Sefer ha-Zikronot" Elijah published his Masoretic work "Massoret ha-Massoret" (Venice, 1538), divided into three parts, respectively denominated "First Tables," "Second Tables," and "Broken Tables," each with an introduction. The "First Tables" is divided into ten sections, or commandments ("‘Aseret ha-Debarim"), dealing with the "full" and "defective" writing of syllables. The "Second Tables" treats of the "ḳere" and "ketib," "ḳameẓ" and "pataḥ," "dagesh," "mappiḳ," "rafe," etc. The "Broken Tables" discusses the abbreviations used by the Masorites. In the third introduction Elijah produces an array of most powerful arguments to prove that the vowel-points in the Hebrew Bibles were invented by the Masorites in the fifth century of the common era. This theory, although suggested by some Jewish scholars as early as the ninth century, provoked a great outcry among the Orthodox Jews, who ascribed to the vowel-points the greatest antiquity. They were already dissatisfied with Elijah for giving instruction in Hebrew to Christians, since the latter openly confessed that they studied the Hebrew language with the hope of finding in the Hebrew texts, especially in the Cabala, arguments against Judaism. To this Elijah replied in the first introduction to the "Massoret ha-Massoret" that he taught only the elements of the language and did not teach Cabala at all. Moreover, he pointed out that Christian Hebraists generally defended the Jews against the attacks of the fanatical clergy. Elijah's theory concerning the modernity of the vowel-points caused still greater excitement among Christians, and for three centuries it gave occasion for discussions among Catholic and Protestant scholars, such as Buxtorf, Walton, De Rossi, and others. The "Massoret ha-Massoret" was so favorably received that in less than twelve months after its appearance it was republished at Basel (1539). In this edition Sebastian Münster translated into Latin the three introductions, and gave a brief summary of the contents of the three parts. The third part, or the "Broken Tables," was republished separately at Venice in 1566, under the title "Perush ha-Massoret we-Ḳara Shemo Sha'are Shibre Luḥot." This part of the book was again republished, with additions, by Samuel ben Ḥayyim at Prague in 1610. The three introductions were also translated into Latin by Nagel (Altdorf, 1758–71). In 1772 the whole book was translated into German by Christian Gottlob Meyer, and in 1867 into English by Christian D. Ginsburg.

Lexicographer.

In 1538, also, Elijah published at Venice a treatise on the laws of the accents entitled "Sefer Ṭub Ṭa'am." Meanwhile David Bomberg's printing-office had ceased to exist, and Elijah, although at that time seventy years of age, left his wife and children and departed in 1540 for Isny, accepting the invitation of Paul Fagius to superintend his Hebrew printing-press there. During Elijah's stay with Fagius (until 1542 at Isny and from 1542 to 1544 at Constance) he published the following works: "Tishbi," a dictionary containing 712 words used in Talmud and Midrash, with explanations in German and a Latin translation by Fagius (Isny, 1541); "Sefer Meturgeman," explaining all the Aramaic words found in the Targum (*ib.*); "Shemot Debarim," an alphabetical list of the technical Hebrew words (Isny, 1542); a Judæo-German version of the Pentateuch, the Five Megillot, and Hafṭarot (Constance, 1544); and a new and revised edition of the "Baḥur." On returning to Venice, Elijah, in spite of his great age, still labored on the edition of several works, among which was David Ḳimḥi's "Miklol," to which he added notes of his own ("nimuḳim").

J. I. Br.

LEVITAN, ISAAC (ISAAC ILYICH): Russian painter; born near Eidtkuhnen Aug. 18, 1860; died at Moscow July 22, 1900. His father, who earned a livelihood by giving private tuition, removed to Moscow when Levitan was still a boy and gave him a good home training. About 1875 Levitan entered the Moscow School of Art, where he finished the course. Living in great poverty, and at times in actual want, he still continued his work, and at the age of nineteen displayed considerable talent in his "An Autumn Day at Sokolniki." This picture was purchased by the well-known connoisseur Tretyakov. In 1880 Levitan exhibited "The Plowed Field," which attracted much favorable comment. As late as 1886, notwithstanding the reputation which he had acquired, he still continued to derive only a very small income from his profession.

The period 1887–97 was the most happy of Levitan's life, and to it belong his best works. He was a tireless worker and painted a very large number of pictures. Twenty-five of his paintings are to be seen in the Tretyakov gallery alone. He probably produced in all about 1,000 paintings and studies, most of them in the decade 1887–97. In 1892, when Levitan was already widely known and after the award to him of the first prize for his picture "Twilight" at the Art Lovers' Exhibition, the notorious May Laws were enforced in Moscow, and he was permitted to remain there only owing to the influence of powerful friends. His nearest relatives, however, were compelled to leave the city, their business was ruined, and Levitan had to render them material aid to the end of his life. In 1897 Levitan was elected an active member of the Munich society Secession, and the Academy of Art selected him an academician.

Levitan's paintings are marked by a thorough knowledge of Russian scenery and types. They possess a decided originality; at the same time they convey an expression of sadness. In his funeral oration Count A. E. Lvov said of Levitan: "He was an artist-poet. He not only painted pictures—in his paintings there was something besides; we not only saw his pictures, we also felt them. He knew how to interpret Nature and her mysteries as no other man." Even the "Novoye Vremya" (July 29, 1900), an organ decidedly anti-Semitic in its policy, admitted that "this full-blooded Jew knew, as no other man, how to make us realize and love our plain and homely country scenes."

Among the works of Levitan may be mentioned: "Over Eternal Rest"; "The Neglected Graveyard"; "A Tatar Graveyard"; "Relics of the Past—Twilight in Finland"; "The Golden Autumn"; "Vladimirka"; "March"; "After the Rain"; "Forest"; "Evening"; "The Peaceful Retreat"; "The Hay Harvest"; and two lake scenes. A picture by Levitan, entitled "A Convent on the Eve of a Holiday," was exhibited at the Columbian Exposition, Chicago, in 1893.

H. R. J. G. L.

LEVITES (Temple Servants).—Biblical Data: Of the Levites, Aaron and his sons were chosen for the priestly office (Ex. xxviii. 1 *et seq.*); the menial services of the Tabernacle were assigned to the rest of the tribe (Num. i. 47 *et seq.*). The Kohathites were to bear the sacred furniture of the Tabernacle; the Gershonites, its curtains; and the Merarites, its boards, pins, and poles (Num. iv. 4–16, 22–28, 29–33). It is distinctly stated that the Levites shall not approach the most holy things (Num. iv. 19)—that is, they shall not act as priests, a function which the context reserves for Aaron and his sons.

In Deuteronomy the representation is quite different; "priests" and "Levites" are there synonymous terms, and the one is regularly placed in apposition with the other. In Deut. xviii. 1, apparently, every Levite is a potential priest. In Joshua, as in Numbers, the Levites consist of the clans of Kohath, Gershon, and Merari, and to each clan a large number of cities is assigned (comp. Josh. xxi.; see Levi, Tribe of). The Levites, as the servants of the Temple, appear next in I Chronicles, where David is represented as dividing them into "courses" to wait on the sons of Aaron by doing the menial work of the Temple because they were no longer needed to carry the Tabernacle (comp. I Chron. xxiii., especially 26–28). He also appointed some to be doorkeepers of the Temple, some to have charge of its treasure, and some to be singers (I Chron. xxv.–xxvi.).

Ezekiel, however, gives a somewhat different impression of the personnel of the Temple service in pre-exilic times. In ch. xliv. 9–13 he declares that in future no uncircumcised foreigner shall enter the Temple, and that the Levites who have served at idolatrous shrines shall be deposed from the priesthood and perform the menial services of the sanctuary, such as keeping the gates and slaying the offerings. This seems to imply that before the Exile this service had been performed not by Levites, but by foreigners (an impression which Josh. ix. 23 deepens), and that those who were accounted Levites in this subordinate sense had formerly exercised a priesthood, of which Ezekiel did not approve.

After the Exile the Temple organization, as reflected in the books of Ezra and Nehemiah, is the same as that portrayed in Chronicles. The plan of Ezekiel was not altogether carried out, for the Nethinim, who were descended from slaves whom David had given to the Temple (Ezra viii. 20), shared with the Levites the subordinate work of the sanctuary (Ezra vii. 24). In later times it would seem that the distinction between Levites and Nethinim gradually disappeared; present information on this point consists solely of the fact that the Nethinim were given genealogies along with the Levites (Ezra ii. 40 *et seq.*). At the beginning of the common era the Levites were an important class of religious officials (comp. Luke x. 32; John i. 19).

——**Critical View:** The Biblical data thus present two inconsistent views. According to Leviticus, Numbers, the greater part of Joshua, and Chronicles, the priesthood was confined to the house of Aaron from the first, and the Levites existed as a menial class for the performance of the subordinate work of the sanctuary from the time of Moses. The portions of Leviticus, Numbers, and Joshua which contain this point of view are all from the P stratum of the Hexateuch—a post-exilic document, as the Graf-Wellhausen school believes. Chronicles, too, is a work written some time after the Exile.

In the older books of Judges, Samuel, and Kings the priestly offices are represented as not exclusively performed by Levites, who, however, were from the first preferred for these services and gradually monopolized them (see Levi, Tribe of). These services were not confined to any one sanctuary, but were performed in temples all over the land (comp. Judges xviii. 30). This condition of affairs apparently continued until Josiah, in 621 B.C., instituted a reform on the basis of the Deuteronomic law (II Kings xxiii.), when all sanctuaries except that at Jerusalem were abolished. This left a large number of priests without a vocation, and they were consequently recommended to the charity of their brethren along with the widow, the fatherless, and the resident alien (Deut. xii. 18, 19; xiv. 27, 29; xvi. 11, 16). In this code every Levite is still regarded as a possible priest, however, and it is distinctly stipulated that if one of them goes to Jerusalem he shall have the same privileges in the exercise of the priestly office as are enjoyed by any other Levite (Deut. xviii. 6–7). But the influence of the Jerusalem priesthood seems to have been so great that even Josiah could not enforce this provision, and the provincial priests were never accorded in fact the privileges in the Temple on Zion which Deuteronomy had granted them (comp. II Kings xxiii. 9). Ezekiel's plan for the reorganization of the Temple services proposed to utilize these men for the menial work of the sanctuary; this proposal was actually embodied in the legislation of P and became a part of the post-exilic religious organization.

Earlier Accounts.

The view of the Graf-Wellhausen critical school is that last outlined—that the cleavage between priests and Levites was not begun until the time of Josiah, that it received a further impetus from Ezekiel, and that it became a real feature of the permanent religious organization after the return from Babylon. This view is strengthened by the fact that J in Josh. ix. 23 represents Joshua as presenting the foreign Gibeonites to the Temple as slaves, "hewers of wood and drawers of water," and that Ezekiel shows that foreigners continued to fill the menial offices down to the time of the Exile. Van Hoonacker ("Le Sacerdoce dans la Loi et dans l'Histoire des Hébreux," 1899) contends that Chronicles records pre-exilic conditions (comp. Baudissin in "Theologische Literaturzeitung," 1899, cols. 359–363). The picture of the Levites given in Leviticus, Numbers, the P portions of Joshua, and Chronicles is thought by others to be a projection by the writers of the institutions of their own times into the distant past.

After Josiah.

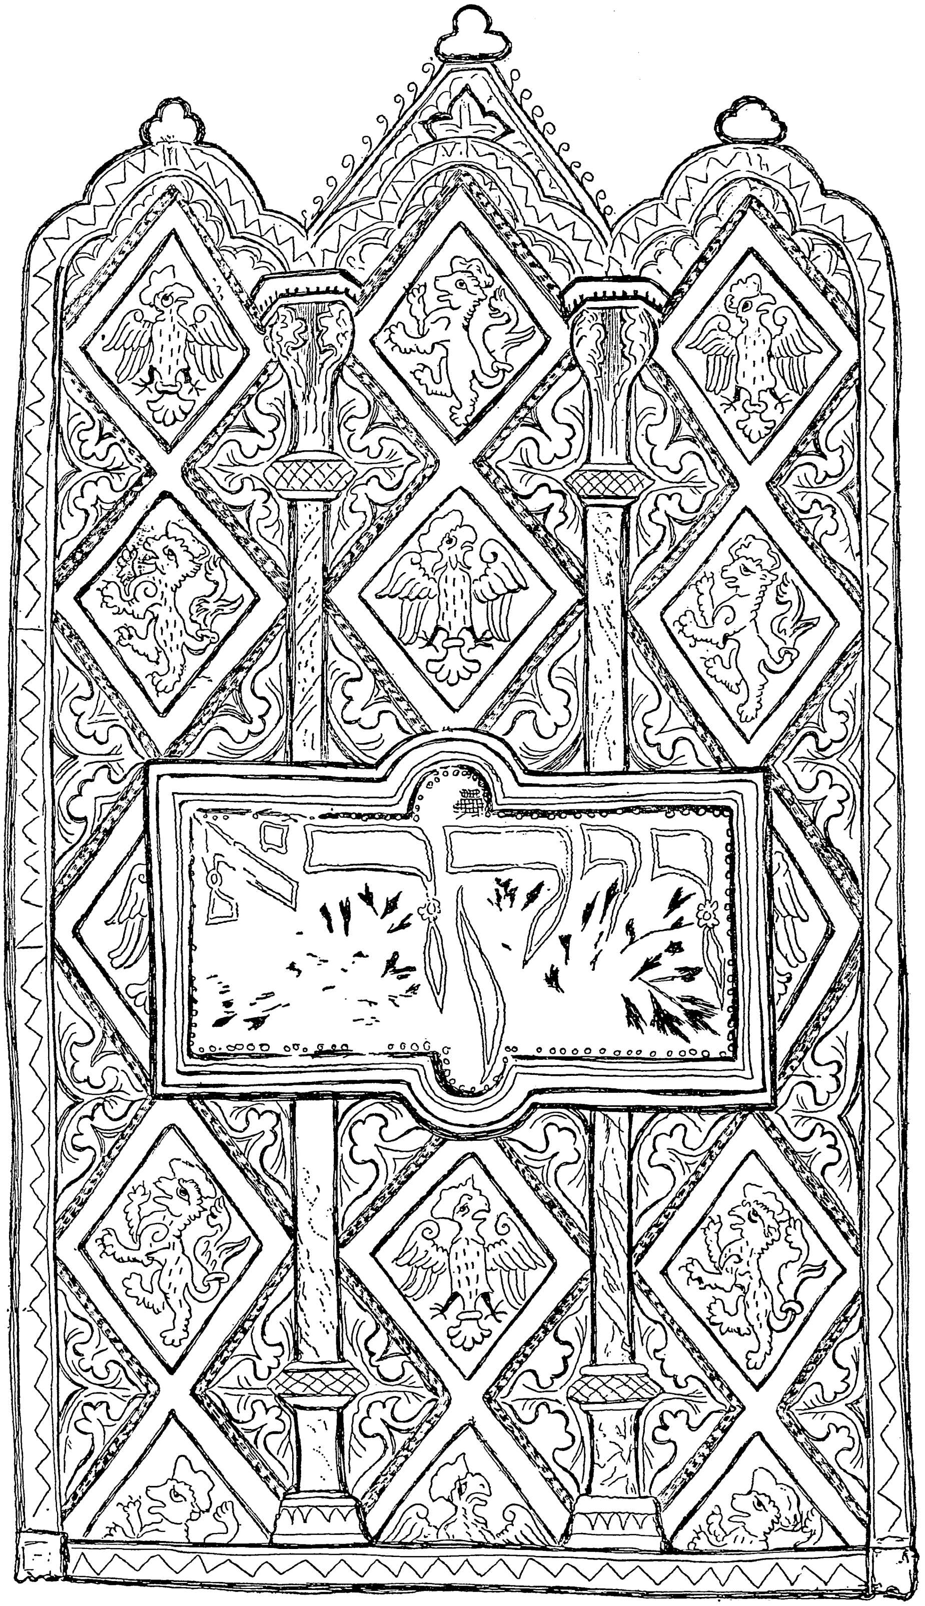
LEVITICUS.—Biblical Data: The English name is derived from the Latin "Liber Leviticus," which is from the Greek (το) Λευιτικόν (*i.e.*, *βιβλίον*). In Jewish writings it is customary to cite the book by its first word, "Wa-yiḳra." The book is composed of laws which treat of the functions of the priests, or the Levites in the larger sense. It is in reality a body of sacerdotal law. The various laws comprising this collection are represented as spoken by Yhwh to Moses between the first day of the first month of the second year after the Exodus and the first day of the second month of the same year (comp. Ex. xl. 17 and Num. i. 1). There is no note



Illuminated Page of Leviticus.

(From a manuscript formerly in the possession of the Duke of Sussex.)

of a definite time in Leviticus itself, but from the references cited it is clear that in the continuous narrative of the Pentateuch this is the chronological position of the book.

Contents.

Ch. i.-vii.: A collection of laws relating to sacrifices. It falls into two portions: (1) ch. i.-vi. 7 (Hebr. i.-v.) and vii. 22-34 are laws addressed to the people; (2) ch. vi. 8-vii. 21 (Hebr. vi. 1-vii. 21) are addressed to the priests. Ch. i. contains laws for burnt offerings; ch. ii., for meal-offerings; ch. iii., peace-offerings; ch. iv., sin-offerings; ch. v. 1-vi. 7 (Hebr. ch. v.), trespass-offerings; ch. vi. 8-13 (Hebr. vi. 1-6) defines the duties of the priest with reference to the fire on the altar; ch. vi. 14-18 (Hebr. vi. 7-11), the meal-offering of the priests; ch. vi. 19-23 (Hebr. vi. 12-16), the priests' oblation; ch. vi. 24-30 (Hebr. vi. 17-23), the trespass-offering; ch. vii. 1-7, trespass-offerings; ch. vii. 8-10, the portions of the sacrifices which go to the priests; ch. vii. 11-18, peace-offerings; ch. vii. 19-21, certain laws of uncleanness; ch. vii. 22-27 prohibits eating fat or blood; ch. vii. 28-34 defines the priests' share of the peace-offering. Ch. vii. 35-38 consists of a subscription to the preceding laws.

Ch. viii.-ix.: The consecration of Aaron and his sons; though narrative in form, they contain the precedent to which subsequent ritual was expected to conform.

Ch. x. contains two narratives: one shows that it is unlawful to use strange fire at Yhwh's altar; the other requires the priests to eat the sin-offering. Between these narratives two laws are inserted, one prohibiting intoxicating drink to the priests, the other giving sundry directions about offerings (8-15).

Ch. xi. contains laws in regard to clean and unclean animals, and separates those which may from those which may not be used for food.

Ch. xii. contains directions for the purification of women after childbirth. A distinction is made between male and female children, the latter entailing upon the mother a longer period of uncleanness.

Ch. xiii. and xiv. contain the laws of leprosy, giving the signs by which the priest may distinguish between clean and unclean eruptions.

Ch. xv. contains directions for the purifications necessary in connection with certain natural secretions of men (2-18) and women (19-30).

Ch. xvi. contains the law of the great Day of Atonement. The chief features of this ritual are the entrance of the high priest into the Holy of Holies and the sending of the goat into the wilderness (see Azazel).

Ch. xvii.-xxvi. contain laws which differ in many respects from the preceding and which have many features in common. They are less ritualistic than the laws of ch. i.-xvi. and lay greater stress on individual holiness; hence the name "Holiness Code," proposed by Klostermann in 1877 for these chapters, has been generally adopted. Ch. xvii. contains general regulations respecting sacrifice; ch. xviii. prohibits unlawful marriages and unchastity; ch. xix. defines the religious and moral duties of Israelites; ch. xx. imposes penalties for the violation of the provisions of ch. xviii. In ch. xxi. regulations concerning priests are found (these regulations touch the domestic life of the priest and require that he shall have no bodily defects); ch. xxii. gives regulations concerning sacrificial food and sacrificial animals; ch. xxiii. presents a calendar of feasts; ch. xxiv. contains various regulations concerning the lamps of the Tabernacle (1-4) and the showbread (5-9), and a law of blasphemy and of personal injury (10-23); ch. xxv. is made up of laws for the Sabbatical year and the year of jubilee (these laws provide periodical rests for the land and secure its ultimate reversion, in case it be estranged for debt, to its original owners); ch. xxvi. is a hortatory conclusion to the Holiness Code.

Holiness Code.

Ch. xxvii. consists of a collection of laws concerning the commutation of vows. These laws cover the following cases: where the vowed object is a person (1-8); an animal (9-15); a house (14-15); an inherited field (16-21); a purchased field (22-25); a firstling (26-27). Then follow additional laws concerning persons and things "devoted" (28-29) and concerning tithes (30-33). Verse 34 is the colophon to the Book of Leviticus, stating that these laws were given by Yhwh as commands to Moses at Mount Sinai.

E. G. H. G. A. B.

—**Critical View:** In the critical analysis of the Pentateuch it is held that Leviticus belongs to the priestly stratum, designated by the symbol P. To this stratum the laws of Leviticus are attached by their nature and also by linguistic affinities (comp. Pentateuch, and J. Estlin Carpenter and G. Harford Battersby, "Hexateuch" [cited hereafter as "Hex."], i. 208-221). This priestly stratum was formerly regarded as the "Grundschrift," or oldest stratum of the Pentateuch, but by Graf and Wellhausen, whose views now receive the adherence of the great majority of scholars, it has been shown to be on the whole the latest. Leviticus as it stands is not, however, a consistent code of laws formulated at one time, but is the result of a considerable process of compilation. It has already been noted that chapters xvii. to xxvi. have a distinct character of their own and a distinct hortatory conclusion, which point to an independent codification of this group of laws. Within this same group many indications that it is a compilation from earlier priestly sources may also be found. Ch. xviii. 26, xix. 37, xxii. 31-33, xxiv. 22, xxv. 55, xxvi. 46, and xxvii. 34 are all passages which once stood at the end of independent laws or collections of laws. Similar titles and colophons, which are best explained as survivals from previous collections, are found also in other parts of the book, as in vi. 7 (A. V. 14); vii. 1, 2, 37, 38; xi. 46, 47; xiii. 59; xiv. 54, 55; xv. 32, 33. It is necessary, therefore, to analyze these laws more closely.

Latest Stratum of Pentateuch.

It will be convenient to begin this analysis with ch. viii.-x., which are, as previously noted, narratives rather than laws. Ch. viii. relates the consecration of Aaron and his sons to the priesthood. That consecration is commanded in Ex. xl. 12-15, just as the erection of the Tabernacle is commanded in Ex. xl. 1-11. As the erection of the Tabernacle is described in Ex. xl. 17-38, it is probable that Lev. viii., recounting the consecration of Aaron and his sons, immediately followed Ex. xl. Ch. i.-vii. have by editorial changes been made to separate this narrative from its context. Lev. viii. is based on Ex. xxix., relating its fulfilment, just as Ex. xxxv.-xl. is based on Ex. xxv.-xxviii. and xxx., xxxi. It has been shown (comp. Exodus, Book of, Critical View I.) that Ex. xxxv.-xl. is a later expansion of a briefer account of the fulfilment of the commands of xxv.-xxxi.; it follows accordingly that Lev. viii. probably belongs to a similar late expansion of a shorter account of the fulfilment of the commands of ch. xxix. Lev. viii. is not so late as Ex. xxxv.-xl., since it knows but one altar.

Chapters viii.-x.: Narratives.

Ch. ix. resumes the main thread of the original priestly law-book. It relates to the inaugural sacrifice of the Tabernacle—the real sequel to Ex. xxv.-xxix. Probably it was originally separated from those chapters by some brief account of the construction and erection of the sanctuary and the consecration of the priesthood. The editor's hand may be detected in verses 1 and 23.

Ch. x. 1-5 is the continuation of ch. ix. and is from the same source. The regulations in verses 6-20 are loosely thrown together, though verses 6, 12-15, and 16-20, are, as they stand, attached to the main incident in verses 1-5. Verses 10, 11 are allied to ch. xvii.-xxvi., the Holiness Code (comp. Driver in "S. B. O. T." *ad loc.*). Verses 16-20 are a late supplement, suggested by the conflict between the procedure of ix. 15 and the rule of vi. 24-30.

Ch. i.-vii.: Laws of Offerings.

Ch. i.-vii., as already noted, consist of two parts: i.-v. (A. V. vi. 7), addressed to the people, and vi.-vii. (A. V. vi. 8-vii. 36), addressed to the priests. It is not a unitary, harmonious code: the two parts have a different order, the peace-offering occurring in a different position in the two parts.

Ch. i.-iii. were compiled from at least two sources, and have been touched by different hands. Ch. iii. should follow immediately after ch. i.

Ch. iv., which graduates a scale of victims for the sin-offering according to the guilt of the sinner, is later than i.-iii. It is regarded by all critics as a late addition to the ritual. The altar of incense, v. 7, is unknown to the older ritual (comp. Ex. xxix. 10-14); and the ritual of the high priest's sin-offering is much more elaborate than in Ex. xxix. 10-14 or Lev. ix. 8-11. The sin-offering, which in other laws is a goat (Lev. ix. 15, xvi. 8, and Num. xv. 24), is here a bullock. The ritual is throughout heightened, perhaps beyond all actual practise.

Ch. v.-vi. 7 (A. V. v.) afford no indications of so late a date as ch. iv., although it is clearly a combination of laws from various sources (comp. verse 14 and v. 20 (A. V. vi. 1). The oldest nucleus seems to be v. 1-6, in which there are no ritual directions. Verses 7-10 and 11-13 are later and perhaps successive additions. Though united later, they are probably genuine laws.

The rules for the guidance of the priests (vi. [A. V. vi. 8-vii.]) are also compiled from previous collections, as is shown by the different headings (comp. vi. 1, 13, 18 [A. V. vi. 8, 19, 24]). They also are genuine laws from an older time.

Ch. xi.: Clean and Unclean Animals.

Ch. xi. defines the clean and unclean animals. Because several of these laws are similar to the Holiness legislation (comp. verses 2-8, 9-11, 20, 21, and 41, 42), it has been inferred by many critics that ch. xi. is a part of that legislation, that it is in reality the law which xx. 25 implies. Others, as Carpenter and Harford Battersby, regard it as an excerpt from a body of priestly teaching which once had an existence independent of the Holiness Code. The chapter is not a unit. Verses 24-31 seem to be an expansion of v. 8, while verses 32-38 appear to be a still more recent addition.

Ch. xii. contains directions for the purification of women after childbirth. In v. 2 reference is made to ch. xv. 19. As the rules in xii. are cast in the same general form as those of xv., the two chapters are of the same date. It is probable that xii. once followed xv. 30. Why it was removed to its present position can not now be ascertained. For date see below on ch. xv.

Ch. xiii. and xiv.: Laws of Leprosy.

The extreme elaboration of the rules for Leprosy has led some scholars to regard the compilation of ch. xiii. and xiv. as late, especially as it has been inferred from Deut. xxiv. 8 that when Deuteronomy was compiled the rules concerning leprosy were all still oral (comp. "Hex." ii. 158, note). Moore, on the other hand (in Cheyne and Black, "Encyc. Bibl."), points out that the ritual of xiv. 2-8 is very primitive (comp. Smith, "Rel. of Sem." pp. 422, 428 [note], 447), and that there is no reason to doubt the early formulation of such laws. These chapters are not, however, all of one date. The original draft of the law included only xiii. 2-46a, xiv. 2-8a, and the subscription in 57b; xiii. 47-59, which treats of leprosy in garments, was codified separately, for in verse 59 it has a colophon of its own. Ch. xiv. 10-20 is clearly a later substitute for 2-8a. Ch. xiv. 33-53, which treats of fungous growths on the walls of houses, is often classed with the rules for leprosy in garments; but since it has a new introductory formula (33) it is probably independent of that section. Since it adopts (49) the mode of cleansing of xiv. 2-8a, it is also independent of xiv. 9-32. As it makes mention of atonement while xiv. 2-8a does not, it is also later than that. Thus three hands at least worked on these chapters.

The rules for purification after the discharge of secretions of various kinds (ch. xv.) are often regarded as late. The language is tediously repetitious. The sacrificial ritual (verses 14, 29) is parallel to that of the sin-offering in ch. v. It is probable that a shorter earlier law on the subject has been expanded by a later hand; but it seems impossible now to separate the original from the later material.

Much discussion has been expended upon the account of the great Day of Atonement (ch. xvi.). Its opening words connect it with the incident of Nadab and Abihu (x. 1-5). These words are regarded as editorial by some, but the subsequent material,

Ch. xvi.: The Day of Atonement.

which denies the priests free approach to the sanctuary, makes such a connection fitting. Not all of the chapter, however, treats of this subject. With various prohibitions against entering the holy place, there is combined a curious ritual concerning the sending of a goat into the wilderness to Azazel. As this ritual is given before the directions for the observance of the day, Benzinger (in Stade's "Zeitschrift," ix. 65–89) has argued that in verses 4–28 two accounts have been combined, one of which dealt with entrance into the sanctuary, and the other with the Azazel ritual. The former of these consisted of verses 1–4, 6 (or 11), 12, 13, and 34b, which were perhaps followed by 29–34a. This original law prescribed a comparatively simple ritual for an annual day of atonement. With this verses 5, 7–10, 14–28 were afterward combined. This view has not escaped challenge (comp. "Hex." ii. 164, note); but on the whole it seems probable.

The Day of Atonement appears, however, not to have been provided for by the priestly law-book in the time of Nehemiah; for, whereas the celebration of the Feast of Tabernacles, beginning with the fifteenth of the seventh month (Neh. viii. 14 *et seq.*), which was followed on the twenty-fourth by a confession of sin (*ib.* ix. 1 *et seq.*), is described, no mention is made of a day of atonement on the tenth. Probably, therefore, ch. xvi. and other passages dependent upon it (*e.g.*, Lev. xxiii. 26–32 and Ex. xxx. 1–10) are of later date (comp. "Hex." i. 156 *et seq.*). Even if this ritual be a late addition to the Book of Leviticus, however, there is good reason to believe that it represents a primitive rite (comp. Smith, "Rel. of Sem." 2d ed., pp. 411 *et seq.*, especially p. 414, and Barton, "Semitic Origins," pp. 114, 289).

Ch. xvii.-xxvi.: The Holiness Code.

Ch. xvii.–xxvi., as already pointed out, form a group of laws by themselves. Ch. xxvi. 3–45 contains an address of Yhwh to the Israelites, setting forth the blessings which will follow if these laws are observed, and the disasters which will ensue if they are violated. The character of the discourse and its resemblance to Deut. xxviii. prove that Lev. xxvi. once formed the conclusion of a body of laws. The peculiar phraseology and point of view of this chapter recur a number of times in earlier chapters (comp. xviii. 1–5, 24–30; xix. 2, 36b, 37; xx. 7, 8, 22–26; xxii. 31–33). Ch. xviii.–xxvi. are therefore bound together as one code. Recent criticism regards ch. xvii. as originally a part of the same legislation. As the "Book of the Covenant," Ex. xx. 24–xxiii. 19, and the Deuteronomic Code, Deut. xx.–xxvi., each opened with a law regulating the altar ceremonies, it is probable that the Holiness Code (H) began in the same way, and that that beginning now underlies Lev. xvii. The regulations of this code sometimes resemble those of Deuteronomy, sometimes those of P; and as it traverses at times the legislation of both, there can be no doubt that it once formed a separate body of laws.

This code was compiled from various sources by a writer whose vocabulary possessed such striking characteristics that it can be easily traced. Some of his favorite phrases are, "I Yhwh am holy"; "I am Yhwh"; "my statutes and ordinances"; "who sanctifies you [them]"; "I will set my face against them"; etc. (comp. Driver, "Leviticus," in "S. B. O. T." p. 83, and "Hex." i. 220 *et seq.*). As the work now stands the laws have been somewhat interpolated by P; but these interpolations can for the most part be easily separated.

Interpolations.

In ch. xvii. P has added verses 1, 2, 15, and 16, and all references to "the tent of meeting" and "the camp" in verses 3, 4, 5, and 6; probably, also, the last clause of verse 7. The original law required every one who slaughtered an animal to bring the blood to the sanctuary (comp. I Sam. xiv. 33–35), a thing perfectly possible before the Deuteronomic reform had banished all local sanctuaries. This law is, therefore, older than the centralization of the worship in 621 B.C. (comp. II Kings xxiii.). As P by his additions has left the law in Lev. xvii., it could have been observed by only a small community dwelling near Jerusalem.

In ch. xviii. P has transmitted H's law of prohibited marriages and unchastity, prefixing only his own title.

Ch. xix. contains laws which are, broadly speaking, parallel to the Decalogue, though the latter portion, like the Decalogue of J in Ex. xxxiv., treats of various ritualistic matters. P's hand is seen here only in verses 1, 2a, 8b, 21, and 22.

Ch. xx. opens with a law against Moloch-worship. Verse 3 is contradictory to verse 2. Probably the latter is the old law and the former is from the pen of the compiler of H (comp. Baentsch in Nowack's "Hand-Kommentar," 1903). In verses 11–21 laws against incest, sodomy, approach to a menstruous woman, etc., are found. They are parallel to ch. xviii. and from a different source. H embodied both chapters in his work. P prefixed verse 1 to the chapter.

Ch. xxi. contains regulations for priests. Originally it referred to all priests; but P has interpolated it in verses 1, 10, 12b, 16a, 21, 22, and 24, so as to make it refer to Aaron and his sons.

The laws of sacrificial food and sacrificial animals have been modified by many glosses. Some of these are anterior to H. P has added the references to Aaron and his sons in verses 1, 2, 3, 4, and 18. In this chapter two originally independent calendars of feasts have been united. From P came verses 1–9, 21, 23–38, 39a, 39c, and 44; from H, verses 10–20, 39b, and 40–43. A later hand added verse 22, and perhaps other glosses (for details comp. "Hex." and Baentsch *ad loc.*).

Ch. xxiv. 1–9, which treats of the lamps and the showbread, belongs to the P stratum, but is out of place here. Verses 10–13, 23 deal with blasphemy. They are quite unrelated to verses 15–22 except as a partial doublet, and belong, perhaps, to a secondary stratum of P. Verses 15–22 are a part of the Holiness Code.

The law of the Sabbatical year and of jubilee in ch. xxv. is now composite. The earlier portion was a part of the Holiness Code. Driver sees this portion in verses 2b–9a, 10a, 13–15, 17–22, 24, 25, 35–39, 43, 47, 53, 55. P has added the portions which introduce a complicated reckoning, viz.: verses 1, 9b, 10b-12, 16, 23, 26-34, 40, 42, 44-46, 48-52, 54 (for other analyses comp. Baentsch and "Hex." *ad loc.*).

Ch. xxvi., as already noted, is the hortatory conclusion of the Holiness Code. It has escaped serious interpolation from later hands, except perhaps in verses 34 *et seq.*, where references to the Exile may have been inserted.

Leviticus now concludes with a chapter on vows, which belongs to a late stratum of P. It is later than the institution of the year of jubilee, and introduces a law, not mentioned elsewhere, concerning the tithe of cattle.

Date and Place of Composition of P.

From what has been said concerning the absence of ch. xvi. from the Pentateuch of Nehemiah it is clear that some of the material of Leviticus was added to it later than Nehemiah's time. It is probable that P in its main features was in the hands of Ezra and Nehemiah. Leviticus is, however, not the work of the P who wrote the account of the sacred institutions, but of an editor who dislocated that work at many points, and who combined with it the Holiness Code and other elements.

It is commonly supposed that the priestly laws were collected in Babylonia and were brought back to Palestine by Ezra. Haupt goes so far as to claim that the Levitical ritual is influenced by Babylonian institutions (comp. Haupt, "Babylonian Elements in the Levitical Ritual," in "Jour. Bib. Lit." xix. 55-81), and that a number of the words are Babylonian loan-words. Any deep Babylonian influence may well be doubted, however. It has been seen that the laws of Leviticus were collected little by little in small codes, and that they were united into their present form after the time of Nehemiah. If any of these collections were made during the Exile, it must have been the desire of the priests who collected them to preserve the sacred ritual of the Temple at Jerusalem. Like Ezekiel, they may have proposed reforms, but it is hardly likely that they would deliberately copy heathen practises. The Levitical terms which are identical with Babylonian no more prove borrowing from Babylonia than the similarities between the code of Hammurabi and the Hebrew codes prove a similar borrowing there. All that is proved in either case, when radical differences are given proper weight, is that in both countries the laws and the ritual were developed from a common basis of Semitic custom.

Date and Place of Composition of the Holiness Code.

It is generally held that the Holiness Code is younger than Ezekiel, though this is opposed by Dillmann ("Exodus und Leviticus") and Moore (in "Encyc. Bibl." *s.v.*). That there are many resemblances between H and Ezekiel all agree. Ezekiel dwells again and again upon offenses which are prohibited in the code of H. Compare, *e.g.*, the laws of incest, adultery, and of commerce with a woman in her uncleanness (Lev. xviii. 8, xx. 10-17, and Ezek. xxii. 10, 11). A list of such parallels will be found in "Hex." i. 147 *et seq.* The same writers point out (*ib.* pp. 149 *et seq.*) that there is a similarity between Ezekiel and the hortatory portions of H so striking as to lead Colenso to regard the former as the author of those exhortations. Equally striking differences make Colenso's theory untenable; and it remains an open question whether Ezekiel influenced H, or H influenced Ezekiel. Those who regard H as the later (Wellhausen, Kuenen, Baentsch, and Addis) lay stress on the references to exile in xxvi. 34-44, while Dillmann and Moore regard such phenomena as the work of later hands. When one remembers how many hands have worked on Leviticus it must be admitted that the references to exile may well be additions; and if the antiquity of the law of the altar in ch. xvii. be recalled—a law which is clearly pre-Deuteronomic—the probability that H is really earlier than Ezekiel becomes great.

Comparisons of the laws of H with those of Deuteronomy have often been instituted, but without definite results. Lev. xix. 35, 36 is, it may be urged, more developed than Deut. xxv. 13-15, since the measures and weights are more definitely specified; but the point is not of sufficient significance to be decisive. On the other hand, the implication of many sanctuaries in ch. xvii. points to H's priority to Deuteronomy. At any rate it seems probable that H and Deuteronomy were collected quite independently of each other. The hortatory form of each is similar. This, together with resemblances to the language and thought of Jeremiah, points to the same general period as the date of their composition. Whether H is not the older of the two must be left an open question, with a slight balance of argument in favor of its greater antiquity. This view makes it probable that the Holiness Code was compiled in Palestine.

LEVY. See EXECUTION.

LEVY, AARON: Revolutionary patriot; founder of Aaronsburg, Pa.; born in Amsterdam in 1742; died in Philadelphia Feb. 23, 1815. He went to America at an early age and settled in Pennsylvania, his name appearing in the first tax-assessment lists of Northumberland county. He engaged in trade with the Indians and furnished supplies to the proprietary government, and, during the war of the Revolution, to the colonial army. In 1778 Levy signed a memorial of the inhabitants of Northumberland county asking help on account of the British and Indian ravages in the vicinity. In the same year he removed to Lancaster, engaging in business with Joseph Simon. He speculated in land in Pennsylvania, and soon became one of the largest landed proprietors, owning immense tracts in nearly every county in the state. During the war he released to the state twelve tracts in Luzerne county; later he petitioned the government requesting that they be either paid for or returned to him (see letter dated Aug. 26, 1801, in Pennsylvania State Archives, second series, xviii. 347, 442).

Robert Morris, the financier of the Revolution, was Levy's partner in many of these speculations, and borrowed considerable sums of money from him, acknowledgment of the indebtedness being made at the time of Morris' bankruptcy. Through the influence of Morris, Levy loaned a large amount of money to the Continental Congress for the purpose of carrying on the war. This money was never fully repaid (see letter in reference to these loans in the Journals of Congress, March 29, 1781). It was after the war that he engaged in his greatest speculation in land, with which his name will always be connected. In 1779 he bought a large tract of land in Center county, Pa., upon which he laid out the town of Aaronsburg, the earliest town in the county, the plan of which was recorded at Sunbury on Oct. 4, 1786; it is the first town in the United States that was planned by, and named after, a Jew. Aaron Levy was one of the original members of the Congregation Mickvé Israel, Philadelphia. He died without issue. See AARONSBURG.

A.

A. S. W. R.

LEVY, ABRAHAM HIRTZEL: Alsatian martyr; born at Wittolsheim; executed at Colmar, Alsace, Dec. 31, 1754. He was accused with three other Jews of having stolen property amounting to three thousand livres from the house of a widow named Madeline Kafin. Notwithstanding that they all proved an alibi, he was condemned to "the ordinary and extraordinary question." He did not confess and was broken on the wheel the next day. The chief Jews of Alsace, convinced of his innocence, brought the case on appeal before the Privy Council of Paris, which reversed the verdict and proclaimed Levy innocent June 16, 1755. His remains were removed from the gallows, enveloped in a ṭallit, and buried in the Jewish cemetery of Jungholtz.

D.

J.

LÉVY, ALBERT: French sculptor; born at Paris May 4, 1864. A pupil of Etienne Leroux, he exhibited for the first time in 1886, his work being a portrait medallion.

Lévy's sculptures include: "Rêverie," 1887; "La Prière" and "Fillette," 1888; "Etude d'Enfant," 1889; "Jeune Paysanne à la Source," 1891; "La Chanson," 1892; "Jeune Trouveur," 1893; "Portrait de Simon," 1894; "Eve," 1895; "Jean de Rotrou à Vingt Ans," 1896; "Sans Permis," 1898. He has executed also busts of several well-known persons.

F. T. H.

LÉVY, ALFRED: French rabbi; born at Lunéville Dec. 14, 1840. He studied at the Collège de Lunéville and entered (1860) the Paris Rabbinical Seminary. On leaving it in 1866 he was appointed rabbi at Dijon, where he remained for two years. He then occupied for twelve years the rabbinate of his native town, and in 1880 became chief rabbi of the consistory of Lyons. He is a chevalier of the Legion of Honor.

Lévy has published the following writings: "Le Deuil et les Cérémonies Funèbres chez les Israélites," Paris, 1879; "Notice sur les Israélites du Duché de Lorraine," 1885; "Notice sur les Israélites de Lyon," 1894; "Les Doctrines d'Israel, Recueil de Sermons," Lyons, 1896.

S.

LÉVY, ALPHONSE: French painter; born at Marmoutier, Alsace, in 1843; educated at the Strasburg lyceum. At the age of seventeen he went to Paris, where he studied under Gérôme. As an illustrator, Lévy has drawn for all the great Parisian journals, devoting himself almost exclusively to scenes of Jewish life. Among his illustrations the most important are those for the Jewish stories of Sacher Masoch, his "Jewish Life," and especially his latest collection of thirty drawings lithographed by himself. He is now (1904) engaged on a series of sketches of Jewish life in Algiers to parallel his drawings of the Ashkenazic Jews. In the Salon of the Société Nationale des Beaux-Arts and at the International Exposition of 1900 Lévy won prizes, and the committee, Gérôme, Dagnan, Bouveret, Henri Bouchot, and Gustave Geffroy, recommended him for the cross of the Legion of Honor. He has been made also an officer of the Academy.

J. KA.

LEVY, AMY: English novelist and poet; born Nov. 10, 1861, in London; died there Sept. 10, 1899. Verse written by her before she was eight years of age gave evidence of high literary talent. By the time she had entered her teens she had produced a considerable number of verses, essays, plays, and short stories characterized by a steady and rapid increase in significance and power; one of her poems written at the end of that period was published in the quarterly known as the "Pelican." In 1876 the family moved to Brighton, where she attended the high school. It was while at school that she wrote "Xantippe," a scathing defense in verse of Socrates' spouse from a modern standpoint—a remarkable achievement for a school-girl in her teens.

On leaving school Amy Levy spent two years at Girton College, Cambridge, working fitfully at the prescribed studies, but doing much reading and writing. During her first term there a story of hers came out in "Temple Bar," and a little later "Xantippe and Other Poems" was published in three volumes. Then came a winter in Dresden, and on her return to London she occupied herself with teaching and writing. "The Minor Poet," published in 1882, is tinged with sadness and with suggestions of autobiography. The third and last volume of her poems, "A London Plane Tree," appeared after her death. As pure literature all three volumes have a distinctive charm. Her first novel, the "Romance of a Shop," and a short story, "Miss Meredith," were published in 1886, after a winter spent in Florence; and in 1888 "Reuben Sachs" appeared. The last-named work presents some of the less pleasing aspects of the Jewish character, and the vivid writing of the exquisitely imagined story makes regret more keen that the author's outlook on her people was so limited.

J.

LÉVY, ARMAND (ABRAHAM): French mathematician and mineralogist; born at Paris 1794; died there June 26, 1841. He was a graduate of the Ecole Normale, where he became teacher of mathematics (1814-15). He went to England, where he lived till 1828, and then to Belgium. Here he was lecturer at the University of Liége, and became a member of the Academy of Sciences at Brussels. Returning to France in 1830, he was appointed professor of mineralogy at the Collége Charlemagne.

Lévy published essays in the "Correspondance Mathématique" of Quételet (1828-30), in the "Annals of Philosophy," and in the "Philosophical Magazine," and was the author of: "De Différentes Propriétés des Surfaces de Second Ordre"; "Sur une Nouvelle Manière de Mesurer la Pesanteur Spécifique des Corps"; "Sur Quelques Propriétés des Systèmes de Forces."

"Blessing of the New Moon."
(From a drawing by Alphonse Lévy.)

LEVY, ASSER (ASSER LEVY VAN SWELLEM): One of the first Jewish settlers of New Amsterdam, as New York city was known under the Dutch; probably born in Amsterdam; died in 1680. He is first mentioned as one of the Jews who went to New Netherlands in 1654, probably as refugees from Brazil. From the start Levy was one of the champions of his people, never permitting an injury, however slight, to pass without protest. In 1655 Peter Stuyvesant, the governor of the colony, was ordered to attack the Swedes on the Delaware, and accordingly issued orders for the enlistment of all adults. Several Jews, among whom was Asser Levy, appear to have been ready to serve; but the governor and council passed an ordinance "that Jews can not be permitted to serve as soldiers, but shall instead pay a monthly contribution for the exemption." Levy and his comrades at once refused to pay, and on Nov. 5, 1655, petitioned for leave to stand guard like other burghers or to be relieved from the tax. The petition was rejected with the comment that if the petitioners were not satisfied with the law they might go elsewhere. Levy successfully appealed to Holland, and was subsequently permitted to do guard duty like other citizens.

As Levy appears also as a prominent trader at Fort Orange (Albany), it is likely that he was responsible for the rebuke given to Stuyvesant by the directors in Holland during the same year because of his refusal to permit Jews to trade there. Levy was also one of the first licensed butchers in the colony. In 1657 the burgher right was made absolutely essential for certain trading privileges, and within two days of a notice to that effect Asser Levy appeared in court requesting to be admitted as a burgher. The officials expressed their surprise at such a request. The record reads: "The Jew claims that such ought not to be refused him as he keeps watch and ward like other burghers, showing a burgher's certificate from the city of Amsterdam that the Jew is a burgher there." The application was denied, but Levy at once brought the matter before Stuyvesant and the council, which, mindful of the previous experience, ordered that Jews should be admitted as burghers (April 21, 1657).

As early as 1661 Levy purchased real estate at Albany; he was also the earliest Jewish owner of real estate in New York city, his transactions there commencing in June, 1662, with the purchase of land on South William street. Within ten years of his arrival Levy had become a man of consequence, and when, in 1664, the wealthiest inhabitants were summoned to lend the city money for fortifications against the English, he was the only Jew among them: he lent the city 100 florins.

It is as a litigant, however, that Levy figures most prominently in the Dutch records, his name often appearing for days in succession. He invariably argued his own case and was almost invariably successful. Only on two or three occasions did he figure as defendant. No other Jew seems to have had so many dealings with Christians, or to have been on more intimate terms with them. As a litigant he is named also in the records of Gravesend in 1674. Levy's trading relations extended to New England, and he frequently appeared as attorney for merchants in Holland. In 1671 he lent the money for building the first Lutheran church in New York. About 1678 he built a slaughter-house in the east end of what is now known as Wall street, where he appears to have been the owner of a famous tavern.

Instead of being unpopular on account of his many lawsuits, the contrary seems to have been the case. The confidence reposed in his honesty by his Christian fellow citizens appears frequently from the court records. Property in litigation was put into his custody; he is named as executor in the wills of Christian merchants, and figures as both administrator and trustee in colonial records. His influence was not confined to New York; in the colonial records of Connecticut he appears as intervening to obtain the remission of a fine imposed upon a Jew there. The court remitted the fine with the comment that it did so "as a token of its respect to the said Mr. Asser Levy." He left a considerable estate, over which there was a long legal contest. A second **Asser Levy** appears in the Connecticut records as late as 1725, and a third, presumably a grandson, was an officer in a New Jersey regiment during the American Revolution.

A. L. Hü.

LÉVY, AUGUST MICHEL: French engineer, geologist, and mineralogist; born at Paris Aug. 17, 1844; son of Michel Lévy. In 1862 he entered the Ecole Polytechnique, and two years later the school of mines, becoming engineer in 1867, and engineer-in-chief in 1883. After 1876 he took an important part in the preparation of the detailed geological map of France published by the ministry of public works. In 1887 he became director of this important undertaking, and in the following year took charge also of the underground topographic survey. In addition to articles and notes scattered in various scientific periodicals, he has written: "Mémoire sur les Divers Modes de Structure des Roches Eruptives Etudiées au Microscope," Paris, 1876; "Mémoire pour Servir à l'Explication de la Carte Géologique Détaillée de la France," *ib.* 1879; "Introduction à l'Etude des Roches Eruptives Françaises," *ib.* 1879; "Synthèse des Minéraux et des Roches," *ib.* 1882 (the three preceding in collaboration with Foqué); "Les Minéraux des Roches," *ib.* 1888; "Etude Géologique de Serrania de Ronda," *ib.* 1888 (in collaboration with Bergeron); "Tableaux des Minéraux des Roches," *ib.* 1890 (in collaboration with Lacroix); "Etude sur la Détermination des Feldspaths dans les Plaques Minces," *ib.* 1894; "Structure et Classification des Roches Eruptives," *ib.* 1899.

S. J. Ka.

LEVY, BENJAMIN: Coloinal resident of Philadelphia. On Nov. 7, 1765, he signed, with other citizens of Philadelphia, the celebrated agreement not to import merchandise from England until the repeal of the Stamp Act. On Dec. 27, 1776, he was appointed, upon the recommendation of the treasurer of the United States, an authorized signer of the bills of credit (see "Journal of the Continental Congress").

A. A. S. W. R.

LEVY, EDUARD CONSTANTIN: German musician; born March 3, 1796, at Sanct Avold, Lorraine; died June 3, 1846, at Vienna. He received his first lessons in music from his father, a musician to the Duke of Zweibrücken. As the protégé of a French officer he entered, at the age of fourteen, the Paris Conservatoire, where he became proficient in the bugle (which he chose as his favorite instrument), the cello, and the violin. He joined the French army in 1812, served with the Old Guard through the Waterloo campaign, and at the Restoration was appointed bandmaster and drum-major. After retiring from the service he went on concert tours through France and Switzerland, married at Basel, and in 1824 went to Vienna, where he became soloist in the K. K. Hof-Oper. In 1834 he was appointed professor at the Vienna Conservatorium, and in 1835 became a member of the Imperial Hofkapelle.

Levy's three children inherited his musical talent: **Karl** was a pianist, **Melanie** a harpist, and **Richard Eduard** a cornetist. In 1838 they accompanied their father on concert tours through Russia and Germany.

Bibliography: Riemann, *Musikalisches Lexikon.*

S. E. J.

LEVY, ELEAZAR: Colonial resident of New York city prior to the Revolution. He fled from New York on account of the British occupation and took up his residence in Philadelphia, where he engaged in business. On Aug. 26, 1779, he presented a memorial to the Continental Congress, claiming that the United States had erected fortifications on lands at West Point on which he held a mortgage, and asking for compensation for his loss. On May 23, 1783, it is recorded that a congressional committee reported that in its opinion "it is not convenient to take any order therein." During the Revolutionary war Levy took the oath of allegiance to the state of Pennsylvania. In 1785 he acted as one of the administrators of the estate of Haym Solomon (see "Pennsylvania Journal," Jan. 15, 1785).

A. A. S. W. R.

LEVY, EMIL: German philologist; born at Hamburg Oct. 23, 1855; educated at the universities of Heidelberg and Berlin (Ph.D. 1880). The following two years he spent in Paris and Montpellier; he became privat-docent at the University of Freiburg-im-Breisgau in 1883, and was appointed assistant professor in 1887.

Levy is known principally as the author of the great dictionary, begun in 1894 and still (1904) unfinished, entitled "Provenzalisches Supplement-Wörterbuch. Berichtigungen und Ergänzungen zu Raynouards Lexique Roman" (vols. i.-iv. covering A to L). Among his other works are "Der Troubadour Bertolome Zorzi," Halle, 1883, and "Bemerkungen zum Engadinischen Hiob," Freiburg-im-Breisgau, 1895.

S. F. T. H.

LÉVY, ÉMILE: French rabbi; born at Marmoutier, Alsace, Jan. 28, 1848. Educated at the lyceum at Strasburg and the seminary at Paris, he became rabbi of Verdun in 1876, which position he held until 1892; in that year he became chief rabbi of Bayonne.

Lévy has been a contributor to the "Revue des Etudes Juives" and is the author of "La Monarchie chez les Juifs en Palestine," Paris, 1885. In collaboration with M. Bloch he has written also "Histoire de la Littérature Juive Depuis l'Origine Jusqu'à Nos Jours."

S. F. T. H.

LEVY, ERNST: German physician; born at Lauterburg, Alsace, March 5, 1864; educated at the universities of Strasburg, Heidelberg, and Paris (M.D. 1887). Settling in Strasburg, he became privat-docent in hygiene at the university there in 1891 and assistant professor in 1897.

Levy has written several monographs and essays in the German and French medical journals, and is the author also of the two following works: "Grundriss der Klinischen Bacteriologie," Berlin, 1894 (2d ed. 1898); "Bacteriologischer Leitfaden," Strasburg, 1897 (2d ed. 1901).

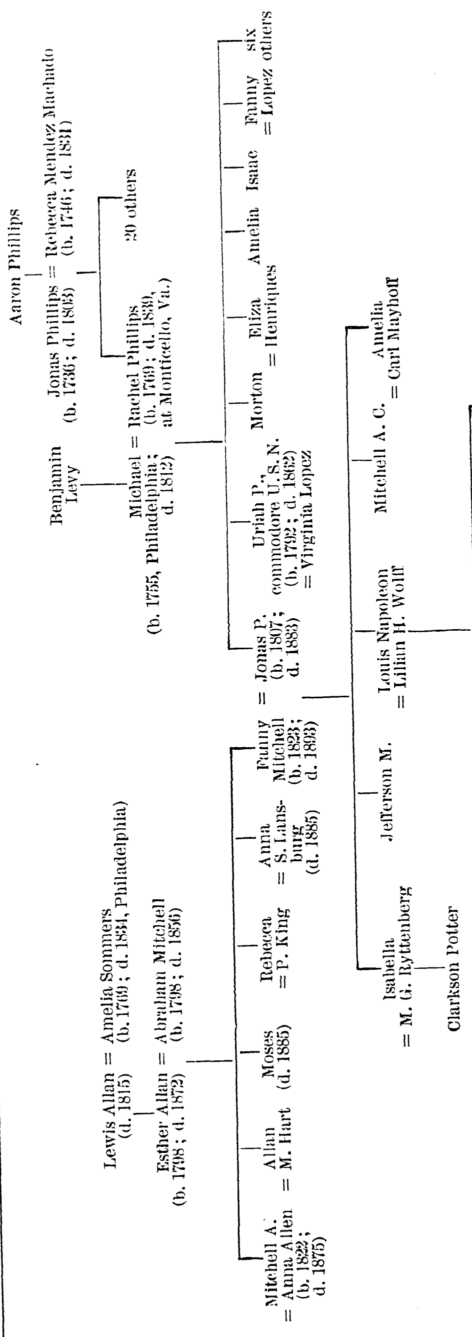
LEVY FAMILY (of America): The following is a genealogical tree of the family descended from Benjamin Levy of Philadelphia:



Aaron Phillips
Benjamin Levy
Jonas Phillips = Rebecca Mendez Machado (b. 1736; d. 1803) (b. 1746; d. 1831)
Michael = Rachel Phillips (b. 1755, Philadelphia; d. 1812) (b. 1769; d. 1839, at Monticello, Va.)
20 others
Lewis Allan = Amelia Sommers (d. 1815) (b. 1769; d. 1834, Philadelphia)
Esther Allan = Abraham Mitchell (b. 1798; d. 1872) (b. 1798; d. 1856)
Jonas P. (b. 1807; d. 1883)
Uriah P., commodore U. S. N. (b. 1792; d. 1862) = Virginia Lopez
Morton
Eliza = Henriques
Amelia
Isaac
Fanny = Lopez
six others
Mitchell A. = Anna Allen (b. 1822; d. 1875)
Allan = M. Hart
Moses (d. 1885)
Rebecca = P. King
Anna = S. Lansburg (d. 1885)
Fanny Mitchell (b. 1823; d. 1893)
Isabella = M. G. Ryttenberg
Jefferson M.
Louis Napoleon = Lilian H. Wolff
Mitchell A. C.
Amelia = Carl Mayhoff
Clarkson Potter
Fanny Wolff
Agnes Hendricks
Florence
Alma

J. S. Wo.

LÉVY, GUSTAVE: French engraver; born at Toul June 21, 1819; died at Paris in 1894; a pupil of Geille. He exhibited first at the Salon of 1844, and engraved the portraits of Madrazzo, Rigaud, and a number of others. Special mention may be made of the following engravings by him: "The Family of Concina" (from the Veronese in the

Dresden gallery); Raphael's "Sistine Madonna" and "Diademed Virgin"; Caracci's "Madonna of Silence"; Couture's "Damocles"; and Rembrandt's "Good Shepherd." Still more popular are his engravings of the King of the Belgians (from Winterhalter's portrait), Béranger, the poet Ventura de la Vega, and the engraver Wille. The plate of Lévy's last engraving, "The Fair Gardener," was framed on his tombstone in the cemetery of Montmartre.

S. J. Ka.

LEVY, HAYMAN: Colonial merchant of New York; born in 1721; died in New York in 1789. He engaged in business at an early age, and is mentioned as the owner of a privateer and as engaged in the fur trade in 1760 (see "New York Mercury," Aug. 17, 1761). In 1765 the signature "Hayman Levy, Junior," was appended to the Non-Importation Resolutions drawn up by merchants in Philadelphia, but it can not be said with certainty that it was the signature of the Hayman Levy treated here. In 1770 Levy signed in New York resolutions of a similar but more stringent character. In 1768 he failed in business, but soon recovered his losses. The occupation of New York by the British caused him to remove to Philadelphia. On July 20, 1776, he is mentioned in the Journal of the Continental Congress. Hayman Levy was one of the founders of the Congregation Mickvé Israel, organized in 1782, and served on the first board of trustees. In 1784 he returned to New York and aided in the reestablishment of the congregation in that city. He was one of the most widely known merchants of New York, and was probably the first employer of John Jacob Astor. He had sixteen children, some of whom were prominent citizens of New York.

A. A. S. W. R.

LÉVY, HENRI LÉOPOLD: French painter; born at Nancy Sept. 23, 1840; pupil of the Ecole des Beaux-Arts and of Picot, Cabanel, and Fromentin. His first exhibit was "Hecuba Finding the Body of Her Son Polydorus on the Shore," at the Salon of 1865; at the following Salons he exhibited "Joash Saved from the Massacre of the Grandsons of Athaliah" (1867); "Hebrew Captive Weeping over the Ruins of Jerusalem" (1869); "Herodias" (1872); "Sarpedon"; "The Sermon." For the Church of Saint Merri in Paris he painted mural pieces representing scenes in the life of Saint Denis; these were exhibited at the Exposition of 1878. His "Coronation of Charlemagne" is intended as a mural piece for the Panthéon at Paris. At the International Exposition in 1900 Lévy won a gold medal for his "Eve Plucking the Apple," "Deucalion and Pyrrha," and "Samson and Delilah."

S. J. Ka.

LÉVY, ISAAC: French rabbi; born Jan. 20, 1835, at Marmoutier, in the old department of Bas-Rhin (Alsace). When sixteen years old he entered the rabbinic school of Metz, and was graduated thence at the age of twenty-three, receiving the diploma of a chief rabbi. In Feb., 1858, he was called as rabbi to Verdun (Meuse); in 1865 to Lunéville (Meurthe); and in 1869 to Colmar as chief rabbi of the district of Haut-Rhin.

When Alsace was annexed by Germany, Lévy decided to remain a Frenchman; and the French government created a new chief rabbinate for him at Vesoul (Haute-Saône). Here he officiated for fifteen years, and then (1887) went as chief rabbi to Bordeaux. Lévy is a chevalier of the Legion of Honor and an officer of public instruction. Besides a number of single sermons he has published the following: "Veillées du Vendredi" (2d ed., Paris, 1869); "Récits Bibliques" (2d ed., Paris, 1873); "Défense du Judaïsme" (*ib.* 1867); "Histoire Sainte" (*ib.* 1869 *et seq.*); "Alsatiana" (*ib.* 1873); "Nathan le Sage" (Vesoul, 1881); "Les Récréations Israélites" (2d ed., Paris, 1899); "Développement des 13 Articles de Foi" (*ib.* 1895); "Heures de Recueillement" (*ib.* 1898).

Lévy edited also a supplement, entitled "Le Foyer Israélite" (1862-65), to the periodical for the young, "La Vérité Israélite."

S.

LEVY, JACOB: German rabbi and lexicographer; born May, 1819, at Dabrzyze, Posen; died at Breslau Feb. 27, 1892. Having received his Talmudic education from his father, Isaac Levy, who was district rabbi at Schildberg, and from Akiba Eger, he entered the Matthias Gymnasium at Breslau, after leaving which he studied philosophy and oriental languages at Breslau University, and received his doctor's degree from the University of Halle in 1845.

He accepted a call to Rosenberg, Upper Silesia, where he officiated as rabbi until 1850. Wishing to live in an intellectual center, he moved to Breslau without any prospect of employment. In 1857 he became associate rabbi of the Breslau community; in 1864 he was appointed admonitor to the local court, his duty being to admonish the Jews who had to take the oath "More Judaico"; and in 1878 he was appointed instructor at the Mora-Salomon Leipziger Stiftung, an office which he continued to hold till his death.

Levy published in 1867-68 at Leipsic his "Chaldäisches Wörterbuch über die Targumim" (3d ed., *ib.* 1881), with notes by Prof. H. Fleischer. In recognition of this work the Prussian ministry granted him in 1875 the title of "Königlicher Professor." His chief work, however, is his "Neuhebräisches und Chaldäisches Wörterbuch über die Talmudim und Midraschim" (with notes by Fleischer; 4 vols., *ib.* 1876-89).

Levy was the first to apply modern scientific methods to rabbinic lexicography; and he aided considerably toward rousing Christian scholars to an interest in rabbinical literature. All subsequent work in the field of Talmudic lexicography has been based on Levy's labors (comp. "Z. D. M. G." xlvii. 494 *et seq.*).

S. C. L.

LEVY, JONAS PHILLIPS: American merchant; son of Michael Levy and Rachel Phillips; born in Philadelphia 1807; died in New York 1883. He was granted the freedom of the country by the government of Peru for signal services rendered in the navy of that country. He commanded the U. S. S. "America" during the Mexican war, and was assigned to the transportation of troops to Vera Cruz, at the surrender of which port he was appointed its captain by Gen. Winfield Scott. He left three sons (**Jefferson M.**, **Louis Napoleon**, and **Mitchell A. C.**) and two daughters.

A. S. Wo.

LEVY, JOSEPH HIAM: English economist; born 1838; educated at the City of London School and City of London College. He entered the British Civil Service, was assigned to the Board of Education in 1862, and rose to the position of examiner of school accounts. He was one of the most important members of the National Liberal Club; he founded its Economic Circle, became its chairman, and edited its "Transactions." Levy was lecturer and examiner in economics at the Birkbeck Institute and City of London College. He was editor of "The Individualist" and of "Personal Rights," the organ of the Personal Rights Association, and has written much on economic and social topics. He retired from the Board of Education in 1902.

Bibliography: *Jew. Chron.* Nov. 1, 1901; *American Jewish Year Book*, 1904.

J.

LEVY, JOSEPH LEONARD: American rabbi; born Nov. 24, 1865, in London; educated at Jews' College and University College (B.A.), London, at Bristol University, England, and at Western University of Pennsylvania (D.D.). Levy was rabbi of the Bristol Hebrew Congregation (1885–89) and of Bnai Israel Congregation, Sacramento, Cal. (1889–1893); associate rabbi of the Keneseth Israel Congregation, Philadelphia (1893–1901); and, since 1901, has been rabbi of the Rodeph Shalom congregation, Pittsburg. In 1898 he was elected chaplain of "Keegan's Brigade," with which he served through the Spanish-American war. Levy was the organizer of a number of charitable and religious societies among the Jews of Philadelphia. He is the author of a translation of the tractate Rosh ha-Shanah of the Babylonian Talmud (Philadelphia, 1895). He published also "The Greater Lights" (*ib.* 1895); "Home Service for the Passover" (*ib.* 1896); "The Nineteenth Century" (*ib.* 1901); "A Book of Prayer" (Pittsburg, 1902); "The Jew's Beliefs" (*ib.* 1903); "The Children's Service and Hymnal" (*ib.* 1903); "Text-Book of Religion and Ethics for Jewish Children" (*ib.* 1903); "Sabbath Readings" (*ib.* 1904); and eight volumes of Sunday lectures. Levy is the editor of the "Jewish Criterion," published at Pittsburg.

Bibliography: *American Jewish Year Book*, 1904.

A. I. G. D.

LEVY, JOSEPH MOSES: Founder and proprietor of the London "Daily Telegraph"; born Dec. 15, 1812; died at Ramsgate Oct. 12, 1888. He was educated in London and Germany. After spending the earlier part of his life in commercial pursuits he became the owner of a printing establishment near Fleet street. In this way he became connected with the "Sunday Times," of which he was chief proprietor in 1855. The "Daily Telegraph and Courier" was founded in June, 1855, and by September had come entirely under Levy's management, who reduced its price, making it the first London penny daily paper; and it was through his genius that it became a great power in journalism. When he assumed the proprietorship of the paper its fortunes were at so low an ebb that the purchase-money was only £1,000. Levy worked in the interests of the paper with unflagging zeal, many members of his family also becoming connected with it; and he collected round him a band of able writers, including Sir E. Arnold and G. A. Sala. In politics the paper was Liberal until 1886, when Liberal-Unionist principles were adopted.

Levy left several children. His eldest son, **Edward**, who assumed the name of "Lawson," became chief proprietor of the "Daily Telegraph," and was created a baronet in 1892, and a peer in 1902 with the title of Lord Burnham.

Bibliography: *Daily Telegraph*, Oct. 13, 1888; *Jew. Chron.* Oct. 19, 1888; *Times* (London), Oct. 13, 1888; *Dict. Nat. Biog.*

J. G. L.

LEVY, JUDAH: Tunisian rabbinical author; lived at Tunis and died there in the middle of the nineteenth century; son of Nathan Levy. He was originally from Gibraltar. He published under his own name only one Hebrew work, "Maḥane Lewiyyah." This work consists of four parts; namely: (1) a commentary on the treatise "Hilkot Semaḥot" of Meïr of Rothenburg; (2) a collection of rules on the duties of the "Nezirim"; (3) a treatise entitled "Ma'amar Nezirut Shimshon"; (4) a treatise on questions of Levitical impurities, "Hilkot Ṭum'ah." He published also, in collaboration with David Bonan, two works with the same title, "De Ḥesheb" (Leghorn, 1857), responsa and studies on the treatise Sanhedrin.

Bibliography: Cazès, *Notes Bibliographiques*, pp. 44–50, 237–239.

S. S. M. Fr.

LEVY, JUDITH: English philanthropist; born in London 1706; died there Jan. 20, 1803; a daughter of Moses Hart, founder of the Great Synagogue, London; married Elias Levy, a wealthy financier and government contractor. This lady, who lived to a great age, enjoyed after her husband's death an income of £6,000 a year, and dwelt in great splendor at a house formerly belonging to Heydigger, master of the revels to King George II. She frequented many of the nobility's social gatherings and played half-guinea quadrille with the Countess of Yarmouth, Lady Holdernesse, Lord Stormont, and other persons of rank.

Judith Levy was a generous benefactress to her coreligionists, and in 1790 contributed £4,000 toward the cost of rebuilding the Great Synagogue. The last years of her life were spent in seclusion, now at Bath, sometimes at Richmond, and occasionally in Albermarle street, where she died. She died intestate, leaving a sum of £125,000 at her bankers; and was buried on Jan. 21 in the Jewish cemetery at Mile End.

J. G. L.

LEVY, LOUIS (ASHER BEN MOSES): Poet and cantor of the Berlin synagogue; died Jan. 25, 1853. He wrote "Teḳufat ha-Shanah" (Berlin, 1842), poems on the four seasons, in imitation of Thomson's "Seasons." The preface includes "Na'al Yad," a translation of Schiller's "Handschuh." He wrote also some songs for festivals.

S. M. Sc.

LEVY, LOUIS EDWARD: American photochemist; born at Stenowitz, Bohemia, Oct. 12, 1846. He went to America in early life, and was educated at Detroit; he studied especially mathematics and astronomy at Michigan University in 1866, and optics at Detroit. He was connected with the meteorological observatory of the United States Lake Survey District in 1866, and engaged in researches in microscopic photography during 1869 and 1870. This led to his invention of a method of photochemical engraving, the "Levytype," which was patented in 1875. He established a company in Baltimore, but removed to Philadelphia in 1877, in which year he invented the "Levy line-screen," which was perfected by his brother Max. For this he received the John Scott Legacy medal at the Franklin Institute in 1897. He invented a new process of intaglio engraving, the "photo-mezzotint," in 1889. In 1896 he invented a new method of etching, the "Levy acid blast," for which he received the Elliott Cresson gold medal at the Franklin Institute in 1899. He was awarded a medal and diploma at the World's Columbian Exposition in 1893, and decorations and diplomas from the Imperial Photographic Society of Moscow and at the recent Paris Exposition.

From 1887 to 1890 Levy was publisher and editor of the Philadelphia "Evening Herald," and at the same time of the "Mercury," a Philadelphia Sunday paper. In 1896 he edited and published "Cuba and the Cubans." He is the author of "The Russian Jewish Refugees in America" (1895), an English version of Cabrera's "Cuba y sus Jueces," and "Business, Money, and Credit" (1896), a brochure on the relations of exchange to the medium of exchange. He has contributed to many technical journals, and represented the Franklin Institute at the Scientific Congress of the Paris Exposition. In Jewish matters he is associated with many communal organizations, and he was editor, author, and publisher of "The Jewish Year" (1895) and of other publications.

Bibliography: *Who's Who in America.*

A.

LEVY, LUDWIG: German architect; born March 14, 1852, at Landau. After his return from Italy, where he completed his studies, he was entrusted with the building of the new synagogue in Kaiserslautern. He was the architect also of the church at Olsbrücke near Kaiserslautern, of the synagogues in St. Johann, Strasburg (Alsace), and Kleinwälde near Kaiserslautern.

Levy is at present (1904) professor in the Baugewerkschule at Carlsruhe. S.

LÉVY, MAURICE: French engineer and member of the Institut; born at Ribeauville, Alsace, Feb. 28, 1838. Educated at the Ecole Polytechnique and the Ecole des Ponts et Chaussées, he became an engineer in 1863. During the Franco-German war (1870–71) he was entrusted by the Government of National Defense with the control of a part of the artillery. During the next decade he held several educational positions, becoming professor at the Ecole Centrale in 1875, member of the commission of the geodetic survey of France in 1879, and professor at the Collège de France in 1885.

In 1888 Lévy inaugurated a system of boat-traction by means of overhead cables. A trial system was installed between Joinville-le-Pont and Saint-Maurice; it consisted of an endless cable which was kept in motion by powerful steam-engines and to which boats were attached and thus kept at a speed of four kilometers an hour. The system proved unsatisfactory, however.

Lévy is the author of several works, of which may be mentioned: "La Statistique Graphique et Ses Applications à l'Art des Constructions" (1874; 2d ed. 1887); "Sur le Principe d'Energie" (1888); "Etude des Moyens de Traction des Bateaux: Le Halage Funiculaire" (with M. G. Pavie, 1894). He has written also papers on kinematics, mechanics, physical mathematics, geometry, etc., in the "Comptes-Rendus de l'Académie des Sciences," the "Journal de l'Ecole Polytechnique," and the "Journal des Mathematiques Pures et Appliquées."

He is an officer of the Legion of Honor and of public instruction, and a member of the Academy of Sciences and of the Royal Academy of Sciences of Rome.

Bibliography: Curinier, *Dict. Nat.*

S. V. E.

LEVY, MAX: American inventor; born at Detroit 1857. He invented the etched screen and the machinery for producing it now generally used in the half-tone process of photoengraving. After serving an apprenticeship of three years with an architect, he became chief draftsman in his brother's (Louis E. Levy's) photoengraving establishment at Baltimore during the early struggle to establish and perfect that branch of the graphic arts. He accompanied his brother to Philadelphia, and for a time was in charge of the entire business. After the introduction of the half-tone process he spent over two years of constant and close application devising and perfecting the mechanism of his new invention. Levy is also an inventor in other lines, and is a constant and indefatigable experimenter.

A. D. Ba.

LEVY, MEYER: German jurist; born in Wollstein, province of Posen, Jan. 17, 1833; died in Berlin Oct. 18, 1896. After practising as an assessor in Berlin, he received the appointment of "Rechts-Anwalt" in Fraustadt, where he at once began his literary activity, delivering lectures on legal subjects. Among his writings of this period are to be noted: "Der Staat und die Juden im Norddeutschen Bunde: Ein Mahnruf an das Norddeutsche Parlament," Lissa, 1867, and "Die Zweite Instanz in Bürgerlichen Rechtsstreitigkeiten," Berlin, 1871. In 1872 he returned to Berlin and engaged in practise there, first at the Stadtgericht, then at the Landgericht, finally gaining admission to the Kammergericht. He secured a very large and influential clientage. Levy was president of the Berlin Bar Association. He was killed by a robber.

Of Levy's works other than the above-mentioned may be cited the following: (with G. von Wilmowsky) "Civilprozessordnung und Gerichtsverfassungsgesetz für das Deutsche Reich," Berlin, 1877–1878 (2d ed. 1880; 6th ed. 1892); "Zur Practischen Anwendung der Deutschen Civilprozessordnung," *ib.* 1880; "Handausgabe der Civilprozessordnung," *ib.* 1884 (2d ed. 1889; 3d ed. 1894).

S. M. Co.

LÉVY, MICHEL: French publisher; born at Pfalzburg Dec. 20, 1821; died in Paris May 6, 1875. In 1836 he settled in the latter city, where, together with his brothers Calman and Nathan, he engaged in the publishing business. His firm soon became one of the most important publishing-houses in France and the center of modern belletristic literature. The most noteworthy of its publications are the works of the elder and the younger Dumas, George Sand, Balzac, Alfred de Vigny, Lamartine, and Victor Hugo, and the scientific writings of Guizot, Renan, and Michelet. Lévy published also the collections "La Bibliothèque Dramatique," "Le Théâtre Contemporain," "La Bibliothèque Contemporaine," and "La Collection Michel Lévy."

Of famous foreign authors whose works were published by the Lévy firm may be mentioned: Heine, Thackeray, and Macaulay. After Lévy's death the business was continued by his brother **Calman Lévy** (b. in Pfalzburg Oct. 19, 1819; d. at Paris June 18, 1891), and since the death of the latter it has been conducted by Calman's three sons, Paul, Georges, and Gaston.

LÉVY, MICHEL: French physician; born at Strasburg Sept. 28, 1809; died at Paris March 13, 1872; educated at the University of Montpellier (M.D. 1834). In 1836 he became professor of hygiene at the Val-de-Grâce in Paris; in 1845 he was appointed professor of pathology at Metz; two years later he returned in this capacity to the Val-de-Grâce, of which medical school he became director in 1856. In the Crimean war he had for a few months charge of a hospital in Constantinople. He was the author of "Traité d'Hygiène Publique et Privée," Paris, 1843–45 (5th ed. 1869); "Sur la Rougeole des Adultes," *ib.* 1847; "Histoire de la Méningite Cérébro-Spinale Observée au Val-de-Grâce en 1848 et 1849," *ib.* 1850; "Sur l'Hygiène Militaire," *ib.* 1867; "Sur les Hôpitaux-Baraques," *ib.* 1871.

LEVY, MORITZ ABRAHAM: German Orientalist; born at Altona March 11, 1817; died at Breslau Feb. 22, 1872. Having received a rabbinical education, he became teacher in the Synagogen-Gemeinde of Breslau, where he was active for nearly thirty years. For his scientific labors he received from the King of Prussia, in 1865, the title of professor.

Levy was preeminent in the field of Semitic paleography. He was the first person after Gesenius to treat the subject in a comprehensive manner. In the deciphering and interpretation of Phenician, old Hebrew, Punic, Aramaic, Himyaritic, and later Hebrew coins, seals, gems, and monuments his peculiar intuition guided him more surely than mere philological knowledge did others; such, for example, was the case with his deduction from the inscriptions found on the Hauran that at the beginning of the Christian era an Arabic people lived there which used the Aramaic language and alphabet.

Levy's first published essay, in 1855, was on the inscriptions on certain Aramean bowls ("Z. D. M. G." ix. 465 *et seq.*). This was followed by the first and second parts of his "Phönizische Studien" (Breslau, 1856 and 1857); his decipherment of the Eshmunazar inscription won him immediate recognition. He next published a study in Jewish history, "Don Joseph Nasi, Herzog von Naxos, Seine Familie und Zwei Jüdische Diplomaten Seiner Zeit" (Breslau, 1859). In 1860 and 1861 other essays by him appeared ("Z. D. M. G." xiv. 365 *et seq.*, 594, 710 *et seq.*; xv. 615 *et seq.*, 623 *et seq.*; xvii. 75), dealing with Phenician numismatics. In 1862 was published "Die Gesch. der Jüdischen Münzen Gemeinfasslich Dargestellt" (Breslau). "Eine Lateinisch-Griechisch-Phönizische Inschrift aus Sardinien" appeared in "Z. D. M. G." (xviii. 53 *et seq.*). In 1863 he published the third part of his "Phönizische Studien," and in 1864 his "Phönizisches Wörterbuch" (Breslau). In 1865 Levy edited, at the request of the Deutsche Morgenländische Gesellschaft, the material which Osiander had left bearing on Himyaritic paleography and archeology ("Z. D. M. G." xix. 159 *et seq.*, xx. 205 *et seq.*; an essay on Jewish gravestones in Aden appears in xxi. 156 *et seq.*). His "Systematisch Geordnetes Spruchbuch als Leitfaden für den Jüdischen Religionsunterricht" was published in Breslau in 1867; "Siegel und Gemmen mit Aramäischen, Phönizischen, Althebräischen, Himyarischen, Nabathäischen und Altsyrischen Inschriften Erklärt" appeared in 1869. In 1870 he published the fourth part of his "Studien," and "Die Biblische Gesch. nach den Worten der Heiligen Schrift der Israelitischen Jugend Erzählt," both at Breslau. "Das Mesa Denkmal und Seine Schrift," and various essays in "Z. D. M. G." (xxv. 429 *et seq.*, xxvi. 417), appeared in the following year.

S. F. T. H.

LEVY, MORITZ MARCUS (CARL EDVARD MARIUS): Danish physician; born in Copenhagen Sept. 8, 1808; died there Dec. 30, 1865. He graduated as M.D. from the University of Copenhagen in 1833, having in 1830 won the university gold medal for a medical essay.

From 1833 till 1836 Levy traveled abroad, making a special study of obstetrics, and upon his return to Copenhagen he became resident physician of the Nursery Institute ("Plejestiftelsen").

In 1838 Levy accepted baptism and assumed the name "Carl Edvard Marius," thereby removing an obstacle in the way of his becoming a university professor. In 1840 he was appointed lector, in 1841 assistant professor, and in 1850 professor at Copenhagen University; and at the same time he became obstetrician to the city of Copenhagen.

Levy was a prolific scientific writer. Of his publications the following may be mentioned: "De Sympodia seu Monstrositate Sireniformi, cum Anatomica Ejusmodi Monstri Descriptione," Copenhagen, 1833; "Om Collisionen Imellem Perforation og Kaisersnit. Et Bidrag til Undersögelsen: De Jure Vitæ et Necis quod Competit Medico in Partu," *ib.* 1840; "Udtog af Födselsvidenskaben som Lærebog for Jordemödre," *ib.* 1843. Levy was coeditor of the "Journal for Medicin og Chirurgie," to which he contributed extensively. A number of essays and treatises from his pen have appeared also in the German and the English medical periodicals.

S. F. C.

LEVY, NATHAN: Founder of the first Jewish cemetery in Philadelphia; born in Feb., 1704; died in Philadelphia Dec. 23, 1753. He probably went there from New York, for in 1730 a merchant of his name was a member of the Shearith Israel congregation of the latter city. Upon his arrival in Philadelphia he engaged in the general commission business with David Franks under the firm name of Levy & Franks, and continued in that business until his death. According to a letter of Richard Peters dated Sept. 20, 1738, there was laid out by Mr. Thomas Penn ("proprietary governor of Pennsylvania"), "for a burying-place for Mr. Nathan Levy and family," a plot of ground on Spruce street near Ninth street. Peters was evidently mistaken in the date, for it was on Sept. 25, 1740, that Nathan Levy obtained the first grant of thirty feet square; on June 27, 1752, he secured from the proprietary government the adjoining lot, thirty feet wide and sixty feet in depth. It was evidently the intention of Levy to permit the cemetery to be used by the Jews of his adopted city, and not to retain it for the use of his family alone. He had the ground boarded in. In 1751 he complained to the "Pennsylvania Gazette" that "unthinking persons had fired several shots against the Jews' burying-ground"; he had therefore enclosed it with a brick wall. At his death, two years later, his remains were interred in the cemetery he had founded. It is now the property of the Congregation Mickvé Israel (see PHILADELPHIA).

A. A. S. W. R.

LEVY, SAMSON: Colonial merchant of Philadelphia. He was one of the originators, in 1748, of the City Dancing Assembly, a famous social organization of Philadelphia. In Nov., 1765, he signed, with other merchants of the city, including six Jews, the celebrated resolutions not to import goods from England until the Stamp Act had been repealed. He had two sons, **Moses** and **Samson.** Moses Levy (b. Philadelphia 1757; d. there May 9, 1826) was educated at the University of Pennsylvania, from which he graduated in 1776. On March 19, 1778, he was admitted to the bar; from 1802 to 1822 he was recorder of Philadelphia; from 1822 to 1825, presiding judge of the district court for the city and county of Philadelphia. At one time he was a member of the Pennsylvania legislature, and he was a trustee of the University of Pennsylvania for twenty-four years. Samson Levy (b. Philadelphia 1761; d. there Dec. 15, 1831) studied law with his brother Moses Levy, was admitted to the bar on June 9, 1787, and became one of the best-known lawyers of the city. He was one of the incorporators of the Pennsylvania Academy of the Fine Arts.

A. A. S. W. R.

LEVY, SARA: German philanthropist; born in Berlin June, 1761; died there March 11, 1854. She was a daughter of Daniel ITZIG, and was well educated according to the fashionable French standards of her time. Her husband was Samuel Levy, one of the first bankers of Berlin. During the time following the battle of Jena she was much sought after by Bignon, the French ambassador to Berlin, and the other French officials. She retained her Judaism, though most of her relatives deserted their faith; at her death she left thirty thousand thalers to the Jewish Orphan Asylum of Berlin, and bequeathed her house to King Frederick William IV.

LÉVY, SIMON: French rabbi; born in 1829 at Lauterbourg, Alsace; died at Bordeaux Nov. 29, 1886. He studied first under Solomon ULMANN, and then at the Rabbinical School at Metz, which he left in 1853 to accept the rabbinate of Lunéville. In 1864 he was called as chief rabbi to Bordeaux, where he remained until his death. Besides a pamphlet, "Renan et la Synagogue," Lévy wrote "Moïse, Jésus, Mahomet," which work was published posthumously.

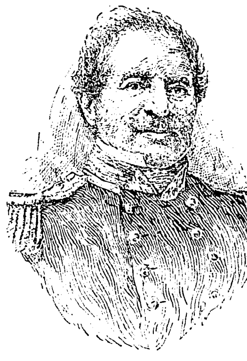
S. I. LEV.

LEVY, URIAH PHILLIPS: American naval officer; born in Philadelphia April 22, 1792; died in New York March 22, 1862. Levy was a cabin-boy before the age of eleven; he was apprenticed as a sailor in 1806; in 1810 he became second mate of a brig, and later first mate of another. He purchased a one-third interest in the schooner "George Washington," of which he was master until 1812. On Oct. 23, 1812, he received a commission as sailing-master in the United States navy, serving on the ship "Alert," and later on the brig "Argus," bound for France. The "Argus" captured several prizes, and Levy was placed in command of one, but

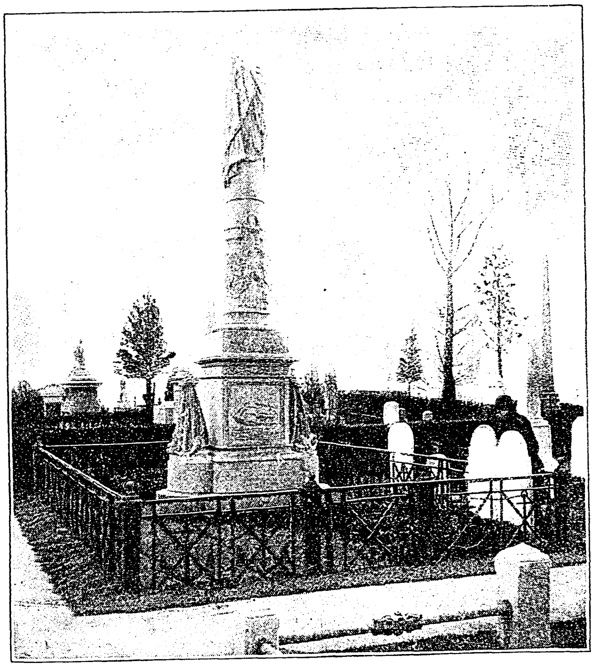


Uriah Phillips Levy

the prize was recaptured by the English, and Levy and the crew were kept as prisoners in England for sixteen months. In 1816 he was assigned as sailing-master to the "Franklin," 74 guns, and in March, 1817, he was appointed lieutenant, his appointment being confirmed by the Senate.

Levy had many difficulties in the navy, possibly due to anti-Jewish prejudice. He fought a duel, killed his opponent, was court-martialed six times, and finally dropped from the list as captain, to which rank he had been promoted. He defended his conduct before a court of inquiry in 1855, was restored to the navy as captain, and subsequently rose to the rank of commodore.

Levy always acknowledged his Jewish allegiance. He was a great admirer of Thomas Jefferson; he purchased Monticello, the home of Jefferson (still owned by Levy's descendants), and presented to the United States government a statue of Jefferson, which is now in the Capitol at Washington. The freedom of the city of New York was voted to him by the common council on Feb. 6, 1834, as a testimonial to his character, patriotism, and public spirit. He is buried in that portion of Cypress Hills Cemetery in use by the Congregation Shearith Israel, and on his tombstone is recorded that "he was the father of the law for the abolition of the barbarous practise of corporal punishment in the United States navy."



Tombstone of Uriah Phillips Levy, Cypress Hills Cemetery, New York.

LÉVY-BACRAT, ABRAHAM: Rabbinical author of the beginning of the sixteenth century. Expelled from Spain in 1492, he settled at Tunis, where in 1507 he wrote "Sefer ha-Zikkaron," a supercommentary on Rashi. The manuscript remained unprinted till 1845, when it was discovered in a Jewish library in Tunis. The work has several prefaces, one of which, written by the author himself, recounts his sufferings at the time of the expulsion from Spain.

S. S. M. Fr.

LÉVY-BRUHL, LUCIEN: French philosopher; born at Paris April 10, 1857; educated at the Lycée Charlemagne and the Ecole Normale Supérieure. In 1879 he received the degree of "agrégé en philosophie," and was at once called to a professorship in philosophy at the Lycée of Poitiers, which he resigned two years later for a professorship at Amiens. In 1884 he received the degree of Ph.D., and the year following was appointed professor of philosophy at the Lycée Louis-le-Grand, succeeding Burdeau. For several years he held the same chair at the Séminaire Israélite de France, which he resigned in 1895 to become "maître de conférences" at the Ecole Normale Supérieure. In 1899 he was appointed to a similar position at the University of Paris, where, in 1902, he became "chargé de cours" of the history of modern philosophy. Since 1886 Lévy-Bruhl has lectured, at the Ecole Libre des Sciences Politiques, on the history of political movements and on the development of public spirit in Germany and England during the last two centuries.

Lévy-Bruhl has written: "L'Idée de Responsabilité" and "Quid de Deo Seneca Senscrit" (Paris, 1884; his two graduating theses); "L'Allemagne Depuis Leibnitz" (*ib.* 1890); "Essai sur la Formation de la Conscience Nationale en Allemagne" (*ib.* 1890); "La Philosophie de Jacobi" (*ib.* 1894); "History of Modern Philosophy in France" (Chicago, 1899); "Lettres Inédites de John Stuart Mill à Auguste Comte" (Paris, 1899; containing the answers of Comte); "La Philosophie d'Auguste Comte" (*ib.* 1900); "La Morale et la Science des Mœurs" (*ib.* 1903). Lévy-Bruhl is a chevalier of the Legion of Honor.

S. J. Ka.

LEVYSOHN, SALOMON FREDERIK: Danish musician and critic; born in Copenhagen Oct. 14, 1858. He studied at the University of Copenhagen and at the Polytechniske Institut until 1878, when he decided to devote himself to the study of music. From 1884 to 1896 he was conductor of the Academical Song-Society (Studenter-Sangforeningen); in 1891 he was appointed keeper of the archives of music at the Kongelige Theater in Copenhagen.

Levysohn has translated into Danish the texts of several operas, including "Don Juan" and "Othello." He has written also a number of critical essays in "Morgenbladet" and in other Danish dailies.

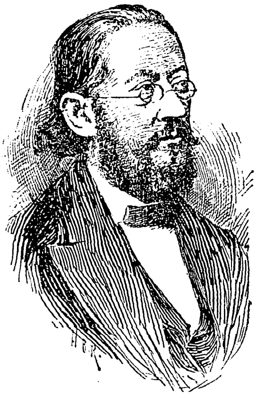
S. F. C.

LEWALD, FANNY: German authoress; born May 24, 1811, in Königsberg, Prussia; died Aug. 5, 1889, in Dresden. In her seventeenth year she entered the Evangelical Church. In 1831, in company with her father, she made a tour through Germany and France, prolonging her stay in Breslau and Berlin. In 1834, to while away the hours of an invalid sister, she wrote a book of fairy-stories. It was not, however, until 1841 that she entered the literary arena with a novel entitled "Der Stellvertreter," published in serial form in the "Europa," a paper owned by a relative likewise named Lewald. Subsequently were published anonymously: "Klementine," 1842; "Jenny," 1843; "Eine Lebensfrage," 1845; "Das Arme Mädchen," 1845. In the spring of 1845 she made a tour of Italy, after which she settled in Berlin, where she married (1854) Adolph Stahr, the literary critic. In company with her husband she undertook a series of tours through Europe, her mind storing a wealth of impressions which were later to be called into requisition. Her literary productiveness during the years following upon this extended tour knew no bounds. One book followed another in quick succession, astonishing the reading public by their variety of subject and fertility of resource: "Italienisches Bilderbuch," 1847; "Diogena Roman von Iduna Gräfin H.-H.," giving a humorous portraiture of the Countess Hahn-Hahn; "Prinz Louis Ferdinand," 1849; "Erinnerungen aus dem Jahre 1848"; "Liebesbriefe," 1850, previously published 1845; "Dunen- und Berggeschichten," 1850; "Reisetagbuch Durch England und Schottland," 1852; "Das Mädchen von Hela," 1853; "Meine Lebensgeschichte," 1861; "Von Geschlecht zu Geschlecht," a novel in eight volumes, 1863–65; "Osterbriefe für die Frauen," 1863; "Erzählungen," in three volumes, 1866–68; "Villa Riunione," 1868; "Sommer und Winter am Genfer See," a diary, 1869; "Für und Wider die Frauen," letters, 1870; "Nella," Christmas story, 1870; "Die Erlöserin," a novel, 1873; "Benedikt," 1874; "Benvenuto," a novel from the world of art, 1875; "Reisebriefe aus Italien, Deutschland, und Frankreich," 1880; "Helmar," a novel, 1880; "Vater und Sohn," a novel, 1881; "Vom Sund zum Posilipp," letters of travel, 1883; "Stella," a novel, 1884; "Die Familie Darner," a novel, 1887; "Zwölf Bilder nach dem Leben," 1888; etc. These are only a few of the productions of this versatile writer. In all more than fifty volumes can be accredited to a pen never idle. Fanny Lewald is remarkable for her keen observation of men and manners, for the firmness with which her characters are outlined, for the grace and finish of her style; a harsh realism, however, pervades her works. This tendency to realism prompts her to seek an ideal in the dispassionate man of affairs, who according to her standpoint may be relied upon to solve the problem of human existence. As a rule, this view precludes the possibility of frequent excursions into the world of the imagination, and except in rare cases is apt to stamp the work of the writer as devoid of that poetic charm so essential to the highest literary achievement. Her activity was not confined to literature. She was one of Germany's foremost leaders in the movement for the emancipation and advancement of women, favoring the opening to them of new fields of employment. S.

LEWANDOWSKI, LOUIS: German composer of synagogal music; born at Wreschen, province of Posen, April 23, 1823; died Feb. 4, 1894, at Berlin. At the age of twelve he went to Berlin to study pianoforte and singing, and became solo soprano in the synagogue. He afterward studied for three years under A. B. Marx and also attended the school of composition of the Berlin Academy, where his teachers were Rungenhagen, Bach, and Grell. Graduated with high honors, he was appointed in 1840 choirmaster of the Berlin synagogue, in which capacity he rendered invaluable services in behalf of ritualistic music. His principal works are: "Kol Rinnah u-Tefillah," for chorus; "Todah u-Zimrah," for mixed chorus, solo, and organ; 40 psalms, for solo, chorus, and organ; symphonies, overtures, cantatas, and songs.



Louis Lewandowski.

In 1866 he received the title of "royal musical director," and shortly afterward was appointed choirmaster in the Neue Synagoge, Berlin, for which he composed the entire musical service. His arrangements of ancient Hebrew melodies for choir, cantor, and organ are considered masterly productions, and are characterized by great simplicity and a profound religious sentiment. Many of Lewandowski's pupils have become prominent cantors. Lewandowski was the principal founder of the Institute for Aged and Indigent Musicians, an institution which prospered under his management.

S. J. So.

LEWENTAL, FRANCIS DE SALES (SOLOMON): Polish publisher; born at Wloclawek, Russian Poland, 1839; died at Wiesbaden Sept. 24, 1902. In 1862 Lewental, the son of poor Jewish parents, bought with his accumulated savings the press of the Warsaw publisher John Glücksberg (d. 1859), and began his career with the "Kalendarz Ludowy," a popular almanac, which he continued until 1866. In 1865, in conjunction with others, he founded "Klosy," an illustrated weekly, which in the next year became his exclusive property. Under Lewental's management and under the editorship of Adam Plug "Klosy" became the most widely circulated illustrated weekly in Poland, and contributed in no small measure to the popularizing of Polish art and to the development of Polish wood-engraving. In 1871 Lewental bought the "Kolko Domowe," a home magazine, and transformed it into the popular "Tygodnik Romansow i Powiesci" (discontinued in 1900). Lewental was the proprietor also of the "Swit," edited for a few years by Mary Konopnicka. In 1871, also, he issued an edition of the works of Korzeniowski, which proved so popular that it led later to similar editions of the works of Kraszewski, Kremer, Rzewuski, Skarbek, Fredro, Syrokomla, Eliza Orzeszko, Kaczkowski, Balucki, etc.

In 1874 Lewental commenced the publication of the best productions of European literature under the title "Biblioteka Najcelniejszych Utworow Literatury Europejskiej." They were edited with the greatest care by Peter Chmielowski and, after him, by Stanislaus Krzeminski. The "John Matejko Album" and many other well-known works were issued from his press. In 1887 Lewental became one of the proprietors of the "Kuryer Warszawski." Though he avoided politics he did not succeed in escaping a conflict with the Russian government; he was arrested in 1900, was compelled to discontinue all his publications, and was sentenced to deportation for three years to Odessa. After a year there he obtained a passport for foreign travel. Lewental enjoyed the friendship of many literati, among them being J. I. Kraszewski, for whose release from imprisonment at Magdeburg he offered to furnish the bail required by the Prussian government.

H. R. W. Pe.

LEWI, JOSEPH: American physician; born at Radnitz, Bohemia, Aug. 17, 1820; died at Albany, N. Y., Dec. 19, 1897; educated at the universities of Prague and Vienna. After graduating from the latter university (M.D. 1846) he was appointed assistant at the Vienna Lying-in Hospital. In 1847 he began to practise in Radnitz, but in the following year, that of the Revolution, emigrated to America, settling in Albany in 1849. There he was appointed on the staff of the Albany hospital, and became a member and later president of the Albany County Medical Society, and senior censor of the State Medical Society. Lewi was one of the forty-two citizens of Albany who organized, in 1863, the Union League in that city.

Thirteen of Lewi's fourteen children survived him. The oldest son is the journalist **Isidor Lewi** (b. Albany May 9, 1850). He was educated at the Albany Academy, became connected with several newspapers, and is at present (1904) an editorial writer on the "New York Tribune" and publisher of the "New Era Illustrated Magazine." Another son, **Maurice J. Lewi** (b. Albany Dec. 1, 1857), is a physician in New York city. He graduated from the Albany Medical College in 1877. After a postgraduate course in Heidelberg and Vienna he began to practise in his native town (1880). He became lecturer at the Albany Medical College and professor of medical jurisprudence at the Albany Law School. In 1891 he was appointed secretary of the state board of medical examiners, which office he still (1904) occupies. In 1892 he removed to New York city.

A. F. T. H.

LEWIN, ADOLF: German rabbi and author; born at Pinne, Posen, Sept. 23, 1843. Lewin was educated at the Jewish Theological Seminary and at the University of Breslau. In 1872 he was appointed rabbi in Kozmin, later in Coblenz, and in 1886 was called to the rabbinate of Freiburg-im-Breisgau. He wrote: "Die Religionsdisputation R. Jehiels," a prize essay (Breslau, 1869); "Die Makkabäische Erhebung," a dissertation (*ib.* 1870); "Zur Judenfrage: Naturwissenschaft oder Judenhass" (*ib.* 1880); "Juden in Freiburg-im-Breisgau" (Treves, 1890); "Das Judenthum und die Nichtjuden" (*ib.* 1891); "Geschichte, Geographie, und Reiselitteratur der Juden" (in Winter and Wünsche, "Die Jüdische Litteratur," ii. 287–473).

S. M. K.

LEWIN, GEORG RICHARD: German dermatologist; born at Sondershausen April 25, 1820; died at Berlin Nov. 1, 1896. He was educated at the universities of Halle and Berlin, graduating as doctor of medicine in 1845. After a postgraduate course at the universities of Vienna, Würzburg, and Paris he settled in Berlin, where he practised as a specialist first in otology, and later in dermatology and syphilis. In 1862 Lewin was admitted to the medical faculty of his alma mater as privat-docent in otology. In 1865 he became chief physician in the department of dermatology and syphilis at the Charité Hospital, and in 1868 was appointed assistant professor.

In 1880 Lewin became a member of the imperial department of health, and in 1884 received the title of "Geheimer Medicinalrat." In the same year, through the influence of Bismarck, Lewin's clinic was divided into two departments, Lewin retaining the class in syphilis, while Schweninger, Bismarck's physician, was appointed chief physician for dermatology. This action of the government aroused much indignation in the medical faculties of most of the universities of Germany, and much public sympathy was expressed for Lewin.

Lewin was very successful in his profession. He introduced several new methods in the treatment of syphilis and in dermatology, among which may be mentioned the subcutaneous injection of mercuric chlorid and the spray application in diseases of the throat.

He was an industrious writer, and contributed many essays to the medical journals. He was also the author of the following works: "Klinik der Krankheiten des Kehlkopfes," 2d ed., Berlin, 1863; "Inhalationstherapie und Krankheiten der Respirationsorgane," 2d ed., *ib.* 1865; "Behandlung der Syphilis Durch Subcutane Sublimatinjectionen," *ib.* 1869.

Bibliography: Pagel, *Biog. Lex.*; *Meyers Konversations-Lexikon.*

S. F. T. H.

LEWIN, LOUIS: German pharmacologist and toxicologist; born at Tuchel, West Prussia, Nov. 9, 1850. He received his education at the gymnasium and the University of Berlin (M.D. 1876). The two years following his graduation he spent at Munich, in the laboratories of Voit and Pettenkofer. Returning to Berlin, he in 1878 became assistant at the pharmacological institute of the university, which position he resigned in 1881. In the same year he was admitted to the medical faculty at the university as privat-docent, and in 1897 he was appointed professor.

Lewin is a prolific writer. Among his many essays may be mentioned:

"Ueber Morphium-Intoxication," in "Deutsche Zeitschrift für Praktische Medizin," 1874, No. 26; "Experimentelle Untersuchungen über die Wirkungen des Aconitin auf das Herz," in "Centralblatt für die Medizinische Wissenschaft," 1875, No. 25; "Ueber die Verwerthung des Alkohols in Fieberhaften Krankheiten," in "Deutsches Archiv für Klinische Medizin," 1876; "Ueber Maximale Dosen der Arzneimittel," in "Transactions of the International Medical Congress," ninth session, Washington, 1887; "Ueber Allgemeine Hautvergiftung Durch Petroleum," in Virchow's "Archiv," cxii., 1888; "Ueber Anhalonium Lewinii und Andere Cacteen," in "Archiv für Experimentelle Pathologie und Pharmakologie," 1894; "Die Behandlung der Lepra," in "Deutsche Medizinische Wochenschrift," 1898; "Die Untersuchungen von Blutflecken," *ib.* 1899; "Die Vergiftungen in Betrieben," *ib.* 1890 (also translated by Pannier in "Bulletin Général de Thérapeutique," 1902); "Ueber die Behandlung der Lepra," *ib.* 1900.

Lewin is also the author of: "Die Nebenwirkungen der Arzneimittellehre," Berlin, 1881, 2d ed. 1893 (translated into Russian); "Lehrbuch der Toxicologie," Vienna, 1885, 2d ed. 1897 (translated into French by Pouchet, Paris, 1902); "Ueber Piper Methysticum (Kawa Kawa)," Berlin, 1886; "Ueber Areca Catechu, Chavica Detle, und das Betelkauen," Stuttgart, 1889.

S. F. T. H.

LEWIN, WILLIAM C. J. See TERRIS, WILLIAM.

LEWINSKY, ABRAHAM: German rabbi; born March 1, 1866, at Loslau, Upper Silesia. He studied at the University of Breslau from 1884 to 1887 (Ph.D.), pursuing at the same time his rabbinical studies at the Jewish Theological Seminary. In 1890 he was called as district rabbi to Weilburg-on-the-Lahn; and two years later he took charge of the district rabbinate of Hildesheim, which position he still (1904) occupies.

Lewinsky has published: "Beiträge zur Kenntniss der Religionsphilosophischen Anschauungen des Flavius Josephus"; "Der Hildesheimer Rabbiner Samuel Hameln" (in "Kaufmann Gedenkbuch" and printed separately); and "Aus dem Hildesheimer Stadtarchive." S.

LEWINSOHN, JOSHUA: Russian teacher and writer; born 1833 at Vyeshiuti, government of Kovno. He received his Talmudical education at Zhagory, in the house of his uncle Simon Hurvitz, and graduated in 1865 from the gymnasium at Mitau, remaining there until 1874, when he was appointed inspector of the Jewish school at Tukum, Courland. His first articles in Hebrew appeared in "Ha-Maggid" in 1857; and since then he has contributed extensively to that paper and to "Ha-Meliẓ," "Ha-Shaḥar," and other Hebrew periodicals. He was also for many years a contributor to the German "Rigasche Zeitung."

Lewinsohn has published: "Ereẓ Russia u-Melo'ah" (Wilna, 1868), a geography and topography of Russia; "Toledot Anshe Shem be-Yisrael," biographies of about fifty Jewish authors; and "Toledot Seḥar ha-Yehudim" (in "Ha-Shaḥar"), a history of Jewish commerce. He has likewise written numerous articles on Jewish history which have appeared in various periodicals.

BIBLIOGRAPHY: Sokolov, *Sefer Zikkaron*, p. 64.

H. R. J. G. L.

LEWINSTEIN, JOSEPH: Russian rabbi and author; born at Lublin, Russian Poland, 1840. He is a member of a family of rabbis and Talmudists which includes the author of the "Lebushim" and of "Pene Yehoshua'." At the age of twenty he became rabbi of Karol, in the government of Plotzk; in 1868, rabbi of Zaklikov, in the government of Lublin; since 1875 he has been rabbi of Serotzk, government of Lomza.

Lewinstein has written "Birkat Abraham," on Pesaḥim, Beẓah, and Ḥagigah; "Pene Abraham," commentary on Genesis; a commentary on the Haggadah of Passover; "Dor Dor we-Dorshaw," a collection of 6,600 names of the great of Israel of all generations, with the dates of their deaths. He has contributed biographical articles, which are of special genealogical value and which have won him recognition as an authority in this field, to "Ha-Goren" (ed. Horodetzky), to "Ha-Eshkol," and to other periodicals. He has written also appendixes to "'Ir Gibborim" and "'Ir Tehillah."

H. R. A. S. W.

LEWIS, DAVID: English merchant and philanthropist; born in London 1823; died in Liverpool Dec. 4, 1885. Settling in Liverpool in 1840, he by 1856 had accumulated sufficient capital to commence business on his own account as a boys' clothier in Bold street. Subsequently he opened a second establishment; and thereafter he gradually developed one of the largest retail businesses of the kind in England, erecting an establishment of the "Universal Provider" or department store class. Similar ones were founded by him in Manchester, Sheffield, and Birmingham. No firm in the provinces did more than his to bring cheap and durable clothing within the reach of the masses.

Lewis' ample means were freely given in aid of charitable and philanthropic works. He headed the local subscription list for the persecuted Jews of Russia with a donation of £1,000 ($5,000), and gave large sums in support of the synagogue. For many years he held the position of warden and treasurer of the Old Hebrew Congregation, Liverpool. At his death he bequeathed very large sums (nearly a half-million sterling) for the erection of hospitals and other philanthropic institutions, which constitute some of the most important in Liverpool.

J. G. L.

LEWIS, SIR GEORGE HENRY: English lawyer; born in London April 21, 1833; educated at University College, London. In 1850 he was articled to his father, **James Graham Lewis** (1804–1869), founder of Lewis & Lewis, one of the best-known firms of solicitors in the city of London. George was admitted in Hilary term in 1856, and was subsequently taken into partnership by his father and uncle. He first made his name in prosecuting the directors of the Overend and Gurney Bank, who had caused the disastrous panic of 1866, and for a time he devoted special attention to financial cases. In criminal cases he drew public attention to himself by his cross-examination in the Bravo case in 1875, and from that time onward was connected with most criminal "causes célèbres," being conspicuous in the prosecution of fraudulent persons like Madame Rachel and Slade the medium. Among other cases may be mentioned the Hatton Garden diamond robbery case; Belt versus Lawes; and the Baccarat case, in which the Prince of Wales's name was mentioned; and he was selected by the Parnell commission to conduct the case for Charles Stuart Parnell and the Irish party against the London "Times." Lewis has by far the largest practise in financial cases of any lawyer in London, and is especially expert in libel cases, being retained by some of the chief newspapers. He has shown himself especially skilful in exposing the practises of usurious money-lenders. Lewis was knighted in 1893, and raised to the rank of baronet in 1902.

J.

LEWIS, HARRY S.: English author and communal worker; born in London in 1861; educated at King's College School and St. John's College, Cambridge (B.A. 1884). At Cambridge he was one of the earliest to take honors in the Semitic languages tripos (1886) and was Hebrew scholar at his college. After leaving college he took residence at Toynbee Hall, Whitechapel, and devoted himself to social work among the Jews of the East End. In connection with this he published, with E. J. Russel, "The Jew in London" (London, 1900). He edited "The Targum on Isaiah i. 5, with Commentary" (*ib.* 1889).

Bibliography: *Jewish Year Book*, 5664 (1904).

J.

LEWIS, LEOPOLD DAVIS: English dramatist; born in London 1828; died there Feb. 23, 1890. Lewis was educated at the King's Collegiate School, London, and upon graduation became a solicitor, practising as such from 1850 to 1875. In 1871 he translated Erckmann-Chatrian's "Le Juif Polonais," giving it the name "The Bells," under which name it was produced by Henry Irving at the Lyceum Theatre, London, Nov. 25, 1871. Original plays from the pen of Lewis are: "The Wandering Jew" (Adelphi Theatre, April 14, 1873); "Give a Dog a Bad Name" (*ib.* Nov. 18, 1873); and "The Foundlings" (Sadler's Wells Theatre, Oct. 8, 1881). From February to December of 1868 he and Alfred Thompson conducted a monthly, "The Mask," which failed. In addition to the plays mentioned Lewis wrote a number of tales under the title "A Peal of Merry Bells" (1880).

LEWIS, SAMUEL: English money-lender and philanthropist; born in Birmingham 1837; died in London Jan. 13, 1901. Lewis began work when thirteen years old. He became a salesman of steel pens, then opened a jeweler's shop, and finally entered the business with which his name was most identified, that of money-lending. He became the most fashionable money-lender of his day. Nearly every noble family in Great Britain is said to have been more or less in business connection with Lewis. He left nearly twenty million dollars, of which five millions are to go to charity on the death of his widow, Ada Davis Lewis, a sister of Hope Temple, the composer.

J. E. Ms.

LEWIS, SAMUEL A.: American politician and philanthropist; born in New York city 1831. He early engaged in business, and was so successful that he retired with a competency in 1862. In 1868 he was elected a member of the board of education of the city of New York, serving as school commissioner and chairman of the financial committee. When in 1869 the legislature changed the board from elective to appointive, Lewis was confirmed in his office of school commissioner, and in 1870 was reappointed for a term of five years. In 1871, however, he was compelled to retire. One of his first acts as a school commissioner was to abolish corporal punishment. In 1874 Lewis was elected alderman at large, and later in the same year president of the aldermanic board, holding the presidency for two consecutive terms.

Lewis is one of the founders of the Mount Sinai Hospital, and has served, since its organization in 1852, on its board of management as secretary, director, and vice-president, resigning the last-named office in 1873. He founded (1872) the School-Teachers' Life Assurance Society, and was in 1874 chairman of the relief association for the Ninth Ward. In 1851 the Ladies' Benevolent Society presented him with a gold medal in acknowledgment of the valuable aid he had rendered that body. From 1868 to 1873 Lewis acted as a trustee of the College of the City of New York.

A. F. C.

LEWISOHN, LEONARD: American merchant and philanthropist; born in Hamburg Oct. 10, 1847; died in London March 5, 1902. His father, **Samuel Lewisohn**, a prominent Hamburg merchant, sent him to the United States in 1863; about three years later he was joined by his younger brother, and they formed the firm of Lewisohn Brothers in Jan., 1866. As early as 1868 the firm turned its attention to the metal trade, becoming prominent dealers in lead during that year. Recognizing the commercial future of electricity and the need of copper for conducting-wires, Lewisohn specialized in that metal, and by 1879 was recognized as an important holder of "Lake Copper." Thenceforward his firm occupied a leading position in the copper markets of the world. He was also president of the United Metals Selling Company.

Lewisohn was equally prominent in the sphere of philanthropy. He contributed largely to the Alliance colony in New Jersey, founded in 1882, and to almost every philanthropic institution in New York, regardless of creed. He likewise acted as treasurer of the Hebrew Sheltering Guardian Society in New York, to which institution he gave his counsel and large sums of money. He was one of the largest contributors to the Jewish Theological Seminary of America and to the Montefiore Sanatorium for Consumptives.

A. J.

LEWITA, GUSTAW: Polish pianist; born at Plock, Poland, 1855; died at Paris Feb., 1889. After graduating from the Vienna Conservatorium with distinction, he went to Paris, where he became a member of the orchestra of the Pas de Loup concerts. In 1882 Lewita was called to a professorship in the Conservatorium at Warsaw, and in 1885 was invited to Vienna to give a concert at the court of the archduke Charles. He then went to America, where he gave concerts in the most important cities and before the Emperor of Brazil.

H. R. A. S. W.

LEWY, BERGNART (BERNHARD) CARL: Danish chemist; born in Copenhagen July 5, 1817; died there Jan. 1, 1863. He obtained the degree of graduate of pharmacy in 1835, and then studied chemistry for three years at the polytechnic school. In 1839 he studied in Berlin (Ph.D.), and spent the winter of 1839–40 in Rome. He then obtained a position as assistant in the private laboratory of J. B. Dumas in Paris.

Lewy soon proved himself to be the possessor of great experimental ability; so that the Académie des Sciences in 1841 entrusted him with the task of studying the atmospheric conditions around the North and Baltic seas, as well as in Copenhagen. Later he made a comparative test of the atmospheric conditions in Paris and in the surrounding country.

In 1847 Lewy was appointed professor of chemistry at Bogota, New Granada, where he enjoyed great popularity and filled many honorary offices. He was decorated by the King of Denmark, and in 1859 was awarded the gold medal of honor. His writings have appeared in "Annales de Chimie et de Physique," "Comptes Rendus" of the French Institute (Académie des Sciences), and in "Forhandlinger ved de Skandinaviske Naturforskeres 4. Möde" (1844).

Bibliography: C. F. Bricka, *Dansk Biografisk Lexicon*.

S. F. C.

LEWY, ISRAEL: German scholar; born at Inowrazlaw in 1847; educated at the Jewish Theological Seminary and the University in Breslau. In 1874 he was appointed docent at the Lehranstalt für die Wissenschaft des Judenthums in Berlin, and in 1883, on the death of David Joël, he was called to the seminary at Breslau. Lewy's knowledge of Talmudic literature is unusually wide; he is endowed also with an exceptionally acute and dispassionate critical spirit and with a faculty for grasping the proper importance of details. His first publication was "Ueber Einige Fragmente aus der Mischna des Abba Saul" (Berlin, 1876), in which he showed that the Mishnah collections of the foremost teachers in the period before the final redaction of the Mishnah itself, including that of Abba Saul, agreed as regards all the essential points of the Halakah. "Ein Wort über die Mechilta des R. Simon" (Breslau, 1889) is likewise an authoritative work in the field of halakic exegesis. Lewy has published also "Interpretation des Ersten, Zweiten und Dritten Abschnitts des Palästinischen Talmud-Traktates Nesikin" (*ib.* 1895–1902), and "Ein Vortrag über das Ritual des Pesach-Abends" (*ib.* 1904).

S.

LEWYSOHN, ABRAHAM: Hebraist and rabbi of Peiskretscham, Upper Silesia; born Dec. 6, 1805; died Feb. 14, 1860. He left a large number of manuscripts—several hundred sermons in Hebrew and German, novellæ on the Talmud, verses, a German work on Hebrew grammar, and a work entitled "Ḳorot Tannaim wa-Amoraim," a history of the Tannaim and Amoraim, the introduction to which, entitled "Parnasat Ḥakme ha-Talmud," was published in Kobak's "Jeschurun" (i., part 3, p. 81). His published works are: "Meḳore Minhagim" (Berlin, 1846), a critical essay on religious customs according to the Talmud, Poseḳim, and Midrashim (this work was afterward plagiarized by Finkelstein, Vienna, 1851); "Shete Derashot" (Gleiwitz, 1856), sermons; "Toledot R. Yehoshua' ben Ḥananyah," biography of R. Joshua b. Hananiah (in Keller's "Bikkurim," 1865); "Toledot Rab," biography of Rab or Abba Arika (Kobak's "Jeschurun," vi. and vii.). Lewysohn was also a contributor to "Ha-Maggid" and to Klein's "Jahrbuch."

Bibliography: Ludwig Lewysohn, in *Ha-Maggid*, vii. 364; Zeitlin, *Bibl. Post-Mendels.* pp. 208-209.

S. M. Sel.

LEWYSOHN, LUDWIG: German rabbi; born April 15, 1819, at Schwersenz, Posen; died at Stockholm May 26, 1901. Graduating from the Realgymnasium, Berlin, in 1843, he studied Orientalia in that city, and received his doctor's degree from the University of Halle in 1847, his dissertation being "De Sacrificiis Veteris Testamenti." In 1848 he became preacher at Frankfort-on-the-Oder. Three years later he was called as rabbi to Worms, where he officiated until 1858. He then accepted a call to Stockholm, where he labored from 1859 to 1893, in which year he resigned. Besides numerous contributions to Jewish periodicals (especially "Ha-Maggid"), he published "Nafshot Ẓaddiḳim" (Frankfort-on-the-Main, 1855), on the epitaphs at Worms, and "Zoologie des Talmuds" (*ib.* 1858).

LIBAU: Russian city in the government of Courland. It has a population (1897) of 64,505, including 9,700 Jews. Among the latter are 3,225 artisans (1,309 being masters) and 117 day-laborers. Among its educational institutions are a government school for Jews (105 pupils), a Jewish general school for girls (90 pupils), and a Talmud Torah (108 pupils). The public schools have 333 Jewish children on their rolls. A Jewish loan and savings association was organized in 1901.

LIBOSCHÜTZ, JACOB: Russian physician; born in 1741; died at Wilna Feb. 10, 1827. After studying at the University of Halle he went to St. Petersburg. His religious belief, however, rendered it impossible for him to settle there, and he established himself at Wilna, where he became celebrated. When the famous physician Professor Frank was leaving Wilna and was asked in whose charge he had left the public health, he answered, "In the charge of God and the Jew" ("Deus et Judeus," meaning "God and Liboschütz"). Liboschütz was celebrated also as a diplomat and philanthropist (Fuenn, "Ḳiryah Ne'emanah," p. 260, Wilna, 1860).

H. R. A. S. W.

LIBOSCHÜTZ, OSIP YAKOVLEVICH: Russian physician; died at St. Petersburg in 1824; probably the son of Jacob Liboschütz. He studied medicine at Dorpat (M.D. 1806, his graduating thesis being "De Morbis Primi Paris Nervorum"). He then settled at St. Petersburg, where he became court physician, and founded a hospital for sick children. Liboschütz wrote: "Tableau Botanique des Genres de Plantes Observés en Russie" (Vienna, 1811); "Description de Mousses Qui Croissent aux Environs de St. Pétersbourg et de Moscou" (St. Petersburg, 1811; with Trinius); "Flore des Environs de St. Pétersbourg et de Moscou" (*ib.* 1811).

Bibliography: *Entziklopedicheski Slovar*, xvii. 642, St. Petersburg, 1895.

H. R. A. S. W.

LIBOWITZ, NEHEMIAH SAMUEL: Russian Hebrew scholar and author; born Jan. 3, 1862, at Kolno, government of Lomza (Lomzha). He studied Talmud under R. Elijah Ḥasid and then under his own father, Isaac Libowitz; in addition he devoted himself to Hebrew literature, reading especially works on criticism. In 1881 he emigrated to the United States and settled in New York, where he still (1904) resides, devoting his time in part to business and in part to literature.

Libowitz is the author of: "Iggeret Biḳḳoret" (New York, 1895), against I. H. Weiss; "Rabbi Yehudah Aryeh Modena" (Vienna, 1896; 2d ed., New York, 1901), his most important work, a collection of materials for a biography of Leon of Modena; "Ephraim Deinard" (*ib.* 1901), a harsh criticism of Deinard; and several other pamphlets. Libowitz has also contributed to the Hebrew periodicals in the United States: "Ner Ma'arabi," "Ha-Modia' la-Ḥadashim," and "Yalḳuṭ Ma'arabi."

Bibliography: Benzion Eisenstadt, *Ḥakme Yisrael be-Ameriḳa*, p. 62, New York, 1903.

H. R. A. S. W.

LIBRARIES: Very little is known concerning the methods employed by Jews in the collection and preservation of books. The Biblical writings are silent on this point. That there were royal archives in Jerusalem may be surmised with some show of reason, even though the terms "mazkir" (A. V. "recorder"; II Sam. viii. 16, xx. 24, and several other passages) and "sofer" (A. V. "scribe"; *ib.* viii. 17, and often elsewhere) do not necessarily point to the office of archivist. Nor does the place-name Kirjath-sepher (Josh. xv. 16; Judges i. 11–12), which the Septuagint translates Πόλις Γραμμάτων (Vulgate, "Civitas Litterarum" = "Book Town"), afford any further evidence; though Quatremère in 1842 deduced from it the existence of a library there, and Sayce in 1895 called it "the literary center of the Canaanites in the south of Palestine" ("Patriarchal Palestine," p. 220; "Higher Criticism and the Monuments," p. 54).

Preservation of Books.

Nor is there any fuller information with regard to Talmudic times and the Middle Ages. The scrolls seem to have been kept in a cover or sheath of leather or of metal (תיק; θήκη; see passages in Krauss, "Lehnwörter," ii. 588), a custom which was observed in Eastern countries for many centuries. Sambari (*c.* 1672) speaks of the scroll in the synagogue of Al-Maḥallah in a metal תיק (Neubauer, "M. J. C." i. 119, 10), which still exists. The old and much-venerated Samaritan Pentateuch at Nablus is likewise in a metal cover. The scrolls were kept in a case (תיבה), of which there were three kinds, שידה, תיבה, and מגדל. In the catacombs of Rome there have been found representations of Jesus with a case of scrolls at his feet. The cases were usually made of wood, though sometimes of leather, glass, bone, or metal. It has been shown that such cases were the usual form of the Roman bookcase. That they were used by the Jews also is seen from the fact that the earliest representations of the Ark upon glass, dating from the third century, are in this form (see Blau, "Studien zum Althebräischen Buchwesen," pp. 176 *et seq.*; Jacobs, in "J. Q. R." xiv. 738). Sometimes the scrolls were placed in a sort of cupboard, which stood upon a pediment and had a cover. Openings were made at the top and at the side. See Ark of the Law.

Catalogues.

That catalogues of collections of Hebrew books were drawn up in early days is evidenced by the recent finds made chiefly in the Fostat Genizah. Such catalogues were sometimes sale-lists of book-traders—*e.g.*, the Adler manuscript in Arabic ("R. E. J." xxxix. 199); the Adler manuscript containing a sale-list of a certain 'Abd al-'Aziz of the thirteenth century (*ib.* xl. 56, 264); the list found on the back of the manuscript copy of Saadia's "Amanat" in Arabic (*ib.* xxxii. 126); the Adler manuscript of the twelfth century giving a list in Arabic of over 100 books ("J. Q. R." xiii. 52, 324; JEW. ENCYC. iii. 619a, *s.v.* CATALOGUES); and the Frankfort manuscript, also from the genizah ("J. Q. R." xv. 76; for other lists see "Zeit. für Hebr. Bibl." vii. 181)—and sometimes catalogues of real collectors, such as the genizah fragment containing a list of the books of Nathan b. Jeshuah (*ib.* vii. 184; "J. Q. R." xiv. 247) or the catalogue of the library of Leon Mosconi ("R. E. J." xxxix. 242, xl. 62; see also CATALOGUES).

Alcove in the Library of Parma Containing the De Rossi Collection of Jewish Books.

(From a photograph.)

That care was taken in the preservation of books is seen from the advice which is given by various writers. The author of the "Sefer Ḥasidim" (13th cent.) advises his readers to pay particular attention to the manner in which their books are kept. Especial weight is laid upon the duty of lending books to those whose means do not allow them to purchase them. Books were scarce in those days; the want of them is bewailed by such men as Isserlein and J. Kolon (Güdemann, "Gesch." ii. 191, iii. 65). Judah ibn Tibbon (12th cent.) gives much sage counsel to his son, to whom he left his collection of Arabic and Hebrew books. He bids him make his books his companions, and to take good care of his book-chests (ארגז) and bookcases (תיבה) and his garden.

> "Take good care of thy books; cover thy shelves with a fine covering; guard them against damp and mice. Examine thy Hebrew books on the first of every month; thy Arabic ones once every two months; thy pamphlet-cases [כרכים קשורים] once every three months. Arrange them all in good order, so that thou weary not in looking for a book when thou needest it. . . . Write down the titles of the books in each row [בית] of the cases [ארגזים] in a separate fascicle [אגרת], and place each in its row, in order that thou mayest be able to see exactly in which row any particular book is without mixing up the others.
>
> "Do the same with the cases. Take good care of the individual leaves [עלים] which are in the convolutes [כרכים] and fascicles; . . . look continually into the catalogue [מזכרת] in order to remember what books thou hast. . . . When thou lendest a book record its title before it leaves the house; and when it is brought back draw thy pen through the memorandum. Restore all loaned books on Pesaḥ and Sukkot" ("Ermahnungsschreiben des Jehudah ibn Tibbon," ed. Steinschneider, pp. 6, 12, Berlin, 1852; transl. in Güdemann, *l.c.* i. 28).

This care in the binding and handling of books is inculcated by Profiat Duran (of Catalonia, 14th cent.) also, as is seen in the preface to his "Ma'aseh Efod" (ed. Friedländer and Kohn, p. 19), and by Solomon Alami (1415): "Take good care of the writing and the arranging of thy books" ("Iggeret Musar," ed. 1854, p. 14).

In earliest times the libraries were directly connected with the batte midrashot, each of such institutions having a collection of its own. This practise continued down through the Middle Ages. At times books of especial value were kept in the synagogue in a sort of cupboard, a custom which prevailed especially in Egypt. The contents of these school libraries must have varied in different countries. In the western French and German schools of the Middle Ages they probably contained little more than what was necessary for the almost exclusively Talmudic curriculum that was followed; but in Italy and Spain, where the curriculum embraced also philosophy, mathematics, and the natural sciences, the libraries must have been more varied and much larger.

The tradition thus begun has been kept up. Such libraries of distinctively Jewish books are now attached to seminaries and to theological schools and serve as Jewish university libraries. The chief collections may here be mentioned:

Austria: Library of the Israelitisch-Theologische Lehranstalt, Vienna; Hungary: library of the Landesrabbinerschule, Budapest (20,000 vols., of which 10,000 are Judaica; 41 incunabula; 50 MSS.).

England: Library of Jews' College (in all 25,000 vols., made up of the original Jews' College collection 4,000; the A. L. Green Library 7,000; the Montefiore Library 4,000; the A. Löwy Library 10,000; in addition 600 MSS., mainly from the Zunz and Halberstam collections), and that of the bet ha-midrash, London (the Herschel MSS.).

France: Library of the Séminaire Israélite, Paris.

Germany: Libraries of the Lehranstalt für die Wissenschaft des Judenthums and the Rabbinische Seminar in Berlin; of the Jüdisch-Theologische Seminar (about 23,000 printed vols.; 248 MSS.) in Breslau.

Holland: Libraries of the Portuguese Rabbinical Seminary; of the Bet ha-Midrash 'Ez Ḥayyim (20,000 vols.; 1,000 pamphlets; 300 portraits); of the Netherlands Israelitish Seminary.

Italy: Library of the Rabbinical Seminary, Florence.

United States: Library of the Hebrew Union College (about 15,000 vols.), Cincinnati, and that of the Jewish Theological Seminary of America, New York (14,500 vols.; 750 MSS.).

In the course of time these libraries have not proved sufficient. They served, in the main, theological purposes. An attempt at establishing a national Jewish library was made in the Abarbanel Library at Jerusalem, founded by Joseph Chazanowicz and now containing more than 20,000 vols. Next to this may be mentioned that of the Alliance Israélite Universelle in Paris, largely founded by Isidor Loeb and supported by donations and legacies from L. L. Rothschild (22,000 vols.; 200 MSS.; made up largely of the collections of Isidore Loeb and Bernard Lazare); the Bibliothek des Deutsch-Israelitischen Gemeindebundes (recently founded; 5,000 vols.) in Berlin; and the library of the B'nai B'rith in New York (Maimonides' Library; but this is not a solely Jewish collection).

Communal Libraries.

The Italian Jewish communities seem to have been the first to establish libraries for their own use; *e.g.*, Mantua (in 1767; 4,500 vols.) and Pitilione in Tuscany. In England the North London bet ha-midrash has its private collection; the Vienna community possesses a children's library; and Warsaw has its Synagogenbibliothek. Of late years the communal libraries have grown, especially in Germany. Breslau has its Bibliothek der Synagogengemeinde; Dettmold, its Lehrerbibliothek and Schülerbibliothek; Gleiwitz, its Jugendbibliothek; Homburg, its Israelitische Gemeindebibliothek Mendelssohn; Carlsruhe, its Jüdische Bibliothek der Israelitischen Genossenschaft; Kozmin, its Jüdische Gemeindebibliothek; Mayence, its Klingensteinische Bibliothek für Hessische Lehrer; Neckar-Bischofsheim, its Israelitische Gemeindebibliothek; Nuremberg, its Bibliothek und Leseverein; Ratibor, its Israelitische Bibliothek; Schwerin, its Gemeindebibliothek; Stettin, its Jüdische Bibliothek; Stuttgart, its Gemeindebibliothek; Parel, its Schul- und Gemeindebibliothek; and Wiesbaden, its Gemeindebibliothek.

Few of the seminary libraries mentioned above can, however, rival the great collections gathered in the large national and public libraries. These antedate the seminary libraries; and, having been the first in the field, and commanding larger pecuniary resources, have been able to progress much further. The leading public collections are here cited. In many cases they are dealt with in separate articles in this encyclopedia or are referred to in the articles treating of the cities in which the collections are located.

Austria: Hofbibliothek, Vienna.

England: British Museum, London (15,000 vols.; 1,400 MSS.); Bodleian Library, Oxford (2,900 MSS.); Cambridge University Library.

France: Bibliothèque Nationale, Paris (1,390 MSS.).

Germany: Königliche Bibliothek, Berlin (5,000 vols.; 300 MSS.); Königliche Bibliothek, Munich (2,000 MSS.); Stadtbibliothek and Universitätsbibliothek, Leipsic; Stadtbibliothek, Frankfort-on-the-Main: Stadtbibliothek, Strasburg.

Holland: Academy of Sciences, Leyden (15,000 vols.); Bibliotheca Rosenthaliana in University Library, Amsterdam.

Italy: Vatican Library, Rome; Bibliotheca Casanatensis, Rome; Public Library, Parma; Bibliotheca Palatina and Bibliotheca Medicio-Laurentiana, Florence; Public Library, Turin; Bibliotheca Marciana, Venice; and Bibliotheca Ambrosiana, Milan. In addition there are smaller collections in the Biblioteca Vittorio Emanuele and the Biblioteca Angelica, Rome, and in the University Library, Bologna.

Russia: Friedland Library, in the Asiatic Museum of the Imperial Academy of Sciences, St. Petersburg (10,000 vols.; 300 MSS.); the University Library and the Synodal Library in the same city; the collection of Karaitica belonging to the Odessa Society for History and Antiquities.

United States: The Jewish collection in the New York Public Library (Schiff foundation; about 17,000 vols.), and that in the Library of Columbia University (gift of Temple Emanu-El; 5,000 vols.).

Most of the foregoing collections are based upon the private libraries of Jewish book-collectors, which have either been given to or bought for the institutions. Thus the British Museum in 1759 acquired by gift from Solomon da Costa a collection which had originally been gathered during the Commonwealth, had fallen to Charles II. at the Restoration, and had finally been purchased by the bookseller who sold it to Da Costa. The British Museum secured also (1848) the printed books in the library of H. I. Michael of Hamburg, which had consisted of 7,000 volumes, including manuscripts. The latter came into the possession of the Bodleian Library, which had previously (1829) been enriched through the purchase of the famous Oppenheimer collection. This consisted of 7,000 printed volumes and 1,000 manuscripts, nearly all Hebraica; it had been founded by the court Jew Samuel Oppenheimer of Vienna with the aid of his patron, Prince Eugene, and had passed into the possession of Samuel's son David, then into that of Hirschel Oppenheimer, and finally into that of Isaac Cohen of Hamburg. Similarly many other private collections have been acquired by various public libraries; *e.g.*, Michael Joseph's went (1849) to Jews' College, London, and Halberstam's to the Judith Montefiore College and later to Jews' College. The manuscripts of Joseph Almanzi went to the British Museum; his printed books, to Temple Emanu-El, New York, and finally to Columbia University in that city. Raphael Emanuel Mendola's books formed the basis of the Congregational Library at Mantua (1767); while the collection of L. Rosenthal of Hanover was presented by his son to Amsterdam University Library. A. Geiger's library enriched the Lehranstalt in Berlin, as did Saraval's and Beer's the sister institution in Breslau, and David Kaufmann's large collection, that in Budapest. The collection of A. Berliner, containing many liturgical works, is now the property of the Frankfort Stadtbibliothek. The library of David Montezinos in Amsterdam, especially rich in Judæo-Spanish productions and in incunabula, is in the Portuguese Seminary of that city, while the pride of Parma is the collection made by the Christian scholar G. B. de Rossi. Samuel Adler's library was given to the Hebrew Union College, Cincinnati, and the collection of M. Sulzberger, so rich in incunabula, to the Jewish Theological Seminary of America, where it has been added to the David Cassel and Halberstam libraries already in that institution. See Book-Collectors.

Library Classification.

There is no information in regard to the classification of Hebrew books in olden times. In the above-mentioned genizah fragment of a catalogue, published in "J. Q. R." xiii. 52 *et seq.*, the books are classified as follows: Bible, Mishnah, Talmud, Theology, Halakah, and Liturgy. Some such general division as this must have sufficed. The first to attempt a classification upon a scientific basis was Shabbethai Bass (1641–1718) in the introduction to his "Sifte Yeshenim." Though this was undertaken for bibliographic rather than for library purposes, it deserves a place here. He divides Hebrew literature into two great categories, Biblical and Post-Biblical; and each of these into ten subdivisions as follows:

Biblical Literature: (1) The Bible.

(2) Works Explanatory of the Wording of Scripture:—Bible Lexicography; Dictionaries; Grammars; Explanations of the Text of the Targumim and of the Zohar; Commentaries on the whole Bible; Commentaries on portions of the Bible; Targumim; Cabalistic Commentaries on the Torah and on the Books of Ruth and Lamentations; Works on the Zohar; Lexicography of the Zohar, Recanati, and Baḥya; Philosophical Works Bearing on the Torah, the Megillot, Psalms, and Job; Grammar of the Torah; Supercommentaries on Ibn Ezra; Supercommentaries on Mizraḥi; Commentaries on Midrash Rabbot; Supercommentaries on Rashi to the Torah; Commentaries ("peshaṭ") and Homiletic Explanations ("derashot") arranged according to the sections of the Torah; Commentaries on the Megillot as a whole, and upon each Separate Scroll; Commentaries on the Hafṭarot; Commentaries and Homiletic Explanations on the Prophets and Hagiographa as a Whole and upon the Individual Books; Homilies.

(3) Books of Prayer and Song for the Synagogue Service (Liturgy); Other Poetry; Commentaries on the Liturgy; Commentaries on the Passover Haggadah; Books Dealing with the Writing of Pentateuchs and Mezuzot; of Legal Documents and Bills of Divorce.

(4) Letter-Writing and Rhetoric; Biography and History; Geography; Proverbs and Maxims.

(5) Kawwanot in Connection with the Liturgy and Religious Ordinances; Cabalistic Works Not Arranged According to the Sections of the Pentateuch.

(6) Grammatical Works Not Dealing Directly with the Torah; Masorah; Logic.

(7) Works on Salvation, Redemption, and the Resurrection; Books on the Future Life and the Soul.

(8) Works on Variant Readings, Corrections, and Mistakes in the Bible; Similar Works Dealing with Post-Biblical Literature.

(9) Ethics, Piety, and Religion.

(10) Introductions and Reference Works on the Bible.

Post-Biblical Literature:

(1) Mishnah.

(2) Commentaries on the Mishnah; Explanations and Novellæ to the Gemara, Rashi, and the Tosafot; Commentaries on "'En Ya'aḳob," Other Haggadot, and the Yerushalmi; Commentaries on Pirḳe Abot.

(3) Mathematics (Arithmetic, Algebra, Geometry, etc.); the Calendar; Astronomy and Astrology; Works on Philosophy, Not Arranged According to the Sections of the Pentateuch; Works on Chiromancy, etc. (שרטוטי היד והפרצוף); Works on Casting of Lots and Horoscopes; Works on Evil Spirits and Necromancy; Dreams and their Interpretation; Music; Works on the Other Sciences.

(4) Theology and the Thirteen Dogmas; Religious Discussions and Polemics.

(5) Minhagim (Rituals); Introductions and Works of Reference Regarding Minhagim and the Gemara.

(6) Responsa on Ritual Matters; Responsa on Philosophical Matters.

(7) Medicine (Human and Animal); Lapidaries (כגולות מאבנים טובים).

(8) Works on Initial Letters ("Rashe Tebot"), Gemaṭria, and Noṭariḳon.

(9) Commentaries and Novellæ According Either to the Arrangement of the Gemara or of Alfasi; Commentaries According to the Arrangement of the Arba' Ṭurim, Shulḥan 'Aruk, and "Lebushim"; Commentaries According to the Arrangement of the Mishneh Torah of Maimonides; Decisions and Explanations According to the (Sifre) Miẓwot; Decisions and Laws According to Various Arrangements; Decisions and Laws According to Various Halakot in the Different Portions of the Ṭurim.

(10) Talmudic Methodology; Works on the Building of the Tabernacle, on the Temple, and on its Vessels; Works Printed in the German Language (Judæo-German); Pedagogy.

In modern general libraries the books on Jewish subjects are not always shelved apart from the main collection, special sections for Jewish subjects being provided for merely in the various general sections. As a type of classification that adopted by the Bodleian Library may be cited.

BODLEIAN LIBRARY, OXFORD.

Classification of Books on Jewish Subjects.

[The system of spelling in this list is that adopted by the library authorities.]

Shemitic Mythology and Folk-Tales.

Comparative Religion—Shemitic—General and Miscellaneous.

Judaism: Ancient History; Modern History; Ritual; Talmud; Liturgies and Prayers; Devotional Poems and Hymns; Sermons; General or Mixed Treatises; Encyclopædias; History, Biography, and Methodology of the Subject (Including Jewish Study of the Bible); Targums.

Missions to Jews.

Jewish Attacks on Christianity.

Christian Replies to Them.

Voyages and Travels: Syria and Palestine—Ancient and Mediæval—General and Miscellaneous; Jerusalem; Modern—General and Miscellaneous; Jerusalem.

Ethnography: "Anglo-Israel"; Shemitic.

Climatology and Topography of Health, Mortality, and Medicine: Syria and Palestine—Ancient and General; Mediæval and Modern; Modern Jewish.

General Descriptions and Statistics of Manners (Including General Antiquities) and Characteristics: Syria and Palestine—Ancient; Mediæval and Modern; Modern Jews Outside Palestine.

Chronology—the Hebrew Calendar.

History—General Mediæval; Crusades.

The Jews—In Palestine and General: History and Biography of the Study; General Materials; General Histories—Ancient Writers (Josephus, etc.); Modern Writers; to the Entry into Canaan; to the Secession of Israel; Kingdom of Judah and Judah ± Israel; Kingdom of Israel; Later Samaritan History; Captivity to the Rise of the Maccabees; Maccabees to A.D. 135; Since.

The Jews in Dispersion: History and Biography of the Study (General and Special); General Materials and Histories; Asia E. of the Indies; Asia W. of the Indies; Africa; Spain (and Spain ± Portugal); Portugal; Italy; France and Belgium; Switzerland; Austria-Hungary; Balkan Peninsula and Greece; Slavonic Countries; Scandinavian Countries; Germany; Holland; United Kingdom; America; Australasia; Works on Their Re-Migration to Palestine.

Writing and Illumination: Moabite; Old Israelite; Samaritan; Aramean and Palmyrene, etc., and Rabbinical Hebrew.

Bibliography: Bibliographies of Special Literatures (MSS. as well as printed books)—Hebrew; Bibliographies of Special Subjects—History—the Jews; Catalogues and Histories of Libraries in Syria and Palestine; Law, Jewish.

Miscellaneous Biography: Jews—Ancient; Mediæval and Modern (general and special).

Genealogy and Monuments: Ancient—Jewish.

History, Biography, and Description of General Education: Ancient Jewish; Modern Jewish (general).

Philosophy in General—History, Biography, and Criticism: Kabala.

Philosophy in General—Works: Kabalistic.

Proverbs: Shemitic.

The other great English library, that of the British Museum, has a special classification for its Jewish printed books, elaborated by Zedner; they are divided into fifteen regular sections, with three extra ones dealing with works not considered directly a part of Hebrew literature, as follows:

(1) Bibles; (2) Commentaries on Bible; (3) Talmud; (4) Commentaries on Talmud; (5) Codes of Law; (6) Decisions; (7) Midrash; (8) Cabala; (9) Sermons; (10) Liturgies; (11) Divine Philosophy; (12) Scientific Works; (13) Grammars; Dictionaries; (14) History; Gecgraphy; (15) Poetry; Criticism. In addition: (1) Translations of Post-Biblical Hebrew Works; (2) Works in Arabic, Spanish, German, etc., in Hebrew Characters; (3) Bibliography.

The Vienna Kaiserliche Hofbibliothek has its manuscripts divided into the following categories:

(1) Bible Editions; (2) Masorah; (3) Targumim; (4) Bible Exegesis; (5) Midrash; (6) Talmud; (7) Decisions; (8) Legal Literature; (9) Responsa; (10) Liturgy; (11) Religious Philosophy; (12) Ethics; (13) Cabala; (14) Grammar; (15) Lexicography; (16) Rhetoric; (17) Aristotelian Philosophy; (18) Platonic Philosophy; (19) Ghazali's Philosophy; (20) History of Ḥai ibn Yuḳthan; (21) Medicine; (22) Astronomy; (23) Astrology.

Some of the public libraries have, however, a special division for Hebraica and Judaica. As specimens, the classifications used in the Frankfort Stadtbibliothek and in the Hebrew Union College at Cincinnati may be cited. In the following plan of the first-named library, where the rubrics are quite general, it will be seen that a special rubric is devoted to the history of the Jews of Frankfort.

Frankfort Scheme.

(1) Hebrew and Jewish Journals; (2) Hebrew Philology (General Works; Lexica; Grammars); (3) Hebrew Bibliography and History of Literature: (4) Old Testament in Hebrew; (5) Anonymous Hebrew Works; (6) Hebrew Literature ("Auctores Hebraici Nominati"); (7) Judæo-German Literature; (8) Jewish Synagogal Music; (9) Secular Music of the Jews; (10) Jewish Literature and History in Other Languages than Hebrew; (11) Literature and History of the Frankfort Jews.

The scheme used by the Hebrew Union College contains a special rubric for manuscripts and rare editions (No. xxiv.), and makes provision also for a certain number of non-Jewish books which find their way by gift into the collection. The Roman numerals represent the alcoves into which the collection is divided.

Hebrew Union College.

I. Bibles in Various Languages; Koran; Zendavesta, etc.; II. Exegetics and Biblical History; III. Talmud; IV. Casuistics; V. Responses and Calendars; VI. Commentaries and Critical Works on the Talmud; VII. Religious History; Theology; Religious Philosophy; Ethics, etc.; VIII. Periodicals; IX. Philology; Literature; School-Books; X. Pre-Talmudic Literature; XI. Midrashim; Homiletics; Sermons; Zohar, etc.; XII. Special History; Philosophy of History; Biography; Travels; XIII. Universal, Oriental, Jewish, Grecian, Roman, and French History; XIV. Lexicography; XV. Philosophy; Logic; Political Economy; Education; XVI. Catalogues and Works on Biography; XVII. Law; XVIII. Mathematics; Natural Sciences; Music; XIX. Fiction; XX. Liturgy; Prayer-Books; XXI. Orientalia; XXII. Government and State Reports; XXIII. Reports of Colleges and Schools; Newspaper Almanacs; XXIV. Manuscripts and Rare Editions; XXV. Literature.

A peculiar system of designating the various classes of books is followed by the Landesrabbinerschule in Budapest. The signatures (A, B, Bi, etc.) are taken from the actual word designation of each class, as follows:

(1) A = Agada (or Haggadah); (2) B = Bible; (3) Bi = Bibliography; (4) C = Codices (*i.e.*, of the Talmudic Literature); (5) Chr = Christian Literature; (6) D = "Decisoren" (*i.e.*, Codes); (7) Di = "Diarien" (*i.e.*, Newspapers, Journals, and Collected Works in Non-Hebrew Tongues); (8) DI = "Diarien" (*i.e.*, Newspapers, Journals, and Collected Works in Hebrew); (9) E = Exegesis; (10) G = Grammar of Hebrew and Aramaic Languages; (11) H = Homiletical Literature in Hebrew; (12) HI = Historical Literature in Hebrew; (13) Hi = Historical Literature of the Jews, General and Special; Biographies in non-Hebrew Languages, Arranged According to Special Groups; (14) I = "Isagogik" (*i.e.*, Introductions); (15) L = Liturgy; (16) Lh = Hebrew, Aramaic, and Talmudic Lexicography; (17) Le = General Lexicography; (18) Nov = Talmudic Novellæ; (19) Nh = Neo-Hebraic Literature; (20) O = Orientalia; (21) P = Jewish Religious Philosophy; (22) Pr = "Predigt Literatur" (*i.e.*, Sermons); (23) R = Talmudic Responsa; (24) T = Talmud, Mishnah, and Introductions to the Same.

There is also a special signature, LG, for German and other literature, the books being arranged according to certain groups. Furthermore, the library of Samuel Löw Brill, presented to the seminary by the Jewish community of Pesth in 1897, is kept separate from the other books and is arranged according to the size of the books (duodecimo, quarto, octavo, etc.) and the alphabetical order of the authors' names. This system, which can be seen also in the catalogues of the Berlin Royal Library, is said to have peculiar advantages.

The most complete classification of works in a Jewish collection is, however, the following, made for the New York Public Library by A. S. Freidus, and reproduced by permission of the director, Dr. John S. Billings.

NEW YORK PUBLIC LIBRARY.

THE JEWISH COLLECTION—GENERAL DIVISIONS.

[The system of spelling in this list is that adopted by the library authorities.]

Manuscripts; Book Rarities; Works of Reference; Bibliography; Literary History; General Works; Hebrew Language and Aramaic; Hebrew Bible; Archæology; Pre-Talmudical Literature and Sects; Christianity; Talmudical Literature; Halacha; The Ritual; Homiletical Literature; Ethics; Doctrinal Theology; Post-Talmudical Schisms and Dissensions; Philosophy; Kabbala and Chasidism; Folk-Lore; Belles-Lettres; Dialects and Their Literatures, and Languages; Secular Sciences; Geography, General History, and Biography; Jewish History; The Jewish Race Ethnologically and Sociologically; Jews and Gentiles.

BIBLIOGRAPHY. LITERARY HISTORY.

Periodicals; Paleography (see also Regulations for Scribes); Catalogues of Manuscripts; History of Printing; Catalogues of Booksellers; Catalogues of Private Libraries; Public Libraries; Catalogues of Public Libraries; Bibliographies: Countries, Authors (see also Biography), Subjects; Literary History: Special Subjects, Modern, Judæo-German, Relation of Jewish Literature to Other Literatures.

GENERAL WORKS.

Periodicals in Hebrew; in Judæo-German (see also Judæo-German Literary Periodicals); in German; in English (American); in English (British); in French; in Other Languages; in Russian; Societies' Publications in Hebrew; Societies' Publications in Modern Languages; Collections (Polyglot); Collections in Hebrew (see also Literary Collections); Collected Works of Individual Authors in Hebrew (see also Collected Literary Works); Collections in Judæo-German (see also Judæo-German Literary Collections); Collections in Latin; Collections in German; Collections in English; Collections in Other Languages; Collections in Russian; Other General Works: Cyclopedias (see also Dictionaries of the Bible; Talmudical Works of Reference).

HEBREW LANGUAGE. ARAMAIC.

Biblical: General Works; Elementary Readers; Chrestomathies (see also Elementary O. T. Histories; Catechisms; Manuals of Judaism); Grammars (in Hebrew; see also Grammatical Notes on the Liturgies); Grammars (in Other Languages): Orthography (Including Alphabet, Vowel-Points, Accents) (see also Masora), Parts of Speech, Syntax, Rhetoric and Prosody (see also Poetry of the Hebrew Bible); Dictionaries (see also Concordances); Names; Synonyms; Miscellaneous. *Post-Biblical:* Chrestomathies; Grammar; Dictionaries; Foreign Terms (see also Dialects); Abbreviations. *Modern:* Letter-Writers (see also Legal Forms). *Aramaic* (see also Targums): Chrestomathies; Grammar.

HEBREW BIBLE.

General Works; Criticism; Introductions; Dictionaries; Helps; Poetry (see also Prosody); Prophecy; Whole Hebrew Bibles; Parts; Selections; Concordances; Masora (see also Grammar); Textual Criticism, Various Readings; Targums (see also Aramaic); Other Versions; Exegetics (see also General Works on Homiletics); Collected Commentaries; Rashi; Ibn Ezra; Other Hebrew Commentaries: Commentaries in Modern Languages: Collective Biography; Individual Biography; Old Testament History (only elementary works or such as have chiefly an exegetical interest go here; for works of historical interest see Pentateuchal Traditions; Entire O. T. Period; see also Fiction Relating to Biblical Times).

ARCHÆOLOGY.

(See also Calendar; Education; Geography [Biblical and Talmudical]; Medicine Among the Jews; Palestine; Ten Tribes; Woman.)

Periodicals, Societies, Collections; General Works; Inscriptions (see also Epitaphs); Numismatics; Metrology; Social and Economic Conditions; Slavery; Government (see also Jurisprudence); Sacred Antiquities (see also Ancient Judaism; Mythology; Idolatry of the Ancient Hebrews; Orach Chayim Laws; Prophecy; The Ritual): Festivals, Sacrifices, Priesthood, Temples; Art; Music; Costumes; Other Special Subjects.

PRE-TALMUDICAL LITERATURE AND SECTS.

(See also History—Return from Babylon to Completion of Talmud.)

General Works: Literature (see also Targums); Apocrypha: Ecclesiasticus, Other Books; Pseudepigrapha; Philo Judæus (see also Alexandrian School of Philosophy); Other Hellenistic Literature (see also Josephus). *Sects* (see also Post-Talmudical Schisms and Dissensions; Sabbathai Zebi; Chasidism): Samaritans (see also Samaritan Text of the Bible; Samaritan Targum); Sadducees, Pharisees, Essenes, Therapeutæ.

CHRISTIANITY.

General Works (see also The Messiah). *Historico-Literary Subjects:* Lives of Jesus (Jewish); Lives of Jesus (Christian) (for Jewish Contemporary History see Return from Babylon to the Close of the Talmud); New Testament; New Testament Parts; New Testament and Jewish Literature; The Fathers and Jewish Literature; Synagogue and Church. *Theologico-Controversial Subjects:* Missionary Periodicals; Missionary Societies; Christian Doctrine; Christian Liturgies; Jews in Christian Theology; Restoration of the Jews (see also Restoration of the Jews [in Jewish Theology]; Zionism); Conversion of the Jews; Conversion of the Jews, Works Against; Converted Jews (Missionaries); Converted Jews (Missionaries, Individual); Miscellaneous Missionary Writings; Evidences of Christianity; Christian Polemics (see also Unfavorable Criticism of the Oral Tradition); Jewish Apologetics and Polemics (see also Apologies of the Jews [against Anti-Semites]; Apologies of the Oral Tradition; The Messiah); Judaism and Christianity (see also Jews and Gentiles; Judaism and Other Religions).

TALMUDICAL LITERATURE.

The Oral Tradition: Unfavorable Criticism (see also Anti-Semitic Writings; Gentiles in Jewish Law and Literature; Christian Polemics), Apologies, Introductions, Essays, Methodology, Helps, Works of Reference (see also Dictionaries of Post-Biblical Hebrew; Indexes to the Agada), Collective Biography, Individual Biography, History (see also History; Return from Babylon to the Close of the Talmud); Mishna (see also Aboth): Commentaries; Literature of the Mishna Period; Jerusalem Talmud; Babylonian Talmud: Parts, Minor Treatises, Translations, Selections (see also Agada), Textual Criticism, Commentaries; Pilpul.

HALACHA.

General Works; The 613 Precepts; Codes of Law (to Maimonides); Maimonides; Jacob ben Asher (and other writers before Caro); Joseph Caro; Later Works; Codes of Special Laws: Orach Chayim Laws (see also The Ritual; Sacred Antiquities), Special Laws, Yoreh Deah Laws, Dietary Laws (for modern works see Dietary Laws, *s.v.* Jewish Race, Ethnologically and Sociologically), Purification (see also Codes in Judæo-German), Regulations for Scribes (see also Massecheth Soferim, under Minor Treatises of the Talmud; Paleography), Other Special Laws; Eben ha-Ezer Laws (for modern works see Special Laws): Divorce; Choshen ha-Mishpat Laws (see also Government of the Ancient Hebrews; Non-Jewish Law): Modern Works, Special Laws (see also Slavery), Legal Forms (see also Letter-Writers); Codes in Judæo-German and Judæo-Spanish; Decisions of Several Authors; Decisions of Individual Authors.

THE RITUAL.

(See also Orach Chayim Laws; Sacred Antiquities.)

General Works; Special Customs; Minhagim (see also Superstitions); Synagogue (see also Ecclesiastical Polity; Synagogue and Church); Reading of the Law. *Liturgies:* Works on the Liturgy; Collections of Liturgies; Daily Prayers (see also Christian Liturgies; Karaite Liturgies): Commentaries and Grammatical Notes, Rite of Reformed Jews; Saturday Prayers; Festival Prayers: Hagadah; Fastday Prayers: Lamentations; Benedictions; Occasional Prayers: Prayers for the Sick and the Dead (see also Folk-Medicine); Miscellaneous; Devotionals; Meditations; Private Hymnals; Readings; Synagogue Music.

HOMILETICAL LITERATURE.

(See also Agada.)

General Works (see also Exegetics). *Midrashim:* Collections of Midrashim; Midrash Raboth; Other Midrashim to Biblical Books; Other Midrashim (for Halachic Midrashim see Literature of the Mishna Period; for Kabbalistic Midrashim see Early Kabbalistic Literature); Yalkutim. *Sermons:* Sermons in Hebrew; Judæo-German; German; English; French; Italian; Other Languages; Slavic; Sabbath Sermons; Festival Sermons; Confirmation Sermons; Marriage Sermons; Funeral Sermons; Sermons on Other Occasions; Political and Patriotic.

ETHICS.

Works on Jewish Ethics; Aboth (see also Minor Treatises of the Talmud): Translations, Commentaries; Miscellaneous Writers; Judæo-German Writers; Judæo-Spanish Writers; Non-Jewish Writers; Special Subjects (see also Charity; Gentiles in Jewish Law); Etiquette (see also Massecheth Derech Erez [Minor Treatises of the Talmud]); Poetical Works; Maxims (see also Proverbs); Ethical Wills; Asceticism; Hortatory Theology.

DOCTRINAL THEOLOGY.

General Works; Ancient Judaism (see also Mythology; Idolatry [of the Ancient Hebrews]; Sacred Antiquities); Modern Judaism: Works in Modern Languages (see also Reformed Judaism); Manuals; Catechisms; Special Subjects: Eschatology (see also Sadducees; Pharisees), Restoration of the Jews (see also Palestine; Restoration of the Jews [in Christian Theology]; Zionism), The Messiah (see also Christianity); Judaism and Other Religions (see also Judaism and Christianity; Religions): Proselytism, Proselytes.

POST-TALMUDICAL SCHISMS AND DISSENSIONS.

General Works (see also Pre-Talmudical Sects); Works on the Karaites; Karaite Literature: Liturgies: Minor Sects; Reformed Judaism (see also Assimilation; Modern Jewish History): Works Against Reform, Works for Reform, Special Subjects (see also Rite of Reformed Jews); Dialogues, Irenics.

PHILOSOPHY.

(Works for and against the study of Philosophy go here.)

Terminology; Logic; General Works; Non-Jewish Philosophers; Alexandrian School (see also Philo Judæus); Saadiah; Gabirol; Judah ha-Levi; Maimonides; Other Philosophers; Spinoza; Modern Works; Psychology (for Modern Psychology see Psychology, *s.v.* Secular Sciences); Other Special Subjects.

KABBALA. CHASIDISM.

(Polemics against the Kabbala and works in its defense go here.)

General Works; Collections; Sefer Yezirah; Other Early Literature; Zohar; Later Literature; Miscellaneous (see also Transmigration); Sabbathai Zebi; Eybschuetz-Emden Controversy; Frank. *Chasidism:* Chasidaic Works; Chasidaic Legends.

FOLK-LORE.

General Works (see also Prophecy): Religions (except Judaism and Christianity) (see also Judaism and Other Religions); Mythology, Idolatry (of the Ancient Hebrews); Agada (see also Homiletical Literature): Indexes (see also Talmudical Works of Reference), Selections (see also Selections from the Talmud), Commentaries; Superstitions (see also Minhagim); Transmigration, Magic, Folk-Medicine (see also Prayers for the Sick), Other Special Subjects: Customs (see also Etiquette; Minhagim: Orach Chayim Laws; The Ritual): Games; Legends (see also The Blood Accusation; Chasadaic Legends): Wandering Jew; Tales (see also Fiction); Fables; Proverbs (see also Maxims); Riddles; Other Popular Literature.

BELLES-LETTRES.

(See also Dialects and Their Literatures.)

Hebrew: General works (see also History of Modern Literature); Collections; Selections (see also General Collections); Collected Works of Individual Authors (see also Collected Works of a General Character); Poetry (see also Ethical Poetry; Liturgies; Poetry of the Hebrew Bible; Prosody): Collections, Individual Mediæval Authors, Individual Modern Authors; Drama; Fiction; Humor and Satire; Parody; Miscellany. *Modern Languages:* General Works (see also Anti-Semitic Belles-Lettres; Delineation of the Jew in Literature); Poetry; Drama; Fiction Relating to Biblical Times; Fiction Relating to Modern Times; Humor and Satire; Miscellany.

DIALECTS AND THEIR LITERATURES. LANGUAGES.

(See also Aramaic; Foreign Terms Used in Post-Biblical Hebrew.)

Reserved for Dialects as yet Unrepresented in the Collection; Judæo-French; Judæo-Spanish (see also Codes in Judæo-Spanish); Judæo-German (for Bibliography see Bibliography, Subjects; for Literary History and Criticism see Bibliography and Literary History, Judæo-German): Dictionaries, Literary Periodicals (see also General Judæo-German Periodicals), Literary Collections (see also General Judæo-German Collections), Poetry (Collections), Poetry (Individual Authors), Fables, Drama, Stage, Fiction, Humor and Satire, Parodies, Miscellanies (see also Codes in Judæo-German; Devotionals for Women; Judæo-German Ethical Writers).

LANGUAGES.

Russian; English.

SECULAR SCIENCES.

(Works on the cultivation of the sciences among the Jews go here.)

General Works; Mathematics Among the Jews; Mathematical Works: Arithmetic; Other Mathematical Works; Astronomy (for Astrology see under Folk-Lore: Superstitions, Other Special Subjects); Works on the Calendar; Calendars; Natural Science; Natural History; Medicine Among the Jews; Physicians; Medical Works (see also Folk-Medicine); Hygiene; Psychology (for Metaphysical Psychology see Philosophy: Psychology); Music; Fine Arts; Useful Arts: Cookery, Book-Keeping, Commerce; Sociology and Economics; Socialism; Government; Law. (Other non-Jewish subjects are: Christianity; Games; Geography; History; Jewish Literature and Other Literatures; Judaism and Other Religions; Languages; Logic; Mythology; Philosophy; Religions; Travels; Wandering Jew.)

GEOGRAPHY. GENERAL HISTORY. BIOGRAPHY.

Geography: Biblical and Talmudical Geography; Palestine (see also Archæology; Jews in the Orient; Restoration of the Jews [in Christian Theology]; Restoration of the Jews [in Jewish Theology]; Zionism); Travels. *General History:* Special Countries; America; United States. *Non-Jewish Biography:* Non-Jewish Biography (Individual). *Jewish Biography:* Epitaphs (see also Inscriptions); Genealogy; Biographical Material (see also Bibliographies of Authors; Ethical Wills; Funeral Sermons; Legends; Legends of Chasidim; Names); Collective Biography (see also Converted Jews; O. T. Biography; Physicians; Talmudical Biography; Woman); Collections of Portraits; Individual Portraits; Individual Biography (see also Eybschuetz-Emden Controversy; Frank; Individual Converted Jews; Individual O. T. Biography; Individual Talmudists; Lives of Jesus; Proselytes; Sabbathai Zebi).

JEWISH HISTORY.

Periodicals; Societies; Collections; Historical Miscellanies (see also Archæology; Blood Accusation; Epitaphs; Karaism; Palestine; Travels); Josephus; Chronicles; General Jewish History.

DIVISION BY PERIODS.

Pentateuchal Traditions; Entire O. T. Period (for elementary works see Old Test. History, *s.v.* Hebrew Bible; see also Ancient Judaism; O. T. Biography; Prophecy; Ten Tribes); Return from Babylon to the Close of the Talmud (see also Pre-Talmudical Literature and Sects; Talmudical Biography and History); Middle Ages to the Latter Half of the 18th Century (see also Sabbathai Zebi; Eybschuetz-Emden Controversy); Modern (see also Chasidism; Emancipation: Reformed Judaism; Zionism).

DIVISION BY COUNTRIES.

(See also Bibliographies of Countries; Epitaphs.)

Orient (see also Palestine); Balkan Peninsula; Italy; Spain and Portugal (see also Judæo-Spanish); France (see also Judæo-French); Great Britain; Minor European Countries: Germany; Austria-Hungary; Poland; Russia; America; United States and Canada; Other Countries.

THE JEWISH RACE ETHNOLOGICALLY AND SOCIOLOGICALLY.

General Works; Anthropology; Ethnology (see also Assimilation); Ten Tribes (see also History of the O. T. Period); Circumcision (for the Halacha of this subject see Other Special Laws, *s.v.* Halacha; for the Liturgies see under Occasional Prayers); Dietary Laws (for the Halacha of this subject see under Halacha); Woman (see also Codes in Judæo-German; Devotionals for Women; Eben ha-Ezer Laws; Purification); Statistics; Occupations; Trades; Commerce; Agriculture (see also Social and Economic Conditions of the Ancient Hebrews); Trade Unions (see also Socialism); Mutual Aid Associations; Communal Organization (see also Synagogue); Charity; Crime; Education (see also Hebrew Readers; Letter-Writers; Post-Biblical Hebrew Readers; Elementary O. T. Histories; Elementary Works on Judaism): Educational Institutions (see also Libraries).

JEWS AND GENTILES.

(Works of this class relating to the Jews of a particular country go with the history of the Jews in that country, an exception being made in the 7th [Blood Accusation] and last two sections in this division, which take *all* works relating to those subjects.)

General Works; Delineation of the Jew in Literature and Art (see also Belles-Lettres; Jews in Christian Theology; Wandering Jew); Works on Anti-Semitism; Anti-Semitic Writings (see also Unfavorable Criticism of the Oral Tradition); Anti-Semitic Belles-Lettres; Gentiles in Jewish Law and Literature; The Blood Accusation; Apologetic Writings (see also Apologetics of Judaism Against Christianity; Apologies of the Oral Tradition); The Jewish Question: Various Solutions, Toleration, Emancipation (see also Modern Jewish History), Assimilation and Mixed Marriages (see also Ethnology; Reformed Judaism), Zionism (see also Jews in the Orient; Palestine; Restoration of the Jews [in Christian Theology]; Restoration of the Jews [in Jewish Theology]).

G.

LIBYA: District in the north of Africa. The name "Libya" was often used by the ancients, sometimes to designate the whole of northern Africa (with the exception of Egypt), sometimes to denote a single province west of Egypt. According to Josephus ("Ant." i. 6, § 2), Libya was founded by Phut (comp. Gen. x. 6), and the eponymous hero Libys was a son of Mesraios, *i.e.*, of Egypt. Another old tradition says that Eofres (*i.e.*, Epher; Gen. xxv. 4) conquered Libya and that the land was called "Africa" after him (Josephus, *l.c.* i. 15; comp. Eusebius, "Præparatio Evangelica," ix. 20, § 2; "Chronicon Paschale," i. 66; Suidas, *s.v.* Ἄφροι; "Yuḥasin," ed. London, p. 233).

The Biblical data are more historical. Shishak (Shoshank), whose name is claimed to be Libyan, had Libyans in his army (A. V. "Lubims," II Chron. xii. 3); King Asa defeated a whole army of Cushites and Libyans (*ib.* xvi. 8; comp. xiv. 11); and the celebrated Egyptian Thebes also had Libyans in its pay (Nahum iii. 9). In all these passages the Septuagint has Λίβυες. In Dan. xi. 43, Egyptians, Libyans, and Cushites appear together.

In the Greco-Roman period Libya coincided approximately with Cyrene and the territory belonging to it. Jews lived there ("Ant." xvi. 6, § 1); and Augustus granted them certain privileges through Flavius, the governor of the province (*ib.* § 5). The Christian apostles also prepared themselves to extend their mission into Libya (Acts ii. 10). The great Jewish war of the year 70 had its aftermath in Libya; and the rebellious Jonathan was denounced to the governor of the Libyan Pentapolis (Josephus, "B. J." vii. 11, § 1). The Jews of Libya also took part in the rebellion under Trajan and Hadrian (see CYRENE).

Modern investigation is inclined to connect Lehabim (Gen. x. 13; I Chron. i. 11) with the Libyans, as did the Jerusalem Targum in rendering it by the Greek Λιβυκοί. Many proselytes came from Libya (Yer. Shab. 7b; Yer. Kil. 31c); hence Judaism must have carried on its propaganda there. The Rabbis mention beans (Löw, "Aramäische Pflanzennamen," p. 234) and asses from Libya (Bek. 5b; Shab. 51b).

The once flourishing province corresponds to the present Barka, which, under Islamic dominion, has become a desert.

G. S. KR.

LICHTENBERG, CORNEL: Hungarian aurist; born in 1848 at Szegedin; studied at Budapest and Vienna (M.D. 1873). On receiving his degree he returned to Budapest, where he established himself at the university as docent in diseases of the ear (1883). The same year he was one of the founders of the polyclinic, of which institution he was appointed director in 1891. In recognition of his services he was decorated in 1895 with the "Ritter-Kreuz" of the Order of Francis Joseph.

Lichtenberg is the author of: "Az Ideges Süketség" (Budapest, 1879), on nervous deafness; "Ueber Subjective Gehörsempfindungen" (*ib.* 1882); and "Ein Fremdkörper im Ohre mit Cerebralen Erscheinungen" (*ib.* 1883).

BIBLIOGRAPHY: *Pallas Lex.*; Szinnyei, *Magyar Irók Elete.*

S. L. V.

LICHTENBERG, LEOPOLD: Violinist; born at San Francisco, Cal., Nov. 22, 1861. He studied under Beaujardin, and made his first appearance in concert when eight years of age. At twelve he became a pupil of Wieniawski, whom he accompanied on a tour through the United States. Some time afterward he spent six months in Paris under Lambert, and then rejoined Wieniawski at Brussels, where he studied unremittingly for three years. After winning the prize at the national "concours" held at Brussels, he made a successful tour through Holland. Upon his return to America he played with Theodor Thomas' orchestra in New York, and gave a number of recitals in other cities. After spending three years more in Europe Lichtenberg gave another series of concerts in America, after which he settled for some time in Boston, Mass., as a member of the Symphony Society. He next went to New York city to take charge of the department of violin at the National Conservatory. His fine technique and beautiful tone entitle him to high rank among violinists.

A. J. So.

LICHTENFELD, GABRIEL JUDAH: Polish mathematician and author; born at Lublin 1811; died at Warsaw March 22, 1887. He was a descendant of Moses Isserles, and, true to the family tradition, showed early ability as a Talmudic scholar. He later became familiar with Latin, German, French, and Polish, and made a special study of philosophy and mathematics.

In the Hebrew periodical "Ha-Shaḥar," vol. iii. *et seq.*, there appeared a series of Hebrew articles by Lichtenfeld which attracted attention. His reputation was enhanced by his series of articles, in the Polish periodical "Izraelita," on Jewish mathematicians. Lichtenfeld is known also by his polemics with Slonimski on mathematical subjects.

Lichtenfeld was the author of: "Yedi'ot ha-Shi'urim" (Warsaw, 1865); "Ẓofnat Pa'neaḥ" (*ib.* 1874), a critical review of S. Slonimski's "Yesode Ḥokmat ha-Shi'ur"; "Tosefot" (*ib.* 1875), polemic against S. Slonimski; "Kohen Lelo Elohim" (*ib.* 1876), mathematical criticisms; "Sippurim be-Shir," etc. (*ib.* 1877), a collection of poems and rimed prose by himself and by his son-in-law Leon Peretz.

H. R. J. G. L.

LICHTENSTADT, MOSES ABIGDOR: Polish Hebraist and Talmudist; born at Lublin, Russian Poland, July 15, 1787; died at Odessa Jan. 17, 1870. He was noted as well for his charities, especially in assisting poor students, as for his Biblical and Talmudic scholarship. He was one of the founders of the public school for Jewish children at Odessa. He contributed a number of articles on Biblical and Talmudic subjects to "Ha-Meliẓ," "Ha-Karmel," and "Ha-Maggid," and wrote "Mi-Moḥorat ha-Shabbat" (Vienna, 1860), on Pentecost, directed against the Karaites.

BIBLIOGRAPHY: *Ha-Meliẓ*, 1870, p. 19; Gottlober, in *Ha-Maggid*, 1864, p. 212; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 436.

H. R. A. S. W.

LICHTENSTADT (LASH, from the Hebrew abbreviation ל״ש), **SIMEON BEN JUDAH:** Bohemian Talmudist; lived at Prague in the first half of the nineteenth century. He was the author of "Shesh ha-Ma'arakah," a commentary on the six Mishnaic orders, each order having a separate title as follows: (1) "Derek Emunah" (Presburg, 1840); (2) "Dabar be-'Itto" (*ib.* 1841); (3) "Ḥosen Rab" (*ib.* 1843), preceded by a sermon delivered at Prague on the first of the Penitential Days, 1836; (4) "Ma'yan ha-Yeshu'ah" (*ib.* 1846); (5) "Ḥokmat Adam" (Prague, 1852).

S. S. M. SEL.

LICHTENSTEIN, HILLEL: Hungarian rabbi; born at Vecs 1815; died at Kolomea, Galicia, May 18, 1891. After studying at the yeshibah of Moses Sofer he married, in 1837, the daughter of a well-to-do resident of Galantha, where he remained until 1850, when he was elected rabbi of Margarethen (Szent Margit). In 1854 he was elected rabbi of Klausenburg, but the opposition of the district rabbi, Abraham Friedmann, made it impossible for him to enter upon the duties of the office; finally he was expelled from Klausenburg by the authorities. Having lived for some time at Grosswardein, he was recalled to Margarethen, where he remained until about 1865, when he was called to Szikszo. Thence he went, in 1867, to Kolomea, where he remained until his death. Lichtenstein was the outspoken leader of the Orthodox extremists in Hungary: he not only resisted the slightest deviation from the traditional ritual, as the removal of the ALMEMAR from the center of the synagogue, but even vigorously denounced the adoption of modern social manners and the acquisition of secular education. He bitterly opposed the Hungarian Jewish congress of 1868–69 and the establishment of the rabbinical seminary in Budapest. In 1865 he called a rabbinical convention at Nagy-Mihaly, which protested against the founding of a seminary and sent a committee to the emperor to induce the government to prohibit its establishment. In his religious practise he surpassed the rigorism of the most Orthodox Hungarian rabbis, even going so far as to keep a she ass in order to be able to fulfil the law of the redemption of the first-born of the ass (see Ex. xiii. 13). He kept a sheep also in order to be able to give the first fleece to a kohen (Deut. xviii. 4), from whom subsequently he bought it back to make ẓiẓit from it. Lichtenstein was an ardent admirer of the Ḥasidim and made pilgrimages to the famous miracle-worker Ḥayyim Halberstam of Sandec. He offered his own intercession through prayer to people in distress, but declined any gifts.

Lichtenstein was a powerful preacher and a popular writer, and the resistance to modern tendencies among the Jews of northern Hungary is largely due to his influence. He inveighed against the use of other than traditional Jewish names; he denounced not only secular education, but even the playing of musical instruments and innocent social games, like chess and checkers; and he condemned those who relied on reason, for the ideal Jew should live up to the principle of Psalm lxxiii. 22, "I was as a beast before thee" ("'Et la-'Asot," p. 118a, Lemberg, 1881). He was a decided opponent also of all agitation for the political emancipation of the Jews, saying that it is the duty of the Jews to suffer the tribulations of the Exile until God finds them ripe for Messianic redemption.

Of the numerous works which Lichtenstein wrote, some of them being in Hebrew and others in Judæo-German, the most important are "Maskil el Dal" (Lemberg, 1867), "'Et la-'Asot" (*ib.* 1881), and "Abḳat Rokel" (*ib.* 1883), all of which have been repeatedly reedited. They are all devoted to the denunciation of liberal Judaism. In Hebrew Hillel signs his name ל"ש (Lash), which is an abbreviation for ליכטענשטיין (Lichtenstein).

LICHTHEIM, LUDWIG: German physician; born Dec. 7, 1845, at Breslau, where he was educated at the gymnasium. He then studied medicine at the universities of Berlin, Zurich, and Breslau, graduating in 1868. From 1869 to 1872 he was assistant in the medical hospital at Breslau; from 1872 to 1873 in the surgical hospital at Halle; and from 1873 to 1877 again at Breslau in the medical polyclinic. He became privat-docent at Breslau University in 1876; assistant professor at Jena in 1877; was called in 1878 to Bern University as professor of medicine and chief of the medical clinic; and has held a similar position since 1888 in the University of Königsberg.

Lichtheim has written many essays in the medical journals, among which may be mentioned: "Ueber Behandlung Pleuritischer Exsudate," in "Sammlung Klinischer Vorträge," 1872; (with Cohnheim) "Ueber Hydrämie und Hydrämisches Oedem," in Virchow's "Archiv," lxix.; "Ueber Periodische Haemoglobinurie," in "Sammlung Klinischer Vorträge," 1878; "Die Antipyretische Wirkung des Phenols," in "Breslauer Aerztliche Zeitschrift," 1881; "Ueber Tuberkulose," in "Rapport des Kongresses für Innere Medizin," 1883; "Die Chronischen Herzmuskelerkrankungen und Ihre Behandlung," *ib.* 1888; "Zur Diagnose der Meningitis," in "Berliner Klinische Wochenschrift," 1895. He is the author also of "Die Störungen des Lungenkreislaufs und Ihr Einfluss auf den Blutdruck" (Berlin, 1876).

Bibliography: Pagel, *Biog. Lex.* Vienna, 1901.

S. F. T. H.

LICHTSCHEIN, LUDWIG: Hungarian rabbi; born in Komorn; died at Ofen in 1886. He studied at Papa, and was rabbinical assessor of Austerlitz, Gross Kanizsa, and Esztergom. From 1876 until his death he was rabbi at Somogy-Csurgó.

Lichtschein was the author of the following works: "A Zsidók Közép és Jelenkori Helyzetök" (Gross Kanizsa, 1866), on the condition of the Jews in medieval and modern times; "Die Dreizehn Glaubensartikel" (Brünn, 1870), a sermon; "Der Targum zu den Propheten" (in Stern's "Ha-Meḥaḳḳer," i.); "Der Talmud und der Socialismus" (*ib.* iii.); "Kossuth Lajos és a Sátoraljaúhelyi Rabbi" (in "Magyar Zsidó Szémle," 1885), on Kossuth and the rabbi of Sátoralja-Ujhely.

LICHTSTEIN, ABRAHAM B. ELIEZER LIPMAN: Polish rabbi and author; lived at the end of the eighteenth and at the beginning of the nineteenth century; grandson of R. Kalman of Byelostok. He was rabbi and preacher at Prassnysz, in the government of Plotzk, Poland.

Lichtstein was the author of "Kanfe Nesharim," a commentary on the Pentateuch in several parts, each having a separate name, viz.: "Ḳiryat Sefer," an introduction to each book of the Pentateuch; "To'aliyyot ha-Ralbag," treating of the doctrines deduced by Levi b. Gershon from passages of the Torah; "Abaḳ Soferim," miscellanea; "Maḥazeh Abraham," consisting of sermons on each section of the Torah; "Ner Miẓwah," treating of the number of the precepts according to Maimonides; "Shiyyure Miẓwah," treating of the additional precepts according to Naḥmanides, Moses b. Jacob of Coucy, and Isaac of Corbeil; "Milḥemet Miẓwah," on the disputes among various authorities concerning the numbering of the precepts by Maimonides; "Torat ha-Ḳorbanot," on the Levitical laws of offerings and on the order of the high priest's service in the sanctuary on the Day of Atonement; and "Sha'are Ẓiyyon," orations on theological subjects. The whole work was published together with the text of the Pentateuch, Josefow, 1829, and republished without the text, Wilna, 1894. Lichtstein was the author also of a commentary on the "Sefer ha-Tappuaḥ" which was published together with the text in the Grodno edition of 1799.

Bibliography: *Kanfe Nesharim*, 2d edition; Benjacob, *Oẓar ha-Sefarim*, pp. 636, 660.

S. S. N. T. L.

LICHTSTEIN, ABRAHAM JEKUTHIEL SALMAN BEN MOSES JOSEPH: Rabbi of Plonsk, government of Warsaw, in the eighteenth century. He was the author of a work entitled "Zera' Abraham" (Dyhernfurth, 1811), a commentary on the Sifre, followed by Biblical and Talmudical indexes, and accompanied with the text. Lichtstein wrote also a preface and added a homily to his son's "Shoshannat 'Amaḳim."

LIEBEN, ADOLF: Austrian chemist; born at Vienna Dec. 3, 1836. He studied at the universities of Vienna, Heidelberg (Ph.D. 1856), and Paris, and subsequently held the positions of privat-docent at the University of Vienna (1861), and professor in the universities of Palermo (1863), Turin (1867), and Prague (1871). Since 1875 he has held the chair of general and pharmacological chemistry at the University of Vienna, and is a member of the Vienna Academy of Sciences.

Lieben has published many essays in "Liebig's Annalen der Chemie" ("Ueber die Einwirkung Schwacher Affinitäten auf Aldehyd," 1861; "Ueber das Iodbenzol," 1869; "Ueber Festes-Benzoylchlorid," 1875; etc.), "Sitzungsberichte den Kaiserlichen Akademie der Wissenschaften in Wien" ("Untersuchungen über Milchzucker," "Einwirkung von Cyangus auf Aldehyd," "Ueber den Formaldehyd und dessen Umwandlung in Methylalkohl," "Reduction des Exotonchlorals," etc.), "Monatshefte für Chemie," "Comptes-Rendus de l'Académie de Paris," "Berichte der Deutschen Chemischen Gesellschaft Berlin," "Gazzetta Chimica Italiana Palermo," etc.

S. F. T. H.

LIEBERMANN, AARON (ARTHUR FREEMAN): Russian writer; born at Wilna about 1840. Persecuted because of his participation in revolutionary movements, he fled to America, and died by his own hand at Syracuse, N. Y., Nov. 8, 1880. He was the editor of "Ha-Emet," a Hebrew monthly of communistic tendencies (Vienna, 1877), only the prospectus and two numbers of which appeared; and he was the first to organize socialist societies among the Jews in London.

Bibliography: Zeitlin, *Bibl. Post-Mendels.* p. 211.

D. S. Man.

LIEBERMANN, BENJAMIN: German manufacturer; born at Märkisch Friedland Feb. 4, 1812; died in Berlin Jan. 15, 1901. In 1825 his family moved to the latter city; and Liebermann, after completing a school course, entered the employ of a firm in London. Upon his return to Berlin he was taken into his father's business, which he soon developed into the largest calico-manufactory in Germany. That his ability was recognized is shown by the fact that he was elected to the presidency of the German merchants' association (Deutscher Handelstag). According to an anecdote he introduced himself to King Frederick William IV. as "the Liebermann who drove the Englishmen from the Continental calico market." For many years he held the office of president of the Gesellschaft der Freunde, and he was treasurer of the Lehranstalt für die Wissenschaft des Judenthums at the time of its foundation.

Bibliography: *Allg. Zeit. des Jud.* Jan. 25, 1901; *Mittheilungen aus dem Verein zur Bekämpfung des Antisemitismus*, 1901, p. 29.

S. D.

LIEBERMANN (LIBERMANN), ELIEZER: Talmudist of the first half of the nineteenth century. According to G. Wolf, in his biography of Isaac Noah Mannheimer (p. 10, Note), he was a native of Austria; Jost ("Culturgesch." iii. 24) says that he pretended to be a Hungarian rabbi; but in the preface to "Or Nogah," Liebermann signs himself "son of Zeeb Wolf, rabbi of Hennegau" (probably Hagenau, Alsace). He was the agent of the patrons of the Reform Temple at Hamburg, in defense of which he published "Nogah ha-Ẓedeḳ," a collection of the views of Shem-Ṭob Samun of Leghorn, R. Jacob Vita Ricanati of Pesaro, R. Moses Kunitz, or Kunitzer, of Budapest, and R. Aaron Chorin of Arad. The indorsement by the rabbinates of Leghorn and Jerusalem, which was added to that of Shem-Ṭob Samun, was afterward declared to be fictitious.

The "Nogah ha-Ẓedeḳ" was followed by "Or Nogah" (Dessau, 1818), in which Liebermann gives a lengthy and learned exposition of his own views in favor of Reform. It is prefaced by two eulogistic poems, one from Chorin and another signed "Ze'ebi." In refutation of this book the Hamburg rabbinate published "Eleh Dibre ha-Berit," a collection of the views of prominent Orthodox rabbis, and containing a declaration of Aaron Chorin revoking his former opinion (Altona, 1819). On the title-page of "Or Nogah" Liebermann claims the authorship of "'Ir Dammeseḳ," which work does not seem to have been printed.

In 1819 Liebermann traveled in Austria to propagate Reform ideas and, according to the statement of the chief of police Sedlnitzky, to found for that purpose a journal called "Syonia." Nothing else is known of Liebermann's life. According to Wolf and Graetz, Liebermann became a convert to Roman Catholicism; but there is nothing positive to corroborate this assertion.

D. S. Man.

LIEBERMANN, ELIEZER DOB: Russian writer; born in Pilvischok, government of Suwalki, April 12, 1820; died in Byelostok April 15, 1895. His father was a shoḥeṭ and gave him the usual Jewish education. At the age of twelve he was sent to his uncle R. Elijah Schick ("Reb Elinke Lider"), then rabbi of Amstibove, who instructed him in Talmud and rabbinical literature. In 1838 he went to Wilna and joined the Maskilim; about 1844 he settled as a teacher in Byelostok; in 1867 he removed to Suwalki, remained there about twenty years, and then returned to Byelostok. Liebermann is the author of "Megillat Sefer," a collection of short stories, essays, fables, and letters (Johannisberg, 1854), and of "Ẓedeḳ u-Mishpaṭ," a Hebrew adaptation of S. D. Luzzatto's "Lezioni di Teologia Morale Israelitica" (Wilna, 1867). He wrote also "Ge Ḥizzayon" (Warsaw, 1889), several works still in manuscript, and a number of articles which he published in various Hebrew periodicals.

Bibliography: *Aḥiasaf*, vol. iii. (necrologies, in which he is erroneously called "Jacob"); Sokolov, *Sefer Zikkaron*, pp. 57-58, Warsaw, 1890; Zeitlin, *Bibl. Hebr. Post-Mendels.* p. 211.

H. R. P. Wi.

LIEBERMANN, FELIX: German historian; born July 20, 1851, in Berlin. Destined for a commercial career, he began business life in a Berlin bank in 1869. There he remained for some time, but ultimately went to England, going to Manchester in 1871. Not very long afterward he returned to Germany, where he devoted himself almost exclusively to the study of early English constitutional history under Waitz and Pauli, at Göttingen.

On this subject he has published several monographs, beginning with "Anglonormannische Geschichtsquellen" (Berlin, 1879) and culminating in his monumental edition of the "Gesetze der Angelsachsen" (Berlin, 1898–1903; published by the Savigny Fund). Many of the essays contained in this great work had been published previously by Liebermann, either separately (*e.g.*, "Quadripartitus," 1893; "Leges Edwardi," 1896; etc.) or in journals, as the "English Historical Review," "Transactions of the Royal Historical Society," etc. He contributes an annual review of the publications on English medieval history to the "Jahresbericht für Geschichtswissenschaft." In recognition of his contributions to English history the University of Cambridge conferred upon him the honorary degree of LL.D. (1899), and the Prussian government the title of professor.

J.

LIEBERMANN, MATTATHIAS BEN ASHER LEMLE: Rabbi and preacher in Prague in the second half of the seventeenth century; died there 1709. He was the author of "Mattat Yah," a collection of sermons on the Pentateuch, reaching only to Numbers xxxiii. (Frankfort-on-the-Oder, 1696). Another collection of sermons by him, entitled "Peri Megadim," is preserved in manuscript.

D. S. MAN.

LIEBERMANN, MAX: German painter; born at Berlin July 29, 1849. After studying law at Berlin University for a year, he abandoned it and took up the study of painting at Weimar in 1869 under Thumann and Pawels. In 1872 he went to Paris, and during 1876–77 resided in Holland; after living for some time in Munich he finally returned to Berlin.

Max Liebermann.

His paintings include: "Gänserupferinnen"; "Amsterdamer Waisenmädchen"; "Das Tischgebet"; "Strasse in Zandvoort"; "Kleinkinderschule in Amsterdam"; "Münchner Bierkonzert"; "Die Spinnerinnen"; "Die Konservenmacherinnen"; "Stille Arbeit"; "Die Schweinefamilie"; "Altmännerhaus in Amsterdam"; "Trauergottesdienst"; "Holländische Dorfstrasse"; "Der Weber"; "Netzeflickerinnen"; "Spitalgarten in Leiden"; "Biergarten in München"; "Flachsscheuer in Holland"; "Frau mit Ziegen"; "Bürgermeister Petersen"; "Viehmarkt in Haarlem." Some of these works are in private collections; others are in the Kunsthalle, Hamburg; the Nationalgallerie, Berlin; the Neue Pinakothek, Munich; the Strasburg Museum; the Leipsic Museum; and various other public galleries of Europe.

Liebermann at first expressed the extreme tendencies of the modern realistic school, and illustrated the darker sides of life; his earlier works were exhibited in Paris in 1875, 1876, and 1877 ("Runkelrübenernte," "Arbeitssaal im Amsterdamer Waisenhaus," etc.), and at Munich in 1879 ("Jesus im Tempel"). In later years, however, he has turned toward the naturalistic school, producing a number of genre paintings and expositions of Dutch rural life. He has excelled also as an etcher. Liebermann won the small medal of the Berlin and of the second Munich expositions.

LIEBERMANN'SCHE JAHRBUCH, DAS. See YEAR-BOOKS.

LIEBLING, EMIL: German pianist; born at Pless, Silesia, April 12, 1851. After a course in piano at the Neue Akademie der Tonkunst, Berlin, under Ehrlich and Kullak, he continued his studies with Dachs at Vienna and with Liszt at Weimar. In 1867 he went to America, where, until 1871, he taught music in a Kentucky seminary. In 1874 he revisited Europe and spent the summer at Weimar with Liszt. Upon his return to America he settled at Chicago, where he has since established a high reputation as pianist, teacher, and composer. Liebling has played in New York, Chicago, and other cities, and has made concert tours with Wilhelmj, Miss Cary, Miss Kellogg, and others.

The following are a few of Liebling's principal compositions: "Gavotte Moderne," Op. 11; "Florence Valse," Op. 12; "Albumblatt," Op. 18; two romances, Op. 20 and 21; "Cradle Song," Op. 23; "Canzonetta," Op. 26; "Mazurka de Concert," Op. 30; and several songs.

LIEBRECHT, FELIX: German folklorist; born at Namslau, Silesia, March 13, 1812; died at St. Hubert Aug. 3, 1890. He studied philology at the universities of Breslau, Munich, and Berlin, and in 1849 became professor of the German language at the Athénée Royal at Liége, Belgium. He resigned his chair and retired into private life in 1867. The following translations by him may be mentioned: Giambattista Basiles, "Pentamerone," with introduction by Jakob Grimm (Berlin, 1846); Johannes Damascenus, "Baarlam und Josaphat" (Münster, 1847); Dunlop, "Gesch. der Prosadichtung" (Berlin, 1851); an edition of Gervasius of Tilbury's "Otia Imperialia" (Hanover, 1856). A collection of original essays by him was published at Heilbronn in 1879, under the title "Zur Volkskunde."

S. F. T. H.

LIEBREICH, OSKAR MATTHIAS EUGEN: German physician and pharmacologist; born at Königsberg, East Prussia, Feb. 14, 1839;

younger brother of Richard Liebreich. He studied first chemistry in Wiesbaden and Berlin and then, after nearly two years in Africa, medicine at the universities of Tübingen, Königsberg, and Berlin, graduating as doctor of medicine in 1865. In 1867 he became assistant at the pathological institute of Berlin University, and in 1868 joined the medical faculty of the same university as privat-docent in pharmacology. He was elected assistant professor in 1868 and appointed professor and chief of the pharmacological institute in 1872. In 1891 he received the title of "Geheime Medicinalrath."

Liebreich has added many new remedies to the pharmacopœia. In 1869 he discovered the narcotic effect of chloral hydrate; in 1873 he introduced platin-iridium cannulas for the hypodermic syringe; he showed the anesthetic effect of ethylene chlorid and butyl chlorid, the use of hydrargyrum formamidatum in the treatment of syphilis, the healing properties of lanolin (1885), of erythrophlein (1888), of cantharidin (1891), of creosol, tolipyrin, formalin, methylene blue, and many other drugs. He is a prolific writer, and has written many essays and monographs on his discoveries; especially noteworthy are those on: the presence of protogon in the brain as the chief chemical compound of phosphorus, the examination of lupus through phaneroscopic illumination, the use of strychnin as an antidote for chloral hydrate, the oxidation of neurin and the synthesis of oxyneurin (both discovered by him). His writings are very diverse; they deal not only with chemistry and pharmacology, but also with syphilology, dermatology, hygiene, and balneology. Since 1887 he has edited the "Therapeutische Monatshefte."

Liebreich is the author also of: "Das Chloralhydrat, ein Neues Hypnotikum," Berlin, 1869 (3d ed. 1871); "Encyclopädie der Therapie," *ib.* 1895; with Langgaard, "Kompendium der Arzneiverordnung," 5th ed. *ib.* 1900.

LIEBREICH, RICHARD: English ophthalmologist; born at Königsberg, East Prussia, June 30, 1830; brother of Oskar Liebreich. He received his education at the universities of Königsberg, Berlin, and Halle (M.D. 1853). After a postgraduate course at Utrecht under Donders, and at Berlin under Brücke, he became assistant in the ophthalmological institute of Berlin University from 1854 to 1862. In the latter year he established himself as an ophthalmologist in Paris, whence he removed to London in 1870. There he became lecturer and clinicist in ophthalmology at St. Thomas' Hospital.

Since about 1895 he has given up his hospital duties and reduced his private practise, spending most of his time in researches in art, especially the technique of the old masters.

Liebreich has constructed two ophthalmoscopes, which are universally used—a larger one, more elaborate and heavy, and a portable one. The latter especially supplied a long-felt want. Following Helmholtz's invention, Liebreich added two convex lenses to the small concave reflex mirror.

Of Liebreich's writings may be mentioned: "Atlas der Ophthalmoskopie," Berlin, 1863 (3d ed. 1885); "Ophthalmoskopische Notizen," in Albrecht von Graefe's "Archiv für Ophthalmologie," i., iv., v., vii.; "Ein Fall von Scheinbarer Myopie, Bedingt Durch Accommodationskrampf," *ib.* viii.; "Modification des Schieloperation," *ib.* xii.; (with Laqueur) "Recueil des Travaux de la Société Médicale Allemande de Paris," Paris, 1865; "Eine Neue Methode der Cataractextraction," Berlin, 1872; "On the Use and Abuse of Atropin," London, 1873; "Clinical Lecture on Convergent Squint," *ib.* 1874; "School Life in Its Influence on Sight and Figure," *ib.* 1877 (2d ed. 1878).

LIFE.—Biblical Data: The word "ḥayyim" (= "life") denotes first of all the animal existence which, according to Scripture, begins when "the breath [or spirit] of God" ("ruaḥ," "neshamah," or "nefesh") is first inhaled through the nostrils (Gen. i. 30, ii. 7, vii. 22; Job xxxiii. 4), and ceases when God withdraws His breath (Ps. civ. 29, cxlvi. 4; Job xxxiv. 14; Eccl. xii. 7). Life is the gracious gift of God (Job x. 12; Ps. xxx. 6 [A. V. 5]); with God is "the fountain of life" (Ps. xxxvi. 10 [A. V. 9]). Physical life is valued by the Hebrew as a precious good, given that he may "walk before God in the land [or "in the light"] of the living" (Ps. lvi. 14 [A. V. 13], cxvi. 9; comp. Isa. xxxviii. 11; Job xxxiii. 30). A long life, in ancient times, was regarded as the reward of virtue and piety (Ex. xx. 12; Deut. xxii. 7, xxxii. 47; Ps. xxxiv. 16; Prov. iii. 2, iv. 10, ix. 11, xii. 28, xxi. 21). The expressions "fountain of life" and "tree of life" (Prov. xi. 30, xiii. 12, xv. 4) point to the paradise legend (Gen. ii. 9–10) and possibly refer to a higher life. The brevity of life is a theme frequently dwelt upon by the poets (Ps. xxxix. 6 [A. V. 5], xc. 9–10, ciii. 15; Job ix. 5, xiv. 1–2).

But it is the ethical view of life which is chiefly characteristic of Judaism. Life is sacred, and it should accordingly be guarded and treated with due regard and tenderness in every being, man or beast (Gen. ix. 6; Lev. xix. 16; Deut. xxii. 7, xxv. 4; see Cruelty). The "righteous man regardeth the life of his beast" (Prov. xii. 10). The whole Law is summed up in the words: "I have set before you life and death, blessing and cursing; therefore choose life" (Deut. xxx. 19); and the law of conduct toward others is stated in the words: "Let thy brother live with thee" (Lev. xxv. 35–36, Hebr.). The entire object of the Law is the preservation of life: "Ye shall keep my statutes and my ordinances, which if a man do he shall live by [A. V. "in"] them" (Lev. xviii. 4, Hebr.).

——**In Rabbinical Literature:** The same appreciative view of physical, or earthly, life prevails also among the Rabbis. A long life is regarded as Heaven's reward for certain virtues (Meg. 27b, 28a; Ber. 54b, 55a; Men. 44a; Yoma 87a). "He who performs only one meritorious act will have his life prolonged" (Ḳid. i. 10, 39b). "The object of the Law is the preservation of life, and not its destruction"; hence, ordinarily, one should rather transgress a commandment than incur death; only in regard to the three capital sins—idolatry, murder, and incest—should man give up his life rather than desecrate God's law (Sifra, Aḥare Mot, xiii.). "Better to extinguish the light on Sabbath than to extinguish life, which is God's light" (Shab. 30b).

Life Eternal.

"Ḥayye 'olam" (eternal life; Dan. xii. 2; Enoch, xxxvii. 4, xl. 9) occurs often in rabbinical terminology as "ḥayye 'olam ha-ba" (the life of the world to come; Tosef., Sanh. xiii. 3; Ber. 48b, 61b; M. Ḳ. 9a; Ket. 62a; Targ. I Sam. xxv. 29). At a later time, owing probably to the martyrdoms under Syrian and Roman persecution, earthly life was less esteemed (Wisdom iii. 17; iv. 7–8, 14; Philo, "De Abrahamo," § 46). Characteristic are these rabbinic sayings: "The pious live even in death; the wicked are dead even in life" (Ber. 18b). "Life" for "eternal life" (Psalms of Solomon, ix. 9, xiv. 6; II Macc. vii. 14; comp. vii. 9). "Ten are called living," that is, possess eternal life: (1) God (Jer. x. 10); (2) the Torah (Prov. iii. 18); (3) Israel (Deut. iv. 5); (4) the righteous (Prov. xi. 30); (5) paradise (Ps. cxvi. 9); (6) the tree of life (Gen. ii. 9); (7) the Holy Land (Ezek. xxvi. 20); (8) benevolent works (Ps. lxiii. 4 [A. V. 3]); (9) the wise (Prov. xiii. 15); (10) the fountain of waters in Jerusalem (Zech. xiv. 8; Ab. R. N. xxxiv. [ed. Schechter, p. 103]). "Dost thou wish life? Look to the fear of God, which increases the number of man's days; look for affliction; look to the study of the Torah and observe the commandments" (comp. Prov. iii. 18, iv. 4, vi. 23, x. 27). The Torah is called "medicine of life" (Sifre, Deut. 45; Yoma 72b; see also Book of Life).

K.

LIGHT (Hebr. "or"): The primal element of Creation in all ancient cosmogonies; the first creation of God.—**Biblical Data:** "God said, Let there be light": and out of the primeval chaos there came forth "light" (Gen. i. 2–3). In the Creation psalm, God, before "stretching out the heavens like a curtain," "wraps Himself in light as in a mantle" (Ps. civ. 2, Hebr.; whence "the Father of lights" of James i. 17). He is the Former of light and the Creator of darkness (Isa. xlv. 7). "No one knows the way to the light," which has its seat in heaven (Job xxxviii. 19, Hebr.); it emanates from the face of God (Ps. iv. 7 [A. V. 6], xliv. 4 [A. V. 3], lxxxix. 16 [A. V. 15]), whose whole being is luminous (Ex. xiii. 21, xxiv. 10; Ps. xxxvi. 10 [A. V. 9]; Job xxxvi. 30, xxxvii. 3). Gradually this light of God assumed a spiritual or symbolical meaning, in such passages as "God is light," to those who walk in darkness (Isa. ix. 2; x. 17; lx. 1–3, 19–20; Micah vii. 8; Ps. xxvii. 1, xxxvi. 10 [A. V. 9]).

The Heavenly Light.

The sun, moon, and stars, the luminaries placed in heaven to reflect their light upon the earth (Gen. i. 14–17), are supposed to have received, or to still receive, their light from the heavenly light created on the first day. Prophecy, therefore, speaks of the time when "the light of the moon will be like that of the sun, and that of the sun sevenfold like the light of the seven days of Creation" (Isa. xxx. 26, Hebr.; the commentators who failed to understand this meaning wished to eliminate from the text the words "ke-or shib'at ha-yamim"; but see Gen. R. iii. 6, xi. 2). Similarly, Isa. lx. 19–20: "Not sun nor moon, but the Lord, shall be for thy everlasting light" (Hebr.). The Avesta also speaks of the "endless lights" in heaven in which the good souls shall dwell ("Vendidad," ii. 131; "Yast," xx. 15; "Vistasp Yast," 61).

Light is often used as the symbol of life and joy (Job xviii. 5–6, xxxiii. 28; Ps. xlix. 20 [A. V. 19], xcvii. 11; Esth. viii. 16). It is likened to the word of instruction (Ps. cxix. 105; Prov. vi. 23).

K.

——**In Apocryphal and Rabbinical Literature:** Here also light takes a prominent position as a cosmic power. Wisdom is represented as the radiance of the everlasting light, the unspotted mirror of the power of God, more beautiful than the sun, and superior to the light which it resembles (Wisdom vii. 26, 29). God's majesty being surrounded with light to make Him invisible to all beings (Meg. 19b), the Rabbis speak of "the radiance of the Shekinah" ("ziw ha-Shekinah"; Ber. 64b; Shab. 30a; B. B. 10a; comp. Ḥag. 14b and Heb. i. 3—"the brightness of his glory"). This was believed to be reflected in the new moon (Sanh. 42a, "Keillo meḳabbel pene ha-Shekinah" = "he who sees the new moon is like one who greets the Divine Majesty"). The "radiance" ("ziw") of wisdom is reflected also in great men (Soṭah ix. 15). According to the cosmogony of Slavonian Enoch (xxv. 1–5) God made Adoel (Hadriel?), a fiery angel of great brightness, spring forth first as a visible being out of the invisible; and as Adoel burst asunder, there came forth a great light; and then God made a throne for Himself, and sat upon it, and placed the light above the throne to be the foundation of all things on high.

Primitive Light.

Similar is the "secret lore" of the Rabbis: The first act of Creation was when God robed Himself in light while the radiance of His glory ("ziw hadaro") illumined the world from one end to the other (Gen. R. iii.; Pirḳe R. El. iii.). "The light of the first day was such that by it the first man could see from one end of the world to the other; but, finding that wicked men would arise on earth, God removed this light to reserve it for the righteous in the world to come" (Ḥag. 12a; Gen. R. *l.c.*). The luminaries receive their light from the spark of that light of heaven, which is one hundred times as bright as the light visible on earth (Tan., Beha'aloteka, ed. Buber, p. 10). According to Targ. to Isa. xxx. 26 and Judges v. 31, the light of the future will be 343 (7 × 7 × 7) times as bright as the sun. The righteous alone desire it, not the wicked, who are as the bat in the fable, of whom the cock demands, "What is the light of day to thee, who preferrest the night?" (Sanh. 98b). Enoch (xlv. 4) speaks of "the eternal light" brought forth in the Messianic time: "The great light of heaven shone forth in splendor until Adam sinned; but on account of the Sabbath God would not withdraw the light before the day was over. Then when darkness set in Adam became afraid: 'Shall Satan henceforth overpower me?' Whereupon God set before him two bricks, from which Adam drew forth sparks of light by striking one against the other; and he blessed God for the light which he thus obtained by his own hands" ('Ab Zarah 8c; Gen. R. xii.; Pesiḳ. R. xxiii.; comp. Pirḳe R. El., where the story is somewhat differently rendered; see Habdalah).

God is in no need of light; the light kindled in the Sanctuary was to testify that the light of the Shekinah is in the midst of Israel (Men. 86b); therefore in the Temple of Solomon the windows were narrowed from without to indicate that the light streams forth from within (Tan., Teẓawweh, ed. Buber, p. 4). The light kindled before God was to be like the lantern carried by the blind for the one who sees; Israel is to aid in the spreading of the light of God on earth (Tan., Beha'aloteka, ed. Buber, p. 5; Ex. R. xxxvi.). When Moses was born the house was filled with light; hence it is said of him, as of the light of Creation, "he was 'good'" ("ṭob"; A. V. "goodly"; Ex. ii. 1; Soṭah 12a). In the ark Noah used a precious stone which illuminated all the surroundings (Gen. R. xxxi.; Sanh. 108b; comp. Meg. 12a).

The righteous in the world to come shall shine like the light of sun and stars, each in different luster (Sifre, Deut. 10, 47; Midr. Teh. to Ps. xi. 6; comp. I Cor. xv. 41). God had in view the righteous of the type of Abraham when He said "Let there be light" (comp. Ps. xcvii. 11; Ta'an. 15a; Tan., Teẓawweh, ed. Buber, p. 4); whereas the wicked of the type of Esau are sons of darkness (comp. Job xviii. 5; Gen. R. ii. 111). "The righteous who have loved God's name shall be clad in shining light" (Enoch, cviii. 12; comp. Dan. xii. 3 and Targ. to Judges v. 31: "they that love Him shall be as the sun"; Shab. 88b). Accordingly, the righteous are called "the generation of light," in contrast to the wicked, who are born (clothed?) in darkness (Enoch, cviii. 11); hence also the New Testament term, "sons of light" (Luke xvi. 8; John xii. 36; Ephes. v. 8; I Thess. v. 5; Col. i. 12).

Light is the symbol of the Torah (Meg. 16b, after Prov. vi. 23), of God (Tan., Teẓawweh, ed. Buber, p. 5, after Ps. xviii. 29), of the soul (*ib.* ed. Buber, p. 4, after Prov. xx. 27). "God says: 'If you conscientiously keep My light burning in your soul, I shall keep your light; if you kindle My lights in the Sanctuary, I shall kindle the great light for you in the future'" (*ib.* ed. Buber, pp. 2, 4–5; Ex. R. xxxvi.; Lev. R. xxxi.). In regard to Sabbath lights see Lamp, Sabbath. K.

LIGHT OF TRUTH. See Periodicals.

LIGHTFOOT, JOHN: English Christian divine and Talmudist; born at Stoke-upon-Trent 1602; died at Ely 1675. He passed through Christ's College, Cambridge, and later took orders, serving for the rest of his life as curate, rector, and canon. From 1650 till his death he was master of St. Catherine Hall (now College), Cambridge. He was parliamentarian, Presbyterian, and a leading member of the Westminster Assembly. It was through the influence of Sir Rowland Cotton (himself a Hebraist) that Lightfoot entered on the study of Hebrew, to which, including rabbinical Hebrew, he thenceforth devoted his leisure. His first publication was the tract "Ervbhin, or Miscellanies Christian and Judaicall, and Others, Penned for Recreation at Vacant Houres" (London, 1629). He is best known by his "Horæ Hebraicæ et Talmudicæ," composed in Latin, giving Talmudic parallels on the Gospels and I Corinthians, Acts, and some chapters of Romans, which appeared at intervals from 1658 to 1674, except the part on Acts and Romans, which was brought out later by Kidder, afterward Bishop of Bath and Wells (1691). The work was reproduced at Leipsic by Carpzov, the "Horæ" on the Gospels in 1675 (2d ed. 1684), and the rest in 1679; and at Oxford, in English, by Gandell in 1859. Lightfoot's collected works were first published in English (London, 1684), in two folio volumes, the one edited by George Bright, and the other by John Strype. Afterward they were published in Latin at Rotterdam (1686), and at Franeker (1699). The latest edition of his works is by J. R. Pitman (London, 1822–25).

By some critics, as Simon, Lightfoot's method in the "Horæ" was disparaged as "quelquefois trop rabbinique," but in general it found favor; and it was adopted by later writers, as Schöttgen, Meuschen, and Gill. He showed considerable acquaintance with Talmud and Midrash, greater perhaps than any non-Jew has shown before the present day. He corresponded with the younger Buxtorf, and helped Walton and others in their literary undertakings. He left his library to Harvard College, but nearly the whole collection was destroyed by fire in 1764.

Bibliography: *Dict. Nat. Biog.*; Lightfoot's *Works*, ed. Pitman, as above.

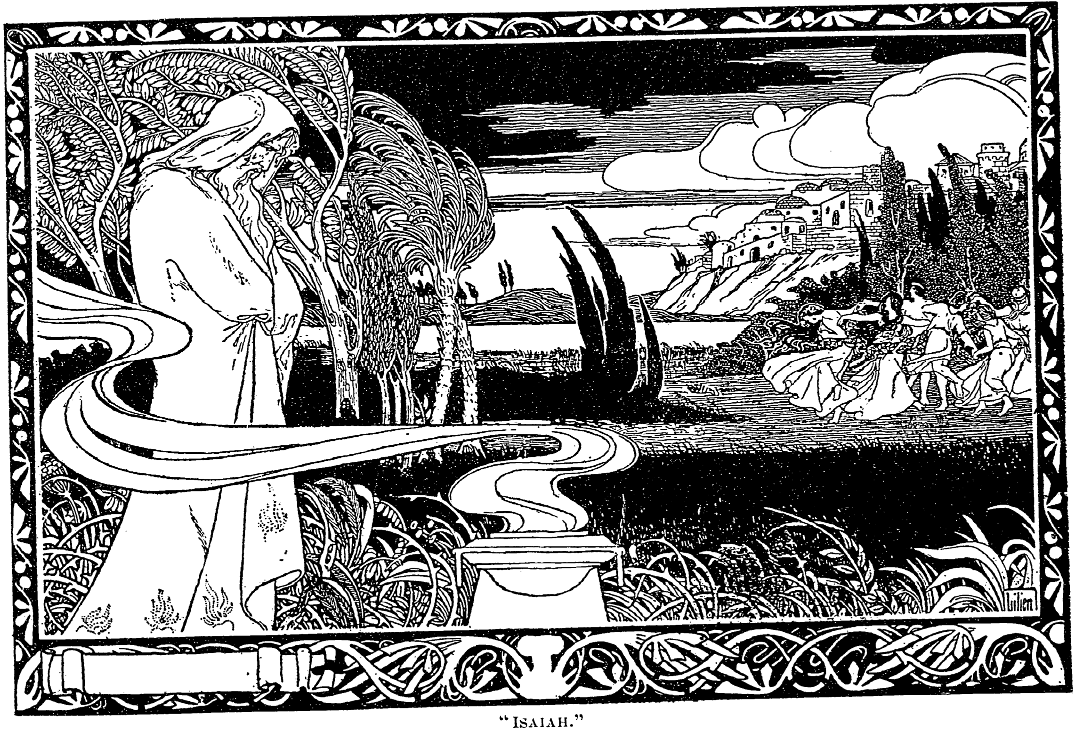
T. C. T.

LIGHTNING, BENEDICTION ON: The Mishnah (Ber. ix. 2) prescribes, "At the sight of shooting stars or of lightning, and at hearing earthquakes, thunder, and storms, the benediction 'Blessed be He whose power and might fill the world' should be recited. At the sight of great mountains, seas, and deserts one recites the benediction 'Blessed be He who hath made the work of Creation.'" The suggestion was made at the Babylonian school that the latter benediction is in place also on the occasions previously mentioned; and this was accepted by both Abbaye and Raba, who declared that both benedictions should be recited (Ber. 59a). However, Isaac Alfasi and Maimonides ("Yad," Berakot, x. 14) understand the Talmudic passage to mean that either benediction may be recited on the occasion of lightning and the other phenomena mentioned.

This view is accepted also by Asheri and his son Jacob (Ṭur Oraḥ Ḥayyim, 227); and by Joseph Caro (Shulḥan 'Aruk, Oraḥ Ḥayyim, 227, 1). General custom, however, decided that while for thunder the former benediction, expressive of God's might, should be recited, the benediction for lightning should be, "Blessed be He who hath made the work of Creation" (see "Ṭure Zahab" and "Be'er Heṭeb" to Shulḥan 'Aruk, Oraḥ Ḥayyim, *l.c.*). Accordingly, the ordinary prayer-books have this arrangement as a fixed rule. K.

LILIEN, EPHRAIM MOSES: Austrian artist; born at Drohobicz, Galicia, in 1874. Lilien's artistic inclinations became evident early in life. He was apprenticed to a sign-maker, with whom he worked in return for meager board, and subsequently attended the academies of art in Cracow and Munich. He later removed to Berlin, where he is at present (1904) residing.

At first Lilien's work was deficient in individuality. Even "Der Zöllner von Klausen," one of the most admired of his earlier works, is vague, colorless, and feeble. Lilien began with the illustration of books and newspapers, but soon pushed himself to the front; a number of his earlier efforts appeared in the "Jugend" and in the "Vorwärts."



"ISAIAH."

(From the drawing by Ephraim Moses Lilien.)

His later productions, though not overladen with sentiment, are rich in pathetic touches. The best and most characteristic of his work is to be found in the book "Juda" (1900), which contains his "Jesaia," "Passach," and "Sodom's Ruinen." He illustrated also the "Lieder des Ghetto" of Morris Rosenfeld (1903). His "Gedenkblatt des Fünften Zionisten-Kongresses in Basel" has attracted wide attention. Other notable illustrations are: "Ex Libris E. M. Lilien," "Auf Zarten Saiten," "Der Jüdische Mai," "Ex Libris Ruben Brainin," "Ex Libris D. Simonson," "Ex Libris des Reichstagsabgeordneten R. Fischer," "Ein Salomonisches Urtheil," "In Rosenketten," "Heimatlos," "Chanukalichter," "Signet des Jüdischen Kunstverlages Phönix."

S. S. LED.

LILIENBLUM, MOSES LÖB: Russian scholar and author; born at Keidany, government of Kovno, Oct. 22, 1843. From his father he learned the calculation of the course of the stars in their relation to the Hebrew calendar ("Ḥaṭṭot Ne'urim," i. 15). At the age of thirteen he organized a society of boys for the study of "'En Ya'aḳob" (*ib.* i. 14); and at the age of fifteen he married and settled at Wilkomir.

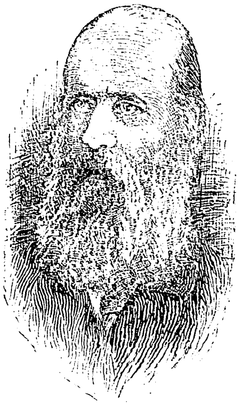
Changed Views.

A change in the fortunes of his father-in-law throwing him upon his own resources, Lilienblum established a yeshibah in Wilna in 1865, and another in the year following (*ib.* i. 53-54). The advance of years, however, wrought a great change in the attitude of Lilienblum toward Judaism. He had read the writings of the Maskilim, particularly those of Mapu and M. A. Ginzburg, and these produced in him a feeling of dissatisfaction with Talmudic studies and of abhorrence for the ignorance and superstition surrounding him; he decided, therefore, to combat these faults. In an article entitled "Orḥot ha-Talmud," in "Ha-Meliẓ," 1868, he arraigned the superstitious beliefs and practises of his people, demanded the reform of Judaism, and insisted upon the necessity of establishing a "closer connection between religion and life."

This article, followed by others of the same nature, stirred up the Jewish communities in Russia, and a storm of indignation against him arose among the ultra-Orthodox; he was denounced as a freethinker and continued residence in Wilkomir became impossible. He then went to Odessa (1869), where he intended to prepare himself for the university ("Ḥaṭṭot Ne‘urim," ii. 3), but after a hard struggle he was compelled to give up that design.

Zionism.

The anti-Jewish riots of 1880 and 1881 aroused Lilienblum to a consciousness of the unsafe position of the Jews "in exile," and he gave utterance to his apprehensions in an article entitled "Obshcheyevreiski Vopros i Palestina" (in "Razsvyet," 1881, Nos. 41, 42), in which he points to the reestablishment of the Jews in Palestine as the only solution of the Jewish question. This article did not remain without results; the idea was hailed as practical, and many set themselves to realize it. In 1883 a committee was organized at Odessa for the colonization of Palestine, Lilienblum serving as secretary and Dr. L. Pinsker, author of "Autoemancipation," as president; at the famous conference at Kotowitz, where representatives of all European Jewries met and discussed plans of colonization in Palestine, the foundation was laid for the Zionist movement, in which Lilienblum, as secretary, has taken the most earnest and energetic part ("Derek la-‘Abor Golim," p. 16).



Moses Löb Lilienblum.

Lilienblum's activity thus covers two distinct periods in the history of Russian Jewry. In the period of the Haskalah he followed the example of the Maskilim in demanding the reform of Judaism; but he differed from the Maskilim in that he was much less extravagant, his style being free from the flowery "meliẓah" used by them, and his ideas being marked by soberness and clearness. His "Orḥot ha-Talmud," mentioned above, and his "Ḥaṭṭot Ne‘urim" (Vienna, 1876), a description of his material and spiritual struggles, both made a marked impression upon that period. His influence in the second period also, that of national reawakening, which he practically initiated, was due to his characteristic style. In his article on the Jewish question and Palestine, already mentioned, as well as in his "O Vozrozhdenii Yevreiskavo Naroda" (Odessa, 1883), the latter including the former and other essays of a similar character, he clearly and soberly presents the anomalous position held by Israel among the nations and logically demonstrates its hopelessness except through national independence.

Works.

Lilienblum wrote also: "Ḳehal Refa'im," a poem describing the different types of Russian Jewry of the time, as they appear in the nether world (Odessa, 1870); "‘Olam ha-Tohu," on some phases of Hebrew literature (in "Ha-Shaḥar," 1873); "Biḳḳoret Kol Shire Gordon," on J. L. Gordon as a poet (in "Meliẓ Eḥad Mini Elef," St. Petersburg, 1884); "Zerubbabel," a historical drama in Yiddish (Odessa, 1888); "Derek la-‘Abor Golim," a history of the Chovevei Zion movement up to the time of the ratification by the Russian government of the committee for the colonization of Palestine (Warsaw, 1899); "Derek Teshubah," an addition to "Ḥaṭṭot Ne‘urim," describing the transition of the author from the negative period of the Haskalah to the positive period of national reawakening; "Pyat Momentov Zhizhni Moiseya" (in Russian; *ib.* 1901), a psychological analysis of some important moments in the life of Moses. Lilienblum also edited "Kawweret," a collection of articles in Hebrew (Odessa, 1890), and the "Luaḥ Aḥiasaf," 1901. He was the author of a number of other articles, of which the most important is "O Neobkhodimosti Reform v Yevreiskoi Religii" (in "Voskhod," 1882-83).

H. R. A. S. W.

LILIENTHAL, MAX: Rabbi and educator; born at Munich Nov. 6, 1815; died at Cincinnati, Ohio, April 5, 1882; educated at the University of Munich (Ph.D. 1837). In 1839 he accepted the office of principal in the newly established Jewish school of Riga, where he was appointed preacher also. The school was opened Jan. 15, 1840. In recognition of the sentiments expressed in the sermon with which Lilienthal opened the school the emperor Nicholas presented him with a diamond ring. In Dec., 1841, at the instance of Uvarov, minister of public instruction, to whom he was recommended by Count Maltitz, the Russian ambassador to Holland, Lilienthal was sent from St. Petersburg on an official mission. It was the intention of the government to establish Jewish schools for secular and religious instruction, and the duty assigned to Lilienthal was to determine the attitude of the Jews in regard to them and to quiet their fears as to the intentions of the government; for the plans of the latter were regarded with suspicion among the Jewish masses, who believed that the real purpose of the proposed schools was to lead the Jews gradually to conversion to Christianity. Lilienthal repaired to Wilna, where the community, acting on his assurances, appropriated 5,000 rubles for school purposes, and promised Lilienthal that more money would be supplied when necessary. But notwithstanding Lilienthal's assurances, the mistrust toward him of the Jews in Lithuania increased. At Minsk, whither he had gone at the invitation of the local ḳahal, he was given to understand that the Jews of Lithuania had no confidence in him. His stay in Minsk was rendered unpleasant by the resentment of the Jewish masses, and he even had to invoke the protection of the police. On his return to Wilna, Lilienthal found distrust of him growing there; thereupon, discouraged, he returned to St. Petersburg.

After several months' arduous work in the offices of the Ministry of Education and with Count Uvarov, he returned to Wilna and prepared a circular letter to the Jews of Russia, published under the title "Maggid Yeshu‘ah." When a council of rabbis and other prominent Jews was convoked at St. Petersburg, consisting of Rabbi Isaac ben Ḥayyim of

Volozhin, Rabbi Mendel Shneersohn of Lubavich, Bezaleel Stern of Odessa, and Israel Heilprin of Berdychev, Lilienthal was appointed secretary of a senatorial committee of fourteen. During the sessions Stern had many an encounter with Lilienthal and was even provoked to accuse him of ignorance of the Talmud. In the autumn of 1842 Lilienthal went to Odessa with letters of recommendation from Uvarov to Count M. S. Vorontzov. The Odessa community received him warmly, and appointed him their rabbi. Lilienthal was soon convinced, however, that his efforts in behalf of the Russian Jews would not yield the desired results; as a foreigner it was difficult for him to gain a true insight into their traditions, hopes, and aspirations. He did not understand them, nor they him; and he was placed in an awkward and delicate position by the distrust of the Jews on the one hand, and, on the other hand, by the efforts of the government to effect their assimilation without according them full rights of citizenship.

His "Maggid Yeshu'ah."

Lilienthal left Russia suddenly in 1844 and went to the United States. Settling in New York, he became rabbi of the Congregation Anshe Chesed, Norfolk street, and, later, rabbi of Shaar ha-Shomayim, Attorney street. His somewhat advanced views led to considerable friction. He resigned his position in 1850 and established an educational institute with which he attained considerable success. In 1854 he became correspondent of the "American Israelite," and in the following year removed to Cincinnati and became associate editor of that journal and rabbi of the Congregation Bene Israel. His activity in Cincinnati extended over a period of twenty-seven years. He organized the Rabbinical Literary Association, serving as its president, and was at first instructor and later professor of Jewish history and literature at Hebrew Union College. He was prominent, also, in the Jewish press as the founder and editor of the "Hebrew Review," a quarterly, and the "Sabbath-School Visitor," a weekly, and as a frequent contributor to the "Israelite," the "Occident," "Deborah" (founded by him), the "Asmonean," "Volksblatt," and "Volksfreund." He published a volume of poems entitled "Freiheit, Frühling und Liebe" (1857), several volumes of addresses and sermons, and left three dramas in manuscript—"Die Strelitzen Mutter," "Rudolf von Habsburg," and "Der Einwanderer."

Associate Editor of "American Israelite."

Lilienthal took an active interest in the affairs of the municipality. As member of the Cincinnati board of education, and as director of the Relief Union and of the university board, he contributed much to the welfare of his adopted city. He was a reformer by nature; he was instrumental in introducing reforms in his own congregation in Cincinnati, constantly preached tolerance, and urged a more liberal interpretation of Jewish law.

Otto Lilienthal Experimenting with His Flying-Machine: Starting from a Platform.

(From a photograph.)

LILIENTHAL, OTTO: German mechanical engineer and experimenter in aerial navigation; born May 23, 1848, at Anklam; died Aug. 9, 1896, at Rhinow. Lilienthal's theory was that artificial flight must follow the principles of bird-flight. His experiments, which were made with the assistance of his brother **G. Lilienthal,** extended over a period of twenty-five years; in the summer of 1891 he made, with a pair of curved wings designed for soaring, the first practical demonstration of man's ability to fly. He made the flight successfully several times, but finally met death during an experiment at Rhinow.

Lilienthal was a member of the German Society for the Advancement of Aerial Navigation. He was the author of "Der Vogelflug als Grundlage der Fliegekunst" (Berlin, 1889), in which he explained the theoretical reasons for the form of his aerial machine; and "Die Flugapparate."

S.

LILITH (לילית: LXX. Ὀνοκένταυροι; Symmachus, Λάμια; Vulg. "Lamia"): Female demon. Of the three Assyrian demons Lilu, Lilit, and Ardat Lilit, the second is referred to in Isa. xxxiv. 14. Schrader ("Jahrb. für Protestantische Theologie," i. 128) takes Lilith to be a goddess of the night; she is said to have been worshiped by the Jewish exiles in Babylon (Levy, in "Z. D. M. G." ix. 470, 484). Sayce ("Hibbert Lectures," pp. 145 *et seq.*), Fossey ("La Magie Assyrienne," pp. 37 *et seq.*), and others think that "Lilith" is not connected with the Hebrew "layil" (*night*), but that it is the name of a demon of the storm, and this view is supported by the cuneiform inscriptions quoted by them. It must, however, be assumed that the resemblance to the Semitic "layil" materially changed the conception of Lilith among the Semites, and especially among the Jews. No definite conclusions can be drawn from the passage in Isaiah, where it is said of the devastated palaces of Edom that wild animals shall dwell in them "and the satyr shall cry to his fellow; the screech-owl also shall rest there, and find for herself a place of rest" (Isa. xxxiv. 14; see Cheyne's note *ad loc.*). Baudissin connects Lilith with Zech. v. 9.

In Talmud and Midrash.

Lilith is more fully described in post-Biblical literature, where she appears as a demon of the night, as suggested by her Hebrew name. Three classes of demons are mentioned: spirits, devils, and "lilin" (Targ. Yer. to Deut. xxxii. 24; Targ. Sheni to Esth. i. 3; *passim*). The first have neither body nor form; the second appear in complete human shape; the third in human shape, but with wings (Rashi to Sanh. 109a). Adam procreated all the spirits while he was under a spell (Gen. R. xx. 11; 'Er. 18b). Similarly, Eve bore demons to male spirits for the space of 130 years. This corresponds to the view that the demons are half human (Ḥag. 16a). Hence an abortion which has the shape of Lilith may be a child, though it has wings (Nid. 24b). Lilith is a seductive woman with long hair ('Er. 100b); she is the Queen of Zemargad (Targ. Job i. 15; comp. Bacher and Kohut [see bibliography]); Ahriman is her son (B. B. 73a). She goes about at night, fastening herself upon any one sleeping alone in a room (Shab. 151b). "The Lord will protect thee" (Num. vi. 24) means, according to Targ. Yer., ". . . from lilin." The meteor-stone is her arrow and is a remedy against disease (Giṭ. 69b). Kohut's assumption that Agrat bat Maḥlat ("daughter of the dancer"), who roams at night with myriads of demons (Pes. 112b, bottom), is the queen of the lilin, is not verified. King Solomon, who commanded all spirits, had the lilin dance before him (Targ. Sheni Esth. i. 3).

Middle Ages and Modern Times.

Kohut identifies Lilith with the Parsee Bushyansta, and the Arabic translators render the word in Isa. xxxiv. 14 by "ghul," which is identical with the "lamia" of the Vulgate. In the Talmud, however, there is nothing to indicate that Lilith is a vampire. The Arabians, on the contrary, are said to regard Lilith, under the form of Lalla, as a "holy dame" (Schwab, "Les Coupes Magiques et l'Hydromancie dans l'Antiquité Orientale," p. 11). The name "Lilith" is found also on amulets with terra-cotta figures (*idem*, "Coupes à Inscriptions Magiques," p. 62). In the later Middle Ages the mystics systematically amplified demonology on the basis of the traditions and the current European superstitions, and they also assigned a more definite form to Lilith (see the quotations in Eisenmenger, "Entdecktes Judenthum," ii. 417 *et seq.*). The superstitions regarding her and her nefarious doings were, with other superstitions, disseminated more and more among the mass of the Jewish people. She becomes a nocturnal demon, flying about in the form of a night-owl and stealing children. She is permitted to kill all children which have been sinfully begotten, even from a lawful wife. If a child smiles during the night of the Sabbath or the New Moon, it is a sign that Lilith is playing with it. One should then strike the nose of the child three times and drive Lilith away by the prescribed rough words (Joseph Cohen, "'Emeḳ ha-Melek," p. 84b; comp. Grunwald, "Mitteilungen der Gesellschaft für Jüdische Volkskunde," v. 62). Lilith likewise appears to men in their dreams; she is the bride of Samael (Schwab, "Angélologie"; comp. Zohar ii. 267b). It is said in a Judæo-German book ("Hanhagat ha-Ḥasidim") printed at Frankfort-on-the-Main in the beginning of the eighteenth century that Lilith deceives men and has children by them; infant mortality is regarded as a consequence of this miscegenation (comp. Grunwald, *l.c.* v. 10, 62). In a certain legend she appears as the Queen of Sheba, who in the guise of a beautiful woman seduced a poor Jew of Worms (Grunwald, *l.c.* ii. 30 *et seq.*). As she was eager to seize new-born infants, mother and child were provided with amulets, which since early times were regarded as an efficient protection against magic and demons; Lilith is the chief figure on the "childbirth tablets" still hung on the walls of the lying-in room in the East and in eastern Europe (see Amulets). The name "Lilith" occurs also in non-Jewish superstitions (Lammert, "Volksmedicin," p. 170; Grunwald, *l.c.* vii., col. 2, n. 4). The conception that she was Adam's first wife (comp. Gen. R. xxiv.; Yer. 'Er. 18b) appears to have been spread through Buxtorf's "Lexicon Talmudicum," *s.v.* Lilith is a clear instance of the persistence of popular superstitious beliefs.

E. G. H.—S. S. L. B.

LILY: Rendering in the Bible of the Hebrew word שושן (I Kings vii. 19) or שושנה (II Chron. iv. 5; Cant. ii. 1; Hosea xiv. 5), which is probably a loan-word from the Egyptian "s-sh-sh-sh-n" = "lotus"; the white lily, *Lilium candidum* Linn., growing wild in the Lebanon and other regions of northern Palestine. In a figurative sense the word "shoshan" is used of the capitals of the pillars and of the molten sea in the Temple (I Kings vii. 19, 26), and in the Mishnah of a nail-head and the knob on the Etrog; in the Targum it connotes "flower" in general.

Sometimes, however, Targumic diction, followed by the Zohar, gives "shoshan" the meaning of "rose."

Described by Ibn Ezra.

The first account of the lily is given by Ibn Ezra in his commentary on the Song of Solomon (comp. Salfeld, "Das Hohelied Salomo's bei den Jüdischen Erklärern des Mittelalters," 1879, p. 68), and is one of the few descriptions of plants in Jewish literature. It runs thus: "It is a white flower of sweet but narcotic perfume, and it receives its name because the flower has, in every case, six [שש] petals, within which are six long filaments." The Midrash alludes once to the abundance of its sap, and David Ḳimḥi says that it has no roots. Abravanel says that dew makes the lily bloom, but rain destroys it. The heart of this flower is directed upward, even though it be among thorns, thus symbolizing the trust in God which should be felt by Israel amid all afflictions (Lev. R. xxiii. 1; Cant. R. ii. 2). The Zohar speaks of the thirteen leaves of the lily which surround the flower as the thirteen attributes of God which encompass Israel. This number is evidently derived from the description of Ibn Ezra with its six petals, six stamens, and one pistil. In the "Tiḳḳunim" (xxv., end; xxvi., beginning) the theme is varied, the "shoshannah" being taken as denoting both the lily and the rose. The lilies among which the beloved feeds (Cant. ii. 16) are the morning and evening Shema'; the five leaves of the rose are the first five words of the Shema'; and the thirteen leaves of the lily the numerical equivalent of "eḥad," the last word.

The identifications of the "lily-of-the-valleys" (*ib.* ii. 1) and the "royal lily" of the Syriac translation of Ecclus. (Sirach) xxxix. 14 and the Mishnah (Kil. v. 8; "Tiḳḳunim," iii. 78, l. 2) are uncertain, although the latter has been regarded plausibly as a species of *Fritillaria*.

The lily as the chief of flowers seems to have been represented on the shekels and half-shekels ascribed to Simon the Hasmonean; and was common on coats of arms in medieval Spain and in modern times.

Typical Application.

About this flower a rich and abundant symbolism has gathered. The faces of the righteous are as the lily, and exist only for redemption as the lily for perfume; so that the later cabalists employ the flower as a symbol of the resurrection (Gamaliel di Monselice on Pirḳe Shirah, ed. Mantua, p. 96a). Yet most of all the lily typifies Israel. As it withers in the sunlight, but blooms beneath the dew, so Israel withers away except God becomes as dew for her (Hos. xiv. 5), and she is renowned among the nations as the lily among the flowers. The lily among thorns is likened to Rebekah, who remained pure amid evil surroundings (Bacher, "Ag. Pal. Amor." ii. 243), and to the sons of Korah (Ps. xlv. 1 [A. V., heading]). While it was as difficult to save the Israelites from the Egyptians as a lily from the thorns (Bacher, *l.c.* ii. 76), yet they remained faithful among those that worshiped strange gods, as the lilies keep their beauty despite gashes and wounds (Targ., Cant. ii. 1). The title of Ps. lxxx. is supposed by Aḥa of Lydda to refer to the lily; and the passage in Ps. cxxx. 1, "Out of the depths," is explained by him as an allusion to the lily-of-the-valley. The phrase "set about with lilies" (Cant. vii. 2) is applied by the Haggadah to the words of the Law; but it is more usually regarded as alluding to the seventy elders of the Sanhedrin. In a funeral oration R. Simeon b. Laḳish (Bacher, *l.c.* i. 401) interprets Cant. vi. 2 thus: "My beloved" is God, who has descended into "his garden," the world, to the "beds of spices," Israel, to feed in "the gardens," the nations of the world, and to gather the "lilies," the righteous whom he removes by death from the midst of them. Similar allegorical interpretations are common, even as late as Enoch Zundel Luria in the middle of the nineteenth century. The symbolism of the lily has passed from the Jews to the Christians, so that the angel of the Annunciation is conventionally represented as bearing lilies without filaments.

E. G. H. I. Lö.

LIMA, MOSES B. ISAAC JUDAH: Lithuanian rabbinical scholar, one of the so-called Aḥaronim; born in the second decade of the seventeenth century; died about 1670. When a comparatively young man he successively occupied the rabbinates of Brest-Litovsk and Slonim. His fame as a scholar soon reached Wilna, whither he was called, in 1650, to fill the office of chief rabbi. Lima was of a retiring and diffident disposition, which probably accounts for the paucity of his writings. He left a manuscript commentary on Shulḥan 'Aruk, Eben ha-'Ezer, which his son Raphael published (1670) under the title of "Ḥelḳat Meḥoḳeḳ," and which, while betraying profound erudition, was so condensed that the editor deemed it necessary to provide it with explanatory notes. Lima did not carry even this work to completion; it covers only the first 126 chapters of the Eben ha-'Ezer.

H. R. S. M.

LIMERICK: Seaport town in Ireland, in which Jews began to settle about 1881, after the Russian exodus. A synagogue was founded in 1889 in Colooney street, and in the same year a biḳḳur ḥolim. In 1901 it was found necessary to establish a Jewish board of guardians. On Jan. 11, 1904, Father Creagh, of the Redemptorist Order, delivered a violent sermon against the Jews, accusing them of ritual murder, of blaspheming Jesus, and of robbing the people of Limerick. On the following day there was a riot in which the Jews were attacked by mobs, and this was followed by a general boycott by the local Roman Catholic confraternity, numbering about 6,000 members. The chief ground for complaint against the Jews was the "weekly-instalment plan" by which they sold their goods. The outburst against the Jews drew forth many protests from Protestant and Roman Catholic clergy and laymen. The Jews of the locality suffered much from the boycott. Limerick has a population of 45,806, of which about 300 are Jews.

LIMOGES. See France.

LINCOLN: County town of Lincolnshire, England; formerly the second town of importance in the country, and on that account largely populated by Jews in the preexpulsion period. They appear to have settled on the Steep Hill, between the old Roman colony and the new castle and cathedral. The earliest mention of them occurs in 1159, when the sheriff of Lincolnshire renders count of £40 for the Jews of Lincoln in the pipe-roll of that year.

Aaron of Lincoln conducted his extensive operations from this town as a center; and his house, though considerably "restored," still remains as one of its earliest antiquities (see Aaron of Lincoln). He took in pledge the plate of Lincoln Minster (Giraldus Cambrensis, "Opera," ed. Dymock, vii. 36). During the outbreaks against the Jews at the beginning of the reign of Richard I. the Lincoln Jews saved themselves by seeking refuge in the castle. The influence of St. Hugh, Bishop of Lincoln, may have had some effect in restraining the mob. At any rate, Jews mourned his death sincerely in 1200 (Jacobs, "Jews of Angevin England," p. 207). It would appear that Moses b. Isaac, author of the "Sefer ha-Shoham," was the son of a Lincoln Jew, his mother being Contessa of Cambridge. Much business was done not only by Aaron of Lincoln, but also by Benedict fil Isaac, as well as by Aaron's brothers Senior and Benedict, and his sons Elias, Abraham, and Vives. In the Nottingham "donum" of 1194 Lincoln comes second in point of tribute—£287 4s. 11d., as against £486 9s. 7d. for London—but the number of Jewish names mentioned in Lincoln is the largest. Aaron and his family possessed a considerable number of houses in the precincts of the Bail. Those belonging to Aaron himself escheated to the crown on his death, and were declared to be above 60s. in value. The houses of his brother Senior also became the property of the crown; but their value was only 10s.

The Jewish Quarter, Lincoln, Circa 1290.

(From Jacobs' "Jewish Ideals.")

Thirteenth Century.

About 1220 a raid seems to have been made upon the Jews' houses in Lincoln, Mosse de Ballio, as well as Sara, the wife of Deulacresse, having been murdered in that year. In the middle of the thirteenth century the most important Lincoln Jew was Benedict fil Mosse, who is undoubtedly to be identified with Berechiah de Nicole mentioned among the Tosafists. There is also a Joce de Nicole mentioned; and in the celebrated case of Hugh of Lincoln reference is made to the school of Peitevin, from which it seems probable that there was a bet ha-midrash at Lincoln. Several Hebrew "sheṭarot" exist dealing with the transactions of the Jews of Lincoln, mainly with the Abbey of Neusome. When Henry III. tallaged the Jews of Lincoln, several men were made responsible for the tallage, among them Leo of Lincoln, said to be, at the time, one of the six richest Jews in England. He was also concerned with the debts of the Abbey of Neusome. Leo was condemned for some crime; and his house in the parish of St. Martin's escheated to the crown in 1275. In 1255 occurred the case of Hugh of Lincoln, which resulted in considerable loss of life to the Jewish community. Many of these victims are referred to in later deeds with the title "ha-ḳadosh" or "martyr."

During the uprising of the barons in 1266 the "disinherited" attacked the Jewry of Lincoln, mainly for the purpose of destroying the deeds of indebtedness which tended to put the baronage in the king's power. It is probable that the chest of the chirographers of Lincoln was burned at this time ("Select Pleas," ed. Rigg, p. 41). Berechiah de Nicole had a son, Ḥayyim or Vives, and a daughter, Belaset, probably identified with the Belaset of Wallingford whose house is the better known of the two Jews' houses at Lincoln. She was executed in 1287 for clipping coin. The betrothal deed of her daughter still exists, in which an elaborate written copy of the Hebrew Scriptures is one of the most important items of the dowry.

At the expulsion in 1290 no less than sixty-six householders of Lincoln left deeds, bonds for money, corn, or wool, aggregating in money £423 15s.; in corn £601 9s. 4d.; and in wool £1,595 6s. All of these fell into the hands of the king, besides thirty houses the exact value of which can not be ascertained. Most of the houses were in the Braunce-gate or in St. Martin's parish, where indeed the ghetto seems to have been. No Jewish community has been formed in Lincoln since 1290.

LINDAU, BARUCH BEN JUDAH LÖB: German mathematician; born at Hanover in 1759; died at Berlin Dec. 5, 1849. He wrote: "Reshit Limmudim," a text-book of natural science (part i., physics and geography, Berlin, 1789; Brünn, 1796; Cracow, 1820; part ii., natural philosophy, with additions by Wolf ben Joseph [Joseph Wolf of Dessau], Dessau, 1810; complete ed. Lemberg, 1869); "Shir Ḥatunnah," epithalamium in honor of Judah ben Solomon of Hanover (n.d., n.p.).

D. S. Man.

LINDO: One of the oldest and most esteemed of London Sephardic families; it traces its descent back to Isaac Lindo, who died in 1712. For eight successive generations a member of the family has been a sworn broker of the city of London. See family chart on following page.

LINDO, ALEXANDER: English merchant; died in London in 1818. He was connected with the West India trade, and in this connection entered into relations with Napoleon after the Treaty of Amiens, arranging for the shipment of goods to the value of £260,000 to the French West Indies for the use of the troops commanded by General Leclerc. The latter drew a draft on Paris for the amount, but this was dishonored on a frivolous pretext, and Lindo does not appear to have ever obtained his money. He died in financial difficulties; his bequest to the Bevis Marks Synagogue was never paid. His son **Abraham Alexander Lindo** wrote a pamphlet entitled "A Word in Season" (London, 1839), but he was prohibited by the Mahamad from publishing anything more.

BIBLIOGRAPHY: Picciotto, *Sketches of Anglo-Jewish History*, pp. 273-328, London, 1875.

J.

LINDO, DAVID ABARBANEL: English communal worker; born in London Aug. 14, 1772; died there Feb. 26, 1852. He was an uncle of Lord Beaconsfield, whom he initiated into the covenant of Abraham, and was intimately connected with the Bevis Marks Congregation, representing the rigidly legal standpoint against the struggle for Reform. At its beginning in 1838 he helped to found and became chairman of a society called "Shomere Mishmeret Akodesh," formed to resist all innovations and oppose Reform tendencies; but the Yehidim ordered the dissolution of the society as likely to lead to disunion. Lindo had no less than eighteen children, eight of whom married into well-known Sephardic families.

J.

LINDO, ELIAS ḤAYYIM: English author and historian; born in 1783; died in London June 11, 1865. He spent the first half of his life in the island of St. Thomas, where he married and became one of the leading merchants. He was president of the Hebrew congregation and acted also in the honorary capacity of mohel for many years.

Lindo settled in England about 1832 and began a series of literary labors. He translated the "Conciliador" of Manasseh ben Israel (London, 1842). In 1832 he published his "Calendar," a reissue of which appeared in 1860. The tables are preceded by an essay on the structure of the Jewish calendar; and appended is a collection of general information. His last published work was the "History of the Jews of Spain and Portugal" (*ib.* 1849), for which he visited the Iberian Peninsula and obtained

Pedigree of the Lindo Family.

much of his information from original sources; it still retains some value. He furthermore made manuscript translations into English of some of the masterpieces of Hebrew literature, including Baḥya's "Hobot ha-Lebabot"; Judah ha-Levi's "Cuzari"; Isaac Aboab's "Menorat ha-Ma'or." The manuscripts are now in the possession of Jews' College, London.

Lindo was several times warden of the Portuguese congregation of London, and compiled a complete catalogue of all the works in its library, with biographical memoranda of their authors.

J. G. L.

LINDO, MARK PRAGER: Dutch writer; born in London Sept. 18, 1819; died at The Hague March 9, 1879. He went to Holland in 1838 as teacher of English, first at Arnhem, and then at the Military Academy at Breda; and he studied Dutch literature at Utrecht University (D.Litt. 1854). He was inspector of schools in South Holland from 1865 until his death. Lindo took a somewhat important position in Dutch literature as a mediator between Holland and England. He translated Dickens, Thackeray, Fielding, Sterne, and Scott in versions which were more distinguished for vigor than accuracy. He wrote a number of novels under the pseudonym "De Oude Heer Smits," among them being "Afdrukken van Indrukken" (1854; his most popular work; written in conjunction with Lodewyk Mulder); "Brieven en Ontoezemingen" and "Familie van Ons" (1855); "Typen" (1871). With Lodewyk Mulder also he published the weekly "Nederlandsche Spectator." Lindo wrote a history of England in Dutch (2 vols., 1868–74). His collected works, edited by Mulder, appeared in five volumes (Amsterdam, 1879).

LINDO, MOSES: Planter and merchant in South Carolina; born probably in England; died at Charleston, S. C., April 26, 1774. He seems to have been considered one of the foremost experts in the cochineal and indigo trade in London. Becoming interested in the prospects of the indigo industry of South Carolina, he removed to Charleston in Nov., 1756, and at once announced his intention of purchasing indigo for the foreign market. His advertisements appear repeatedly in the "South Carolina Gazette" for 1756. He soon became a wealthy planter and slave-owner and ranked among the prominent merchants of Charleston. He did more than any other individual to encourage and advance the indigo industry of the colony, among the most important industries in South Carolina in prerevolutionary times. His transactions were enormous, and in 1762 he was appointed "Surveyor and Inspector-General of Indigo, Drugs, and Dyes," an office he resigned in 1772.

Lindo seems to have been a man of scientific attainments, and his experiments with American dyes commenced as early as 1757. He maintained a correspondence with Emanuel Mendez da Costa, librarian of the Royal Society and one of the foremost naturalists of his day. The "Philosophical Transactions of the Royal Society" (liii. 238, paper 37) contains "An account of a New Die from the Berries of a Weed in South Carolina: in a letter from Mr. Moses Lindo dated at Charlestown, September 2, 1763, to Mr. Emanuel Mendez da Costa, Librarian of the Royal Society."

An item in the "South Carolina Gazette" (March 15, 1773) states that Lindo purchased a stone which he believed to be a topaz of immense size, and that he sent it to London by the Right Hon. Lord Charles Greville Montague to be presented to the Queen of England. A number of Lindo's advertisements and of items concerning him in the "South Carolina Gazette" have recently been collected by Rev. B. A. Elzas, and reprinted in the "Charleston News and Courier," Jan. 18, 1903.

LINEN: Cloth made of flax. The Biblical terms are "bad" (LXX. *λίνεος*; A. V. "linen"), "shesh," and "buẓ" (LXX. *βύσσος* or *βύσσινος*; A. V. "fine linen"). In the construction of the Tabernacle linen was used for the inner cover (Ex. xxvi. 1); the hanging or screen closing the entrance to the Tabernacle (Ex. xxvi. 36); the veil which divided the "Holy" from the "Holy of Holies" (Ex. xxvi. 31); and the hangings of the court together with the curtain for the entrance to it (Ex. xxvii. 9, 16, and parallels). It was used also in the priests' vestments (Ex. xxviii. 42, xxxix. 27–29; Lev. xvi. 4). According to II Chron. iii. 14 (comp. ii. 14), a curtain of buẓ also divided the Holy of Holies ("debir") from the Holy in the Temple of Solomon; and from I Macc. (i. 22, iv. 51) and Josephus ("B. J." v. 5, §§ 4 *et seq.*) it can be seen that in the two succeeding Temples both the Holy and Holy of Holies were divided by curtains of byssus.

From Ex. xxxix. 27–29, compared with Ex. xxviii. 42 and Lev. xvi. 4, it would appear that "bad" and "shesh," the latter being identified with Coptic "shens" and first mentioned in connection with Egypt (Gen. xli. 42), are, if not identical, manufactural varieties of the same substance. "Buẓ," again, which occurs only in later books, is assumed to be a later equivalent of "shesh" (comp. II Chron. ii. 14, iii. 14, v. 12 with Ex. xxv. 4, xxvi. 31, xxviii. 42, etc.); in I Chron. xv. 27 it corresponds to "bad" in II Sam. vi. 14. It may also be a different local name for the same fabric (comp. Ezek. xxvii. 7 and 16).

The view of many modern exegetes that the Hebrew terms denote "linen" is supported not only by the Septuagint renderings of *λίνεος* and *βύσσος*, which latter generally means "linen" (comp., for instance, Herodotus, ii. 86; Thomson, "Mummy Cloths of Egypt," in "London and Edinburgh Philosophical Magazine," 3d series, vol. v., p. 355; Budge, "The Mummy," p. 190, Cambridge, 1893), but also by the facts that in the Temple of Ezekiel the priests, while ministering, wore linen garments (Ezek. xliv. 17), and that cotton is mentioned in the Old Testament under the name of "karpas" (Esth. i. 6). Still, as the ancients did not always sharply distinguish between linen and cotton, it is possible that both were used in the Sanctuary and that the terms designate in general "white stuff."

It was enacted that garments should be made of only one kind of stuff (Lev. xix. 19), and later tradition (Josephus, "Ant." iii. 6, §§ 1 *et seq.*; 7, §§ 1 *et seq.*; *idem*, "B. J." v. 5, § 7; Philo, "De Vita Moysis," ii. 151; *idem*, "Duo de Monarchia," ii. 225 [ed. Mangey]) and the Talmud have it that only wool (for the variegated ornaments) and linen entered into the textiles used in the Tabernacle and Temple (comp. Yoma 34b; Kil. ix. 1; comp. also Ibn Ezra on Ex. xxv. 4). According to Josephus ("Ant." xx. 9, § 6), Agrippa II. permitted the Levites also to wear linen garments (comp. II Chron. v. 12; see Sha'aṭnez).

LINETZKI, ISAAC JOEL: Russo-Yiddish humorist; born at Vinnitza Sept. 8, 1839, in which town his father, Joseph Linetzki, was a Ḥasidic rabbi. At the age of eighteen Isaac ran away from home and went to Odessa. Thence he intended to go to Breslau to study at the rabbinical seminary, but was intercepted at the frontier by his father's fanatical friends, who forced him to return home. Linetzki then attended the rabbinical school at Jitomir (1862–63); and while there he wrote his first poems, which were published in his "Beizer Marshelik" (Odessa, 1868). Zweifel and Slonimsky took a great interest in Linetzki, who on the latter's recommendation obtained a position in the office of M. Weinstin at Kiev.

In 1866 Linetzki became a contributor to "Ḳol Mebasser," a Yiddish weekly published in Odessa, and in 1868 he began the publication of his famous novel "Das Polische Jüngel." The success of this work was unprecedented in Yiddish literature. Being a true account of the life of a Ḥasidic youth and entirely based upon actual experience, "Das Polische Jüngel" is, in the opinion of the most eminent critics, one of the best humoristic works in Yiddish (L. Wiener, "Hist. of Yiddish Literature," p. 165).

In 1875 Linetzki published at Lemberg conjointly with Goldfaden a Judæo-German weekly, "Yisrolik." In 1876–77 he published his "Pritshepe" and "Statek," and the first number of his calendar, which he continued to issue for a number of years. In the period between 1882 and 1888 he published several works, including "Amerika zi Erez Isroel"; a geography of Palestine; and translations of Lessing's "Nathan der Weise" and Grätz's "Gesch. der Juden." His "Worem Chrein," a sequel to "Das Polische Jüngel," was published as a serial in the "Jüdische Volksbibliotek" (1888, vol. i.). Shorter sketches from his pen have appeared in the "Familienfreund," in the "Hausfreund," and in the "Volksfreund."

H. R. M. Z.

LION.—Biblical Data: There are several names for the lion in the Old Testament (comp. Job iv. 10 *et seq.*): "aryeh," or "ari," which is the most general name; "labi'" and "lebiyah," for the old lion and lioness; "kefir" and "gur," for the young, strong lion and whelp respectively; while "layish" and "shaḥal" occur in more poetic diction.

The lion is one of the most frequently mentioned animals in the Bible, which would indicate its former abundance in Palestine. Its favorite haunts were the bushy environments of the Jordan (Jer. xlix. 19, l. 44; Zech. xi. 3), caves and thickets (Jer. iv. 7, xxv. 38; Ps. x. 9, xvii. 12), in general the woods (Jer. xii. 8; Amos iii. 8) and the desert (Isa. xxx. 6). Place-names which may be connected with the lion are: Arieh (II Kings xv. 25), Lebaoth and Beth-lebaoth (Josh. xv. 32, xix. 6), Chephirah (Josh. ix. 17, xviii. 28; Ezra ii. 25; Neh. vii. 29), and Laish, the original name of northern Dan (Judges xviii. 29).

Many habits of the lion are incidentally mentioned in the Old Testament. The male assists in the rearing and training of the young (Ezek. xix. 2; Nah. ii. 13); it lies in wait in secret places (Deut. xxxiii. 22; Lam. iii. 10); growls over its prey (Isa. xxxi. 4); breaks the bones of its victims (Isa. xxxviii. 13), and carries them to its lair (Gen. xlix. 9). It not only was the terror of flocks (Mic. v. 8), but also attacked men (I Kings xiii. 24, xx. 36; II Kings xvii. 25). It was, however, fought by shepherds with sling and staff (I Sam. xvii. 34; Amos iii. 12), and was sometimes killed by daring men (Judges xiv. 5; II Sam. xxiii. 20). From Ezek. xix. 4, 8 it may be inferred that the usual manner of catching the animal alive was by pit and net. The custom of Oriental kings of throwing those fallen into disgrace to lions which were kept in dens, is illustrated in Dan. vi. 8 *et seq.*

The lion is the emblem of strength, courage, and majesty (Prov. xxii. 13, xxvi. 13, xxx. 30). Judah is compared to a lion (Gen. xlix. 9); so also are Gad and Dan (Deut. xxxiii. 20, 23), Saul and Jonathan (II Sam. i. 23), Israel (Num. xxiii. 24, xxiv. 9), and even God Himself (Isa. xxxi. 4; Hos. v. 14, xi. 10). Similes are derived from its terrific visage (I Chron. xii. 9), and especially from its terror-inspiring roar. The latter is ascribed to enemies (Isa. v. 29; Zeph. iii. 3; Ps. xxii. 13; Prov. xxviii. 15); to false prophets (Ezek. xxii. 25); to the wrath of a king (Prov. xix. 12, xx. 2); to God (Jer. xxv. 30; Joel iv. 16; Amos i. 2, iii. 8). In the Psalter the lion is often the symbol of the cruel and oppressive, the mighty and rich (*e.g.*, Ps. x. 9, xxxiv. 11, xxxv. 17).

As an element of decorative art the figure of the lion entered into the design of the brazen Laver in the Temple of Solomon and of Solomon's throne (I Kings vii. 29, x. 20, and parallels).

E. G. H. I. M. C.

——**In Rabbinical Literature:** The Talmud states six names of the lion, namely: "aryeh," "kefir," "labi'," "layish," "shaḥal," and "shaḥaf" (Sanh. 95a; Ab. R. N. xxxix., end). The most general terms, however, are "are," "arya'" (B. Ḳ. 4a), and "aryeh"; for the lioness, "lebiyah" (B. Ḳ. 16b), "guryata" (Shab. 67a), and "kalba" (Yalḳ. ii. 721); and for the young lion, "gurya"

(Sanh. 64a). In Ḥul. 59b an animal called "ṭigris" is defined as "the lion of Be-'Ilai" (א' דבי עילאי). By "Be-'Ilai" is probably meant a mountain height or mountain forest, perhaps specially the Lebanon (comp. "bala," *ib.* 80a, and see GOAT); and if by "ṭigris" the tiger is meant, it would appear that the Talmudical writers did not know this animal from personal observation, and it was therefore endowed by them with fabulous proportions and qualities. Thus it is said in the same passages that the distance between the lobes of its lungs was nine cubits, and that its roar at a distance of 400 parasangs brought down the walls of Rome. Kohut ("Ueber die Jüdische Angelologie und Dämonologie," etc., p. 103; comp. also *idem*, "Aruch Completum," iv. 15) surmises that "ṭigris" is the Persian "thrigaṭ," *i.e.*, the mythical three-legged animal (comp. also Schorr in "He-Ḥaluẓ," vii. 32).

The lion is often enumerated among the dangerous animals (B. Ḳ. 15b and parallels). It is especially dangerous in rutting-time (Sanh. 106a). It begins to devour its prey alive (Pes. 49b), carrying part of it to the lair for the lioness and the whelps (B. Ḳ. 16b; Sanh. 90b). Sometimes, however, the lion will stay among flocks without injuring them (Ḥul. 53a); it attacks man only when driven by hunger (Yeb. 121b), and never two men when they are together (Shab. 151b). Though the lion can be tamed (Sanh. 15b; comp. the expression "ari tarbut," B. Ḳ. 16b), it is, on account of its dangerousness, kept in a cage (Shab. 106b), and when so confined is fed with the flesh of wild asses (Men. 103b). It is forbidden to sell lions to the pagans because the latter use them in their circuses ('Ab. Zarah 16a). In passing a lion's den ("gob") one should recite a benediction of thanksgiving in memory of the miracle which happened to Daniel when he was thrown into such a den (Ber. 57b). The term of gestation of the lion is three years (Bek. 8a). Its tormentor is the "mafgia'," or little Ethiopian gnat (Shab. 77b). For the medicinal use of the milk of the lioness see Yalḳ. 721.

The Talmud makes about the same figurative use of the lion as does the Old Testament. The lion is the king of animals (Ḥag. 13b) and the symbol of true mental greatness; and in this regard it is contrasted with the fox (Shab. 111b; Ab. iv. 15; Giṭ. 83b); it is the type of strength and awe (Pes. 112a; Shebu. 22b; B. Ḳ. 85a). The sound of God's voice is likened to the roaring of the lion (Ber. 3a, b). The name of the lion is applied to God, Israel, and the Temple (comp. Isa. xxix. 1: "ariel"; Pesiḳ. R. 28 [ed. Friedmann, p. 133] and parallels). The lion also symbolizes the mighty spirit of temptation and seduction to idolatry (Sanh. 64a; comp. I Peter v. 8). The Temple of Ezekiel is compared to the lion in its structure, both being broad in front and narrow behind (Mid. iv. 7). The lion is also the fifth sign ("Leo") of the zodiac, corresponding to the fifth month, Ab (Pesiḳ. R. *l.c.*; Yalḳ., Ex. 418).

LION, HENRI JULIUS: Dutch journalist; born March 23, 1806, at Elberfeld; died Oct. 19, 1869. In 1824 he entered the Prussian army, and in 1830 that of Holland. In 1834 he went to India, and was honorably discharged as an officer at his own request in 1841. After this he devoted himself to industrial enterprises, having acquired a great practical knowledge of Indian affairs. He was the Nestor of Indian journalism, being the founder of the "Bataviaasch Handelsblad." To his great perseverance must be ascribed the appointment of a committee to consider the establishment of a railway in Java.

S. E. SL.

LION, ISAAC JACOB: Dutch journalist; born at Amersfort Dec. 17, 1821; died at The Hague Aug. 27, 1873. Settling in Amsterdam, he occupied himself with literary work, and became in 1840 editor of the "Handelsblad." In 1849 he applied himself to stenography, and in the following year was appointed shorthand writer to the Second Chamber (Tweede Kamer der Staten Generaal). Jointly with the lawyer D. Leon he established in 1850 the weekly "De Gemeente Stem." He was also correspondent for several weeklies and dailies. In 1856 he became editor of the "Indier," and in 1860 proprietor of the "'sGravenhaagsche Nieuwsbode," which paper he combined with the "Indier" and published as the "Dagblad van 'sGravenhage en Zuid-Holland." This paper is still (1904) in existence.

LIPINER, SIEGFRIED: Austrian poet; born at Yaroslav, Galicia, Oct. 24, 1856; educated at the gymnasia in Tarnow and Vienna and at the universities of Leipsic and Strasburg. In 1881 he was appointed librarian to the Austrian Reichsrath, which post he still occupies (1904). In 1894 the title of "Regierungsrath" was conferred upon him. Lipiner has written: "Der Entfesselte Prometheus" (1876); "Renatus" (1878); "Das Buch der Freude" (1880); "Totenfeier" (1887), all published at Leipsic. In 1883 he translated the "Pan Thaddeus" of Mickiewitz, and in 1886 wrote the libretto for Goldmark's "Merlin."

BIBLIOGRAPHY: *Meyers Konversations-Lexikon.*

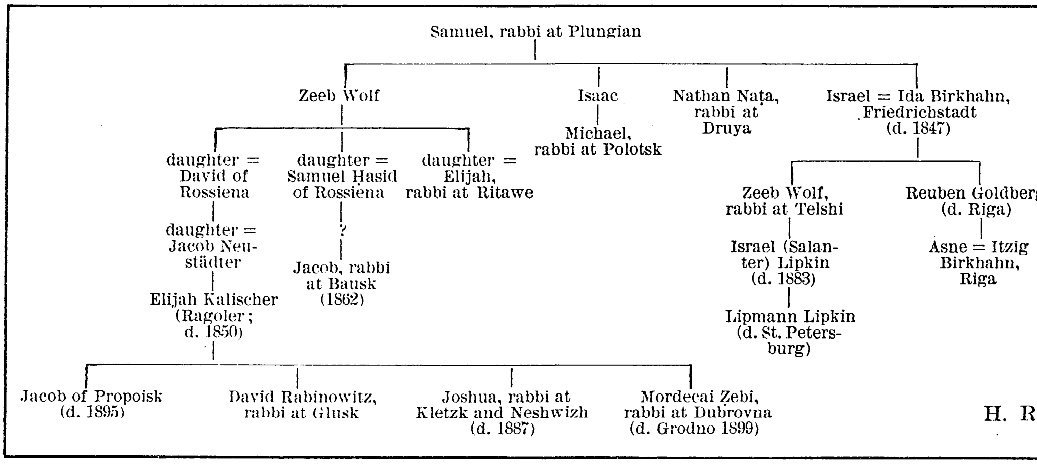
LIPKIN: Russo-Jewish family which derives its origin from Dob Bär Lipkin, rabbi of Plungian in the first half of the eighteenth century (see Ezekiel Katzenellenbogen, "Keneset Ezekiel," No. 7). The pedigree of the most important members of the family will be found on the following page.

Israel Lipkin (known as **Rabbi Israel Salanter,** after his place of residence, Salaty): Russian rabbi; born at Zhagory at the beginning of the nineteenth century; died at Königsberg, Prussia, Feb. 2, 1883. He received his first training from his father, Zeeb Wolf, who was rabbi at Zhagory. After his marriage Lipkin settled at Salaty, where he continued his studies under Rabbi Hirsch Broda and Rabbi Joseph Zundel (died in Jerusalem 1866). Zundel exerted a deep influence on the development of Lipkin's character; and the latter showed his appreciation of his teacher by referring to him in the preface to his periodical "Tebunah" as the light which he followed all his days.

In 1842 Lipkin was called to Wilna as head of the yeshibah Tomeke Torah. During his incumbency he established a new yeshibah at Zarechye, a suburb of Wilna, where he lectured for about three years.

Lipkin's great service lay in his insistence on the practical application of the moral teachings of Judaism and in his emphasis of the necessity of manual labor on the part of the Jews. He established societies for the study of religious ethics, with but little regard for worldly affairs; and at his suggestion the works on religious ethics of Moses Ḥayyim Luzzatto, Mendel Lefin, and Solomon ibn Gabirol were reprinted at Wilna.

When, in 1848, the Russian government established the rabbinical school at Wilna, Lipkin declined an invitation to become instructor in Talmud and rabbinical law. He settled in Kovno and established a yeshibah, connected with the bet ha-midrash of Hirsch Naviazsky, of which he retained charge until 1857, when failing health compelled him to remove to Germany for medical treatment. He remained in the house of the philanthropists, the Hirsch brothers of Halberstadt, until his health improved, and then (in 1861) began the publication of the Hebrew monthly "Tebunah," devoted to rabbinical law and religious ethics. On account of his failing health this periodical was discontinued at the end of a year, and Lipkin again lived for a time the life of a wanderer, visiting yeshibot and offering advice to teachers and students wherever his assistance was sought. Toward the end of his life Lipkin was called to Paris to organize a community among the Russian immigrants, and he remained there for two years.



Samuel, rabbi at Plungian
Zeeb Wolf
Isaac
Nathan Nata, rabbi at Druya
Israel = Ida Birkhahn, Friedrichstadt (d. 1847)
daughter = David of Rossiena
daughter = Samuel Ḥasid of Rossiena
daughter = Elijah, rabbi at Ritawe
Michael, rabbi at Polotsk
Zeeb Wolf, rabbi at Telshi
Reuben Goldberg (d. Riga)
daughter = Jacob Neustädter
?
Jacob, rabbi at Bausk (1862)
Israel (Salanter) Lipkin (d. 1883)
Asne = Itzig Birkhahn, Riga
Elijah Kalischer (Ragoler; d. 1850)
Lipmann Lipkin (d. St. Petersburg)
Jacob of Propoisk (d. 1895)
David Rabinowitz, rabbi at Glusk
Joshua, rabbi at Kletzk and Neshwizh (d. 1887)
Mordecai Ẓebi, rabbi at Dubrovna (d. Grodno 1899)
H. R.

Pedigree of the Lipkin Family.

Lipkin was a singular combination of the ultra-Orthodox Jew and the man of the world, particularly in regard to the duties of citizenship. He preached love for the fatherland and respect for the laws of the country. When the ukase making military service universally obligatory appeared, Lipkin wrote an appeal to the rabbis and community leaders urging them to keep lists of recruits so as to leave no pretext for the contention that the Jews shirked such service. He was considered one of the most eminent Orthodox rabbis of the nineteenth century because of his broad Talmudic scholarship, his deep piety, and his personal influence for good; and he was probably the only rabbi of his time that exerted a wide influence on his fellow rabbis and on the Jewish communities of Russia. His disciples collected and published some of his sayings, commentaries, and sermons in "Eben Yisrael" (Warsaw, 1853) and in "'Eẓ Peri" (Wilna, 1880).

H. R. J. G. L.

Lipmann Lipkin: Russian mathematician; born at Salaty, government of Kovno, 1846; died at St. Petersburg Feb. 9 (21), 1876; son of Israel Salanter. Lipkin's early training consisted in the study of the Bible, the Talmud, and other religious books. At an early age he began to show a decided inclination for scientific subjects, particularly mathematics. Not knowing any European language, he had to derive his information from Hebrew books alone. Notwithstanding the incomplete nature of such sources, and without other aid, Lipkin not only succeeded in mastering the elementary sciences, but also acquired a knowledge of the higher mathematics. He also began the study of modern languages, especially German and French. Subsequently he went to Königsberg, where through the influence of Professor Rischelo he was admitted to the lectures. Somewhat later Lipkin entered the Berlin Gewerbe-Academie, and then Jena University, where he received the degree of Ph.D., his dissertation being "Ueber die Räumlichen Strophoiden." From Jena Lipkin went to St. Petersburg, and because of his great ability was permitted to take the examination for master of mathematics in spite of the fact that he possessed only the degree of "candidate," had not studied in any Russian school, and was not even thoroughly conversant with the Russian language. In 1873 he passed his examination brilliantly. His dissertation was almost completed when he was attacked by smallpox, of which he died.

Lipkin's name first became known in the mathematical world through his mechanical device for the change of linear into circular motion, this mechanism having been invented by him while he was still a pupil at the technical high school. He described his invention in the journal of the Russian Academy ("Mélanges Mathématiques de l'Académie Impériale à St. Petersbourg," 1870), under the title "Ueber eine Gelenkgeradeführung von L. Lipkin." The Russian mathematician Chebyshev had tried to show that an exact solution was impossible; and his views were accepted until Lipkin's discovery proved the contrary. This invention has been described in numerous text-books, such as Collignon's "Traité de Mécanique, Cinématique" (Paris, 1873), where it is called "Lipkin's Parallelogram."

A model of Lipkin's invention was exhibited at the exposition at Vienna in 1873, and was later secured from the inventor by the Museum of the Institute of Engineers of Ways of Communication, St. Petersburg.

Lipkin never lost his deep interest in purely Jewish affairs, as is shown by his contributions to "Ha-Ẓefirah."

LIPMAN, CLARA: American actress; born in Chicago. She made her début as an ingénue with Modjeska in 1888, and subsequently played similar parts in A. M. Palmer's company. She created the principal rôle in "Incog" (1891), but before this had interpreted leading parts in classic drama in various English and German companies. In 1898 she created the part of *Julie Bon Bon* in "The Girl from Paris." With her husband, Louis MANN, she starred for five years, appearing in "All on Account of Eliza," "The Red Kloof," "The Telephone Girl," "The Girl in the Barracks," "Master and Pupil," etc. During the season of 1902-3 she withdrew from the stage on account of an accident to one of her arms. Clara Lipman is the author of a play entitled "Pepi" (1898).

A. F. H. V.

LIPMAN, SAMUEL PHILIPPUS: Dutch jurist; born in London April 27, 1802; died at Hilversum July 7, 1871. He was educated at Glueckstadt, Hamburg, and Amsterdam; studied law at Leyden (1819-22), and in 1823 established himself as a lawyer at Amsterdam, where he soon became famous as a pleader. In May, 1852, he was converted to Roman Catholicism. He then removed to The Hague, and devoted himself after 1862 entirely to religious study.

Lipman published, besides many pamphlets (a complete list of which is given in "Levensberichten"): "Geschiedenis van de Staatkunde der Voornaamste Mogendheden van Europa Sedert den Val van Napoleon," 2 vols., Zutphen, 1834; "Het Nieuwe Testament Vertaald," 's Hertogenbosch, 1859; "Constitutioneel Archief van Alle Koninklijke Aanspraken en Parlementaire Adressen," 4 vols., 1847-63 (2d ed., The Hague, 1864).

S. E. SL.

LIPMANN-MÜLHAUSEN, YOM-ṬOB BEN SOLOMON: Austrian controversialist, Talmudist, and cabalist of the fourteenth and fifteenth centuries. According to Bishop Bodecker of Brandenburg, who wrote a refutation of Lipmann's "Niẓẓaḥon," Lipmann lived at Cracow. But Naphtali Hirsch Treves, in the introduction to his "Siddur," calls him Lipmann-Mülhausen of Prague, adding that he lived in the part of the town called "Wyschigrod." Manuscript No. 223 in the Halberstam collection contains a document issued at Prague in 1413 and signed by Lipmann-Mülhausen, as dayyan.

His Attainments.

It is seen from his "Niẓẓaḥon" that, besides his rabbinical studies, Lipmann occupied himself with the study of the Bible, that he was acquainted with Karaite literature, that he read the New Testament, and that he knew Latin. His authority in rabbinical matters is shown by his circular to the rabbis warning them against the use of any shofar not made of a ram's horn (comp. Luzzatto in "Kerem Ḥemed," vii. 56). There are also responsa addressed to him by Jacob b. Moses Mölln (Neubauer, "Cat. Bodl. Hebr. MSS." No. 907, 5), and Israel Isserlein mentions him ("Terumat ha-Deshen," No. 24) as one of five scholars who met at Erfurt. In 1399 (Aug. 16) Lipmann and many other Jews were thrown into prison at the instigation of a converted Jew named Peter, who accused them of insulting Christianity in their works. Lipmann was ordered to justify himself, but while he brilliantly refuted Peter's accusations, as a result of the charges seventy-seven Jews were martyred on Aug. 22, 1400, and three more, by fire, on Sept. 11 in the same year. Of the accused Lipmann alone escaped death.

His Works.

Lipmann was the author of: "Sefer ha-Niẓẓaḥon," a refutation of Christianity and Karaism and a demonstration of the superiority of rabbinical Judaism; "Zikron Sefer ha-Niẓẓaḥon," a refutation of Christianity, an abstract in verse of the preceding work (pp. 107-117 in the "Tela Ignea Satanæ" of Wagenseil, who supplied a Latin translation and added a long refutation, Freiburg, 1681; Geiger, in Bresslauer's "Deutscher Volkskalender," iii. 48, declares Lipmann's authorship of this poem doubtful); a commentary to the "Shir ha-Yiḥud" (Freiburg, 1560). In Samson b. Eleazar's "Baruk she-Amar" (Shklov, 1804) there is a cabalistic treatise on the Hebrew alphabet, entitled "Sefer Alfa Beta," the author of which is given as מהר"ל שלי"ו. Sachs and Steinschneider concluded that the author was Lipmann-Mülhausen. This work discusses: (1) the form of the letters, (2) the reason for their form, (3) the mystery of their composition, order, and numerical value, and (4) the cabalistic explanation of their form. In this work the author frequently mentions a cabalistic work entitled "Sefer ha-Eshkol" and a commentary to the "Sefer Yeẓirah." Menahem Ẓiyyoni's "Ẓefune Ẓiyyoni" is ascribed, in a pamphlet quoted by Reuben Hoshke (Yalḳ., Reubeni, section "Naso"), to a certain R. Ṭabyomi, whom Steinschneider ("Cat. Bodl." col. 1411) identifies with Lipmann-Mülhausen. Lipmann promises, in his "Niẓẓaḥon" (§ 197), a commentary to Pirḳe Abot, but such a work is not extant. Finally, it may be added that Manuscript 820 in Oppenheimer's collection was supposed to be a Biblical commentary by the author of the "Sefer ha-Niẓẓaḥon," but Dukes ("Orient, Lit." xi. 299) declares that it is nothing else than the "Niẓẓaḥon" itself.

Contents of the "Niẓẓaḥon."

Lipmann's reputation is dependent, mainly, upon his "Niẓẓaḥon." That a rabbi in the fifteenth century should occupy himself with Latin and the New Testament was certainly a rare thing. Lipmann was compelled to justify himself (§ 3) by referring to the saying of R. Eliezer, "Know what thou shalt answer to the heretic" (Abot ii. 14). The whole work consists of 354 paragraphs, the number of days in the lunar year, each paragraph, with the exception of the last eight, beginning with a passage of the Bible, upon which the author founds his argument. Thus his arguments rest upon 346 passages taken from all the books of the Old Testament. The last eight paragraphs contain his dispute with the convert Peter. In the introduction Lipmann says that he divided the work into seven parts to represent the seven days of the week. The part for the first day contains the arguments against Christians; that for the second day those against the Karaite interpretation of the Bible; those for the remaining five days contain severally interpretations of obscure Biblical passages that are likely to mislead students; the reasons for the commandments; arguments against atheists; arguments against the Karaites and their rejection of the Talmud; and an account of the sixteen things which comprehend the whole of Judaism and which, after being indicated in the Pentateuch, are repeated in the Prophets and Hagiographa.

Translations and Refutations.

Very characteristic is Lipmann's refutation of the assumed miraculous birth of Jesus, as well as his demonstration of the falsity of the conclusions of the Christians who claim that the birth of Jesus was foretold by the Prophets. He constantly quotes Maimonides, Ibn Ezra, Naḥmanides, Saadia, Rashi, Shemariah of Negropont, and other ancient scholars. Lipmann must have written his "Sefer ha-Niẓẓaḥon" before 1410, for he expressed a hope that the Messiah would arrive in that year (§ 335). It was first published by Hackspan (Altdorf, 1644), who with great difficulty obtained the manuscript from the rabbi of Schneittach. Wagenseil published, at the end of his "Sota" (Altdorf-Nuremberg, 1674), corrections of Hackspan's edition under the title of "Correctiones Lipmannianæ." Later, the "Niẓẓaḥon" was reprinted, with the addition of Ḳimḥi's "Wikkuaḥ," in Amsterdam (1709 and 1711) and Königsberg (1847). Sebald Snelle published the Hebrew text with a Latin translation and refutation of the paragraph (§ 8) denying the miraculous birth of Jesus (Altdorf, 1643); and at various dates he published Latin translations of the paragraphs directed against Christianity. A Latin translation of the whole work, with the exception of the passages taken from the Pentateuch, was made by John Heinrich Blendinger (Altdorf, 1645). As will be readily understood, the work gave rise to many polemics and called forth replies from Christians. The first was Stephen Bodecker, Bishop of Brandenburg, a younger contemporary of Lipmann, who wrote a refutation of the "Niẓẓaḥon" (comp. Wolf, "Bibl. Hebr." i. 736). The following other refutations are published: Wilhelm Schickard, "Triumphator Vapulans sive Refutatio," etc. (Tübingen, 1629); Stephen Gerlow, "Disputatio Contra Lipmanni Nizzachon" (Königsberg, 1647); Christian Schotan, "Anti-Lipmanniana" (Franeker, 1659), giving also the Hebrew text of the "Niẓẓaḥon."

LIPOVETZ: Town in the government of Kiev, Russia. In 1897 it had a total population of 6,068, of which 4,500 were Jews. There were 670 Jewish artisans and 71 Jewish day-laborers; of the latter 25 engaged in field-work during the harvest season. The economic condition of the Jews there has been unfavorably affected by the abolition of annual and weekly fairs, and in 1900 the poverty of the population became so great that a mob of several hundred collected at the house of the local police official and demanded bread and the reestablishment of the fairs. The Jewish artisans are engaged extensively in the manufacture of a new kind of footwear, one variety of which, worn by the peasantry, is known as "postaly," and another, worn by the more prosperous, as "skorokhody." The 25 ḥadarim afforded instruction to 475 children, and 59 Jewish pupils attended the city school. The Talmud Torah, founded in 1898, had 97 pupils. In 1768 Lipovetz suffered with other Ukrainean towns from the attacks of the Haidamacks.

H. R. S. J.

LIPPE (Lippe-Detmold): Small sovereign principality in northwest Germany, with a Jewish population of 750; total population (1895) 128,515. The earliest traces of Jewish settlement in Lippe date back to the beginning of the fourteenth century. The Jews in the principality of Lippe seem to have enjoyed more privileges and greater security than in other German states. Thus the town council of Lemgo in a document dated 1419 refers to a Jew named Moses as "our fellow citizen." The contribution of the Jewry to the city treasury amounted in 1507 to one hundred florins ($40), a considerable sum in those days. Besides, it had to pay a Jew-tax, which in 1511 was fixed at eighteen gulden. In the year 1500 the "Edelherrn" Bernhard VII. and Simon V. (father and son) permitted Antzell the Jew, with his wife and servants, to reside in Detmold.

A Jewish community was not formed in Detmold until the second half of the seventeenth century. Religious differences seem to have led to a split in the community, for in 1723 the Jews of Detmold asked permission to build a second synagogue. These synagogues, however, were merely rented rooms. In 1742 the community evidently reunited, for it acquired a house and a barn, and constructed out of the latter a synagogue, which is still in use. In 1810, during the regency of the princess Pauline, the Jews in Lippe received family names and were regularly registered. At this time there were 175 Jewish families in Lippe; twenty-seven of these families were resident in Detmold, under Rabbi Abraham Löb Färnbach, succeeded by his son Dr. Enoch Färnbach (Fahrenbach), who officiated until his death (Oct. 5, 1872). The civic rights of the Jews, as well as their systems of school and synagogue, were regulated afresh by the laws of 1858 and 1879. From 1872 (Oct.) to 1879 (March) the rabbinate was provisionally filled by the teacher Leseritz of Detmold and, afterward, by Rabbi Klein of Lemgo.

After this period, consequent upon the steady decrease in the size of the community, the rabbinical position was left vacant. The supervision of religious instruction in the twelve congregations of the principality, comprising about 900 members, some 250 of whom belonged to Detmold, was entrusted to the teacher and preacher Abraham Plaut of Detmold. Detmold is the birthplace of Leopold ZUNZ and of Dr. Abraham TREUENFELS, while Dr. Hermann VOGELSTEIN, at present (1904) rabbi in Stettin, is a native of Lage in the principality of Lippe.

As a benefactor to the Jews in Lippe, and, particularly, of the Detmold community, may be mentioned the court commissioner Solomon Joel Herford (d. Sept. 21, 1816). He was the founder of the Joel Herfordsche Schule, the Joel Herfordsche Milden Stiftungen, and the Jüdische Militär-Unterstützungskasse.

D. A. PL.

LIPPE, CHAIM DAVID: Austrian publisher and bibliographer; born Dec. 22, 1823, at Stanislawow, Galicia; died Aug. 26, 1900, at Vienna. For some time he was cantor and instructor in religion at Eperies, Hungary, but he left that town for Vienna, where he conducted a Jewish publishing-house, which issued several popular works. He himself edited a bibliographical lexicon of modern Jewish literature ("Ch. D. Lippe's Bibliographisches Lexicon der Gesammten Jüdischen Literatur der Gegenwart und Adress-Anzeiger," Vienna, 1881; 2d ed. 1900).

S. E. J.

LIPPMANN, EDOUARD: French engineer; born at Verdun Feb. 22, 1833. Educated at his native town, the lycée at Metz, and the Ecole Centrale des Arts et Manufactures at Paris, he graduated as engineer in 1856. Joining the firm of Degousé & Laurent, architects, he resided in the French capital and took an active part in the defense of Paris as captain of the volunteer engineer corps during the Franco-Pussian war. In 1878 he established himself in Paris, founding the house of Edouard Lippmann & Company. He became especially interested in the boring of deep wells (one bored by his firm at the Place Herbert at Paris was 718 meters deep), especially petroleum-wells, and in the building of bridges, canals, and roads in various parts of the world.

Lippmann has published several essays in the professional papers, especially in the "Genie Civil," and is the author of "Petit Traité de Sondage." He has received several honorable mentions at the international expositions; *e.g.*, at Amsterdam in 1883, and at Paris in 1867, 1878, 1889, and 1900.

Lippmann is an officer of the Legion of Honor.

BIBLIOGRAPHY: Curinier, *Dict. Nat.* ii. 127.

S. F. T. H.

LIPPMANN, EDUARD: Austrian chemist; born at Prague Sept. 23, 1842; educated at the gymnasium of Vienna and the universities of Leipsic and Heidelberg (Ph.D. 1864). He took a postgraduate course at Paris, and in 1868 became privatdocent at the University of Vienna. During 1872 he took charge of the classes of Professor Linnemann at the technical high school at Brünn; in 1875 he was appointed assistant professor of chemistry at Vienna University and chief of the third chemical institute; and in 1877 he was appointed professor of analytical chemistry at the Vienna Handelsakademie, which position he resigned in 1881. He is at present (1904) lecturer of chemistry at the Vienna technical high school.

Lippmann has contributed many essays to the reports of the Vienna Imperial Academy of Sciences and to the professional journals of Europe.

LIPPMANN, GABRIEL: French physicist; born at Hollerich, Luxemburg, in 1845. After being educated at the Ecole Normale and in Germany, he went to Paris, taking the degree of D.Sc. in 1875. During his stay in Germany he had given special attention to electricity, and subsequently invented the capillary electrometer, an electrocapillary motor, etc. In 1891 he discovered the process of color-photography, which discovery he amplified in 1892. He prepared glass slides, which were covered with a very finely granulated bromid-of-silver solution, and which, when dried, were placed in a concave frame filled with quicksilver, giving a mirror-like surface to the solution. When the photograph is taken the light-rays form a wave of light in the solution in conjunction with the rays from the quicksilver-mirror, giving light "maxima" and dark "minima." These when reproduced give, by reflected light, a true picture in the original colors. However, the very long exposure necessary (about ten minutes) makes the process unsatisfactory. This discovery won him recognition. In 1883 he succeeded Briot as professor of physical mathematics at the Sorbonne, and in 1885 he became professor of experimental physics at the same institution. In 1886 he was elected member of the Académie des Sciences, succeeding Dessain. Lippmann has contributed many essays to the professional journals, and is the author of "Cours de Thermodynamique," Paris, 1886, and "Cours d'Acoustique et d'Optique," *ib.* 1888.

LIPPMANN, GABRIEL HIRSCH: German rabbi; born at Memmelsdorf, Bavaria; died at Kissingen May 26, 1864. He went in his early youth to Burgpreppach, where he studied the Talmud under Rabbi Abraham Moses Mayländer. He continued his studies at the yeshibah at Fürth and, under the guidance of Chief Rabbi Hillel Sondheimer, at Aschaffenburg; he received his Ph.D. degree from the University of Würzburg. He then accepted a call as preacher to Aurich, and later became district rabbi in Kissingen.

Lippmann was the editor of: "Sefer Ẓaḥot. Ueber die Feinheiten der Hebräischen Sprache. Grammatische Forschungen von Abraham ibn Esra. Neue Ausgabe mit Hebräischem Commentar," Fürth, 1827; "Sefer ha-Shem. Ueber das Tetragrammaton," *ib.* 1834; "Safah Berurah. Ueber Hebr. Grammatik . . . Abr. ibn Esra, mit Hebr. Commentar," *ib.* 1839; "Sefat Yeter. Beleuchtung Dunkler Bibelstellen . . . von Abraham ibn Esra, mit Hebr. Commentar und Vorwort von I. M. Jost," Frankfort-on-the-Main, 1843.

LIPPMANN, MAURICE: French engineer; born at Ville d'Avray (Seine-et-Oise) Sept. 27, 1847. He received his diploma as bachelor of law in 1869. During the siege of Paris in 1870 he served in the artillery. In 1874 Lippmann was appointed director of the state manufactory of weapons ("manufacture nationale d'armes") at St. Etienne, which position he held for ten years. Resigning in 1884, he retired to private life, living at Bracquemont, near Dieppe. In 1889 he was appointed a member of the commission of military art for the French Exposition of 1890.

Lippmann has published: "L'Art dans l'Armure et dans les Armes." He is an officer of the Legion of Honor.

LIPPOLD: German physician and financier; born at Prague; lived at Berlin in the sixteenth century. He was in great favor with the elector Joachim II., acting as his financial adviser and as administrator of Jewish affairs. After the sudden death of Joachim (1571), his son and successor, Johann Georg, accused Lippold of having poisoned the elector. Being put to the torture of the rack, he confessed this crime; and, although he afterward retracted, he was executed Jan. 28, 1573, the Jews of Berlin and of the province of Brandenburg being expelled from the country in the same year.

LIPSCHÜTZ (LÜPSCHÜTZ, LIPSCHITZ, LIBSCHITZ): Name of a family of Polish and German rabbis; derived from "Liebeschitz," name of a town in Bohemia.

Aryeh Löb Lipschütz: Austrian rabbi and author; lived in the second half of the eighteenth and in the first half of the nineteenth century; died in Brigul, Galicia, before 1849. He was the pupil of Aryeh Löb (author of "Ḳeẓot ha-Ḥoshen") and son-in-law of Moses Teitelbaum, rabbi at Ujhely. He held the office of rabbi in several cities in Galicia, and at last went to Brigul, where he remained till his death. He was the author of "Ari She-be-Ḥaburah" and "Geburot Ari," novellæ on Ketubot, mentioned in "'Emeḳ Berakah," by Joseph Saul Nathanson. Besides these works he wrote "Aryeh debe-'Ilai," containing novellæ on Ḳiddushin, Yoma, Menaḥot, Ḳinnim, and Niddah, as well as responsa on the four parts of the Shulḥan 'Aruk. This work was published in Lemberg.

Baruch Isaac Lipschütz: Son of Israel Lipschütz; born in Dessau; died in Berlin Dec. 18, 1877. He was at first rabbi at Landsberg, and then district rabbi in Mecklenburg-Schwerin, but was obliged to resign both positions in consequence of disagreements with his congregations. Thereafter he lived in private at Hamburg. He wrote "Torath Sch'muel, ein Erbauungsbuch für Israeliten" (Hamburg, 1867).

S. M. K.

Baruch Mordecai b. Jacob Lipschitz (Libschitz): Russian rabbi and author; born about 1810; died at Siedlce, Poland, March 30, 1885. At an early age he became known for his wide Talmudical learning; and later he ranked with the leading rabbinical authorities of his time. Rabbis from all parts applied to him for decisions in regard to difficult questions, and his responsa were characterized by clearness and sound sense. He officiated as rabbi for forty-three years in various cities, including Semiatitz, Wolkowisk, Novogrudek, and finally Siedlce, where he remained till his death.

Lipschitz was the author of: "Berit Ya'aḳob" (Warsaw, 1876–77), responsa on the four parts of the Shulḥan 'Aruk; "Bet Mordekai," sermons; "Minḥat Bikkurim," novellæ on the Shulḥan 'Aruk; and novellæ on the Jerusalem Talmud. The last three works remain in manuscript.

EXECUTION OF LIPPOLD, 1573.

(From a contemporary copperplate.)

his congregation soon compelled him to resign. He wandered about until finally he went to Cracow, where he obtained a rabbinate through the influence of his wife's uncle, Simon Jolles. There, too, he had many enemies, and on the death of Jolles he was obliged to leave Cracow. After some time he became rabbi at Neuwied, where he remained until his death. He wrote "Heshib R. Eli'ezer we-Siaḥ ha-Sadeh," responsa, published together with a number of responsa by his son Israel Lipschütz (Neuwied, 1749), and "Dammeseḳ Eli'ezer," novellæ (to Shulḥan 'Aruk, Yoreh De'ah and Ḥoshen Mishpaṭ) and responsa, among the latter being some written by his brother Ephraim Lipschütz (*ib.* 1749).

Gedaliah ben Israel Lipschütz: Rabbi at Obrzizk, near Posen; flourished in the eighteenth and nineteenth centuries (d. 1826). He was the author of the following works: "Regel Yesharah" (Dyhernfurth, 1776), explanations of Rashi and tosafot to the section Neziḳin, notes on Abot de-Rabbi Natan and on the small tractates of the Talmud, with two supplements treating of weights, measures, and geometry in the Talmud, and explaining the calculations found in Kilayim iii., v.; "Ḥumre Matnita" (Berlin, 1784), divided into six parts ("ḳinnim"), containing a commentary on the Talmud, explanations of all the foreign words found in the Talmud, a commentary on Asheri (Rosh), notes on Alfasi, a commentary on Targum Onḳelos, and explanation of the difficult mishnayot; "Keneset Yisrael" (Breslau, 1818), notes on the Mishnah and on various Talmudical subjects, extracted from several works left by Gedaliah in manuscript, and published by his son Israel Lipschütz.

S. S. I. BR.

Gedaliah ben Solomon Lipschütz: Polish scholar; lived at Lublin in the sixteenth and seventeenth centuries. He was a relative and also a pupil of Meïr of Lublin, whose responsa he edited, adding to them an index (Venice, 1618). He wrote a commentary to Albo's "'Iḳḳarim," entitled "'Eẓ Shatul" (*ib.* 1618). This commentary may be considered a double one; in "Shorashim" the commentator explains the text of Albo, while in the part called "'Anafim" he gives an exposition of Albo's views, comparing them with the views of other philosophers. In the preface, Lipschütz says that he composed the commentary in his twenty-sixth year, but that for various reasons he could not publish it. Later, at the request of friends, he revised his work, which revision he completed at Lublin, Feb. 12, 1617. He compiled an index to the Biblical and Midrashic passages in Albo's text.

Ḥayyim ben Moses Lipschütz: Polish rabbi of the seventeenth century; born at Ostrog about 1620. He wrote "Derek Ḥayyim" (Sulzbach, 1702), a book containing prayers and ritual laws for persons who are traveling, published by some of his pupils. Although the book contains prayers which show that the author was a follower of Shabbethai Ẓebi, it is interesting to know that it had the approbation of eight of the most renowned rabbis of the time.

D. B. FR.

Israel Lipschütz: Son of Eliezer Lipschütz; rabbi at Cleve. There he became notorious in connection with a "geṭ" controversy which attracted the attention of a large number of contemporary Jewish scholars. The dispute arose over a divorce granted by him in August, 1766, which was declared invalid and which the rabbinate of Frankfort-on-the-Main opposed with such persistence and vehemence that it became a "cause célèbre." Israel Lipschütz was severely criticized and stoutly defended. Toward his own defense he published (Cleve, 1770) seventy-three similar decisions, under the title "Or Yisrael," to counterbalance the "Or ha-Yashar" published by Simon Kopenhagen in the previous year at Amsterdam.

Israel Lipschütz: Son of Gedaliah Lipschütz; born 1782; died Sept. 19, 1860. He was rabbi first at Dessau and then at Danzig. He led the life of an ascetic, frequently fasted three days in succession, and studied incessantly. He wrote "Tif'eret Yisrael," a commentary on the Mishnah, in which he applied to the orders a nomenclature of his own: Zera'im he called "Zera' Emunah"; Ṭohorot, "Ṭa'am wa-Da'at" (Hanover, 1830); Neziḳin, "Kos Yeshu'ot" (Danzig, 1845). His ethical will ("Ẓawwa'ah"; 1861) contains twenty-eight paragraphs, consisting chiefly of moral and ascetic precepts. He left in manuscript many notes ("derashot") to Caro's Shulḥan 'Aruk and to Maimonides' Yad ha-Ḥazaḳah, a comprehensive treatise on the order Ṭohorot, and many responsa.

BIBLIOGRAPHY: Walden, *Shem ha-Gedolim he-Hadash*, i. 406, Warsaw, 1864; Steinschneider, *Hebr. Bibl.* iv. 27.

Joshua Aaron Lipschütz: Rabbi at Bützow, Mecklenburg-Schwerin; born in Poland in 1768. He was a correspondent of Jacob Emden ("She'elat Ya'abeẓ," pp. 50 *et seq.*).

S. M. K.

Judah Löb b. Isaac Lipschütz: Austrian rabbi and author of the seventeenth century; rabbi at Eidlitz, Bohemia. He wrote: "Hanhagot Adam," a collection of rules from other works, on daily religious practises (Fürth, 1691; Amsterdam, 1717; Zolkiev, 1770); "Ẓaddiḳ Tamim," a redaction of the former work with many additions (Fürth, 1699; an abridgment of the book was seen in manuscript by Nepi, in Padua); "We-Zot li-Yehudah," explanations added to Jacob Weil's "Sheḥiṭot u-Bediḳot," on the rules of slaughtering cattle (Fürth, 1699; Frankfort-on-the-Main, 1820).

Noah b. Abraham Lipschütz (called **Noah Mindes**): Polish rabbinical scholar; died in Wilna Dec. 22, 1797. He was a prominent member of the Jewish community of Wilna, and married a daughter of Elijah Pesseles. Lipschütz's daughter married Abraham, son of Elijah, gaon of Wilna. Lipschütz was the author of two cabalistic works, "Parpera'ot le-Ḥokmah" (Shklov, 1785), on the Pentateuch, and "Nifla'ot Ḥadashot" (Grodno, 1797), which latter includes cabalistic explanations by R. Samson Ostropoler. Both works were published anonymously. Noah died about three months after Elijah Gaon and was buried near him.

H. R. P. Wi.

Solomon ben Moses Lipschütz: German cantor; born at Fürth about 1675; died at Metz after 1708. He studied at Nikolsburg in the yeshibah of David Oppenheim, and for some time acted as cantor, shoḥeṭ, and teacher at Wallerstein. He then went to Pfersee, and thence to Prague, where he became chief cantor in the Phinehas and Zigeuner synagogues. In 1706 he retired to Frankfort-on-the-Main, but in the following year accepted the position of cantor at Metz, where he died. Lipschütz was the author of "Te'udat Shelomoh" (Offenbach, 1708), a book of morals and laws for cantors, published with the approbation of the rabbi and parnas of Metz.

D. B. Fr.

LIPSCHUTZ, SOLOMON: American chess-player; born at Ungvar, Hungary, July 4, 1863. At the age of seventeen he emigrated to New York, where he soon became known in chess circles. In 1883 he was chosen as one of a team to represent New York in a match with the Philadelphia Chess Club, and won both of his games. In 1885 he won the championship of the New York Chess Club, and in the following year took part in the international tournament held in London, where he succeeded in defeating Zukertorf and Mackenzie, among others. At the Masters' Tournament at New York in 1889 Lipschutz gained the sixth place, he being the only American player to secure a prize. In 1890 he won the championship of the United States, and repeated his success in 1892. He secured for the Manhattan Chess Club the absolute possession of the "Staats-Zeitung" challenge cup by winning it three times in succession (one tie against Steinitz). Twice pitted against Lasker, he has drawn his games on each occasion. Several of the games played by Lipschutz have been published in "Examples of Chess Master-Play" (New Barnet, 1893). Lipschutz revised "The Chess-Player's Manual," and he edited "The Rice Gambit," New York, 1901.

A. A. P.

LISBON: Capital of Portugal. It had the largest Jewish community in the country and was the residence of the chief rabbi ("arraby mor"). It had several "Judarias" or Jewish streets, one of them in the part of the city called "de Pedreira," between the cloisters do Carmo and da Trinidade; another, laid out later, was in the quarter da Conceiçaõ. In 1457 a third Judaria was created, the de Alfama, near the Pedro gate. In the Rua Nova, passing through the most beautiful and the liveliest part of the city, resided the rich and prominent Jews, the large synagogue being in the same thoroughfare. A small synagogue was erected by Joseph ibn Yaḥya about 1260, at his own expense.

For a long period the Jews of Lisbon were left undisturbed. The first storm broke upon them during the war between Dom Ferdinand of Portugal and Henry II. of Castile. The Castilian army forced its way into Lisbon; several Jews were killed, and the Rua Nova was plundered and destroyed by the rapacious soldiery (1373). The grand master of the Knights of St. Bennett of Aviz, later King John I., successor of Dom Ferdinand, protected the Jews in the capital against pillage. As a sign of their gratitude, the Jews, in addition to their contribution to the gift of 10,000 livres made to the king by the city, presented to him 70 marks and made him a loan of 1,000 reis.

Outbreaks Against Lisbon Jews.

The Jews of Lisbon, who in 1462 paid for "serviço real" alone 50,000 reis (about 3,500 francs), were engaged in various mercantile pursuits and trades. When Dom Duarte imposed restrictions upon free intercourse between Jews and Christians, representatives of the Jewish community at Lisbon applied to the king for the removal of the restrictions, and the king granted the request in a letter to the community dated Dec. 5, 1436. The prosperity and consequent luxury of the Jews aroused the envy and hatred of the Christians, even to the point of violence. Toward the end of the year 1449 some young men maltreated several Jews at the fish-market, and the royal corregidor had them publicly whipped. This aroused the anger of the people against the Jews, who were attacked, and a number of whom were killed, despite their brave resistance. Probably the fight would have ended in a terrible massacre but for the armed intervention of the Count de Monsanto. The attack was renewed, and the king was compelled to adopt severe measures against persons convicted of aggressions against the Jews. The profound hatred against the latter was increased by the arrival of immigrants from Castile, who sought shelter at Lisbon.

In 1482 the populace again assailed the Jews, plundered their stores, and destroyed their dwellings; it was at this time that Isaac Abravanel lost his entire possessions, including his valuable library. To increase their troubles, the pestilence broke out simultaneously with the immigration of their coreligionists from Spain. By order of the city council the refugees from Spain were required to leave the city at once; though, through the intervention of the king, John II., the city council was compelled to grant to Samuel Nayas, procurator of the Castilian Jews, the right to stay there, and to the Castilian physician Samuel Judah the right to practise medicine (Rios. "Hist." iii. 338-349). In 1497, by order of King Emanuel, the Jews were driven out of Portugal; the Lisbon community ceased to exist, and the large synagogue was transformed into a church.

Lisbon Scholars.

The number of Jewish scholars of Lisbon is not especially large. Besides the members of the old families Ibn Yaḥya and Negro, who were born in the Portuguese capital and lived and studied there, there were the chief rabbis Judah and Moses Navarro, Judah Cohen, and others, as well as the rabbis Joseph and Moses Ḥayun and a certain Don Abraham, who was a physician and, in 1484, became also rabbi at Lisbon. Lisbon is the birthplace of Isaac Abravanel and his sons, and of Jacob ibn Ḥabib, and at Lisbon lived Joseph Vecinho (physician to King John II.), Abraham Zacuto, and Abraham Ẓarẓar. The learned Eliezer Toledano in 1485 established in this city a Hebrew printing-press, of which several books were the product. Among these was the Pentateuch with the commentary of Moses ben Naḥman (1489). In Lisbon Samuel ben Yom-Ṭob wrote (1410) a Torah roll now preserved in Bern; Samuel de Medina, in 1469, a Pentateuch; and Eliezer, son of Moses Gagos, in 1484, a ritual work for Isaac, son of Isaiah Cohen.

New Christians at Lisbon.

After their expulsion from Lisbon no Jews resided there openly, but there was a large number of "secret Jews," or "Christaõs Novos" (New Christians), who were compelled to attend the Church ceremonies, but in secret lived in accordance with Jewish precepts. The Portuguese people hated these New Christians, or Maranos, far more than the confessed Jews, though King Emanuel favored them in order to win them by kindness to the Christian faith. But the king was powerless to protect them in face of the incendiary speeches of fanatical priests. On May 25, 1504, Whitsunday, a number of New Christians happened to meet in the Rua Nova, and were chatting together, when suddenly they were surrounded by a crowd of turbulent youths who insulted and reviled them. One of the New Christians finally drew his sword and injured some of the tormentors. A tumult ensued, which soon was checked by the appearance of the governor of the city with an armed guard. Forty of the rioters were arrested and condemned to be whipped and to be exiled for life to the island of St. Thomas, but through the intervention of the queen they were pardoned.

This uprising was the forerunner of the terrible massacre of the secret Jews in Lisbon which occurred in April, 1506. During the celebration of the Jewish Passover on the night of April 17 in that year, a party of New Christians was suddenly attacked and seventeen of them were arrested, but were set at liberty after two days. The people, enraged at this act, talked of bribery, and were ready to burn all New Christians at the stake. Two days later, on April 19, a number of Christians and New Christians attended a service in the Church of the Dominicans, in order that they might beseech God to stop the terrible, devastating pestilence. Suddenly, in a side chapel called the "Jesus Chapel," a crucifix radiating an extraordinary brightness attracted the attention of the Christians, who saw therein a miracle. One of the secret Jews was incautious enough to express his lack of faith in the wonder. This was the spark that caused the conflagration. The people were excited to the highest pitch and committed most fearful deeds of violence. The unbelieving New Christian was seized by the hair, dragged out of the church, and killed forthwith by the infuriated women, and his body was burned on a hastily erected pile on the Rocio Praça. Two Dominican monks, Joaõ Mocho, from Evora, and Bernaldo, an Aragonese, marched through the streets carrying the crucifix, calling aloud "Heresia! Heresia!" and exhorting the people to extirpate all heretics. The mob was soon joined by German, Dutch, and French sailors, and a terrible massacre began. On the first day, over five hundred New Christians were killed and burned; next day the brutalities were renewed in even worse form. Babies in the cradle were not spared; women seeking shelter in the church were dragged from the altar, outraged, and flung into the flames. The day's work ended with the murder of the tax-farmer Joaõ Rodriguez Mascarenhas, the richest and most hated New Christian; he was dragged to the Rua Nova, killed by the populace, and burned amid great rejoicing. Over two thousand (according to other authorities, four thousand) secret Jews were killed during the course of forty-eight hours.

The king, who was far from the capital at the time, was deeply incensed, and proceeded with severity against the criminals. The ringleaders were hanged, and many others were quartered or decapitated. The two Dominican monks who stirred up the people were expelled from their order and garroted, and their bodies were burned. Every resident of the city of Lisbon (which thereafter was no longer allowed to call itself "the most faithful") who was found guilty of either robbery or murder was punished corporally and subjected to loss of property (Damião de Goes, "Cron. de D. Manoel," pp. 141 *et seq.*; Garcia de Resende, "Miscellanea," xi. 6; Pina, "Chron. de D. Affonso," v. 130; "Shebeṭ Yehudah," p. 93; Usque, "Consolaçam," p. 200; hence the statement in "'Emeḳ ha-Bakah," p. 90; Herculano, "Inquisicaõ em Portugal," i. 142 *et seq.*; De Mendoça, "Historia de Portugal," vi. 955; Rios, "Hist." iii. 363 *et seq.*; Kayserling, "Gesch. der Juden in Portugal," pp. 145 *et seq.*; Grätz, "Gesch." ix.).

After the catastrophe a number of secret Jews left the country; the greater part of these fugitives returned to Lisbon, however, and for a time they were protected by the king, but were always hated by the people. The arrival of David Reubeni at the capital of Portugal produced a feverish excitement among the secret Jews. They believed him to be their savior and honored him as the expected Messiah. A New

Visit of Reubeni.

Christian of Lisbon, a young man of twenty-four, Diogo Pires, who held a government position, openly confessed the Jewish faith and, calling himself "Solomon Molko," became an adherent of Reubeni. By means of large money payments, the rich New Christians in Lisbon were able to postpone, but not prevent, the introduction of the Inquisition.

Lisbon was the seat of a congregation called "The Brotherhood of San Antonio," which existed among the secret Jews; it met in the Rua de Moneda, in a house which contained a secret synagogue, where Diaconus Antonio Homem conducted the service. He suffered for his attachment to Judaism by death at the stake on May 5, 1624. Not a few of the secret Jews who were distinguished as poets, physicians, and scholars, and who in Italy and Holland openly avowed themselves to be Jews, called Lisbon their birthplace, or resided there at some time. In this city Duarte Pinhel, or Abraham Usque, wrote his Latin grammar (1543), and Amatus Lusitanus and Abraham Farrar practised medicine. Moses Gideon Abudiente, Manuel de Pina, and others were born at Lisbon (see AUTO DA FÉ; INQUISITION; PORTUGAL).

G. M. K.

——**Modern:** Besides the Maranos who continued to reside in Lisbon after the expulsion, the city has at all times contained a certain number of avowed Jews also, mainly from neighboring Africa. This is evidenced by the edict issued Feb. 7, 1537, by John III., in which the Jews were ordered to wear badges so that they might be distinguished from Christians. A greater spirit of tolerance toward the Jews began to prevail in government circles with the accession of the Braganza dynasty (1640), which had been considerably assisted by Jewish financiers in its struggles against Philip IV. of Spain. But, owing to the fear of the Inquisition, which continued to persecute the Neo-Christians or Maranos, and to the fanaticism of the populace, only a few Jews ventured to settle in Lisbon. It was only toward the middle of the eighteenth century that a Jewish community began to be formed by the inflow of Jews from Gibraltar, who, as British subjects, could practise their religion freely, though privately. The decrees of 1773 and 1774, which were issued by King Joseph under the influence of his minister, the Marquis de Pombal, and which deprived the Inquisition of all tyrannical and arbitrary powers, gave a new impulse to the settlement of Jews at Lisbon, and toward the close of the eighteenth century there were a considerable number of them in the Portuguese capital, and the need of a near-by burial-place began to be keenly felt. For this purpose a small piece of ground was leased, in 1801, in the English cemetery situated in the Rua da Estrella, and the first to be buried there was a certain Jose Amzalaga (d. Feb. 26, 1804). The lease, which had been made privately without special legal sanction, was renewed, in 1833, at an annual rental of 1,000 reis.

Eighteenth Century.

At the beginning of the nineteenth century there were in Lisbon several widely known Jewish firms, which rendered great services to Portugal by supplying grain during a famine that occurred about 1810. In recognition of these services the government agreed to permit the foundation of a synagogue, although hitherto the laws of the country had not permitted the practise of any form of religion other than the Roman Catholic. The synagogue, under the name "Sha'ar ha-Shamayim," was founded in 1813 by R. Abraham Dabella; the Jews, however, had no legal status; they were only tolerated. According to the information given in 1825 by the prelate Joaquim José Feireira Gardo to the French historian Capefigue, there were in Lisbon at that time about 500 Jews, the majority of whom were engaged in brokerage and in foreign trade, and they owned three private synagogues.

Synagogue Founded 1813.

Although by the law the Jews were considered as foreigners, some of them took part in the political movements of the country. Levy Bensabath and his son Marcos Bensabath distinguished themselves by their struggles against the absolute government of Dom Miguel I. (1828–1834). Later Marcos Bensabath became an officer in a regiment of light infantry. In 1853 R. Abraham Dabella died, and his synagogue was managed by a committee composed of Leão Amzalak, Levy Bensabath, Abraham Cohen, Fortunato Naure, and Mair and Moisés Buzaglo. Several years later occurred the death of Salamão Mor José, and the two congregations then existing were united (about 1855). The union was of short duration, and a new synagogue was erected in 1860 in the Alley dos Apostolos; it is still the principal prayer-house in Lisbon. About that time Jacob Toledano of Tangiers was called to the rabbinate of Lisbon and officiated there until 1899. An important event for the Jews of Lisbon was the recognition of their religion by the government Oct. 30, 1868, when the community was authorized to use as a burial-place a plot of ground it had acquired for the purpose in 1865. On June 30, 1892, the government sanctioned the constitution of the charitable society Gemilut Ḥasadim.

Distinguished Jews of Lisbon.

In 1890 a plan for the complete organization of the community of Lisbon was adopted, according to which all the Orthodox Jews, both Sephardim and Ashkenazim, were to form one congregation. An interesting article (No. 31) of their constitution runs as follows: "Should the Portuguese Jews disappear from this town and from the kingdom, the German Jews here at that time may take under their care and for their own use the synagogues, estates, portable objects, and other things of value then in the possession of the Portuguese Jews or accruing to them later; but the German Jews shall restore the whole to the Portuguese congregation should it be reestablished." Besides the Gemilut Ḥasadim Society, there exists at Lisbon a useful benevolent association known as the Somej Nophlim, founded in 1865; this institution, in 1900, established a kasher restaurant for the poor, and is now (1904) contemplating the establishment of an asylum for Jewish travelers. On May 25, 1902, was laid the corner-stone of the new Sha'are Tiḳwah synagogue, which has replaced the various synagogues formerly in use. In accordance with the law, the new building is situated in an enclosure and bears no outward sign of being a place of worship.

The community of Lisbon now numbers about 400 persons in a total population of 357,000; they are mostly natives of Gibraltar, Morocco, or the Azores, and the majority of them are ship-owners and merchants. Among those Jews who have become widely known in connection with science, letters, or the arts are the following: Alfred Benarus, professor of fine arts; Bensaude, professor at the Industrial Institute; Joseph Benoliel, professor at the Marques de Pombal Industrial School; Jacob Bensaude, professor of English at the Collège du Porto; Salancão Saragga, a distinguished Hebraist; Dr. Raul Bensaude, consulting physician to the King of Portugal, and officiating rabbi since the death of Jacob Toledano in 1899. The ḥazzan of the community is Levy ben Simon of Jaffa.

——**Typography:** Hebrew printing flourished in Lisbon for the three years from 1489 to 1492, the first work, the commentary of Naḥmanides on the Pentateuch, being produced by Eliezer Toledano in July, 1489. The next year he produced a "Ṭur Oraḥ Ḥayyim" and two sections of the Bible. Eliezer Alantansi, who had a printing-press also at Ixar, printed the "Abudarham" at Lisbon, and two other works were produced here—Joshua Levi's "Halikot 'Olam" and an edition of the Proverbs; the printer of the last-named is not known. Toledano was one of the earliest to use borders. It has been suggested that the printer Ibn Yaḥya carried the Lisbon types to Constantinople and either printed from them there or used them as models for new types. J.

LISBONNE, EUGENE: Lawyer, and a member of the French Senate; born at Nyons, near Avignon, Aug. 2, 1818; died at Montpellier Feb. 6, 1891. He was a lawyer at Montpellier under the government of July, 1830, and became attorney of the republic at Béziers. On Dec. 10, 1848, he was dismissed, and at the coup d'état (Dec. 2, 1851) was deported. After the accession of Napoleon III. he returned to Montpellier and took an active part in the struggles of the republican party against the empire. From the revolution of Sept. 4 to April 23, 1871, he was prefect of the department of Hérault, where he energetically opposed the "Government of Moral Order." On Feb. 20, 1876, he was elected to represent the second district of Montpellier in the Chamber of Deputies, where he was one of the leaders of the Republican Union. After the crisis of May 16, 1877, he was reelected (Oct. 14). In 1887 he introduced the measures which established almost complete freedom of the press in France. The elections of Aug. 21, 1887, compelled Lisbonne to retire from public life; he soon reentered it, however (Jan. 5, 1888), and as senator from Hérault introduced a measure in restriction of those of 1887. This was carried by the Senate, but was defeated in the Chamber of Deputies.

LISKER, ABRAHAM BEN ḤAYYIM: Russian rabbi of the seventeenth century; native of Brest-Litovsk. After studying in the yeshibot of Lublin and Cracow, Lisker was called to the rabbinate of Rossiena, in the government of Kovno. He was the author of "Be'er Abraham," a commentary on the six orders of the Mishnah and based upon preceding commentaries, to which he added his own novellæ under the title "Me Be'er." Only that part of his commentary that deals with the first three orders has been published: Zera'im (Frankfort-on-the-Oder, 1665) and Mo'ed and Nashim (*ib.* 1683).

LISSA (called formerly **Polnisch Lissa**): Town of Prussia. Originally a village, it was incorporated in 1534; and soon afterward the first Jews settled there, with the authorization of Count Andreas Lescynski (1580-1606). Many of these Jewish settlers were probably of German origin, as the names "Auerbach" and "Oldenburg" frequently occur. The first privilege granted to them is dated March 10, 1626. In that year there already existed a synagogue at Lissa, also a cemetery, the plot for which had been presented by Count Lescynski. The earliest extant tombstone is dated 1662. At that date the community was fully organized and the schedule of taxation determined. Communal expenses were defrayed by taxes on slaughtering, dowries, the sale of houses, the ritual bath, and legacies. The Jews of Lissa not only engaged in commerce, but also followed trades: there were tailors, furriers, shoemakers, goldsmiths, lacemakers, locksmiths, tanners, barbers, embroiderers in gold, jewelers, buttonmakers, dyers, and turners. Most of these trades were organized into gilds, each of which generally had its own rabbi. The strong competition between the Jewish artisans and merchants and the Christians often led to sanguinary conflicts.

The Jews of Lissa suffered much during the wars in which Poland engaged, and more especially from the Cossack persecutions under Bogdan Chmielnicki. On the partition of Poland Lissa was annexed to Prussia.

In its most prosperous days Lissa contained between 4,000 and 5,000 Jews. It became the seat of a famous yeshibah which attracted students even from distant parts of Germany ("Memoiren der Glückel von Hameln," ed. Kaufmann, pp. 231-234). The first rabbi of Lissa was Isaac Eilenburg (1648), whose successors were: Jacob Isaac ben Shalom (d. 1675); Isaac ben Moses Gershon (d. 1695); Ephraim Kalisch; Mordecai ben Ẓebi Hirsch (d. 1753); Hirsch's brother, Abraham b. Ẓebi Hirsch (died as rabbi of Frankfort-on-the-Main, 1768); Phoebus Heilman (rabbi of Bonn: died at Metz); Aryeh ben Samuel; Tebele Horachow (d. 1792); and Jacob

Lissa (died at Stry in 1832). After Jacob Lissa's death the rabbinate remained vacant until 1864, when the present incumbent, Dr. S. Bäck, was elected. Among the many Talmudic scholars of Lissa was Akiba Eger, the younger (subsequently rabbi at Posen), who lived there from 1770 to 1791. The present (1904) population of Lissa is about 14,000, including about 1,200 Jews.

D. S. B.

LISSACK, MORRIS: English author and communal worker; born at Schwerin-on-the-Wartha, grand duchy of Posen, in 1814; died in London Jan. 13, 1895. He emigrated to England in 1835, and in 1839 settled as a "teacher of languages and dealer in jewelry" at Bedford, where he lived for nearly a half-century. In 1851 he published a book entitled "Jewish Perseverance, or The Jew at Home and Abroad," an autobiography with pious meditations and moral reflections. Lissack became a trustee of the Harpur Charity, Bedford, and took advantage of his position to secure concessions in favor of Jewish pupils. He was also an active worker in the cause of Jewish emancipation.

J. G. L.

LISSAUER, ABRAHAM: German physician and anthropologist; born at Berent, West Prussia, Aug. 29, 1832; educated at the gymnasium of his native town and at the universities of Vienna and Berlin (M.D. 1856). He practised in Neidenburg till 1863, when he removed to Danzig; but gave up his practise in 1892 upon his appointment as custos and librarian of the Anthropological Society of Berlin.

Lissauer has written several essays on medical and anthropological subjects, among which may be mentioned: "Zur Antipyretischen Behandlung des Typhus Abdominalis," in Virchow's "Archiv," liii.; "Ueber den Alkoholgehalt des Bieres," in "Berliner Klinische Wochenschrift," 1865; "Ueber das Eindringen von Canalgasen in die Wohnräume," in "Deutsche Vierteljahresschrift für Oeffentliche Gesundheitspflege," 1881; "Untersuchungen über die Sagittale Krümmung des Schädels," in "Archiv für Anthropologie," 1885, xv.; "Die Prähistorischen Denkmäler der Provinz West-Preussen," 1887; "Altertümer der Bronzezeit in der Provinz West-Preussen."

Bibliography: Pagel, *Biog. Lex.* Vienna, 1901.

S. F. T. H.

LISSAUER, HEINRICH: German physician; born at Neidenburg Sept. 12, 1861; died at Hallstadt, Upper Austria, Sept. 21, 1891; son of Abraham Lissauer. He studied medicine at the universities of Heidelberg, Berlin, and Leipsic, receiving his diploma in 1886. Settling as a physician in Breslau, he became assistant at the psychiatric hospital and clinic of the university, which position he continued to hold until his death.

He wrote several essays in the medical journals, especially on pharmacology and on the anatomy and pathology of the nerves. Among these may be mentioned: "Beitrag zum Faserverlauf im Hinterhorn des Menschlichen Rückenmarks und zum Verhalten Desselben bei Tabes Dorsalis," in "Archiv für Psychiatrie," xvii.; "Ein Fall von Seelenblindheit Nebst einem Beitrag zur Theorie Derselben," *ib.* xxi.; "Sehhügelveränderungen bei Progressiver Paralyse," in "Deutsche Medizinische Wochenschrift," 1890.

LISSER, ELEAZAR BEN SOLOMON (ZALMAN): Polish scholar; lived at Kleczewo in the eighteenth and nineteenth centuries. He was the author of a twofold commentary on Jedaiah Bedersi's "Beḥinat 'Olam," published with the text at Frankfort-on-the-Oder (1792). The first part, entitled "Migdenot Eleazar," deals with the interpretation of the text; the second, entitled "Ha-Mazkir," contains the vocabulary. Eleazar wrote twofold commentaries also, under similar titles, on Benjamin Musafia's "Zeker Rab" and on Abraham ibn Ezra's "Ḥidah," which he published with the text, the former at Altona (1807), and the latter, under the general title "Ḥomat Esh," at Breslau (1799), with an appendix containing literary essays by Eleazar and also enigmas.

H. R. I. Br.

LISSER, JOSHUA FALK: Prominent rabbi and Talmudist of the second half of the eighteenth century; a descendant of Joshua Falk Kohen of Lemberg and of R. Liwa (MaHRaL) of Prague, and a pupil of R. Moses Zarah Eidlitz of Prague, author of "Or la-Yesharim." He was dayyan or judge at Lissa while R. David Tebele was chief rabbi there, and was, therefore, a member of the council which in 1782, under the presidency of David Tebele, condemned and burned Naphtali Herz Wessely's letter entitled "Dibre Shalom we-Emet." Lisser wrote commentaries on the minor tractates Abot de-Rabbi Natan, Semaḥot, and Derek Ereẓ Rabbah we-Zuṭa, with textual emendations ("Binyan Yehoshua'," Dyhernfurth, 1788); the commentary on the Abot de-Rabbi Natan was reprinted in the Wilna (1897) edition of the Talmud. In the preface he apologizes for his textual emendations by referring to Solomon Luria and Samuel Edels, who had likewise suggested variants in their commentaries.

LITERATURBLATT DES ORIENTS. See Orient, Der.

LITERATURE, HEBREW: Under this designation may be comprised all the works written by Jews in the Hebrew and the Aramaic tongue. Works written in Hebrew by non-Jews are too few to require consideration here. The term "Jewish literature" should be used in a broader sense, as including works written by Jews upon Jewish subjects, irrespective of the language in which they may be expressed, while the term "Judaica" should be applied to works written by Jews or non-Jews upon Jewish subjects, but in languages other than Hebrew. An exception is made in the case of Aramaic, not only because of its intimate philological connection with Hebrew, but also because at an early date it became practically a second mother tongue for the Jews, and was used in the Bible, in many of the Talmudic discussions, in the prayer-book, and in the

Cabala. Works written by Jews but not upon Jewish subjects and not in Hebrew are treated under the names of their respective authors. See also Judæo-German; Judæo-Greek; Judæo-Spanish.

The most significant characteristic of Hebrew literature is that the greater part of it is directly or indirectly the outgrowth of the Bible. There is a marked continuity in the development of the later from the earlier literary forms, all of them going back to the first source—the Bible. In other words, Hebrew literature is chiefly a religious literature, secular writings, produced mostly under the influence of foreign literatures, forming but a minor part of it. It seems, therefore, that, aside from dividing Hebrew literature into periods, as is usually done in histories, it will be best to give a sketch here under the categories into which the Bible itself may be divided, showing what part of the literature may be traced back to the Bible and what must be traced to foreign influence. These categories are "Law," "Prophecy and Wisdom Literature," "History," and "Psalmody." For more detailed information see subjects referred to throughout this article.

The Law.

The Law as a literature has continued its development from the earliest times down to the present day, and has been of greater influence upon the life of the Jews than any other branch of literature. It owes its growth chiefly to the doctrine, long inculcated in the Jewish mind, that along with the written law Moses received also an oral law, which was faithfully handed down by an unbroken chain of teachers and leaders to the men of the Great Synod and by them to succeeding generations. This gave rise to the Talmudic law, or Halakah, which deals, like the Biblical law, not only with man's civil and public life, but also with his private habits and thoughts, his conscience, and his morality. Traces of the Halakah are discoverable even in the Later Prophets, but its period of full development lies between 300 B.C. and 450 C.E. (see Mishnah; Talmud). In the latter half of the fifth century the Babylonian schools declined and the teachers of the Law no longer assumed authority. They confined their teachings to the comparison and explanation of the laws that came down to them from previous generations, allowing themselves to introduce only methodological and mnemonic signs into the Talmud. This sums up literary activity in the line of the Law during the period following the close of the Talmud. See Saboraim.

The development of the Halakah in the subsequent period received impetus from the fact that the Babylonian schools once more raised themselves to an important position, owing, perhaps, to Arabic dominion in that country. The Geonim, as the teachers of this period are called, did not produce independent halakah, but continued to promote the study of the Talmud. What the Bible was to the Tannaim and Amoraim that the Talmud became, in its turn, to the Geonim and later teachers. It lay before them as an object of exposition, investigation, and discussion. The succeeding period was one of systematization, condensation, and elucidation: introductions, commentaries, compendiums, and dictionaries were the outcome of the study of the Talmud in those days. A new epoch commenced with the activity of Maimonides. His "Mishneh Torah" embraces the whole field of Halakah, and became an object of much discussion and explanation. In the fourteenth century the halakic literature began to deteriorate, and instead of being the guide of conduct it became a mere play of the intellect. In the sixteenth century, however, it again received a fresh impetus through the Shulḥan 'Aruk of Joseph Caro, which is still the standard work of traditional Judaism. Works on the Halakah are to be found in various forms, viz., in the form of commentaries **(Perushim; Ḳunṭresim)**, glosses **(Nimuḳim)**, additions (Tosefot), novellæ (Ḥiddushim), collections **(Likkuṭim)**, compilations **(Ḳobeẓim)**, compendiums **(Ḳiẓẓurim)**, decisions **(Pesaḳim)**, and judgments **(Dinim)**, as well as in independent codes and responsa.

Prophecy and Wisdom Literature.

From the prophetic utterances to the preachings and homilies of later days was but a short step, and accordingly public preaching for general instruction and moral edification was instituted among the Jews in very early times. This gave rise to the Haggadah, which did for the spirit what the Halakah did for the practise of Judaism. Just as the Halakah embraces various kinds of law, so does the Haggadah embrace different forms of thought. In a restricted sense, however, the Haggadah may be said to deal with ethics and metaphysics, and it is in this sense that it may be regarded as the natural issue of the earlier prophecies. In its ethical characteristics the Haggadah was greatly influenced by the Wisdom literature of the Bible, but in its metaphysical tendencies it shows the influence of Hellenistic philosophy. To the ethical Haggadah belong a few apocryphal books, such as Ben Sira, the Apocalypse of Zerubbabel, and the Wisdom of Solomon, and the still more important works Pirḳe Abot, Abot de-Rabbi Natan, and Masseket Derek Ereẓ. The metaphysical Haggadah did not develop into a separate literature until a much later date. See Midrash; Targum.

About the middle of the eighth century Arabic philosophy began to exercise a strong influence over the Jewish mind, and owing to the rationalistic character of that philosophy the Midrash ceased to grow, and its place was taken by theological and philosophical works of a systematic nature. The prophetic spirit is no longer so clearly discernible as before, owing to the large intermixture of foreign thought, but, on the other hand, the prodigious development of Hebrew literature in the Middle Ages must be ascribed to this foreign influence, for its presence is felt in almost every branch of thought cultivated in those days. It is seen in the rise of Karaism, in the development of philology and exegesis, as well as in the cultivation of general sciences among the Jews. Later, again, when Jewish thought came in touch with Christian mysticism, the developed Cabala sprang into existence in place of the metaphysical Haggadah (see Cabala). Finally, a great part of the large controversial literature owes its existence to the conflict between Judaism and Mohammedanism.

The theological literature previous to the twelfth

Philosophic Haggadah.

century is very fragmentary, and consists mostly of partial translations from the Arabic. Though the beginning of this literature dates from the days of Saadia Gaon, there is no independent work of the kind in Hebrew until a much later date, and even the earliest among the prominent men in this field, Ibn Gabirol (11th cent.), Judah ha-Levi and Maimonides (12th cent.), wrote in Arabic, as had Saadia. The first important theological writers in Hebrew were Levi ben Gershon (14th cent.), Joseph Albo (15th cent.), and Elijah Delmedigo (15th cent.).

The ethical literature was continued in the works of Gabirol and Baḥya ben Joseph (11th cent.), Halevi (12th cent.), Isaac Aboab and Eleazar ben Judah (13th cent.), Jedaiah Bedersi (14th cent.), Leon of Modena (16th cent.), and Moses Ḥayyim Luzzatto (18th cent.), as well as in the large literature of ethical Wills and correspondence current throughout the Middle Ages.

The metaphysical Haggadah assumed under the influence of Arabic philosophy the aspect of a systematic philosophy, and through the influence of Christian mysticism it became a sort of theosophy which looked for the hidden and disregarded the evident meaning of the Law, and which, under the name of Cabala, began to develop an extensive literature, first in Italy and in Provence, and later in the East. The founder of the Cabala was R. Isaac the Blind (12th cent.), who was followed, in the thirteenth century, by a host of eminent scholars. To the same century undoubtedly belongs the most famous cabalistic work, the Zohar, which is ascribed by all critics to Moses de Leon. The cabalistic literature of the fourteenth and fifteenth centuries is mostly anonymous and not original. But a new epoch opens with the teachings of R. Isaac Luria in the sixteenth century. He inaugurated the "practical" Cabala. No longer content to be restricted to the world of thought, this Cabala assumed to interfere in the world of action and to direct man's conduct in life. Luria's chief disciple was Ḥayyim Vital, who committed the teachings of his master to writing. In the latter part of the seventeenth century this "practical" Cabala was at the root of the Shabbethaian movement, and in the eighteenth century it was the cause of the extravagances of the Ḥasidim, the chief of whom were Israel Ba'al Shem, Bär of Meseritz, and Salman of Liadi.

Polemical Literature.

With the rise of systematic theology there came into existence an extensive literature of controversy. For although traces of this literature may be found in the Talmud, it was not until Judaism came into conflict with its two sister religions and with Karaism that religious controversy became a significant part of Hebrew literature. The first great work of this kind is the "Cuzari" of Judah ha-Levi, which is directed mainly against Mohammedanism and Karaism. But the most fruitful period for religious controversy was the fourteenth and fifteenth centuries, and the leading authors of that period were Profiat Duran, Joseph Albo, Isaac Abravanel, and Yom-Ṭob Lipmann Heller. In the sixteenth century two strong polemics were written against Christianity: the "Hoda'at Ba'al Din" of Joseph Nasi and the "Ḥizzuḳ Emunah" of Isaac ben Abraham Troki. In modern times Isaac Baer Levinsohn wrote many controversial works.

Another product of the influence which Arabic philosophy exerted over Judaism is Karaism. It took its origin in the latter part of the eighth century and came early under the influence of Mohammedan dogmatism. Its literature dates from the same period, and consists mainly of dogmatics, exegesis, and grammatical works; its most prominent authors are: Judah Hadassi (12th cent.); Aaron the Elder (13th cent.); Aaron ben Elijah, author of "'Eẓ ha-Ḥayyim" and "Gan 'Eden" (14th cent.); Elijah Bashyaẓi (15th cent.); and Zarah Troki (17th cent.). In the nineteenth century the most prominent Karaite scholar was Abraham ben Samuel Firkovich. To the influence of Arabic literature must be ascribed also the scientific development of Hebrew grammar, which in turn greatly affected Biblical exegesis; both form important branches of Hebrew literature, but they can not be discussed here.

History.

"The meager achievements of the Jews in the province of history do not justify the conclusion that they are wanting in historic perception. The lack of Jewish writings on these subjects is traceable to the sufferings and persecutions that have marked their path. Before the chronicler had had time to record past afflictions, new sorrows and troubles broke upon them" (G. Karpeles, "Jewish Literature, and Other Essays," p. 23). Though real historical works, in the modern sense of the term, are a very late product in Hebrew literature, the elements of history were never absent therefrom. The traditional nature of the Halakah created a demand for chronology and genealogy, while the Haggadah often enlarged upon the historic material of the Bible for purposes of its own. The most important historic documents of the Talmudic period are the Seder 'Olam Rabbah (1st cent.) and the Megillat Ta'anit (2d cent.; though in its present state, however, perhaps the product of the eighth century). From the geonic period there are a number of historic documents, *e.g.*, Seder 'Olam Zuṭa, Seder Tannaim we-Amoraim, and the Letter of Sherira Gaon. From the tenth century there is the "Yosippon," and from the eleventh the "Sefer ha-Ḳabbalah" of Abraham ibn Daud. Besides these there are some notable books of travel to be mentioned, as the "Sefer Eldad ha-Dani" (11th cent.), the "Sibbub Rab Petaḥyah" (12th cent.), and the "Massa'ot" of Benjamin of Tudela (12th cent.). The fifteenth, sixteenth, and seventeenth centuries produced notable chroniclers like Solomon Ibn Verga (15th cent.), Abraham Zacuto (16th cent.), Joseph ha-Kohen (16th cent.), David Gans (16th cent.), David Conforte (17th cent.), and Jehiel Heilprin (17th cent.). Azariah dei Rossi (16th cent.) may be regarded as the first critical literary historian, and his work is authoritative even to-day. In the eighteenth century Ḥayyim Joseph David Azulai is the most prominent literary historian, while in the nineteenth century the chief works on history and the history of literature are those of Rapoport, Schorr, I. H. Weiss, Frankel, and Isaac Halévy. See Historiography.

Psalmody.

The literature devoted to the liturgy of the Synagogue extends over a long period. Although in the Bible there is no mention made of any composition specially written for the purpose of prayer, it is not unlikely that many Psalms were recited in the Temple service and then adopted as prayers. And inasmuch as the oldest prayers are largely mosaics, made up of quotations from the Scriptures, the liturgy may justly be regarded as a development of the Psalm literature. It was due to this Biblical origin also that the language of the old prayers was in most cases Hebrew and the style fluent and forcible. The later development of the liturgy, however, was closely connected with the development of the Midrash. This is evident from the fact that the additions which grew up around the old nucleus of the prayer were in the spirit of the Midrash, until finally the Midrash itself entered into the liturgy. Under the influence of the new forms of poetry in the Arabic period the daily prayers, and still more those of the festivals, assumed various forms. Liturgical poems adapted for special occasions were produced and new technical names invented. By degrees even dogmatic theology and halakah were versified and introduced into the liturgy. The important occasions of life—birth, marriage, and death—were made the subject of synagogal poetry. The literature of the liturgy is so large that no attempt is made to record names. It will be sufficient to state that although a skeleton of much of the ritual was already fixed in Talmudic times additions to it were made as late as the sixteenth century. See Liturgy; Piyyuṭ.

Secular Poetry.

From religious to secular poetry is but a step, yet it was only in the middle of the tenth century that secular poetry began to flourish. In this as in other branches of literature, Arabic influence was strongly felt from the days of Ḥasdai (10th cent.) down to those of Immanuel of Rome (14th cent.). From the fifteenth to the seventeenth century inclusive, Hebrew poetry declined, and was not revivified until the beginning of the eighteenth century, when it came under the influence of modern literatures. The period from Moses Ḥayyim Luzzatto to that of Naphtali Wessely may be called the Italian period, and that from Wessely to Abraham Bär Lebensohn, the German period. Judah Löb Gordon, though he came under the influence of foreign literatures, made the foreign taste subservient to the Jewish spirit. He is also the first poet to deal with real life, while the recent school of poets, under the influence of the national movement, shows a tendency to return to romanticism. Owing also to the influence of modern literatures, Hebrew has developed a literature of fiction and essays which deserves general recognition.

Finally, a word must be said of the works written in Hebrew that deal with the arts and sciences. Originally, the sciences developed among the Jews as a branch of Halakah, receiving recognition only by virtue of some religious function which they were made to serve, as, for example, astronomy in connection with the fixing of the calendar, upon which depended the observance of the festivals. Later, however, when the Jews came in contact with Arabic civilization, the sciences came to be cultivated for their own sake, and since the middle of the tenth century many books have been written on the various arts and sciences, irrespective of their religious bearing. See also Dictionaries; Drama; Fables; Folk-Songs; Folk-Tales; Grammar, Hebrew; Hebrew Language; Poetry, Didactic; Semitic Languages; Translators.

LITERATURE, MODERN HEBREW: Modern Hebrew literature (1743–1904), in distinction to that form of Neo-Hebraic literature known as rabbinical literature (see Literature, Hebrew), which is distinctly religious in character, presents itself under a twofold aspect: (1) humanistic, relating to the emancipation of the language by a return to the classical models of the Bible, leading to the subsequent development of modern Hebrew; (2) humanitarian, dealing with the secularization of the language with a view to the religious and social emancipation of the Jews of the ghetto. These two tendencies are expressed by the word Haskalah, a term denoting the movement which predominated in Hebrew literature from the second half of the eighteenth century down to the death of Smolenskin in 1885.

Period of Transition in Italy.

Beginning with the seventeenth century, many attempts were made to emancipate Hebrew from the forms and ideas of the Middle Ages. Italy, with critics and poets like Azariah dei Rossi, Leon of Modena, Francis, etc., who were inspired by the Italian Renaissance, led in this period of transition in Hebrew literature. But it was not until the appearance of Moses Ḥayyim Luzzatto that Hebrew poetry shook off the medieval fetters which hindered its free development. His allegorical drama "La-Yesharim Tehillah" (1743), which may be regarded as the first product of modern Hebrew literature, is a poem that in its classic perfection of style is second only to the Bible. In the less advanced countries especially it has contributed to the regeneration of Hebrew and has stimulated a host of imitators among writers removed from modern literary centers.

At Amsterdam, Luzzatto's pupil, David Franco Mendes (1713–92), in his imitations of Racine ("Gemul 'Atalyah") and of Metastasio ("Yehudit"), continued his master's work, without, however, equaling Luzzatto's poetic inspiration and originality. In Germany, where, in consequence of the ideas promulgated by the encyclopedists, the Jews developed more normally, and where, moreover, in the middle of the eighteenth century, Hebrew was still almost the only literary language accessible to the masses, another successor of Luzzatto, Naphtali Hartwig Wessely (1725–1805), inaugurated the haskalah movement. His "Shire Tif'eret," or "Mosiade," which, though falling short of poetic inspiration, is written in a pure, oratorical style and is marked by a lofty, moral tone, made him, so to speak, poet laureate of the period.

First German Maskilim.

Under the stimulus of Mendelssohn, literary societies were formed by the Maskilim in the large communities, which undertook to propagate modern ideas among the Jews and to familiarize them with modern secular life. Two schools or parties, which were more or less distinct, undertook this work: (1) the Biurists, a group of commentators and translators of the Bible who, under the leadership of Mendelssohn, desired to replace the Judæo-German dialect with pure German and to provide a more rational interpretation of the sacred text; (2) the Me'assefim, scholars connected with the first literary collection in Hebrew, "Ha-Me'assef," which was established in 1785 at Breslau by Isaac Eichel and B. Lindau, and which became the organ of the haskalah and a bond of union among the Hebraists.

Wessely may be regarded as the spiritual leader of the Me'assefim. Although a devout believer himself, he did not hesitate to meet the objections which the Orthodox rabbis of Austria and Germany opposed to all educational and civic reforms advocated by the government of Joseph II. In his eight messages (1784), "Dibre Shalom we-Emet," he emphasized the necessity, even from the standpoint of the Talmud, of these reforms as well as of secular studies, especially the study of modern languages and classical Hebrew and of manual training. Despite the opposition of the Orthodox rabbis of Germany and Austria, the aid of the liberal Italian rabbis enabled him to arouse public opinion in favor of the haskalah, and thus to prepare the way for the Me'assefim. "Ha-Me'assef" was discontinued after an existence of seven years, the French Revolution and the downfall of the old order of things destroying the interest in the Hebrew language, which was the only relic left to the emancipated Maskilim. The literary and scientific value of "Ha-Me'assef" is very doubtful. In their instinctive aversion to everything medieval and rabbinic, the Me'assefim went to the other extreme and adopted the affected style of the "meliẓah," which was cultivated by their successors, and which often ended in mere artificial juggling with words. As regards their content most of the pieces in the collection have only a slight interest, being merely puerile imitations of German pseudo-romanticism. Having broken with the Messianic ideal of traditional Judaism, and being unable to replace it with another ideal more in conformity with modern ideas, the Me'assefim ended in advocating assimilation with the surrounding people. But the importance of this first secular periodical in Hebrew was such that it imposed its name upon the entire literary movement of the second half of the eighteenth century, which is called "the period of the Me'assefim."

Among the Me'assefim, I. Eichel is noteworthy for his uncompromising attitude, unusual at that time, toward rabbinism, and Baruch Lindau is known for his works on the subject of natural science and written in Hebrew. The most influential, however, was the rabbi Solomon Pappenheim (1776–1814), an eminent philologist, whose sentimental elegy, "Arba' Kosot," was the book of the day and contributed much to the dissemination of the meliẓah. The most valuable contributors to "Ha-Me'assef" were, perhaps, the Me'assefim of Polish origin, especially the grammarian and stylist S. Dubno; S. Maimon, the commentator of Maimonides; the eccentric but gifted Isaac Satanow, author of the maxims "Mishle Asaf"; and the grammarian Judah Ben-Zeeb (Bensew) of Cracow.

Influence of the Me'assefim.

In short, although the Me'assefim lacked originality, they accomplished the double task which they had set themselves. Hebrew, which had been almost entirely neglected in the Slavic countries, was again studied, giving rise to a literature more or less worthy the name and producing the Maskilim, a class of secular scholars who were active during the following century in awakening the masses from their medieval slumbers and in disputing, in the name of science and modern life, the authority of the Rabbis over the people (see Haskalah).

The nineteenth century did not open auspiciously for Hebrew literature, especially in western Europe. Hebrew disappeared more and more as a living language among the emancipated Jews, who had broken with their national ideals and were ambitious of assimilating themselves entirely with their neighbors. It is true that the Napoleonic wars gave birth to a whole literature of odes and hymns, many of which were sung in the synagogue, the most poetical and characteristic being Elie Ḥalfan Halévy's "Ha-Shalom" (Paris, 1804); but the few rabbis who continued to use Hebrew did not influence the masses. In Italy, however, there was still an ardent band of Hebrew scholars, among them the poet E. Luzzatto. About this time the center of literary activity was definitively transferred to the Slavic countries, where was witnessed a remarkable revival of Hebrew letters. The lead which Austria, followed by Italy, took in the movement at the beginning of the nineteenth century was later yielded to Russia; and that country has maintained its leadership down to the present time.

Poland and Austria.

At the close of the eighteenth century Polish Judaism, which for a long time had been politically isolated and had devoted itself entirely to pious observance and to the study of the Talmudic law, came in contact with modern ideas, and awakened from its centuries of slumber. Galicia became a center for the haskalah. The "Me'assef," which had been edited in a new series in Germany by Solomon ha-Kohen (Dessau, 1809–11), but without much success, was revived at Vienna and later in Galicia, and succeeded, first under the title of "Bikkure ha-'Ittim" (1820–31), and then under that of "Kerem Ḥemed" (1833–42), in gathering together many writers, the larger proportion of whom were Polish. In Poland, however, where the Jewish population lived apart, and could not even aspire to the dreams of equality and liberty of the German writers, the Maskilim were confronted with very complicated problems. On the one hand, political upheavals, modern instruction, and military service had paved the way for the mysticism of the Ḥasidim, which seized the masses despite the efforts of the liberal rabbis aided by writers like D. Samoscz and Tobias Feder.

On the other hand, light literature and romantic imitations could not satisfy scholars saturated with Talmudic study. In order to meet these needs Hebrew literature descended from its heights to devote its attention to the necessities of daily life. Joseph Perl, a Mæcenas and himself a scholar, encouraged this movement, and published the parody "Megalleh Ṭemirin," directed against the superstitions and the cult of the Ḥasidic ẓaddiḳim. Solomon Judah Rapoport (1790–1867), who began by translating Racine and Schiller, now turned to the critical study of the past. By his able reconstruction of the lives and the scientific work of the masters of the Middle Ages, by his careful critical method, and by his devotion to the Law and the Jewish spirit, Rapoport created the Science of Judaism.

Nachman Krochmal (1785–1840).

But this science, which was warmly received especially by the cultivated minds of western Europe, could not satisfy the poor Polish scholars, living in entirely Jewish surroundings, and, no longer contented with the reasons advanced by the medieval masters, anxiously questioning the wherefore of the present and future existence of Israel. Then a master mind arose, to give an answer at once ingenious and adapted to the time. Nachman Krochmal, teaching gratuitously in his obscure corner of Poland, succeeded in uniting the propositions of modern critics with the principles of Judaism by the bond of nationalism, as it were, thus creating a Jewish philosophy in conformity with modern thought. Starting with Hegel's axiom of real and of absolute reason, Krochmal sets forth in his essays and in his ingenious Biblical and philosophic studies that the Jewish people is a concrete national organism, a separate unity, whose existence is justified, as the existence of all other nationalities is justified. But, at the same time, as the people of the Prophets, it has in addition a spiritual reason for its existence, which transcends national boundaries, and will join the entire human race in one bond.

Many poets, scholars, and popular writers besides Rapoport and Krochmal contributed to the dissemination of Hebrew and to the emancipation of the Jews of Galicia. The satirical poet Isaac Erter (1792–1841), whose collection of essays, "Ha-Ẓofeh le-Bet Yisrael," is one of the purest works of modern Hebrew literature, attacked Ḥasidic superstitions and prejudices in a vigorous and classical style, marked by bright fancy and a cutting sarcasm which heaped ridicule upon the rabbi and satire upon the ẓaddiḳ.

The Galician School.

Meïr Halevy Letteris acquired merited renown and was for a long time considered poet laureate of the period by reason of his numerous translations, both in prose and in poetry, including "Faust" and works by Racine and Byron, and also on account of original lyric poetry, his song "Yonah Homiyyah" being a masterpiece. The popularizer of Galician history and geography, Samson Bloch, also won a reputation, although his insipid and prolix style does not warrant the success achieved by his works. The Galician scholar Judah Mises is noted especially for his violent attacks on rabbinical tradition and for his extreme radicalism, his work being continued by I. A. Schorr, the daring editor of "He-Ḥaluẓ."

Decadence of the School.

Outside of Galicia, where the scholars issued their works, and where periodicals multiplied, some of which were published at Vienna, as "Kokebe Yiẓḥaḳ" (ed. Stern), "Oẓar Neḥmad" (ed. Blumenfeld), Kerem Ḥemed, etc., groups of Maskilim or individual scholars were to be found toward the middle of the century in all the countries of Europe. In Germany the campaign for and against religious reform gave opportunity to certain scholars and rabbis to conduct their polemics in Hebrew. Zunz, Geiger, Z. Frankel, Jellinek, Carmoly, Fürst, J. Schwarz, and others, also published part of their works in Hebrew. Moses Mendelssohn of Hamburg, a pupil of Wessely and author of the maḳamat "Pene Tebel" (Amsterdam, 1872), may be considered as the epigone of the Me'assefim. In the Netherlands, especially at Amsterdam, there was also a circle of epigones, including the poet Samuel Molder (1789–1862). In Austria, Vienna was the depot for publishing Hebrew books and periodicals, and Prague became an active center for the haskalah. The best known among the Maskilim here is J. L. Jeiteles (1773–1838), author of witty epigrams ("Bene ha-Ne'urim") and of works directed against the Ḥasidim and against superstition, and director of the "Bikkure ha-'Ittim." There were scholars in Hungary also, the most gifted among them being Solomon Lewison of Moor (1789–1822), a remarkable stylist, whose classical "Meliẓat Yeshurun" places him above all the poets of the period. Gabriel Südfeld, father of Max Nordau, and Simon Bacher, may also be mentioned. The reflex of this movement was felt even in Rumania (J. Barasch, etc.). Galicia, however, the center of the haskalah, finally succumbed to Ḥasidism, while the moderns gave up Hebrew, and ended by more or less openly advocating assimilation. A few circles of Maskilim barely succeeded in perpetuating the Hebrew tradition, but had no influence on the masses.

The Italian school exercised a more pronounced influence. I. S. Reggio (1784–1854) endeavored in his "Ha-Torah weha-Filosofiah" to reconcile modern thought with the Jewish law, while in his numerous writings and publications he openly sided with the German religious reformers. Joseph Almanzi, Ḥayyim Salomon, S. Lolli, and others wrote poems on the grandeur of the Law and the glory of Israel; these contained, however, not a spark of originality. More interesting perhaps is the only poetess of the period, Rachel Morpurgo (1790–1860), whose poems evince religious piety and a mystic faith in Israel's future. The most original and gifted Italian writer of the period is Samuel David Luzzatto (SHeDaL, 1800–65), whose influence reached beyond Italy and beyond his time. Gifted with an encyclopedic mind, Luzzatto did good work alike in poetry ("Kinnor Na'im"), in philology ("Bet ha-Oẓar" and "Betulat Bat Yehudah"), in philosophy, and in general literature. At the same time Luzzatto was the first modern writer to introduce religious romanticism into Hebrew and to attack northern rationalism in the name of religious and national feeling. "True Jewish science is founded on faith. . . . Faith is the only arbiter of supreme morality which gives us true happiness. The happiness of the Jewish people, the people of morality, does not depend on its political emancipation, but on faith and on morality. . . ." These ideas led Luzzatto into polemics with his northern friends, but they also helped to familiarize the believers in Russia with modern literature. Luzzatto thus found the key to the heart of the masses; and it was due to him that the work of the Maskilim, which had failed of permanent results in the West, in the East led to the development of a national literature. But in Italy also Hebrew declined more and more, even among scholars; and by the second half of the century it was almost entirely forgotten in the civilized countries of Europe.

Italy: Luzzatto.

Russia.

The large bodies of Jews in the Polish districts annexed to Russia were entirely removed from all political and social life, and vegetated in a kind of profound resignation or in mystical piety. At the Europeanized city of Odessa, however, Galician Jews formed a circle of Maskilim, which, though active, was restricted in its influence. Here in the middle of the century were the scholars S. Pinsker and S. Stern, who were soon joined by the Karaite Firkovich and by the poet Jacob Eichenbaum. The acknowledged leader of these Maskilim of southern Russia was Isaac Bär Levinsohn, the apostle of humanism in Russia, whose influence penetrated even into government circles, but whose literary work has been overestimated. His personal endeavors, as well as his books ("Te'udah be-Yisrael" and "Bet Yehudah"), in which he recommends to the Orthodox the study of the sciences and the pursuit of manual employments, contributed to general emancipation rather than to that of Hebrew literature in particular. Lithuania, an eminently Jewish country, was more favored by circumstances; and here the haskalah was destined to lead to the unfolding of a literature. At Shklov, the first city to come in contact with the outside world, a group of humanists arose as early as the beginning of the century. But it was at Wilna, the capital of the country, abandoned by its native population and entirely removed from outside influence, that the Hebrew language flourished to an extraordinary degree. It was due to the enlightened tolerance of the gaon Elijah Wilna and the zeal of his pupils that Wilna became, toward the end of the eighteenth century, the home of excellent grammarians and stylists. About 1820 or 1830 a circle of Maskilim, called "Berliner," and evidently inspired by the writers of Germany, was formed, which assiduously cultivated modern Hebrew literature. Two eminent scholars lent special luster to this new literary movement. M. A. Günzburg well deserves his title "the father of prose," which he won for himself through his numerous translations, histories, and scientific compilations, his picturesque narration of the ritual murder at Damascus, his realistic autobiography "Abi'ezer" (a glowing criticism of customs of the past), and especially through his style, which is at once temperate, realistic, and modern. At the same time Abraham Bär Lebensohn, called "the father of poetry," lent new radiance and vigor to Hebrew verse. The touching lyric quality of some of his poems, the profound pessimism, the plaint over life, and the fear of death, which betray the feelings of the Jew tried by the ordeal of ghetto life, all stamp him as the veritable poet of the ghetto. The simplicity of his ideas, his rabbinical dialectic and even his frequent prolixity only added to his popularity. His poems "Shire Sefat Ḳodesh" were extraordinarily successful; and his elegant, limpid, and often energetic style is still justly admired.

A. Bär Lebensohn.

It was due to these two masters that modern Hebrew literature was widely disseminated throughout Lithuania, circles devoted to the haskalah being formed nearly everywhere. Hebrew became the language of daily life, the literary language, and, what is still more characteristic, the language of folk-lore. In fact, the list of popular Hebrew poems by known or unknown authors is too long to be noted here. The unhappy political situation of the Russian Jews under Nicholas I.—a period of persecutions of all kinds and of terror—had particularly contributed to produce this state of mind in the harassed people; and while Ḥasidism completed its work of producing intellectual obscurantism and hopeless resignation in the province of Poland and in southern Russia, mysticism found in Lithuania a redoubtable enemy in the sentimentality of the unfolding Hebrew literature.

Popular and Literary Romanticism.

The diffusion of the affected style of the meliẓah and the return to the language of the past awakened among this unhappy people a regret for the glorious Biblical times and a romanticism that was to bear rich fruit. Popular Hebrew poetry had become fundamentally Zionistic, as is evident from the anonymous poems then written ("Shoshannah," "Ẓiyyon, Ẓiyyon," etc.). Literary romanticism soon followed upon this romantic tendency. The Lithuanian writers, sharing the life and patriotic thoughts of the people, and encouraged by the example of S. D. Luzzatto, who united modern culture with ardent patriotism, turned to romanticism. The prolific popularizer Kalman Schulman (1826–1900) inaugurated romantic fiction and introduced the romantic form into Hebrew through his Hebrew version of "Les Mystères de Paris" ("Mistere Paris"); and he became one of the civilizers of the ghetto through his numerous popular scientific works and especially through his studies of the Jewish past. His pure, flowing, melizah style, his extreme sentimentalism as well as his naive romanticism in all matters touching Judaism, won for him great influence. For fully half a century he, in spite of his lack of originality, ranked as a master. The young and gifted writer Micah Joseph Lebensohn (1828–52), the first true artist and romantic poet in Hebrew, has left poems that are perfect in style, including an admirable translation of the "Æneid," lyrics of love, of nature, and of sorrow. But his masterpieces are romantic poems ("Moses," "Judah ha-Levi") dealing with Israel's glorious past.

The creator of the Hebrew novel was Abraham Mapu (1808-67), whose historical romance "Ahabat Ẓiyyon" exercised an important influence on the development of Hebrew. This novel, which deals with the golden age of Judah, that of Isaiah, and is couched in the very language of that prophet, is rather a succession of poetic pictures reconstructing the civilization of ancient Judea than a connected story. Simple and primitive in his thoughts, Mapu was so imbued with the spirit of the Bible that, although unconsciously, he was translated to ancient times, and, guided by a marvelous intuition, he succeeded in reconstructing the free, agricultural life of ancient Judah, in the land of the prophets, of justice, and of truth, the land of love and of the joy of life. This past, to renew which was the ambition of scholars and people, superimposed itself upon the present, and it was due to Mapu's novel that an entire people came forth from its long lethargy, to be reborn. Another novel ("Ashmat Shomeron") by Mapu served to increase his popularity.

Many imitators of these leaders of Hebrew romanticism appeared, and at a time when the political outlook checked all hopes of a better life: the Maskilim demanded, in the name of the prophetic past, the rights of civilization and progress. Many persons, also, were won over to the reading of secular literature. When in 1856 Silbermann founded at Lyck the first political journal in Hebrew, "Ha-Maggid," he met with unexpected success and had many imitators. In Austria, Russia, and even in Palestine, periodicals, more or less successful, appeared, furthering the cause both of Hebrew and of emancipation. Among these journals were "Ha-Karmel," founded by the scholar Samuel Joseph Fuenn; "Ha-Ẓefirah," founded by the popularizer of science C. Z. Slonimsky; and "Ha-Meliẓ," founded by A. Zederbaum.

Official Liberalism and Radicalism.

The accession of Alexander II. radically changed the condition of the Russian Jews. A wave of liberty and radicalism swept through the empire, and for the first time the Russian Jews could hope for a lot similar to that of their western coreligionists. Awakened from their century-long sleep, the backward people of the ghetto began to shake off religious and other fetters, becoming imbued with modern ideas and adopting modern modes of life. In the large centers there was no serious opposition to emancipation, and the Jews flocked in masses to the schools and sought secular employments. The scholars themselves, encouraged by the government and by the notables of the great cities, decided to attack all the "domains of darkness" of the past, and to occupy themselves with the affairs of the day; and when the small provinces, less disturbed by the economic and moral upheavals, bitterly opposed this social emancipation—which led to forgetfulness of the Law and endangered the faith—the Maskilim knew no limits to their fury against the fanatics of the ghetto. Hebrew literature, at first realistic, attacking customs and superstitions in the name of utility and the reality of things, became more and more antirabbinical as it opposed religious tradition. Mapu led the way in his novel "'Ayiṭ Ẓabua'," which, though a failure from a literary point of view, depicts the backward types of the ghetto, the Tartuffes, and the enemies to progress, with a realism intentionally exaggerated. Abramowitsch, then a young man, described in his novel "Ha-Abot we-ha-Banim" the customs of the Ḥasidim and the struggles of their progressive sons. The aged poet Abraham Bär Lebensohn published his drama, "Emet we-Emunah" (written twenty-five years previously), in which he satirized cabalistic hypocrisy and mysticism. The number of popularizers of science, critics of belated customs, and belittlers of the religious past became legion.

Leon Gordon (1830-92).

The most distinguished among these writers was the poet Leon Gordon, an implacable enemy of the Rabbis, who personified in himself this realistic epoch. He began by writing romantic poems in imitation of the two Lebensohns. But when the horizon widened for the Russian Jews, he was filled with pity for the deplorable state of the Orthodox masses, to whom he addressed his "Hakiẓah 'Ammi"—"Awake, my people, to a better life," *i.e.*, "to the life of those about you." Of a mettlesome spirit, he unmercifully attacked the rabbinical law, the dead letter, the religious yoke weighing upon the masses. He regarded rabbinism as the greatest misfortune of the Jewish people, which killed the nation by delivering it up to the more secular Romans, and which hindered its participation in the realities of modern life. Gordon's activity covered all branches of literature. He ranks foremost in Hebrew literature as a satirical poet and critic of manners; and as a writer of fables he has no equal. But in spite of his apparent severity and his extreme skepticism, he remained at heart a patriot; and when he criticizes he does so in order to elevate the social life of the Jews, while grieving for the misery of the Messianic nation. Even in his historical poems, "Ẓidḳiyahu be-Bet ha-Peḳudot" and "Bi-Meẓulot Yam," he displays all his love for his people, which became more pronounced during the years of persecution and misery in Russia. But even then he believed that rabbinism was the enemy which prevented a national renascence. Gordon was among the first successfully to introduce Talmudisms into poetry.

The hopes of the Maskilim were not realized: Russia did not continue its radical reforms; and a reaction began between 1865 and 1870. Disappointed in their dreams of equality, writers now bent all their energies to the work of the emancipation of individuals from among the masses, by disseminating instruction and by advocating the pursuit of trades as being necessary to fit the Jews to deal with the exigencies of life and to take part in the battle for subsistence incident to the economic changes of the time.

Utilitarianism.

In Galicia a circle of scholars, under the leadership of Schorr, director of "He-Ḥaluẓ," and A. Krochmal, advocated religious reforms, boldly attacking tradition and even the law of Moses. But in Russia, especially in Lithuania, the scholars did not go so far. The ideology of the Maskilim was not accepted by the scholars who came in closer contact with the masses; and instead of attacking principles, they advocated practical reforms and changes in conformity with the needs of daily life. Utilitarianism succeeded to the ideology of the earlier scholars. Abraham Kowner in his pamphlet "Ḥeḳer Dabar," etc. (1867) attacked the masters of Hebrew for being idealists, and the press because it ministered neither to the strict necessities of daily life nor to the material well-being of the masses. Paperna and others were also pronounced realists. Moses Lilienblum inaugurated a campaign in favor of the union of life and faith—an endeavor perilous to its author and his emulators, but noteworthy as being the last attempt of rabbinic Judaism to adapt itself to the needs of modern life without giving up its minute observances. In his instructive volume "Ḥaṭṭot Ne'urim," Lilienblum has left a curious document describing the inner conflicts of a young Talmudist of the ghetto who has passed through all the stages between the simple life of an Orthodox believer and that of a skeptical freethinker. Viewing the life of the modern Jew, emancipated and indifferent to all that is Jewish, he is shaken in his highest convictions and cries out, "The Law will never go hand in hand with life." Lilienblum himself at last became a utilitarian, seeking in Jewish life nothing but individual material well-being, and testifying regretfully to the downfall of the haskalah by reason of an excess of ideology. "Young men must think and work for their own lives only." This became the watchword of the last Maskilim toward 1870.

M. Pines.

P. Smolenskin (1842-85).

The ghetto, however, had not yet spoken its final word. Within the confines of traditional Judaism itself the modernization of Hebrew and of the religious spirit was accentuated, leading to a compromise between faith and life. Orthodox journals were beginning to be the mouthpieces of a conservative party more in touch with modern ideas. Side by side with the realistic press—"Ha-Meliẓ," the organ of the realists; "Ha-Ẓefirah," a popular scientific journal; "He-Ḥaluẓ," an antireligious paper; and others—there were "Ha-Maggid" and "Ha-Lebanon," in which Orthodox rabbis enthusiastically advocated the cultivation of Hebrew and boldly offered plans for its rejuvenation as well as for the colonization of Palestine. Michel Pines, the antagonist of Lilienblum, published in 1872 his "Yalde Ruḥi," a treatise displaying deep faith, and in which he bravely defends traditional Judaism, insisting that ritual and religious observances are necessary to a maintenance of the harmony of faith, which influences the mind as well as the morals. Reforms are unnecessary, because believers do not feel the need of them, and freethinkers no longer cherish any beliefs. Like the mass of believers, Pines does not share the pessimism of the realists, but he firmly believes in the national renascence of Judaism. Any understanding between the two parties seemed impossible, the realists no longer believing in the future of Judaism, and the conservatives refusing all attempts at religious reform. Even skeptics like Gordon were alarmed to see "the young people leave without returning." Then, once again, a man arose to undertake the work of mingling the humanistic and the romantic currents and of leading the haskalah back to the living sources of national Judaism. This was Perez Smolenskin, the initiator of the progressive national movement. He, also, began his career, in 1867, with a critical article of pronounced realism, "Biḳḳoret Teḥiyyah." But, disheartened by the fanaticism of the ancients and by the indifference and narrowness of the moderns, he left Russia and traveled first through Austria and later through the other western countries, sorrowfully noting the decadence of Judaism and of his patriotic ideal. At Vienna he issued in 1868 "Ha-Shaḥar," whose object it was to attack medieval obscurantism and modern indifference. For eighteen years Smolenskin continued this laborious campaign. In his "'Am 'Olam" (1872) he appears as the champion of the national preservation of Israel and of the realization of the rabbinical ideal freed from all mysticism. This secularization of an ideal which had constituted Israel's power of resistance had important results. In the first place it restored to Judaism and to Hebrew the best among the young men, who, while still profoundly attached to Judaism and to the life of the masses, had no longer any faith. This prepared the way for Zionism. But this was not all. Smolenskin recognized that one of the chief factors in the process of assimilation was the idea set forth by Mendelssohn and especially by his disciples (Geiger and others) that Judaism does not constitute a nation but a religious confession, an idea which would naturally induce the assimilation of the freethinkers. Smolenskin attacked this idea in a series of articles, which, though violent and often unjust, were yet needed to point out the priority of the national factor over the religious factor in the conservation of Judaism.

"Ha-Shaḥar."

For eighteen years "Ha-Shaḥar" was the rallying-point for daring ideas and campaigns against the obscurantists and the moderns. It was especially noted for the realistic novels of Smolenskin, which, despite their technical shortcomings, take a high place in Hebrew literature. Side by side with character sketches of the ghetto and violent attacks on obscurantism appear a profound love for the masses and an ardent faith in Israel's future and in the apotheosis of young scholars endowed with the soul of prophecy, veritable dreamers of the ghetto. For the first time the Hebrew language, as modernized by Smolenskin, took immense strides. "Ha-Shaḥar" published only original work; and through the support and influence of its editor there arose a whole school of realists who wrote in Hebrew. In addition to Gordon and Lilienblum, there were Brandstädter (the clever creator of the short story in Hebrew), S. Mandelkern, J. L. Levin, Ben Ẓebi, M. Cohn, Silberbusch, Mandelstam, and others. Science was represented by S. Rubin, D. Kohan, Heller, D. Müller, etc.

The influence of "Ha-Shaḥar" was felt throughout Hebrew literature. The popular poet and scholar of the south, A. B. Gottlober, founded his review "Ha-Boḳer Or" (1876) for the purpose of defending Mendelssohn and the haskalah. Gottlober himself contributed character sketches of the Ḥasidim, while the gifted writer R. A. Braudes began in its pages his novel "Ha-Dat weha-Ḥayyim," in which he depicts with masterly hand the struggle for the union of life and faith. Even America boasted a Hebrew journal, "Ha-Ẓofeh be-Ereẓ Nod," published by Sobel. A converted Jew, Salkinson, produced an admirable Hebrew translation of Shakespeare and of Milton, and the socialist Freiman published a review in Hebrew entitled "Ha-Emet" (1878). More important, however, was the great work by I. H. Weiss, "Dor Dor we-Dorshaw," dealing with the evolution of religious tradition. The sciences were taken up by H. Rabbinowitz, Pories, S. Sachs, Reifman, Harkavy, Gurland, J. Halevy, A. Epstein, Zweifel, Popirna, Buber, etc. Even the style was modernized, although the meliẓah did not disappear, as is seen by the writings of Schulman, Friedberg, and others.

Smolenskin's ideas bore fruit. With the return of the national ideal, Hebrew as the national language was again revived. Leon Gordon's literary jubilee was enthusiastically celebrated in St. Petersburg, and after his return from a journey through Russia in 1880, he was everywhere received as the national author, even by the students of the capitals. The appearance of anti-Semitism, the renewed persecutions, and the terrible years 1881 and 1882 finally destroyed the ideals of the haskalah, whose last Hebrew followers were forced to admit that Smolenskin was right.

When the first colonies in Palestine had been founded, and there existed no longer a belief in the possibility of religious reform without an upheaval of Judaism as a whole, it was commonly admitted that the work of Israel's national rebirth should be encouraged. The Hebrew press undertook especially to support the "Ḥobebe Ẓiyyon" (Chovevei Zion), as the Zionists were then called. Hebrew modern literature, which for a century had been progressive and secularizing, now became the instrument of patriotic propaganda. Often those who had formerly advocated reforms now urged the abandonment of modern ideas in order to conciliate the masses. Smolenskin alone did not abandon his civilizing mission, and remained a progressive realist. He finally succumbed to overwork and died in 1885. On his death "Ha-Shaḥar" ceased publication, just one century after the appearance of "Ha-Me'assef" (1785). This was the end of the haskalah. It now gave place to Zionism, which was at first hesitating, but gradually arose to the realization and assertion of its full strength.

Contemporary Literature (1885-1904).

The changing attitude in the profession of faith among Hebrew scholars and the young men who had returned to the national ideal and to the prophetic dreams was of advantage to Hebrew, which now came to be considered as the national language of the Jewish people and the tie uniting the Jews of all countries. While E. Ben-Judah at Jerusalem, through personal example and through propaganda in his journal "Ha-Ẓebi," restored Hebrew as a living language in Palestine, there was an increasing demand for Hebrew books in Russia, and the modernized Jews became ambitious to cultivate the national language. The success of the great literary collection "Ha-Asif" (edited by the writer N. Sokolow), which succeeded "Ha-Shaḥar," soon called forth other publications, noteworthy among which was the Zionistic work "Keneset Yisrael" by the historian S. P. Rabbinowitz, and the more scientific "Oẓar ha-Sifrut."

Daily Press.

In 1886 L. Kantor began the publication of "Ha-Yom," the first Hebrew daily paper; and soon after "Ha-Meliẓ" and "Ha-Ẓefirah" were changed into dailies. A political press, also, was established, and contributed largely to the propagation of Zionism and to the modernization of Hebrew style. The founding of two large publishing-houses (the "Aḥiasaf" and "Tushiyyah"), through the efforts of Ben-Avigdor, finally regulated the conditions for the progress of Hebrew, and created a class of paid writers. Journals, more than other forms of literature, are multiplying, and there are a number even in America.

Literary activity was resumed after a short interval, now on an entirely national basis and in agreement with the many needs of a nationalist group. All the branches of letters, science, and art were assiduously cultivated, without neglecting the renascence of the Jewish people in the land of their fathers. In the field of poetry, besides Mandelkern and Gottlober, both converted to Zionism, are to be found Dolitzky, author of Zionistic songs describing the miseries of the Russian Jews; the two Zionist poets Isaac Rabinowitz and Sarah Shapira, and the gifted lyric poet M. H. Mané, who died at an early age. Perhaps the most noteworthy was C. A. Shapira, an eminent lyric poet, who, embittered by indignation, introduced a new note into Hebrew poetry—hatred of persecution. There is, finally, N. H. Imber, the poet of renascent Palestine and the author of popular songs. Bialik is a lyric poet of much vigor, an incomparable stylist, and a romanticist of note, while his younger contemporary Saul Tschernichowsky is proceeding along new lines, introducing pure estheticism, the cult of beauty and of love, in the language of the Prophets. The most gifted among the younger poets are S. L. Gordon, N. Pinés, A. Lubochitzky, Kaplan, Lipschütz, and A. Cohan.

In the field of belles-lettres Ben-Avigdor is the creator of the new realistic movement; this he expounds in his psychologic stories and especially in his "Menaḥem ha-Sofer," in which he attacks, in the name of modern life, national chauvinism. Braudes became prominent as a romanticist. The aged A. J. Abramowitsch, who has returned to Hebrew, delights his readers by his artistic satires. I. L. Perez has in his songs, as in his poetry, a tendency toward symbolism. M. J. Berdyczewski attempts to introduce Nietzschian individualism into his stories and articles. Feierberg expresses the sufferings of a young scholar seeking truth. Goldin is a pleasing but sentimental writer of stories. Bershadsky is an outspoken realist and close observer. Others deserving mention are: J. Rabinovitz; Turov; A. S. Rabinovitz; Epstein; Asch; J. Steinberg; Goldberg; Brener; the Galicians Silberbusch and Samueli; the poet and prose-writer David Frischman, the translator of "Cain"; J. Ch. Tawjew, who is a distinguished feuilletonist and writer on pedagogics; A. L. Levinsky, the story-teller, author of a Zionist Utopia ("Travels in Palestine in 5800"); and J. L. Landau, the only dramatic poet. As Landau is a poet rather than a psychologist, his "Herod" and other plays are not intended for the theater. The Orientalist Joseph Halévy has published a volume of patriotic poems.

The reaction of 1890 in the work of colonizing Palestine and the evident necessity of taking some steps to meet such a reaction produced the work of "Aḥad ha-'Am" (Asher Ginzberg). He is notably a critic of manners; and in the name of pure ideology he attacked first actual colonization and then political Zionism. Judaism before everything, and not the Jews; a moral and spiritual, not an economic and a political center; a national ideal taking the place of faith—such, in the rough, is the idea of this acute and paradoxical publicist. A number of young men, influenced by his collection "Ha-Pardes" and the review "Ha-Shiloaḥ," founded by him and continued by Klausner, have followed in his lead. Quite opposite in tendencies is Zeeb Ya'beẓ, the editor of "Ha-Mizraḥ," a remarkable stylist and religious romanticist. L. Rabinovitz, the director of "Ha-Meliẓ," in his articles "Ha-Yerushshah weha-Ḥinnuk" also shows himself to be a defender of Jewish tradition, while Ben-Judah, the author of "Hashḳafah" (Jerusalem), constantly opposes obscurantism. N. Sokolow, by the power of his genius, forces Hebrew and modern ideas even upon the Ḥasidim. The critic Reuben Brainin is a close observer, an admirable stylist, and a charming story-teller. The historian S. Bernfeld is a scholarly popularizer of Jewish science.

Pedagogics and juvenile literature also have their periodicals and worthy representatives. Among these are: Lerner, S. L. Gordon, Madame Ben-Judah, Yellin, Grosovsky, and Berman. Many scholars have devoted themselves to science, as the late philosopher F. Misés; the grammarian J. Steinberg, who is an admirable writer; the anatomist, archeologist, and author of popular stories Katzenelenson; Neimark; and Hurvitz. There are, in addition, many translators and compilers who have rendered into Hebrew Longfellow, Mark Twain, Zola, and even De Maupassant; and this work is being actively carried forward. There is a steady increase in the number of daily and weekly journals, all of which, though Zionistic, are none the less progressive. With the emigration of the Russian Jews to foreign countries, Hebrew is finding new centers. In 1904 a course in modern Hebrew literature was instituted at the Sorbonne. Palestine is in a fair way to become the home of Hebrew as a living language, and in America and in England there are numerous publications in Hebrew. Even in the Far East, Hebrew books and periodicals are to be found in increasing numbers, stimulating national and social regeneration. But it must be remembered that the future of Hebrew is intimately connected with Zionism, which is accepted by the masses only by reason of the ideal of national renascence. Faithful to its Biblical mission, the Hebrew language alone is able to revive moral vigor and prophetic idealism, which have never failed where the sacred language has been preserved.

LITHUANIA (Russian or Polish, **Litwa**; in Jewish writings ליטא): Formerly a grand duchy, politically connected more or less intimately with Poland, and with the latter annexed to Russia.

Lithuania originally embraced only the waywodeships of Wilna and Troki; but in the thirteenth century it augmented its territory at the expense of the neighboring principalities and included the duchy of Samogitia (Zhmud; זמיט).

In the first half of the fourteenth century, when Russia was already under the Tatar yoke, the Lithuanian grand duke Gedimin (1316-41) still further increased his possessions by family alliances and by conquest until they came to embrace the territories of Vitebsk, Kiev (1321), Minsk, etc. Under Olgerd and Keistat, sons of Gedimin, the Russian principalities of Chernigov-Syeversk, Podolia (1362), and Volhynia (1377) were also added to Lithuania; and the territory thus extended from the Baltic to the Black Sea.

As early as the eighth century Jews lived in parts of the Lithuanian territory. Beginning with that period they conducted the trade between South Russia, *i.e.*, Lithuania, and the Baltic, especially with Danzig, Julin (Vineta or Wollin, in Pomerania), and other cities on the Vistula, Oder, and Elbe (see Georg Jacob, "Welche Handelsartikel Bezogen die Araber des Mittelalters aus Baltischen Ländern?" p. 1).

When Duke Boleslaw I. of Poland sent Bishop Adalbert of Prague in 997 to preach the Gospel to the heathen Prussians (Lithuanians), the bishop complained that Christian prisoners of war were sold for base money to Jews, and that he was not able to redeem them. Records, of that time, of Jewish residents in KIEV are still extant. About the middle of the twelfth century Rabbi Eliezer of Mayence referred to some ritual customs of the Russian, *i.e.*, Lithuanian, Jews ("Eben ha-'Ezer," p. 74a, Prague, 1710), and in the same century mention was made also of Moses of Kiev. In the thirteenth century Jews lived in Chernigov, Volhynia, and Smolensk.

Among them there were men of learning, as is evidenced by a manuscript in the Vatican Library (Codex 300) dated 1094, and consisting of a commentary on the Bible written in "Russia." Another commentary, dated 1124, also written in Russia, is preserved in Codex Oppenheim Additamenta, Quar. No. 13, at present in the Bodleian Library, Oxford. About the same time there lived in Chernigov Itze (Isaac), who is probably identical with Isaac of Russia. In the first half of the fourteenth century there lived in Toledo, Spain, a Talmudic scholar, Asher ben Sinai, who came from Russia (Asheri, Responsa, part 51, No. 2; Zunz, "'Ir ha-Ẓedeḳ," p. 45). These isolated cases do not prove, however, that Talmudic learning had, at the period in question, become widely diffused in the Lithuanian-Russian territory. As Harkavy has pointed out, the individual efforts of the Russian Talmudists to spread Jewish knowledge did not meet with success until the sixteenth century. In a letter written by Eliezer of Bohemia (1190) to Judah Ḥasid it is stated that in most places in Poland, Russia, and Hungary there were no Talmudic scholars, chiefly because of the poverty of the Jews there, which compelled the communities to secure the services of men able to discharge the three functions of cantor, rabbi, and teacher ("Or Zarua'," p. 40, § 113, Jitomir, 1862). These references to Russia do not necessarily always apply to Lithuania, since Galicia also was designated by that name in Hebrew writings of the Middle Ages, while the Muscovite territory of that time was referred to as "Moskwa." The mention of the name "Lita" first occurs in a responsum of the fifteenth century by Israel Isserlein. He refers to a certain Tobiah who had returned from Gordita (Grodno ?) in Lithuania, and states that "it is rare for our people from Germany to go to Lithuania" (Israel Bruna, Responsa, §§ 25, 73).

Origin of Lithuanian Jews.

The origin of the Lithuanian Jews has been the subject of much speculation. It is now almost certain that they were made up of two distinct streams of Jewish immigration. The older of the two entered Lithuania by way of South Russia, where Jews had lived in considerable numbers since the beginning of the common era (see Armenia; Bosporus; Crimea; Kertch). The fact that these had adopted the Russian language (the official language of the Lithuanians) and the customs, occupations, and even the names of the native population, serves to prove that they came from the East rather than from western Europe. The later stream of immigration originated in the twelfth century and received an impetus from the persecution of the German Jews by the Crusaders. The blending of these two elements was not complete even in the eighteenth century, differences appearing at that time in proper names, in the pronunciation of the Judæo-German dialect, and even in physiognomy.

The peculiar conditions that prevailed in Lithuania compelled the first Jewish settlers to adopt a different mode of life from that followed by their western coreligionists. In the Lithuania of that day there were no cities in the western sense of the word, no Magdeburg Rights or close gilds. Some of the cities which later became the important centers of Jewish life in Lithuania were at first mere villages. Grodno, one of the oldest, was founded by a Russian prince, and is first mentioned in the chronicles of 1128. Novogrudok was founded somewhat later by Yaroslav; Kerlov in 1250; Voruta and Twiremet in 1252; Eiragola in 1262; Golschany and Kovno in 1280; Telshi, Wilna, Lida, and Troki in 1320.

With the campaign of Gedimin and his subjection of Kiev and Volhynia (1320–21) the Jewish inhabitants of these territories were induced to spread throughout the northern provinces of the grand duchy. The probable importance of the southern Jews in the development of Lithuania is indicated by their numerical prominence in Volhynia in the thirteenth century. According to an annalist who describes the funeral of the grand duke Vladimir Vasilkovich in the city of Vladimir (Volhynia), "the Jews wept at his funeral as at the fall of Jerusalem, or when being led into the Babylonian captivity." This sympathy and the record thereof would seem to indicate that long before the event in question the Jews had enjoyed considerable prosperity and influence, and this gave them a certain standing under the new régime. They took an active part in the development of the new cities under the tolerant rule of Gedimin.

The Charter of 1388.

Little is known of the fortunes of the Lithuanian Jews during the troublous times that followed the death of Gedimin and the accession of his grandson Witold (1341). To the latter the Jews owed a charter of privileges which was momentous in the subsequent history of the Jews of Lithuania. The documents granting privileges first to the Jews of Brest (July 1, 1388) and later to those of Troki, Grodno (1389), Lutsk, Vladimir, and other large towns are the earliest documents to recognize the Lithuanian Jews as possessing a distinct organization. The gathering together of the scattered Jewish settlers in sufficient numbers and with enough power to form such an organization and to obtain privileges from their Lithuanian rulers implies the lapse of considerable time. The Jews who dwelt in smaller towns and villages were not in need of such privileges at this time, as Harkavy suggests, and the mode of life, the comparative poverty, and the ignorance of Jewish learning among the Lithuanian Jews retarded their intercommunal organization. But powerful forces hastened this organization toward the close of the fourteenth century. The chief of these was probably the cooperation of the Jews of Poland with their Lithuanian brethren. After the death of Casimir the Great (1370), the condition of the Polish Jews changed for the worse. The influence of the Catholic clergy at the Polish court grew; Louis of Anjou was indifferent to the welfare of his subjects, and his eagerness to convert the Jews to Christianity, together with the increased Jewish immigration from Germany, caused the Polish Jews to become apprehensive for their future. On this account it seems more than likely that influential Polish Jews cooperated with the leading Lithuanian communities in securing a special charter from Witold.

The preamble of the charter reads as follows:

"In the name of God, Amen. All deeds of men, when they are not made known by the testimony of witnesses or in writing, pass away and vanish and are forgotten. Therefore, we, Alexander, also called Witold, by the grace of God Grand Duke of Lithuania and ruler of Brest, Dorogicz, Lutsk, Vladimir, and other places, make known by this charter to the present and future generations, or to whomever it may concern to know or hear of it, that, after due deliberation with our nobles we have decided to grant to all the Jews living in our domains the rights and liberties mentioned in the following charter."

The charter contains thirty-seven sections, which may be summarized as follows:

(1) In criminal or other cases involving the person or property of a Jew, the latter can not be convicted on the testimony of one Christian witness; there must be two witnesses—a Christian and a Jew. (2) Where a Christian asserts that he has placed an article in pawn with a Jew, and the Jew denies it, the latter may clear himself by taking the prescribed oath. (3) Where a Christian claims that he has pawned an article with a Jew for a sum less than that claimed by the latter, the Jew's claim shall be allowed if he take the usual oath. (4) Where a Jew claims he has loaned money to a Christian, but has no witnesses to prove it, the latter may clear himself by taking an oath. (5) Jews may make loans on any personal property except blood-stained articles or articles employed in religious service. (6) Where a Christian asserts that an article pawned to a Jew has been stolen from a Christian, the Jew, after swearing that he was ignorant of the robbery, is relieved of responsibility to the owner of the article, and need not return it until the sum advanced by him, with the interest, has been repaid. (7) Where a Jew loses pawned property by fire or robbery he is relieved from responsibility for articles so lost if he takes an oath that such articles were lost together with his own. (8) A suit between Jews may not be decided by a city judge, but must be submitted in the first instance to the jurisdiction of the subwaywode, in the second instance to the waywode, and finally to the king. Important criminal cases are subject to the jurisdiction of the king alone. (9) A Christian found guilty of inflicting wounds upon a Jewess must pay a fine to the king and damages and expenses to the victim, in accordance with the local regulations. (10) A Christian murdering a Jew shall be punished by the proper court and his possessions confiscated to the king. (11) A Christian inflicting injuries upon a Jew, but without shedding blood, shall be punished in accordance with local law. (12) A Jew may travel without hindrance within the limits of

Grand Duchy of Lithuania at its Greatest Extent, Showing Cities Where Jews Lived.

the country, and when he carries merchandise he shall pay the same duties as the local burghers. (13) Jews may transport the bodies of their dead free of taxation. (14) A Christian injuring a Jewish cemetery shall be punished in accordance with the local law and his property confiscated. (15) Any person throwing stones into the synagogue shall pay to the waywode a fine of two pounds. (16) A Jew failing to pay to the judge the fine called "wandil" shall pay the anciently established fine. (17) Any Jew not appearing in court after being twice summoned shall pay the customary fine. (18) A Jew inflicting wounds on another Jew shall be fined in accordance with local custom. (19) A Jew may take an oath on the Old Testament in important cases only, as where the claim exceeds in value fifty "griven" of pure silver, or where the case is brought before the king. (20) Where a Christian is suspected of killing a Jew, though there were no witnesses, and the relatives of the victim declare their suspicion, the king is to give the Jews an executioner for the accused. (21) Where a Christian assaults a Jewess he shall be punished according to local usage. (22) A subwaywode may not summon Jews to his court except on a regular complaint. (23) In cases concerning Jews the court is to sit either in the synagogue or in a place selected by the Jews. (24) Where a Christian pays the sum advanced to him on any article when due, but omits to pay the interest, he shall be given a written extension of time, after which the sum unpaid shall be subject to interest until paid. (25) The houses of Jews are free from military quartering. (26) When a Jew advances to a noble a sum of money on an estate, the Jew is entitled, if the loan be not repaid on maturity, to the possession of the property, and shall be protected in its possession. (27) A person guilty of stealing a Jewish child shall be punished as a thief. (28) If the value of an article pawned with a Jew by a Christian for a period less than a year does not exceed the amount advanced upon it, the pawnbroker, after taking the article to his waywode, may sell it; but if the article is of greater value than the sum advanced the Jew shall be obliged to keep it for a further period of one year and one day, at the expiration of which time he shall become its possessor. (29) No person may demand the return of pawned property on Jewish holy days. (30) Any Christian forcibly taking an article pawned with a Jew, or entering a Jewish house against the wish of its owner, shall be subject to the same punishment as a person stealing from the common treasury. (31) To summon a Jew to appear in court is allowed only to the king or the waywode. (32) Since the papal bulls show that Jews are forbidden by their own law to use human blood, or any blood whatever, it is forbidden to accuse Jews of using human blood. But in the case of a Jew accused of the murder of a Christian child, such accusation must be proved by three Christians and three Jews. If the Christian accuser is unable to prove his accusation he shall be subjected to the same punishment that would have been inflicted on the accused had his guilt been proved. (33) Loans made by Jews to Christians must be repaid with interest. (34) The pledging of horses as security on loans made by Jews must be done in the daytime; in case a Christian should recognize a horse stolen from him among horses pawned with a Jew, the latter must take an oath that the horse was received by him in the daytime. (35) Mint directors are forbidden to arrest Jews, when the latter are found with counterfeit coin, without the knowledge of the king's waywode, or in the absence of prominent citizens. (36) A Christian neighbor who shall fail to respond at night when a Jew calls for help shall pay a fine of thirty "zloty." (37) Jews are permitted to buy and sell on the same footing as Christians, and any one interfering with them shall be fined by the waywode.

The charter itself was modeled upon similar documents granted by Casimir the Great, earlier by Boleslaw of Kalisz, to the Jews of Poland. These in their turn were based on the charters of Henry of Glogau (1251), King Ottokar of Bohemia (1254–67), and Frederick II. (1244), and the last-mentioned upon the charter of the Bishop of Speyer (1084). The successive remodelings of the different documents were made necessary by the characteristic customs and conditions of the various countries; and for this reason the charter granted by Witold to the Jews of Brest and Troki is distinguished from its Polish and German models by certain peculiarities. The chief digressions are in §§ 8, 21, 28, 33, and 35. The distinctive features were made more manifest in the later issues of these privileges by the attempt to conform them to the needs of Lithuanian-Russian life. While the earlier charters of Brest and Troki were evidently framed upon western models for a class of Jews largely engaged in money-lending, the charters of Grodno (June 18, 1389 and 1408) show the members of that community engaged in various occupations, including agriculture. The charter of 1389 indicates that the Jews of Grodno, the residence of Witold, had lived there for many years, owning land and possessing a synagogue and cemetery near the Jewish quarter. They also followed handicrafts and engaged in commerce on equal terms with the Christians.

The "Starosta."

As the Jews of Germany were servants of the rulers ("Kammerknechte"), so the Lithuanian Jews formed a class of freemen subject in all criminal cases directly to the jurisdiction of the grand duke and his official representatives, and in petty suits to the jurisdiction of local officials on an equal footing with the lesser nobles ("Shlyakhta"), boyars, and other free citizens. The official representatives of the grand duke were the elder ("starosta"), known as the "Jewish judge" ("judex Judæorum"), and his deputy. The Jewish judge decided all cases between Christians and Jews and all criminal suits in which Jews were concerned; in civil suits, however, he acted only on the application of the interested parties. Either party who failed to obey the judge's summons had to pay him a fine. To him also belonged all fines collected from Jews for minor offenses. His duties included the guardianship of the persons, property, and freedom of worship of the Jews. He had no right to summon any one to his court except upon the complaint of an interested party. In matters of religion the Jews were given extensive autonomy.

Under these equitable laws the Jews of Lithuania reached a degree of prosperity unknown to their Polish and German coreligionists at that time. The communities of Brest, Grodno, Troki, Lutsk, and Minsk rapidly grew in wealth and influence. Every community had at its head a Jewish elder. These elders represented the communities in all external relations, in securing new privileges, and in the regulation of taxes. Such officials are not, however, referred to by the title "elder" before the end of the sixteenth century. Up to that time the documents merely state, for instance, that the "Jews of Brest humbly apply," etc. On assuming office the elders declared under oath that they would discharge the duties of the position faithfully, and would relinquish the office at the expiration of the appointed term. The elder acted in conjunction with the rabbi, whose jurisdiction included all Jewish affairs with the exception of judicial cases assigned to the court of the deputy, and by the latter to the king. In religious affairs, however, an appeal from the decision of the rabbi and the elder was permitted only to a council consisting of the chief rabbis of the king's cities. The cantor, sexton, and shoḥeṭ were subject to the orders of the rabbi and elder.

The favorable position of the Jews in Lithuania during the reign of Witold brought to the front a number of the wealthier Jews, who, besides engaging in commerce, also leased certain sources of the ducal revenues or became owners of estates. The first known Jewish farmer of customs duties in Lithuania was "Shanya" (probably Shakna), who was presented by Witold with the villages Vinnike and Kalusov in the district of Vladimir. The good-will and tolerance of Witold endeared him to his Jewish subjects, and for a long time traditions concerning his generosity and nobility of character were current among them. He ruled Lithuania independently even when that country and Poland were united for a time in 1413. His cousin, the Polish king Ladislaus II., Jagellon, did not interfere with his administration during Witold's lifetime.

Under the Jagellons.

After Witold's death Ladislaus assumed active sovereignty over a part of Lithuania. He granted (1432) the Magdeburg Rights to the Poles, Germans, and Russians of the city of Lutsk, while in the case of the Jews and Armenians the Polish laws were made effective (see Poland). This policy toward his Jewish subjects in Poland was influenced by the clerical party, and he attempted to curtail the privileges granted to them by his predecessors. However, his rule in Lithuania was too short to have a lasting effect on the life of the Lithuanian Jews.

Swidrigailo, who became Grand Duke of Lithuania at the death of Witold (1430), strove to prevent the annexation of Volhynia and Podolia to the Polish crown. He availed himself of the service of Jewish tax-farmers, leasing the customs duties of Vladimir to the Jew Shanya and those of Busk to the Jew Yatzka. There is, however, reason for the belief that he was not always friendly toward the Jews, as is shown by his grant of the Magdeburg Rights to the city of Kremenetz and the placing of all the inhabitants, including the Jews, under the jurisdiction of the German waywode Yurka (May 9, 1438). The latter act may have been prompted by his desire to retain the allegiance of the German inhabitants of Volhynia. Swidrigailo was assassinated in the year 1440, and was succeeded by Casimir Jagellon.

As Grand Duke of Lithuania (1440–92) Casimir Jagellon pursued toward his Jewish subjects the liberal policy of Witold. In 1441 he granted the Magdeburg Rights to the Karaite Jews of Troki on conditions similar to those under which they were granted to the Christians of Troki, Wilna, and Kovno; giving the Troki Karaites, however, a wider autonomy in judicial matters and in communal affairs, allowing them one-half of the city revenues, and presenting them with a parcel of land. The Troki and Lutsk Karaites were descendants of 380 families brought, according to tradition, by Witold from the Crimea at the end of the fourteenth century, when Rabbinite Jews were already established in Troki (see Graetz, "History," Heb. transl. by Rabinowitz, vi. 225). Settling originally in New Troki, the Karaites subsequently spread to other Lithuanian and Galician towns. The poorer among them were, like most of the Rabbinite Jews, engaged in agriculture and handicrafts, while the richer members were, like the wealthier Rabbinites, leaseholders and tax-farmers. The Lithuanian rulers of that time did not make any distinction between Rabbinites and Karaites, designating both in their decrees merely as "Jews" ("Zidy"). See Karaites.

Jews as Tax-Farmers.

In 1453, for services rendered to him, Casimir granted to the Jew Michael of Hrubieszów, his wife, and their son Judah, exemption from all taxes and customs duties throughout the country. Between 1463 and 1478 he presented to Levin Schalomich certain lands in the waywodeship of Brest, together with the peasants living on them. In 1484 he awarded the lease of the customs duties of Novgorod for three years to the Troki Jews Ilia Moiseyevich, Ruwen Sakovich, Avraam Danilovich, and Jeska Schelemovich. In 1485 he ordered the waywode of Troki to see that the Jewish part of the town paid its taxes separately, this arrangement being made in response to a petition from the Jews themselves. In 1486 he leased the customs of Kiev, Wischegorod, and Jitomir for a term of three years to Simha Karvchik, Sadke and Samak Danilovich, Samaditza, and Ryzhka, who were Jews of Kiev and Troki. In the same year the customs duties of Bryansk were leased to Mordecai Gadajewich and Perka Judinovich of Kiev; certain taxes of Grodno and Meretz to Enka Jatzkovich and his sons of Grodno; and the customs duties of Putivl to Jews of Kiev and Troki. In 1487 the customs duties of Brest, Drohycin, Byelsk, and Grodno were leased to Astaschka Ilyich, Onatani Ilyich, and Olkan, Jews of Lutsk, and the customs duties of Lutsk to Shachna Peisachovich and Senka Mamotlivy. In 1488 certain taxes of Grodno and Meretz were again leased to Jatzkovich and his sons, and the customs duties of Zvyagol to the Lutsk Jews Israel, Yeska, and Judah. In the following year the customs duties of Minsk were leased to the Jew of Troki, Michael Danilovich; the customs duties of Vladimir, Peremyshl, and Litovishk to the Jews of Brest and Hrubieszów; and the customs duties of Kiev and Putivl to Rabei and other Jews of Kiev. In 1490 certain revenues of Putivl were leased to Merovach and Israel of Kiev and Abraham of Plotzk. These leases prove that throughout Casimir's reign the important commercial and financial affairs of the grand duchy were largely managed by Jewish leaseholders, to whom he was heavily indebted. At times his treasury was depleted to such an extent as to compel him to pawn the queen's robes and his silverware, but the Jews came to his aid in time of need. According to the Polish historian Jaroszewicz in his "Obraz Litwy," the Jews of Lithuania after the reign of Casimir Jagellon were intimately connected with the development of the country's commerce. Their business ventures reached far beyond Lithuania, most of the export trade to Prussia and the Baltic Sea being in their hands.

Commercial Relations.

Historians are agreed that Casimir was not a strong and just ruler. He did not scruple to give contradictory promises to Poland and Lithuania, and his frequent favors to the Jews do not necessarily show that he was their friend. At most he considered them as useful agents in his financial undertakings.

The influential Jewish tax-farmers often encountered difficulties with foreign merchants. The Russian Grand Duke Ivan Vassilivich III. repeatedly made representations to Casimir in regard to the high-handed treatment of Muscovite merchants and ambassadors by the tax-collectors Shan (the son-in-law of Agron), Simha, Ryabchik, and others. The king upheld his Jewish tax-farmers on the ground that the Russian merchants attempted to evade payment of customs duties by choosing rarely traveled roads. From these documents it is also clear that the Jewish customs officials had under them armed men to arrest violators of the regulations. At Casimir's death (1492) many of his Jewish creditors were left unpaid.

Expelled by Alexander.

Casimir was succeeded as king of Poland by his son John Albert, and on the Lithuanian throne by his younger son, Alexander Jagellon. The latter confirmed the charter of privileges granted to the Jews by his predecessors, and even gave them additional rights. His father's Jewish creditors received part of the sums due to them, the rest being withheld under various pretexts. Jewish tax-farmers continued to lease the customs duties in the important cities, as is exemplified by a lease of those of Brest, Drohoczyn, Grodno, and Byelsk (Oct. 14, 1494) to four Jews of Brest. The favorable attitude toward the Jews which had characterized the Lithuanian rulers for generations was unexpectedly and radically changed by a decree promulgated by Alexander in April, 1495. By this decree all Jews living in Lithuania proper and the adjacent territories were summarily ordered to leave the country.

The expulsion was evidently not accompanied by the usual cruelties; for there was no popular animosity toward the Lithuanian Jews, and the decree was regarded as an act of mere wilfulness on the part of an absolute ruler. Some of the nobility, however, approved Alexander's decree, expecting to profit by the departure of their Jewish creditors, as is indicated by numerous lawsuits on the return of the exiles to Lithuania in 1503. It is known from the Hebrew sources that some of the exiles migrated to the Crimea, and that by far the greater number settled in Poland, where, by permission of King John Albert, they established themselves in the towns situated near the Lithuanian boundary. This permission, given at first for a period of two years, was extended "because of the extreme poverty of the Jews on account of the great losses sustained by them." The extension, which applied to all the towns of the kingdom, accorded the enjoyment of all the liberties that had been granted to their Polish brethren (Cracow, June 29, 1498). The expelled Karaites settled in the Polish town of Ratno.

The causes of the unexpected expulsion have been widely discussed. It has been suggested by Narbut and other Lithuanian historians that the decree was the outcome of Alexander's personal animosity toward the Jews, he having been educated by the Polish historian Dlugosc (Longinus), an avowed enemy of the Jews. Others have held that it was instigated by the grand duchess Helena, daughter of Ivan III. of Russia. Legend has it that she was at first very friendly toward the Jews, but having been rendered barren by a Jewish midwife through the aid of witchcraft, her father demanded the punishment of the witches, and the decree of expulsion followed. The improbability of this story has been demonstrated by Bershadski ("Litovskie Yevrei," p. 251), who shows that the marriage took place in Feb., 1495, and that the expulsion occurred in April of the same year. Bershadski and Harkavy suggest as a probable motive the pressure put upon Alexander by the Catholic clergy. He may have been influenced by the expulsion of the Jews from Spain (1492). This view is strengthened by his continued favors to the baptized Jews, as exemplified by his lease to Simsha of Troki (who had adopted the Christian faith); of the customs at Putivl in the same year to Feodor, "the newly baptized," and his son-in-law Peter; and the grant to the former tax-farmer of Putivl, "the newly baptized" Ivan, of one-third of the income from these customs duties; and above all by the very marked favors shown by him to Abraham Jesofovich after his baptism, Alexander going so far as to create him a member of the hereditary nobility. These favors indicate that if the expulsion was due to animosity on Alexander's part, such animosity was a religious rather than a racial one. Another motive suggested by Bershadski was the financial embarrassment of the grand duke, then heavily indebted to the wealthy Jewish tax-farmers and leaseholders. During the settlement with his Jewish creditors (Dec., 1494), *i.e.*, four months before the expulsion, it was noticed that Alexander was much troubled over the condition of his finances, as was evidenced by his repudiation for one reason or another of a part of his debts ("Russko-Yevreiski Arkhiv," i., No. 26). Alexander's extravagance was commonly known; and it was said of him that "he pawned everything that he did not give away." The depleted condition of his treasury may have driven him to adopt drastic measures. By confiscating the estates of the Jews the grand duke became the owner of their property. He presented a part of these estates to monasteries, charitable institutions, and baptized Jews "for certain considerations," and turned the proceeds into the grand-ducal treasury. A third motive assumed by Bershadski was the desire to replace the Jews by German settlers. As to the second and third of these possible motives, documents show that, while they may have helped Alexander to reach his decision, yet there was a certain foundation for the popular tradition concerning the influence of Grand Duchess Helena in the matter. As the daughter of Ivan III. she must have been aware of the grave apprehensions created in Moscow by the successful propaganda of the Judaizing sect, and the probable fear of the Lithuanian clergy that the Judaizing Heresy would spread to Lithuania. The success of the new teaching was impressed upon it by the conversion of Helena's sister-in-law the Princess Helena of Moscow (daughter-in-law of Ivan III.), the Russian secretary of state Kuritzyn, and the Metropolitan of Moscow Zosima. The clergy, alarmed at the success of the new heresy, probably convinced Alexander that its encouragement by Ivan III. and his court would create a grave political danger for Lithuania.

Escheat of Jewish Property.

Soon after the promulgation of the decree the Jewish tax-farmers hastened to adjust their affairs and to render their accounts to Alexander, but evidently they could collect only a small portion of the sums due to them. The more valuable of the real property left by them was soon disposed of by the grand duke. In June, 1495, he presented his furrier Sova with an estate near Troki, together with the cattle, grain, and all else pertaining to it, which had belonged to the Jew Shlioma. On June 26 of the same year he presented the nobleman Soroka and his brother with estates belonging to the Jews Enko Momotlivy and Itzchak Levanovich and situated in the district of Lutsk. On July 15 the Bishop of Wilna was granted the houses and estates of the Jews Bogdan Chatzkovich and Ilia Kunchich, while the city of Wilna received as a gift the house formerly belonging to the Jew Janushovski. On Aug. 10 the farm of the Konyukovich brothers in the district of Grodno was given by Alexander to his secretary Lyzovy, and on Aug. 30 he presented a house in Lutsk, once the property of the Jew Enka, to his stableman Martin Chrebtovich. On March 12, 1496, the nobleman Semashkowich received the farm in Volhynia belonging to the Jews Nikon and Shlioma Simshich, and on March 21 all the properties left vacant by the Jews in Grodno. On Oct. 4 the estates of the brothers Enkovich of Brest were presented to Alexander's secretary Fedka Janushkovich; on Jan. 27, 1497, the estate of Kornitza, formerly belonging to the Jew Levon Shalomich, was given to Pavel, magistrate of Brest-Litovsk. In July of the same year all the unoccupied properties left by the Jews of Lutsk were presented to the elders of the city, in order to encourage new settlers. This distribution of Jewish property by Alexander was continued until the middle of 1501.

Return to Lithuania.

Soon after Alexander's accession to the throne of Poland he permitted the Jewish exiles to return to Lithuania. Beginning March, 1503, as is shown by documents still extant, their houses, lands, synagogues, and cemeteries were returned to them, and permission was granted them to collect their old debts. The new charter of privileges permitted them to live throughout Lithuania as heretofore. It also directed the vice-regent of Wilna and Grodno, Prince Alexander Juryevich, to see that the Jews were restored to the enjoyment of their former property and assisted in the collection of debts due to them. The privilege was accorded them of repurchasing also the property originally owned by them at the price paid by their successors to the grand duke. They were likewise to pay all expenses for improvements and for the erection of new buildings, and were obliged to pay all mortgages. Moreover, they were required to equip annually a cavalry detachment of 1,000 horsemen besides paying large annual sums to the local authorities.

The return of the Jews and their attempt to regain their old possessions led to many difficulties and lawsuits. Alexander found it necessary to issue an additional decree (April, 1503), directing his vice-regent to enforce the law. In spite of this some of the property was not recovered by the Jews for years.

The tax-farmers returned to their old occupations, and were shown many marks of favor by Alexander. He could not, however, obliterate the remembrance that he had robbed the Jews. The permission given the exiles to return is ascribed to the depleted condition of his treasury and to the impending war with Russia, combined with the efforts of the influential Jews of Poland and the baptized Jews of Lithuania to secure their return.

Sigismund I.

The improvement in the condition of the Jews was especially marked in the reign of Alexander's youngest brother, Sigismund I. (1506–48). Among his first decrees was one (Dec. 22, 1506) which relieved the two synagogues of Lutsk—the Rabbinite and the Karaite—from the annual tax of 12 kop groschen imposed upon them by the city authorities. In January of the following year he confirmed, at the request of the Lithuanian Jews, the grant of privileges made by Witold in 1388. This was modeled after the original charter of Brest and was included in the first Lithuanian statute of 1529. Numerous other examples of his good-will toward the Jews show that while being a good Catholic he was free from fanaticism and religious intolerance. He looked upon his Jewish subjects as a class of men contributing by their usefulness to the welfare of the country, and as being entitled to the protection of equitable laws.

Like his predecessors, Sigismund availed himself extensively of the services of the wealthy tax-farmers. He borrowed large sums from them and in return accorded them special privileges. The most influential among the tax-farmers at his court, at the beginning of his reign, was Michael Jesofovich. When, in 1508, Prince Glinski rebelled against Sigismund, and by an agreement with the rulers of Moscow attempted to effect the annexation of portions of Poland and Lithuania to the Muscovite empire, two Jews of Brest, Itzko and Berek, aided the prince in his undertaking, and furnished him with secret information. Michael Jesofovich excommunicated them with the blowing of the shofar and with great public solemnity. In recognition of Michael's services, and prompted also by the desire to establish a more perfect system of tax-collection, Sigismund appointed him prefect over all the Lithuanian Jews (1514). This was a similar appointment to that of Abraham of Bohemia as prefect of the Polish Jews (1512). Like Abraham, Michael was invested with wide powers. He had the right to communicate directly with the king on important Jewish matters, and with the aid of a learned rabbi to administer justice among his coreligionists in accordance with their special laws. Michael's actual authority concerned the collection of taxes rather than the internal communal administration; and whatever his religious powers may have been, he certainly was not chief rabbi of the Lithuanian Jews, as some Jewish historians have stated.

This and similar acts, accompanied by the strengthening of the communal organizations, added to the prosperity of the Lithuanian communities. The most flourishing among them at the time were those

Prosperity of the Congregations.

of Brest, Grodno, Troki, Pinsk, Ostrog, Lutsk, and Tykotzin. The members of the communities found themselves in a better position legally than the burghers, although in practise the Jews were often deprived of the full enjoyment of their rights. According to the Lithuanian statutes of 1529 the murder of a Jew, a nobleman, or a burgher was punishable by death, and compensation was to be paid by the family of the murderer to that of the victim. But while the life of a Jew or a nobleman was valued at 100 kop groschen, that of a burgher was valued at only 12 kop groschen. Proportionate compensation was provided for personal injuries. The prominent Jewish tax-farmers frequently exceeded their legal powers, as is shown by complaints to the authorities. Thus in 1538 Goshko Kozhchich, a Jew of Brest, was fined 20 kop groschen for the illegal imprisonment of the nobleman Lyshinski. Similarly in 1542 the Jew Zachariah Markovich was ordered to pay 12 kop groschen as compensation for assaulting the king's boyar Grishka Kochevich. On the other hand, numerous instances are recorded of the friendly intercourse between Jews and Christians. They drank and ate in common, and the Jews took part in the Christian festivals and even vied with their Christian neighbors in athletic feats. But with the exception of a few wealthy Jewish tax-collectors, the Jews of Lithuania were not a great economic or political force. In their mode of life they were not markedly different from the rest of the population, and the names of the Jewish middle class are rarely met with in official documents. The rich Jews, however, are frequently mentioned in connection with their official business.

Rumors of Converts to Judaism.

About 1539, rumors were spread by a baptized Jew that many Christians had adopted the Mosaic faith and had found refuge and protection among the Jews of Lithuania. An investigation was ordered by Sigismund, but it failed to disclose anything incriminating the Jews. None the less, in the course of the inquiry the king's nobles subjected the Jews to great annoyance. They unjustly arrested them on the highways, broke into their houses, and otherwise maltreated them. Before the conclusion of the investigation another rumor was spread ascribing to the Lithuanian Jews the intention to emigrate to Turkey and to take the new converts with them. New inquiries accompanied by similar excesses and abuses were made. The Jews sent numerous deputations to the king, protesting their innocence. Their assertions were substantiated by the findings of a special commission; and Sigismund hastened to declare the Jews free from any suspicion (1540).

In the last years of Sigismund's reign, and even during part of that of Sigismund August, Bona Sforza shared in their government, sometimes assuming absolute authority. The energetic queen was herself eager to make and to save money. Among the many decrees issued by her in her own name are two of special interest, as evidencing the occurrence of internal conflicts in Jewish communities. These deal with the quarrel in the community of Grodno between the powerful Judah family (Yudichi) and the rest of the community, due to the appointment of a rabbi in opposition to the wishes of a majority of the congregation. This rabbi was Mordecai, son-in-law of Judah Bogdanovich, and he is probably identical with Mordecai ben Moses Jaffe, rabbi of Cracow, who died about 1568. He should not be confounded with Mordecai ben Abraham Jaffe, author of "Lebushim" (1530–1612), who also was rabbi of Grodno (1572). Queen Bona decreed that the opposing faction be permitted to appoint a rabbi of its own, who was not to be related to the Judah family, and that the members of the latter should not call themselves "elders" of the Jews, a title that should be assumed only with the consent of the entire community. Accordingly, Moses ben Aaron was elected rabbi by opponents of the Judah family. This case tends to show that Mordecai Jaffe represented the Bohemian party, and Moses ben Aaron the Lithuanian-Polish faction.

Under Sigismund II.

Sigismund II., August, only son of Sigismund I., succeeded as Grand Duke of Lithuania (1544) before the death of his father. He succeeded to the Polish throne in 1548. Liberal in his rule and in his treatment of his Jewish subjects, he accorded them the same tolerance as he did the Lutherans and Calvinists, who were then beginning to grow in numbers both in Poland and in Lithuania. Like all the Jagellons, he was a great spendthrift and of loose morals, but was none the less mindful of the welfare of his people. At the beginning of his reign the power of the lesser nobles ("Shlyakhta") was still limited. They did not participate in the legislative, judicial, or administrative affairs of Lithuania. Until then the rights of the nobility, and of the Jews had differed but slightly. Thus the rabbi of Brest, Mendel Frank, was styled "the king's officer," and the Jew Shmoilo Israilevich was appointed deputy to the governor of Wilna. The more prominent Jews were always called in official documents "Pany" ("Sirs"). Like the nobility, the Jews carried swords, and were ready to fight whenever the occasion warranted. They wore also golden chains, and rings on which were engraved coats of arms. Until the union of Lublin (1569) the Jews of Lithuania, with few exceptions, lived on grand-ducal lands, and as subjects of the king enjoyed his protection. Thus the king ordered the reigning prince, Juri Semionovich of Slutsk, to pay damages for illegal acts against certain Jews, instructing the local authorities in case of opposition on the part of the prince to place the Jews in possession of his estates. The Jews could also collect debts not only from the Lithuanian lords, but even from such prominent persons as the Grand Duke of Ryazan. King Sigismund even entered into a diplomatic correspondence with the Grand Duke of Moscow urging the restoration of merchandise confiscated in Russia from Lithuanian Jewish merchants. The relations between the Jews and the local authorities were governed partly by their charters of privileges and partly by custom. The Jews, for instance, made presents to the magistrate or elder, but were quite independent in their dealings with them. The local officials were answerable to the king for illegal acts.

The middle of the sixteenth century witnessed a

Rise of Opposition.

growing antagonism between the lesser nobility and the Jews. Their relations became strained, and the enmity of the Christians began to disturb the life of the Lithuanian Israelites. The anti-Jewish feeling, due at first to economic causes engendered by competition, was fostered by the clergy, who were then engaged in a crusade against heretics, notably the Lutherans, Calvinists, and Jews. The Reformation, which had spread from Germany, tended to weaken the allegiance to the Catholic Church. Frequent instances occurred of the marriage of Catholic women to Jews, Turks, or Tatars. The Bishop of Wilna complained to Sigismund August (Dec., 1548) of the frequency of such mixed marriages and of the education of the offspring in their fathers' faiths. The Shlyakhta also saw in the Jews dangerous competitors in commercial and financial undertakings. In their dealings with the agricultural classes the lords preferred the Jews as middlemen, thus creating a feeling of injury on the part of the Shlyakhta. The exemption of the Jews from military service and the power and wealth of the Jewish tax-farmers intensified the resentment of the Shlyakhta. Members of the nobility, like Borzobogaty, Zagorovski, and others, attempted to compete with the Jews as leaseholders of customs revenues, but were never successful. Since the Jews lived in the towns and on the lands of the king, the nobility could not wield any authority over them nor derive profit from them. They had not even the right to settle Jews on their estates without the permission of the king; but, on the other hand, they were often annoyed by the erection on their estates of the tollhouses of the Jewish tax-collectors.

Action of the Nobles.

Hence when the favorable moment arrived the Lithuanian nobility endeavored to secure greater power over the Jews. At the Diet of Wilna in 1551 the nobility urged the imposition of a special poll-tax of one ducat per head, and the Volhynian nobles demanded that the Jewish tax-collectors be forbidden to erect tollhouses or place guards at the taverns on their estates. In 1555 the illegal treatment of the Jews by Zhoslenski, the magistrate of Wilna, led Sigismund August to announce that a fine of 300 kop groschen would follow any repetition of such an excess of power. In 1559 the nobility of Samogitia complained of abuses by Jewish tax-collectors and demanded that the collection of customs duties be entrusted to them on the same terms as to the Jews. In 1560 the king found it necessary to prohibit the magistrates of Volhynia from assuming jurisdiction over the clerks of the tax-collector Mendel Isakovich. In 1563 the Lithuanian nobility demanded that the Jews furnish 2,000 foot-soldiers and an even greater number of sharpshooters. In 1564 Bernat Abramovich, clerk of the prominent tax-collector Isaac Borodavka, was arrested and tried on the accusation of having murdered a Christian child. The royal chamberlain testified that he had heard the confession of Bernat shortly before his execution, and that he had solemnly declared his innocence. Investigation proved the falseness of the charge, which had been prompted by enmity toward Borodavka.

A similar unfounded accusation of two other servants of Borodavka in 1566 led Sigismund August to declare the innocence of the accused, and to reaffirm the decree of Aug. 9, 1564, by which all Jews accused of the murder of Christian children or of desecrating the host were to be tried by the king himself before the assembled Diet. Until the time of trial the accused were to be surrendered for safe-keeping to two of their coreligionists. The guilt of the accused could be declared only on the testimony of four Christian and three Jewish witnesses. The failure to prove the accusation rendered the accuser liable to loss of life and property. In this decree the king also reminded the Christians of the grand duchy that previous charters and papal bulls had amply proved that Jews were not in need of Christian blood for the purposes of their ritual.

The Act of 1566.

The opposition to the Jews was finally crystallized and found definite expression in the repressive Lithuanian statute of 1566, when the Lithuanian nobles were first allowed to take part in the national legislation. Paragraph 12 of this statute contains the following articles: "The Jews shall not wear costly clothing, nor gold chains, nor shall their wives wear gold or silver ornaments. The Jews shall not have silver mountings on their sabers and daggers; they shall be distinguished by characteristic clothes; they shall wear yellow caps, and their wives kerchiefs of yellow linen, in order that all may be enabled to distinguish Jews from Christians." Other restrictions of a similar nature are contained in the same paragraph. However, the king checked the desire of the nobility to modify essentially the old charters of the Jews.

Twenty years later the royal veto was ineffective against the increasing power of the nobility; but by that time the attitude of the latter toward the Jews had undergone such a complete change that instead of adding new restrictions the nobility abolished most of the regulations which had been so objectionable.

After the Union of Lublin.

Through the union with Lithuania, Poland gained in power and exerted a greater influence on the former country. The introduction of the reformed faith (the teachings of Calvin) met with ready acceptance by the nobility and middle classes. The new religious ideas brought in their wake a taste for science and literature, and Jewish and Christian children sought learning in the same schools. A number of young men went to Germany and Italy for the study of medicine and astronomy. The inmates of the yeshibot (of Lithuania especially) were acquainted with the writings of Aristotle, as is evidenced by the complaint of Solomon Luria that Rabbi Moses Isserles was responsible for much free thought. He had noticed in the prayer-books of the scholars (baḥurim) the prayer of Aristotle. Cardinal Commendoni testifies that many Russian and Lithuanian Jews had distinguished themselves in medicine and astronomy. The Jews of Lithuania were, like their Catholic neighbors, affected by the broader spiritual atmosphere of the day. The Polish Calvinists, among them Prince Radziwil, enjoyed extensive influence at court, and Radziwil was almost successful in causing Sigismund August to renounce allegiance to the papal authority. The extreme Calvinists, like the Socinians and the followers of Simon Budny, attacked the doctrine of the Trinity as a form of polytheism. Therefore they were styled Unitarians or anti-Trinitarians, and were frequently referred to by their opponents as "half-Jews." The influence of the religious unrest of the times on Jewish thought is evidenced by the discussions which took place between the Jews and the dissenters (see Czechowic). The learned Karaite Isaac ben Abraham of Troki took a prominent part in such discussions. His polemical experience is described in his work "Ḥizzuḳ 'Emunah" (translated into Latin by Wagenseil and published with the Hebrew text in 1681, and later translated into Spanish, German, and French). This work is frequently cited by the French encyclopedists in their attacks on Catholicism. The French Duke Henry of Anjou, one of the leaders in the massacre of St. Bartholomew, was elected to succeed Sigismund August on the thrones of Poland and Lithuania. He was an enemy of the Jews notwithstanding the fact that he largely owed his election to the efforts of Solomon Ashkenazi. He planned strict measures against his Jewish subjects, and blood accusations occurred during his short reign. Fortunately he escaped to France in 1574 to assume the crown left vacant by the death of his brother. After the short interregnum which followed, the Polish people elected the Transylvanian Duke Stephen Bathori. During the latter's equitable rule of eleven years the condition of the Polish and Lithuanian Jews was greatly improved. In July, 1576, he ordered by decree that all persons making false blood accusations or baseless charges of desecration of the host, then being spread in Lithuania, should be severely punished, his own investigations having convinced him that such accusations were instigated merely to incite riots. He found not only that the Jews were innocent and beyond suspicion, but also that the Shlyakhta who had made the accusations had themselves been misled by fanatical agitators. He declared that "whosoever shall disobey this decree shall be severely punished irrespective of his position in society; and whoever shall spread such rumors shall be considered a calumniator; and he who shall make such false charges before the authorities shall be punished by death." In the same month he confirmed by decree all of the ancient privileges of the Lithuanian Jews. At the beginning of his reign Mordecai Jaffe (author of the "Lebushim") went to Lithuania. He at first officiated in Grodno, and built the large synagogue which is still standing there and which has on its ark an inscription showing that the building was completed in 1578. Mordecai Jaffe by his great rabbinical erudition and secular knowledge played an important rôle in the Council of Four Lands and in the development of the methodical study of rabbinical literature in Lithuania and Poland. See also Bathori, Stephen.

Under Stephen Bathori.

Sigismund III. and Ladislaus IV.

The long reign of Sigismund III. (1587–1632) witnessed gradual but decisive changes in the relations of the Lithuanian Jews to the rest of the population. Born in the Protestant family of the Vasas, Sigismund was educated by his father, John III., in the Catholic faith with a view to his future occupation of the Polish throne. The Jesuit training of Sigismund was reflected in his attitude toward his non-Catholic subjects. The severe measures which he took against the dissenters affected the Jews also. In the attack of the Jesuits on Protestants and Greek Catholics the Jesuits caused the promulgation of numerous decrees restricting the ancient privileges of the Lithuanian Jews. They secured complete control of the education of the Polish-Lithuanian youth and instilled into the future citizens a religious intolerance hitherto unknown in Lithuania and which later made the existence of the Jewish subjects almost unbearable. A return to medieval methods was prevented only by the unsettled political and social condition of the country and the independence of the Shlyakhta. This independence, however, gradually vanished, and in the political degeneration which followed, the lesser nobility became a tool in the hands of a few reactionary leaders.

The king himself, following in the footsteps of his predecessors, attempted to pose as the protector of the Jews. He confirmed their charters of privileges (1588), and frequently took their part in their struggle with the Christian merchant gilds; but more often he sacrificed them to the self-assumed power of the city magistrates. The commercial rivalry between the Jews and the burghers, and the disregard by the latter of the ancient rights of the Jews, led Sigismund to issue several special decrees declaring the inviolability of Jewish autonomy in religious and judicial matters. The first of these decrees was due to the efforts of Saul Judich, representing the Jews of Brest (1593), and was called forth by the illegal assumption of authority over the Jews by the magistrates of Brest in matters reserved to the jurisdiction of the ḳahals or the king. The object of the magistrates was the collection of excessive fees and other extortions. This Saul Judich was one of the most prominent farmers of taxes and customs duties in Lithuania, and as "servant of the king" was in a position to render important services to his coreligionists. He is first mentioned in a decree of 1580 as having, in company with other communal leaders, strongly defended the rights of the Jews of Brest against the Christian merchants. As Bershadski shows, he is the Saul Wahl, the favorite of Prince Radziwil, who, according to legend, was made King of Poland for one night.

In the same year (1580) Sigismund granted the Jews of Wilna, as a protection against the oppressive measures of the city magistrates, a charter permitting them to purchase real estate, to engage in trade on the same footing as the Christian merchants, to occupy houses belonging to the nobles, and to build synagogues. As tenants of the nobility they were to be exempt from city taxes, and in their lawsuits with Christians they were to be subject to the jurisdiction of the king's waywodes only. A few days later the king accorded them the additional right to establish in the lower portion of the city a synagogue, cemetery, and bath-house, as well as stores for the sale of kasher meat. The burghers naturally resented the grant of these privileges and used every effort to secure their curtailment. Their endeavors evidently met with success, for in 1606 the Jews of Wilna found it necessary to petition the king for protection.

Later decrees of Sigismund show that ultimately anti-Jewish influences prevailed at his court. In 1597 he granted the Magdeburg Rights to the city of Vitebsk, but denied by a legal technicality the right of the Jews to reside permanently in the city. Another decree provided that no synagogue should be built without the king's permission. In the carrying out of this enactment the Jews were practically compelled to secure the permission of the Catholic clergy also whenever they desired to build a synagogue. Still another decree, which was later incorporated into the statutes, provided for the elevation to nobility of Jewish converts to Christianity. The rapidly growing number of the so-called "Jerusalem nobles" later caused alarm among the Polish nobility, and in 1768 the law was repealed.

Influence of Jesuits.

With the permanent establishment of the Jesuits in Poland and in Lithuania, the ramification of their intrigues and their active participation in politics and in legislation gave them a predominating influence in the affairs of the country. Having come to Lithuania in the reign of Sigismund II., August, the Jesuits at first kept free from politics, and occupied themselves with educational work, science, and literature. Stephen Bathori had no fear of their intrigues, and even entrusted them with the management of the newly established academy in Wilna. However, aided by the demoralized condition of the country, they soon succeeded in arraying the religious factions against one another. Bribery was rampant at the court and among the city officials. The masses were unruly and licentious, the Shlyakhta wilful, the clergy fanatical, and the magistrates lawless. The Jews were frequently made to suffer in these factional struggles. The restrictions put upon them grew constantly; they were forbidden to engage in retail trade, handicrafts, and other remunerative callings, and they were practically outlawed. The only occupation in which they were to any extent safe from the rapacity of city officials was the keeping of taverns in the townlets and villages. There, their only masters were the nobles, whom it was easier to please than the numerous functionaries and Shlyakhta. Thus the Jews unfortunately became in some parts of Lithuania useful tools in the hands of the nobility for the exploitation of the peasantry. The lords then found it expedient to take the Jews under their protection. Prominent among them were the Radziwils in Lithuania, and the Wishnevetzkis in the Ukraine.

Ladislaus IV. (1632-48) was not a zealous Catholic, and he had no love for the Jesuits. He attempted to make peace between the warring religious factions, and sought to revive the ancient rights of the Jews. On March 11 and 16, 1633, he confirmed the charters of privileges of the Jews of Lithuania, and decreed that all suits between Jews and Christians should be tried by the waywodes and elders and not by the city magistrates, who were the avowed enemies of the Jews, and often discriminated against them. He also checked the anti-Jewish student demonstrations, instigated by Jesuit teachers. All appeals in suits between Jews were to be brought before the king or his vice-regent.

Notwithstanding his religious tolerance, however, Ladislaus lacked the energy to resist the power of the clergy and the merchants, and was vacillating in his policy. At times he supported the Jews; at other times he yielded to the influence of their opponents. In 1633 and again in 1646 he confirmed the decree of his father (July, 1626) expelling Jews from the central portion of Moghilef and assigning them new quarters in the lower portion of the city. At the instigation of the Christian merchants of Wilna he also limited the rights of the Jews of that city. Aided by the propaganda of the clergy, the burghers caused new acts to be introduced, known as "De Judæis." It was decreed, for instance, that Jews should not appear on the main streets or in the market-places on Christian holidays; that Jewish physicians should not attend Christian patients; and that Jewish barbers should neither shave nor cup Christians. Fortunately for the Jews, on account of the powerful protection of the nobility, enactments could not always be carried out. Moreover these decrees, advocated by the lesser clergy and the Jesuits, were opposed by other powerful Church magnates, the bishops and the archbishops, who, as landed proprietors, availed themselves of the services of the Jews. Thus in the Catholic Church itself there were two parties, one favorable and the other antagonistic to the Jews; and it is often found that the archbishops and bishops were in opposition to the Church councils.

On the whole, the animosity toward the Jews produced by various economic evils had taken such deep root that Ladislaus, well-meaning as he was, found himself unable to stem the tide of class dissensions. The Jews themselves felt grateful for whatever efforts he made in their behalf, as was thus voiced by one of the leading rabbis of his time, Shabbethai ben Meïr ha-Kohen of Wilna (SHaK): "He was a righteous king, worthy to be counted among the just; for he always showed favor to the Jews, and was true to his promise." The Jewish masses, who had found safety on the estates of the landed nobility, ultimately became scapegoats in the bitter struggle of the Greek Catholic peasantry with the Polish nobles and Roman Catholic clergy, a struggle which culminated in the Cossacks' Uprising.

Effect of Cossacks' Uprising.

The fury of this uprising destroyed the organization of the Lithuanian Jewish communities. The survivors who returned to their old homes in the latter half of the seventeenth century were practically destitute. The wars which raged constantly in the Lithuanian territory brought ruin to the entire country and deprived the Jews of the opportunity to earn more than a bare livelihood. The intensity of their struggle for existence left them no time to reestablish the conditions which had existed up to 1648. John Casimir (1648-68) sought to ameliorate their condition by granting various concessions to the Jewish communities of Lithuania.

Attempts to return to the old order in the communal organization were not wanting, as is evident from contemporary documents. Thus in 1672 Jewish elders from various towns and villages in the grand duchy of Lithuania secured a charter from King Michael Wishnevetzki (1669-73), decreeing "that on account of the increasing number of Jews guilty of offenses against the Shlyakhta and other Christians, which result in the enmity of the Christians toward the Jews, and because of the inability of the Jewish elders to punish such offenders, who are protected by the lords, the king permits the ḳahals to summon the criminals before the Jewish courts for punishment and exclusion from the community when necessary." The efforts to resurrect the old power of the ḳahals were not successful. The impoverished Jewish merchants, having no capital of their own, were compelled to borrow money from the nobility, from churches, congregations, monasteries, and various religious orders. Loans from the latter were usually for an unlimited period and were secured by mortgages on the real estate of the ḳahal. The ḳahals thus became hopelessly indebted to the clergy and the nobility.

Numerous complaints to King John Sobieski (1674-96) by the Jews of Brest against their communal leaders, led him (May, 1676) to grant the rabbi of Brest, Mark Benjaschewitsch, jurisdiction in criminal cases over the Jews of his community, and to invest him with the power to impose corporal punishment and even the sentence of death. Under this ruler the Lithuanian communities saw a partial restoration of their old prosperity, and the authority of the Lithuanian Council served to bring some order out of the chaotic condition of the Lithuanian Jewry. Still the real stability of the old communities was destroyed, and frequent conflicts arose in regard to the territorial limits of the jurisdiction of the ḳahals. In the middle of the eighteenth century all the Lithuanian ḳahals were insolvent (see Jew. Encyc. vii. 410b, *s.v.* Ḳahal).

In 1792 the Jewish population of Lithuania was estimated at 250,000 (as compared with 120,000 in 1569). The whole of the commerce and industries of Lithuania, now rapidly declining, was in the hands of the Jews. The nobility lived for the most part on their estates and farms, some of which were managed by Jewish leaseholders. The city properties were concentrated in the possession of monasteries, churches, and the lesser nobility. The Christian merchants were poor. Such was the condition of affairs in Lithuania at the time of the second partition of Poland (1793), when the Jews became subjects of Russia.

Judicial Function of the Rabbis.

The founding of the yeshibot in Lithuania was due to the Lithuanian-Polish Jews who studied in the west, and to the German Jews who migrated about that time to Lithuania and Poland. Very little is known of these early yeshibot. No mention is made of them or of prominent Lithuanian rabbis in Jewish writings until the sixteenth century. The first known rabbinical authority and head of a yeshibah was Isaac Bezaleel of Vladimir, Volhynia, who was already an old man when Luria went to Ostrog in the fourth decade of the sixteenth century. Another rabbinical authority, Kalman Haberkaster, rabbi of Ostrog and predecessor of Solomon Luria, died in 1559. Occasional references to the yeshibah of Brest are found in the writings of the contemporary rabbis Solomon Luria (d. 1585), Moses Isserles (d. 1572), and David Gans (d. 1589), who speak of its activity. Of the yeshibot of Ostrog and Vladimir in Volhynia it is known that they were in a flourishing condition at the middle of the sixteenth century, and that their heads vied with one another in Talmudic scholarship. Mention is also made by Gans of the head of the Kremenetz yeshibah, Isaac Cohen (d. 1573), of whom but little is known otherwise. For other prominent scholars in Lithuania at that time see Brest-Litovsk; Grodno; Kremenetz; Ostrog; Wilna.

At the time of the Lublin Union, Solomon Luria was rabbi of Ostrog, and was regarded as one of the greatest Talmudic authorities in Poland and Lithuania. In 1568 King Sigismund ordered that the suits between Isaac Borodavka and Mendel Isakovich, who were partners in the farming of certain customs taxes in Lithuania, be carried for decision to Rabbi Solomon Luria and two auxiliary rabbis from Pinsk and Tykotzin.

The far-reaching authority of the leading rabbis of Poland and Lithuania, and their wide knowledge of practical life, are apparent from numerous decisions cited in the responsa. They were always the champions of justice and morality. In the "Etan ha-Ezraḥi" (Ostrog, 1796) of Abraham Rapoport (known also as Abraham Schrenzel; d. 1650), Rabbi Meïr Sack is cited as follows: "I emphatically protest against the custom of our communal leaders of purchasing the freedom of Jewish criminals. Such a policy encourages crime among our people. I am especially troubled by the fact that, thanks to the clergy, such criminals may escape punishment by adopting Christianity. Mistaken piety impels our leaders to bribe the officials, in order to prevent such conversions. We should endeavor to deprive criminals of opportunities to escape justice." The same sentiment was expressed in the sixteenth century by R. Meïr Lublin (Responsa, § 138). Another instance, cited by Katz from the same responsa, likewise shows that Jewish criminals invoked the aid of priests against the authority of Jewish courts by promising to become converts to Christianity.

The decisions of the Polish-Lithuanian rabbis are frequently marked by breadth of view also, as is instanced by a decision of Joel Sirkes ("Bet Hadash," § 127) to the effect that Jews may employ in their religious services the melodies used in Christian churches, "since music is neither Jewish nor Christian, and is governed by universal laws."

Decisions by Solomon Luria, Meïr Katz, and Mordecai Jaffe show that the rabbis were acquainted with the Russian language and its philology. Jaffe, for instance, in a divorce case where the spelling of the woman's name as "Lupka" or "Lubka" was in question, decided that the word is correctly spelled with a "b," and not with a "p," since the origin of the name was the Russian verb "lubit" = "to love," and not "lupit" = "to beat" ("Lebush ha-Buz we-Argaman," § 129). Meïr Katz ("Geburat Anashim," § 1) explains that the name of Brest-

Litovsk is written in divorce cases "Brest" and not "Brisk," "because the majority of the Lithuanian Jews use the Russian language." It is not so with Brisk, in the district of Kujawa, the name of that town being always spelled "Brisk." Katz (a German) at the conclusion of his responsum expresses the hope that when Lithuania shall have become more enlightened, the people will speak one language only—German—and that also Brest-Litovsk will be written "Brisk."

Items from the Responsa.

The responsa throw an interesting light also on the life of the Lithuanian Jews and on their relations to their Christian neighbors. Benjamin Aaron Solnik states in his "Mas'at Binyamin" (end of sixteenth and beginning of seventeenth century) that "the Christians borrow clothes and jewelry from the Jews when they go to church." Joel Sirkes (*l.c.* § 79) relates that a Christian woman came to the rabbi and expressed her regret at having been unable to save the Jew Shlioma from drowning. A number of Christians had looked on indifferently while the drowning Jew was struggling in the water. They were upbraided and beaten severely by the priest, who appeared a few minutes later, for having failed to rescue the Jew.

Rabbi Solomon Luria gives an account (Responsa, § 20) of a quarrel that occurred in a Lithuanian community concerning a cantor whom some of the members wished to dismiss. The synagogue was closed in order to prevent him from exercising his functions, and religious services were thus discontinued for several days. The matter was thereupon carried to the local lord, who ordered the reopening of the building, saying that the house of God might not be closed, and that the cantor's claims should be decided by the learned rabbis of Lithuania. Joseph Katz mentions ("She'erit Yosef," § 70) a Jewish community which was forbidden by the local authorities to kill cattle and to sell meat—an occupation which provided a livelihood for a large portion of the Lithuanian Jews. For the period of a year following this prohibition the Jewish community was on several occasions assessed at the rate of three gulden per head of cattle in order to furnish funds wherewith to induce the officials to grant a hearing of the case. The Jews finally reached an agreement with the town magistrates under which they were to pay 40 gulden annually for the right to slaughter cattle. According to Hillel ben Herz ("Bet Hillel," Yoreh De'ah, § 157), Naphtali says the Jews of Wilna had been compelled to uncover when taking an oath in court, but later purchased from the tribunal the privilege to swear with covered head, a practise subsequently made unnecessary by a decision of one of their rabbis to the effect that an oath might be taken with uncovered head.

The responsa of Meïr Lublin show (§ 40) that the Lithuanian communities frequently aided the German and the Austrian Jews. On the expulsion of the Jews from Silesia, when the Jewish inhabitants of Silz had the privilege of remaining on condition that they would pay the sum of 2,000 gulden, the Lithuanian communities contributed one-fifth of the amount.

The influence in communal life of prominent rabbinical scholars, such as Mordecai Jaffe, Moses Isserles, Solomon Luria, and Meïr Lublin, proved but a slight check to the growing misrule of the ḳahals. The individuality of the Lithuanian Jew was lost in the ḳahal, whose advantages were thus largely counterbalanced by the suppression of personal liberty. The tyranny of the ḳahal administration and the external oppression drove the great mass of the Lithuanian Jewry to seek consolation in the dry formalism of Talmudic precepts. The Talmud and its endless commentaries became the sole source of information and instruction. Every Jew was compelled by the communal elders to train his children in Talmudic lore. The Halakah offered a solution for every question in Jewish life, while the poetry of the Haggadah supplied alleviation for sorrow and hope for the future. Reformers arising among the Lithuanian Jews were forced by the ḳahal elders either to leave the community or to bend to the will of the administration. All was sacrificed to the inviolability of customs sanctioned by tradition or by the letter of the Law. The ties of friendship and family relationship were subordinated to the interests of the community. Hence it is little to be wondered at that the Cabala found fertile soil in Lithuania. The marked indications of approaching political anarchy were the chief causes of the organization of the LITHUANIAN COUNCIL.

LITHUANIAN COUNCIL (Hebr. **Wa'ad Medinot Lita**, or **Wa'ad ha-Medinot ha-Rashiyyot de-Lita**): Long before the Union of Lublin, probably with the beginning of the sixteenth century, the Jews of Poland and Lithuania were taxed as a single body, the pro rata assessment being made by the Jews themselves. In 1613 Sigismund III. decreed separate assessments for the Jews of Lithuania and Poland. The former were obliged to pay 9,000 gulden and the latter 7,000 gulden, the per capita payment being the same in each case. In order to assure an equitable distribution of the taxes among the several communities, and because of the desire to secure uniform legislation in religious matters and to protect their communal interests, the Jews of Lithuania organized, in 1623, a separate council of their own, this council being known as the "Wa'ad ha-Medinot ha-Rashiyyot de-Lita." Previously, from the Union of Lublin in 1569 until 1623, the Jews of Lithuania, not being, perhaps, in urgent need of a council of their own, had their representatives in the Council of Three Countries (Poland, Russia, Lithuania), or in the Council of Five Lands (see Council of Four Lands).

Relation to Council of Four Lands.

It was customary for the Lithuanian delegates to hold preliminary meetings at Brest-Litovsk before taking part in the deliberation of the general councils. It has not yet been determined, however, to what extent the Lithuanian Jews were governed by the decisions of these councils; only this much is certain, that while they were well represented at the councils' sessions they occasionally refused to obey their rulings. The Lithuanian councils were originally composed of delegates from the three most important communities—Pinsk, Brest, and Grodno. Wilna was added in 1652, and Slutsk in 1691. The councils were designated in accordance with the number of communities represented, as "Wa'ad Shalosh [Arba', or Ḥamesh] Medinot Rashiyyot de-Lita" (= "Council of Three [Four, or Five] Main Districts of Lithuania"). The Lithuanian Council in time became an authoritative body in all local Jewish affairs; but, while practically an independent body, it assumed a subordinate position to the Council of Four Lands. At times the two councils worked in unison in matters of common interest during the sessions of the Council of Four Lands, but where differences occurred, the authority of the latter prevailed. Thus, in the dispute in regard to Tykotzin, in the government of Lomza, a boundary town between Poland and Lithuania, it was decided to place the town under the jurisdiction of the Council of Four Lands, although formerly it had been regarded as Lithuanian territory. Similarly, in the dispute between Tykotzin and Grodno concerning the less important neighboring communities of Zabludov, Horodok, and Khvoroshcha, the latter were assigned by the Council of Four Lands to Tykotzin. In this case, however, the decision was not accepted as final ("Sefer ha-Yobei," pp. 257–259).

The Lithuanian Council, like that of the Four Lands, had no fixed meeting-place; it assembled biennially or triennially at Zabludov, Seltzy, or elsewhere. Like that of the Four Lands, also, it served to cement the interests of the Lithuanian and other Russo-Polish Jews at a time when dissolution and demoralization reigned in the Polish kingdom, and it acted as a bulwark against the rancor of the Christian clergy, especially the Jesuits, who made continuous attacks on the Jews. The records of the Lithuanian Council are better preserved than those of the Council of Four Lands. There is extant a complete list of the meetings held by the Lithuanian Council from 1623 to 1762, when it was abolished, after over 1,000 regulations ("taḳḳanot") had been adopted. These taḳḳanot were made with the following ends in view:

(1) To encourage and endear to the people the study of the Talmud by establishing yeshibot, and to supervise the conduct of students. (2) To protect the interests of the Jewish people as a whole and as individuals against the malice of non-Jews, by pleading the cause of the Jews in the Polish Diets. (3) To supervise the conduct of the communities as well as of individuals, in order to prevent them from rousing the antagonism of their neighbors by indulging in improper and illegal trades. (4) To determine and properly distribute the government taxes imposed upon Jews. (5) To determine the boundaries of each kahal district. (6) To determine the duties of each community and its share in the common efforts and expenditures in cases where blood accusations were to be contested. (7) To determine the right of membership to be granted to new settlers in the communities ("ḥeskat yishshub"): as each Jewish community stood responsible for the conduct of its individuals, restrictions were necessary to regulate the granting of membership to newcomers. (8) To aid poverty-stricken communities and individuals. (9) To maintain and aid poor settlers in Palestine.

Of the regulations enacted at the meetings of the Lithuanian Council the following deserve mention, since they afford an insight into the state of culture of the Lithuanian Jews and into the character of the council itself: "Every community shall carefully guard against card- and dice-playing, and offenders shall be fined and subjected to corporal punishment" (1623; No. 51). "Beggars invading Lithuania and Russia [meaning White Russia], especially those who disguise themselves as scholars and pious persons while committing secretly various wicked acts, shall not be allowed to remain in any one community more than twenty-four hours" (1623; No. 87). "It shall be the duty of the communal leaders to expose any attempts at fraud which may be discovered on the part of Jews borrowing money or goods from a 'shlakhtitz' [peasant], or leasing from lords estates, taxes, and other sources of revenue. On the refusal of the parties likely to be defrauded to heed the warning of the communal leaders, the latter shall declare the transaction void, using force if necessary, in order that the Christians concerned may not suffer loss" (No. 26). "It is incumbent upon the three chief communities of Lithuania to arrange annually for the marriage of thirty poor girls, giving each a dowry of thirty gulden."

Among the taḳḳanot there are also regulations regarding competition in business, against luxury, and against expensive and gaudy dresses.

In 1654–56, when the Russians invaded Lithuania, the activities of the Lithuanian Council relaxed. It convened less frequently, and the regulations adopted between 1656 and 1670 deal in the main with financial accounts. After 1670, however, it resumed its former energy.

The Lithuanian Council was abolished about 1762, at the same time and for the same reason as the Council of Four Lands. Thenceforward taxes were no longer imposed on Lithuania as a whole, but on each community separately, the prime motive for the union of the communities being thus abolished.

LITURGY: The Jewish religious service falls, generally, into two main divisions—instruction and prayer. This division of the service has existed since the earliest times. In the time of Isaiah the people gathered in the courts of the Temple to receive instruction from the Prophets and to pray (Isa. i. 12–15), while on the day of the New Moon and on the Sabbath women also visited them (II Kings iv. 23). At the Feast of Tabernacles in the Sabbatical year the Law was read to the assembled people (Deut. xxxi. 10–13), and Ezra recited passages from the Pentateuch to the community (Neh. viii. 5–8). In the course of time this led to the custom of reading certain portions of the Scripture, especially of the Pentateuch, to the people on the Sabbath, on feast-days, and even on Mondays and Thursdays, as well as on New Moon and fast-days, and by the first century of the common era this was regarded as an ancient usage (Josephus, "Contra Ap." ii. 17, end; Acts xv. 21; B. Ḳ. 82a *et passim*; comp. Philo, ed. Mangey, ii. 568, 630; Winer, "B. R." ii. 549; Zunz, "G. V." pp. 1–7). This part of the worship is described under Haftarah; Megillot; Law, Reading from the. The second division, that of prayer, is still more ancient, and is frequently mentioned in the Bible (I Sam. i. 10; I Kings viii. 12 *et seq.*; II Kings xx. 2 *et passim*), while Deutero-Isaiah speaks of the house of God as a "house of prayer for all people" (Isa. lvi. 7; on the form of prayer and posture see Guthe, "Kurzes Bibelwörterbuch," pp. 82 *et seq.*, and other dictionaries; also Adoration, Forms of). In general, it may be said that in the earliest times the prayers were short, and were used only occasionally in private devotion, and that no ritual was developed in the pre-exilic period. Formal prayers are found only in Deut. xxvi. 5–13 and Lev. xvi. 21.

Divisions of Divine Service.

Influence of the Temple on the Liturgy.

In view of the position which the Temple occupied, it may be assumed that after the exile the public worship there influenced the liturgy, and in great part even created it; the prayers just mentioned were part of the Temple worship. The Levites recited prayers of thanksgiving and praise during the morning and evening sacrifices (I Chron. xxiii. 30), and Neh. xi. 17 indicates that this was an established ceremony. The threefold repetition of the daily prayer (Dan. vi. 11; Ps. lv. 18 [A. V. 17]) is likewise connected with the Temple service, the second prayer corresponding perhaps with the sacrifices which were offered by individuals between the official morning and evening sacrifices. The Talmud says, with correct historical insight, that the prayers were instituted to correspond with the sacrifices (Ber. 24b, *passim*). The fact that in prayer the face was turned toward the Temple (Dan. vi. 10; II Chron. vi. 34; Ber. 4b–5a, *passim*), as well as the contents of the prayer, together with various other indications, clearly shows that the synagogal liturgy was derived primarily from the Temple worship.

In the Temple itself, side by side with the sacrificial cult, there existed a liturgy whose most splendid remnants are the Psalms, which constituted the hymnal of the Second Temple and now occupy an "important position in the synagogal liturgy. Those Psalms which are cast in the form of prayers and hymns soon took their place as hymns in the service of the sanctuary, even though they were not originally composed for this purpose, and they were sung, especially on feast-days, in the synagogue and in private gatherings. In its descriptions of Temple festivities the Book of Chronicles alludes to them, especially to the eighteen 'Hallelujah,' 'Hallel,' and 'Hodu' Psalms (Ps. cv.–cvii., cxi.–cxviii., cxxxv., cxxxvi., cxlvi.–cl.). . . . Prophecy and psalmody were gradually typified in two persons, Moses and David. . . . Even after the destruction of the Temple these united elements left their impress upon the Synagogue: the readings were devoted to the Law and the discourses to the Prophets, while entire psalms, or verses from them, were used as prayers" (Zunz, "S. P." pp. 4 *et seq.*). The place which many Psalms occupied in the worship may still be recognized from their form (final verses, notes on the mode of recitation, etc.) or from their contents (see the commentaries to the Psalms by Olshausen, Hupfeld, and others, and especially by Graetz). The authors of the superscriptions and concluding words of the Psalms recognize the collection as liturgical (Ps. lxxii., end: "The prayers of David . . . are ended"), and tradition frequently alludes to this fact (*e.g.*, Tamid, end). In the ritual of the Synagogue the Psalms retain their ancient position, at least as regards the text of the prayers. "In the Sabbath and festival discourses the wise man becomes the prophet, and the leader in prayer the psalmist" (Zunz, *l.c.*).

In addition to the sacrifice, which was in the care of the priests, and the singing of the Psalms, which was performed by the Levites, the Temple had its special liturgy for the third class of the people, the Israelites. The entire nation had been divided into twenty-four sections, so that to each division of priests there corresponded one of Levites and one of Israelites. Each section served for a week in the Temple, and this period was a time of fasting, for the Israelites assigned to the section doing service, both those who were in Jerusalem and those who had remained in their country homes. Every day they read a prescribed portion of the first chapter of Genesis. These details are recorded in Ta'an. iv. 1, in both Talmuds *ad loc.*, and in Tosef., Ta'an., iv., which seem to assign the beginnings of synagogal worship to the Temple; that there was some foundation for their account is shown by the fact that Joshua b. Hananiah, a teacher living in the time of the Temple, is mentioned. It is possible, however, that the reading of the Torah was taken over into the Temple ritual from an already existing synagogal ritual.

Fast-Day Services.

The services in periods of drought constitute an independent source for the liturgy of the Synagogue. The frequent scarcity of rain greatly distressed the people, for it meant famine and death to man and beast. At such times public assemblies for fasting and prayer were held as early as the time of the Prophets, in which old and young, the bride and the groom, took part (Joel i.; ii. 16–17; Jer. viii., especially verse 11). An entire treatise of the Mishnah (Ta‘anit) is devoted to the regulations in regard to fasting, and its second chapter discusses the liturgy in detail. The prayer consisted of twenty-four benedictions, of which eighteen were those of the daily prayer and six were additional (see Schürer, "Gesch." 3d ed., ii. 490; Israel Lévi, in "R. E. J." xlvii., where the sources and bibliography are given). The final evening prayer, "Ne‘ilah," recited on this occasion, has been preserved only in the service for the Day of Atonement. The liturgy for the fast was developed long before the common era, and it is highly probable not only that it was evolved independently of the Temple, but that it influenced the beginnings of the daily form of worship.

The Reading of the "Shema‘."

It is certain, however, that the institution of the reading of the "Shema‘" (Deut. vi. 4–9) originated entirely in the Temple service. At the morning sacrifice the priests read the Ten Commandments and the "Shema‘" and recited several benedictions (Tamid v.). Contrary to the custom in all other ceremonies, the day for the Temple service began with sunrise, and not with evening or with the appearance of the moon, and since the first rays of the sun were awaited before beginning the morning sacrifice there was some danger lest it might be held that the sun-god was being worshiped. Hence the congregation was addressed as follows: "Hear, O Israel, the Eternal is our God; the Eternal is One." It may have become customary, therefore, as early as the Persian period to recite the first sentence of the "Shema‘" in the Temple before beginning the sacrifice, the other verses, including Deut. xi. 13–21, being added in the course of time. The requirement that it should be recited outside the Temple and before sunrise (Ber. v. 1 *et passim*) points to the origin of this usage. Its antiquity may be inferred from the fact that Josephus ("Ant." iv. 8, § 13) seems to ascribe it to Moses and that in traditional literature it is explained as a Biblical custom. At that time it must have been in existence for some centuries, for its genesis had been forgotten. The reading of the "Shema‘" in the evening must have been introduced somewhat later, since it was not recited in the Temple, and the rules governing it were less rigorously defined. The reading of the Decalogue probably became customary in the Greek period in order to guard, by the solemn utterance of the first two commandments, against the imminent danger from Hellenistic polytheism (see Blau in "R. E. J." xxxi. 179–201, where the history of the benedictions in the "Shema‘" is discussed). In ancient times the "Shema‘" was not recited in the manner now customary in the synagogue, but either with the leader, verse by verse alternately, or in some other way. As it was Israel's solemn confession of faith, each one knew it by heart (Ta‘an. 26a), and it was recited in the synagogue "with one mouth, one voice, one song" (Cant. R. viii. 14). It might be read in any language (Soṭah vii. 1 and parallels), and a scribe once heard it in Greek (Yer. Soṭah 21b, below). It was sometimes read backward (Ber. ii. 4 and parallels), a custom which is reminiscent of magic practises (see Shema‘).

"Shemoneh ‘Esreh."

The second and doubtless later division of the daily liturgy is the prayer consisting of eighteen benedictions, named the "Tefillah" *κατ ἐξοχήν* in the sources. This petition, which is still included in every Jewish prayer-book, is called Shemoneh ‘Esreh (eighteen prayers) even in the earliest sources (Ber. vi. 3; Ta‘an. ii. 2). Rabbi Johanan (d. 279), the famous director of the school of Tiberias, who was distinguished also for his knowledge of the historical traditions, ascribes the introduction of these benedictions, the emphasizing of the sanctity of the Sabbath, the feast-days, and the benedictions at their close, to the Great Synagogue (Ber. 33a). Four kinds of liturgy, in the widest sense of the word, are here mentioned: "berakot," "tefillot," "ḥiddushot," "habdalot." In the benedictions are included, *e.g.*, the sentences of thanksgiving recited after meals, which are probably very ancient (see Maimonides, "Yad," Tefillah), and which are explained as Biblical, as well as all blessings spoken on partaking of fruit, executing commands, and the like. The beginnings of these prayers, perhaps, date back to the Persian period, their brevity and pure, simple Hebrew favoring this view. Their development, doubtless, was gradual and occupied several centuries. This may be assumed even in the case of the "Shemoneh ‘Esreh," of which the first and last three benedictions constitute the foundation and hence are the oldest portion; and they are mentioned in the Mishnah with special names designating the several sentences (R. H. iv.; Tamid v. 1; R. H. 32a). "The ancient regulation which designates that portion for all the days of the year, while the other passages of the 'Tefillah' are excluded on the Sabbath and on festivals, is almost certainly a proof of greater age" (Zunz, "G. V." 2d ed., p. 380). The intermediate twelve sentences are of later date, and Zunz ascribes them to various periods. Different versions of one and the same prayer were apparently differentiated and included as independent benedictions. These, however, never received a stereotyped form for general use, and each has its own history (Elbogen, in "Monatsschrift," 1902). Even before the destruction of the Temple the twelfth benediction was added expressly against apostates and traitors ("birkat ha-minim"), and later was the cause of various changes in the "Shemoneh ‘Esreh" (Zunz, *l.c.* p. 382; Elbogen, *l.c.*). This prayer can not have been directed exclusively against Judæo-Christians, for at the time of its composition they can have been neither powerful nor antinomian in Palestine (see Minim.)

On account of its age the "Shema‘" was much more widely known than the "Tefillah" which has just been outlined. This is clear from the fact that the "Tefillah" is regarded as a rabbinical, while the "Shema'" is regarded as a Biblical, prayer. As late as 100 C.E. a prominent scribe asserted that the entire "Tefillah" was unnecessary and that the evening "Tefillah" was not binding, in consequence of which view he became involved in a controversy with the patriarch GAMALIEL II. (Ber. 28a, *passim*; Elbogen, *l.c.*). On account of its length it was not suitable for the mass of the people. As a matter of fact, only seven, nine, or ten benedictions are included in the "Tefillah" for the feast-days, although they are of earlier date and of greater importance, in view of the occasion. On these days, also, the daily benediction was very short, consisting probably only of a few words, perhaps as follows: "Cleanse our hearts that we may serve Thee faithfully" (Frisch, in "Magyar-Zsidó Szemle," 1892, pp. 264 *et seq.*, where the importance of a short prayer is shown; comp. *ib.* pp. 313 *et seq.*, where the same author attempts to sketch the historical development of the "Tefillah"). Probably both because it was the custom of the Temple and because they were ignorant of the "Tefillah," the people themselves did not pray, but listened to the ḥazzan, the "delegate of the community," and punctuated his sentences with "Amen" (R. H. 32a; Elbogen, *l.c.*).

"Shema'" and "Tefillah."

In the sanctuary the people later responded with another formula, mentioned below. They were educated for prayer only by centuries of practise, and the original formulas, consisting of one or two words, remained as distinctive signs in the amplified invocations. The "Hallel" and "Hodu" formulas, which are in fact found only in passages from the Psalms included in the synagogal ritual, are characteristic of the oral worship of the sanctuary. The "Hosanna" is likewise derived from the Temple, and the "Baruk" formula is probably taken from the same source, although the latter soon became predominant and was repeated frequently both in public and in private worship. Prayers for weekdays, Sabbaths, and fast-days, the liturgy for fast-days, and grace before and after meals, as well as all kinds of benedictions and prayers of thanksgiving, have retained the same fixed form to the present day, and may, therefore, be discussed in some detail here, together with their historical development. As regards their external form, all the prayers designated by the Talmud, in the passage cited above (Ber. 33a), as "benedictions, prayers, sanctifications and habdalahs," are merely berakot.

In the earliest times the people prayed only occasionally, and the benedictions likewise were merely incidental utterances of thanks for mercies vouchsafed, as for rescue from danger, etc. The different forms of the root "barak" occur frequently in the Bible, even in the oldest portions. The word meant originally "to bend the knee" (comp. "berek" = "knee" in Ps. xcv. 6), and hence in general "to praise," "to pray," because the ancients commonly knelt on such occasions. In this sense the participle ("baruk") is used in the "ḳal," and all the other forms ("berek," "meborak," etc.) in the "pi'el" and "pu'al."

Doxologies During Public Worship.

The adjuration "Praise God!" was probably addressed to the people of earlier times only in the flush of victory after deliverance from the dangers of war (Judges v. 2, 9), but later, when a regular Temple cult had been instituted, it may have been uttered daily, so that it became a liturgical formula with which divine worship was generally concluded (Ps. lxviii. 27 [A. V. 26], c. 4, *passim*). In Ps. cxxxv. (comp. also cxviii. 2–4) Israelites, priests, Levites, and the pious are summoned by groups to "bless the Lord!" and it is noteworthy that this invitation is placed at the conclusion of the Psalm. The final verse, "Blessed be the Lord out of Zion, which dwelleth at Jerusalem. Praise ye the Lord," constituted the benediction spoken by those who had been summoned. The benedictions that conclude the closing chapters of the five books of Psalms (xli., lxxii., lxxxix., cvi., cl.), all being in substance one and the same eulogy, may represent synagogal formulas from the time of the Temple which the people intoned after completing the singing of the several books. Occasionally, however, the people concluded with a simple "Amen" (comp. the Psalms quoted and I Chron. xvi. 36). It may also be assumed that such benedictions were not reserved for public worship exclusively, but were also pronounced in private: "I will bless the Lord at all times: his praise shall continually be in my mouth" (Ps. xxxiv. 2; comp. cxv. 18, cxlv. 2). Mention is made of supplications at "evening and morning, and at noon" (Ps. lv. 18 [A. V. 17]), and of praise offered seven times a day (Ps. cxix. 164), while in another passage only praise rendered in the morning is mentioned (Ps. lix. 17).

Private Benedictions the Model.

The origin of this liturgical usage was the custom, on joyful occasions, of praising God for His goodness. A few examples may be given here in their Biblical order. Thus Noah says, "Blessed be the Lord God of Shem" (Gen. ix. 26); Eliezer prays, "Blessed be the Lord God of my master Abraham, who hath not left destitute my master of his mercy and his truth" (Gen. xxiv. 27); and Jethro exclaims, "Blessed be the Lord, who hath delivered you out of the hand of the Egyptians, and out of the hand of Pharaoh" (Ex. xviii. 10). Similar utterances are found in I Sam. xxv. 32 (David to Abigail) and xxv. 39 (where David says of Nabal's death, "Blessed be the Lord, that hath pleaded the cause of my reproach") and II Sam. xviii. 28 (Ahimaaz). Solomon thanks God in similar phraseology for having placed him on the throne of his father (I Kings i. 48, viii. 15; comp. viii. 56), and Hiram, King of Tyre, uses the same formula in rejoicing that God had given David such a wise son over this great people (*ib.* v. 7). The Queen of Sheba says to Solomon, "Blessed be the Lord thy God, which delighted in thee, to set thee on the throne of Israel" (*ib.* x. 9). This formula is used also in Zech. xi. 5; II Sam. xxii. 47 (Ps. xviii. 47 [A. V. 46]); Ps. xxviii. 6, cxliv. 1; Ezra vii. 27; II Chron. ix. 8. It is interesting to note that in Ruth iv. 14 the women address Naomi with the same formula, which shows that it was transferred to the liturgy from popular speech.

Form.

The doxology in all these passages is really a prayer of gratitude to God for blessings bestowed, either on the speaker or on another. The occasion of the thanksgiving is stated at the end and is generally introduced by the relative pronoun "asher" (also by "ki," Ps. xxviii. 6), or by a participle preceded by an article (comp., however, Zech. xi. 5). The same order occurs also in the benedictions prescribed by the Talmud. The benediction proper is expressed in most cases by "baruk," which generally constitutes the first word. An exception is found in I Kings x. 9 (II Chron. ix. 8), which has "Yehi Adonai Eloheka baruk," imitating the phraseology of "Yehi Shem Adonai meborak" (Job i. 21; Ps. cxiii. 2). Neither of these formulas is found elsewhere in the Bible. The Tetragrammaton alone designates the name of God in Ex. xviii. 10; Ruth iv. 14; I Sam. xxv. 39; I Kings viii. 56; Zech. xi. 5; Ps. xxviii. 6, lxxxix. 53, cxxiv. 6, cxxxv. 21 (once "Adonai," Ps. lxviii. 20 [A. V. 19], and twice "Elohim," Ps. lxvi. 20, lxviii. 36 [A. V. 35]). Usually "Elohim," "Elohe Yisrael," or some similar expression is added to the Tetragrammaton, so that God is generally named in the third person. The phrase "Baruk Attah Adonai, lammedeni ḥuḳḳeka" (Ps. cxix. 12) is an exception, and the benedictions in the Talmud have, curiously enough, this form also, although only as regards the use of the second person, since "Elohenu Melek ha-'Olam" is normally added to the Tetragrammaton. This use of the second person indicates a later origin, like "Elohe Abotenu" (Ezra vii. 27; comp. "Abinu," I Chron. xxix. 10), which occurs also in the first benediction of the "Shemoneh 'Esreh." The earliest form of the Torah benediction is found in Ps. cxix. 12, which is also the only one that is a prayer and not an expression of gratitude. The benediction "U-baruk Shem Kebodo le-'olam" (Ps. lxxii. 19) is identical with the preceding "Baruk Adonai," for "Shem Kebodo" indicates the Tetragrammaton (comp. Deut. xxviii. 58, "ha-Shem ha-Nekbad"; Neh. ix. 5, "Shem Kebodeka"; and Ps. xxiv. 7–10, "Melek ha-Kabod"). This gave rise to the later formula "Baruk Shem Kebod Malkuto le-'olam wa-'ed" (which was, however, used in the Temple), in which "Adonai Elohim" is paraphrased by three words in order that the people should not pronounce the real names of God. The benediction is once called "berakah" in the Bible—"And blessed be thy glorious name, which is exalted above all blessing and praise" (Neh. ix. 5). The words "'olam" and "'olam wa-'ed," which with variations are added to the benedictions, are of later origin and belong to the liturgical formula. They occur only in the Psalms and in Chronicles (Ps. xli. 14 [A. V. 13], lxxii. 19, lxxxix. 53 [A. V. 52], cvi. 48, cxiii. 9, cxv. 18, cxlv. 1; I Chron. xvi. 36, xxix. 10). This formula seems to have been used only when the congregation was assembled as a whole.

Difference Between Bible and Talmud.

The significance of the benediction steadily increased in the course of centuries until it finally was used on the occasion of every manifestation of nature and of human life. While it appears in the Bible only in connection with public worship and on a few special occasions, in the traditional literature it accompanies all the expressions of individual life, and sanctifies all functions of the body and the soul. The pious Jew, on going to sleep and on awakening, and on all intervening occasions, uttered, and still utters, words of praise to God. God is praised for His mercy on occasions of joy or sorrow, on satisfying the needs or desires of the body, on studying the Law, or on fulfilling the ordinances of religion. The benediction, like the entire religion, is individualized and specialized. It continually reminds the Jew of God, and only when unclean, before he has bathed or purified himself in some other way, is he forbidden to utter it. The fact that the treatise Berakot, devoted to it, precedes all the other treatises, indicates its extent and importance, and its popularity is shown by the minute questions referring to it, which were discussed even by the earliest scribes. "The benedictions of a man indicate whether he is a scholar" (Ber. 50a; comp. Ta'an. 16a). Some examples are selected here from the mass of material, which may show the variety of these utterances and their nature.

General Doxology.

There were persons who were very exact in regard to the benedictions and watched their neighbors closely (*ib.* נקדנין). If any one made a mistake in the form in use during worship, the entire congregation corrected him (*ib.* 51a). He who deviated from the form laid down by scholars was remiss in his duty, although in a certain case the short sentence of a shepherd—who was the prototype of ignorance among the Talmudists—was approved (*ib.* 40b). Prayers and doxologies might be recited in any language (Soṭah 32a *et passim*). Week-days and feast-days, as well as all kinds of food, had their special benedictions (Ber. 40a, below). A blessing might not be pronounced over anything that had been "accursed" ("min ḳelalah," unsound fruit, etc.; *ib.* 40b), nor in case of nocturnal pollution, nor unnecessarily (*ib.* 20b, 33a). The doxology is pronounced before fulfilling any of the commandments (Pes. 7b; comp. Tosef., Ber. vii. 1).

One hundred benedictions a day shall be pronounced by every one (Men. 43b, below), but whoever writes them down sins as grievously as if he had burned the Torah (Shab. 115b). The Tetragrammaton and a reference to God as the King of the World are essential to every benediction (Ber. 12a, 40b, 49a). While Johanan b. Zakkai still used the Biblical form and in a doxology referred to God in the third person (Ḥag. 14b, "Baruk Adonai Elohe Yisrael she-natan," etc.), only the second person is used in the later doxologies ("Baruk Attah Adonai Elohenu Melek ha-'Olam"). The last three words are omitted in certain cases (Ber. 46a, below). The knee shall be bent on uttering "baruk" (*ib.* 12b), although this rule refers only to prayer and not to other benedictions (comp. also *ib.* 34b, relating to the king and high priest). One person may pronounce the benediction for all the other persons assembled (*ib.* 53a). The principal person at table is entitled to say grace (*ib.* 47a, 45b), to which the others respond with "Amen," which is regarded as more important than the pronouncing of the berakah itself (*ib.* 53b), and it is even praiseworthy to say "Amen" after one's own eulogy. One should not pronounce a "rapid, chopped, or orphaned 'Amen,' nor speak the benediction too quickly," nor lift the voice at the "Amen" above the voice of the speaker (*ib.* 45a, b, 47a). The form of some benedictions depends on the number of those present (*ib.* 49b). "Thou shalt praise God for evil fortune as well as for good" (*ib.* ix. 1). One should say, even in the house of mourning, "Blessed be the Merciful One who granteth good things" ("Baruk ha-Ṭob weha-Meṭib"). Akiba, however, says, "Blessed be the Just Judge" ("Baruk Dayyan Emet," *ib.* 46b, 54b, 60b). After a successful journey by sea or desert, after recovery from illness, or after release from prison, one should say, "Blessed be He who granteth favors" ("Baruk gomel ḥasadim," *ib.* 54b). There was also a special blessing for a person who had been bled (*ib.* 60a). See Benediction.

Daily Benedictions.

God was praised at the crowing of the cock for having given it understanding to distinguish between day and night, and there were special benedictions for every act of dressing, which are now collected at the beginning of the book of daily prayer (Ber. 60b). "Whoso profits aught from this world without reciting a benediction defrauds it" (*ib.* 35a). Everything that may be enjoyed (fruits of the earth, etc.) has a corresponding benediction; only the words "everything came into being at His word" may be applied to them all (*ib.* 40a). There is even a berakah for perfume (*ib.* 43b, where individual rules are given for other things). Bread and wine, being the most important articles of food, have special benedictions (*ib.* vi. 1). The seven kinds of fruit of the Holy Land enjoy certain prerogatives, and the oil of the patriarch and of the emperor is especially honored (*ib.* 40b, 43a, 44a). Most of the regulations refer to the prayer after meals, which is often called "the three benedictions." It had to be spoken and might not be recited mentally (*ib.* 15a, b). It was obligatory also upon women, slaves, and children, who might pronounce it in place of the head of the family, and did so if he was unacquainted with Hebrew (*ib.* 20b). This and the Torah benediction alone were regarded as Biblical, while the introduction of the others was ascribed to the Great Synagogue (*ib.* 33a, 48b; Meg. 17a). The first benediction of the prayer at meals, it is said, was composed by Moses, the second by Joshua, and the third by David and Solomon (Ber. 48b); Moses was the first one who could praise God for the food offered (the manna), Joshua the first who could praise him for the Holy Land, and David and Solomon the first who could praise him for Jerusalem, which was delivered into their hands. The fourth benediction ("Ha-Ṭob weha-Meṭib"), it was said, was introduced at Jabneh in thanksgiving for the burial of those who had been killed in the great war with Rome (70 C.E.). These four benedictions, according to a "heavenly voice" (see Bat Ḳol), are worth forty denarii (Ḥul. 87b). The blessing at meals had to be pronounced while sitting (Ber. 51b), and there are ten regulations regarding the wine used in connection with it (*ib.* 51a). It is dangerous, on account of the demons, to drink two cups of wine, or any even number (*ib.* 51b). The benediction pronounced over bread is also mentioned in the New Testament (Matt. xv. 36; John vi. 11; Acts xxvii. 35) and by Philo (ed. Mangey, ii. 481).

The Torah benediction and the reading of the "Shema'" (Deut. vi. 4-8) are likewise explained as being Biblical, while the "Shemoneh 'Esreh" is regarded as a rabbinical institution (Ber. 21a). As the doxologies preceding the "Shema'" are really Torah benedictions, they also are declared to be Biblical (comp. *ib.* 11b, 48b, and the interesting passage, Shab. 88a, referring to the "threefold" Torah). The following is considered the best berakah: "Blessed be the Lord who hath given the doctrine" (*ib.* 11b). The division of the benedictions into Biblical and rabbinical is important for the matter of chronology, the first group being earlier in origin. The most important doxologies of the prayer are "Yehi Shemo ha-gadol meborak" (*ib.* 21a = Job i. 21 and Ps. cxiii. 2; Aramaic, "Yehe Shemeh rabba meborak," Ber. 57a; Shab. 119b; Suk. 38b, 39a; Targ. Yer. to Gen. xlix. 2; Deut. vi. 4) and the "Baruk Shem kebod malkuto le-'olam wa-'ed" already mentioned (Pes. 56a; Deut. R. ii. 31, 36). In the sanctuary the people pronounced this blessing, but no "Amen" (Ta'an. 16; Ber. 54a).

Benedictions of Historical Interest.

The following rules and customs deserve special notice from a historical and religious point of view: A special berakah was pronounced at the circumcision of a proselyte (Shab. 137b, "le-mul et ha-gerim"). "Amen" may be said after the benediction of a Samaritan only if one has heard the whole of it (Ber. viii. 1); the blessing for light may not be recited for the light beheld at the end of the Sabbath in a city inhabited mostly by Samaritans (*ib.* 53a). At Jabneh a special berakah against Judæo-Christians (Minim) was composed after the destruction of the Temple (*ib.* 28b). If the ḥazzan commits an error in reciting this passage he is removed (*ib.* 29a). "Any one who says, 'The pious praise Thee,' is guilty of heresy" (Meg. iv. 9), while, according to R. Judah, any one uttering a benediction on seeing the sun is also guilty of heresy (Tosef., Ber. vii. 6). This mishnaic teacher ordains that one should praise God every day "that Thou hast not created me a heathen or a woman or a slave" (Men. 43b, below; comp. Gal. iii. 28; Diogenes Laertius, i. 1, § 7; James Darmesteter, "Une Prière Judéo-Persane," p. 9, Paris, 1891; "Monatsschrift," xxxvii. 14; "Magyar Zsidó Szemle," x. 100). On seeing a Hermes one should say, "Blessed be He who is lenient toward them that break His law," and on beholding a place where an idol has been destroyed, "Blessed be He who destroyeth idols in our land; as He hath destroyed it in this place, so may He destroy all in the land of Israel, and lead the hearts of their worshipers back unto His service." In a foreign country, however, one should say nothing, for the majority of the inhabitants there are heathen (Ber. 57b; comp. x. 1). "Any one beholding a place where miracles have been vouchsafed to Israel should say, 'Blessed be He who hath shown marvelous things unto our fathers on this spot'" (*ib.*), together with benedictions applying to manifestations of natural phenomena. One who sees Jewish sages should say, "Blessed be He who hath granted of His wisdom to His followers"; and whoever sees pagan sages should say, "Blessed be He who hath granted of His wisdom to His creatures."

At the sight of Jewish or pagan kings praise was rendered to God, who granted of His dignity to His followers or to His creatures (*ib.* 58a). On beholding graves of Jews one should praise God, who created them and who will finally raise them up again (*ib.* 58b). He who sees the Euphrates from the bridge of Babylon or the Tigris from the bridge of Shebistena should praise the Creator (*ib.* 59b), for it was believed that these streams had arisen at these places and were therefore still in their original state, although a Babylonian amora of the early part of the fourth century indicates another place as the source of the Euphrates, the Persians having diverted it from its channel. God should receive praise and thanksgiving from any one beholding a ford of the sea, of the Jordan, or of the River Arnon (where Israel beheld marvels); beholding hailstones (Ex. ix. 33), the cliff of Beth-horon (Josh. x. 11), the stone which Og, King of Bashan, wished to hurl upon Israel, the rock on which Moses sat when Joshua fought with Amalek (Ex. xvii. 12), the wife of Lot, or the fallen walls of Jericho (Ber. 54a). All these objects were still to be seen at the time of the composition of this baraita, about the second century.

Difference Between Christian and Jewish Benedictions.

Although the benedictions of the priests, and the benedictions pronounced in the house of mourning, and at betrothals, weddings, etc., are mentioned, there are no indications that they were regarded as exercising any material influence on persons or things, *i.e.*, that they were sacramental as the Christian Church has taught and still teaches (Herzog-Hauck, "Real-Encyc." ii. 588). They are merely utterances of praise and thanksgiving, and it can no longer be determined whether originally they had the force which the Church ascribes to them. It is certain, however, that the idea of sacramentalism was foreign to Judaism. Several passages in the New Testament in praise of God are called "doxologies" (*e.g.*, Rom. xvi. 27; see Hastings, "Dict. Bible," i. 620).

The principal component parts of public worship are the "Shema'" and the "Tefillah," the preceding recitation from the Psalms, etc., having only the force of custom. As late as the time of Maimonides morning prayer began with "Ḳaddish" before "Bareku" and ended with it ("Yad," Tefillah, ix.), and this practise still obtains in the Sephardic ritual.

Origin and Development.

In the course of time additions to the liturgy were multiplied. The ritual, even in its simpler portions, took definite form only by degrees. The earliest elements of synagogal worship were developed from the Temple service and the custom of sacrificial watches ("Ma'amad"), as well as from private and public worship—from psalms and prayers which were composed at different times for special occasions. The benedictions at the beginning of the "Ma'amad" and the prayers at the end became respectively the "Shema'" and the "Tefillah" (Rapoport, "Kalir"; Zunz, "G. V." pp. 367 *et seq.*). The latter, which about 100 C.E. had neither definite redaction nor general binding force, probably consisted at first of only six numbers for week-days and seven for Sabbath and feast-days; in the remaining numbers either a Ḥasidic or a political origin may be traced. Even in the second century the final benedictions for public fast-days still varied (Ta'an. 17a); in the third the whole assembly was not yet accustomed to go to the synagogue at "Musaf" (Yer. R. H. iv. 8; Rapoport, "'Erek Millin," p. 164), and the attendance was generally small (Zunz, "G. V." p. 339). It took centuries before the order of prayer as found in the Babylonian Talmud became established: it was neither desired nor was it possible to give it a fixed and definite form (Zunz, "Ritus," pp. 1 *et seq.*).

Private Prayer.

Private prayer existed side by side with the official liturgy. A large number of prayers composed by scribes and recited on special occasions are mentioned in traditional literature, and prayers by laymen are also quoted. In general, an important place was assigned to prayer, although its thoughtless drawling was condemned. Thus, it is said, "Prayer is more pleasing to God than good works and sacrifice" (Ber. 32b and parallels); while Johanan felt, "Would that prayer lasted the entire day." Worship was held to be equivalent to prayer, and indeed the ritual was actually modeled upon the sacrificial cult (Sifre, Deut. xi. 14; Ta'an. 2a; Ber. 28b). There were many rules regarding prayer (*ib.* 28, 31; Sanh. 22; Ab. ii. 18, etc.). He who prays should drop his eyes, but lift up his heart (Yeb. 105b), although he should not raise his voice (Ber. 24, 31). The saying "God wisheth the heart" (Sanh. 106b) has become a proverb. The suppliant knelt, or fell on his face, stretching out his hands and his feet (prostration; Ber. 34b *et passim*), although this is now done only on the Day of Atonement at the "'Abodah" (see ADORATION). The pious made themselves ready an hour before prayer, and stood still for an hour after it (Ber. 31b). A drunken man was not allowed to pray ('Er. 64; see the eight prescriptions which, according to "Yad," Tefillah, v. 1, must be observed). All faces were turned toward the sanctuary (Ber. 30a), and Maimonides ordained (*l.c.* v. 6, following Ber. 31) that the windows should be opened during prayer. The hands were washed before praying (Ber. 16, 26; Shab. 10), a custom with which the construction of synagogues on the banks of rivers is connected. Ten adults were required to be present at worship (Meg. 34a), a custom which still obtains. On the other hand, the entire congregation did not pray, as it does to-day; but the leader in prayer, the "messenger of the congregation," the most learned among them (Ta'an. 17b), standing in a depression, prayed for all (Ps. cxxx. 1; Ber. 10b): "to step down before the Tabernacle" is equivalent to "leading in prayer" (R. H., end).

Among the people various superstitions arose in connection with the recitation of prayers. The reader of the "Shema'" must not blink his eyes, nor compress his lips, nor point with his fingers (Yoma 19). It is forbidden to pray with phylacteries in the hand or with a Torah roll on the arm (Ber. 23b). He who is unwilling to lead the prayers in a colored garment may not lead when dressed in white, and he who will not lead in sandals may not lead barefoot (Meg. 24b; for other examples see Blau, "Altjüdisches Zauberwesen," pp. 146 *et seq.*).

The Jewish liturgy at first completely dominated the Christian. The three benedictions—still placed at the head of the morning prayer—in which the Jews praise God that he has not created them heathen, or slaves, or women (Men. 43b), express, as their brevity indicates, ancient Jewish views; and therefore they are not to be regarded as imitations of similar Greek formulas (Diogenes Laertius, i. 1, § 7). A striking allusion to this prayer is found in Paul's Epistle to the Galatians, iii. 28: "There is neither Jew nor Greek, there is neither bond nor free, there is neither male nor female: for ye are all one in Christ Jesus." A similar view is expressed in a Parsi prayer ("Monatsschrift," xxxvii. 14 *et seq.*; "Magyar Zsidó Szemle," x. 113 *et seq.*). For early forms of liturgy see "J. Q. R." x. 654 *et seq.*

Influence on Early Christian Liturgy.

The early Christian liturgy, in the reading of the Scriptures, in prayer, and in the singing of the Psalms, was modeled on synagogal practises. The fact that no complete Christian liturgical specimens of the first three centuries are extant indicates that the liturgy in use during that period may have been borrowed from that current in the synagogue. The earliest extant Christian prayers, the pseudo-Cyprianic (text in Michel, "Gebet und Bild in Frühchristlicher Zeit," pp. 3 *et seq.*, Leipsic, 1902), written after 300, are still Jewish in form and content. One of them begins with the "Ḳedushshah" and continues with the introductory formula of the "Shemoneh 'Esreh," and mentions also "purity of heart," which was and is still the main point in the seventh or middle benediction for the Sabbath and feast-days. After the "Shema'" the Jewish ritual placed the "salvation benediction" ("ge'ullah"); and Christian circles, in harmony with folk-beliefs, derived from this benediction various prayers for deliverance from the persecutions of the devil. Satan is mentioned in Jewish prayers also (*e.g.*, morning prayer), although not in the official liturgy nor in the obligatory prayers.

Jewish Prayers and Early Christian Art.

The liturgy of the fasts, which is the oldest, assumed definite form long before the common era (I. Lévi, in "R. E. J." xlvii. 161-171; Michel, *l.c.* pp. 44 *et seq.*). Its formulas took the deepest hold upon the people on account of its antiquity and its peculiar solemnity. This explains why the views of the early Christian Church show the dominant influence of this liturgy and why its prayers contain for the most part not New Testament but Old Testament phraseology. The liturgy naturally dominated early Christian art as well. The subjects for the figures in the catacombs, on stained glass, etc., were borrowed as a rule from those Biblical stories which were found also in the Jewish festival literature; as, for example, the sacrifice of Isaac, Daniel in the lion's den, the three Hebrews in the fiery furnace, and scenes from the story of Jonah (comp. Kaufmann in "R. E. J." xiv. 33-48, 217-253). The prayers do not always observe the chronological order of events; in one prayer the name of Job follows immediately upon that of Abraham, the author evidently sharing the Jewish view that Job was the contemporary of Abraham (see Michel, *l.c.*, where extensive bibliography is given).

History of the Ritual.

The history of the ritual is eventful and varied. At first there were no written prayers; a scribe of the end of the first century says, "The writers of benedictions are as those that burn the Torah." A man who was caught copying some at Sidon threw a bundle of his copies into a washtub (Shab. 115b and parallels; comp. Blau, "Altjüdisches Zauberwesen," p. 93). In no case was written matter used during public worship. Prayer-books appear about the seventh century. "The prayer-books are doubtless older than the prayer 'orders,' which date from the eighth century. However, the first book of this kind of which definite mention is made was composed by Gaon Kohen Ẓedeḳ (843); a generation later appeared the Siddur of Amram Gaon, which was much used after the eleventh century and formed the foundation for benedictions and Siddur collections" (Zunz, "Ritus," p. 18). Prayer-books ("siddur") were composed also by Saadia, Hai, Nissim, and Rashi (extant in MSS.; Buber, in "Ha-Ẓefirah," 1904, No. 8), by Rashi's pupil Simḥah ("Maḥzor Vitry," ed. Hurwitz, Berlin, 1892), and by others (Zunz, "Ritus," pp. 19, 25). The most important work of the twelfth century in this direction, and one highly extolled in later times, was "the Yad ha-Ḥazaḳah of Maimonides, in which, for the first time, the texts of prayers and the ritual were arranged in masterly order by a scholar" (Zunz, *l.c.* pp. 26 *et seq.*).

Siddur and Maḥzor.

Between 1180 and 1320 an immense amount of work was done in Europe in systematizing the worship, the prayer-books of this period forming the foundation for the ritual of the succeeding centuries. There were, also, Arabic forms of siddurim. Until 1300 the Halakah and the Haggadah, current practises, poetry, mysticism, and philosophy, all contributed toward the shaping of the ritual, the poetic material not being increased to any extent after this period (Zunz, *l.c.* pp. 27-30). The word "maḥzor" (shortened from "maḥzor tefillim"), denoting "prayer-book," means literally astronomical or yearly cycle. The Syrians use the term "maḥzor" to denote the breviary. While the Sephardim apply it to those collections which contain all the prayers for the year, the Ashkenazim apply it to the prayer-books containing the festival ritual only. Spanish, Italian, and French maḥzorim were issued sometimes in octavo and smaller sizes, and were often written in small script and handsomely bound. In Germany the various collections were seldom issued in quarto, but generally in folio, with the exception of the Siddur proper, which was issued in smaller size. In contrast to these heavy and expensive volumes for public worship, the 12mo or 16mo Siddur was used for private devotions after the thirteenth century. The latter often contained much superstitious matter, part of which, in the course of time, found its way into the regular prayer-books and was then accepted as part of the ritual service (*ib.* p. 84).

Influence of Cabala.

The Cabala, which had taken deep root by 1500, effected material changes in the Siddur. "In the beginning of the seventeenth century Isaiah Horowitz and others, with their following of the school of Luria, began to introduce new prayers, strange words, and unintelligible meditations ["kawwanot"], with which they deluged public and private worship. All the siddurim and maḥzorim from Tlemçen to Kaffa are filled with mystic alterations and additions; even amulet-formulas were included and thus introduced among the people. This cabalistic-ascetic movement progressed from Palestine to Italy and Poland, from Poland to Germany and Holland, and from Jerusalem and Leghorn to Barbary. Based on ancient customs, it introduced fasting on the 'Small Day of Atonement' and on the eve of New-Moon, early-morning devotions, regular societies which held meetings for prayer and fasting on Mondays and Thursdays, and others which assembled nightly to lament over the Exile, and the like. . . . Through the dissemination of the printed Siddur, of formulas for grace at meals, and of 'tikkun' of all kinds, prayers, either old and obsolescent or new, found their way from foreign rituals and from the works of the cabalists into the ritual of the communities, and there they were retained, modifying to a considerable degree public worship" (*ib.* pp. 149 *et seq.*). On commentaries to the prayers, and on ritual books, etc., see Zunz, *l.c.* pp. 21 *et seq.*, 153 *et seq.*; Abudarham, p. 30; for the varieties of prayer-books used after 1180 see Zunz, "Ritus," p. 33; for mystic vigil order, etc., after 1580, evening assembly at the Feast of Weeks and the "Hosha‘na Rabbah," etc., see *ib.* pp. 151 *et seq.*

Two Main Groups of Rituals.

On the whole, the original prayers, as handed down by the Talmud and the Geonim, agree in all the rituals with Amram's Siddur, although this, as regards the position of the Psalms and of the "Baruk she-Amar," or the wording of individual phrases and clauses, coincides sometimes with the Roman and sometimes with the German or the Spanish Maḥzor. The various rituals are divided into two chief groups, the Arabian-Spanish and the German-Roman. In the former group, the Spanish, or, more correctly, the Castilian, ritual has been preserved in the purest form. This group includes the rituals of Aragon, Catalonia, Avignon, Algeria, Tunis, Tlemçen, Majorca (Catalonio-African), Provence, Carpentras, Sicily (various rituals), and Tripoli (for further details see *ib.* pp. 38 *et seq.*). "Saadia's Siddur apparently contained the substance of the old prayer-order of Egypt, his version of the 'Tefillah' in particular being the one used in that country. . . . After 1200, however, the use of Maimonides' prayer-order became prevalent in Egypt, Palestine, Maghreb, and among the Mozarabic communities generally, the members of which were subsequently called 'Moriscos'" (*ib.* p. 55). At Saragossa and Traga the "Musaf Tefillah" on New-Year's Day was not recited by the congregation alone before its recitation by the ḥazzan, but together with the latter, the ignorance of the majority of the congregation being assigned as the reason for this practise (*ib.* p. 41). As Spain was a center for the first group of rituals, so was Germany for the second. The several rituals may vary in details, but they agree in essentials. The Jews of Germany, Bohemia, Moravia, Silesia, Poland, Prussia, and Hungary have one and the same order of prayer (*ib.* p. 75). The French ritual is really that of Burgundy, and the English communities had probably the same or a similar one (*ib.* pp. 63 *et seq.*). The Roman ritual was widely disseminated, and the "Romanian" or Greek ritual exists in the Romanian Maḥzor, which dates from some period after 1520 (*ib.* pp. 76–79). The Romanian group includes also the rituals of Corfu and Kaffa, while the Palestinian ritual, which varied to some extent in the earlier period, lost its independence in the twelfth century (*ib.* pp. 82–84). The interrelation of the various rituals appears in individual portions of the service, chiefly in those which were not based on ancient usage, such as the dirges ("ḳinot") for the Ninth of Ab and the "Hosha‘not."

Day of Atonement.

"The Day of Atonement did not always have the somber coloring given it in the Middle Ages. Even in the time of the Soferim the people danced in the vineyards on that day, and as late as the beginning of the fourth century it does not seem to have been customary in Palestine for every one to spend the whole day in the synagogue (Ḥul. 101b). The form of the 'Tefillah' had not been definitely fixed by the third century; it occasionally ended with 'Ne‘ilah,' omitting the evening prayer . . . 'Abodah' and 'Seliḥah' were considered as the most important divisions, even though the form of the latter was by no means invariable." Amram's Siddur does not refer to the "Kol Nidre," which is designated in the later redaction as of Spanish origin, and was recited only by the ḥazzan (Zunz, "Ritus," pp. 95 *et seq.*; on 'Abodah and Abinu Malkenu in antiquity see *ib.* pp. 101, 118). The second and the fifth day of the week (comp. Luke xviii. 12) were set apart even in antiquity as lesson-days, on which the people went to the synagogue. In the early Middle Ages the pious began to consider these as penitential days. Penitence consisted in prayer and fasting, there being no fast-day without a prayer of atonement ("Seliḥah"), while to utter this without fasting was considered unseemly. The ten days of penance between New-Year and the Day of Atonement were observed, however, in antiquity, which, as stated above, possessed a definitely fixed fast-day liturgy (Zunz, "Ritus," pp. 120–130; *idem*, "S. P." p. 83).

Changes in the Prayer-Books.

Toward the end of the Middle Ages there were many changes in the form of worship, for reasons both internal and external. "Gutenberg and Luther no less than the Cabala and the Inquisition influenced the ritual of the Synagogue. After the first decades of the fifteenth century the minute regulations of the ritual manuals allowed scarcely any initiative to the ḥazzan, who had, moreover, lost his former high position, being now neither a poet nor a teacher of the

Law, nor was he either of these at any time in Germany or Poland. When the art of printing made manuals and prayer-books accessible to all, the editor took the place of the ḥazzan. Printing imposed restrictions. . . . The similarity of the copies in the hands of the people produced uniformity; the 'Minhag' conformed to the printed editions. Within forty or fifty years printed Hebrew prayer-books were current in the countries in which there were Jews and printing-presses. The German ritual was the first one printed (grace at meals, 1480; 'Seliḥah,' n.d. and 1496; prayer-book, 1508; Maḥzor, *c.* 1521); then followed the Roman ritual (prayer-book and Maḥzor, 1486; 'Seliḥah,' 1487; 'Hosha'na,' 1503), the Polish (prayer-book, 1512; Maḥzor, 1522; 'Yoẓerot,' 1526; 'Seliḥah,' 1529; all printed at Prague), and those of Spain (n.d. and 1519), Greece (1520), Catalonia (1527), Aragon (n.d.), and the Karaites (1528)" (Zunz, "Ritus," p. 145; for further details on commentaries, translations, editions of prayer-books, and the ritual of the Karaites, *ib.* pp. 153–162; on the last-named see also Zunz, "G. V." pp. 439 *et seq.*; and comp. Lady McDougall, "Hymns of Jewish Origin," in "Songs of the Church," London, 1903).

After the expulsion of the Jews from Spain in 1492 the Spanish ritual was more widely introduced and became an important factor. The "informers" caused material changes in the Maḥzor. Even in the Middle Ages they brought charges against the prayer-books as well as the Talmud, and consequently their owners in alarm erased passages, cut out entire leaves, and changed single words here and there. The Kol Nidre and the 'Alenu were special objects of attack as early as the fourteenth century; in the second half of the following century the persecutions steadily increased, especially on the part of the preaching friars, and soon the Inquisition began to act in the same direction. "When printing and a knowledge of the language facilitated examination of the liturgical prayers, the Roman Church being at the same time endangered by the Reformation, the books were watched more carefully, and a censorship which constantly increased in severity fettered the prayer-books also. Certain expressions were no longer allowed in the editions. . . . Since that time some prayers have disappeared entirely and others have been mutilated. . . . The Herdenheim edition of the 'Seliḥah' (1546) removed 'all offensive and dangerous matter.' Thenceforth not only the Siddur and Maḥzor, but all Jewish printed books, were subject to constant attack from the Dominicans, who employed converted Jews. . . . In the year 1559 the prayer-books of the community of Prague were taken to Vienna to be examined." These mutilations increased in the course of time (Zunz, "Ritus," pp. 145 *et seq.*, and appendix vi.; comp. also *idem*, "G. S." iii. 239; Berliner, "Einfluss des Ersten Hebräischen Buchdrucks auf den Cultus und die Cultur der Juden," Frankfort-on-the-Main, 1896; Popper, "The Censorship of Hebrew Books," New York, 1899).

Reforms in the Nineteenth Century.

The reform of worship began with Moses Mendelssohn as a result of the general readjustment in Jewish life and learning. Wolf Heidenheim especially rendered enduring services to this reform by the correctness of his editions, his excellent notes, and the translations adapted to his time. The editions of the Siddur by Landshuth (Königsberg, 1845) and Baer (Rödelheim, 1868) are also valuable. Liturgy was and is still the field on which the different parties within Judaism—Orthodox, Progressive, and Reform—fight their battles with more or less bitterness. Among these conflicts the Hamburg Temple controversy, in 1819, and the Reform prayer-book controversy of the Berlin community are especially noteworthy. Reform is still progressing in this department and is not likely to reach a conclusion in the near future. Leopold Zunz (1794–1886) investigated all branches of the liturgy with astonishing assiduity. In his first great work, "Gottesdienstliche Vorträge" (Berlin, 1832), which is the earliest product of modern Jewish science and which contains a complete history of the liturgy, he advocates the abolition of many old prayers and the introduction of appropriate new ones (pp. 494 *et seq.*). Reform, however, was not content with removing external abuses; it investigated the earliest prayers of the liturgy, the recitation of which had been declared to be obligatory as early as the time of the Talmud. It considered the views which gave rise to these prayers in connection with modern ideas and has abandoned the prayers, either partly or entirely. A. L. B.

LITWACK or **LITTWACK, JUDA**: Dutch mathematician; born in Poland about 1760; died Jan. 15, 1836; buried at Ouerveen. A disciple of Moses Mendelssohn, he removed to Amsterdam, where he became one of the most important members of the 'Adat Yeshurun congregation. With C. Asser and Lemon he was appointed a deputation to the Sanhedrin at Paris, where he delivered a discourse in the German language (Feb. 12, 1807).

Litwack was a member of the Mathesis Artium Genetrix society. He wrote "Verhandeling Over de Proefgetallen Gen. 11," Amsterdam, 1817 (2d ed., 1821).

S. E. Sl.

LIVER (כבד): A glandular organ situated, in man, to the right beneath the diaphragm and above the stomach. In six passages of the Bible in which the liver is mentioned the expression יותרת הכבד is met with in reference to the part of the organ which had to be sacrificed as a fatty piece (Ex.

xxix. 13, 22, *et passim*). The meaning of this expression has not been successfully established. Both Onkelos and pseudo-Jonathan translate it חצרא דכבדא, or in the Hebrew form חצר הכבד, which is met with in the Talmud. The Authorized Version, following Jerome, renders it "the caul above the liver"; and it seems that Rashi gave the same interpretation. But the Septuagint renders it by "the lobe of the liver," which shows that the piece sacrificed was a part of the liver itself. The interpretation "caul" or "flap around the liver" seems to be based on the Aramaic חצר, taken in the sense of "surrounding." But Bochart ("Hierozoicon," i. 562, Leipsic, 1793–96) has proved the error of such an interpretation, referring to Saadia's Arabic rendering "za'idah" (= "excrescent"). Kohut ("Aruch Completum," *s.v.* אצבע and חצר הכבד) draws attention to a passage in Tamid (31a) in which "the finger of the liver" is spoken of (see Rashi *ad loc.*). Kohut therefore supposes that the Aramaic חצרא is the equivalent of the Arabic "khanṣar" = "little finger." His supposition is confirmed by Isaac ibn Ghayyat, who quotes Hai Gaon (Dukes, in "Orient, Lit." ix. 537) to the effect that the expression חצר הכבד comes from the Arabic and that the liver is composed of pieces similar to fingers. According to Naḥmanides (Responsa, No. 162), if this part of the liver is perforated, the flesh of the animal may be eaten (see also Dillmann on Lev. iii. 4; Driver and White, "Leviticus," p. 65; Nowack, "Archäologie," i. 228; comp. Caul; Fat).

Neither man nor beast can live without a liver ('Ar. 20a). If the liver is missing from an animal, its flesh may not be eaten (Ḥul. 42a). Therefore if any one dedicates to the sanctuary the value of his head or of his liver, he must pay the value of his entire person ('Ar. 20a; B. M. 114a). On liver complaints see Maimonides, "Yad," Sheḥiṭah, vi. 1, 8, 9; vii. 4, 19, 21; viii. 16.

The liver is the seat of life. The archers pierced the liver with their arrows (Prov. vii. 23), thereby quickly causing death. Johanan (d. 279) says: "He smote him under the fifth rib" (II Sam. ii. 23), *i.e.*, in the fifth partition, where liver and gall are connected (Sanh. 49, above). Johanan does not mean to imply that liver and gall are in the chest, as Ebstein infers ("Medicin des N. T. und des Talmuds," ii. 129), but merely that liver and gall were wounded. The tradition (I Kings xxii. 34; II Chron. xviii. 33) that the arrow struck the king between the ribs ("debaḳim") likewise refers to the fifth partition (see also Sanh. 63b; Kohut, "Aruch Completum," iv. 182b). A tannaite living at Rome about 150 recommends the membrane of the liver of a mad dog as a remedy against hydrophobia, and Galen also approves of this remedy; but the Palestinian teachers forbade it because its efficacy had not been proved (Yoma viii. 5; 84a, b; see Blau, "Altjüdische Zauberwesen," pp. 80 *et seq.*). Tobit vi. 8, viii. 2, however, shows that fumigating with fish-livers was considered a means of exorcising evil spirits in Palestine.

On the functions of the liver there is only a single passage in the Bible, namely, Lam. ii. 11: "Mine eyes do fail with tears, my bowels are troubled, my liver is poured upon the earth, for the destruction of the daughters of my people." On the functions of the several organs of the human body this observation is found in the Talmud: "The liver causes anger; the gall throws a drop into it and quiets it" (Ber. 61, above).

The augural significance of the liver, hepatoscopy, is mentioned only once in the Bible, and then as a foreign custom. Ezekiel (xxi. 21) says of Nebuchadnezzar: "For the king of Babylon stood at the parting of the way, at the head of the two ways, to use divination: he made his arrows bright, he consulted with images, he looked into the liver" (see Jew. Encyc. iv. 624a, *s.v.* Divination). Levi (3d cent.) remarks on this passage: "as the Arabian, who slaughters a sheep and inspects the liver" (Eccl. R. xii. 7).

LIVERPOOL: Chief seaport in the northwest of England, situated on the Mersey, and in the county of Lancashire. There was a primitive settlement of Jews in the town about 1750, but this later became extinct. Tombstones with Hebrew inscriptions were discovered beneath some structures between Derby street and Cumberland street, an old portion of the city. The synagogue with cemetery attached is marked in a map of Liverpool for 1796; but at the time of Harwood's large survey in 1803 it had disappeared. It became a Sandemanian chapel (W. Robinson, "History of Liverpool," 1810, p. 388).

Early Settlements.

It seems that the first Jewish settlers were mainly recruited from the Portuguese Jews of Bevis Marks, London, and were of those who were about to proceed to Ireland, Dublin being then an established Jewish center.

About 1780 the Jews again assembled for worship in Turton Court, on the site of the present customhouse. From their names, as given in a Liverpool directory of 1790, they appear to have been a medley of Germans, Poles, and Londoners, mostly itinerant dealers and venders of old clothes. Here and there a Sephardi is recorded as a merchant; but the Polish element must have predominated, as the early minute-books of the community are written in Judæo-German with square, not cursive, characters.

The next removal, in Dec., 1789, was to Frederick street, the Liverpool corporation assigning to the Jews for religious purposes a building with a garden in the rear for a cemetery. At the extreme end of this synagogue, which could hold sixty or seventy worshipers, was a glass roof evidently intended for a sukkah or tabernacle. In the basement was a "miḳweh," or ritual bath. In 1806 the corporation presented the Jews with another site in Seel street, where the Old Hebrew Congregation met from 1807 until 1874, when it removed to the present handsome building on Prince's Boulevard. In 1835 the town had encroached on the cemetery in Oakes street, and a burial-ground was purchased in Fairfield (Deane road), then quite rural; this in turn became inadequate, and a new one in Broad Green was opened in June, 1904.

The Seel street synagogue was the first in the United Kingdom in which sermons were delivered in English; this happened in 1806, the preacher being Tobias Goodman. D. W. Marks acted as secre-

New Congregation.

tary and preacher to the congregation in 1833. He subsequently became chief minister of the Berkeley Street (London) Congregation of British Jews. There were probably 250 Jewish families in Liverpool in 1838, when a secession took place in the community. At first the seceders held divine service in a small building in Hardman street, now used as a temperance hall. In 1857 they erected a handsome building in Hope place. They also purchased a cemetery in Green lane, Tuebrook, which is still (1904) in use.

In 1846 a few numbers of a monthly Jewish magazine entitled "Kos Yeshu'ot" appeared in Liverpool.

The first organization in Great Britain in connection with the Alliance Israélite Universelle was founded in Liverpool in 1868, three years before the Anglo-Jewish Association was established in London, with which, however, it later amalgamated. In 1882 the extensive emigration to America was organized and directed from Liverpool; and during the year of the Russo-Jewish persecutions 6,274 persons were sent, at a cost which amounted to over £30,000 ($150,000), to the United States and Canada in thirty-one steamships.

It is computed that there are at present about 1,500 Jewish families in Liverpool in a total population of about 685,000. Owing to the great influx of Russian and Polish Jews, a number of ḥebras have sprung into existence, as well as two considerable congregations: (1) Bet ha-Midrash, situated in Crown street; (2) the Fountains Road Congregation, situated in the suburb of Kirkdale.

A Hebrew school was founded in 1842, commencing with ten pupils. Subsequently a building was erected in Hope place to accommodate eighty pupils; it has since been enlarged so as to provide room for more than 700 children.

Among the many Jewish organizations may be mentioned: the Philanthropic Society, Provident Society, Tontine Benefit Society, Board of Guardians, Jewish Shelter, Ladies' Benevolent Charity, Branch of the Anglo-Jewish Association.

LIWA BEN BEZALEEL. See Judah Löw ben Bezaleel.

LIZARD: A saurian or lacertilian reptile. About forty species and twenty-eight genera of lizards found in Palestine have been enumerated, the most common of which are the green lizard (*Lacerta viridis*) and its varieties, and the wall-lizard belonging to the genus *Zootoca*. It is therefore generally agreed that besides "leṭa'ah," traditionally rendered by "lizard," the following terms, enumerated among the "creeping things that creep upon the earth" (Lev. xi. 29 *et seq.*), also denote some kinds of lizard: "zab" (Arabic, "ḍabb"), identified with the *Uromastix spinipes* (A. V. "tortoise"; R. V. "great lizard"); "anaḳah" with the gecko, of which six species are found in Palestine (A. V. "ferret"; R. V. "gecko"; see Ferret); "koaḥ" (Vulgate and Ḳimḥi, "stellio") with the monitor (A. V. "chameleon"; R. V. "land-crocodile; see Chameleon); "ḥomeṭ" with the sand-lizard (A. V. "snail"; R. V. "sand-lizard"); "tinshemet," by reason of the etymology of the name (= "breathing," "blowing"), with the chameleon (A. V. "mole"; R. V. "chameleon"; see Chameleon); "semamit" (Prov. xxx. 28), the same word which the Targum Yerushalmi uses for "leṭa'ah," and the Samaritan version for "anaḳah," the meaning of the passage being that the lizard may be held in the hand with impunity (A. V. "spider"; R. V. "lizard").

In the Talmud "leṭa'ah" is the general term for the *Lacertilia*. It is described as having a thick but soft and separable skin (Shab. 107a, b; Ḥul. 122a), and its eggs have the white and yolk unseparated ('Ab. Zarah 40a [Rashi]). A case of resuscitation of an apparently dead lizard by pouring cold water on it is related in Pes. 88b. In Shab. 77b the semamit is mentioned as inspiring terror in the scorpion and also as serving as a cure for its bite, with which may be compared Pliny, "Historia Naturalis," xxix. 4, 29. In Sanh. 103b it is related that King Amon, after abolishing the Temple service, placed a semamit upon the altar. The chameleon is considered to be intended by "zeḳita" in Shab. 108b. This may be connected with "ziḳa" (= "wind"), meaning properly "the windy," the ancients believing the chameleon to live on air (comp. Pliny, *l.c.* viii. 33, 35).

E. G. H. I. M. C.

In the Bible.

LOANS: In the commonwealth of Israel, as among other nations of antiquity, loans of money, or of corn or like commodities, were made as a matter of favor by the wealthy to those standing in need, and but seldom, if ever, in the way of furnishing capital necessary for enterprises in trade or agriculture. At least in all passages of Scripture lender and borrower stand, at the time of the loan, in the attitude of benefactor and dependent (Ps. cxii. 5); after the loan, in that of master and servant (Prov. xxii. 7); and, when the lender enforces his demand, in that of tyrant and sufferer (II Kings iv. 1). It is made the duty of the well-to-do Israelite to lend of his affluence to his poor brother (*i.e.*, fellow Israelite) according to the borrower's wants, at least when a pledge is offered (Ex. xxii. 25; Deut. xv. 8), and that without claiming interest (see Usury); and he should not refuse even when the approach of the year of release endangers the recovery of the loan (Deut. xv. 9), and though the security of the pledge is much weakened by the lender's duty of returning it when the debtor needs it (see Pledge). In truth, to lend is regarded in Scripture (*ib.* 1-11) as an act of benevolence the reward for which must be expected only from God.

R. Ishmael, of the time of Hadrian (see Mek., Ex. xxii. 25), reckons the command to lend to the poor as one of the affirmative precepts; and the Talmud (B. M. 71a) derives from Ex. xxii. 25 the rule that between the Gentile who offers interest and the Israelite from whom it is not allowed to be accepted, the latter should have the preference; between the rich and the poor, one should lend to the poor; between kinsmen and townsmen, lend to kinsmen first, but give the preference to townsmen over those from a distance. To lend is deemed more meritorious than to give (Maimonides, "Yad," Malweh, i. 1); for by a timely loan the receiver may be saved from beggary.

In the Talmud.

The lender or creditor is bidden also, on inferential Scriptural grounds (*ib.*; Deut. xv. 2–3), not to press the borrower or debtor when he knows that the latter can not pay; which admonition was so extended by the Rabbis that they forbade the creditor to show himself to the unfortunate debtor, in order that he might not put the latter to shame ("Yad," *l.c.* xiii. 3).

On the other hand, it is a most sacred duty of the borrower to pay if he can. To withhold payment is wickedness (Ps. xxxvii. 21), and, according to the Rabbis, the debtor, when able to pay, must not even put the creditor off, telling him to come again; nor must he waste the borrowed money or lose it recklessly, so that he can not repay it.

Cancelation of Loans.

Under the written law (Deut. xv.) all debts arising from a loan are canceled by the passage of the year of release over them, on the last day (last of Elul) of that year. The text (*ib.* verse 9) warns earnestly against the baseness of not lending to the poor from fear of such release; yet in the days of King Herod this kind of baseness prevailed among the well-to-do Jews to such an extent that Hillel the Elder, who according to rabbinical tradition was at that time president of the Sanhedrin, in order "that the door might not be shut in the face of borrowers" thought it best to contrive a fiction whereby to nullify the Scriptural law (see Sheb. viii. 2–3; Sifre, *ad loc.*). He authorized the creditor to execute a deed, known as the "prosbul," in some such words as these: "I, A. B., hereby deliver to you [giving the names], judges of the court at [naming the place], all the claims which I own, so that I may collect them at any time I may choose"; which instrument was signed by the judges and by two witnesses, and the bonds were then handed over to the court. The act of Hillel was justified on the ground that the year of release being indissolubly connected with the year of jubilee and the restoration of lands to their former owners, and the latter being in the second commonwealth no longer feasible, the release of debts ceased to be a Scriptural and became only a rabbinical law, and for good cause might therefore be modified, or even abrogated, by the Great Sanhedrin (see Talmud Yerushalmi on above mishnah). The Sabbatical year, as far as it affected seed-time and harvest, was meant only for the Holy Land; neither did it ever work the release of debts beyond the boundaries of that country. Joseph Caro says, in his code, that as a rabbinical institution the law of the year of release operates in all times and places; but the gloss of Moses Isserles declares that in "these countries," meaning northern Europe, it had fallen entirely into desuetude.

A debt arising from the sale of goods or of land or from liability for wrongs done, the wages of labor, or the hire of lands or of animals, whether liquidated by the written law or unliquidated, was not affected by the year of release; but if the parties agreed upon the amount due or that should be paid, and upon the length of time of forbearance, such debt or liability became a loan in the eyes of the law, and was then regarded as a subject of release, unless kept alive by the prosbul (Sheb. viii. 2; Sifre, Deut. 15).

The fear that a literal enforcement of the Scriptural law against lenders would "shut the door in the face of borrowers" led to its relaxation in other respects also. Thus, strictly speaking, creditors should have the debtors' worst lands ("zibburit") allotted to them in satisfaction; but as such a rule would discourage loans, it was modified so as to allot middle-grade lands for their satisfaction (Giṭ. 49b; see APPRAISEMENT).

S. L. N. D.

LOANS or **LOANZ** (לואנץ), **ELIJAH BEN MOSES ASHKENAZI:** German rabbi and cabalist; born at Frankfort-on-the-Main 1555; died at Worms July, 1636. He belonged to the Rashi family, and on his mother's side was the grandson of Johanan Luria, and on his father's of Joselmann of Rosheim. After having studied in his native city under the direction of Jacob Ginzburg and Akiba Frankfort, Loans went to Cracow, where he attended the lectures of Menahem Mendel. While there he prepared for publication the "Darke Mosheh" of Moses Isserles. At the beginning of the seventeenth century Loans was called to the rabbinate of Fulda, which he left in 1612, occupying sucessively the rabbinates of Hanau, Friedberg (1620), and Worms (1630), in which last-named city he remained until his death.

Loans was a diligent student of cabala, and for this reason was surnamed "Ba'al Shem." Besides his great learning he possessed many accomplishments, such as music and calligraphy; and all kinds of legends circulated regarding his personality. He was the author of the following works: "Rinnat Dodim" (Basel, 1600), a commentary on Canticles; "Miklol Yofi" (Amsterdam, 1695), a commentary on Ecclesiastes; "Wikkuaḥ Yayin 'im ha-Mayim" (*ib.* 1757), a poem with a commentary; "Ma'agle Ẓedeḳ" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1832), a commentary on Baḥya's "Ḥobot ha-Lebabot"; "Ẓofnat Pa'aneaḥ" (*ib.* No. 1830), a commentary on the "Tiḳḳune Zohar"; a commentary on Genesis Rabbah (*ib.* No. 149); "Adderet Eliyahu" (*ib.* 1829), a commentary on the Zohar.

Loans also edited the "'Ammude Shelomoh" of Solomon Luria on the "Semag" (Basel, 1599), and the "Sha'are Dura" of Isaac ben Meïr of Dueren, to which he wrote a preface (*ib.* 1600).

K. I. BR.

LOANS, JACOB BEN JEHIEL: Physician in ordinary to the German emperor Frederick III. (1440–93), and Hebrew teacher of Johann Reuchlin; died at Linz about 1506. Loans rendered lifelong faithful service to the emperor, by whom he was knighted. At Linz in 1492 Reuchlin, who had been sent to the emperor's court by his protector Eberhard of Württemberg, met Loans; and the latter became his first teacher in Hebrew grammar. Reuchlin always held him in grateful remembrance; he cites him as "præceptor meus, mea sententia valde doctus homo Jacobus Jehiel Loans Hebræus" ("Rudimenta Hebraica," p. 249) or "humanissimus præceptor meus homo excellens" (*ib.* p. 619). Geiger supposes that Reuchlin took Loans as a model for the Jewish scholar *Simon*, one of the three disputants in Reuchlin's "De Verbo Mirifico."

LOANZ, JOSEPH. See Josel (Joselmann, Joselin) of Rosheim.

LÖB ARYEH BEN ELIAH OF BOLOCHOW: Russian rabbi; born at Satanov, government of Podolia, 1801; died at Zaslavl, government of Volhynia, Sept. 2, 1881; a descendant of Rabbi Joshua Höschel of Cracow (1654-64), author of "Sefer Toledot Aharon." Löb Aryeh, in addition to his studies in rabbinic literature, had a thorough knowledge of the Bible and of Hebrew grammar, and he became a fluent writer in Hebrew. He had a fair knowledge of mathematics also. He was rabbi of Zaslavl for about twenty years, and published "'Arugat ha-Bosem," commentaries to the Yoreh De'ah, Wilna, 1870, and "Shem Aryeh," commentaries to other parts of the Shulḥan 'Aruk, Wilna, 1873.

Bibliography: Preface to *Shem Aryeh*; Walden, *Shem ha-Gedolim he-Ḥadash*, pp. 66, 72; *Ha-Ẓefirah*, 1881, No. 36.

L. G. H. R.

LÖB ARYEH HA-KOHEN OF STYRIA: Rabbi at Rozniatow and afterward at Styria; died in 1813. He was the author of the following works: "Ḳeẓot ha-Ḥoshen," a casuistic commentary in two volumes on the Ḥoshen Mishpaṭ of Joseph Caro's Shulḥan 'Aruk, published in 1788 and later; "Abne Millu'im," a similar commentary in two volumes on the Eben ha-'Ezer of the same work (Lemberg, 1815, and Zolkiev, 1825); and "Sheb Shema'tata," novellæ on the Talmud (Lemberg, 1804). The first volume of the "Abne Millu'im" contains an appendix, entitled "Meshobeb Netibot," in which the author defends his first works against the attacks of Jacob of Lissa.

Bibliography: Walden, *Shem ha-Gedolim he-Ḥadash*, p. 79; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 54.

S. S. I. Br.

LÖB ARYEH BEN MEÏR: Lithuanian rabbi; lived in the seventeenth and eighteenth centuries. His notes on Rashi and on Elijah Mizraḥi's commentaries on the Pentateuch were published, under the title "Ḥiddushe Maharsha" (Hanover, 1716), with Samuel Edel's novellæ on the Pentateuch, by his brother **Ẓebi Hirsch b. Meïr.**

Bibliography: Wolf, *Bibl. Hebr.* iii., No. 353d; Steinschneider, *Cat. Bodl.* col. 745.

S. S. M. Sel.

LÖB ARYEH BEN TOBIAH: Lithuanian Talmudic scholar and printer; died at Wilna Oct. 24, 1812. He enjoyed great consideration in Wilna on account of his learning and of the assistance rendered by him to Talmudic students. He was the first (in partnership with Tobiah b. Abraham Abele) to establish a Hebrew printing-house at Wilna (1799). The first work printed there was Saadia's "Ma'amar ha-Teḥiyyah weha-Pedut." Owing to competition the establishment existed a short time only.

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, pp. 199, 225.

J. M. Sel.

LÖB BEN BARUCH BENDET: Rabbi of Byelostok, Russia, in the eighteenth and nineteenth centuries; author of "Sha'agat Aryeh" (Byelostok, 1805), novellæ on the treatise Makkot. The author quotes frequently his father's "Ner Tamid" (Grodno, 1789); and in the preface he states that he has written novellæ on the whole Talmud.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 553; Walden, *Shem ha-Gedolim he-Ḥadash*, p. 79.

H. R. M. Sel.

LÖB, ELIEZER: German rabbi; born at Pfungstadt, grand duchy of Hesse, 1837; died at Altona Jan. 23, 1892. He was educated at the gymnasium of Darmstadt and at the University of Giessen, and received his rabbinical instruction chiefly under Benjamin H. Auerbach, rabbi of Darmstadt, whose daughter he married. At first he was principal of the Jüdische Realschule in his native city, founded by him (1857-61). Subsequently he was called to the rabbinate of Ichenhausen, Bavaria, where he remained until 1873, when he was called to succeed Jacob Ettlinger as chief rabbi of Altona. He contributed to the "Jüdische Presse," and prepared for publication H. J. Michael's bibliographical work "Or ha-Ḥayyim," but ill health prevented him from completing his labor, which was finished by A. Berliner. A rabbinical work by him, "Dammeseḳ Eli'ezer," remained in manuscript. He was a devoted worker for Orthodox communal affairs and was for years a trustee of the Hildesheimer Seminary at Berlin.

Bibliography: Dukesz, *Iwoh, Iwoh le-Moshab*, pp. 133-136, Cracow, 1903.

S. D.

LÖB B. JOSEPH (REB LÖB SARAH'S): Early Ḥasidic rabbi; died in Yaltushkov, Podolia, about 1797. His was the strangest and most mysterious character of the many miracle-working rabbis of the Ḥasidim of the latter part of the eighteenth century. He continually traveled from one Polish city to another, spending money lavishly, but never accepting anything from his adherents. Most of the wonderful stories which are still told about him connect him with kings and princes and with successful efforts to influence the authorities in behalf of Jews. This caused Gottlober to suspect that he was in the secret service of the Polish or the Austrian government, a view seemingly absurd, although a letter by R. Bär of Meseritz, stating that "R. Löb Sarah's of Rovno is to be assisted and implicitly believed, for he is rendering important services to Jews, and will himself orally explain things which can not be put down in writing" (Primishlauer's "Darke Yesharim," Jitomir, 1805), lends some slight support to the supposition. The story of an eye-witness that R. Löb Sarah's passed the guards unnoticed and entered the royal palace of Warsaw on the day of the coronation of Stanislaus Poniatowski (1764), and the account of his seven years' struggle with Emperor Joseph II., on whom he inflicted terrible sufferings, are characteristic examples of the miracles ascribed to him by the superstitious people. R. Azriel of Kozin (near Kremenetz), his pupil (according to Gottlober, his driver), was considered as his successor.

Bibliography: Eleazar ha-Kohen, *Ḳin'at Soferim*, p. 75a, Lemberg, 1892; Gottlober, in *Ha-Boḳer Or*, v. 386-388, vi. 1-2; *Seder ha-Dorot he-Ḥadash*, pp. 43-49; Walden, *Shem ha-Gedolim he-Ḥadash*, p. 81, Warsaw, 1882.

H. R. P. Wi.

LÖB JUDAH B. EPHRAIM: Rabbi of the second half of the seventeenth century; probably born in Wilna, from which city his father, Ephraim b. Jacob ha-Kohen, fled to Buda (Ofen, incorporated into the present Budapest) during the Cossack uprising of 1655; died in Palestine after 1686. Löb remained in Buda until 1684, when he went to Jerusalem, and there, with the assistance of Moses Galanti the younger, began to prepare for publication his father's work "Sha'ar Efrayim." When Charles of Lorraine wrested Buda from the Turks in 1686, the members of Löb's family lost all their possessions and removed to Prague. Löb returned from Palestine to that city; and wealthy people there assisted him to publish the "Sha'ar Efrayim," with his own notes and an appendix (Sulzbach, 1686). He went again to the Holy Land, and died in Safed (according to others, in Jerusalem).

S. S. P. Wi.

LÖB JUDAH B. ISAAC: Polish rabbi; died in Cracow about 1730; grandson of R. Joshua, author of "Maginne Shelomoh." He officiated as rabbi at Shidlow, Poland, being at the same time a representative of Cracow in the Council of Four Lands. After 1715 he became rabbi and president of the yeshibah at Cracow, where he remained till his death.

Löb Judah is known by his approbations to many books, among which may be mentioned "Panim Me'irot," by Meïr Eisenstadt (Amsterdam, 1714), and "Berit Shalom," by Phinehas b. Pelta (Frankfort-on-the-Main, 1718).

Of his family are known only two sons: **David Samuel,** who succeeded his father, first in Shidlow and afterward in Cracow, and **Isaac,** rabbi of Tarnow, Galicia.

Bibliography: Zunz, *'Ir ha-Ẓedeḳ*, pp. 159-160; Friedberg, *Luḥot Zikkaron*, pp. 25, 26.

H. R. N. T. L.

LÖB JUDAH BEN JOSHUA: Bohemian scholar; lived at Prague in the middle of the seventeenth century. He filled the office of secretary to Simon Spira, chief rabbi of Prague, and he published, under the title "Milḥamah be-Shalom," an account of the siege of Prague by the Swedes in 1648 and of the suffering of the Jews on that occasion. Printed first at Prague, it was reproduced later, with a Latin translation by Wagenseil, in "Exercitatio Tertia," and republished in the "Bikkure ha-'Ittim," iv. 103 *et seq.*

Bibliography: Zunz's notes to Asher's edition of *Benjamin of Tudela*, p. 284; idem, *Z. G.* p. 300, No. 242; Steinschneider, *Cat. Bodl.* col. 1324; Zedner, *Auswahl Historischer Stücke*, p. 138, Berlin, 1840.

D. I. Br.

LÖB HA-LEVI OF BRODY: Galician rabbi of the beginning of the nineteenth century; held office first at Podhajce, then at Brody. Among his contemporaries was Ephraim Zalman Margaliot, chief rabbi of Brody, in whose "Bet Efrayim" occurs a responsum of Löb's. He was the author of "Leb Aryeh" (Lemberg, 1820), a commentary on Ḥullin.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 253; Walden, *Shem ha-Gedolim he-Ḥadash*, p. 82.

LÖB OF POLONNOYE. See Löb Mokiaḥ.

LÖB BEN SAMUEL ẒEBI HIRSCH: Russian rabbi; born probably at Pinczow, government of Kielce, Poland, about 1630; died at Brest-Litovsk 1714. Löb was on his father's side the grandson of Joel Sirkes and stepson of David ben Samuel ha-Levi, of whom he was also the pupil. He studied besides under Joshua Höschel, author of "Maginne Shelomoh," and under Yom-Ṭob Lipmann Heller. He was rabbi successively of Swirz, Galicia (before 1663), Kamorna, Stobnitz, Zamosc (1679-89), Tiktin, Cracow, and finally Brest-Litovsk (1701-14). He was considered by his contemporaries so great a Talmudic authority that in 1669 he was sent with his stepbrother Isaiah ha-Levi to Constantinople to investigate the claims of Shabbethai Ẓebi. His responsa were published later, under the title "Sha'agat Aryeh" (Neuwied, 1736), by his grandson Abraham Nathan Meisels, who added some of his own under the title "Ḳol Shaḥal." Other responsa of Löb's are to be found in the "Shebut Ya'aḳob," No. 107 edited by his grandson, and in "Teshubot Geonim Batra'e," published first in Turkey by the author of "Ma'ane Elihu," and afterward in Prague (1816).

H. R. M. Sel.

LÖB OF SHPOLA: Early Ḥasidic rabbi; died at an advanced age Oct. 4, 1810. It is said that he was a poor "melammed" or teacher in his younger days, and that he did not assume the title of rabbi because, unlike other "ẓaddiḳim" of that period, he was not the pupil or disciple of a great ẓaddiḳ. Although his only claim to prominence in the Ḥasidic world was a visit which he paid once to R. Israel Ba'al Shem-Ṭob, the nominal founder of Ḥasidism, both R. Baruch of Medzhibozh and R. Naḥman of Bratzlave (the first a grandson and the second a great-grandson of the Ba'al Shem) developed a fierce antagonism to him. He was popularly known as "the Shpoler Zeide" (grandfather of Shpola), and was revered for his great piety. He led a very simple, almost ascetic, life, and distributed in charity most of the money given him by his numerous adherents. He left no writings, and if his detractors are to be believed, he did not possess the knowledge and intelligence to produce anything of value; but he so impressed his contemporaries that his name is still preserved among the Ḥasidim, especially those of southern Russia, as that of one of the saintly, miracle-working rabbis of the first period of Ḥasidism.

Bibliography: Gottlober, in *Ha-Boḳer Or*, v. 384-388: Rodkinson, *Toledot Ba'ale Shem-Ṭob*, pp. 39-40, Königsberg, 1876.

H. R. P. Wi.

LÖB (ARYEH) BEN ZACHARIAH (called also **Hocher R. Löb**): Polish rabbi; born at Cracow about 1620; died there 1671. When a young man he was called as rabbi to Vienna, where he officiated for a few years. Thence he went to Przemysl, Galicia, and in 1665 he became rabbi at his native place, where he remained until his death. He was the author of "Tiḳḳune Teshubah," an ethical work in Judæo-German, Cracow, 1666.

Bibliography: Zunz, *'Ir ha-Ẓedeḳ*, p. 115, Lemberg, 1874; H. N. Dembitzer, *Kelilat Yofi*, i. 78b; Joel Dembitzer, *Mappelet 'Ir ha-Ẓedeḳ*, p. 25.

H. R. B. Fr.

LOBATO: Marano family, several of whose members lived at Amsterdam. The best-known members of the family are:

Diego Gomez Lobato (called also **Abraham Cohen Lobato**): Portuguese Marano; born at Lisbon, where he was living in 1599; cousin and countryman of the poet Paul de Pina (Rehuel Jeshurun). When the latter was going to Rome, intending to enter a monastery there, Lobato gave him a letter, dated April 3, 1599, addressed to Elijah Montalto (subsequently physician to Maria de Medici), who was then living at Leghorn, asking Elijah to dissuade Paul from his purpose. Paul de Pina was in fact induced by Montalto to desist from carrying out his intention. He became an enthusiastic follower of Judaism, and lived, like Diego Gomez Lobato, at Amsterdam.

Isaac Cohen Lobato: Portuguese Marano; born at Lisbon; died at an advanced age in Amsterdam; a relation of Diego Gomez Lobato. At the performance in the first synagogue of Amsterdam of Rehuel Jeashurun's antiphonal poem "Dialogo delos Siete Montes" (composed in 1624), in which the mountains of the Holy Land are introduced as speakers, Lobato took the leading part of *Mt. Zion.* In 1678 he, together with David Mendes Coutinho, founded the philanthropic society Sha'are Ẓedeḳ at Amsterdam.

Rehuel Cohen Lobato: Sephardic author; lived at Amsterdam; father of Isaac Cohen Lobato. Together with Moses Belmonte he issued a new Spanish translation of the Pirḳe Abot, entitled "Perakym" (Amsterdam, 1644).

Bibliography: Grätz, *Gesch.* ix. 520, x. 4; Kayserling, *Sephardim*, p. 176; idem, *Bibl. Esp.-Port.-Jud.* pp. 27, 64, 89.

G. M. K.

LOBATTO, REHUEL: Dutch mathematician; born at Amsterdam June 6, 1797; died at Delft Feb. 9, 1866. He sprang from a Portuguese Marano family which had gone to Holland in 1604. From his mother, a Da Costa, he acquired a complete knowledge of the south-European languages; and while yet a schoolboy he displayed remarkable talent for mathematics. Littwack and Van Swindern were his teachers, and at Brussels Quetelet, with whom he edited the "Correspondance Mathématique et Physique." In 1823 he published "Wiskundige Mengelingen." In 1828 he was appointed gager at Delft; afterward he became inspector-general of the gaging-office there; and in 1842 he was appointed teacher of higher mathematics in the same city.

Lobatto was the author of a great number of articles in scientific periodicals and of various schoolbooks. From 1828 till 1849 he was editor of the official annual of statistics. In 1841 he was appointed by Minister Rochussen member of a commission for the conversion of the public debt. The Order of the Netherlands Lion was conferred upon him; he received the degree of doctor "honoris causa" from Groningen University, and was a member of the Royal Academy of Sciences.

Bibliography: Matthes, in *Jaarboek Köninklijke Akademie voor Wetenschappen*, Amsterdam, 1866 (gives complete lists of Lobatto's works); *Spectator* (The Hague), 1866; Bierens de Haan, *Bibliographie V. d. Aa Woordenboek*, xxi.

LÖBEL, ARTHUR: Austrian physician; born at Roman, Rumania, May 15, 1857; educated at the gymnasium of Czernowitz and the universities of Vienna and Paris (M.D., Vienna, 1883). During the year 1884 he served as assistant at the General Hospital, Vienna, and in 1885 settled as a physician at the watering-place of Dorna, where he practises during the summer months, spending the winters in Vienna. In 1898 he received the title of "Kaiserlicher Rath."

Löbel is the author of: "Das Balneotherapeutische Verfahren Während der Menstruation," Berlin, 1880; "Der Curgebrauch mit Mineralwässern Während der Gravidität," *ib.* 1888; "Das Bukowinaer Stahlbad Dorna," Vienna, 1889; "Die Curdiätetik im Eisenbade," Vienna and Leipsic, 1890; "Die Moorbäder und Deren Surrogate," Vienna, 1890; "Zur Thermalbehandlung der Endometritis," Leipsic, 1891; "Die Neueren Behandlungsmethoden der Metritis Chronica," *ib.* 1892; "Kosmetische Winke," Leipsic and Vienna, 1894; "Zur Behandlung der Oophoritis Chronica," Berlin, 1895; "Geschichtliche Entwicklung des Eisenbades Dorna," Vienna, 1896; "Das Diätetische Verhalten Während der Menstruation," Kreuznach, 1897; "Die Balneologischen Cur-methoden bei Behandlung der Chronischen Para- und Perimetritis," Halle, 1898; "Die Balneo- und Diätotherapie der Arterioklerose," Vienna, 1899; "Zur Puerperalbehandlung mit Trink- und Badekuren," Berlin, 1900; "Die Leistungen der Physikalischen Herzheilmethoden," Vienna, 1902; "Studien über die Physiologische Wirkungen der Moorbäder," *ib.* 1904.

LÖBELE OF PROSSNITZ. See Prossnitz, Löbele.

LOBO, MOSES JESHURUN: Spanish poet; lived at Amsterdam in the seventeenth century. He was one of the poets who celebrated the martyrdom of Abraham Nuñez Bernal in 1655; and his elegies form a part of the "Elogios" (Amsterdam, 1655). Daniel de Barrios ("Relacion de los Poetos," p. 56 = "R. E. J." xviii. 285) speaks of "an excellent Spanish poet, Custodio Lobo, otherwise called Moses Jeshurun Ribero" (died at Leghorn), some anti-Christian verses by whom he quotes. The similarity of their names induced Wolf ("Bibl. Hebr." iii., No. 1579d) to suppose the two poets to be identical.

LOCK. See Key.

LOCUST: Of all the insects the locust is most frequently mentioned in the Old Testament. It occurs under the following nine names, which probably denote different species; but there is no certain clue by which the exact species intended by each name can be identified: (1) "arbeh" (A. V. sometimes "grasshopper"), the most common term, comprising the whole genus; (2) "sol'am," derived by Ibn Ezra from "sela'" = "rock" (rock-locust; A. V. "bald locust"); (3) "ḥargol" (A. V. "beetle"; R. V. "cricket"; Jewish exegetes, "grasshopper"; comp. Arabic "ḥarjal" = "a troop of horses," or "locust," from "ḥarjala" = "to hop," "to jump"); (4) "ḥagab" (A. V. usually "grasshopper"; seems likewise to be used in a general sense in Num. xiii. 33; Isa. xl. 22); (5) "ḥasil" (I Kings viii. 37; Ps. lxxviii. 46); (6) "gazam" (Joel i. 4; Amos iv. 9), usually rendered "palmer-worm"; (7) "yeleḳ" (Jer. li. 27; Nahum iii. 15; LXX. and Vulgate, "bronchos"; R. V. "canker-worm"); (8) "ẓelaẓal" (Deut. xxviii. 42) may be an onomatopœic designation of locusts in general; (9) "gebim" and "gobai" (Nahum iii. 17; Amos vii. 1; A. V. "grasshopper"; R. V. margin to the latter passage, "green worms") are probably also general terms. The first four species are enumerated among the "winged creeping things" which are allowed to be eaten, and are described as having "legs above their feet to leap withal upon the earth" (Lev. xi. 21 *et seq.*).

Upward of forty orthopterous insects have been discovered in Palestine. The *Acrydium lineola*, *A. peregrinum*, and the *Œdipoda migratoria* are counted among the most destructive, and are therefore the most dreaded.

The term "locusts" is sometimes used figuratively; *e.g.*, for swarming hordes and mighty hosts (Judges vi. 5, vii. 12; Jer. xlvi. 23; Prov. xxx. 28); for prancing horses (Joel ii. 4; Job xxxix. 20); as an emblem of voracious greed (Isa. xxxiii. 4; Amos vii. 1); of feebleness, insignificance, and perishableness (Num. xiii. 33; Isa. xl. 22; Ps. cix. 23; Nahum iii. 17).

The Talmud points out as the marks of the clean locust: four feet, two hopping legs, and four wings which are large enough to cover the body (Ḥul. 59a). Besides the species mentioned in the Old Testament the Talmud refers to many others (comp. Ḥul. 65). Public prayers were instituted against the plague of locusts (Ta'an. 14a, 19a). Some locusts, probably variegated, were the playthings of children (Shab. 90b). The egg of the ḥargol carried in the ear relieves earache (*ib.* 65a); while the left part of the "ẓipporat keramim" worn on the left side of the body preserves one's knowledge (*ib.* 90b; Tristram, "Nat. Hist." p. 306; Lewysohn, "Z. T." p. 285; Burckhardt, "Notes on the Bedouins," p. 269).

E. G. H. I. M. C.

LODÈVE: Small town in the department of Hérault, France. A Jewish community was founded here as early as the fifth century. It was under the jurisdiction of the bishop, to whom it paid an annual tax. In 1095 Bishop Bernard, in conformity with an old decision of the councils, forbade marriages between Jews and Christians, on pain of excommunication for the latter. In 1188 King Philip Augustus of France confirmed the bishop's rights and privileges relating to the Jews. Several Lodève Jews were living at Montpellier in 1293 and 1294, and at Perpignan in 1413 and 1414. A Paris manuscript (Bibliothèque Nationale, No. 242), containing Levi b. Gershon of Bagnol's commentary on Genesis and Exodus, refers to two rabbis of Lodève (לוטבה). Eleazar and Isaac קיטון or ביטון (= "Botin," according to Carmoly), or Isaac del Portal or de la Porte (מן השער). This name is probably derived from "Portale" (Latin, "Portalis"), in the department of Vaucluse. It may, however, be derived from "Portes," a village in the department of the Gard. A Jew named Isaac de Portes lived at Nîmes in 1306.

Rabbi Solomon Ezobi of Carpentras corresponded with the Bishop of Lodève, Jean Plantavit de la Pause, author of the work entitled "Planta Vitis seu Thesaurus Synonymicus Hebræo-Chaldæo-Rabbinicus"; about 1629 he addressed three Hebrew poems to the bishop.

Bibliography: Carmoly, *Revue Orientale*, iii. 340; Dom Vaissète, *Histoire Générale de Languedoc*, vol. i., book xv.; vol. iii., book lxx.; Gross, *Gallia Judaica*, pp. 158, 274, 611; *R. E. J.* xiv. 66, 73, 75; xxii. 265; Saige, *Les Juifs du Languedoc*, vii. 3, 12, 14.

G. S. K.

LODZ (LODZI): City in the government of Piotrkow, Russian Poland, about 90 miles west of Warsaw. As late as 1821 it was only a village of 800 inhabitants, when the manufacture of woolens was first introduced there by Germans Later, cotton-mills were added. The population of Lodz gradually increased until in 1872 it amounted to 50,500; and in 1876 it reached a total of nearly 80,000, including about 15,000 Jews.

Lodz is now considered the second city of Poland, both in population and in the importance of its cotton-mills; indeed, it is styled "the Manchester of Poland." The rapid growth of the city is due no more to the Germans than to the Jews, who introduced numerous spindles and hand-looms in almost every household, and, being satisfied with small profits, were able to compete with the largest manufacturers both in Moscow and in other cities of Russia. The expulsion of the Jews from Moscow in 1891 helped to increase the volume of business in Lodz. In 1898 the keen competition abroad compelled the Jewish merchants of Lodz to adopt desperate measures to retain business by making also a cheap grade of goods to imitate woolens. This new stuff was called "shoddy," being a mixture of waste from cotton and woolen stuffs which was formerly discarded as of no value. The Polish newspaper "Rozowj" lamented this new attempt of the Jews to "spoil the market."

Introduction of Shoddy.

The question of employing Jewish operatives was a very difficult one. In the first place, they could not subsist on the small wages paid to the mill-hands. Secondly, when the factories were built and machinery was introduced the Jews could not work together with non-Jewish operatives on Saturday, and the establishments were closed on Sunday. Israel Posnanski, the richest manufacturer of Lodz, in order to utilize Jewish labor, solved the problem by setting aside a factory for Jewish employees. Later, Rabbis Meisels and Jelski prevailed upon other Jewish manufacturers to open similar factories.

The Jewish community of Lodz was organized before Lodz was recognized as a town. Hillel, the first rabbi, died in 1823; his successor, Ezekiel, died in 1851; and the present (1904) rabbi, Elijah Ḥayyim Meisels, was elected in 1873.

There is in Russia no Reform congregation; but it has what is known as "German" congregations. These are attended by the rich members of the community; strict decorum is observed; a cantor with trained choir conducts the service; and an academical rabbi delivers his sermons in pure German or Russian. Lodz has such a congregation. Adolph M. Radin, now in New York, was elected its rabbi in 1884, and was succeeded by the present rabbi, Israel Jelski. The congregation completed its new temple in 1888 at a cost of 500,000 rubles.

Congregations and Synagogues.

There are two synagogues, one on the Old Bazaar and one in Wulke, the Jewish quarter. The leaders of the community are Michael Adolph Cohen, attorney at law; Herzberg; Pinkus; and Wachs.

The Hebrew Free School (Talmud Torah) has been under the management of Herman Konstadt since 1877. The Jewish hospital was founded by Israel Posnanski, who donated 40,000 rubles for it in 1879. The building was finished in 1883.

The Free Loan Society (Gemilut Ḥasadim) was organized in 1883 by J. S. Goldman and Isaac Mondiecki. In the same year Isaiah Rosenblatt established the Free Lodging Society (Haknasat Oreḥim). There are also a home for the aged (Bet Maḥseh li-Zeḳenim), and an asylum for poor girls. Marcus Silberstein is the founder of the Orphan Asylum, opened in 1895 with 64 children. The report of 1897 shows an average expenditure of 14,960 rubles per annum. A Hebrew technical school, organized by J. K. Posnanski, Bernhard Dobronicki, and S. Jarazinski, has an attendance of 300 pupils. The Jewish clerks employed in the factories formed a mutual aid society in 1896. Isidor Kempinski shortly before his death (1900) founded a secular school for Jewish children.

Institutions.

The Jews of Lodz have contributed liberally to charitable institutions abroad. For example, they gave 10,000 rubles to Rabbi Hildesheimer toward a Hebrew school for Russian Jewish immigrants in Berlin in 1883; and it is estimated that in the same year they expended in charity more than 1,000,000 rubles. They contributed also a large sum to help their Christian neighbors build a Russian church in Lodz.

Among the Jewish celebrities who are natives of Lodz is David Janowski, the champion chess-player of France. On his visit to his native city in 1900 the authorities recognized his successes by presenting him with a gold medal. The artists Herschenberg, Glitzenstein, and Pilichowski also were born in Lodz. The last-named received a gold medal at the Paris Exposition of 1900 for his painting "The Wandering Jew." Another gold medal was awarded to Emanuel Sadokierski of Lodz for excellency in bookbinding and for articles made of papier-mâché ("Currier Warszawski," 1900, No. 239). The Jews of Lodz, however, refused to send a manufacturing exhibit to the Paris Exposition, thereby marking their indignation at the proceedings in the Dreyfus affair. Among Jewish writers of Lodz are David Fischman, the Hebrew novelist, and Sarah Feige Foner, author of the Hebrew novels "Beged Bogedim" and "Ahabat Yesharim." She organized in Lodz the Bat Ẓiyyon Society for teaching girls the Hebrew language and Jewish history and literature.

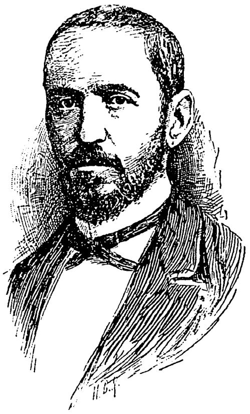
Distinguished Natives.

The present (1904) population is about 300,000, including 75,000 Jews. The statistics of 1896 give 1,827 births, 1,856 deaths, and 564 marriages among the Jews of Lodz in that year.

H. R. J. D. E.

LOEB, ISIDORE: French scholar; born at Sulzmatt (Soultzmatt), Upper Alsace, Nov. 1, 1839; died at Paris, June 3, 1892. The son of Rabbi Seligmann Loeb of Sulzmatt, he was educated in Bible and Talmud by his father. After having followed the usual course in the public school of his native town, Loeb studied at the college of Rufach and at the lycée of Colmar, in which city he at the same time attended classes in Hebrew and Talmud at the preparatory rabbinical school founded by Chief Rabbi Solomon Klein. In 1856 he entered the Central Rabbinical School (Ecole Centrale Rabbinique) at Metz, where he soon ranked high through his knowledge of Hebrew, his literary ability, and his proficiency in mathematics. In 1862 he was graduated, and received his rabbinical diploma from the Séminaire Israélite de France at Paris, which had replaced (1859) the Metz Ecole Centrale Rabbinique.

Loeb did not immediately enter upon a rabbinical career, but tutored for some years, first at Bayonne and then at Paris. In 1865 he was called to the rabbinate of St. Etienne (Loire). His installation sermon, on the duties of the smaller congregations ("Les Devoirs des Petites Communautés"), is one of the best examples of French pulpit rhetoric.



Isidore Loeb.

Soon, however, he felt a desire to extend the field of his activity. He went to Paris, where he was appointed (June 1, 1869) secretary of the Alliance Israélite Universelle, which position he held until his death. It was largely due to Loeb's labors that this association became an important factor in the progress of Oriental Judaism; and he created the library of the Alliance, which is one of the most valuable Jewish libraries in existence. Meanwhile he continued his historical and philological researches, and developed an extensive literary activity. The chair of Jewish history in the Rabbinical Seminary of Paris having become vacant through the resignation of Albert Cohn (1878), Loeb was appointed his successor. He held this position for twelve years. His main activity, however, was devoted to the Société des Etudes Juives, which was organized in Paris in 1880. Beginning with the first number, he successfully edited the "Revue des Etudes Juives," the organ of that society, and was, moreover, a voluminous and brilliant contributor thereto.

The following works published by Loeb deserve especial notice: "La Situation des Israélites en Turquie, en Serbie, et en Roumanie" (1869); "Biographie d'Albert Cohn" (1878); "Tables du Calendrier Juif Depuis l'Ere Chrétienne Jusqu'au XXX^e Siècle"; "Les Juifs de Russie" (1891); "La Littérature des Pauvres dans la Bible"; and "Réflexions sur les Juifs." The two last-named works have been published by the Société des Etudes Juives.

s. Z. K.

LOEB, JACQUES: American biologist; born in Germany April 7, 1859; educated at the universities of Berlin, Munich, and Strasburg (M.D. 1884). He took a postgraduate course at the universities of Strasburg and Berlin, and in 1886 became assistant at the physiological institute of the University of Würzburg, remaining there till 1888, when he went in a similar capacity to Strasburg. During his vacations he pursued biological researches, at Kiel in 1888, and at Naples in 1889 and 1890. In 1892 he was called to the University of Chicago as assistant professor of physiology and experimental biology, becoming associate professor in 1895, and professor of physiology in 1899. In 1902 he was called to fill a similar chair at the University of California.

The main subjects of his works are: animal tropisms and their relation to the instincts of animals; heteromorphosis, *i.e.*, substitution at will of one organ of an animal for another; toxic and antitoxic effects of ions; artificial parthenogenesis; and hybridization of the eggs of sea-urchins by the sperm of starfish.

Among Loeb's works may be mentioned: "Heliotropismus der Thiere und Seine Identität mit dem Heliotropismus der Pflanzen," Würzburg, 1889; "Physiologische Morphologie," part i., *ib.* 1890; part ii., *ib.* 1891; "Vergleichende Physiologie des Gehirns und Vergleichende Psychologie," Leipsic, 1899; edition in English, New York, 1900.

A. F. T. H.

LOEB, LOUIS: American artist; born at Cleveland, Ohio, Nov. 7, 1866. At the age of thirteen he was apprenticed to a lithographer in his native city, and in 1885 went to New York, where he studied in the night-schools of the Art Students' League, of which he became vice-president in 1889. Loeb went to Paris in 1890, and studied under Gérôme, obtaining honorable mention at the Paris Salon in 1895, and third medal in 1897.

From 1893 Loeb contributed to the chief magazines of the United States some of their most important illustrations. He is a member of the Society of American Artists and associate of the National Academy of Design, and has contributed many noteworthy paintings to their exhibitions. Among the most important are the portraits of I. Zangwill (1898), J. H. Schiff (1904), Eleanor Robson (1904); and the following pictures: "Temple of the Winds," 1896 (silver medal, Pan-American Exposition, Buffalo, 1903); "The Breeze" (1900); "The Joyous Life" (1903); and "The Dawn," 1903 (Webb prize).

Bibliography: *Who's Who in America*; *The Bookman*, Feb., 1900.

A.

LOEB, MORRIS: American chemist; born at Cincinnati, Ohio, May 23, 1863; son of Solomon Loeb; educated at the New York College of Pharmacy and at the universities of Harvard, Berlin, Heidelberg, and Leipsic. In 1888 he became private assistant to Professor Gibbs of Newport, R. I., and a year later docent at Clark University, Worcester, Mass. He has been professor of chemistry at New York University since 1891, and director of the chemical laboratory there since 1894.

Loeb has largely occupied himself with matters of Jewish interest and holds offices in many charitable associations and other communal organizations. He is president of the Hebrew Technical Institute, president of the (N. Y.) Hebrew Charities Building Fund, director of the Jewish Theological Seminary of America and of the Educational Alliance (1892–97). He is the author of various scientific articles, chiefly on physical and inorganic chemistry.

A.

LOEWE, LOUIS: English Orientalist and theologian; born at Zülz, Prussian Silesia, 1809; died in London 1888. He was educated at the yeshibot of Lissa, Nikolsburg, Presburg, and at the University of Berlin. Stopping at Hamburg on his way to London, he was entrusted with the classification of the Oriental coins in the Sprewitz cabinet. Soon after his arrival in London he was introduced to the Duke of Sussex, who in 1839 appointed him his "Orientalist." He then traveled in the East, where he studied Arabic, Persian, Coptic, Nubian, Turkish, and Circassian. In Cairo he was presented to the khedive, Mohammed Ali Pasha, for whom he translated some hieroglyphic inscriptions. While in Palestine he was attacked by Bedouins, who took everything he had with him, including his collections and note-books. On his return he met at Rome Sir Moses and Lady Montefiore, who invited him to travel with them to the Holy Land. When in 1840 Sir Moses went on his Damascus expedition, Loewe accompanied him as his interpreter. In the firman granted for the relief of the accused, Loewe discovered that the word "pardon" ("'afw") was used instead of "acquittal," and it was due to Sir Moses' exertions that the change to "acquittal" was made.

Altogether, Loewe accompanied Sir Moses Montefiore on nine different philanthropic missions. When Jews' College was opened in 1856, he was nominated principal; and when Sir Moses Montefiore opened a theological college at Ramsgate in 1869, he made his friend principal of that institution, which position Loewe retained until three years after the death of his patron.

Loewe wrote: "The Origin of the Egyptian Language," London, 1837; a translation of J. B. Levinsohn's "Efes Dammim," *ib.* 1841; a translation of David Nieto's "Maṭṭeh Dan," *ib.* 1842 (awarded the York Medal); "Observations on a Unique Coptic Gold Coin," 1849; a dictionary of the Circassian language, 1854; as well as several sermons and a Nubian grammar (the latter still in manuscript).

BIBLIOGRAPHY: *Celebrities of the Day*, April, 1881; J. H. Loewe, *A Catalogue of the Library of the Late Dr. L. Loewe*, 1890.

J. H. HIR.

LOEWE, LUDWIG: German manufacturer, philanthropist, and member of the Reichstag; born at Heiligenstadt Nov. 27, 1837; died at Berlin Sept. 11, 1886. The son of a poor teacher, he attended the gymnasium in his native city, and then went to Berlin. While still a young man he accidentally made the acquaintance of Ferdinand Lassalle before the period of the latter's socialistic agitation, and was admitted to his brilliant social circle.

Loewe first entered upon a mercantile career as a dealer in woolens, then became a machinist, and in 1864 established a manufactory of sewing-machines in Berlin. In 1870 he visited the United States to study the construction of machinery, and on his return to Germany founded a factory for the production of tool-machinery in accordance with American methods, utilizing American machinery that had never before been introduced into Germany. He brought the manufacture to such a pitch of perfection that the Prussian War Department arranged with him for the establishment of a factory for the production of weapons. Under a guaranty from the government, Loewe established a remarkable plant to supply not only weapons for the army, but also machinery for expositions.

From 1864 until his death Loewe was a member of the Berlin Municipal Council, and was particularly influential in developing the school system. He was elected a member of the Prussian Abgeordnetenhaus in 1876, and two years later a member of the Reichstag; here he identified himself at first with the "Fortschrittspartei," being a devoted follower of Johann Jacoby, and afterward with the progressive party ("Deutsch-Freisinnige"). Subsequently his contracts with the government in connection with the furnishing of small arms were the subject of calumnious animadversions by the anti-Semite Hermann AHLWARDT. Loewe having died, his brother Isidor, then at the head of the firm, insisted upon a complete investigation, which resulted in the demonstration of the utter baselessness of the charges made by the anti-Semitic leader. These charges were nothing less than that the Loewes were members of an international Jewish conspiracy to secure control of the entire world; that the greatest obstacle to gratifying this ambition being the obstinacy of the Germans, the surest means of breaking that obstinacy was by the defeat of the Germans in war; that this could be most effectually secured by arming the German soldiers with defective weapons; and that to this end the Loewes had, by fraud and bribery, foisted upon the German military authorities nearly half a million guns that would explode in battle, maiming and disabling those who carried them and frightening their comrades, thus causing stampedes and routs.

Loewe was for some time president of the Jewish congregation in Berlin.

S. M. Co.

LOEWENTHAL, EDUARD: German writer and editor; born March 12, 1836, at Ernsbach, Württemberg; educated at the high school at Stuttgart and at the University of Tübingen, where he studied jurisprudence and philosophy (Ph.D. 1859). He founded at Frankfort-on-the-Main the "Allgemeine Deutsche Universitätszeitung" and became assistant editor on Max Wirth's "Der Arbeitgeber." Soon afterward he became editor of Payne's "Die Glocke" at Leipsic, and established there the "Zeitgeist." In 1873 he became editor-in-chief of the "Neue Freie Zeitung," and in the following year founded the Deutscher Verein für Internationale Friedenspropaganda.

After having served two terms in prison as the result of press lawsuits, Loewenthal went to Brussels, London (where he remained for a year), and Paris. In the last-named city he founded the "Weltbühne, Deutsche Pariser Zeitung," and a French monthly, "Le Monde de l'Esprit." In 1888 he returned to Berlin, Emperor Frederick III. having proclaimed an amnesty for political offenders.

Among Loewenthal's works may be mentioned: "System und Gesch. des Naturalismus" (6th ed. 1868; Engl. transl. 1897); "Gesetz der Sphärischen Molekularbewegung" (also an English edition); "Napoleon III. and the Commune of Paris" (drama); "Eine Religion ohne Bekenntniss" (1865); "Der Militarismus als Ursache der Massenverarmung" (1868; translated into French, at the expense of the Société des Amis de la Paix, 1869); "Grundzüge zur Reform und Kodification des Völkerrechts" (1872; translated into English and French); "Le Cogitantisme ou la Religion Scientifique" (1886); "Der Staat Bellamy's und Seine Nachfolger" (1892); "Grundriss der Gesch. der Philosophie" (1896); "Die Religiöse Bewegung im 19. Jahrhundert" (1900); "Die Fulguro-Genesis im Gegensatz zur Evolutionstheorie" (1902); "Gesch. der Friedensbewegung" (1903).

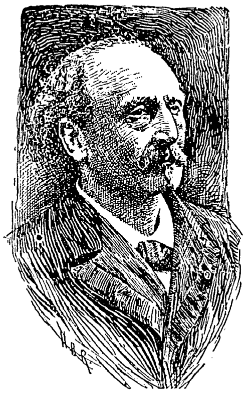
S. L. La.

LOEWY, EMANUEL: Austrian archeologist; born at Vienna Sept. 1, 1857; educated at the gymnasium and university of his native city (Ph.D. 1882). He is now (1904) professor of archeology at the University of Rome.

Loewy is the author of: "Untersuchungen zur Griechischen Künstlergeschichte" (1883); "Inschriften Griechischer Bildhauer" (1885); "Lysipp und Seine Stellung in der Griechischen Plastik" (1891); "Die Naturwiedergabe in der Aeltesten Griechischen Kunst" (1900).

S. F. T. H.

LOEWY, MAURICE: Astronomer; born at Vienna, Austria, April 15, 1833. A descendant of a Hungarian family, he received his education at his native city, where he was employed at the observatory. In 1860 he was called to the Paris Observatory as assistant astronomer, being appointed astronomer in 1864. In 1865 he became a French citizen. In 1872 he was appointed a member of the Bureau des Longitudes; in 1873 he was elected to the French Institute (Académie des Sciences); in the same year he became assistant director and in 1896 director of the Paris Observatory.



Maurice Loewy.

Loewy since 1878 has been editor of "Ephémérides des Etoiles de Culmination Lunaire," and since 1896 of the "Rapport Annuel sur l'Etat de l'Observatoire de Paris." He has invented several important astronomical instruments, among which is especially well known his "equatorial coudé" or elbow-telescope, with which he has secured the best photographs of the moon. He has published with Puiseux since 1896 the "Atlas Photographique de la Lune."

Among Loewy's numerous essays and works may be mentioned: "Nouvelles Méthodes pour la Détermination des Orbites des Comètes," 1879; "Des Eléments Fondamentaux de l'Astronomie," 1886; "De la Constance de l'Aberration et de la Réfraction," 1890; "Du Coefficient de l'Elasticité," 1892 (with Tresca); "De la Latitude et des Positions Absolues des Etoiles Fondamentales," 1895.

Loewy's "Mémoires" have been published in the "Comptes Rendus de l'Académie des Sciences" and in the "Annales de l'Observatoire."

S. F. T. H.

LOGIC: The science of correct thinking; the science of the principles governing the comparative and constructive faculties in the pursuit and use of truth. Although, judging from the principles that were propounded by the Tannaim for the deduction of halakot from the Biblical text, it can be surmised that the Rabbis were acquainted with the laws of syllogisms, analogies, etc., no mention of logical science is made in Jewish literature prior to the Judæo-Arabic period (see TALMUD). It was only with the transplantation of the Arabo-Greek philosophy to Jewish soil that the Aristotelian "Organon," as propounded by the Arabs, became the vade-mecum of every Jewish student, and was regarded as indispensable to the acquisition of metaphysical and psychological knowledge. The Hebrew terms adopted for "logic" were חכמת הדבר, which is the literal translation of the Arabic "'ilm al-kalam," and חכמת ההגיון, corresponding to the Arabic "'ilm al-manṭiḳ," each signifying both "the science of speech" and "the science of thinking." The term "hokmat higgayon" was, according to Shem-Ṭob ("Sefer ha-Emunot," p. 45), first so employed by the Tibbonides. It is found also in the Talmud, but in the sense of "recitation." Eliezer said to his pupils, "Restrain your children from הגיון" (Ber. 28b), intending thereby to warn them against parading a superficial knowledge of the Bible gained by verbal memorization. The anti-Maimonists, however, interpreted the word "higgayon" in the sense of "logic," and saw in Eliezer's saying a warning against the study of that science.

First Jewish Work on Logic.

The first work on logic written by a Jew was the "Maḳalah fi Ṣana'at al-Manṭiḳ" of Maimonides (12th cent.), translated into Hebrew by Moses ibn Tibbon under the title "Millot ha-Higgayon." It is divided into fourteen chapters containing explanations of 175 logical terms. The Hebrew terminology used by the translator has been adopted by all subsequent writers on Hebrew philosophical literature. The eight books of the "Organon," without counting Porphyry's introduction, are enumerated. The "Millot ha-Higgayon" was first published with two anonymous commentaries at Venice in 1552, and has since passed through fourteen editions. Commentaries upon it were written by Mordecai Comtino (15th cent.) and by Moses Mendelssohn. A Latin translation was published by Sebastian Münster (Basel, 1527); and German ones were made by M. S. Neumann (Venice, 1822) and Heilberg (Breslau, 1828).

During the thirteenth and fourteenth centuries Jewish literature was enriched with several writings on logic. The works of Al-Farabi and of Averroes were translated and commented upon; and the translations have survived the originals. Of Al-Farabi's essays on logic the following are still extant in Hebrew manuscripts in various European libraries: the introduction (Arabic, "Tauṭiyah"; Hebr. הצעה), in three versions; the "Isagoge of Porphyry"; "Hermeneutics"; "Posterior Analytics,"

Translations of Al-Farabi.

the translation of which is attributed to Moses ibn Tibbon; "Topics," in two versions; and "Syllogisms," an abridgment of which was made by Jacob ben Abba Mari Anatoli under the title "Sefer Heḳesh Ḳazer." A commentary on Al-Farabi's five chapters on logic was written in the fifteenth century by the Karaite Abraham Bali. Of Averroes' Short Commentary there are two Hebrew versions: one made by Jacob ben Machir of Montpellier in 1189 and published under the title "Kol Meleket Higgayon" at Riva di Trenta in 1559, and the other made by Samuel Marsili ben Judah of Tarascon in 1329. A Latin translation of Jacob ben Machir's version was made by Abraham de Balmes. A commentary on the Short Commentary was written by Moses Narboni (1340-55). Of Averroes' Middle Commentaries those on Porphyry's introduction, "Categories," "Interpretation," "Syllogisms," and "Demonstration" were translated by Jacob ben Abba Mari Anatoli; on "Topics" and "Sophistical Refutations," by Kalonymus ben Kalonymus of Arles in 1313; on "Rhetoric" and "Poetics" by Todros Todrosi of Trinquetaille in 1337. Anatoli's translation of the first five books was used by Joseph Caspi, who wrote an abridgment of the books on logic under the title "Ẓeror ha-Kesef." A translation from the Greek of Aristotle's logic was made in the fourteenth century by Shemariah ben Elijah Ikriti of Negropont. At the end of the same century Joseph ben Moses Kilti treated, in his work "Minḥat Yehudah," of Aristotle's logic in the fashion of the aphorisms of Hippocrates. Shortly after appeared a work on Aristotle's logic written by Elijah ben Eliezer of Candia. Another original work of the same period was the "Kelale Higgayon" of David ibn Bilia.

Averroes' Middle Commentaries were much commented upon during the fourteenth and fifteenth centuries. The oldest supercommentary known is that found in the Vatican Library (MS. No. 337). It dates from 1316 and deals with Porphyry's "Isagoge," "Categories," and "Hermeneutics." The other known supercommentaries of the fourteenth century are those of: Jedaiah Bedersi, mentioned by Moses Ḥabib; Levi ben Gershon, a Latin translation of which is still extant in manuscript in the Vatican Library (see "Atti dell' Academia dei Nuovi Lincei," Rome, 1863); Judah ben Samuel Abbas; and Abraham Abigdor ben Meshullam (Bonet). A rimed résumé of Porphyry's introduction and the "Categories" was given by Moses Rieti in his "Miḳdash Me'aṭ."

Commentaries on Logic.

To the writings on logic of the fifteenth century belong: the supercommentary on Averroes' Middle Commentaries, and the abridgment of Logic, entitled "Miklol Yofi," by Messer Leon (Judah ben Jehiel); the abridgment of the "Categories," "Syllogisms," and "Demonstration" by Abraham Farissol; the commentary on the "Isagoge" by Joseph ben Shem-Ṭob; the commentaries on the "Isagoge," "Categories," and "Interpretation" by Elijah Habillo; the annotations on Averroes' Middle Commentary on the "Categories" and "Interpretation" by Manoah Sho'ali; and several anonymous commentaries on various books on logic. A supercommentary on the "Posterior Analytics" was written by Abraham Bibago. Of Averroes' questions on the "Organon," contained in the "Masa'il fi al-Ḥikmah," one portion was translated by Kalonymus ben Kalonymus, and the whole by Samuel ben Meshullam in 1320 under the title "Ha-She'elot ha-Dibriyyot weha-Derushim Asher le-Pilusufim." A commentary on two portions was written by Levi ben Gershon. From Samuel's translation proceeded the Latin version made by Abraham de Balmes, which was first published in 1550. Another Latin translation of six portions was made by Elijah Delmedigo. Samuel ben Judah translated into Hebrew other questions on logic proceeding from the Arabic writers Abu al-Ḳasim ben Idris, Abu al-Ḥajjaj ibn Ṭalmus, Abu al-'Abbas Aḥmad ben Ḳasim, and 'Abd al-Raḥman ben Ṭahir. These questions also were rendered into Latin by Abraham de Balmes. An original writer on logic of the fifteenth century was Mordecai Comtino.

Like the other branches of philosophy, the study of logic has since the sixteenth century been neglected by the Jews, and no important work on this science has been published in Hebrew. Among the Jewish logicians of modern times the most notable was Solomon Maimon, who wrote "Versuch Einer Neuen Logik" (Berlin, 1794), in which he attempted to expound an algebraic or symbolic system of logic.

LOGOS, THE. See MEMRA; PHILO; WISDOM.

LOLLI, DAVID: Italian physician; born at Göritz 1825; died at Triest 1884; son of Samuel Vita Lolli; studied medicine at Padua and Vienna. On the outbreak of the Italian war for liberation he abandoned his studies, hastened to Padua to join the volunteers, took part in the unsuccessful attempt to hold Vicenza, and then joined the garrison guarding Venice. When the cholera broke out in the besieged city, Lolli also was stricken. On his recovery he returned to his native city, but subsequently established himself as a physician at Triest. He continued to agitate for the independence of Italy (in which he included Göritz and Triest), and often incurred great danger in consequence.

Lolli wrote much, especially on psychology and magnetism. Most of his works remained in manuscripts; but the following were published: "Sul Magnetismo Animale, Pubblicato Nell' Occasione di Conseguire la Laurea," Padua, 1850; "Sulla Migliare, Due Parole di Occasione," Triest, 1857; "Sii Forte e Sarai Libero (Seneca): Sii Libero e Sarai Forte," Milan, 1860, published anonymously for political reasons; "I Numi," Milan, 1866, a symbolical story, published under the pseudonym "Aldo Apocalissio"; "Sul Cholera," Triest, 1866; and "L'Amore dal Lato Fisiologico, Filosofico, e Sociale," Milan, 1883.

S. E. L.

LOLLI, EUDE: Italian rabbi; born at Göritz Aug. 23, 1826; educated at the lyceum of his native town and at the rabbinical college of Padua, graduating thence in 1854. In 1865 he was appointed professor at the same college, which position he held until the institution was definitely closed in 1871. In 1869 he was elected chief rabbi of Padua, and in 1877 he became lecturer in, and in 1886 professor of, Hebrew and Chaldaic at the University of Padua.

Lolli is the author of: "Dizionario del Linguaggio Ebraico-Rabbinico," Padua, 1869; "Prelezione ad un Corso di Lingua Ebraica e Caldaica," 1877; "Corso di Grammatica della Lingua Ebraica," *ib.* 1878. He also contributed a large portion to S. D. Luzzatto's "La Sacra Bibbia Volgarizzata," Rovigo, 1872.

LOM (LOM-PALANK): Town in Bulgaria, situated at the mouth of the River Lom. It has a population of about 8,000, of which approximately 700 are Jews, chiefly artisans and traders in grain. On March 20, 1904, a riot broke out against the Jews in connection with the disappearance of a young Bulgarian, whom the Jews were accused of murdering for ritual purposes. Through the timely measures taken by the government, a massacre was averted, and the riot subsided after a number of stores and dwelling-houses and the synagogue had been sacked. The young Bulgarian was afterward found drowned.

D. A. S. W.

LOMAZY: Town in the district of Bialy, near Brest-Litovsk, Russia. Though in 1566 there was no Jew among its 400 house-owners, its customs revenues were farmed out to Jews. In 1589 the customs and mills were leased to the Jews Leibka, Wolfovich, and Itzka. According to Samuel ben Phoebus ("Ṭiṭ ha-Yawen") 200 Jews were killed in Lomazy during the Cossack uprising (1648-49). In 1897 the Jews of Lomazy numbered 1,100 in a total population of 3,200.

LOMBROSO (LUMBROSO): Sephardic family, members of which lived in Tunis, Marseilles, and Italy. The two forms of the family name are doubtless due to different readings of the Hebrew לומברוזו.

Abram Lumbroso, Baron: Tunisian physician and scientist; born in Tunis 1813; died in Florence 1887. After completing his classical studies in Florence and receiving his M.D. degree at Pisa, he became physician-in-chief to the Bey of Tunis and afterward director of the state sanitary service. In 1846 he accompanied the bey to Paris, receiving from King Louis Philippe the Order of the Legion of Honor.

In Tunis Lumbroso founded a scientific society, of which he was president; and he was one of the most ardent assistants of the bey, who was interested in the promotion of culture. Lumbroso distinguished himself not only by his skill as a physician, but also by his philanthropic acts. As a reward for his valuable services during the cholera epidemic, rendered to foreigners and to natives without regard to sect or creed, King Victor Emanuel II. of Italy bestowed upon him the title of baron, with remainder to his eldest son. He was decorated also by the Sultan of Turkey with the Order of the Medjidie.

Of Lumbroso's published works may be cited: "Schizzo Storico Scientifico sul Colera Asiatico che Invase la Reggenza di Tunisi nel 1849 e 1850," Marseilles, 1850; "Lettere Medico-Statistiche sulla Reggenza di Tunisi," *ib.* 1850.

BIBLIOGRAPHY: De Gubernatis, *Piccolo Dizionario dei Contemporanei*, Rome, 1895; *Resoconto sulle Opere del Barone Dr. Abram Lumbroso Letta all' Accademia Reale di Medicina di Torino nel Anno 1866.*

David Lumbroso: Tunisian political agent; born in Tunis 1817; died in Leghorn 1880. He was a highly respected merchant in the Italian colony of the former city, and was much trusted by the Tunisian government, to which he was of service on many critical occasions.

Giacomo Lumbroso: Brother of Abram Lumbroso; head of a prominent business house at Marseilles, where he was consul for Tunis till the latter came under the protectorate of France.

Giacomo Lumbroso, Baron: Son of Abram Lumbroso. He studied law in Tunis, graduating with honors, but devoted himself principally to historical and archeologic researches, upon which he has written many important works. He was professor of ancient history, first in the University of Pisa and afterward in that of Rome. He resigned the latter position and retired to private life. Baron Giacomo is a member of the Accademia dei Lincei.

BIBLIOGRAPHY: De Gubernatis, *Piccolo Dizionario dei Contemporanei*, Rome, 1895.

Giacomo Lumbroso: Italian physician; born in Leghorn 1859. He was privat-docent in neuropathology and electrotherapeutics at the Institute of Florence, and physician-in-chief at the united royal hospitals of Leghorn.

BIBLIOGRAPHY: De Gubernatis, *Piccolo Dizionario dei Contemporanei*, Rome, 1895.

S. E. L.

Isaac Lumbroso: Chief rabbi of Tunis and rabbinical author; died in 1752. He was prominent in the Tunisian Jewry, being judge of the community about 1710—an epoch coinciding with the schism which divided the Jews of the city into two camps, native Tunisians and Gournis or Italians. Lumbroso was appointed rabbinical judge of the latter; and, being a man of means, he filled at the same time the position of receiver of taxes to the bey as well as that of caid, being the representative official of his community.

From a literary point of view, Lumbroso, who was one of the most brilliant pupils of Rabbi Ẓemaḥ Ẓarfati, was the most important among the Tunisian rabbis of the eighteenth century. He encouraged and generously assisted his fellow rabbis; and his reputation as a Talmudist and cabalist has survived to the present day.

Lumbroso was the author of "Zera' Yiẓḥaḳ," published posthumously at Tunis in 1768. This work, the only one which has as yet been printed in that city, is a commentary on the different sections of the Talmud. Several funeral orations, pronounced by Lumbroso on divers occasions, are appended thereto.

Bibliography: Cazès, *Notes Bibliographiques*, pp. 240-246.

s. s. M. Fr.

Isaac Vita Lumbroso: Father of Abram Lumbroso; born in Tunis 1793; died in Leghorn 1871. He was well known because of his philanthropy. For thirty years he was president of the Portuguese consistory in Tunis, and for four years judge of the Court of Appeals.

s. E. L.

Jacob Lombroso: Italian rabbi and physician, of Spanish origin; lived at the beginning of the seventeenth century in Venice, where he published a notable Bible having an exhaustive introduction and explanations together with Spanish translations of the more difficult passages. By some he is considered to be the author of the "Propugnaculum Judaismi," written in defense of Judaism against the attacks in the fifth book of Grotius' "De Veritate Religionis Christianæ." Mortara, however ("Indice," p. 35), observes that Lombroso himself ascribes this work to Isaac Orobio.

Bibliography: De Rossi, *Dizionario*.

D. E. L.

LOMBROSO, CESARE: Italian alienist and criminologist; born Nov. 18, 1835, at Verona. Both his paternal and his maternal ancestors belonged to the tribe of Levi. On his father's side he was descended from a family which for many generations had been rich in rabbis and Hebraists. His maternal ancestors were chiefly manufacturers and bankers who had long been established at Chieri, Piedmont. But in this branch of his family, also, there were many men of great talent, among others the poet David Levi, who took an important part in the Italian struggle for liberty, first as a Carbonaro, and afterward as a deputy.

Cesare Lombroso.

Under Professor Marzolo, Lombroso studied Hebrew, Aramaic, Arabic, and Chinese, intending to devote himself wholly to philology. He afterward studied medicine at Padua, Paris, and Vienna, and from the very beginning showed an especial preference for the study of insanity. While still a student he wrote two essays—one on insanity in antiquity, and one on the insanity of Cardan—in which, for the first time, was pointed out the connection between madness and genius.

Lombroso served as physician in the Austro-Italian war (1859). The scientific results of his military service were two papers on amputation (which were awarded the Riberi prize, the only official academic reward he has ever received), and a work on Calabrian folk-lore, which subject he had an opportunity of studying after the conclusion of peace, when he and his regiment were transferred to Calabria. As this regiment was composed of soldiers from all parts of Italy, Lombroso took advantage of the opportunity thus afforded him to study the ethnical types of the Italian people, and to lay the foundation for an ethnographical-anthropological chart of Italy. Some time later he was sent from Calabria to Pavia, where he asked permission to visit the insane asylum regularly, in order to acquire greater knowledge in his specialty. This permission being refused, he abandoned the military career.

Studies in Ethnology.

His experience during the following year was a very trying one. He taught at the University of Pavia, and served as a physician in the insane asylum; but in both cases he gave his services gratuitously; and at night, in order to earn a bare subsistence, he had to make translations from the German. It was under such circumstances that he produced, among other works, his Italian edition of Moleschott's well-known work, "Kreislauf des Lebens," under the title "Il Circuito della Materia." At length, after a year of extreme want, he was made professor of psychiatry at Pavia, with a yearly salary of 2,000 francs ($400), at that time a very considerable sum to him. His first two pamphlets, which he wrote during two sleepless nights, deal with genius and madness, and contain in embryo all the ideas afterward developed in his great work, "L'Uomo di Genio" (see below). During the first year of his professorship he wrote "L'Uomo Bianco e l'Uomo di Colore," a work treating of the development of the human race, which development is conceived entirely from the point of view of the theory of evolution, and is filled with Darwinian ideas, although at that time Lombroso knew neither Darwin nor Herbert Spencer.

In Pavia, also, Lombroso began his studies of pellagra, a peculiar skin-disease prevalent in northern Italy and the origin of which was totally unknown. He showed conclusively that it was due to a poison developed in old, moldy corn, the only food of the poor agricultural laborers of the country. On account of his discovery of the real cause of this malady he was denounced by the landed proprietary to the government as a madman; and it was demanded that he should be deprived of his professorship. Years later, however, his theory of pellagra was accepted by the whole profession. On the skull of a criminal executed at Pavia, he noticed the fossa occipitalis media, an atavic feature which he was the first to observe.

Lombroso was transferred from Pavia University to that of Turin, where he is now (1904) professor of psychiatry and medical jurisprudence. He has made a collection of criminals' skulls and photographs, of writings and works of art by lunatics and condemned criminals, as well as of prison appliances, which is one of the most extensive and instructive of its kind. He has many disciples, who are called collectively in Italy "La Scuola Lombrosiana." Many of these (*e.g.*, Enrico Ferri, Baron Garofalo Roncoroni, Patrizi, Ferrero, Zerboglio, and Carrara) have as a result of their investigations attained to national and even world-wide renown.

Theories of Genius and Crime.

Lombroso's name is chiefly connected with two theories: (1) that genius is a peculiar, psychical form of larvate epilepsy; (2) that there is a degenerate class of human beings, distinguished by anatomical and psychical characteristics, who are born with criminal instincts and who represent a reversion to a very primitive form of humanity. He has made a rich collection of materials for the investigation of his theory that genius is a form of epilepsy. Both he and his pupils have carefully studied the best-known geniuses of all nations, ages, and spheres of activity; they have brought together everything pertaining to their life, works, appearance, hereditary characteristics, illnesses, idiosyncrasies, habits, etc., and have noted all traits that could make it seem probable that the subjects had suffered from epileptic disturbances.

In his theory of the born criminal, Lombroso recognizes crime as a phenomenon of degeneration, and places the criminal among those abnormal types of the human species which, according as their development is either defective or excessive, present examples of atavism or of evolution—*i.e.*, become on the one hand idiots or criminals; on the other, saints, martyrs, altruists, revolutionists, artists, or poets. The effect of this theory was felt chiefly in the field of criminal jurisdiction. It gave rise to a distinct science—criminal anthropology; and it effected a revolution in the mode of viewing both the criminal and the crime which has found expression in the newer penal codes.

Of Lombroso's works may be mentioned: "L'Uomo Delinquente in Rapporto alla Antropologia, alla Giurisprudenza ed alle Discipline Carcerarie" (3 vols., 4th ed. Turin, 1889; German transl. by Fränkel, "Der Verbrecher in Anthropologischer, Aerztlicher und Juristischer Beziehung," 2 vols., Hamburg, 1887–90; Atlas, 1895); "L'Uomo di Genio" (*ib.* 1889; 6th ed. 1894; German transl. by Fränkel, "Der Geniale Mensch," Hamburg, 1890; translated into French, Spanish, Portuguese, Russian, etc.); (with Guglielmo Ferrero, afterward Lombroso's son-in-law) "La Donna Delinquente" (*ib.* 1893; German transl. "Das Weib als Verbrecherin und Prostituirte," Hamburg, 1894); (with Laschi) "Il Delitto Politico" (2 vols., *ib.* 1890); "Le Crime, Causes et Remèdes"; "L'Antisemitismo e le Scienze Moderne" (*ib.* 1894; German ed., Leipsic, 1894); "Grafologia" (Milan, 1894); "Gli Anarchisti" (*ib.* 1894; German transl., Hamburg, 1895).

Lombroso is associate editor of the "Archivio di Psichiatria, Antropologia Criminale e Scienze Penali."

LOMZA (LOMZHA): Capital of the government of Lomza, Russian Poland; situated on the left bank of the River Narev. In 1897 it had a total population of 26,075, including 9,822 Jews. The earliest known references to an organized Jewish community in Lomza date from the beginning of the nineteenth century. The first rabbi recorded is Solomon Zalman Ḥasid, a cabalist, who corresponded with Akiba Eger. He was rabbi of the Lomza community for thirty years, and died there about 1840. He was succeeded by R. Benjamin Diskin (who officiated until 1848) and the latter, by his son Joshua Löb Diskin (b. Grodno 1818; d. Jerusalem 1898). Abraham Samuel Diskin, another son of Benjamin Diskin, was born at Lomza in 1827, and became rabbi of Volkovisk (government of Grodno), where he died in 1887. He was the author of "Leb Binyamin." Joshua Löb Diskin was succeeded by R. Elijah Ḥayyim Meisels, now (1904) rabbi at Lodz. The fifth rabbi was Eliezer Simḥah Rabinowitz (1879), now at Kalvariya. The present rabbi is Malchiel Ẓebi Tennenbaum, author of "Dibre Malkiel."

In 1884 a destructive fire rendered eighty families homeless. In 1885 a yeshibah was established in Lomza by R. Eliezer Shulawitz, the pupil of R. Israel Salanter. The institution is attended by hundreds of boys, who are provided there with food and clothing. Among the prominent members of the Lomza community may be mentioned Dr. Ephraim Edelstein, son-in-law of Lazar Rosenthal of Yasenovka.

Besides the general schools, Lomza has special Jewish schools, including 20 ḥadarim (430 pupils), and 1 Talmud Torah (180 pupils). The yeshibah has about 250 students. The charitable institutions include a hospital, a poor-house, a free-loan association, and a society for aiding the poor. Manufacturing and trading have been but little developed in Lomza. In 1897 there were 1,327 Jewish artisans there.

H. R. J. G. L.—S. J.

LONDON: Capital city of England. According to William of Malmesbury, William the Conqueror brought certain Jews from Rouen to London about 1070; and there is no evidence of their earlier existence in England. Besides these settlers from Rouen, London was visited by Jews from the Rhine valley, one of whom, from Mayence, had a friendly dispute, about 1107, with Gilbert Crispin, Abbot of Westminster. Another Jew was even converted to Christianity by Anselm ("Opera," III., epist. cxvii.). The earliest reference to a collective Jewish settlement is in the "Terrier of St. Paul's," of about 1115, where mention is made of some land in the "Jew street," which from its description corresponds to a part of Old Jewry. In 1130 the Jews of London incurred a fine of £2,000—an enormous sum in those days—"for the sick man whom they killed"; possibly some charge of magic was involved. Among the persons paying this fine was "Rubi Gotsce" (Rabbi Josce or Joseph), whose sons Isaac and Abraham were the chief members of the London community toward the end of the century, and whose house in Rouen was in possession of the family as late as 1203 ("Rot. Cart." 105b). In 1158 Abraham ibn Ezra visited London and wrote there his letter on the Sabbath and his "Yesod Mora." Up to 1177 London was so far the principal seat of Jews in England that Jews dying in any part of the country had to be buried in the capital, probably in the cemetery known afterward as "Jewin Garden," and now as "Jewin street." The expulsion of the Jews from the Isle of France in 1182 brought about a large acquisition to the London community, which was probably then visited by Judah Sir Leon, whose name occurs as "Leo le Blund" in a list of London Jews who contributed to the Saladin tithe Dec., 1185. This list includes Jews from Paris, Joigny, Pontoise, Estampes, Spain, and Morocco.

Massacre of 1189.

The massacre of the Jews at the coronation of Richard I. Sept. 3, 1189 (see England), was the first proof that the Jews of England had of any popular ill-will against them. Richard did practically nothing to punish the rioters, though he granted a special form of charter to Isaac fil Joce, the chief London Jew of the time, "and his men," which is the earliest extant charter of English Jews. In 1194 the Jews of London contributed £486 9s. 7d. out of £1,803 7s. 7d. toward the ransom of the king: in the list of contributors three Jewish "bishops" are mentioned—Deulesalt, Vives, and Abraham. In the same year was passed the "Ordinance of the Jewry," which in a measure made London the center of the English Jewry for treasury purposes, Westminster becoming the seat of the Exchequer of the Jews, which was fully organized by the beginning of the thirteenth century. Meanwhile anti-Jewish feeling in London had spread to such an extent that King John found it necessary in 1204 to rebuke the mayor for its existence. After the massacre of 1189, it would appear, the Jews began to desert Old Jewry, and to spread westward into the streets surrounding the Cheape, or market-place, almost immediately in front of the Guildhall. To a certain extent the Jews were crowded out from Old Jewry by the Church, which during the twelfth century established there the monastery of St. Thomas of Acon, St. Mary Colechurch, and at the back St. Martin Pomary, looking upon Ironmonger lane, where, it would seem, the Jews' College, or high school of all the English Jews, was located.

Old Jewry.

Escheats and purchases tended also to drive the Jews away from this quarter, the corner houses of Ironmonger lane being taken from Jews by the Earl of Lancaster and the Earl of Essex respectively. The Jewish dwellings spread along Gresham street, Milk street, and Wood street. The fact that the chief noblemen of the time were anxious to obtain them shows these houses to have been strongly built, as was indeed the complaint at the time of the riots.

Besides their predominant position, due to the existence of the Exchequer of the Jews, and which brought to London all the Jewish business of the country, the Jews of the capital had also spiritual domination, inasmuch as their presbyter or chief rabbi held a position analogous to that of the archbishop (see Presbyter).

The chief synagogue of the London Jewry at this date appears to have been on the site of Bakewell Hall. It probably continued to be used down to the Expulsion, though for certain reasons it was in private hands from 1283 to 1290. Another synagogue, in the northeast corner of Old Jewry, was handed over to the Fratres de Sacca, while still another was given to St. Anthony's Hospital, on the site of which is now the City Bank. Reference to more than one synagogue among the Jews of London is distinctly seen in the proclamations which were ordered to be made in the "synagogues" to determine whether or not a person was in debt to the Jews (see "Select Pleas of the Jewish Exchequer," ed. Rigg, p. 9).

In the Barons' War.

The Jews of London suffered from their position as buffer between the king and the barons. In 1215 the barons opposing John sacked the Jewish quarter and used the tombstones of the Jewish cemetery to repair Ludgate (Stow, "Survey of London," ed. Thoms, p. 15). Similarly, in the trouble with Simon de Montfort, in 1263, the barons looted the London Jewry in pursuance of their opposition to the oppression of the king, into whose hands fell the debts of the Jews in London and elsewhere. This outburst had been preceded in 1262 by a popular riot against the Jews in which no less than 700 had been killed. A curious suit which followed the death of a Jew on this occasion is given in "Select Pleas," pp. 73–76, from which it appears that some of the Jews of that time took refuge in the Tower of London. It is a mistake, however, to suppose that there was a separate Jewry in that neighborhood. Most of the trials that took place with regard to ritual or other accusations were held in the Tower (see Norwich). Nevertheless the Tower continued to be the main protection of the Jews against the violence of the mob; and they are reported to have been among its chief defenders in 1269 against the Earl of Gloucester and the disinherited.

In 1244 London witnessed an accusation of ritual murder, a dead child having being found with gashes upon it which a baptized Jew declared to be in the shape of Hebrew letters. The body was buried with much pomp in St. Paul's Cathedral, and the Jews were fined the enormous sum of 60,000 marks (about £40,000). Later on, in 1279, certain Jews of Northampton, on the accusation of having murdered a boy in that city, were brought to London, dragged at horses' tails, and hanged.

Toward the later part of their stay in London the Jews became more and more oppressed and degraded, and many of them, to avoid starvation, resorted to doubtful expedients, such as clipping. This led at times to false accusations; and on one occasion a Jew named Manser fil Aaron sued for an inquiry concerning some tools for clipping which had been found on the roof of his house near the synagogue (1277). In the following year no fewer than 680 Jews were imprisoned in the Tower, of whom 267 were hanged for clipping the coinage. On another occasion the lord mayor gave orders that no meat declared unfit by the Jewish butchers should be exposed for sale to Christians (Riley, "Chron." p. 177).

Disputes as to jurisdiction over the Jews often occurred between the Jewish Exchequer and the lord mayor. Thus in the year 1250 pleas of disseizin of tenements of the city of London were withdrawn from the cognizance of the justice of the

Synagogues Closed.

Jews and assigned for trial in the mayor's court, though they were reassigned to the Exchequer in 1271. In that year Jews were prevented from acquiring any more property in London, on the ground that this might diminish the Church tithes ("De Antiquis Legibus Liber," pp. 234 *et seq.*). The Church was very careful to prevent any encroachment on its rights; and it endeavored to curtail those of the Synagogue as much as possible. In 1283 Bishop Peckham caused all synagogues in the diocese of London to be closed; and it is for this reason that there exists no record of any synagogue falling into the hands of the king at the Expulsion (1290), though it is probable that the house held by Antera, widow of Vives fil Mosse of Ironmonger lane, was identical with the synagogue and was used for that purpose.

At the Expulsion the houses held by the Jews fell into the hands of the king, and were with few exceptions transferred to some of his favorites. In all, the position of about twenty-five houses can still be traced (see accompanying map), though it is doubtful whether the 2,000 Jews of London could have been accommodated in that small number of dwellings. As will be seen, the houses were clustered around the Cheape or market. Many of their owners were members of the Hagin family, from which it has been conjectured Huggin lane received its name (but see HAGIN DEULACRES). Traces of the presence of Jews are found also in surrounding manors which now form part of London, as West Ham, Southwark, etc.

THE LONDON JEWRY, 1290. NUMBERED PLOTS BELONGED TO JEWS.
(From Jacobs' "Jewish Ideals.")

From the Expulsion to the seventeenth century London was only occasionally visited by Jews, mainly from Spain. In 1542 a certain number of persons were arrested on the suspicion of being Jews.

The Return.

Indeed, their presence appears to have become so common that in an old play ("Every Woman in Her Humour," 1609) a citizen's wife thus advises any one desirous of going to court: "You may hire a good suit at a Jew's." From this it would appear that Jewish traffic in old clothes had already begun. Toward the middle of the reign of Charles I. a number of Spanish Jews, headed by Antonio Fernandez CARVAJAL, settled in London in order to share in the benefits of the trade between Holland and the Spanish colonies. They passed as Spaniards, and attended mass at the chapel of the Spanish embassy; but when the Independents, with Cromwell at their head, became predominant in English affairs, several of these Jews assisted him in obtaining information about Spanish designs (see INTELLIGENCERS). Meanwhile MANASSEH BEN ISRAEL attempted to secure formal permission for the return of the Jews to England. At the conference at Whitehall on Dec. 18, 1655, the matter was left undecided; but it was put to a practical test in the following year by the ROBLES case, as a result of which Cromwell granted the lease of a burial-ground at Mile End for 999 years ("Jew. Chron." Nov. 26, 1880). Even previous to this the Jews had met for worship in a private house fitted up as a synagogue in Creechurch lane, Leadenhall street; and it is possible to assume the existence of a second meeting-place at St. Helens in the same neighborhood by 1662. These places of worship were fairly well known to the general public, though they were protected by treble doors and other means of concealment. Thomas Greenhalgh visited the one in Creechurch lane in 1664; and from the number of births in that year it would appear that about 280 Jewish souls resided in London at the beginning of the reign of Charles II. These must have increased considerably by 1677, when more than fifty Jewish names occur in the first London directory (Jacobs and Wolf, "Bibl. Anglo-Jud." pp. 59–61), implying a population of at least 500 Jewish souls. There is evidence of a number of aliens pretending to be Jews in that very year (L. Wolf, in "Jew. Chron." Sept. 28, 1894, p. 10).

Much opposition was directed against the Jews by the citizens of London, who regarded them as formidable rivals in foreign trade. Besides a petition of Thomas Violett against them in 1660, attempts were made in 1664, 1673, and 1685 to put a stop to their activity and even to their stay in England. On the last occasion the ingenious point was made that the grants of denization given to the London Jews by Charles II. had expired with his death, and that their goods were, therefore, liable to alien duty (Tovey, "Anglo-Judaica," pp. 287–295); and this contention was ultimately sustained. The more important merchants of London, however, recognized the advantages to be derived from the large Jewish trade with the Spanish and Portuguese colonies and with the Levant, to which, indeed, England was largely indebted for its imports of bullion. Rodriques Marques at the time of his death (1668) had no less than 1,000,000 milreis consigned to London from Portugal. Accordingly individual Jews were admitted as brokers on the Royal Exchange, though in reality not eligible by law. Solomon Dormido, Manasseh ben Israel's nephew, was thus admitted as early as 1657, and others followed, till the south-eastern corner of the Exchange was definitely set aside for the Jewish brokers. In 1697 a new set of regulations was passed by a committee of the Exchange appointed by the aldermen, which limited the number of English brokers to 100, of alien brokers to 12, and of Jewish brokers to 12. Of the 12 Jews admitted all appear to have been Sephardim except Benjamin Levy, who was probably an Ashkenazi. A petition in 1715 against the admission of Jews to the Exchange was refused by the board of aldermen.

Organization.

The Sephardim soon established communal institutions, following, it may be conjectured, the example of Amsterdam, from which city most of them had emigrated. The Gates of Hope School was founded as early as 1664; and this was followed by the Villa Real Schools in 1730. The Sephardic Orphan Asylum had been established as early as 1703, and a composite society, whose title commenced with "Honen Dalim," was founded in 1704 to aid lying-in women, support the poor, and to give marriage portions to fatherless girls. In 1736 a Marriage Portion Society was founded, and eleven years later the Beth Holim, or hospital, came into existence, this in turn being followed in 1749 by the institution known as "Mahesim Tobim." Thanks to these and other minor institutions, the life of a Sephardic Jew in London was assisted at every stage from birth, through circumcision, to marriage, and onward to death, while even the girls of the community were assisted with dowries. This unfortunately had a pauperizing effect, which came to be felt toward the beginning of the nineteenth

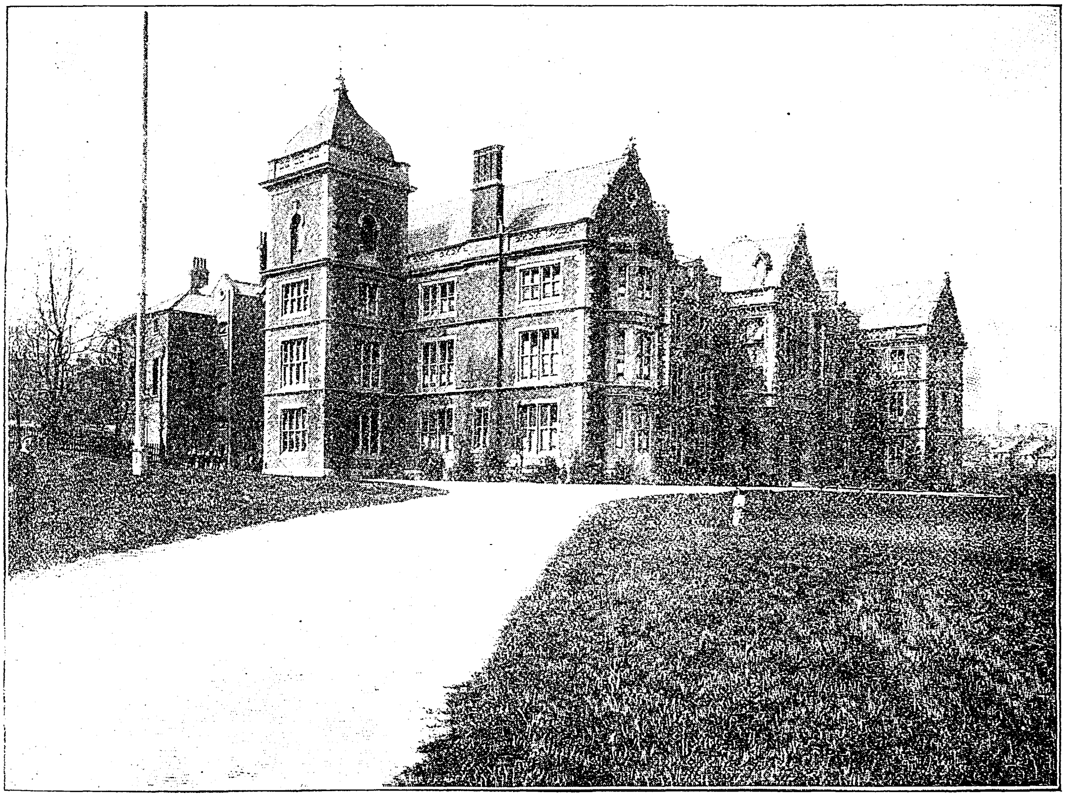
Social Condition in 1750.

century. All these institutions centered round the great Sephardic synagogue built in Bevis Marks Sept., 1701 (see Bevis Marks Synagogue). This was a center of light and learning, having the society Etz Haim (founded as early as 1664) for the study of the Law. Later this was merged with the yeshibah into one institution called the "Medrash," which is still in existence. In the early days of the community almost all the names of importance were connected with Bevis Marks, *e.g.*, the Cortissos, Lagunas, Mendes, Pimentels, Samudas, Salvadors, Sarmentos, Suassos, and Villa Reals; the Nietos and the Azevedos likewise represented a high state of culture and Hebrew learning. By the middle of the eighteenth century these and other families, such as the Franks, Treves, Seixas, Nunes, Lamegos, Salomons, Pereiras, and Francos, had accumulated considerable wealth, mainly in foreign commerce; and in a pamphlet of the time it was reckoned that there were 100 families with an income ranging between £1,000 and £2,000, while the average expenditure of the 1,000 families raised above pauperism was estimated at £300 per annum. The whole community was reckoned to be worth £5,000,000 ("Further Considerations of the Act," pp. 34-35, London, 1753). The Jews were mainly concerned in the East-Indian and West-Indian trades and in the importation of bullion. The Jamaica trade was almost monopolized by them (*ib.* pp. 44-49). The most important member of the community was Samson Gideon, who by his coolness during the crisis of the South Sea Bubble and the rising of 1745 rendered great service to the government and acquired large means for himself. The riots that followed the passage of the bill of 1753 for the naturalization of Jews had in many ways a disastrous effect upon the Sephardic section of the community. Despairing of emancipation, a large number of the wealthiest and most cultured either were baptized themselves or had their children baptized, Gideon leading the way in the latter expedient. His son became Lord Eardley in the Irish peerage. One consequence of the rejection of the naturalization bill of 1753 was the formation of the Board of Deputies, then known as the "Deputados of the Portuguese Nation," really an extension of the Committee of Diligence formed to watch the passage of the naturalization bill through the Irish Parliament in 1745. The Board of Deputies came into existence as a sort of representative body whose first business was to congratulate George III. on his accession. As indicated by its earlier name, its membership was confined to Sephardim, though by arrangement representatives of the "Dutch Jews" were allowed to join in their deliberations (see LONDON BOARD OF DEPUTIES).

Meanwhile the "Dutch Jews" or Ashkenazim had from the beginning of the century been slowly increasing in numbers and importance. They had established a synagogue as early as 1692 in Broad street, Mitre square; and thirty years later the congregation was enabled by the generosity of Moses Hart (Moses of Breslau) to remove to a much more spacious building in Duke's place, Aldgate, still known as the "Great Shool." His brother, Aaron Hart, was established as the chief rabbi; and his daughter, Mrs. Judith Levy, contributed liberally to the synagogue's maintenance. Three years later a schism occurred, and the HAMBRO' SYNAGOGUE was founded. It was not till 1745 that the Jews of the German ritual found it necessary to establish any charity. The Hakenosath Berith was then organized, to be followed as late as 1780 by the Meshivath Nephesh. Rigid separation existed between the two sections of the community. Even in death they were divided: the Ashkenazic cemetery was at Alderney road, Mile End.

The social condition of the Ashkenazim toward the end of the eighteenth century was by no means satisfactory. Apart from a very few distinguished merchants like Abraham and Benjamin Goldsmid, Levy Barent Cohen, and Levy Salomons, the bulk of the Ashkenazic community consisted of petty traders and hawkers, not to speak of the followers of more disreputable occupations. P. Colquhoun, in his "Treatise on the Police of the Metropolis" (London, 1800), attributes a good deal of crime and vice to their influence; and his account is confirmed by less formal sketches in books like P. Egan's "Life in London" and by the caricatures of Rowlandson and his school. The lower orders of the Sephardic section also were suffering somewhat from demoralization. Prize-fighters like Aby Belasco, Samuel Elias, and Daniel Mendoza, though they contributed to remove some of the prejudice of the lower orders, did not help to raise the general tone.

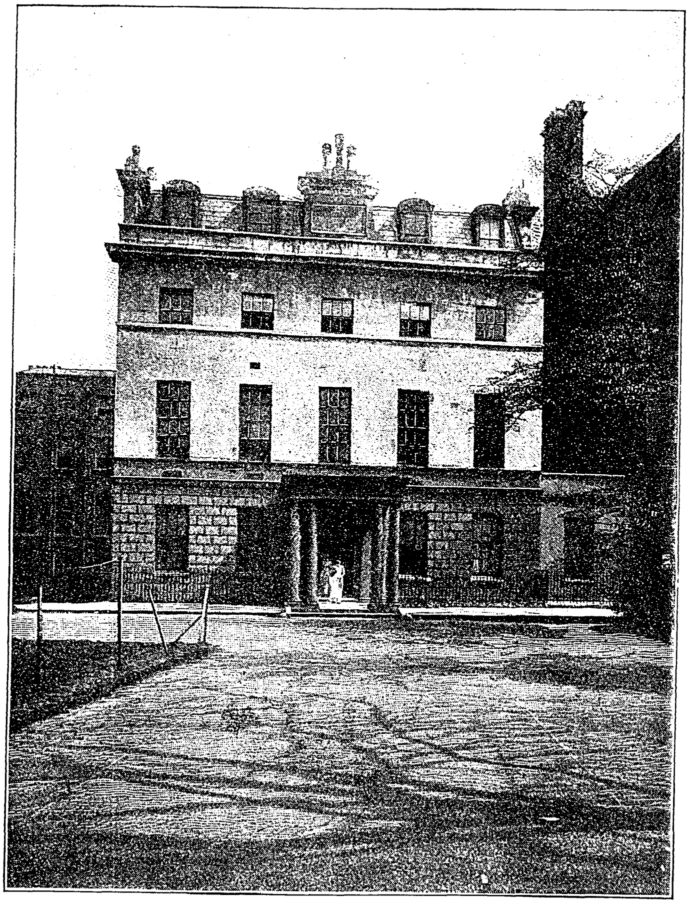


JEWS' HOSPITAL AND ORPHAN ASYLUM, WEST NORWOOD, LONDON.
(From a photograph.)

The revelations of Colquhoun led earnest spirits within the community to seek for remedies; and Joshua van Oven with Colquhoun's assistance drafted a plan for assisting the Jewish poor which was destined to bear fruit fifty years later in the Board of Guardians. Attention was directed to the education of the poor in 1811, when the Westminster Jews' Free School was established; and six years later the Jews' Free School was founded in Ebenezer square, and replaced a Talmud Torah founded in 1770. The first head master was H. N. Solomon, who afterward founded a private school at Edmonton which, together with that

Ashkenazic Institutions.

of L. Neumegen at Highgate, afterward at Kew, educated most of the leaders of the Ashkenazim during the first two-thirds of the nineteenth century. Even earlier, care had been taken of orphans. By the exertions of Abraham and Benjamin Goldsmid the sum of £20,000 was collected between 1795 and 1797, with which in 1806 the Jews' hospital, called "Neveh Zedek," was opened June 28, 1807, at Mile End for the support of the aged poor and for the education of orphan children. This was removed to Norwood in 1863 to a building erected on ground presented by Barnett Meyers. A similar institution, the Jews' Orphan Asylum, founded in 1831, was amalgamated with the Neveh Zedek in 1876; and these were supplemented by the National and Infant schools founded in 1836, and by the Jews' Infant School founded in 1841 by Walter Josephs. Provision for the aged poor was made by the Aged Needy Society, founded in 1829, and by the almshouse established by Abraham Moses and Henry Salomon nine years later. The blind were cared for from 1819 onward by the Institution for the Relief of the Indigent Blind. The poor were cared for by a committee of the three London synagogues—the Great, the Hambro', and the New.



Jews' College, Queen's Square, London.

(From a photograph.)

Second Sephardic Defection.

Meanwhile echoes of the Mendelssohnian movement had reached London, besides which the general wealth of the Sephardic community had brought its members in contact with the main currents of culture. One of the Sephardim, Emanuel Mendes da Costa, had been secretary of the Royal Society; and his brother Solomon had presented to the newly founded British Museum 200 Hebrew books, which formed the nucleus of the magnificent Hebrew collection of that library. Moses Mendez had proved himself a poetaster of some ability; and Oliver Goldsmith in his "Haunch of Venison" depicted a Jewish journalist of his time as a characteristic figure. But the "mahamad" of Bevis Marks went on in its old way without regard to any changes, spiritual or otherwise, in the community which it ruled; inflicting fines, and repelling many of the most promising members who were getting in touch with more refined methods of worship. Many of them ceased their connection with the Synagogue, either formally by becoming baptized or by resigning and allowing their children to be brought up in the dominant faith. Among the families thus deserting the Synagogue at the beginning of the nineteenth century may be enumerated the Basevis, D'Israelis, Ricardos, Samudas, Uzziellis, Lopezes, and Ximines. Not that the Sephardim were left without some important figures: Hananel de Castro, David Abravanel Lindo, Jacob and Moses Mocatta, not to mention Sir Moses Montefiore, were still left to uphold the more rigid traditions of Bevis Marks (Gaster, "Hist. of Bevis Marks," p. 172, London, 1901).

The hegemony in the community was thus transferred to the Ashkenazic section, which had been reenforced by the powerful personality of Nathan Meyer Rothschild, who had removed from Manchester to London in 1805 and who thenceforth became the central figure of the community. By his side stood the venerable figure of the "Rav," Solomon Herschel. Even in the literary sphere the Ashkenazim began to show ability. Whereas David Levi had been almost their sole representative at the end of the eighteenth century, in the first third of the nineteenth Michael Josephs, Moses Samuels, and Hyman Hurwitz treated the various branches of Hebrew learning; and the arts were represented by John Braham in secular, and by the two Aschers in sacred, music. Against these names the Sephardim could only show those of Elias Hyam Lindo and

Grace Aguilar in letters and that of Carlo Delpini in drama.

Struggle for Emancipation.

Though the parliamentary struggle for emancipation was intended for the benefit of all British Jews, and has, therefore, been described in some detail under England, it centered mainly around London. The influence of the Jews in the city had increased. David Salomons was one of the founders of the London and Westminster Bank; the London Docks began their great career through the influence of the Goldsmids; the Alliance Insurance Company was in large measure the creation of Sir Moses Montefiore and his brother-in-law, Nathan Rothschild. These and similar institutions brought Jewish merchants into ever-widening relations with men of influence in the city. Their bid for justice was widely supported by the citizens of London. Thus, at the first attempt to pass the "Jew Bill" in 1830 the second reading was supported by a petition of no fewer than 14,000 citizens of London; and this was supplemented at the second attempt in 1833 by a petition of 1,000 influential names from Westminster. Again, the Sheriffs' Declaration Bill of 1835 was in reality concerned with the shrievalty of London, for which the popular David Salomons was making a gallant fight; in this he succeeded that year, to be followed two years later by Moses Montefiore, who was soon afterward knighted by Queen Victoria. In the same year (1835) Salomons was elected alderman, but was unable to occupy that office owing to his religion. For ten years he urged the right of his coreligionists to such a position, till at last he succeeded in getting a bill passed allowing Jews to become aldermen in the city of London and, thereby, eligible as lord mayor. Salomons was the first Jewish sheriff (1835), the first Jewish alderman (1847), and the first Jewish lord mayor (1855) of London. He was clearly destined to be the first Jew elected member of Parliament, though, appropriately enough, it was Baron Lionel Rothschild who first actually took his seat as member for the city of London, which had shown so much sympathy for Jewish emancipation (see England).

The sympathy thus attracted to Jews in the city was prominently shown during the Damascus Affair, when a Mansion House meeting was held (July 3, 1840) to protest against the threatened disaster. Incidentally, the struggle for Reform aided in opening out new careers for the disfranchised Jews of London. Francis Goldsmid, one of the most strenuous fighters for the cause, was admitted to the bar in 1833, though there were doubts as to his eligibility. He was followed in 1842 by John (afterward Sir John) Simon, who was ultimately one of the last sergeants-at-law.

Reform Movement.

Meanwhile the community in both its sections was rent by a schism which left traces almost to the end of the century. Alike among the Ashkenazim and the Sephardim the more cultured members had been increasingly offended by the want of decorum shown both at Bevis Marks and the "Great Shool." Protests were made in 1812 and 1828 in the former synagogue, and in 1821 and 1824 in the latter; but on Dec. 4, 1836, matters were brought to a crisis by a definite proposal for Reform presented to the mahamad by a number of the "Yehidim." The petition was rejected as were similar ones in 1839 and in 1840, so that in 1840 twenty-four gentlemen, eighteen of the Sephardic and six of the Ashkenazic section of the community, determined to organize a congregation in which their ideas as to decorum in the service should be carried out. The new congregation dedicated its synagogue in Burton street Jan. 27, 1842, notwithstanding a "caution" which had been issued Oct. 24, 1841, against the prayer-book to be used by it, and a "herem" issued five days before the inauguration of the synagogue against all holding communion with its members. This ban was not removed till March 9, 1849. For the further history of the movement see Reform Judaism. The schism produced disastrous effects upon the harmony of the community. The older congregations would not even allow deceased members of the new one to be buried in their graveyard; and it was necessary to establish a new cemetery at Ball's Pond (1843). The Board of Deputies, under the influence of Sir Moses Montefiore, refused to recognize the new congregation as one qualified to solemnize valid Jewish marriages; and a special clause of the Act of 1856 had to be passed to enable the West London Synagogue of British Jews to perform such marriages.

The Jewish Press.

It is not without significance that the beginnings of the Jewish press in London coincided in point of time with the stress of the Reform controversy. Both "The Voice of Jacob," edited by Jacob Franklin, and "The Jewish Chronicle," edited by D. Meldola and Moses Angel—the latter of whom had in the preceding year become head master of the Jews' Free School, over which he was to preside for nearly half a century—came into existence in 1841. About the same time a band of German Jewish scholars established themselves in England and helped to arouse a greater interest in Jewish literature on scientific principles than had been hitherto displayed. Among these should be especially mentioned Joseph Zedner, keeper of the Hebrew books in the British Museum; the eccentric but versatile Leopold Dukes; H. Filipowski; L. Loewe; B. H. Ascher; T. Theodores; Albert Löwy; and Abraham Benisch, who was to guide the fortunes of "The Jewish Chronicle" during the most critical years of its career. The treasures of Oxford were about this time visited by the great masters Zunz and Steinschneider. They found few in England capable of appreciating their knowledge and methods, Abraham de Sola, David Meldola, and Morris Raphall being almost the only English Jews with even a tincture of rabbinic learning. On the other hand, the native intellect was branching out in other directions. Showing distinction in the law were James Graham Lewis, Francis Goldsmid, and John Simon; in dramatic management, Benjamin Lumley; in song, Mombach in the synagogue, and Henry Russell outside it; in music, Charles Sloman, Charles K. Salaman, and Sir Julius Benedict; in painting, Solomon Alexander Hart, the first Jewish R.A., and Abraham Solomon; in commerce, besides the Rothschilds and Goldsmids, the Wormses, Sassoons, Sterns, and

Sir Benjamin Phillips were rising names distinguished both within and without the community. J. M. Levy and Lionel Lawson were securing a large circulation for the first penny London newspaper, the "Daily Telegraph." Confining their activities within the community were men like Barnet Abrahams, dayyan of the Sephardim; Sampson Samuel; H. N. Solomon; N. I. Valentine; the Beddingtons; Louis Merton; and Sampson Lucas. All these may be said to have flourished in the middle of the century, toward the end of the struggle for complete independence.

Further Consolidation (1856-1871).

With them, but of a later generation, were growing up men who were destined between 1850 and 1880 further to consolidate the London community, now firmly established in the respect and confidence of the other citizens. The chief rabbi, N. M. Adler, began the process by establishing Jews' College for the training of Jewish ministers, in 1860 following it up, in cooperation with Dayyan Barnet Abrahams, with the establishment of the Jewish Association for the Diffusion of Religious Knowledge. Ephraim Alex with the aid of the energetic Lionel L. Cohen founded in 1859 the Board of Guardians for the Relief of the Jewish Poor to revise the system of charity conducted jointly by the three synagogues according to the treaty of 1805. This body soon developed loan, industrial, apprenticeship, visitation, and immigration committees, and for eighteen years (1862–79) took medical care of the Jewish poor, mainly under the supervision of Dr. A. Asher. Lionel Cohen, together with the last-mentioned, then devoted his attention to the solution of the financial and other problems brought about by the western extension of the London ghetto up to the middle of the century. The Jews of London had remained concentered in the Whitechapel district with the classic "Petticoat lane" as a nucleus; but as wealth increased among the Ashkenazic Jews a steady western exodus took place, so that it was necessary as early as 1855 to establish, under the ministry of the Rev. A. L. Green, in Great Portland street, a branch synagogue of the "Great Shool." Synagogues at Bayswater (1863), in the Borough (1867), and at North London (1868) were further evidences of the dispersion tendency; and it became necessary to secure harmony in divine service and consolidation in financial responsibility by bringing these synagogues under one management.

At the suggestion of Chief Rabbi N. M. Adler, the three city synagogues—the Great, the Hambro',

(After Russel and Lewis, "The Jew in London.")

and the New—with their western branches at Portland street and Bayswater agreed to a scheme (April 19, 1868), which was submitted to the Charity Commissioners of England and embodied by them in an Act of Parliament. This was passed July 14, 1870, although the legislature hesitated to establish the Synagogue just at the time when it was disestablishing the Irish Church. The original five synagogues have since been joined by ten others (see UNITED SYNAGOGUE). One of the consequences of this arrangement, which upon the face of it appears to be merely financial, was to give a certain pontifical importance to the chief rabbi, without whose consent, according to a special declaration attached to but not forming part of the Act of Parliament, no changes in ritual could be undertaken by any constituent synagogue.

WENTWORTH STREET, FORMERLY "PETTICOAT LANE," LONDON.
(From a photograph.)

The Rabbinate.

Indeed, one of the characteristic features of the London community has always been the importance of the chief rabbi (called among the Sephardim "haham") of the prominent congregation, around whom as a sort of center of crystallization the community has rallied. At first the Sephardim held this position, which had been secured by the important work of David Nieto, who became chief of the Sephardim in 1702 and was one of the most distinguished Jews of his time, being equally noted as philosopher, physician, mathematician, and astronomer. His predecessors, Jacob Sasportas (1656-66) and Solomon Ayllon (1689-1701), were not suited either by character or by attainments to acquire great influence. David Nieto was succeeded by his son Isaac, who in turn was followed by Moses Gomez de Mesquita (d. 1751). Moses Cohen d'Azevedo again raised the position of haham to some consequence during his rule (1765-84). Of his successors, Raphael Meldola (1805-28), Benjamin Artom (1866-1879), and Moses Gaster, the present incumbent (elected in 1887), have been the most distinguished.

But by the end of the eighteenth century the "Ravs" or chief rabbis of the Ashkenazim had begun to vie in importance with the hahamim of the Sephardim. The first of these was Aaron Hart (Uri Phoebus), brother of Moses Hart, founder of the Great Synagogue. He was succeeded by Hirschel Levin (sometimes called "Hirschel Löbel" and "Hart Lyon") who held office only seven years (1756-63), and then returned to the Continent. He was succeeded by David Tebele Schiff, who was chief rabbi from 1765 to 1792, and who founded a hereditary rabbinate for the next century, though his successor, Solomon Herschell (1802-42), was related to Schiff's predecessor, Hirschel Levin. Chief Rabbi N. M. Adler, who followed Herschell, was a relative of Schiff, and did much for the harmonizing of the London community; Jews' College, the United Synagogue, and, to a certain extent, the Board of Guardians owe their existence to his initiative. He was succeeded by his son, Herman Adler, the present (1904) incumbent of the post.

Besides Jews' College, the Board of Guardians, and the United Synagogue, the same generation arranged for a more efficient performance of its duties toward Jews oppressed in other lands. This function would naturally have fallen to the Board of Deputies; but, owing to its action with regard to the Reform Synagogue, certain members of this latter, especially Sir Francis Goldsmid and Jacob Waley, determined to form an independent institution to act for the British dominions in the same way that the Alliance Israélite Universelle had acted for the Continent. Owing to the Franco-Prussian war the Alliance had lost all support in Germany, and increased support from England had become necessary; this was afforded by the Anglo-Jewish Association, founded in 1871 with Albert Löwy as its secretary, who was instrumental also in founding the Society of Hebrew Literature in 1873.

Social Condition About 1880.

By the beginning of the last quarter of the nineteenth century the London Jewish community had fully overcome the difficulties which had beset it at the beginning of the century; and it now organized all branches of its activity in a systematic and adequate manner. A series of remarkably able public servants—Asher Asher at the United Synagogue, A. Benisch at the "Jewish Chronicle," Moses Angel at the Jews' Free School, A. Löwy at the Anglo-Jewish Association, S. Landeshut at the Board of Guardians, and S. Almosnino, secretary of the Bevis Marks Synagogue and of almost all the Sephardic institutions—gave a tone of dignity as well as of efficiency to communal affairs. They were supported by leaders, some of whom, as Sir Julian Goldsmid and Baron Henry de Worms (afterward Lord Pirbright), had shown their capacity in national affairs, while others, like Lionel L. Cohen and his brother Alfred, Barrow Emanuel, David Benjamin, and Charles Samuel (to mention only those who are dead), had devoted their great abilities and administrative capacity to the internal needs of the community. Other members of the community were attaining distinction in the various branches of professional life. Sir George Jessel was the most distinguished judge, Judah P. Benjamin the most renowned barrister, and George Lewis the most noted solicitor practising English law. In medicine Ernest Hart, Henry Behrend, and R. Liebreich were noted; and in chemistry Ludwig Mond had become distinguished. Taste and capacity for literature were being shown by Sydney M. Samuel and Amy Levy; Frederic H. Cowen and in a less degree Edward Solomon were gaining distinction in music; and David James was famous in acting.

It was estimated about the year 1883 that the total Jewish population of London then numbered 47,000 persons. Of these, 3,500 were Sephardim (including 500 "Reformers"); 15,000 could trace their descent from the Ashkenazim of the eighteenth century; 7,500 from Jews who had settled in England in the early part of the century; 8,000 were of German or Dutch origin; and the remaining 13,000 were Russian and Polish. What might be called the native element thus outnumbered the foreign contingent by 26,000 to 21,000 (Jacobs, "Jewish Statistics," iii.). The various social classes into which they were divided were summarized by the same observer as follows, the numbers of the first four classes being determined from estimates of Jewish names in the "London Directory," of the last three from the actual statistics of Jewish charitable institutions; the number of shopkeepers and petty traders also were based on the last-mentioned source (*ib.* ii.):

Position.	Individuals.	Family Income.
Professional and retired living W.	1,200	100 at £10,000
Rich merchants living W	5,400	1,400 " 1,000
Merchants with private houses living N., S., and E.	3,600	800 " 500
Professional and retired living N., S., and E.	800	200 " 250
Shopkeepers	12,500	3,000 " 200
Petty traders	11,000	2,000 " 100
Servants, etc.	500	 30
Board of Guardians, casuals and chronic	7,911	1,000 " 50 1,884 " 10
Other paupers and afflicted	2,242	 10
Russian refugees	1,947	

The total income was about £3,900,000, or an average per head of £82.

As regards their occupations, an examination of the London directory for those merchants sufficiently important to appear in its pages resulted in the following classification (*ib.* v.):

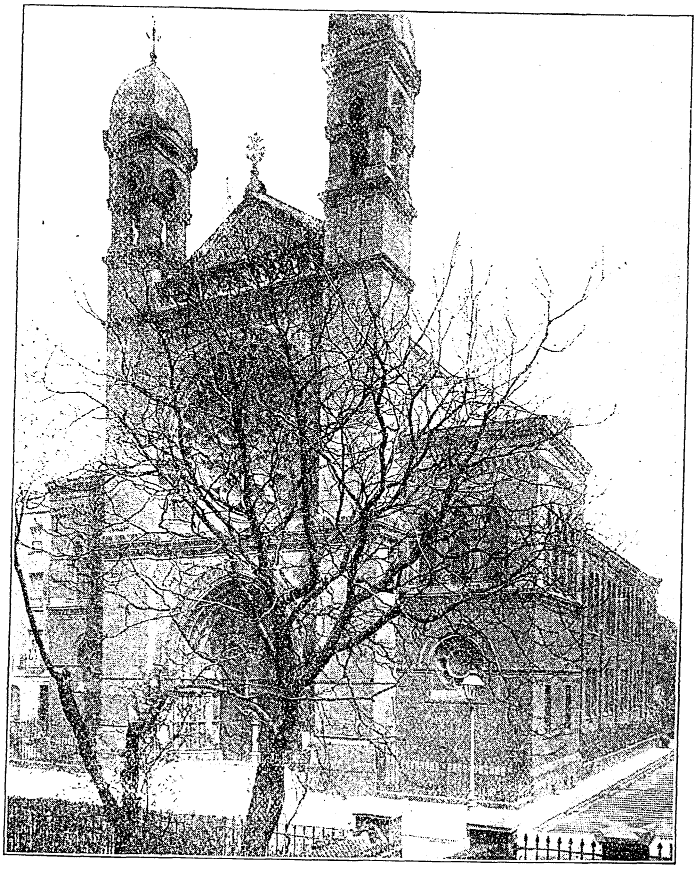
Class.	No. of Trades or Professions.	Individuals.	Class.	No. of Trades or Professions.	Individuals.
Merchants and factors	84	689	Leather	17	81
Clothing	68	799	Iron	13	70
Furniture	49	348	Instruments	11	33
Food	33	348	Tobacco	9	164
Stationery	19	111	Money-dealers	5	33
Jewelry	17	245	Toys	4	51
			Professions	15	154

There were but three occupations having over one hundred names: Stock Exchange brokers, 138; general merchants, 131; and tailors, 123. Then came clothiers, 89; bootmakers, 80; city of London brokers, 78; diamond-cutters, 78; furniture-brokers, 60; watchmakers, 57. The trades in which Jewish merchants had the largest representation were those in coconuts, oranges, canes and umbrellas, meerschaum pipes, and valentines.

The Russian Exodus.

Unfortunately this prosperous condition of the community was rudely disturbed by the Russian persecutions of 1881; these mark an epoch in Anglo-Saxon Jewry, upon whose members has fallen the greatest burden resulting from them. On Jan. 11 and 13, 1882, appeared in "The Times" of London an account of the persecution of the Jews in Russia, written by Joseph Jacobs, which drew the attention of the whole world to the subject and led to a Mansion House meeting (Feb. 1) and to the formation of a fund which ultimately amounted to more than £108,000 for the relief of Russo-Jewish refugees. This was supplemented by a further sum of £100,000 in 1890, when a similar indignation meeting was held at the Guildhall to protest against the May Laws (see Mansion House and Guildhall Meetings).

The circumstances of the case, however, prevented the Russo-Jewish Committee, even under the able chairmanship of Sir Julian Goldsmid, from doing much more than supplement the work of the Board of Guardians, upon which fell the chief burden of the Russian exodus into England. But the publicity of the protest made on these occasions, and the large sums collected, naturally made the London community the head of all concerted attempts to stem the rising tide of Russian oppression, and gave London for a time the leading position among the Jewish communities of the world. As passing events which helped to confirm the consciousness of this proud position may be mentioned the centenary in 1885 of Sir Moses Montefiore's birth, celebrated throughout the world, and the Anglo-Jewish Historical Exhibition (suggested and carried out by Isidore Spielmann) at the Albert Hall, London, in 1887. This exhibition led, six years later, to the foundation of the Jewish Historical Society of England.

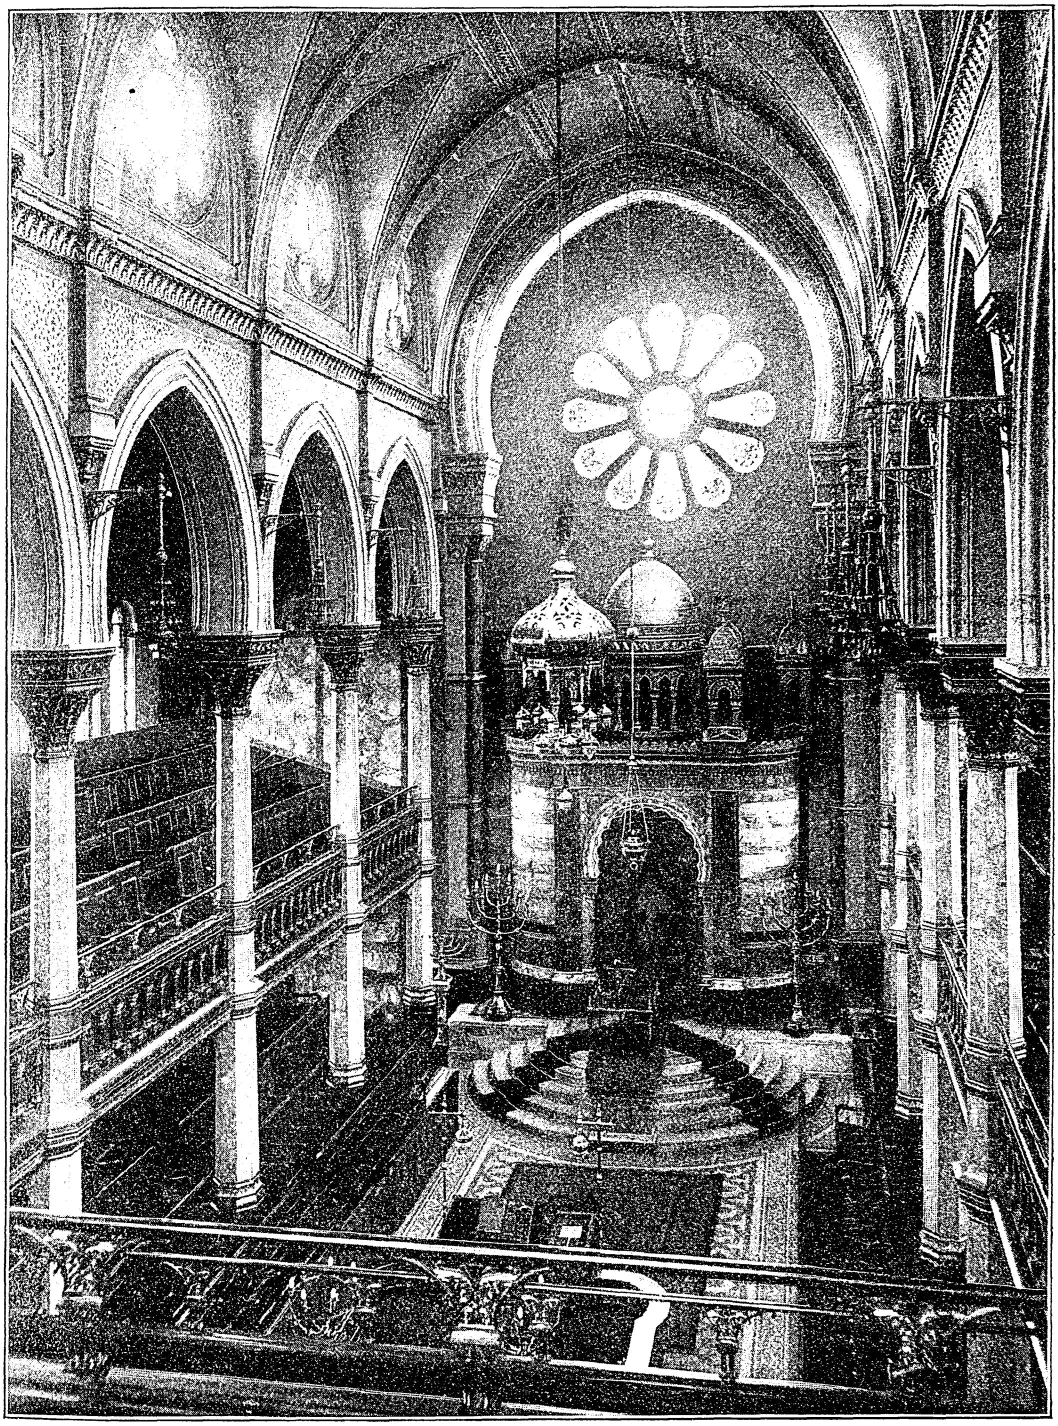


Exterior of the New West End Synagogue, London.
(From a photograph.)

The number of refugees permanently added to the London Jewish community—most of them merely passing through on their way to America—was not of very large proportions; but an average of about 2,500 in a condition of practical destitution annually added to a community of less than 50,000 souls naturally taxed the communal resources to the utmost. To prevent evils likely to result from the landing of refugees unacquainted with the English language and customs, the Poor Jews' Temporary Shelter and the Jewish Association for the Protection of Girls and Women were founded in 1885.

The newcomers generally showed a tendency to reject or neglect the religious supremacy of the English chief rabbi; and to check this and to serve other purposes a Federation of East End Synagogues was effected in 1887 under the auspices of Samuel (afterward Sir Samuel) Montagu. The want of capacity and technical skill among the newcomers, or "greeners," caused them to fall into the hands of hard taskmasters, and resulted in their becoming victims of the "sweating system," which formed the subject of a parliamentary inquiry (1888–90), due to the not overfriendly efforts of Arnold White. The poverty resulting from this system led to serious evils in the way of overcrowding with resulting immorality. Several remedial institutions were founded to obviate these evil results in the case of boys, the most prominent of which were the Jewish Lads' Brigade (1885) and the Brady Street Club for Working Boys. It was nevertheless found necessary in 1901 to establish an industrial school for Jewish boys who had shown criminal tendencies.

The increased tide of alien immigration became especially noticeable as it was mainly directed into one administrative district of East London, that of Stepney. The overcrowding which already existed in this district was accentuated; and a certain amount of displacement of the native inhabitants took place owing to the excessive rise in rents, producing a system of "key money," by which a bonus was paid by the incoming tenant for the privilege of paying rent. Certain branches of the tailoring, shoemaking, and carpentering trades tended to become monopolized by the Russo-Polish Jews settled in Stepney. Toward the end of the nineteenth century a certain amount of objection began to be raised to this and other tendencies of the immigrants. A special organization known as "The British Brothers' League," headed by Major Evans Gordon, raised an agitation against any further immigration of the kind; and owing in large measure to its clamor, a royal commission was appointed to examine into the alleged effects of unrestricted immigration. Though nominally directed against all aliens, it was almost without disguise applied chiefly to aliens of the Jewish faith. A previous commission, appointed to consider the same subject in 1889, had decided that the evils, if any, were so insignificant that they did not require any special legislation.



INTERIOR OF THE NEW WEST END SYNAGOGUE, LONDON.
(From a photograph.)

Commission on Alien Immigration.

The commission, on which Lord Rothschild sat as member, devoted a considerable amount of attention to the subject, holding forty-nine public meetings mostly with regard to the London Jews of the East End. On the whole, it gave a fairly favorable account of the alien immigrant. He was acknowledged to be fairly healthy and reasonably clean on arrival, thrifty and industrious, and law-abiding. His children were especially bright and assimilative of English ways. It was not proved to the satisfaction of the commission that any severe displacement of labor had been caused by the "greener," who on his part tended to introduce new though less highly efficient methods of production in the clothing and furniture industries. The one true indictment found against the immigrant was that of overcrowding; and the recommendations of the commission were chiefly directed against this. It suggested that any district in which aliens congregated should be declared a prohibited area, and no alien should be admitted thereto for a period of two years after his arrival; and that to insure this all immigrants should be registered. Legislation intended to carry out this and other suggestions was introduced into the British Parliament in 1904. An unfortunate admission of Leonard L. Cohen, president of the Board of Guardians, that his institution found it necessary to send back a certain number of "undesirables," weakened the possible resistance of the London community to the proposal that the repatriation of such undesirables should be undertaken by the government.

Intellectual Progress.

During the last quarter of the nineteenth century a certain revival of interest in Jewish literature and history occurred among native London Jews. A small study circle associated with the Rev. A. L. Green in the early part of the seventh decade, and a series of public lectures in connection with Jews' College, gave opportunities for young men of promise to display their ability. These efforts have been more recently seconded by those of Jewish literary societies spread throughout London, and of a Jewish Study Society founded in 1900, mainly in imitation of the American Council of Jewish Women. "The Jewish Quarterly Review," founded by C. J. Montefiore and edited by him and by Israel Abrahams, has gradually become one of the most important scientific journals connected with Jewish science. Both of these gentlemen have been connected from time to time with movements intended to render religious worship more free from traditional trammels. The latest of these movements was that of the Jewish Religious Union in the year 1902, which was eminently a year of unions, as it saw also the formation of the Jewish Literary Societies Union, the Union of Jewish Women, and the Jewish Congregational Union.

One more movement may be referred to as characteristic of the London Jewry. About 1885 a number of the younger intellectual workers in the community were collected around Asher I. Myers, editor of "The Jewish Chronicle," in an informal body; they called themselves "The Wandering Jews," and included S. Schechter, I. Zangwill, Israel Abrahams, Joseph Jacobs, Lucien Wolf, and others. These met for several years in one another's houses for the informal discussion of Jewish topics, and this ultimately led to the foundation of the Maccabæans, an institution intended to keep professional Jews in touch with their coreligionists. This mixing with the outer world while still retaining fellowship with Israel is most characteristic of London, as indeed of the whole of English, Jewry.

Recent immigration has tended to divide London Jewry into two diverse and to a certain extent antagonistic elements; but the experiences and the administrative policy of the past decade have tended to bridge over the gap and reunite the two classes in communal organization. The beginning of the twentieth century finds difficulties similar to those found at the beginning of the nineteenth. Former experience shows that it is within the power of the community to remedy its own shortcomings.

This sketch of the history of the institutions and the prominent men that have made up the London community may be concluded with a list of the latter, from 1700 onward, including many who could not otherwise be specifically referred to. Persons whose date of birth alone is given are still living.

Name.	Date.	Description.
Abraham, Abraham	d. 1863	Author and communal worker.
Abrahams, Abraham	1801-80	Hebrew writer on sheḥitah.
Abrahams, Barnett	1831-63	Dayyan.
Abrahams, Barnett Lionel	b. Dec. 9, 1869.	Communal worker.
Abrahams, Israel	b. 1858	Author and communal worker.
Abrahams, Louis Barnett.	b. 1842	Head Master, Jews' Free School.
Adler, Elkan Nathan	b. 1861	Communal worker; bibliophile.
Adler, Very Rev. Hermann.	b. May, 1839.	Chief rabbi of the United Hebrew Congregations of the British Empire.
Adler, Rev. Michael	b. July 27, 1868.	Minister of Central Synagogue.

Rothschild, Hon. Lionel Walter.	b. Feb. 8, 1868.	Communal worker; Member of Parliament.
Rothschild, Baron Mayer de.	1818-74.	Financier and sportsman.
Rothschild, Baron Nathan Mayer.	1777-1836.	Financier.
Russell, Henry	1813-1900.	Composer and singer.
Salaman, Chas. Kensington.	1814-1901.	Musician.
Salaman, Malcolm Charles	b. Sept. 6, 1855.	Author and journalist.
Salomons, Annette A.	d. 1879.	Authoress.
Salomons, Sir David, Bart.	1797-1873.	Lord mayor and politician.
Salomons, Sir David Lionel, Bart.	b. June 28, 1851.	Engineer.
Salomons, Levi	1774-1843.	Financier.
Salvador, Joseph	fl. 1753.	Philanthropist.
Samuda, Isaac de Sequera.	fl. 1721.	Physician.
Samuda, Jacob	1811-74.	Civil engineer.
Samuda, Joseph d'Aguilar	1813-84.	Politician and shipbuilder.
Samuel, Baron Denis Moses de.	1782-1860.	Financier.
Samuel, Charles	1821-1903.	Communal worker.
Samuel, Sir Harry S	b. 1853.	Member of Parliament; communal worker.
Samuel, Herbert	b. 1870.	Member of Parliament.
Samuel, Sir Marcus, Bart.	b. 1853.	Lord mayor of London.
Samuel, Moses	1795-1860.	Author.
Samuel, Sampson	1804-68.	Secretary to the Board of Deputies.
Samuel, Stuart M	b. 1856.	Member of Parliament; communal worker.
Samuel, Sydney M.	1848-84.	Author.
Samuels, Moses	fl. 1830.	Biographer of Mendelssohn.
Sarmento, Jacob de Castro.	1692-1762.	Physician.
Sassoon, Sir Albert	1818-97.	Anglo-Indian merchant and philanthropist.
Schiff, David Tebele	d. 1792.	Chief rabbi.
Schloss, David Frederick.	b. 1850.	Communal worker.
Schloss, Leopold	b. Nov. 5, 1824.	Communal worker.
Sebag, Solomon	1828-92.	Hebrew teacher.
Seligman, Isaac	b. Dec. 2, 1834.	Communal worker.
Semon, Sir Felix	b. Dec. 8, 1849.	Laryngoscopist.
Sequera, Isaac Henriques.	1738-1816.	Physician.
Serra, Isaac Gomes	d. 1818.	Philanthropist.
Simon, Sergeant Sir John.	1818-97.	Communal worker, lawyer, and politician.
Simon, Oswald John	b. Sept. 3, 1855.	Communal worker.
Singer, Rev. Simeon	b. 1848.	Minister, New West End Synagogue.
Sloman, Charles	1808-70.	Musical composer and improvisator.
Sloman, Henry	1793-1873.	Actor.
Snowman, Isaac	b. 1874.	Artist.
Sola, Abraham de	1825-52.	Preacher; professor of Hebrew.
Sola, Samuel de	1839-66.	Hazzan.
Solomon, Abraham	1824-62.	Artist.
Solomon, Henry Naphtali	1796-1881.	Educationist and Hebraist.
Solomon, Selim	b. April 28, 1843.	Secretary, West London Synagogue of British Jews; communal worker.
Solomon, Solomon Joseph	b. Sept. 16, 1860.	Artist.
Spielmann, Isidore	b. July 21, 1854.	Communal worker.
Spielmann, Marion H.	b. May 22, 1858.	Author and publicist.
Stern, David, Viscount de	d. 1877.	Financier.
Stern, Sir Edward David	b. *c.* 1860.	Communal worker.
Stern, Baron Hermann de	1815-87.	Financier.
Stern, Rev. J. F.	b. Jan. 2, 1865.	Minister, East London Synagogue.
Strauss, Gustave Lewis Maurice.	1807-87.	Author.
Suasso, Isaac (Antonio) Lopez, Baron Avernes de Gras.	1693-1775.	Financier.
Sydney, Algernon Edward	b. Jan. 8, 1834.	Solicitor and communal worker.
Sylvester, J. J.	1814-97.	Mathematician; professor.
Symons, Baron Lyon de	fl. 1800.	Communal worker.
Tuck, Adolf	....	Communal worker.
Valentine, Nathan Isaac	fl. 1806.	Hebrew author.
Van Oven, Barnard	1797-1860.	Physician.
Van Oven, Joshua	1766-1838.	Surgeon.
Van Strahlen, Samuel	b. 1845.	Hebrew librarian, British Museum.
Villa Real, Isaac da Costa	d. 1730.	Founder of Villa Real School.
Villiers, John Abraham Jacob de.	b. 1863.	Writer and communal worker.
Waley, Jacob	1819-73.	Conveyancer; professor of political economy.
Wandsworth, Baron	b. 1845.	Politician.
Wasserzug, H.	d. 1882.	Hazzan and composer.
Wolf, Lucien	b. Jan. 20, 1857.	Journalist and Anglo-Jewish historian.
Wolff, Joseph	1795-1862.	Traveler and Christian missionary.
Worms, Baron de	b. Feb. 16, 1829.	Politician.
Worms, Maurice Benedict de.	1805-67.	Financier.
Worms, Baron Solomon de	1801-82.	Financier.
Ximenes, Sir Morris	b. 1762.	Financier.
Zangwill, Israel	b. 1864.	Man of letters.
Zangwill, Louis	b. 1869.	Novelist.
Zedner, Joseph	1804-71.	Hebraist.
Zimmer, N. L. D.	1831-95.	Hebraist and cabalist.
Zukertort, J. H.	1842-88.	Chess-player.

Population.

——**Present Conditions (Statistics):** It is possible to ascertain with some accuracy the Jewish population of London owing to the fact that statistics of Jewish deaths and marriages have been recorded with some completeness by the United Synagogue and the Board of Deputies for the last thirty years. To the information from these sources may be added the reports of the number of Jewish children attending the Jewish schools, given by Jacobs and Harris in successive issues of the "Jewish Year Book" with ever-increasing fulness. The following table gives these data at intervals of five years for the last thirty years:

Year.	Deaths.	Marriages.	School-Children.
1873	847	331	....
1878	985	377	....
1883	959	381	7,383
1888	1,129	589	....
1893	1,792	788	15,964
1898	1,765	1,096	19,442
1902	2,233	1,478	31,515

From the last-given data the number of Jews in London in the middle of 1902 can be ascertained with some degree of probability. The general death-rate of London for the year 1902 was 17.6 per thousand, but since the Jewish population is composed so largely (three-quarters as against one-half in the general London population) of young men and women of the most viable ages, 15-60, it is unlikely that the death-rate was higher than 15 per thousand (the same as that in the Jewish quarter of the borough of Stepney in 1901). This would give a Jewish population in London of 148,866 in 1902, an estimate which is confirmed by the number of marriages, 1,478, which, at 10 per thousand—a very high rate indeed—would give 147,800. The number of school-children, however, would point to an even higher total. Of these, 31,515, out of a total of 761,729, were in board and voluntary schools. If the proportion of school-children to population held with regard to the Jewish children as to the total population (4,536,541) within the school board area, this would imply a Jewish population of about 187,427. But these statistics are for a year later than that of the death-rate figures quoted above, and besides it is probable that more Jewish children are entered on the school-books, and more of those entered attend, than with the general population, so that the figures are somewhat misleading. Altogether it is likely that the Jewish population of London in the middle of 1902 was about 150,000, of whom at least 100,000 were in the East End of London, half of these being in the borough of Stepney ("Alien Immigration Commission," iii. 90). Of the remainder the majority are well-to-do residents in the Maida Vale, Bayswater, and Hammersmith districts, though subordinate ghettos have been created in Soho and Southwark. From the above-cited figures it would seem probable that the London Jewish population trebled during the years between 1883 and 1902. Part of this increase is doubtless due to the excess of births over deaths and to migration from the provinces, but at least 50,000 have been added by foreign immigration during that period, an average of 2,500 per annum.

Synagogues.

This increase has been met by a corresponding increase in the number of seat-holders in the London synagogues—2,289 in 1873; 3,397 in 1883; 5,594 in 1893; and 9,556 in 1902. Altogether there are 65 synagogues to meet the religious needs of the Jews of London; of these 15 belong to the **United Synagogue.** They are as follows, with the number of their seat-holders and their income for 1902, and are arranged in the order of their reception within the ranks of the United Synagogue:

Synagogue.	Total Income.	Seats Let.	Synagogue.	Total Income.	Seats Let.
Great	£2,923	437	New West End.	£4,613	320
Hambro'	489	200	Dalston	2,186	361
New	1,458	302	Hammersmith..	934	211
Bayswater	4.259	363	Hampstead.....	4,896	464
Central.........	3,710	350	South Hackney.	1,190	354
Borough........	794	178	Stoke Newington............	800	....
St. John's Wood	3.020	378			
East London....	1,202	353			
North London..	1,318	187	Total.......	£33,792	4,458

Charity.

Besides these there are 38 minor synagogues combined in the **Federation of Synagogues,** of which the chief are Cannon St. Road, London Chevra Torah, Sandy's Row, and West End Talmud Torah. Outside these two great associations stand the Spanish and Portuguese Congregation with its center at Bevis Marks, and the West London Synagogue of British Jews at Berkeley street (see Reform Judaism). Of the remaining 10 synagogues the most interesting is the Western, in St. Alban's place; it was founded in 1797 and was for a long time the only synagogue outside the "city." Altogether the expenditure of these 65 synagogues may be reckoned at something like £50,000 per annum, while besides these, there is a very large number of "hebrot" scattered throughout the Jewish quarter. Many London Jews, however, still remain unattached to any prominent synagogal organization, and for the chief holidays of the New-Year, in the autumn, a large hall in the East End is hired, where the services are attended by no less than 5,000 persons. A large proportion of the Jewish inhabitants of London makes use of one or other of the numerous charitable institutions. In 1883 the proportion was one-fourth (Jacobs, "Jewish Statistics," p. 14), though it is probably not so high at present. From 1895 to 1901 an annual average of 851 cases of foreigners arriving during the year applied to the Board of Guardians, or Russo-Jewish Committee ("Alien Immigration Commission," iii. 93). As a case includes on an average 3 persons, this would imply that nearly the whole of the 2,500 persons arriving during the year have reason to apply, for one cause or another, to the Board of Guardians. On the other hand, the assistance needed and given is often very slight, and the proportion of those who remain chronically connected with the charitable institutions is fairly small, probably not more than 5 per cent of the whole Jewish population.

Almost every need of a Jewish person from birth to burial is provided for by one or other of the metropolitan Jewish charities, of which the following is a classified list, with the amounts expended during the year 1902; in most cases dates of foundation are given in parentheses:

Free Religious Services	473	12	11			
Educational Institutions	996	3	4			
				6,617	13	4
Jewish contribution to Hospital Sunday Fund, 1903.				1,679	10	1
Total				£111,639	3	5

From this total should be deducted the figures of the loan department of the Board of Guardians and of the other loan societies, amounting to £22,338 15s. 5d., leaving a total expenditure of £89,300 8s. 0d. for the charity budget of the London Jewry in 1902, apart from private donations. Among such a large body of persons it is natural that a certain proportion of them should fall by the way, either from weakness or wickedness. Comparatively speaking, these are few in number. Only 1,909 found it necessary to apply for Poor-Law relief throughout London in 1901, at least four-fifths of these being merely applicants for medicine. Records have been kept of the number of Jewish inmates of public institutions in and around London for the last thirty years, from which may be compiled the following table showing the number received annually:

Defectives and Delinquents.

Year.	Asylums.	Hospitals.	Work-houses.	Prisons.	Reformatories.	District Schools.
1873	88	66	4	81	2	..
1878	46	383	12	186	3	2
1883	20	506	23	227	3	4
1888	48	776	78	247	4	1
1893	51	1,190	299	388	13	..
1898	106	1,609	351	514	20	2
1902	129	2,391	458	796	9	37

The prisoners were held mostly for minor offenses. Thus in 1902, while 796 were received, the maximum number of inmates at any one time was 233, showing that, in the majority of instances, they served very short sentences. As regards other undesirable qualities the Alien Immigration Commission recorded only 93 bankruptcies among alien Jews in the London district during the three years ending March 31, 1903 ("Report," i. 835).

Education.

Nine-tenths of all the Jews who reside in London send their children to the ordinary public schools, one-third of these going to the voluntary and the remainder to the Board schools. The chief Jewish voluntary schools are given in the following list, with the number attending them in 1903:

School.	Boys.	Girls.	Infants.	Total.
Jews' Free School...	2,289	1,310	.....	3,599
Infant schools.......	.....	.....	1,727	1,727
Stepney Jewish......	406	271	182	859
Bayswater Jewish...	135	95	81	311
Westminster Jewish.	315	322	.....	637
Norwood Asylum....	150	132	30	312
Deaf and Dumb	25	16	.....	41
South London	109	72	53	234
Thrawl Street	.....	153	170	323
Hayes Industrial	57	.....	.....	57
Total............	3,486	2,371	2,243	8,100

Of the children attending the Jewish voluntary schools about one-fifth were born abroad, one-eighth in England of native parents, and the rest were born in England of foreign parents. The greatest of Jewish schools is the Jews' Free School, Bell lane, one of the largest institutions of its kind in the world. The total expenditure of these schools is about £52,000 per annum. Quite a large majority of Jewish children in London go to other than purely Jewish schools, the proportion being shown by the following table:

School.	Boys.	Girls.	Infants.	Total.
Board schools.......	6,189	6,416	8,741	21,346
Voluntary schools (Jewish)..........	3,486	2,371	2,243	8,100
Voluntary schools (non-Jewish)......	.....	.....	.....	2,069
Total............				31,515

In addition English instruction for adult Russian refugees is provided by the English evening classes in connection with the Russo-Jewish Committee.

Social Institutions.

A somewhat higher grade of educational effort is indicated by the many social clubs and institutions intended to link together Jewish lads and young men. The central body of this kind is the Jewish Workingmen's Club, Great Alie street, Aldgate, founded in 1872. As a preparation for this there are a certain number of clubs for Jewish working boys, the chief of which is the Brady Street Club, founded in 1896. There are similar clubs for girls—the Jewish Girls' Club, founded in 1886, and the West Central Jewish Girls' Club, founded in 1887.

For specifically Jewish instruction the provision in London is somewhat small. Each division of the community has a bet ha-midrash, the Sephardic institution of that name being instituted as far back as 1664. The Ashkenazic institution is under the auspices of the United Synagogue, and the present building was opened in 1876. Local institutions of a similar character exist in North and Northeast London. The Jews' College still remains the center of Jewish learning in London, though large provision is now made for more popular lectures and instruction by the Jewish Study Society and its various offshoots, which are combined in the Union of Jewish Literary Societies, founded in 1902.

Occupations.

It is impossible to give any full account of the occupations of London Jews, but in the census of 1901 there is a list of occupations of Russians and Poles in London, which at any rate enables the statistician to determine the most popular occupations among the least-favored individuals of the London Jewry. It is as follows:

			Males.	Females.
Total..			28,574	24,863
Under ten years	1,927	1,959		
Over " "	26,647	22,904		
Of whom earn their living..	24,164	5,358		
Clothing trades..................................			14,666	3,698
Tailors......................	10,070	2,603		
Women's tailors............	36	454		
Capmakers..................	707	214		
Furriers....................	319	167		
Shoemakers	2,890	120		
Slipper-makers	150	6		
Miscellaneous	494	134		
Furniture trades..................................			2,550	12
Cabinet-makers.............	1,894	4		
Polishers	55	1		
Carpet-makers..............	135	..		
Turners	220	2		
Miscellaneous	246	5		
Painters			226	1
Carpenters			210	..
Watchmakers.......................................			158	1
Goldsmiths...			143	..
Tobacco-workers....................................			342	331
Tobacco-dealers....................................			150	12
Workers and dealers in food produce............			1,322	177
Pedlers..			464	69
Tradespeople			609	44
Travelers..................	313	16		
Agents	163	25		
Others	133	3		
Teachers...			219	26
Servants...			16	554
Barbers (probably not Jewish)..................			519	14
Others...			2,570	1,729

With regard to the classes which have been longest settled in the country, the proportions, though probably not the numbers, of those employed in the various occupations are not likely to be much different from the estimate made in 1883 and given above.

Friendly and Benefit Societies.

A large number of societies for mutual assistance exist in the London Jewry, no less than 140 being recorded in the last issue of the "Jewish Year Book," besides many separate branches of the larger orders, like the Grand Order of Israel, the Ancient Order of Mount Sinai, the Hebrew Order of Druids, the orders Achei Ameth and Achei Berith, and the Order of Ancient Maccabæans. In addition, most of the ḥebrot are also benefit societies, and there have existed altogether about 39 Jewish trade-unions in London (see Halpern, "Die Jüdischen Arbeiter in London," pp. 66-68). Many of these latter, however, exist only for a short time, and occasionally are created simply for the purposes of a strike. The most prominent of them appear to be the United Ladies' Tailoresses, founded in 1891, and the Independent Cabinet Makers' Association, founded in 1895. The aim of Jewish workmen to become masters on their own account seems to stand in the way of their becoming trade-unionists.

Zionism.

London is one of the chief centers of Zionism, which was taken up with great enthusiasm. It is the seat of THE JEWISH COLONIAL TRUST, and the Fifth Zionist Congress was held there. Of Zionist societies, 23 exist there, besides the English Zionist Federation, of which Sir Francis Montefiore is the president. No less than 51 Zionists' share clubs exist in London to enable Zionists of small means to become shareholders in the Jewish Colonial Trust.

——**Typography:** The earliest Hebrew printing in the city of London was done by Christian printers, the first book being an edition of the Psalms in four languages which appeared in London in 1643. Steinschneider suggests that the Hebrew was printed from incised wooden blocks. The printer's name was Thomas Harper. An edition of Abot with punctuated text was published at London in 1651, the printing being done by Thomas Roycroft, who appears also to have printed the Walton polyglot of 1653–57. The first book printed for and by a Jew in London appears to have been the "Urim we-Tummim" by Uri Phoebus (1707). It is doubtful whether Johanan ben Isaac's attack upon this work was printed in London; the continuation was certainly done in Amsterdam. The Christian printer Thomas Ilive printed a few Hebrew works, among others the "Maṭṭeh Dan," 1715, of David Nieto. Similarly, about 1770, three Jews, Isaac ben Jedidiah, Moses ben Gershon, and Jacob Cohen, published a certain number of works printed by William Tooke. The first regular printer and publisher may be regarded as David ben Mordecai Levi (1794–99), though previous to this the ALEXANDERS had begun their series of prayer-books (from 1770 onward), to be succeeded by the Valentines, who have published most of the rituals of the London community. For a long period the firm of Wertheimer, Lea & Company published most books in London requiring Hebrew type, apart from the Bible and the books of the conversionist societies. Filipowski may be here mentioned as having had printed the various works he edited in new and very clear though small type, in the middle of the nineteenth century.

J.

LONDON COMMITTEE OF DEPUTIES OF BRITISH JEWS (more commonly **London Board of Deputies**): A body formed to safeguard the interests of British Jews as a religious community. It can be traced to a committee called "The Committee of Diligence," which committee was formed to watch the progress through the Irish Parliament, in 1745, of the bill for Jewish naturalization. After the rejection of the Naturalization Bill of 1753, and on the accession of George III. in 1760, "deputados of the Portuguese nation" were appointed to attend court and express the loyalty of the British Jews, which they did on Nov. 19, 1760. The German, or "Dutch," Jews were not formally represented on the committee, but arrangements were made by which they should cooperate in important cases. The board was established to protect the interests of British Jews not only in the British Isles, but in the colonies. It was appealed to from Jamaica in 1761 and from the Balearic Isles in 1766. Meetings were held sporadically in 1778 and 1789. In the latter year Moses I. Levi was elected as president, and in 1812 the German members of the board became regularly connected with it. The deputies watched over all the legislation relating to marriages, labor laws, and other matters which might affect Jews prejudicially, and aided considerably in the struggle for Jewish emancipation. In 1835 Sir Moses Montefiore was elected president, and he remained in that office until his death, being supported by Sampson Samuel as secretary (appointed 1838), and later by Lewis Emanuel (d. 1898), who was succeeded by his son Charles, the present (1904) secretary. The committee took an active part in the Damascus Affair as well as in the early struggle for Reform; as president, Sir Moses, throughout his incumbency of the office, vetoed every attempt at opposition on the part of the representatives from the West London Synagogue.

Beginning in 1838, attempts were made to get the provincial congregations to appoint representatives on the board, with varying but on the whole increasing success, the arrangement generally being for the provincial congregation to select as its representative a London resident—if possible, one of the congregation who had settled in London. The board had much to do with the foundation of the Morocco Fund as well as of the Rumanian Committee, but since the formation of the Anglo-Jewish Association in 1871 it has worked conjointly with that body wherever any communication with the Foreign Office or with a foreign government is concerned. It helped also to found the Russo-Jewish Committee in 1882. The elections are held triennially, the latest occurring in May, 1904, when sixty-five deputies were selected, thirty-one from eighteen metropolitan synagogues, thirty-two from provincial synagogues, and two from colonial congregations. The expenses are borne pro rata by the various synagogues and congregations.

LONDON, JACOB BEN JUDAH ḤAZZAN: English scholar; born in London at the beginning of the eighteenth century. When quite young he went to Amsterdam, where he lived for a long time. Later he traveled through Italy, and in the course of his journey had the misfortune to be taken for a spy, on account of the numerous papers—the contents of which were unintelligible to the police—he had with him.

London was the author of an ethical work entitled "Hista'arut Melek ha-Negeb 'im Melek ha-Ẓafon" (Amsterdam, 1737); the work is explained by two accompanying commentaries, "Sinai" and "Boẓeẓ," the former being a general interpretation of the text, the latter containing definitions of the difficult words. London was also the editor of the "Shib'ah 'Enayim" (Leghorn, 1745), containing editions of various works by Naḥmanides, Aboab Isaac de Leon, and Abraham Bolat.

LONDON, SOLOMON B. MOSES RAPHAEL: Russian author and publisher; lived at Novogrudok, Lithuania, in the first half of the eighteenth century. He was the pupil of Samuel Schotten, rabbi at Frankfort-on-the-Main. He edited the following works: "Zoker ha-Berit," on the rite of circumcision (Amsterdam, 1710?); the "Ẓeri ha-Yagon" of Shem-Ṭob ibn Falaquera (Hanau, 1716); "Maṭṭeh Mosheh," by Moses b. Abraham Mat, rabbi of Przemysl (Frankfort-on-the-Main, 1720); "Minḥah Ḥadashah," on the Pirḳe Abot, containing extracts from Rashi, Maimonides, and the "Pirḳe Mosheh" and "Leb Abot" of Michael Moraftschek (*ib.* 1722); "Tiḳḳun Shelomoh," the order of Sabbath prayers according to Isaac Luria (Venice, 1733; Amsterdam, 1775; Dyhernfurth, 1806); "Orḥot Ẓadiḳim," with a Judæo-German translation (Amsterdam, 1735); the "Agur" of Jacob Landau (Offenbach, 1738); "Ḳehillat Shelomoh," a collection of rites, prayers, and "dinim," with a small Hebrew and Judæo-German vocabulary under the title "Ḥinnuk Ḳaṭan" (Amsterdam, 1744; Frankfort-on-the-Oder, 1799; Hanover, 1830); the "Sefer ha-Gan," moral exhortations of Judah Ḥasid, and the "Hadrakah" of Johanan Luria (Fürth, 1747).

LONG BRANCH. See NEW JERSEY.

LONGO, SAADIA BEN ABRAHAM: Turkish Hebrew poet; lived at Constantinople about the middle of the sixteenth century. A manuscript in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1986) contains a collection of Longo's poems on various subjects; letters written by him to contemporary scholars and by them to him; a poetical correspondence between Longo and David Onkeneira; and a paper entitled "Naḥal Ḳedumim," in prose interspersed with verse in which occur 1,000 words beginning with א, an arrangement similar to that which was followed in the "Elef Alfin" of Ibn Laṭimi.

Some of Longo's dirges were published under the title "Shibre Luḥot" (Salonica, 1594). To them is prefixed a chronicle of Jewish writers and their works, entitled "Seder Zemannim." Longo wrote, besides, poems on many works of his contemporaries; these poems are printed at the beginning of the works to which they refer.

G. M. SEL.

LONZANO, ABRAHAM BEN RAPHAEL DE: Austrian grammarian; lived at the beginning of the eighteenth century. He was baptized at Idstein and took the name of **Wilhelm Heinrich Neumann.** His Hebrew grammar, "Ḳinyan Abraham," was published in Zolkiev in 1723 (De le Roi, "Die Evangelische Christenheit und die Juden," i. 93; Steinschneider, "Cat. Bodl." col. 699).

T. M. SC.

LONZANO, MENAHEM BEN JUDAH BEN MENAHEM DE: Palestinian Masoretic and midrashic scholar, lexicographer, and poet; died after 1608 in Jerusalem. His nativity is unknown, but it has been supposed that he was born in Italy. According to Jellinek, who identified Lonzano (לונזאנו or לונצאנו) with Longano, a seaport of Messenia, his home was Greece; it may, however, have been Longono, a port of Tuscany near Leghorn. In early childhood Lonzano lost both father and mother, and throughout his entire life he was haunted by poverty, care, and sickness ("Shete Yadot," p. 81a).

Poverty and Travels.

In his youth he went to Jerusalem and married there, but in consequence of the treachery of one of his friends, Gedaliah Cordovero, he was compelled to leave the city; he went to Constantinople, where he enjoyed the hospitality of a certain Solomon ("Ṭobah Tokaḥat," pp. 140, 148).

There also he met Samuel di Modena, whom he calls "teacher," and under whom he studied for some time (Conforte, "Ḳore ha-Dorot," p. 44a). From Constantinople he returned to Jerusalem: he was compelled to travel continually to earn his bread. In old age, again driven by poverty, he returned to Italy, having spent altogether about forty years of his life in Jerusalem. Though paralyzed in both feet and with the sight of one eye entirely lost, he preached twice in an Italian synagogue and gave the community cause to marvel at his unusual knowledge of midrashic literature. A fund was raised by the congregation to support him and to enable him to return to Jerusalem, and a petition was sent to a wealthy man asking him for a generous contribution. This letter (Mortara, No. 12) has been published by David Kaufmann ("J. Q. R." viii. 525 *et seq.*). Lonzano died in the outskirts of Jerusalem and was buried there (comp. "Shibḥe Yerushalayim," p. 3a; "Ḥibbat Yerushalayim," p. 42b; Luncz, "Jerusalem," i. 115).

Lonzano had three children; a son, Adonikam, died at an early age. He was the father-in-law of the historian David Conforte ("Ḳore ha-Dorot," *l.c.*); Lonzano of Florence (1716), author of a responsum mentioned in "Shemesh Ẓedaḳah" (i., No. 15, p. 27a), may be one of his descendants (Landshuth, "'Ammude ha-'Abodah," p. 184).

Lonzano's first work, composed and printed in his youth, probably in Constantinople about 1572, contains "Derek Ḥayyim," a moral poem of

315 verses; "Pizmonim u-Baḳḳashot," hymns and prayers; and "'Abodat Miḳdash," a poetical description of the daily sacrifice in the Temple (comp. Steinschneider, "Cat. Bodl." col. 1728).

He wrote commentaries to most of his poems; this was, indeed, often necessary on account of the obscurity of his verses, especially where they are cabalistic in content and employ the cabalistic terminology. He generally indicates the meters of the piyyuṭim, many of which were set to Arabic melodies because these, the author thought, were better adapted, on account of their melancholy, to arouse feelings of devotion and humility ("Shete Yadot," p. 65b); or, as he says farther on in the same work (p. 142a), because they sound more solemn than any others. He is well aware of the fact that high authorities objected to the use of foreign melodies for religious hymns, but he does not share their view, although he objects most strongly to the practise of imitating the sound of foreign words by means of Hebrew assonants. He condemns, for instance, "Shem Nora," imitating the title of the Italian song "Seniora"; and he felt compelled to declare solemnly before God and Israel that he used foreign terms only to praise the Lord and not for profane or frivolous purposes (*ib.* p. 122a).

From the point of view of literary history the passage in "Shete Yadot" (p. 137b) in which he names those payyeṭanim he preferred is valuable. He considers a good religious poem one that would cheer and gladden him while it would also make him weep; that would break the haughtiness of his heart and inspire him with love for God (comp. Sachs, "Die Religiöse Poesie der Juden in Spanien," p. 257). Although his own poems display little taste or beauty, the cabalists were fond of quoting them, and some of his piyyuṭim became part of the Sephardic Maḥzor (comp. Maḥzor Sefarad for "Shalosh Regalim," ed. Vienna, 1836, pp. 21–22; Reubens, "Catalogue Ḥesheḳ Shelomoh," p. 83, No. 573, Amsterdam, 1857; Landshuth, "'Ammude ha-'Abodah," p. 181).

Lonzano called his chief work "Shete Yadot" (= "Two Hands"; Venice, 1618), taking the title from Ex. xxvi. 17; and, keeping to the same figure, he divided these two "hands" into five "fingers" ("eẓba'ot") each. The five fingers of the first part, called "Yad 'Ani" ("Hand of the Poor"; comp. Ezek. xvi. 49), are severally entitled "Or Torah," "Ma'arik," "'Abodat Miḳdash," "Derek Ḥayyim," and "Ṭobah Tokaḥat."

Masorah.

(1) "Or Torah," Masoretic studies, and emendations of the Masoretic text of the Pentateuch. For this he used old Pentateuchal manuscripts, from which he took much valuable material not found in other sources. He possessed some very valuable unprinted midrashim, among them some which even the author of the 'Aruk and of the Yalḳuṭ had never seen. To aid him in collecting his splendid library his friends wrote to the communities of Jerusalem, Aleppo, and Damascus, and he obtained books from those cities. An illustration of Lonzano's scientific spirit is found in the passage in which he says: "I have made this correction on the strength of ten or more manuscripts, not one of which could be copied [now] for 100 ducats, and some of which are more than five or six hundred years old, namely: the 'Massoret Seyag la-Torah' of Meïr ben Todros ha-Levi Abulafia (a manuscript of the Masorah), the 'Ḳiryat Sefer' of Meïri, the ''Eṭ Sofer' of David Ḳimḥi, the 'Shemen Sason,' and various others. Accordingly, if any one is in doubt as to the reading of any passage in the Bible, with God's help I will resolve his perplexity, especially if I am at home." Lonzano could not endure the thought that this scientific material was lying idle or that it might perish with him. He therefore determined to publish the book, even at an expense of a hundred ducats for printing, although he was well aware that he was acting cruelly toward his needy family in Jerusalem, to which he could send no money. The "Or Torah" was afterward published separately (Amsterdam, 1659; Hamburg, 1738; Berlin, 1745; Zolkiev, 1747; see Benjacob, "Oẓar ha-Sefarim," p. 28).

Lexicography.

(2) "Ma'arik," explanations in alphabetical order of foreign words in the Talmuds, the Midrashim, and the Zohar. His knowledge of Arabic and Greek, gained during his toilsome journeys, proved of great service in his philosophical investigations. In the introduction to this part he speaks, not without humor, of his new method of treating these loan-words and of the way he came to adopt it. Thus Lonzano actually reintroduced into lexicography the rational, scientific spirit of the old, classic Hebræo-Arabic philologists, despite the opposition of his contemporaries and against the authority of old, recognized teachers, including even the author of the 'Aruk. The summary of the "Ma'arik" by Philippe d'Aquin, the author of the lexicon "Ma'arik ha-Ma'areket" (Paris, 1629), like the whole of the work "Shete Yadot," is as valuable as it is rare. It has been published in modern times by A. Jellinek (Leipsic, 1853), and is printed in the Lemberg edition of the 'Aruk of Nathan ben Jehiel of Rome under the title "Arba'ah Sefarim Niftaḥim" (1857).

(3) The "'Abodat Miḳdash" and (4) "Derek Ḥayyim" are reprints, with additions, from his first work, mentioned above; the "'Abodat Miḳdash" was published also by Judah Perez in his collection "Sha'are Raḥamim" (Venice, 1710), by Jacob Emden (Leghorn, 1767), by Azriel of Wilna (Fürth, 1726), and at Venice at the end of the sixteenth century (see Fürst, "Bibl. Jud." ii. 256; Zedner, "Cat. Hebr. Books Brit. Mus." p. 528).

(5) "Ṭobah Tokaḥat," didactic poems, written at the house of Solomon, his patron in Constantinople. These are largely borrowed from a collection of short moral proverbs, entitled "Sefer Toẓe'ot Ḥayyim," by a certain Moses ben Nathanael ibn Solomon.

The second part of the "Shete Yadot," called "Yad ha-Melek," and also divided into five "fingers," is a collection of old midrashic works, some of which appeared here for the first time; others afforded more complete and correct texts than any previously known. Lonzano himself, on account of lack of money, could print only: (1) "Haggadat Bereshit"; of the remaining four "fingers" of the "Yad ha-Melek," (2) "Midrash Agur" was published, according to Benjacob ("Oẓar ha-Sefarim,"

p. 299), in 1626, at Safed or Kefar 'Ain Zeitun; but Steinschneider ("Cat. Bodl." col. 1778) denies that it ever appeared in print. The other three "fingers" exist only in manuscript: (3) "Tanna debe Eliyahu"; (4) "Abot de-Rabbi Natan," "Masseket Derek Erez," "Otiyyot de R. Akiba"; (5) "Sefer ha-Tashlumin," containing the remaining portions of Genesis Rabbah, and supplements to Midrash Yelammedenu, Sifra, Sifre, and Tanḥuma.

Lonzano wrote also: "'Adi Zahab," glosses to the "Lebush" of Mordecai Jaffe (see Azulai, "Shem ha-Gedolim," ii. 106); "Imre Emet," notes on Ḥayyim Vidal's Cabala; "'Omer Man," commentary on Idra Zuṭa, a part of the Zohar, published with a refutation by Naphtali ben David (Amsterdam, 1729); and lexicographical observations on the Yerushalmi (published by S. Buber in "Ha-Asif," ii. 320 *et seq.*).

Characterization.

In spite of physical infirmities, Lonzano was an eager combatant, and not only defended his own conclusions with energy, but also aggressively attacked both his predecessors and his contemporaries. At the same time he always felt conscious that their worth was as far above his as the "heaven is above the earth" ("Shete Yadot," p. 83). He assails the author of the midrashic commentary "Mattenat Kehunnah," attacks Israel ben Moses Najjara on account of blasphemous illustrations and expressions in his "'Olat Ḥodesh," disputes with Abraham Monson concerning Vidal's Cabala, with Solomon Norzi concerning the Masorah, and with others. It can easily be understood that in his single-minded devotion to the truth, "to which all owe the highest regard" ("Shete Yadot," p. 81b), Lonzano made many personal enemies. In only one respect does he seem to have been in harmony with the spirit of the time, and that was in his love for the Cabala and his hostility toward philosophy.

LOOKING-GLASS. See Mirror.

LOPEZ: A family of Sephardic Jews several of whom were distinguished for scholarly attainments.

Eliahu Lopez: Dutch ḥakam of the seventeenth century. He received his rabbinical education, together with Isaac Nieto and others, in the Yeshiba de los Pintos at Rotterdam, and then at Amsterdam, in which city he was for some years ḥakam. At the dedication of the large synagogue he delivered an oration, which was printed together with the other orations delivered on that occasion. While still a young man Lopez went as ḥakam to Barbados.

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.* p. 64; *idem*, in *Publ. Am. Jew. Hist. Soc.* iii. 19.

Isaac Lopez: Ḥakam at Amsterdam. He issued a new and revised edition of Aboab's "Nomologia" (Amsterdam, 1727).

Isaac Henriquez Lopez: Haham in London at the beginning of the eighteenth century. At the inauguration of the society known as "Sahare Ora Vaawi Yethomim" he delivered a discourse which was printed under the title "Oracion . . . Que se Hizieron en la Celebridad de la Fundacion de la Santa y Pia Hermandad de Sahare Ora Vaawi Yethomim" (London, 1703).

G. M. K.

LOPEZ, SIR MANASSEH MASSEH: English politician; born in Jamaica Jan. 22, 1755; died at Maristow House, Devonshire, 1831; descended from ancient Sephardic stock. Both he and his father, Mordecai Rodriguez Lopez, became converts to Christianity in 1802. In the same year Manasseh Lopez was returned to Parliament as member for New Romney, and was created a baronet Oct. 5, 1805, with remainder to his nephew Ralph Franco. At the next election Lopez secured a seat for Barnstaple, for which borough he was again returned in 1818. On March 18, 1819, he was found guilty of having bribed the electors of the borough of Grampound to secure his election, and on conviction was sentenced to two years' imprisonment with a fine of £1,000 ($5,000). On Nov. 13 he was again prosecuted for a similar offense, and on conviction was sentenced to another fine and term of imprisonment. Notwithstanding this, Lopez was once more returned to Parliament, in 1823, as member for the borough of Westbury. He was re-elected in 1826, but resigned to make room for Sir Robert Peel, who had been rejected at Oxford University.

Subsequently Lopez filled the office of recorder of Westbury, in addition to being a magistrate for two counties.

J. G. L.

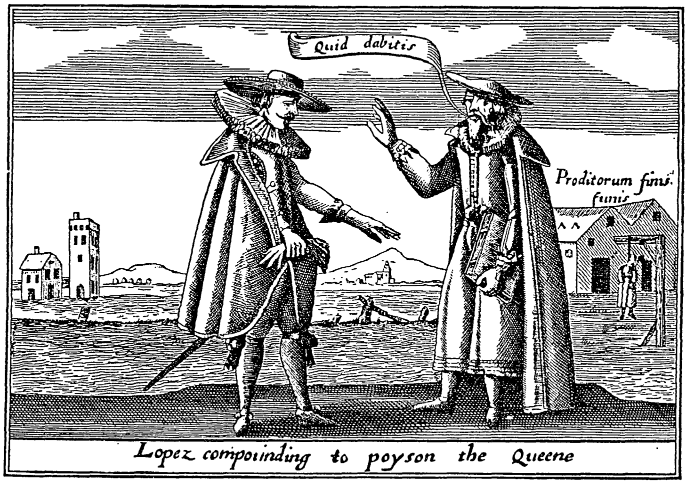
LOPEZ, RODRIGO: Court physician to Queen Elizabeth; born in Portugal about 1525; executed June 7, 1594, for having attempted to poison the queen. He settled in London in 1559, and in 1571 was residing in the parish of St. Peter le Poer. Previous to this he had become a member of the College of Physicians, and was selected in the last-mentioned year to read the anatomy lecture at the college—an honor which he declined. Before 1584 he had become body-physician to the Earl of Leicester; and he was accused of assisting that nobleman in removing some of his enemies by poison. Two years later he became chief physician to Queen Elizabeth, who in 1589 granted him the monopoly of importing aniseed and sumac into England.

Relations with Don Antonio.

At court Lopez became acquainted with the Earl of Essex, and was thus brought into relations with Don Antonio, the pretender to the crown of Portugal, and with Antonio Perez, the discharged secretary of Philip II. He assisted them in inducing the queen to permit the attempted invasion of Portugal in 1589, and suffered some loss of influence through its failure. An indiscreet revelation of some of Essex's ailments set that nobleman against him; and about 1590 Lopez began intriguing against Antonio with the court of Spain, at first with the connivance of Walsingham, who hoped through Manuel de Andrada, one of Lopez's adherents, to obtain useful information of Spanish projects. Andrada brought back a diamond and ruby ring worth £100 as an earnest of the reward Lopez would get if he removed Don Antonio. Lopez offered the ring to the queen, who refused it, presumptive evidence, according to Major Hume, that she knew it came from Philip II. Later on, the ring was used as evidence of Lopez's designs against the queen.

His Execution.

In Oct., 1593, one Esteban de Gama was seized in Lopez's house on a charge of conspiring against Don Antonio; and shortly afterward a person named Gomez d'Avila was likewise seized on landing at Dover. He proved to have mysterious correspondence relating to "the price of pearls" and to musk and amber, and to be in some relation with Lopez. A third conspirator, Ticino, was induced to come over from Brussels with an invalid safe-conduct. By confronting the prisoners some evidence was elicited leading to the conclusion that the "price of pearls" referred to a plot against the queen, in which Lopez was implicated. He was seized and examined by the Earl of Essex, who failed, however, to find any definite cause for suspicion. Later, confessions of the minor conspirators led to Lopez being put on the rack, where he confessed to having entertained suggestions as to poisoning the queen for the sum of 50,000 ducats, but, as he alleged, merely with the design of cozening the King of Spain and of getting as much money out of him as possible. This excuse was not accepted; and, after lingering some time in the Tower, he, with D'Avila and Ticino, was hanged, drawn, and quartered as a traitor, declaring with his last breath amid the derision of the spectators that he loved the queen as well as he loved Jesus Christ.



Quid dabitis
Proditorum finis
funis
Lopez compounding to poyson the Queene

Lopez Conspiring to Poison Queen Elizabeth.
(From Carleton's "Thankful Remembrances," 1624.)

His trial created a great sensation at the time. References are made to it in Marlowe's "Faustus," Dekker's "Whore of Babylon," and Middleton's "Game at Chess"; while it has been suggested by Sidney Lee that he was the original *Shylock* in "The Merchant of Venice," a version of which appears to have been put on the stage about two months after Lopez's execution. The fact that Shakespeare was on the side of the Earl of Essex, and that *Antonio* is adopted as the name of the hero, lends some plausibility to this suggestion. See Shylock.

Historians are divided as to the exact amount of criminality involved in Lopez's connection with Spanish plots. Dimock ("English Historical Review," 1894, pp. 440-472) denies his innocence on the ground that he kept the negotiations secret. Major Hume ("Treason and Plot," pp. 115-152, New York, 1901) considers his guilt unproved, as he had been permitted to make similar false suggestions with the connivance of Walsingham in 1590.

LOPEZ-LAGUNA. See Laguna.

LOPEZ ROSA: Portuguese Marano family of Lisbon, which owned a printing establishment there in 1647.

Duarte Lopez Rosa: Physician; born at Beja. Duarte was condemned by the Inquisition at Lisbon (Oct. 10, 1723) as an adherent of Judaism.

Moses Duarte Lopez Rosa: Physician and poet of the seventeenth century; born at Beja, stayed for a time at Rome, and then settled in Amsterdam, where in 1680 he openly professed Judaism, taking the name of Moses. He was a member of the Akademia de los Floridos at Amsterdam. Especially attached to the Portuguese royal couple, he addressed sonnets and a longer poem to the royal bride elect, a princess of Neuburg, and to the bridesman, D. Manuel Telles da Silva; and some years later he wrote a pæan on the birth of an infante.

The published works of Lopez Rosa include: "Alientos de la Verdad en los Clarines de la Fama," etc., Amsterdam, 1688; "Soneto Dedicado a la . . . Princeza de Neuburgo D. Maria Sofia, Agora Rainha de Portugal, em Sua Felice União com el Rey D. Pedro II." n.d., n.p.; "Soneto ao exc. Senhor Principe Senescal de Ligue," n.d., n.p.; "Panegyrico Sobre la Restauracion de Inglaterra en la Coronacion de las Magestades de Guillelmo III. y Serª Maria por Reyes de la Gran Bretaña," *ib.* 1690; "Elogios ao Felice Nacimiento do Infante de Portugal, Filho de D. Pedro II. e de D. Maria Sofia," *ib.* 1691. The following remained unprinted: "Luzes de la Idea y Academicos Discursos Que Se Proposieron en la Ilustre Academia de Amsterdam en el Año de 1683, Intit. Los Floridos de la Almendra, con Otros Flores del Ingenio"; and "Novellas Espanholes."

Simon Lopez Rosa (called also **Abraham Farrar**): Physician, and director of the oldest Spanish-Portuguese congregation (Bet Ya'aḳob) in Amsterdam; died Dec. 14, 1618 (his wife died nine days later). He was not an orthodox Jew. He spoke slightingly of the Haggadah and the Cabala, and converted many members of the community to his liberal views. A precursor of Uriel Acosta, Lopez Rosa opposed the rulings of the Rabbis, thus occasioning a quarrel in the congregation, which led to the founding in 1618 of a new congregation (Bet Yisrael). R. Joel Sirkes of Brest-Litovsk, to whom the rabbis of Amsterdam carried the case, advised them to excommunicate Lopez Rosa.

G. M. K.

LORD'S PRAYER, THE: Name given by the Christian world to the prayer which Jesus taught his disciples (Matt. vi. 9-13; Luke xi. 1-4). According to Luke the teaching of the prayer was suggested by one of Jesus' disciples who, on seeing him holding communion with God in prayer, asked him to teach them also to pray, as John the Baptist had similarly taught his disciples a certain form of prayer. Obviously, then, the latter was of a similar character. From the Talmudic parallels (Tosef., Ber. iii. 7; Ber. 16b-17a, 29b; Yer. Ber. iv. 7d) it may be learned that it was customary for prominent masters to recite brief prayers of their own in addition to the regular prayers; and there is indeed a certain similarity noticeable between these prayers and that of Jesus.

As the following extracts from the Revised Version show, the prayer in Luke is much shorter than that in Matthew, from which it differs, too, in expression. Possibly both were in circulation among the early Christians; the one in Matthew, however, is of a later origin, as is shown below:

Matthew.	Luke.
Our Father which art in heaven, Hallowed be thy name.	Father, Hallowed be thy name.
Thy Kingdom come. Thy will be done, as in heaven so on earth.	Thy Kingdom come.
Give us this day our daily [Greek: apportioned or needful] bread.	Give us day by day our daily [apportioned] bread.
And forgive us our debts, as we also have forgiven our debtors.	And forgive us our sins; for we ourselves also forgive every one that is indebted to us.
And bring us not into temptation, but deliver us from the evil one. [Addition in many manuscripts: For thine is the kingdom, and the power, and the glory, for ever. Amen.]	And bring us not into temptation.

The prayer is a beautiful combination or selection of formulas of prayer in circulation among the Hasidæan circles; and there is nothing in it expressive of the Christian belief that the Messiah had arrived in the person of Jesus. On the contrary, the first and principal part is a prayer for the coming of the kingdom of God, exactly as is the Ḳaddish, with which it must be compared in order to be thoroughly understood.

Original Form and Meaning.

The invocation "Our Father" = "Abinu" or Abba (hence in Luke simply "Father") is one common in the Jewish liturgy (see Shemoneh 'Esreh, the fourth, fifth, and sixth benedictions, and comp. especially in the New-Year's ritual the prayer "Our Father, our King! Disclose the glory of Thy Kingdom unto us speedily"). More frequent in Hasidæan circles was the invocation "Our Father who art in heaven" (Ber. v. 1; Yoma viii. 9; Soṭah ix. 15; Abot v. 20; Tosef., Demai, ii. 9; and elsewhere: "Yehi raẓon mi-lifne abinu she-ba-shamayim," and often in the liturgy). A comparison with the Ḳaddish ("May His great name be hallowed in the world which He created, according to His will, and may He establish His Kingdom . . . speedily and at a near time"; see Baer, "'Abodat Yisrael," p. 129, note), with the Sabbath "Ḳedushshah" ("Mayest Thou be magnified and hallowed in the midst of Jerusalem . . . so that our eyes may behold Thy Kingdom"), and with the "'Al ha-Kol" (Massek. Soferim xiv. 12, and prayer-book: "Magnified and hallowed . . . be the name of the supreme King of Kings in the worlds which He created, this world and the world to come, in accordance with His will . . . and may we see Him eye to eye when He returneth to His habitation") shows that the three sentences, "Hallowed be Thy name," "Thy Kingdom come," and "Thy will be done on earth as in heaven," originally expressed one idea only—the petition that the Messianic kingdom might appear speedily, yet always subject to God's will. The hallowing of God's name in the world forms part of the ushering in of His kingdom (Ezek. xxxviii. 23), while the words "Thy will be done" refer to the time of the coming, signifying that none but God Himself knows the time of His "divine pleasure" ("raẓon"; Isa. lxi. 2; Ps. lxix. 14; Luke ii. 14).

The problem for the followers of Jesus was to find an adequate form for this very petition, since they could not, like the disciples of John and the rest of the Essenes, pray "May Thy Kingdom come speedily" in view of the fact that for them the Messiah had appeared in the person of Jesus. The form reported to have been recommended by Jesus is rather vague and indefinite: "Thy Kingdom come"; and the New Testament exegetes explain it as referring to the second coming of the Messiah, the time of the perfection of the kingdom of God (comp. Luke xxii. 18). In the course of time the interpretation of the sentence "Thy will be done" was broadened in the sense of the submitting of everything to God's will, in the manner of the prayer of R. Eliezer (1st cent.): "Do Thy will in heaven above and give rest of spirit to those that fear Thee on earth, and do what is good in Thine eyes. Blessed be Thou who hearest prayer!" (Tosef., Ber. iii. 7).

The rest of the prayer, also, stands in close relation to the Messianic expectation. Exactly as R. Elie-

Relation to Messianic Expectation.

zer (Mek.: "Eleazar of Modin") said: "He who created the day created also its provision; wherefore he who, while having sufficient food for the day, says: 'What shall I eat to-morrow?' belongs to the men of little faith such as were the Israelites at the giving of the manna" (Mek., Beshallaḥ, Wayassa', ii.; Soṭah 48b), so Jesus said: "Take no thought for your life, what ye shall eat or . . . drink. . . . . O ye of little faith. . . . Seek ye first the Kingdom of God, . . . and all these things shall be added to you" (Matt. vi. 25-34; Luke xii. 22-31; comp. also Simeon b. Yoḥai, Mek. *l.c.*; Ber. 35b; Ḳid. iv. 14). Faith being thus the prerequisite of those that wait for the Messianic time, it behooves them to pray, in the words of Solomon (Prov. xxx. 8, Hebr.; comp. Beẓah 16a), "Give us our apportioned bread" ("leḥem ḥuḳḳi"), that is, the bread we need daily.

Repentance being another prerequisite of redemption (Pirḳe R. El. xliii.; Targ. Yer. and Midr. Leḳaḥ Ṭob to Deut. xxx. 2; Philo, "De Execrationibus," §§ 8-9), a prayer for forgiveness of sin is also required in this connection. But on this point special stress was laid by the Jewish sages of old. "Forgive thy neighbor the hurt that he hath done unto thee, so shall thy sins also be forgiven when thou prayest," says Ben Sira (Ecclus. [Sirach] xxviii. 2). "To whom is sin pardoned? To him who forgiveth injury" (Derek Ereẓ Zuṭa viii. 3; R. H. 17a; see also Jew. Encyc. iv. 590, *s.v.* Didascalia). Accordingly Jesus said: "Whensoever ye stand praying, forgive, if ye have aught against any one; that your Father also which is in heaven may forgive you your trespasses" (Mark xi. 25, R. V.). It was this precept which prompted the formula "And forgive us our sins ["ḥobot" = "debts"; the equivalent of "'awonot" = "sins"] as we also forgive those that have sinned ["ḥayyabim" = "those that are indebted"] against us."

Directly connected with this is the prayer "And lead us not into temptation." This also is found in the Jewish morning prayer (Ber. 60b; comp. Rab: "Never should a man bring himself into temptation as David did, saying, 'Examine me, O Lord, and prove me' [Ps. xxvi. 2], and stumbled" [Sanh. 107a]). And as sin is the work of Satan (James i. 15), there comes the final prayer, "But deliver us from the evil one [Satan]." This, with variations, is the theme of many Hasidæan prayers (Ber. 10b-17a, 60b), "the evil one" being softened into "yeẓer ha-ra'" = "evil desire," and "evil companionship" or "evil accident"; so likewise "the evil one" in the Lord's Prayer was later on referred to things evil (see commentaries on the passage).

The doxology added in Matthew, following a number of manuscripts, is a portion of I Chron. xxix. 11, and was the liturgical chant with which the Lord's Prayer was concluded in the Church; it occurs in the Jewish ritual also, the whole verse being chanted at the opening of the Ark of the Law.

On closer analysis it becomes apparent that the closing verses, Matt. vi. 14-15, refer solely to the prayer for forgiveness. Consequently the original passage was identical with Mark xi. 25; and the Lord's Prayer in its entirety is a later insertion in Matthew. Possibly the whole was taken over from the "Didache" (viii. 2), which in its original Jewish form may have contained the prayer exactly as "the disciples of John" were wont to recite it.

K.

LORD'S SUPPER (called also **The Last Supper**): Name taken from I Cor. xi. 20, and given by the Christian world to the rite known as the eucharist, the partaking of the cup of wine and the bread offered in memory of Jesus' death and brought into connection with the story of his last meal, which he is said to have taken with his disciples on the eve of his crucifixion. According to the synoptic Gospels (Matt. xxvi. 26-29; Mark xiv. 23-25; Luke xxii. 15-18, 19), Jesus was partaking of the Passover meal with his disciples on the fourteenth of Nisan, before his capture by the officers of the high priest. The Gospel of John, however, knows nothing of the institution and assigns the crucifixion to the fourteenth day of Nisan, the day when the Passover lamb is sacrificed. This discrepancy shows that the identification of the "crucified Christ" with the "lamb of God which taketh away the sin of the world" (John i. 29 [adapted from Isa. liii. 7]; I Peter i. 19; Acts viii. 32; Rev. v. 6; and elsewhere) gradually led to an identification of Jesus with the Passover lamb also (see I Cor. v. 7).

Subsequently the mystic love-meals of the Mithra-worshipers, who also broke bread and drank the soma-wine in memory of Mithra's last supper (see T. Cumont, "Die Mysterien des Mithra," pp. 99-101, 118-119, Leipsic, 1903), caused the love-feasts of the early Christians to be celebrated as actual remembrances of the last supper eaten by Jesus; and so a special passage was inserted (I Cor. xi. 23-28, interrupting the context, and contradictory to *ib.* x. 4) in which the apostle rather oddly declares that he had received from Jesus by inspiration the statement that he had instituted the eucharist on the night of his betrayal, giving the formulas for the bread and the cup which, with some variations, appears in each of the three synoptic Gospels. Incompatible with the whole story, however, is the fact that the Christian Didache (ix. 1-4; comp. Jew. Encyc. iv. 587) gives the eucharist formulas for the cup and the wine used in Christian circles without any reference to the crucifixion or to the last supper. This makes it probable that the institution had developed out of the Essene communion-meals and was only at a later time referred to Jesus.

The original idea of the Essene communion-feasts, borrowed from Parseeism, remained attached to it: the hope for the banquets (of leviathan) in paradise; wherefore Jesus is reported as having especially referred to wine in the Kingdom of God (Matt. xxvi. 29; Mark xiv. 25; Luke xxii. 18, 30).

The whole story of the Passover celebration by Jesus on the eve of his crucifixion thus arose in circles where real familiarity with Jewish law and life no longer existed. It has, however, been argued that the ritual of the mass or communion service is derived from that of the Passover eve service (see Bickell, "Messe und Pascha"). K.

LORIA. See LURIA.

LORIA, ACHILLE: Italian political economist; born at Mantua March 2, 1857; educated at the lyceum of his native city and the universities of Bologna, Pavia, Rome, Berlin, and London. He became professor of political economy in the University of Sienna in 1881; and he has held a similar appointment in the University of Padua since 1891.

Loria is the author of: "La Rendita Fondiaria e le Sue Elisione Naturale," Milan, 1880; "Le Basi Economiche della Costituzione Sociale," Turin, 1886 (translated into French 1893, German 1895, and English 1899); "Analisi della Proprietà Capitalista," 2 vols., *ib.* 1889 (received the royal prize); "L'Opera Postuma di Carlo Marx," Rome, 1895; "Problemi Sociali Contemporanei," Milan, 1896 (translated into French 1897); "La Costituzione Economica Odierna," Turin, 1899.

LORRAINE. See METZ.

LOS ANGELES: Commercial and manufacturing city in the state of California; situated on the left bank of the river of the same name, and about 14 miles from the Pacific Ocean. Jews first settled in Los Angeles in 1849; and they increased in number so rapidly that within a few years they organized a congregation and erected a house of worship. They also obtained from the city the grant of a tract of land for a cemetery, and established a charitable organization to afford decent burial for the poor.

At present (1904) the Jews number about 3,000 in a total population of about 120,000. There are a number of Jewish educational and charitable institutions, of which may be mentioned: Ladies' Hebrew Benevolent Society, Los Angeles Lodge I. O. B. B. and two other B'nai B'rith lodges, Kaspare Cohn Hospital Association, and Ladies' Aid Society. The congregation has had five rabbis: A. W. Edelman, E. Schreiber, A. Blum, M. G. Solomon, and S. Hecht, the present incumbent.

The Jewish contingent of the population has taken an active part in promoting the business interests of the city, and a number of Jews are prominent as bankers, manufacturers, real-estate dealers, wholesale-grocery merchants, etc. There are also several Jewish physicians, lawyers, architects, and mechanics. See JEW. ENCYC. iii. 511, *s.v.* CALIFORNIA.

LOT (לוט).—**Biblical Data:** Son of Haran, Abraham's brother, and, consequently, nephew of Abraham; emigrated with his grandfather, Terah, from Ur of the Chaldees to Haran (Gen. xi. 31). Lot joined Abraham in the land of Canaan, and in the time of famine went with him to Egypt (*ib.* xii. 4, xiii. 1). Owing to Lot's riches in flocks and tents a quarrel arose between his herdsmen and those of Abraham, the result of which was the separation of uncle and nephew. Lot chose the fertile plain of the Jordan, and extended his tents to Sodom (*ib.* xiii. 5–12). After the defeat of the King of Sodom and his allies in the valley of Siddim, Lot, who had been dwelling among them, was taken prisoner, with all his family and property, by Chedorlaomer; but he was rescued by Abraham (*ib.* xiv. 12–16).

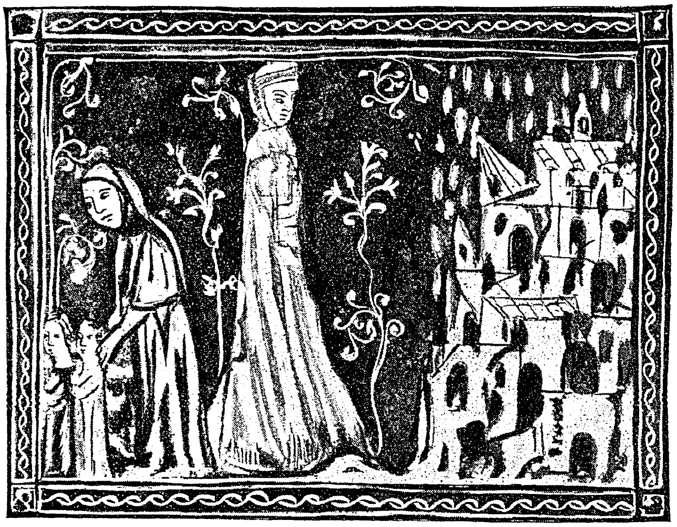
In Gen. xix. Lot is represented as the counterpart of Abraham in regard to hospitality: like Abraham, he rose to meet the angels, whom he took for men, bowing to them; and, like Abraham, too, he "pressed" them to enter his house and "made them a feast" (*ib.* xix. 1–3). When his dwelling was surrounded by the profligate people of Sodom, Lot placed his duty as a host above that as a father and offered them his two unmarried daughters. The angels then announced to him that their mission was to destroy the guilty cities, and urged him to leave the place. Lot tried, but unsuccessfully, to persuade his sons-in-law to leave also. He himself hesitated to flee, and the angels took him, his wife, and his two daughters by the hand, "the Lord being merciful unto him," and led him out of the city. They then enjoined him to flee to the mountain without looking behind him; but the mountain being so far off Lot requested them to spare the small city of Zoar in order that he might find refuge there; and his request was granted. During the flight to Zoar, Lot's wife, who looked behind her, was turned into a pillar of salt (*ib.* xix. 4–22, 26).

Lot, fearing that Zoar, also, might be destroyed eventually, went up to the mountain and dwelt in a cave, where, by an incestuous intercourse with his two daughters, he became the ancestor of the two nations Moab and Ammon (*ib.* xix. 30–38). Lot is twice mentioned in the expression "children of Lot," applied to Ammon and Moab (Deut. ii. 19; Ps. lxxxiii. 8).

E. G. H. M. SEL.

——**In Rabbinical Literature:** Lot is generally represented by the Rabbis in an unfavorable light. When the quarrel arose between his shepherds and those of Abraham (Gen. xiii. 7), there was a quarrel between Abraham and Lot also. The latter sent his flocks to graze in fields that did not belong to him; and when Abraham, induced by the complaints of the wronged owners, remonstrated, Lot showed himself rebellious (Targ. of pseudo-Jonathan and Yer. to Gen. xiii. 7; Pesiḳ. R. 3 [ed. Friedmann, pp. 9b–10a]; Gen. R. xli. 6–7). Lot, while separating himself from Abraham, separated himself from God also, saying, "I have no desire either in Abraham or in his God" (Gen. R. xli. 9–10). It was only after the wicked ("rasha'") Lot had left Abraham that God spoke again to the latter (Pesiḳ. R. *l.c.*; comp. Gen. xiii. 14). Lot was given over to lust; therefore he chose Sodom as his residence (Pesiḳ. R. *l.c.*; Gen. R. xli. 9), and his daughters' act of incest was due to his neglect. The account of it was therefore read every Saturday in the synagogues as a warning to the public (Nazir 23b; Gen. R. li. 12).

The above-mentioned incident of the flocks shows that Lot was not too conscientious; he was besides very greedy of wealth; and at Sodom he practised usury (Gen. R. li. 8). His hesitation to leave the city (comp. Gen. xix. 16) was due to his regret for his great wealth which he was obliged to abandon (Gen. R. l. 17). The Rabbis cited the drunkenness of Lot as an example of the degree of intoxication which renders a man irresponsible ('Er. 65a). All the special favors which Lot received from God were granted through the merit of Abraham; otherwise he would have perished with the people of Sodom (Gen. R. xli. 4; Midr. ha-Gadol to Gen. xiii. 11). His being spared at the time of the destruction of Sodom is recorded also as a reward for not having betrayed Abraham when the latter told Pharaoh that Sarah was his sister (*ib.* li. 8).



Lot's Wife Turned into a Pillar of Salt.
(From the Sarajevo Haggadah of the fourteenth century.)

The Pirḳe Rabbi Eli'ezer, however, shows a much milder attitude toward Lot, interpreting the word "ẓaddiḳ" of Gen. xviii. 23 as referring to him (Pirḳe R. El. xxv.). Besides passing over in silence Lot's shameful deeds, it records the hospitality which, in imitation of Abraham, he practised at Sodom: even after the people of Sodom had proclaimed that any hospitable person would be burned, he continued to practise it under cover of night. This trait is mentioned also in Gen. R. (l. 8); but it is there narrated in a manner which renders Lot's merits insignificant. It is further said (*ib.* l. 9; Lev. R. xxiii.) that Lot pleaded the whole night in favor of the people of Sodom. The Alphabet of Ben Sira (ed. Bagdad, pp. 2b, 17b, 19b), apparently borrowing from the Koran (suras vii. 78–82, xxii. 43), calls Lot "a perfectly righteous man" ("ẓaddiḳ gamur") and prophet (comp. II Peter ii. 7, 8; Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," 121).

Genesis Rabbah (l. 14) concludes that Lot had at the time of the destruction of Sodom four daughters, two married and two betrothed, and that the latter escaped with their father. But he had previously had a daughter named Peloṭet, who was married to one of the inhabitants of Sodom. She secretly practised hospitality, but being one day discovered by the people of Sodom, was sentenced to be burned (Pirḳe R. El. *l.c.*; "Sefer ha-Yashar," "Lek Leka," ed. Leghorn, p. 23a). Lot's wife, called "'Irit" or "'Idit," desirous to see whether her other two daughters followed her, looked behind her; but she then saw the back of the Shekinah and was accordingly punished for her imprudence (Pirḳe R. El. *l.c.*). She was turned into a pillar of salt because she had previously sinned by not giving salt to strangers (Targ. pseudo-Jonathan and Yer. to Gen. xix. 26; comp. Gen. R. li. 7). According to a legend, oxen used to consume every day the pillar of salt by licking it down to the toes, but it was restored by the morning (Pirḳe R. El. *l.c.*; Sefer ha-Yashar, "Wa-yera," p. 28a, b). Lot's wife, being turned into a pillar of salt, was not considered as a dead body, contact with which rendered one unclean (Niddah 70b). The transformation was one of those miraculous occurrences at sight of which one must recite a benediction (Ber. 54a).

S. S. M. Sel.

——**Critical View:** Lot is regarded by the critics as an eponym representing the supposed common ancestor of the two tribes or nations of Moab and Ammon. His relation to Abraham is in this view intended to mark the ethnographic connection of these two tribes with the Israelites; and his choice of an eastern location may be taken as indicating a voluntary relinquishment of all claims of the Moabites and Ammonites to Canaan. His relations with his daughters probably represent some rough pleasantry common among the Israelitish folk and indicating their scorn for their nearest neighbors. Fenton, however ("Early Hebrew Life"), suggests that in a matriarchal state such unions would not be indecorous, since in social stages where descent was traced only through the mother the father would be no relation to the children.

The story about Lot's wife, also, bears marks of popular origin, and is regarded by critics and travelers as a folk-legend intended to explain some pillar of crystallized rock-salt resembling the female human form. Owing to its composition, such a pillar would soon dissolve. One in the neighborhood of the Dead Sea was identified by Josephus ("Ant." i. 11, § 4) as that of Lot's wife; and another (or the same) had that name at the time of Clement of Rome (I Cor. xi. 2).

As Lot is declared to have dwelt in a cave (Gen. xix. 30), Ewald ("History of Israel," i. 313) and Dillmann (*ad loc.*) identify him with Lotan, the leader of one of the tribes of Horites or cave-dwellers (Gen. xxxvi. 22, 29). The Dead Sea is still called "Baḥr Luṭ."

E. G. H. J.

LOTS: Means of determining chances. Primitive peoples, and occasionally those on a higher plane of culture, resort to lots for the purposes of augury. They spin a coconut or entangle strips of leather in order to obtain an omen. Thieves especially are detected by the casting of lots, etc. (Tylor, "Primitive Culture," German ed., i. 78–82). The pagans on a ship with Jonah under stress of a storm cast lots in order to find out who among them had incurred the Divine anger (Jonah i. 7). Haman resorted to the lot when he intended to destroy the Jews (Esth. iii. 7). The Greek heroes cast their lots into Agamemnon's helmet in order to ascertain who should fight with Hector ("Iliad," vii. 171). In ancient Italy oracles with carved lots were used.

In Ancient Israel.

The ancient Israelites likewise resorted to the lot for the most varied purposes. Rhabdomancy was known as late as Hosea (Hos. iv. 12); and Ezekiel (Ezek. xxi. 26 *et seq.*) mentions the arrow-oracle of the King of Babylon, which was still used a thousand years later among the pagan Arabians (Wellhausen, "Reste Arabischen Heidenthums," 2d ed., pp. 126 *et seq.*; comp. Sprenger, "Leben und Lehre des Mohammed," i. 259 *et seq.*; Huber, "Ueber das Meiser-Spiel der Heidnischen Araber," Leipsic, 1883). As the priestly lot-oracles are discussed under Ephod, Urim and Thummim, and Teraphim, the present article deals merely with the lot in secular life. Joshua discovers the thief, and Saul the guilty one, by means of the lot (Josh. vii. 16 *et seq.*; I Sam. xiv. 42; comp. I Sam. x. 20 *et seq.*). Primitive peoples divide land and other common property by means of the lot. In Hebrew the word for "lot" ("goral") has retained the meaning of "share"; it has also acquired the more general meaning of "fate" (Isa. xvii. 14, lvii. 6; Jer. xiii. 25; Ps. xvi. 5; Dan. xii.). The land west of the Jordan is divided among the several tribes by lot (Num. xxvi. 55 *et seq.*, xxxiii. 54, xxxiv. 13, xxxvi. 2; Josh. xiii. 6, xiv. 2, xv. 1, xvii. 1, xviii. 6–10, xix. 51, xxiii. 4; Ps. lxxviii. 55, cv. 11; comp. Ezek. xlv. 1, xlvii. 22). Jewish tradition, finding offense in this kind of allotment, declared that the land was really divided under the inspiration of the Holy Spirit, the lot being merely the visible means of confirming the division for the people (Sifre, Num. 132; B. B. 122a). Prov. xvi. 33 and xviii. 18 indicate that lots were cast in legal controversies. The wicked "part my garments among them, and cast lots upon my vesture" (Ps. xxii. 19; comp. Matt. xxvii. 35; John xxix. 24). Booty of war is divided by lot (Joel iv. 3; Nahum iii. 10; Ob. 11; see also Judges xx. 9; Neh. x. 35, xi. 1; I Chron. xxiv. 5, xxv. 8, xxvi. 13 (see Herzog-Hauck, "Real-Encyc." 3d ed., xi. 643 *et seq.*).

In Talmud and Midrash.

According to the etymology of the word "goral," the lots were probably small stones, or sticks, as Hos. iv. 12 indicates. They were thrown, or possibly shaken (Prov. xvi. 33, "into the lap"), so that one fell out, whereby the case in question was decided. It can not be ascertained whether a tablet with writing on it is meant in Lev. xvi. 8, as the Mishnah assumes (Yoma iii. 9, iv. 1). At the time of the Second Temple the lot was prominent in the Temple cult, and customs were developed, after Biblical example, whereby the several offices were apportioned by lot. The priests drew lots in all cases where differences might arise (Yoma 37a, 39a–41a, 62a–63b, 65b; Zeb. 113b; Men. 59b; Ker. 28a). In Tamid i. 2 the overseer of the Temple calls for the lot; and Yoma 24b records a discussion whether the priests shall draw lots in holy or in secular garments. Lots were cast four times in succession (Yoma iv. 1). The Prophets increased the four classes of priests that returned from the Diaspora to twenty-four; they mixed up the names of the additional ones and placed them in an urn (κάλπη) and then let each of the four original classes of priests draw five names (Tosef., Ta'an. ii. 1, and parallel passages). The urn was originally made of cypress-wood; but the high priest Ben Gamala had one which was made of gold (Yoma iii. 9); hence drawing lots from it created a sensation (Yer. Yoma 41b, below). In the sanctuary the lots were taken out by hand (Yoma 39b, 40a). The lot was either a black or a white pebble (Yer. Yoma iv., beginning), or was made of olive-, nut-, or cypress-wood (Yoma 37a). A third kind, consisting of pieces of paper with writing on them (πιττάκιον), is frequently mentioned.

Many facts seem to indicate that choosing by lot was common in post-Biblical times. Moses chose the seventy elders (Num. xi. 26) by selecting six men from each of the twelve tribes, and then placing seventy-two pieces of paper (πιττάκιον), of which two were blank, into an urn, one being drawn by each man. He proceeded similarly in determining the 273 first-born who were to pay each five shekels ransom, 22,273 tickets in all being drawn (Yer. Sanh. 19c, below, and parallel passages). Eldad and Medad were, according to Targ. Yer. to Num. xi. 26, among the elders who drew lots. Jacob's sons also drew lots to decide who should take Joseph's coat to their father (Gen. R. lxxxiv.). Achan attempted to bring the casting of lots into discredit when he said to Joshua: "If I order you and the high priest Eleazar to draw lots, one of you will certainly be pronounced guilty" (Sanh. 43b). Nebuchadnezzar's casting of lots (Ezek. xxi. 25 *et seq.*) is mentioned; but, according to the vernacular of the time, the Greek word κλῆρος is used, which occurs also in

Acts i. 26 (Lam. R., Preface, No. 5; Midr. Teh. x. 6; comp. *ib.* x. 5 on casting of lots among the Romans, and Krauss, "Lehnwörter," ii. 545b).

In Palestine brothers divided their patrimony by lot as late as, and probably much later than, the second century (B. B. 106b). Apparently the lot was also occasionally used in ordaining teachers (Yer. Bik. 65d, l. 24). Under Grecian influence the drawing of lots degenerated into dice-playing. "No one is accepted as witness who plays with little stones [ψῆφος]," *i.e.*, gambles professionally (Yer. Sanh. iii. 6 and parallel passages). The same regulation applies to the dice-player (κυβευτής and κυβεία), who is frequently referred to (see passages in Krauss, *l.c.* ii. 501).

In the Middle Ages and in Folk-Lore.

The drawing of lots and its companion practise, the throwing of dice, were common in the Middle Ages; and they are even in vogue at the present time. Moses of Coucy (*c.* 1250) mentions xylomancy. Splinters of wood the rind of which had been removed on one side, were tossed up, and according as they fell on the peeled or the unpeeled side, augured favorably or unfavorably (Güdemann, "Gesch." i. 82). An Italian teacher denounced the casting of lots (*ib.* ii. 221). Dice-playing was especially in vogue among the Italian Jews of the Middle Ages, and was, as well as other games of hazard, frequently forbidden (*ib.* ii. 210). In Germany there was a game of chance, called "Rück oder Schneid," in which a knife was used (Berliner, p. 22). Many books on games of chance originated in the later Middle Ages (see bibliography below). The present writer has in his possession a Bokhara manuscript containing a "Lot-Book of Daniel." It mentions also means ("segullot") for detecting a thief. The Jews of the present day, likewise, are not unacquainted with the various modes of casting lots found among all peoples and used for various and generally harmless purposes; but among these remnants of ancient superstition customs that are Jewish in origin are probably to be found only in Ḥasidic circles and in the East.

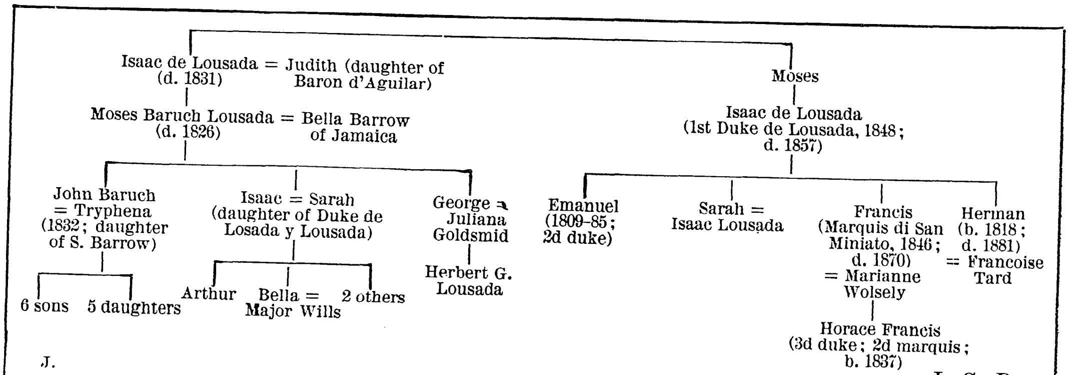
LOUISVILLE. See Kentucky.

LOUSADA (OF PEAK HOUSE): Name of a family that has held for many generations large possessions in Jamaica. A member of the family was created Duke de Lousada and Marquis di San Miniato. It is the only Jewish family that has held so exalted a title. Its members claim to be descendants of the original Spanish grandees of that name. Isaac de Lousada was confirmed, in 1848, in the titles that had been borne by his "ancestor" the Duke de Lousada, grand chamberlain to Charles III., King of the Two Sicilies. This monarch, when crowned King of Spain, created the duke a grandee of the first class. Isaac de Lousada died in 1857, and was succeeded by his eldest son, Emanuel, second duke (b. 1809; d. 1884). Emanuel was succeeded by his nephew, Horace Francis, the third and present (1904) duke, son of Count Francis (d. 1870), the second son of the first duke. Count Francis married Marianne, daughter of Sir Charles Wolsely; he was created Marquis di San Miniato by the Grand Duke of Tuscany in 1846. Following is a pedigree of the family:



Isaac de Lousada = Judith (daughter of Baron d'Aguilar)
(d. 1831)
Moses Baruch Lousada = Bella Barrow of Jamaica
(d. 1826)
John Baruch = Tryphena (1832; daughter of S. Barrow)
6 sons
5 daughters
Isaac = Sarah (daughter of Duke de Losada y Lousada)
Arthur
Bella = Major Wills
2 others
George = Juliana Goldsmid
Herbert G. Lousada
Moses
Isaac de Lousada (1st Duke de Lousada, 1848; d. 1857)
Emanuel (1809–85; 2d duke)
Sarah = Isaac Lousada
Francis (Marquis di San Miniato, 1846; d. 1870) = Marianne Wolsely
Horace Francis (3d duke; 2d marquis; b. 1837)
Herman (b. 1818; d. 1881) = Francoise Tard

LOVE (אהבה): The deep affection by which one person feels closely drawn to another and impelled to give up much, or do much, for him without regard of self.—**Biblical Data:** While the word אהבה, like the Greek ἀγάπη, denotes also sensual love (Hos. ii. 7, 9, 12; Ezek. xxiii. 5, 9; Judges xvi. 4; II Sam. xiii. 15), it becomes, owing to the higher ethical spirit pervading Judaism, more and more expressive of the purer sentiment so exquisitely characterized in Cant. viii. 6-7: "Love is strong as death. . . . Many waters can not quench love, neither can the floods drown it: if a man would give all the substance of his house for love, it would utterly be contemned." Besides love of man for woman, "ahabah" denotes parental love (Gen. xxv. 28, xxxvii. 3), and it is transferred to that love of man for man which is better termed friendship, and which is exemplified in the love of David and Jonathan and characterized by the former in the words, "My brother Jonathan, very dear [A. V. "pleasant"] hast thou been unto me; thy love to me was wonderful, passing the love of women" (II Sam. i. 26, Hebr.). Hence "lover" becomes identical with "friend" (Prov. xviii. 24; Ps. xxxviii. 12 [A. V. 11], lxxxviii. 19 [A. V. 18]). Gradually the entire system of life is permeated by the principle of love, and the relation between God and man as well as between man and man is based upon it.

It is the prophet Hosea who, chastened by his experience in his own life, gives to love a deeper and purer meaning, while finding that God loves Israel notwithstanding its backslidings (Hos. xi. 1). It is a love of free will (*ib.* xiv. 5 [A.V. 4]). Upon love Deuteronomy builds its entire system. God loved the fathers (Deut. x. 15), and because He transferred this love to their descendants, the entire people of Israel, He chose them, though not on account of their own merit, to be His own peculiar (missionary) nation and shielded them against their foes (*ib.* vii. 6–8, xxiii. 6). He therefore demands their love in return (*ib.* vi. 5; x. 12; xi. 1, 13, 22; xiii. 4; xix. 9; xxx. 6, 16, 20). He loves also the stranger, and demands love for the stranger in return (*ib.* x. 18–19). The love of God for Israel is declared by Jeremiah to be "an everlasting love" (Jer. xxxi. 3), and both the exilic seer and the last of the prophets accentuate this love of God (Isa. lxiii. 9; Mal. i. 2).

The love of God for mankind in general is not expressed in Scripture by the term "love," but by "mercy" (Ps. cxlv. 9); it is, however, extended to all who observe His commandments (Ex. xx. 6; Deut. vii. 9), who follow righteousness and speak "right" (Prov. xv. 9, xvi. 13; Ps. cxlvi. 8), because He loves righteousness and justice (Isa. lxi. 8; Ps. xi. 7, xcix. 4). Nor is the love of God for Israel favoritism. "Whom the Lord loveth He chasteneth" (A. V. "correcteth"; Prov. iii. 12). Love being the essence of God's holy nature, the law of human life culminates in the commandment "Thou shalt love thy neighbor as thyself" (Lev. xix. 18). This love includes the enemy (Ex. xxiii. 4–5). The words "Thou shalt not hate thy brother in thy heart: thou shalt not bear sin against [A. V. "suffer sin upon him"] him . . . nor bear any grudge against the children of thy people" (Hebr.) show in what manner the enemy can be loved—one must remove the cause of hatred in order to be able to love his neighbor (Lev. xix. 17). This includes the stranger (Lev. xix. 34); the criminal also is called "thy brother" (Deut. xxv. 3; see Brotherly Love).

——**In Apocryphal and Rabbinical Literature:** Love as a divine principle was especially developed among the Ḥasidim, who made love of God and love of man the guiding principles of their lives (Philo, "Quod Omnis Probus Liber," § 12; see Essenes). To them God appeared as "the spirit of love for all men" (Wisdom i. 6). "Thou lovest all things that are. . . . Never wouldst Thou have made anything if Thou hadst hated it. . . . Thou sparest all, for they are Thine, O Lord, Thou Lover of souls" (*ib.* xi. 24–26). Philo also ("De Opificiis Mundi," i. 4; comp. Müller, "Buch von der Weltschöpfung," 1841, p. 150) finds love, or goodness, to be the principle and motive power of the divine creation. So God says to Ezra, as he complains about the ills of the world, "Thou canst not love My creation more than I do" (IV Esdras viii. 45). Love for God and man is accordingly declared to be the principle of conduct in the Didache and in the Testaments of the Twelve Patriarchs (Simeon, 3, 4; Issachar, 5; Zebulun, 8; Dan, 5; Gad, 7; Benjamin, 8). Love of all creatures is taught by Hillel (Abot i. 12; Wisdom xii. 19; Philo, "De Humanitate," §§ 12–14; comp. Brotherly Love and Golden Rule).

Justice the Fundamental Principle.

The Rabbis also declare that the world was created by the divine principle of love (Gen. R. xii. 15) and that the human world is founded on mercy (Ab. R. N. iv.). "Beloved is man by God, in whose likeness he is made; especial love was shown him in being made aware of this godlikeness of his" (Ab. iii. 14). Still, a deeper conception of the Rabbis made justice the fundamental principle of life, and not mere love. "When God saw that the world could not stand on rigid justice, then only He tempered it with love" (Gen. R. *l.c.*). Love pardons but fails to eradicate sin in individuals or society at large. Upon justice, truth, and peace the world is founded (Ab. i. 15; Deut. R. v. 1). Love is not strong and firm enough to form the foundation of life, whether in individuals, who must strive for character, or in society at large, which can not afford to tolerate wrong-doing (see Holiness; Judgment, Divine). Love prevails only where God is recognized as Father, and this tender relation works for pity and forgiveness (Ber. 7a). All depends then upon whether that state has been attained in which the will of God is done from mere love.

The Broader Hellenistic View.

Whether the heathen as well as Jews may attain this state of true God-childship is a question at issue between the Hellenistic and a few of the more liberal Palestinian rabbis on the one hand and the greater majority of the rabbis on the other. The former insist that Job and Enoch attained this state as well as Abraham; the latter deny it, asserting that fear and not love of God was the motive power of the ancient heathen (comp. Testament of Job, i. 24 [in Kohut Memorial Volume, p. 171], Enoch, lxxi. 14, and Slavonic Enoch, lxiv. 5, with Soṭah v. 5 and Gen. R. xxv.). Christianity was partly influenced by the broader Hellenistic views in stating that "God is love" and that all men are children of God (I John iii. 1; iv. 7–8, 11–20; v. 3). Still, the prevailing view in the New Testament is that of Paul, according to whom it is the Holy Spirit which, through baptism, works love and renders the believers "sons of God," for whom there would otherwise be only salvation by righteousness (Rom. viii. 14–31; comp. i. 17). In other words, only through belief in the especial God-sonship of the crucified Christ does the Christian obtain the title of God's son and the right to claim His fatherly love. This view is maintained also in John v. 20–24, x. 17, xv. 9, xvii. 26.

This conception of a divine love bought by sacrificial blood was combatted by the rabbis; R. Akiba, for instance, declares: "Beloved are the Israelites inasmuch as they are called children of God"; especially did that love manifest itself in making known to them that they are children of God (Abot iii. 15, with reference to Deut. xiv. 1). The entire relation between Israel and God is found by R. Akiba to be typified in the Song of Songs, which to him is "the holiest of all books," because it allegorizes the divine love (Yad. iii. 5; Cant. R., Introduction). Whether Israel may claim God's love as His children when disregarding His commandments is a matter of dispute between R. Meïr (who affirms) and R. Judah (who denies; Sifre, Deut. 96).

God's Love for Israel.

The love of God means the surrounding of life with His commandments (Men. 43b) and is conditioned by the love of the Torah (R. H. 4a); God loves Israel in a higher degree than He does the Gentiles (Sifre, Deut. 144; Yoma 54a) because through the Torah they stand closer to Him (Pesiḳ. ii. 16–17); they love Him, giving their very lives for the observance of His commandments (Mek., Yitro, 6, to Ex. xx. 6). Indeed, love of God is voluntary surrender of life and all one has for God's honor (Sifre, Deut. 32; Ber. 54a). It is unselfish service of God (Abot i. 3; 'Ab Zarah 19a). There are chastisements of love for the righteous to test their piety (Ber. 5a; comp. Rom. v. 3). It is this unequaled love, braving suffering and martyrdom, which established the unique relation between God and Israel, so that "none of the nations can quench this love" (Cant. R. viii. 7). This unique love is echoed also in the liturgy (see Ahabah Rabbah). To be a true "lover of God," however, means "to receive offense, and resent not; to hear words of contumely, and answer not; to act merely from love, and rejoice even in trials as tests of pure love" (Shab. 88b; Soṭah 31a; comp. Rom. viii. 28).

The Highest Aim of Life.

Love as the highest aim of life is especially emphasized in Tanna debe Eliyahu R. xxvi.: "Love should be perfectly unselfish, and regulate the conduct of man toward man." In the same sense it is accentuated as the highest incentive of action by Baḥya ibn Paḳuda, in "Ḥobot ha-Lebabot" (see Jew. Encyc. ii. 454). Maimonides, in his Yad ha-Ḥazaḳah, devotes the whole tenth chapter of Hilkot Teshubah, with reference to Abot i. 3, to love as the motive which gives all human action its true ethical and religious value. Similarly, Naḥmanides in his commentary to Deut. vi. 4, with reference to Sifre, *l.c.*, declares that love of God involves the study and observance of the Law without regard to gain or expectation of reward; so also Baḥya ben Asher, in his "Kad ha-Ḳemaḥ," under "Ahabah."

R. Eleazar of Worms, in his ethical work "Roḳeaḥ," begins with the chapter on love, referring to Sifre, Deut. 32, 41, 48; Ber. 54a; Yoma 86a; Ned. 62a; Soṭah 31a; Tanna debe Eliyahu xxvi.; Midr. Teh. to Ps. xiii. 2 ("I love Thee; that is, 'I love Thy creatures'"); and Midr. Tadshe xii., and stating that he who truly loves God subordinates all other desires and cares to the one great object of life—the fulfilment of God's will in joy. Still more extensively does Elijah de Vidas, in his ethical work "Reshit Ḥokmah" (part 2), dwell on love as the highest aim and motive of life. He also quotes the Zohar (i. 11b; ii. 114, 116a; iii. 68a, 264b, 267a; and other passages), where it is frequently stated that pure love is suppression of all care for self, and through such love true union of the soul with God is effected. This union is said by the cabalists to take place in the celestial "palace of love" (Zohar i. 44b, ii. 97a).

As Cosmic Principle.

Still greater importance was attached to love when it was rendered a cosmic principle in the philosophical systems of Ḥasdai Crescas and, through him, of Spinoza. Instead of rendering the creative intellect the essence of the Deity, as did Maimonides and all the Aristotelians, Crescas, like Philo of old, makes love the essential quality of God. Love is divine bliss, and hence love of God is the source of eternal bliss for mortal man ("Or Adonai," i. 3, 5; comp. Spinoza's "Amor Intellectualis," v. 32–36; see Joël, "Don Chasdai Creskas' Religionsphilosophische Lehren," 1866, p. 37; *idem*, "Spinoza's Theologisch-Politischer Tractat," 1870, pp. ix.–xi.).

But, more than Crescas, it was probably Don Judah Isaac Abravanel, known as Leo Hebræus, from whom Spinoza borrowed the idea of "intellectual love" as a cosmic principle, and who, following the Platonic and pantheistic tendency of the period of the Italian Renaissance, made (in his "Dialoghi di Amore") the "amore intellectivo" and "amore mentale" or "rationale" the essence of God and the central force and end of the world. "Love links all things together in the cosmos, but while love in the natural world is sensual and selfish, divine love is unselfish and uplifting. God's love created the world and brings about the perfection of all things, especially of man, who, when good, is God-loving as well as God-beloved, and whose love of God leads him to eternal bliss, which is identical with divine love." This intellectual love is identical with the Biblical "to him [God] shalt thou cleave" (Deut. x. 20, xi. 22, xiii. 5; Sifre, Deut. 49; Soṭah 14a) and gives rise to the "imitatio Dei." It is highest perfection and supreme joy (B. Zimmels, "Leo Hebræus," 1886, especially pp. 51, 67, 74–79, 89–100). Leo Hebræus' view of love as the principle of the world appears to have exerted some influence also upon Schiller in his "Philosophische Briefe" (1838, x. 289; Zimmels, *l.c.* pp. 8–11).

A.

LÖVINSON, ERMANNO (formerly **Hermann**): German historian; born in Berlin June 3, 1863; educated at Berlin University (Ph.D. 1888). Since 1889 he has lived in Italy, and since 1895 has been assistant archivist of the royal state archives at Rome.

Lövinson's published works in German include: "Beiträge zur Verfassungsgeschichte der Westfälischen Reichsstiftsstädte," Paderborn, 1889; "Die Mindensche Chronik des Busso Watensted, eine Fälschung Paullinis," *ib.* 1890; and "Ist die Gesch. eine Wissenschaft?" Berlin, 1892 (translated from the Italian of P. Villari); in Italian: "Cristoforo Colombo Nella Letteratura Tedesca," Rome, 1893; "Giuseppe Garibaldi e la Sua Legione Nello Stato Romano 1848-49," *ib.* 1902.

S.

LOVY, ISRAEL: French cantor and synagogal composer; born near Danzig Sept., 1773; died in Paris Jan. 7, 1832. He received a Talmudic and secular education at Glogau, where his father was ḥazzan. Lovy traveled extensively, visiting the greatest cantors of the time, and studying the works of the greatest masters, especially those of Haydn and Mozart. In 1799 he settled at Fürth, where he became accomplished in violin, violoncello, and piano, and proficient in French and Italian. After having served for short terms congregations in Mayence, Strasburg, and London, he was called in 1818 to Paris, where he officiated as cantor until his death. Lovy was gifted with a voice of unusual strength, compass, and sweetness, and the greatest masters of vocal music at Paris attended the Jewish services to hear him sing. He received attractive offers from the stage, but the Jewish Consistory of Paris elected him for life and thus induced him to remain as cantor. In March, 1822, his congregation dedicated a new temple and introduced an organ and boys' chorus. Lovy wrote all the music for the organ and the new choir, and it was mainly the beauty of his compositions that silenced the opposition of the Orthodox element of the community, which at first protested against the innovation.

S. I. WAR.

LOW, A. MAURICE: Anglo-American writer; born in London July 14, 1860. Educated at King's College School in that city, and afterward in Austria, he devoted himself to journalism. Since 1888 he has been correspondent at Washington, D. C., for the "Boston Globe," and since 1896 for the London "Daily Chronicle," being the first Washington correspondent to be appointed by an English paper.

Low's journalistic positions have been many. Since 1896 he has edited the American department of the London "National Review"; he wrote "The United States and Its Dependencies" for the "Annual Register" (London, 1901); and is a contributor to the majority of the more influential magazines in England and America, including "Collier's Weekly," "Harper's Weekly," "The Forum," "North American Review," "Scribner's," "McClure's," and "The Fortnightly Review." He is the author of "The Supreme Surrender," a novel (New York, 1901).

A.

LÖW, ASHER BEN ARYEH LÖB: Chief rabbi of Carlsruhe; born at Minsk in 1754; died at Carlsruhe July 23, 1837. He studied under his father, Aryeh Löb, rabbi of Metz; and when the latter had become blind he assisted him in conducting his yeshibah or rabbinical college. In 1783 Asher was elected rabbi of Niederwerrn, and in 1785 rabbi of Wallerstein. When in 1809 the Grand Duke of Baden organized the Jewish congregations of his country upon the Napoleonic model, Asher was elected member of the consistory and chief rabbi ("Oberrath" and "Landrabbiner") of the grand duchy. He accepted these positions in 1810, and occupied them until his death, declining a call to Paris and, later, one to Metz. Asher was a strict Talmudist of the old school, and very orthodox in his views, though at the same time tolerant of those of others.

In his last years his health was very precarious, and the work of the rabbinate was done by his assistant, Elias Willstätter. Shortly before his death he sent various manuscripts dealing with rabbinical subjects to Wilna; but only some responsa were published—in a work of his father, "She'elot u-Teshubot Sha'agat Aryeh ha-Ḥadashot," Wilna, 1873. One of his sons, who adopted the family name "Ascher," was rabbi of Bühl, and died there Feb. 20, 1838.

BIBLIOGRAPHY: *Allg. Zeit. des Jud.* 1837, pp. 252, 260.

J. S. MAN.

LÖW, BENJAMIN WOLF: Polish-Hungarian rabbi; born in Wodzislaw, government of Kielce, Poland, 1775; died at Verbo, Hungary, March 6, 1851. His father, Eleazar Löw, instructed him in Talmudic literature, and at an early age he became rabbi of a Polish congregation. In 1812, following his father to Austria, he became rabbi of Kolin, Bohemia. In 1826 he was called as rabbi to Gross-Tapolcsany, Hungary, and in 1836 to Verbo, where he spent the remainder of his life. His only work is "Sha'are Torah," a treatise on the principles of Talmudic law which shows the author's methodical mind and vast knowledge of Talmudic literature. Three parts of the work appeared in print (Vienna, 1821 and 1850; Satoralja-Ujhely, 1872), while the fourth part is still in manuscript. Wolf Löw was twice married; his first wife, from whom he obtained a divorce, was the daughter of Ephraim Zalman Margolioth of Brody; the second was the daughter of Isaac Landau, rabbi of Auschwitz. Löw's son **Jeremiah,** rabbi in Satoralja-Ujhely, was the recognized leader of the Orthodox party in Hungary and its spokesman in an audience which its deputation obtained with the emperor in order to protest against the establishment of a rabbinical seminary ("Allg. Zeit. des Jud." 1864, p. 292). He was nevertheless opposed to the secession of the Orthodox from the whole body of Judaism and therefore refused to take part in a congress planned by the Orthodox (*ib.* 1870, p. 786). Upon his death in 1872 he was succeeded by his son Eleazar, who was later called to the rabbinate of Unghvar, of which he is still (1904) the incumbent. Other grandsons of Wolf Löw are **Abraham** and **Benjamin Singer,** joint authors of "Ha-Madrik," a pedagogic anthology of the Talmud. Moses Löb Bloch was Wolf Löw's nephew and pupil.

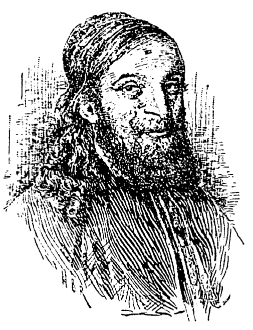
D.

LÖW, LEOPOLD: Hungarian rabbi; born at Czernahora, Moravia, May 22, 1811; died at Szegedin Oct. 13, 1875. He received his preliminary education at the yeshibot of Trebitsch, Kolin, Leipnik, and Eisenstadt (1824-35), and then studied philology, pedagogics, and Christian theology at the Lyceum of Presburg and at the universities of Pesth and Vienna (1835-41). After having been a teacher at Prossnitz, he succeeded to the rabbinate of Gross-Kanizsa (Sept. 10, 1841).



Leopold Löw.

Löw early in his career acquired a knowledge of Hungarian, and was the first to introduce it into the synagogue service, his first sermon in that language being printed in 1845. In 1844 he began his literary activity in behalf of the emancipation of the Hungarian Jews, taking the lead in that struggle until its object was attained (1867). The periodical "Ben Chananja," edited by him from 1858 to 1867, was an especially influential factor in this movement.

In 1846 Löw had been called to Papa, where he encountered many difficulties. After the revolution he was denounced by his enemies, and was arrested, but was pardoned by General Haynau (Dec. 14, 1849) and liberated after two months' imprisonment. In consequence of this persecution he accepted a call to Szegedin, where he was installed Dec. 10, 1850. He refused subsequent calls to Lemberg, Brünn, and Bucharest, as well as to the Hochschule für die Wissenschaft des Judenthums at Berlin.

Influence on Hungarian Reform.

Löw brought his thorough knowledge of history, theology, and esthetics to bear upon the reform of the ritual in agreement with modern views. He was the foremost preacher of Hungary, especially in the vernacular, and was invited to participate in nearly all the patriotic celebrations and synagogal dedications. His Hungarian sermons (1870) formed the first Jewish collection of the kind issued in that language. Löw combined the careful, logical arrangement of the Christian sermon with a clever analysis of complicated haggadic sentences. His studies, beginning with the history of the Halakah, subsequently included the entire Jewish archeology of post-Talmudic time. He endeavored to determine the development of Jewish life and law as it appears in the halakic literature, and to disprove, in the interest of Judaism, the view that Judaism remained stationary in its manners and customs down to the beginning of the Reformation in Germany. His most important archeological studies and responsa were written for the purpose of proving the development of various institutions and of showing the influence, in many cases, of foreign customs.

Löw was a leading authority both from a scientific point of view and in questions of practical theology. The absolute (1850-66) as well as the constitutional government (1867) of Austria and especially that of Hungary were guided by the replies he gave to their questions in matters referring to the organization of the Jewish ritual and schools. Jewish education throughout Hungary owes much to him. Down to his death he was the leader of the progressive Hungarian Jews, especially after the general congress—which was convened against his advice and in which he did not take part—had resulted in a schism among the Jews of Hungary instead of the union that had been anticipated.

His Works.

Aside from his works on the Halakah, Löw left only one other larger work, "Ha-Mafteaḥ" (1855), a history (in German) of exegesis among the Jews: this is still authoritative. After the emancipation, when he gave up the editorship of "Ben Chananja," he devoted himself to larger archeological monographs, of which the following were published: "Die Graphischen Requisiten" (1870-71) and "Die Lebensalter in der Jüdischen Literatur" (1875). Fragments of a third volume, "Der Synagogale Ritus," were published posthumously (1884). His smaller works have appeared in five volumes (Szegedin, 1889-1900), the last of which contains a complete bibliography of his works.

Bibliography: Löw and Kulinyi, *A Szegedi Zsidók*, 1888, pp. 172-251.

S.

Of Löw's sons, **Immanuel Löw,** a rabbi and Orientalist (born at Szegedin, Hungary, Jan. 20, 1854), was educated at his native town and at Berlin, where he studied at the Lehranstalt für die Wissenschaft des Judenthums and at the university, graduating as rabbi and as Ph.D. in 1878. The same year he became rabbi in Szegedin, where he is still (1904) officiating.

Among his books may be mentioned: "Aramäische Pflanzennamen," Vienna, 1881; "A Szegedi Zsidók," Szegedin, 1885; "A Szegedi Chevra," *ib.* 1887; "Alkalmi Beszédek," *ib.* 1891; "Az Ezredév Nyolc Beszéd," *ib.* 1896; "Löw Immánuel Beszédei," *ib.* 1900; "Imádságok," 3d ed. *ib.* 1903; "Vörösmarty Mihály," *ib.* 1900; "Szilágyi Dezsö," *ib.* 1901; "Tisza Kálmán," *ib.* 1902; "Kossuth Lajos," *ib.* 1902; "Templomszentelö," *ib.* 1903; "Deák Ferenc," *ib.* 1903. He has furthermore contributed articles on Syriac lexicography to various volumes of the "Z. D. M. G.," and has edited the following works: "Schwab Löw, Emlékeztetés a Vallásban Nyert Oktatásra," 5th ed. Szegedin, 1887; "Löw Lipót, Bibliai Történet," 10th ed. Budapest, 1902; "Leopold Löw: Gesammelte Schriften," i.-v., Szegedin, 1889-1900.

s. F. T. H.

Another son, **Samuel Löw** (born Sept. 11, 1846, at Papa; studied at Szegedin and Vienna [M.D. 1871]), is a physician. In 1873 he went to Budapest, where three years later he founded the "Pester Medizinisch-Chirurgische Presse." In this periodical, of which he is (1904) the editor-in-chief, most of his scientific articles have appeared.

A third son, **Theodor Löw** (born Nov. 14, 1848, at Papa), is a lawyer in Budapest. The following are his chief works: "Iromány Példák az uj Magyar Csödeljáráshoz" (Budapest, 1882), on the new Hungarian bankruptcy proceedings, and "A Magyar Büntetö Törvénykönyv a Büntettekröl és Vétségekröl" (*ib.* 1884), on the Hungarian criminal and civil codes.

S. L. V.

A fourth son, **Tobias Löw**, was born June 5, 1844, at Gross-Kanizsa, Hungary, and died June 7, 1880, at Budapest, where he had been acting attorney-general. In 1874 he founded the "Magyar Igazságügy," a legal periodical in the interests of Hungarian jurisprudence and legislation. Löw took an active part in the preparation of the Hungarian penal code, for which he edited the material (1880).

A fifth son, **William Löw**, is a lawyer and editor in New York city.

S.

LÖW, MORITZ: Astronomer; born at Mako, Hungary, in 1841; died in Steglitz, Berlin, May 25, 1900; studied at the universities of Leipsic and Vienna, and received his Ph.D. degree from the University of Budapest (1867). After graduating he became an assistant at the Leipsic observatory, and in 1883 was appointed section chief in the Prussian geodetic institute at Berlin, with the title of professor.

Löw's principal works are: "Elemente der Planeten"; "Einfluss der Verbesserten Sternörter auf die Polhöhen der Gradmessung in Ostpreussen"; "Polhöhe von Helgoland"; "Zur Theorie der Passage-Instrumente im Ersten Vertikal"; "Astronomisch-Geodätische Ortsbestimmungen im Harz"; "Polhöhebestimmungen im Harzgebirge Ausgeführt 1887–91."

S. N. D.

LÖW, SAMUEL (called also **Samuel Kollin**, or **Kelin**): Talmudist; son of Naṭe (נטע = Nathan) ha-Levi; born at Kolin, Bohemia, about 1720; died May 20, 1806, at Boskowitz, Moravia, where for nearly sixty years he had presided over a yeshibah. He wrote: "Maḥaẓit ha-Sheḳel," an extensive subcommentary on Abraham Abele Gombiner's "Magen Abraham" on Shulḥan 'Aruk, Oraḥ Ḥayyim (Vienna, 1807–8; 2d ed. 1817; several times reprinted); "Hilkot Niddah" (Lemberg, 1858); and "Hilkot Meliḥah" (*ib.* 1860). His son Wolf BOSKOWITZ delivered the sermon at his funeral ("Ma'amar Esther," Ofen, 1837). His descendant in the fifth generation, Dr. **Max Anton Löw**, a convert to Roman Catholicism, was the attorney of the anti-Semite DECKERT ("Mittheilungen der Gesell. zur Abwehr des Antisemitismus," 1896, pp. 45, 48; 1897, pp. 190, 246; "Oest. Wochenschrift," 1896, p. 65).

LÖWE BEN BEZALEEL. See JUDAH LÖW BEN BEZALEEL.

LÖWE, JOEL: German commentator; born in 1760; died in Breslau Feb. 11, 1802. He signed his name in Hebrew writings as **Joel** ברילל (= "son of R. Judah Löb"). At the age of twenty he went to Berlin, where he received instruction from Isaac Satanow, who was a follower of Moses Mendelssohn. In Berlin Löwe met Mendelssohn, his acquaintance with whom soon ripened into friendship. Mendelssohn's influence was doubtless instrumental in securing for Löwe the position of tutor in the house of the influential David Friedländer. Löwe became a most intimate friend of another prominent Mendelssohnian, Isaac Abraham Euchel, whose first work, a Hebrew biography of Mendelssohn, contains a dedicatory letter addressed to Löwe. At the close of his life Löwe was principal of the Wilhelms-Schule in Breslau.

Löwe was an excellent Hebraist, grammarian, and exegete, and, like most Mendelssohnians, was also a "Schöngeist." Conjointly with Aaron Wolfsohn he edited "Ha-Meassef," in which periodical he published a large number of poems and essays. He belonged to the bi'urists who assisted Mendelssohn in his commentaries on the Bible. His own main work was a critical Hebrew commentary and an excellent introduction to the Psalms (1788), which latter forms a history of Biblical poetry; and he published, also, Mendelssohn's German translation of the Psalms in Hebrew letters. In company with Aaron Wolfsohn, Löwe published Mendelssohn's German translation of the Song of Solomon with a Hebrew commentary. He was the first to translate the "Haggadah shel Pesaḥ" into German (1785). Of his "'Ammude ha-Lashon," on the elements of the Hebrew language, only the first part was published (1794). He wrote also on chronology, and was a contributor to Eichhorn's "Allgemeine Bibliothek der Biblischen Literatur." His plan to publish a Hebrew grammar on a large scale did not materialize.

S. E. SCHR.

LÖWE, KONRAD: Austrian actor; born at Prossnitz, Moravia, Feb. 6, 1856. He took a law course at the University of Vienna, and then went on the stage (1878). After filling engagements in various Austrian and German cities he was called in

1895 to the Hofburgtheater, Vienna, of which company he has since been a member. He plays heroic parts.

Löwe has also been active as a writer and dramatist. He has published a volume of poetry entitled "Leben und Lieben" (Leipsic, 1890), and has adapted Grabbe's "Herzog Theodor von Gothland" (Vienna, 1892).
S.

LÖWE, LUDWIG: German physician; born at Berlin March 11, 1844. After graduating from the gymnasium, he attended the universities of Jena, Würzburg, Strasburg, and Breslau, leaving the last institution with the degree of doctor of medicine in 1872. In the following year he became an assistant at the anatomical institute of the University of Strasburg, which position he held till 1875, when he became an assistant at the dermatological hospital and dispensary of the Charité at Berlin, resigning this position in 1876. In 1878 he was admitted to the medical faculty of the University of Bern as lecturer on anatomy. He finally returned to Berlin and established himself as a specialist in diseases of the ear, nose, and throat.

Löwe has contributed several essays to medical journals, and is the author of: "Beiträge zur Anatomie der Nase" (Berlin, 1878, 2d ed. 1883); "Beiträge zur Entwicklungsgeschichte des Nervensystems" (vol. i., Berlin, 1880; vol. ii., Leipsic, 1883); "Lehrbuch der Ohrenheilkunde," 1884.

LÖWE, MOSES SAMUEL (Johann Michael Siegfried Löwe): German painter and engraver; born at Königsberg, Prussia, June 24, 1756; died there May 10, 1831. Aided by the friendship and influence of the Friedländer family, he had achieved such a reputation by 1780 that the empress Catherine II. of Russia commissioned him to paint her portrait. His pictures were among the most popular in the German exhibitions, and he was one of the foremost miniaturists and pastel-painters of his time. He was also a master of the game of chess. His "Bildnisse Jetzt Lebender Berliner Gelehrten mit Selbstbiographien" (Berlin, 1806–7) was praised by Goethe ("Werke," xxviii. 60 *et seq.*).

LÖWENBERG, JULIUS: German geographer; born at Strzelno, Prussia, 1800; died at Berlin Dec. 12, 1893. He was educated in Berlin, where he became acquainted with Alexander von Humboldt, who assisted him in various ways. He wrote: "Afrika" (1835); "Historisch-Geographischer Atlas" (1836–40); "Gesch. der Geographie" (1840); "Alexander von Humboldt" (1842); "Humboldt's Reisen in Amerika und Asien" (1844); "Gesch. der Geographischen Entdeckungen" (1882); "Die Entdeckungs- und Forschungsreisen in den Beiden Polarzonen" (1886). His last years he spent in the Jewish home for aged people in Berlin.

J. D.

LÖWENFELD, LEOPOLD: German physician; born in Munich Jan. 23, 1847; educated at the gymnasium and university in his native city (M.D. 1870). During the Franco-Prussian war he was assistant physician in a Bavarian field-hospital. After several years of practise in the United States, he settled permanently in his native city (1875).

Löwenfeld has published: "Studien über Aetiologie und Pathogenese der Spontanen Hirnblutungen," 1886; "Sexualleben und Nervenleiden," 1891; "Pathologie und Therapie der Neurasthenie und Hysterie," 1893; "Lehrbuch der Gesammten Psychotherapie," 1897; "Der Hypnotismus: Handbuch der Lehre von der Hypnose und der Suggestion," 1901; "Die Psychischen Zwangserscheinungen, auf Klinischer Grundlage Dargestellt," 1904; "Die Moderne Behandlung der Nervenschwäche," 4th ed. 1904.
S.

LÖWENGARD, MAX: German rabbi; born in Württemberg; died at Basel May 25, 1876. He was a friend of Berthold Auerbach and a diligent student of Schelling's philosophy. Though a fervent advocate of Reform in his youth, he became a zealous supporter of Orthodoxy in the latter part of his life, after having occupied rabbinates in Gebenhausen and other communities of Württemberg. He was the author of "Beiträge zur Kritik der Reformbestrebungen in der Synagoge" (Stuttgart, 1841); "Auch Einige Worte Ueber das Neue Gebetbuch im Hamburger Tempel" (Tübingen, 1842); and "Jehova, Nicht Moloch, War der Gott der Hebräer," a refutation of Ghillany's "Die Menschenopfer der Alten Hebräer" (Berlin, 1843). The first work appeared under the pseudonym "Juda Leon."

LÖWENSTAMM, LEVI SAUL. See ARYEH LOEB BEN SAUL.

LÖWENSTAMM, SAUL: Rabbi and Talmudist; born at Rzeszow 1717; died at Amsterdam June 19, 1790. He is known as the author of "Binyan Ariel" (Amsterdam, 1778), which title he chose as a pun on "Ben Aryeh." As he tells in the preface, he was appointed rabbi at לאקטש (Lakacz, Hungary?), and afterward at Dubno in succession to his father-in-law, Abraham Kahana (d. 1749); and in 1755 at Amsterdam, on the death of his father, Levi Saul LÖWENSTAMM.

Besides "Binyan Ariel," Saul Löwenstamm wrote: annotations on Niddah (Amsterdam, 1765), on the Shulḥan 'Aruk (*ib.* 1765), on the Pentateuch (*ib.* 1768–1777), on the Mishnah (*ib.* 1775), and many approbations and poems (1766–78). His "Binyan Ariel" is divided into three parts: (1) annotations on the Pentateuch; (2) on the Five Rolls; and (3) on some passages from the Talmud.

Löwenstamm devoted much attention to the bet ha-midrash founded by his father. The generosity of the members of the community enabled him to build a new home, which he occupied June 22, 1778.

Some of the memorial addresses delivered on his death have been published. He was succeeded by his son **Jacob Moses Löwenstamm.**

D. E. SL.

LÖWENSTEIN, BARUCH SOLOMON: Russian mathematician; born at Wolodarka, Russia, in the second quarter of the nineteenth century. He wrote: "Bikkure ha-Limmudiyyot," explanations of mathematical passages in the works of Abraham ibn Ezra, Moses Maimonides, and Joseph Delmedigo. He also annotated and published a second edition of "Shebile di-Reḳia'," by Elias ben Ḥayyim Kohen Höchheimer, on the rules of the calendar, with the elements of geometry, trigonometry, and astronomy (Warsaw, 1863).

D. S. MAN.

LÖWENSTEIN, BERNHARD: Austrian rabbi; born at Meseritz, province of Posen, Feb. 1, 1821; died at Lemberg March 15, 1889. Upon the recommendation of Ludwig Philippson he was elected preacher in Szent Miklos, Liptau, Hungary (1845), where he became known as the pioneer of the modern synagogue service in Hungary. In 1857 he left Szent Miklos for the rabbinate of Butschowitz, Moravia, whence, shortly afterward, he was called as rabbi to Lemberg. Löwenstein was an impressive preacher and an indefatigable communal worker. He was twice decorated by the Emperor of Austria. In addition to some sermons, he published a volume of poems under the title "Jüdische Klänge" (Brünn, 1862).

BIBLIOGRAPHY: Teller, *Shem 'Olam*, Cracow, 1889; Buber, *Anshe Shem*, p. 126, Cracow, 1895.

D.

LÖWENSTEIN, L. H.: Hebrew scholar; died at Frankfort-on-the-Main about 1850. He was reviser in the publishing-house of Isaac Lehrberger at Rödelheim, which office was afterward held by Seligman BAER. He published: The Book of Proverbs, edited from manuscripts, with a Hebrew commentary and a German metrical translation (Frankfort-on-the-Main, 1838); "Ḳol Bokim," the Book of Lamentations, with a Hebrew commentary and a German metrical translation, to which he added various dirges introduced into the liturgy of the Synagogue (*ib.* 1838); "Damascia: die Judenverfolgung zu Damascus und Ihre Wirkung auf die Oeffentliche Meinung, Nebst Nachweisungen über den Ursprung der Gegen die Juden Wiederholten Beschuldigung des Ritualmords" (Rödelheim, 1840; 2d ed. 1841); "Mizmor le-Todah," an ode addressed to Moses Montefiore on his return from the Orient (*ib.* 1841); "Stimmen Berühmter Christen über den Damascener Blutprozess" (*ib.* 1842). He also edited the Pentateuch with Targum Onḳelos, Rashi's commentary, and an explanation of the French words occurring in the last-named (2 vols., *ib.* 1848).

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* ii. 270; Steinschneider, *Cat. Bodl.* cols. 154, 1630.

D. S. MAN.

LÖWENSTEIN, LEOPOLD: German rabbi; born in Gailingen, Baden, Dec. 1, 1843. He attended the gymnasium at Bischofsheim-on-the-Tauber, receiving at the same time instruction in the Talmud from his father, who was district rabbi there. He subsequently entered the University of Würzburg (1862), attending concurrently the Talmudic lectures of Rabbi Seligmann Bär Bamberger, and then went to the yeshibah of Rabbi Israel Hildesheimer at Eisenstadt, Hungary. In 1872 he became district rabbi in his native place, and exchanged that position in 1887 for his present one in Mosbach, Baden, where he officiates as rabbi for the three districts of Mosbach, Merchingen, and Wertheim. In 1891 he was decorated with the Zähringer Löwenorden.

Löwenstein published: "Gesch. der Juden am Bodensee" (1879), and "Beiträge zur Gesch. der Juden in Deutschland," i. 1895, ii. 1898; since 1900 he has edited the "Blätter für Jüdische Gesch. und Literatur," which appears as a supplement to "Der Israelit" of Mayence. S.

LÖWENSTEIN, RUDOLF: German author; born at Breslau Feb. 20, 1819; died at Berlin Jan. 6, 1891. When only nine years of age he was baptized. Educated at the gymnasium at Glogau and the universities of Breslau and Berlin, he received the degree of Ph.D. in 1843.

As early as 1836 some of Löwenstein's poems had been printed in the journals of Silesia; and his reputation was established by the appearance in 1846 of his "Der Kindergarten," a collection of songs for children. In 1848 he with David Kalisch and Ernest Dohm founded the well-known "Kladderadatsch," of which he became one of the chief editors. The revolution of 1848 found Löwenstein on the liberal side, and he was expelled from Prussia in 1849 for his political activity. Returning to Berlin in 1850, he resumed the editorship of "Kladderadatsch" and continued in this capacity for thirty-seven years. In 1863 he became editor also of the political part of the "Gerichtszeitung." In 1887 he retired from public life.

Besides his "Der Kindergarten," he wrote "Ehret die Frauen," Berlin, 1874, and many songs, most of which were set to music.

His political poems in the "Kladderadatsch" gained him a wide reputation, especially those written during the eventful period 1860–80.

LÖWENTHAL, JOHANN JACOB: Hungarian chess-master; born July, 1810, in Budapest; died at St. Leonard's-on-Sea, England, July 20, 1876. He was educated at the gymnasium of his native city, and received a civil appointment under the administration of Louis Kossuth. On the downfall of the latter, Löwenthal was expelled from Austria-Hungary, and he emigrated to America (1849). In 1851 he went to London, and thenceforward resided permanently in England. At the Manchester tourney of 1857 Löwenthal defeated Anderssen for first place; in 1858 he lost a match with Morphy; and in the same year he gained first prize at Birmingham.

Löwenthal was for some time chess editor of "The Illustrated News of the World" and of "The Era." He was editor also of "The Chess Players'

Magazine" (1863-67). In 1860 he published "Morphy's Games of Chess, with Analytical and Critical Notes." Under the influence of W. G. Ward, with whom he played chess, Löwenthal became a Roman Catholic.

J. A. P.

LÖWENTHAL, NATHAN: Russian histologist; born in 1856; educated at the Academy for Physicians and Surgeons at St. Petersburg and at the universities of Kiev and Geneva. From 1881 to 1884 he was assistant to Schiff at Geneva, but he went to Lausanne in the latter year as assistant professor of histology, becoming professor in 1890.

Löwenthal is the author of the following monographs: "Ueber den Unterschied der Secundären Degeneration des Seitenstranges nach Hirn- und Rückenmarksverletzungen," in Pflüger's "Archiv für Physiologie," 1883; "Contribution Expérimentale à l'Etude des Atrophies Secondaires du Cordon Postérieur et de la Colonne de Clarke," in "Recueil Zoologique Suisse," 1885-86; (in collaboration with Herzen) "Trois Cas de Lésion Médullaire," etc., in "Archives de Physiologie Normale et Pathologique," 1886; "Experimentalisch-Anatomischer Beitrag zur Kenntniss der Bahnen im Rückenmark und Gehirn"; "Notiz über die Protoplasmastructur der Kornzellen des Eierstockes," and "Zur Kenntniss des Keimfleckes im Ureie Einiger Säuger," in "Anatomischer Anzeiger," 1887-95; "Die Spermatogenese bei Oxyuris Ambigua," "Die Befruchtung, Reifung, und Teilung des Eies von Oxyuris Ambigua," and "Die Harder'sche Drüse," all in "Internationale Monatsschrift für Anatomie," 1889-96; "Zur Frage über die Anwendung von Terpentinöl in der Histologischen Technik," in "Centralblatt für Physiologie," 1889; "Technisch-Histologische Notiz" and "Ueber eine Neue Alkoholische Carminlösung," in "Zeitschrift für Wissenschaftliche Mikroskopie," 1893-1902; "Contribution à l'Etude du Lobe Olfactif des Reptiles," in "Journal de l'Anatomie et de la Physiologie," 1894; "Drüsenstudien" and "Beitrag zur Kenntniss der Struktur und der Teilung von Bindegewebszellen," in "Archiv für Mikroskopische Anatomie," 1900-3; "Beitrag zur Kenntniss der Beziehungen der Taenia Semicircularis," in "Morphologisches Jahrbuch," 1902. He has written also two books: "Questions d'Histologie: La Cellule et les Tissus," Paris, 1901; and "Atlas zur Vergleicheden Histologie der Wirbeltiere," Berlin, 1904. S.

LÖWENTHAL, NAUMANN: German teacher and writer; born Feb. 25, 1819, at Schmiegel; died at Posen Feb. 28, 1855. He attended the gymnasium in Lissa and the universities of Berlin and Breslau, where he devoted himself principally to the study of philosophy, mathematics, and the natural sciences. He took his degree at Halle in 1841, and in 1844 passed the examination "pro facultate docendi" at Berlin. Löwenthal was the first Jew in Prussia to be appointed a head teacher, and that at a municipal technical school ("Realschule") in Posen. Besides many treatises in technical periodicals, he published "Die Physiologie des Freien Willens," Leipsic, 1843.

Bibliography: *Allg. Zeit. des Jud.* xix. 203.

S. M. K.

LÖWI, ISAAC: German rabbi; born at Adelsdorf, near Erlangen, Bavaria, Jan. 31, 1803; died at Fürth Dec. 26, 1873. He received his Talmudical training at the yeshibah of Wolf Hamburger at Fürth, and studied philosophy and philology at the University of Munich. He was rabbi of Uhlfeld from 1827 to 1830, when he was elected district rabbi of Fürth. Though his election was duly confirmed by the government (Dec. 1) the opposition of the Orthodox party rendered necessary a decree of installation by King Ludwig I. (March 10, 1831). As early as Dec. 30, 1831, and Feb. 29, 1832, his adversaries, among whom was his former teacher, Wolf Hamburger, petitioned the government to depose Löwi for teaching irreligious doctrines in his sermons and in the school and for introducing reforms into the divine services without regard to ancient customs and religious laws. For nearly eight years this suit was pending, until the government, by an order of Oct. 23, 1838 (renewed April 13, 1839), enjoined upon Löwi "to be more careful in his words and actions and to have more regard for those who conform to the true Mosaic ceremonials and who do not adhere to 'pernicious neology.'" Löwi was also sentenced to pay one-third of the costs of the suit; in the following year he was enjoined from performing the rite of confirmation. When the Orthodox party renewed its attacks, the government (1842) ordered a new election, which resulted in a strong majority for Löwi, after which he was allowed to perform the ceremony of confirmation.

Löwi's opponents nevertheless continued their complaints and insisted upon his dismissal; the government again decided in his favor, but allowed the dissatisfied members to elect for themselves an Orthodox rabbi who might officiate at weddings and decide religious questions. The agitation against Löwi gradually ceased. He stood in high esteem with King Ludwig II., who knighted him in 1869. In Löwi's last years Emil Neubürger became his assistant, succeeding him upon his death. From 1857 to 1872 the young congregation of Nuremberg was included in his rabbinical district. When, on Dec. 23, 1856, by order of the district government, the magistrate of Fürth requested him to serve as the spiritual guide of the Nuremberg Jews, Löwi declined, giving as his reason their religious indifference. But when the government insisted and a committee of the Jews of Nuremberg expressed regret for their former conduct, he accepted the added responsibility (Feb. 1, 1857). Löwi lent efficient aid in establishing the Nuremberg congregation and in regulating its religious affairs.

LÖWINSOHN, JACOB MORDECAI BEN JUDAH LÖB: Russo-Polish scholar and journalist; born in Grodno 1832; died in Warsaw Feb. 13, 1878. A son of the rabbi of Grodno, he was trained in Talmud, and then studied Russian, German, Polish, and French, which he mastered in a very short time. Thus equipped he entered upon a journalistic career. He published numerous articles in Russian papers, and when, in 1862, Daniel Neufeldt founded the JUTRZENKA, Löwinsohn became an active collaborator on it, always defending the interests of his coreligionists. He was a great controversialist, and had heated discussions with R. Hirsch Kalischer in "Ha-Maggid," and with L. J. Shapiro in the "Jutrzenka."

He settled in Serhei, government of Suwalki, where he made the acquaintance of David Gordon, editor of "Ha-Maggid," and Rabbi Ḥayyim Fillippower. About 1868 he passed his examination at the Rabbinical Seminary of Wilna, where he was ordained rabbi; but he never accepted a rabbinate.

Of his first work, "Ha-Adam be-Ẓelem Elohim" (Königsberg, 1855), only a limited number of copies were printed, which he distributed among his friends. His numerous articles and essays on Jewish literature and science he published under the nom de plume י.מ.ל.

LÖWISOHN, SOLOMON: Historian and poet; born in Mor, district of Stuhlweissenburg, Hungary, in 1788; died there April 27, 1821. He studied at the yeshibah of Prague, among his fellow students being his relative Moses Saphir, the humorist. He subsequently became a corrector in the printing establishment of Anton Edler von Schmid in Vienna.

Löwisohn's works include: "Siḥah be-'Olam ha-Neshamot" (Prague, 1811); "Meliẓat Yeshurun" (Vienna, 1816), poems; "Meḥḳere Ereẓ," treating of the topography of the Bible. He wrote also for the Mishnah edition published in 1815 an essay on the language of the Mishnah. Further, he translated and annotated the festival prayers, and part of the ritual for the 9th of Ab (Vienna, 1819). His most important work is "Vorlesungen über die Neuere Gesch. der Juden" (*ib.* 1820), of which the first volume only was published.

LÖWY, ADOLF: German physiologist; born in Berlin June 29, 1862; educated at the gymnasium and university of his native city (M.D. 1885), where he became privat-docent in physiology at the latter in 1895, and assistant professor in 1900. For his monograph "Untersuchungen über die Respiration und Circulation bei Aenderung des Druckes und des Sauerstoffgehaltes der Luft," Löwy received a prize from the Smithsonian Institution, Washington, in 1895. Numerous other publications of his have appeared in Pflüger's "Archiv für die Gesammte Physiologie," in the "Archiv für Anatomie und Physiologie," and in "Virchow's Archiv." S.

LÖWY, ALBERT: English rabbi and communal worker; born at Aussee, Moravia, Dec., 1816. He studied first at Olmütz, and then moved to Vienna, where under Professor Steinschneider he began a systematic study of Hebrew and Arabic. A few years after the formation of the Reform Synagogue in London, Löwy was appointed minister in association with the Rev. Professor Marks, whom he assisted in compiling the prayer-book of the congregation. He served for fifty years, retiring in 1892. From 1871 to 1889 he acted as secretary of the Anglo-Jewish Association, which, with Dr. Benisch, he had helped to found.

Löwy's knowledge of Samaritan literature enabled him to collect and catalogue the Samaritan manuscripts belonging to the Earl of Crawford and Balcarres. He printed in the "Trans. Soc. Bibl. Arch.," 1875, the first specimen of a dialect of Aramaic current among the Jews of Urmia; and his contribution gave rise to the subsequent literature on the subject. In 1891 he printed a "Catalogue of Hebraica and Judaica in the Library of the Corporation of the City of London," with a copious subject-index. In recognition of his researches, the University of St. Andrews conferred upon him in 1893 the honorary degree of LL.D.

Löwy helped to found the Society of Hebrew Literature; and he has been a frequent lecturer before the Society of Biblical Archeology and other learned associations.

LÖWY, JACOB EZEKIEL: German rabbi and author; born at Hotzenplotz, Austrian Silesia, Aug. 24, 1814; died at Beuthen Nov. 20, 1864. After attending various yeshibot in his native country, he became a pupil of Wolf Löw in Nagy Tapolcsany, and then, inclining to Ḥasidism, he went successively to Lemberg and Brody in order to continue his rabbinical education. Finally he went to Berlin, where he acquired some secular learning. Having obtained after great difficulties a license to marry, he settled as a business man in Bielitz, and in 1846 was appointed district rabbi of Wadowice, with a seat at Oswiecin (Auschwitz). In 1854 he was elected rabbi of Beuthen, which position he continued to hold until his death.

Löwy was the author of "Biḳḳoret ha-Talmud: Kritisch-Talmudisches Lexikon" (vol. i., Vienna, 1863), containing 150 articles for a proposed Talmudic encyclopedia.

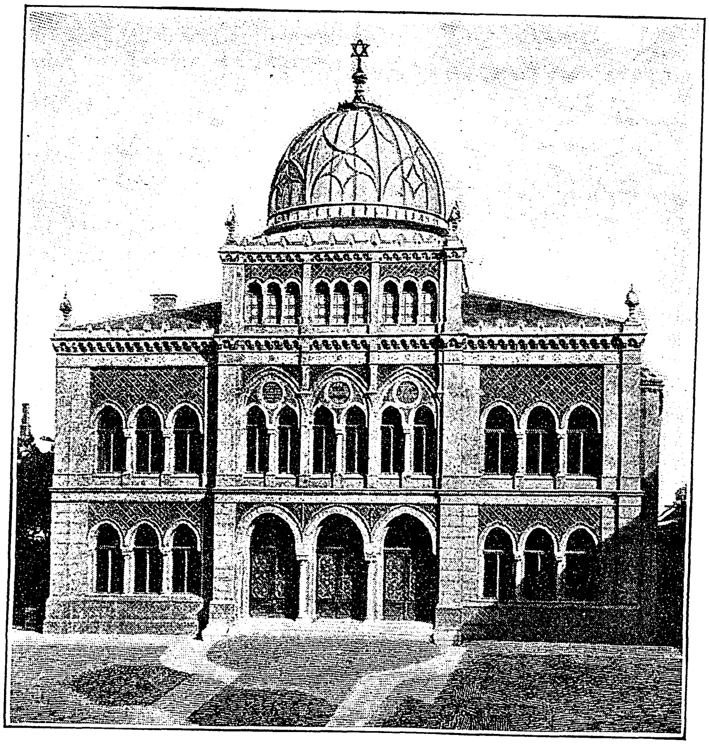
LUBARSKY, HESCHEL ABRAMOVICH: Russian writer; born at Balta Sept., 1878. He was educated in a family of Ḥasidim, in the Odessa Commercial School, and in the Riga Polytechnical Institute. In 1897, while a student in the latter institute, he joined the Zionist movement. Shortly after he went to Palestine, where he visited the Jewish agricultural colonies, which he described in a series of articles under the title "V Stranye Predkov." Returning to Odessa in 1898, he wrote "Palestina," descriptive of the Holy Land and of the condition of the Jews there (Warsaw, 1900). In 1900 Lubarsky graduated from the Riga Polytechnical Institute (as engineer), and is now (1904) pursuing his studies in Berlin. He has contributed numerous articles to the Russo-Jewish periodicals, and, in 1903, published a pamphlet, "Shestoi Kongress Sionistov," on the subject of the Sixth Zionist Congress. His father, Abraham Elijah, is a well-known Zionist.

H. R. J. L. La.

LÜBECK: Free city of Germany; situated on the River Trave, not far from the Baltic Sea; it forms, with the surrounding territory, a free state. In 1900 it had a population of 82,813, including 663 Jews. Like most of the free cities of Germany, Lübeck did not tolerate the Jews. In 1350 the city council wrote to Duke Otto of Brunswick-Lüneburg requesting him to exterminate the Jews living in his territory, as they were responsible for the plague, which would not cease until all Jews had been killed. As the council does not mention any order to this effect in the city, it is clear that Jews could not have lived there before then. In 1499 the local chronographer, Reimer Kock, states expressly that "there are no Jews in Lübeck, as they are not needed here." The Thirty Years' war and, perhaps, the Chmielnicki persecutions in Poland seem to have caused a number of Jews to go to Lübeck. The gild of the goldsmiths complained in 1658 that "many Jews and other suspicious characters sneak daily into the city to deal in precious metals"; and the council decreed, April 15, 1677, that no Jew should be permitted to stay in the city overnight without the express permission of the senate, which was rarely given. In 1680 two "Schutzjuden" of the senate, Samuel Frank and Nathan Siemssens, are mentioned. But when the senate accepted Siemssen's son-in-law, Nathan Goldschmidt, as "Schutzjude," the citizens objected, and wherever he rented a house the neighbors protested to the senate. It was, perhaps, due to an intrigue that Goldschmidt was accused of having received stolen goods (Feb. 15, 1694); the trial dragged on for at least five years, and its result is not known. The gilds continued to demand of the council the expulsion of all Jews, and finally saw their wishes fulfilled (March 4, 1699). In spite of that victory of the gilds, Jews not only made brief visits to the city, but the council permitted, as early as 1701, one Jew to remain as "Schutzjude" in consideration of an annual payment of 300 marks courant ($84).



New Synagogue at Lübeck.
(From a photograph.)

Settlement in Neighborhood.

The great difficulties which stood in the way of prospective Jewish settlers in Lübeck suggested the evasion of the prohibition by a settlement in the neighboring territory of Denmark. A number of Jews, mostly Polish fugitives, settled in the village of Moisling as early as 1700, and, in spite of constant protests by the gilds, the council had to grant them, as Danish subjects, the right to enter the city, although under great restrictions. Desiring to obtain jurisdiction over the Jews in Moisling, the city of Lübeck acquired, in 1765, the estate whose owner had feudal rights over the inhabitants of that village; when, in 1806, the King of Denmark ceded the district that included Moisling, to Lübeck the Jews there became subjects of the latter city. But when Lübeck was annexed to France (Jan. 1, 1811) all discriminations ceased; the special taxes of the "Schutzjuden" were abolished, and many Jews of Moisling, as well as of other places, moved to Lübeck, where they at once purchased a lot for a synagogue. In the following years their numbers were rapidly augmented, especially in consequence of the expulsions during the siege of Hamburg. As soon, however, as the French domination had ceased, the senate began to debate the restriction of the Jews, to whom it proposed giving "an appropriate new constitution" (1815), while the gilds peremptorily demanded their expulsion. The Jews protested against this violation of their rights, and, together with the Jewish citizens of other free cities, appealed to the Congress of Vienna, engaging Carl August Buchholz as their advocate. But the city would not yield, in spite of the intercession of the Prussian chancellor Prince Hardenberg and of the Austrian chancellor Prince Metternich. The Congress of Vienna finally adopted Article 16 of the "Bundesakte," which guaranteed to the Jews in all German states the rights which they had obtained "from" the various states, instead of "in" the various states, as the original text read (June 8, 1815).

Expelled After Congress of Vienna.

Having thus obtained a free hand, the senate of Lübeck decreed (March 6, 1816) that all Jews should leave the city within four weeks. The Jews again protested, but finally were compelled to accept the proposition of the senate, which guaranteed to all Jews who would settle in Moisling the rights of Lübeck citizens, subject to certain limitations (Sept., 1821); in 1824 all Jews, with the exception of a few "Schutzjuden," had left the city. The senate now showed a certain amount of good-will toward its Jewish subjects by giving them a house in Moisling for their rabbi, and by building a new synagogue, for which the congregation was required to pay only a moderate annual rent.

Since 1831 the Jews have had to serve in the militia; in 1837 a parochial school, subsidized by the city, was opened; and in 1839 the senate issued an order which compelled the gilds to register Jewish apprentices. A commission appointed in 1842 reported that the condition of the Jews should be improved by an extension of their rights, but their emancipation did not become perfect until the law of Oct. 9, 1848, abolished all their disabilities. In 1850 a new synagogue was acquired. This brought to the young congregation considerable annoyance; the ill-disposed neighbors, who claimed that the ritual bath connected with it spread an unbearable smell of garlic, endeavored to obtain an injunction against it (this building gave way to a new synagogue in 1880). In 1859 the rabbi moved from Moisling to Lübeck, and in the same year a parochial school was opened in the city. In 1869 the school in Moisling was closed, and in 1872 the Moisling synagogue, which had not been used for some time, was demolished. A law of Aug. 12, 1862, modified the form of oath ("More Judaico") which Jews until that time had been compelled to use, and introduced a new form, which remained in force until the German law of 1879, regulating civil procedure, abolished it.

The Lübeck congregation has a parochial school of three grades, and religious instruction for Jewish children attending public schools has been made compulsory by the law of Oct. 17, 1885. The city pays to the congregation an annual subsidy. The rabbis of the congregation have been: Akiba Wertheimer (called also Akiba Victor; up to 1816; d. 1835, as rabbi of Altona); Ephraim Joël, an uncle of Manuel and David Joël (1825–51); Süssmann Adler (teacher and preacher, 1849–51; rabbi, 1851–1869); S. Carlebach, the present (1904) incumbent (since 1869). The congregation has a number of educational, devotional, and social organizations.

LUBELSKI, PHILIPP: Polish physician; born at Zamosc 1788; died at Warsaw Feb. 3, 1879. He began his career as an army surgeon under Napoleon I., who created him an officer of the Legion of Honor. After the close of the Franco-Russian war Lubelski was appointed chief physician of the military hospital at Zamosc. From 1826 he resided permanently in Warsaw, where he engaged in private practise.

His son, **Wilhelm Lubelski** (born at Warsaw 1832; died there 1890), was likewise a physician. He studied medicine at Dorpat, Vienna, and Paris, and held the position of physician in ordinary at the hospital of the Orphan Asylum of Jesus at Warsaw. He published four medical works (1861–69).

H. R. M. R.

LUBLIN: City of Russian Poland, in the government of the same name; situated 60 miles southeast of Warsaw; in importance the third city of Poland. Numbers of Jews were living in Lublin in the fourteenth century. They were not allowed to dwell in the city proper, but were restricted to the suburb of Kazimierz on the Bystrzyc, a tributary of the Wierprz. This suburb was named after Casimir III., by whose order it was assigned to the Jews in 1396. Later it became known as the "Piaski Zydowskie" (Jewish Strand). The Jews were allowed gradually to occupy a district within the city until the accession to the Polish throne of Sigismund II. (1518), who confined the settlement of the Jews to their original quarter. In the following year the king imposed upon them a special tax called "Striegeld," and, to please their competitors, the Christian merchants, restrained their commercial enterprises. The manufacture of beer, which was at that time exclusively in the hands of the Jews, was now restricted by the king to those who had acquired real property in the city. In 1552 he prohibited the Jews from dealing in food.

From the middle of the sixteenth to the middle of the eighteenth century Lublin was a great center of Jewish activity and the principal place of meeting of the Council of Four Lands.

Special Taxes and Restrictions.

At the end of the sixteenth century the Jews, in consideration of the payment of special taxes, were permitted to reside in the Podzance quarter of Lublin. The government record of licenses (part xxxvi., No. 14) of the year 1596 shows that there were then 100 Jewish houses in Podzance, and that the annual tax was fixed at 80 florins and 27 grivins. Sigismund August increased the tax on houses to 250 fl. Besides taxing the tenants of the houses 70 fl., he imposed the following additional taxes: for 16 butcher-shops, 53 fl. 6 gr.; for 20 hot-bath tubs, 80 fl.; for a bath-house and a liquor-shop at Podzance, 200 fl. The number of Jews in the city at that time may therefore be estimated at about 2,000. Their numbers steadily increased, and in 1630 the annual tax paid by them amounted to 300 Polish guilders. Ladislaus IV. confirmed (March 21, 1633) the privileges granted to the Jews by former kings of Poland.

Immediately prior to the Cossacks' Uprising in 1648 the Jesuits instigated a riot and attacked the Jewish quarter. Twenty houses were ransacked, eight Jews being killed and twenty wounded. The Jesuits were prosecuted before Ladislaus IV. and were severely punished. Later (1650) the Jesuits established in Lublin a printing-press which existed till 1670. They published many works hostile to the Jews, thus creating enmity between the latter and the Christian inhabitants. To the influence of the Jesuits is attributed also the decree of 1650, forbidding Jewish apothecaries to prepare medicine, and that of 1654, prohibiting performances by Jewish musicians not having a special permit from the government.

Persecutions and Massacres.

The Jewish population of Lublin in 1656 was about 2,000 families, and, including those who for safety fled from the neighboring villages, there must have been in the city at least 10,000 Jews, most of whom were massacred by the Cossacks. Among the martyrs were many prominent rabbis and scholars. Some entered the cemetery and, after engraving their names upon the wall, arranged to be buried alive rather than fall into the hands of the mob and be tortured. Rabbi Samuel b. David, in his "Ḥesed Shemuel" (ed. Amsterdam, 1699, pp. 2b, 43b), assigns the occurrence to the day preceding the Sukkot festival of 5417 (= Oct. 15, 1656), and describes his own miraculous escape (see Cossacks' Uprising).

Privileges for Jews.

Under the city magistrate Jan Carl Danielowicz the Jews of Lublin fared better than they had done at any previous time. In his charter of Nov. 21, 1675, concerning the rights of the Jews, Danielowicz reviews the privileges granted by the former Polish kings, which he declares to be a safeguard to Jewish life and property. He enumerates the following provisions: (1) The Jews of Lublin to contribute no more than the customary real-estate tax of 700 Polish guilders (this tax covered the dwellings, synagogues, charitable institutions, cemetery, shops, wax-factories, and bath-houses). (2) All contracts made between Christians and Jews residing in Podzamce, regarding the purchase and sale of mead, beer, brandy, etc., to be valid. (3) The commercial tax on Jews to be no higher than the same tax on Christian citizens in proportion to their respective numbers. (4) Jews to be exempt from having soldiers quartered among them either permanently or temporarily. (5) Jews to be exempt from furnishing food and clothing supplies to the guard of the city hall. (6) No encroachment to be made on the Jewish cemetery. (7) In legal suits concerning chattels appeals to be made to the city magistrate; in other cases, to the Supreme Court. "I make," he says, "these provisions voluntarily, and promise to fulfil them for the benefit of the Jews who have petitioned me, and for the benefit of their descendants, so long as I live; and I pray that my successors shall follow my example."

King John Sobieski in 1679 prohibited trading between Jews and Christians during Christian holidays, and ordered the confiscation of any goods sold on those days. King Augustus II. in 1720 further restricted Jewish commerce, and annulled the leases of shops to Jews in the Christian quarters of the town on the ground that the Jews were keen competitors of the Christian merchants. Augustus III. forbade (1736) Jews to act as agents of Christians. It is claimed that this restriction was formulated at the solicitation of the Jewish congregation against certain of its members, who, in order to shirk the communal tax, and also to avoid the special government tax, severed their connection with the synagogue and transacted business as the nominal agents of Christians, and shared the profits with them. Stanislaus Augustus Poniatowski, the last King of Poland, on his coronation in 1764, ordered the expulsion of Jews from Lublin and its suburbs. Later they were permitted to return subject to curtailed privileges and heavy taxes. The Russian army captured Lublin in 1831.

Communal Work.

Jewish communal life in Lublin began with the above-mentioned settlement of Jews in the suburb of Piaski, where they were permitted to form a congregation under a charter and with a seal bearing the emblem of a hornless deer. Not only were they allowed to have their own civil laws, but they were even appointed attorneys and judges in the general courts. Indeed, to such an extent was this the case that the waywodes of Warsaw specially assembled in 1540 to prohibit such appointments.

The Jewish cemetery, situated on the Gradzisk hill, was granted to the Jews by Tenczinski in 1555; but it had already been utilized as a Jewish burial-ground, as is evidenced by the record of a tombstone dated 1541.

The congregational minute-books, which had been placed in the government archives, were destroyed by fire in 1829. They contained valuable data for the history of the Lublin Jews and of the Council of Four Lands. There is left but one pinḳes of the ḥebra ḳaddisha beginning with 1685, interesting extracts from which are published in Nissenbaum, "Le-Ḳorot ha-Yehudim be-Lublin," p. 14. The record includes a proclamation of 1694 by the officers of the burial society excommunicating evil-minded persons who had denounced their Jewish neighbors for selfish purposes before Christian priests and noblemen. These persons were blacklisted by the members of the society, who pledged themselves not to give them a decent funeral nor to bury them within the Jewish cemetery. The offenders were, however, afforded the opportunity to retract their denunciations and to give a solemn promise never to repeat the offense (*ib.* p. 142).

Synagogues and Charitable Institutions.

Lublin possesses five synagogues: (1) The Meharshal Synagogue, the oldest in the town, formerly attended by Solomon Luria. It has seats for about 3,000. (2) The Synagogue of Ẓebi b. Moses Doctor ("Doctor" meaning "Rabbi"; otherwise known as Jeleno [Hirsch] Doctorowicz), founded by Ẓebi in 1669 by permission of King Ladislaus IV. It appears that this synagogue was also rebuilt by Ẓebi to commemorate the victories of King John Sobieski in 1683. (3) The Synagogue of Saul Wahl (d. 1617). This synagogue is known also as the "Läufer [" runners"] Synagogue," because it was formerly used by visitors and strangers. (4) The Kahal Synagogue, often visited by Samuel Edels (d. 1631). (5) The Parnes Synagogue, founded by Abraham Parnes (d. 1763). There are also a "Tailors' Synagogue" and several others of recent date.

Among the charitable and educational institutions are: the Jewish hospital, housed in a modern building, with 56 beds; an asylum for the aged, for widows, and for orphans; a Hebrew free school (Talmud Torah); and a Jewish school, in which the teaching of Hebrew and of secular knowledge is combined under Jewish and non-Jewish masters. On the yeshibot founded by various rabbis see Jacob Pollak; Shalom Shachna; Solomon Luria; Meïr ben Gedaliah Lublin.

The government census of 1896 gave the total population as 48,758, of whom 23,788 were Jews. In 1899 the total Jewish population of the government of Lublin was 186,787. Lublin is an industrial and manufacturing town, containing 3 distilleries, 3 breweries, 4 tanneries, 6 brick-factories, 4 soap-and-candle factories, 3 tobacco-factories, 2 implement-factories, and 1 flour-mill; also factories of yarn and of linen and hemp goods. The Jews control most of these, and nearly all the mercantile and banking business.

H. R. J. D. E.

—**Typography:** The first Hebrew printing-house at Lublin was founded in 1547 by Joseph of Lublin, who printed the "Ketab Hitnaẓẓelut le-Darshanim" of David ha-Darshan (1548), and some other books. In 1550 he obtained from Sigismund August the monopoly of printing Hebrew books.

In 1558 a new printing-house was founded by Jacob b. Moses, Meshullam b. Solomon, Eliezer b. Isaac of Prague, Kalonymus b. Mordecai Jafe, and Jacob b. David Gutrat. The first work printed by them was the Pentateuch (1558); in the following year they issued the Talmud treatises Shebu'ot and Pesaḥim, which were followed by many other books before 1579. In that year printing was suspended till 1590, when it was resumed and carried on till 1603. During that time the house printed Mordecai Jafe's "Lebush" (1590), Jacob ben Asher's "Ṭur Oraḥ Ḥayyim" (1599), etc.

In 1606 Ẓebi Hirsch b. Kalonymus Jafe opened a printing-house, where he printed the "Minḥat Yehudah" of Judah Löb b. Obadiah Eulenburg (1609), and the "Tebu'ot Shor" of Ephraim Zalman Shor (1615). In 1618 he began the printing of the Talmud, which was completed in 1628. In 1642 Kalonymus b. Ẓebi Jafe opened another printing-house, from which were issued, among other books, the "Yalḳuṭ Shim'oni" (1643) and "Dammesek Eli'ezer" (1646). The wars which broke out in Poland caused a suspension of the work.

Fourteen years later a new printing-house was founded by Jacob b. Abraham Jafe. He printed the "'Ammudeha Shib'ah" of Bezaleel of Slutsk (1662), and the "Ketonet Passim," on the Pesaḥ Haggadah, by Joseph b. Moses of Przemysl (1685), besides a great many pamphlets.

For nearly two hundred years the printing of Hebrew books at Lublin was suspended. In 1870 Hirschenhorn and Schneidemesser opened a new printing-house, and issued the collection of responsa known as "Noda' bi-Yehudah" and other books. In 1901 they printed a beautiful edition of the Bible with various commentaries.

LUBLIN, MEÏR BEN GEDALIAH (MaHaRaM): Polish rabbi; born at Lublin (?) 1558; died there May 3, 1616. He was descended from a family of rabbis, and he speaks of his father as being an eminent Talmudist (Maharam, Responsa, No. 1). His principal teacher was his father-in-law, Isaac ha-Kohen Shapiro, rabbi of Cracow (*ib.* No. 105), and he distinguished himself so highly in the knowledge of the Talmud and Poseḳim that in 1587, when he was not yet thirty years old, he was invited to the rabbinate of Cracow. Up to that time he seems to have lived in Lublin; for in one of his responsa (No. 138), which bears neither date nor place, he writes, "all my tools [*i.e.*, books] are still at Lublin." According to Lewinstein ("Ha-Goren," i. 41-43), Lublin was from 1582 onward chief rabbi of Lublin, at the same time that Simon Wolf Auerbach was head of the yeshibah there (but see Auerbach, Simon [Ze'eb] Wolf). Owing to continual quarrels between the pupils of these two Talmudists, Lublin was ordered to leave the town.

It can not be said with certainty how long he remained at Cracow, as there is only one (undated) responsum (No. 50) which he wrote while holding that rabbinate. It seems certain, however, that he left Cracow after 1591 in order to become rabbi at Lemberg, a position which he held till 1613. In Lemberg he was engaged in continual controversies with Joshua Falk, author of "Me'irat 'Enayim"; particularly a bill of divorce issued by the latter at Vienna occasioned lengthy discussions between them (Maharam, Responsa, Nos. 123 *et seq.*; see also Falk, Joshua ben Alexander ha-Kohen). Lublin speaks in his responsa (Nos. 68, 102-103) of a fire (referring to the fire of Lemberg) in which his work "Seder Giṭṭin" was burned.

Leaves Lemberg.

According to a tradition, Lublin was forced by the authorities of Lemberg, at the instigation of Abraham Schrenzel, to leave the town. The latter thus avenged his teacher, Joshua Falk, who had been insulted by Lublin. At this time (1613) the community of Lublin being in want of a rabbi, Meïr accepted the rabbinate, and he continued to hold it till his death. Wherever he settled Lublin organized a yeshibah, of which he was the head; and owing to his renown as a Talmudic scholar and casuist, the number of his pupils was considerable. Among them were Joshua Höschel of Cracow, author of "Maginne Shelomoh," and Isaiah Horowitz, author of "Shene Luḥot ha-Berit," besides many others who became prominent rabbis or heads of yeshibot. He took special interest in his yeshibah, and often he signed his responsa "the one who is much occupied with his pupils" (Responsa, Nos. 80, 81, *et passim*). He was consulted by rabbis even from Italy and Turkey (*ib.* Nos. 12, 13, 21, 89).

Works.

His printed works are: (1) "Meïr 'Ene Ḥakamim" (Venice, 1619), novellæ forming a casuistic commentary on the Talmud, Rashi, and Tosafot; published by his son Gedaliah. It has since been republished several times, and is now printed in all the principal editions of the Talmud under the heading "Maharam." (2) "Manhir 'Ene Ḥakamim" (*ib.* 1619), a collection of 140 responsa, published by his son Gedaliah, who in collaboration with his brother Isaac added a preface. His unpublished works include: "Ma'or ha-Gadol," a commentary on the four Ṭurim; "Ma'or ha-Ḳaṭon," a commentary on the "Sha'are Dura"; "Ner Miẓwah," a commentary on the "Sefer Miẓwot Gadol"; "Torah Or," a homiletic commentary on the Pentateuch; "Or Shib'at ha-Yamim," a collection, apparently unfinished, of orally transmitted laws.

The method employed by Lublin in his commentary on the Talmud was the opposite of that adopted by him when lecturing to his pupils in the yeshibah. In the latter case, as is usual with great casuists, he explained the passages of the Talmud, of Rashi, or of the Tosafot at great length, or, as he expressed himself, "by profound pilpul" (Maharam on 'Ab. Zarah 22a; Ḥul. 2b; Niddah 2b). But in his commentary or novellæ he for the most part adopted a short and simple explanation, giving as his reason for not expounding a passage at greater length that he did not wish to dwell on it too long (Ḥul. 9b, 81b). In certain cases where he employed pilpul, he justified himself by saying that he was obliged to do so as the students might otherwise interpret the passage wrongly (Shab. 48a), or because he wished to sharpen their minds (*ib.* 20a). He showed a great tendency to correct the text of the Talmud (comp. Maharam on Giṭ. 5, 6; Yeb. 59 *et passim*).

Method of Interpretation.

Being a fearless critic, Lublin did not spare even the Tosafists when their expressions seemed to him obscure (Maharam on Suk. 10; Beẓah 7). He was generally dogmatic both in his novellæ and in his responsa; he declared on several occasions that his interpretation was the right one and that the passage could not be rendered otherwise (Maharam on Shab. 67 *et passim*). He often attacked Solomon Luria and Samuel Edels, saying that their interpretations were erroneous and might mislead students (Shab. 58b; Ḥul. 28a *et passim*). In his responsa he took for his basis the Aḥaronim, whom he declared to be of greater authority than the Tosafists, Maimonides, or Mordecai b. Hillel (Responsa, Nos. 114, 133, 137). He violently attacked Joseph Caro's Shulḥan 'Aruk, declaring that it was a mixture of laws from different authorities and having no connection with one another (*ib.* No. 11; Isserles, Responsa, No. 135). Lublin paid little heed to the Cabala, though it is evident from his responsum No. 34 that he believed in the sacredness of the Zohar.

LUBLINER, HUGO (pseudonym, **Hugo Bürger**): German dramatist; born at Breslau April 22, 1846. He studied at the industrial school in Berlin, and became manager of a cotton and woolen mill. Inclination led him to dramatic composition. At first he wrote occasionally only, but with such success that he at length gave up business and devoted himself wholly to the production of plays.

Among the best-known of Lubliner's works are: "Nur Nicht Romantisch" (1865), one-act comedy, the only one of his earlier efforts that still holds the stage; "Der Frauenadvokat" (1873), three-act comedy, which has been performed at all the principal German theaters; "Die Modelle des Sheridan" (1875), four-act comedy; "Die Florentiner" (1876), tragedy; "Die Adoptierten" (1877), drama; "Gabriele" (1878), drama; "Die Frau Ohne Geist" (1879), comedy; "Auf der Brautfahrt" (1880), comedy; "Gold und Eisen" (1881); "Der Jour Fix" (1882), comedy; "Aus der Grossstadt" (1883); "Die Mitbürger" (1884), comedy; (with G. von Moser) "Glück bei Frauen"; (with Paul Lindau) "Frau Susanne"; "Gräfin Lambach" (1886); "Die Gläubiger des Glückes" (6th ed., Breslau, 1886); "Die Frau von Neunzehn Jahren" (*ib.* 1887), the last two as parts of the romance-cycle "Berlin im Kaiserreich"; "Die Armen Reichen" (1886), comedy; "Der Name" (1888), drama; "Im Spiegel" (1890), comedy; "Der Kommende Tag" (1891), drama; and the following comedies: "Das Neue Stück" (1894); "Aus der Menschlichen Komödie" (1895); "An der Riviera" (1895); "Die Junge Frau Arneck" (1895); "Roman eines Anständigen Mädchens" (1896); "Andere Luft" (1897); "Das Fünfte Rad" (1898); and "Splitter und Balken" (1899). Some of the foregoing pieces were collected in "Dramatische Werke" (4 vols., Berlin, 1881–82).

LUBLINER, OZIASZ LOUIS (LUDWIK): Polish writer; born 1809; died at Warsaw 1868. After the Polish revolution of 1831 he settled in Brussels, where he published "Des Juifs en Pologne," an examination of the condition of the Jews in Russia from the historical, legislative, and political points of view. He wrote also, in Polish, "Obrona Zydow" (Warsaw, 1858), a defense of the Jews living in Polish territory; and a number of articles in Polish periodicals on the Jewish question. In 1861 he published in Brussels a work entitled "Les Confiscations des Biens des Polonais," in which he reviewed the various ukases of Emperor Nicholas I. concerning Poland, and criticized the cruel treatment of the Polish Jews. In 1862 Lubliner was appointed librarian at the University of Warsaw.

LUBLINSKY, SOLOMON: German journalist and writer; born at Johannisberg, Prussia, Feb. 18,

1868. He was occupied for a time as a clerk in a second-hand bookstore at Venice, after which he engaged in journalism at Berlin. He is now (1904) among the foremost Jewish writers. In addition to his journalistic work Lublinsky has written the following works, all published in Berlin: "Jüdische Charactere bei Grillparzer, Hebbel, und O. Ludwig" and "Literatur und Gesellschaft im 19ten Jahrhundert" (1899); "Multatuli" and "Der Imperator," dramas (1901); "Gescheitert," a novel (1901); "Hannibal," a drama (1902).

LUBOML: Town in the government of Volhynia, Russia. Jews lived there as early as the sixteenth century, though the attitude of the Christian inhabitants toward them was distinctly hostile. In 1557 the Jewish community resolved that none of its members should buy property within the city, for there was danger of its being attacked or set on fire by the Christian inhabitants. In 1576 this decision was reaffirmed by the leaders of the community with the indorsement of R. Abraham Polyak. Those who had violated this rule were warned to sell their property to Christians, under penalty of a fine or of some other punishment. Outside the town the Jews owned eight parcels of land; some of them leased grist-mills, and others leased three lakes, paying for their leases in money, pepper, saffron, and salt fish to the total value of about 400 gold ducats. The population of Luboml in 1897 was 4,600, of whom 3,300 were Jews. It has 349 Jewish artisans and 52 Jewish day-laborers. The seventeen ḥadarim give instruction to 370 pupils, and 60 are instructed in the Talmud Torah (1898).

LUCAS, LOUIS ARTHUR: African explorer; born in London Sept. 22, 1851; died at sea Nov. 20, 1876. After traveling in the United States (1872) and Egypt (1873), he organized an expedition to explore the Kongo. He left London Sept. 2, 1875, and arrived at Khartum in Jan., 1876, leaving that place in the following April. He next went with Colonel Gordon to the Albert Nyanza, and navigated the northern part of the lake in the first steamboat ever launched on it. He returned to Khartum in Aug., 1876, and reached Suakim on Nov. 18 of that year. In connection with this journey, Lucas compiled a vocabulary of Bisharin words, which was published in the "Journal of the Anthropological Institute."

In the same year (1876), against the advice of General Gordon and his staff, Lucas attempted to cross Africa, but, becoming sick and paralyzed, he soon had to return to Khartum. After lying ill for three months, he died on a steamboat between Suakim and Suez, and was buried at Jiddah.

LUCCA (Hebr. לוקא): City of Tuscany, Italy. Its Jewish community is known in literature especially through the Kalonymus family of Lucca, whose ancestor saved the life of the German emperor Otto II. after the battle of Cotrone in Calabria (982), and seems thereupon to have settled at Mayence, where the family had extensive privileges. In the twelfth century the community again appears in literature in the person of Abraham ibn Ezra, who lived at Lucca for a time while writing his grammatical works "Yesod" and "Sefat Yeter," as well as his commentary on the Pentateuch and Isaiah. He seems to have given instruction here in Hebrew grammar and Biblical science; one of his pupils, Ḥayyim, he mentions by name. The community was not a large one at that time; for Benjamin of Tudela, who visited it in 1165, found only forty Jews, under the leadership of R. David Samuel and R. Jacob.

In 1431 permission was granted to Angelo di Gaio, a Jew from Forli, to settle in Lucca and to open a bank for loans. A dispute arose, however, when King Sigismund, as he passed through Lucca, forcibly imposed a tax of 1,500 gold florins on the Jew, and Di Gaio left the city, while his son Gaietro opened a bank elsewhere. Later a similar permission was granted in Lucca to Isaac Manuelli & Co., who with others had settled in the city, and had a synagogue in a private house, besides a cemetery. Certain enemies of the Jews lodged a complaint against them with Pope Nicholas V.; but he, annulling the constitutions of Clement V. and a decree of the Bishop of Lucca, declared himself in favor of the Jews and confirmed their privileges. Other Jews who had banks in Lucca were David Dattali or da Tivoli and Vitale Isaac. In 1489, however, as a result of the anti-Jewish preaching of Bernardino da Feltre (in whose way many difficulties were placed at first in order to protect the Jews), the community decided to open a mont-de-pietà, and the Jews, who had objected to its establishment, were obliged to pay a fine of 1,300 florins.

Since their residence in Lucca was neither profitable nor secure, the Jews abandoned the city; according to some sources they were driven from it. After 1500 they returned, but they were in general not permitted to stay more than fifteen days consecutively. There are records, dated as late as May, 1728, of the names of Jews who had permission to make an extended residence in the city. After the French Revolution the Bacciochi family desired in vain to attract to the principality Jews who would buy property from the state.

Lucca has never had a Jewish community of any importance, and at present (1904) only about thirty Jews live there.

LUCENA (אליסנה, אליסאנה): City near Cordova, Spain, magnificently situated, and surrounded by strong walls and wide moats. In early times it was inhabited almost exclusively by Jews who had arrived together with its founders; hence it was called "Jews' City," an epithet applied also to

Granada and Tarragona. The Jews of Lucena, who carried on extensive trade and industries, were, according to an Arabic writer, richer than those of any other city. They enjoyed the same freedom as their coreligionists in the large Mohammedan cities. Their rabbi, who was elected by the entire community, was granted special privileges, and acted as judge in the civil and criminal cases arising in the community.

The Jews lived peaceably until the Almoravides came into power. A certain faḳih of Cordova pretended to have discovered a tradition according to which the Jews had entered into an agreement with Mohammed that they would embrace Islam at the end of the fifth century after the Hegira. Yusuf ibn Teshufin thereupon went to Lucena (1107) to induce the Jews of that city to fulfil the promises made by their ancestors. As the Jews suspected Yusuf of caring for their money rather than for their faith, they applied to Ibn Ḥamdin, the cadi of Cordova, or, according to Condé, to the vizier Abdallah ibn 'Ali, who induced the king to compromise the matter by accepting a very large sum of money. The Jews were glad to escape so easily. A worse fate befell them thirty-nine years later under the rule of the Almohades, whose leader, 'Abd al-Mu'min, persecuted and robbed them and forced them to accept Islam; and the flourishing and wealthy city, the seat of Jewish science, was destroyed (1146). At the beginning of the eleventh century several important scholars lived in Lucena, as also their most brilliant pupil, Abu al-Walid ibn Janaḥ. When Ferdinand III. of Castile conquered Andalusia he presented Lucena to the first bishop of Cordova, Don Lope, his former teacher. Isaac Alfasi founded a large Talmudic academy in Lucena, and here also Isaac ibn Ghayyat, Isaac ibn Albalia, and Joseph ibn Migash were prominent.

LUCERNE: City of Switzerland, in the canton of the same name. Jews were living there as early as the middle of the thirteenth century. The earliest records of the town contain regulations for the sale of the flesh of animals slaughtered according to ritual: "When a Jew slaughters an animal, the meat shall be sold 'hinten an in der Schall,' and it shall also be stated that it belongs to the Jew." The regulations further say that the Jews who have obtained rights of sojourn or citizenship "shall offend no one, either by words or by deeds, either in the city or without it. And no one shall offend or injure the Jews 'von deheines Kindes wegen on des Rates wissende,' on pain of paying a fine of five pounds, without remission; and if the offender be so poor that he can not pay this fine, he shall nevermore set foot in the city." As elsewhere in Switzerland, the Jews in Lucerne were engaged in money-lending, they alone being privileged to charge interest on loans. In 1401 they were expelled from the city.

It was not until about 1864 that a Jew (from Endingen) again settled in Lucerne. The city has now (1904) a Jewish community numbering forty-two members. In 1900 there were 336 Jews in the entire canton.

LUCIFER (Φωσφόρος): Septuagint translation of "Helel [read "Helal"] ben Shaḥar" (= "the brilliant one," "son of the morning"), name of the day, or morning, star, to whose mythical fate that of the King of Babylon is compared in the prophetic vision (Isa. xiv. 12–14). It is obvious that the prophet in attributing to the Babylonian king boastful pride, followed by a fall, borrowed the idea from a popular legend connected with the morning star; and Gunkel ("Schöpfung und Chaos," pp. 132–134) is undoubtedly correct when he holds that it represents a Babylonian or Hebrew star-myth similar to the Greek legend of Phaethon. The brilliancy of the morning star, which eclipses all other stars, but is not seen during the night, may easily have given rise to a myth such as was told of Ethana and Zu: he was led by his pride to strive for the highest seat among the star-gods on the northern mountain of the gods (comp. Ezek. xxviii. 14; Ps. xlviii. 3 [A.V. 2]), but was hurled down by the supreme ruler of the Babylonian Olympus. Stars were regarded throughout antiquity as living celestial beings (Job xxxviii. 7).

The familiarity of the people of Palestine with such a myth is shown by the legend, localized on Mount Hermon, the northern mountain of Palestine and possibly the original mountain of the gods in that country, of the fall of the angels under the leadership of Samḥazai (the heaven-seizer) and Azael (Enoch, vi. 6 *et seq.*; see FALL OF ANGELS). Another legend represents Samḥazai, because he repented of his sin, as being suspended between heaven and earth (like a star) instead of being hurled down to Sheol (see Midr. Abḳir in Yalḳ. i. 44; Raymund Martin, "Pugio Fidei," p. 564). The Lucifer myth was transferred to Satan in the pre-Christian century, as may be learned from Vita Adæ et Evæ (12) and Slavonic Enoch (xxix. 4, xxxi. 4), where Satan-Sataniel (Samael?) is described as having been one of the archangels. Because he contrived "to make his throne higher than the clouds over the earth and resemble 'My power' on high," Satan-Sataniel was hurled down, with his hosts of angels, and since then he has been flying in the air continually above the abyss (comp. Test. Patr., Benjamin, 3; Ephes. ii. 2, vi. 12). Accordingly Tertullian ("Contra Marrionem," v. 11, 17), Origen ("Ezekiel Opera," iii. 356), and others, identify Lucifer with Satan, who also is represented as being "cast down from heaven" (Rev. xii. 7, 10; comp. Luke x. 18).

LUCUAS: Toward the end of the reign of the emperor Trajan, in 116, the Jews of CYRENE rebelled, their leader being Lucuas according to Eusebius ("Hist. Eccl." iv. 2), Andreias according to Dio Cassius (lxviii. 32). These two statements can not be harmonized, as some historians have attempted to do, by supposing that either of the two names was a symbolic one (Lucuas = "the bright or shining one," Andreias = "the brave"); for the authors would not have passed over such an explanation in silence. Moreover, Eusebius and Dio Cassius refer to different phases of the rebellion. According to a later source, Abu al-Faraj, Lucuas sought refuge in Palestine, where he was defeated by Marcius Turbo. According to Eusebius he was proclaimed king; and the Papyrus Parisiensis No. 68 (published by Wilcken in "Hermes," xxvii. 464 *et seq.*) refers perhaps to him.

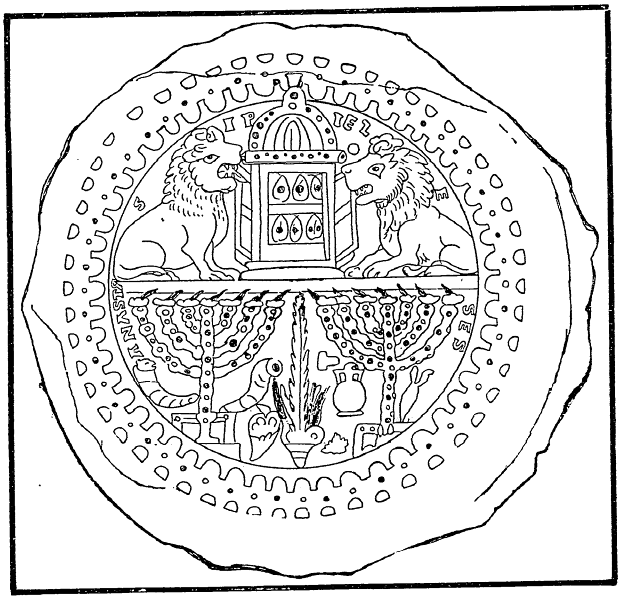
LUDASSY (GANS), MORIZ: Hungarian journalist; born at Komorn in 1825; died at Reichenau Aug. 29, 1885. As early as 1848 he was editor of the "Esti Lapok" in Budapest and of the "Magyar Világ," advocating in both periodicals the cause of the Conservatives. About fifteen years later he went to Vienna, where, with Georg Apponyi and Paul Sennyei, he founded the "Debatte," which advocated the establishment of a dual government in Austro-Hungary and the political equality of the two countries. When Count Julius Andrássy was premier, Ludassy was chief of the Hungarian press bureau and was at the same time ministerial councilor in the department of the interior. He returned to Vienna, however, where he was commissioned by Minister Beust to edit the "Tagespresse," the organ of the imperial court party during the war of 1870-71. In recognition of his services he was created a Hungarian noble.



Representation of a Lulab on a Glass Dish Found in the Jewish Catacombs at Rome.

(In the Museo Borgeano at Rome.)

One of his sons, **Julius Ludassy**, whose pen-name is "Julius Goose," is one of the editors of the "Fremdenblatt" in Vienna. He has written several comedies, among them "Maximen," "Spleen," and "Garrick."

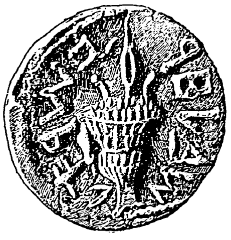
S. L. V.

LUKE. See New Testament.

LULAB: Name given to the festive palm-branch which with the Etrog is carried and waved on the Feast of Tabernacles (Sukkot). The three constituents of the lulab are: (1) a shoot of the palm-tree in its folded state before the leaves are spread out; this must be at least three handbreadths long, so that it may be waved, and must be bound round with a twig or tendril of its own kind; (2) three twigs of myrtle of the species which has its leaves in whorls of three; and (3) two willow-branches of the kind of which the wood is reddish and the leaves are long and entire (Suk. 29b, 32b, 34a). The myrtle-twigs and willow-branches are tied to the lower end of the palm-branch—the former on the right, and the latter on the left—by means of three rings of palm-strips. These branches constitute with the etrog the "four species" ("arba'at ha-minim").



Coin of Bar Kokba Bearing a Lulab.
(After Madden.)

The use of the lulab is closely connected with the reciting of the Hallel (Ps. cxiii.-cxviii.). In the Second Temple it was waved during the recitation of the passages expressive of thanksgiving or prayer, viz., Ps. cxviii. 1-4, 25 (Suk. 37b). The manner of waving was as follows: Facing east and holding the lulab in the right hand and the etrog in the left, the worshiper shook the former in the directions east, south, west, and north, upward and downward, forward and backward; this was in acknowledgment of God's sovereignty over nature (*ib.*). After the additional sacrifices of the day had been offered the lulab and etrog were carried in procession around the altar in the court while Ps. cxviii. 25, or the refrain אני והו הושיעהנא, was chanted. On each of the first six days one such processional circuit ("hakkafah") was made; on the seventh day seven circuits took place, and at the end the etrogs were eaten by the children (Suk. 45a; see also Hosha'na Rabbah). According to tradition, the carrying of the lulab was observed in the Temple throughout the seven days of the feast, but outside of it on one day only. After the destruction of the Temple, R. Johanan ben Zakkai ordained that the practise should be observed everywhere during seven days, "in remembrance of the Temple" (Suk. 41a, 43b).

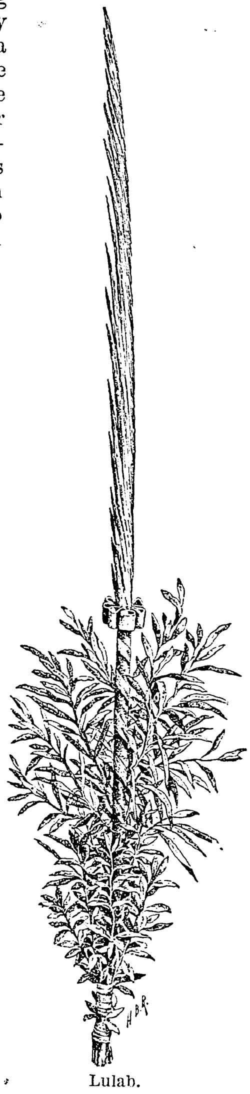
In the Temple.

This ordinance is observed in the synagogue (except on Sabbath). The mode of carrying and waving the lulab and etrog is the same as it was in the Temple, but the first waving takes place before the commencement of Hallel, while the usual formula of benediction is recited: "Blessed art thou . . . concerning the holding of the lulab." After the Musaf service (which takes the place of the additional sacrifices in the Temple) the processional circuits, the precentor or ḥazzan leading, are made around the reading-desk, or bemah, on which the Torah-scroll is held in an upright position, while the hosannas (hymns beginning and closing with the words הושע נא) are chanted, in the same manner as in the Temple.

In the Synagogue.

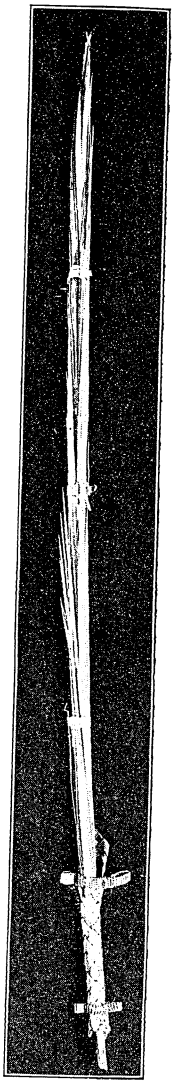
The ordinance is binding on every observant Jew. One should not break fast before carrying it out. In countries where, owing to the cost, not every household can afford a lulab and an etrog, the poor are allowed the use of those belonging to their wealthy brethren. Usually the congregation owns a lulab and an etrog which are carried from house to house, so that children and feeble persons who can not come to the synagogue may observe the commandment and be allowed to break their fast in due time.

The ordinance of the lulab is derived from Lev. xxiii. 40: "And ye shall take you on the first day the fruit of goodly trees, branches of palm-trees, and the boughs of thick trees, and willows of the brook: and ye shall rejoice before the Lord your God seven days." Aside from the palm-branch and the willows the passage does not specify what shall be used; and the interpretation of the "fruit of goodly trees" and the "boughs of thick trees" to mean the etrog and myrtle respectively, as also the precise manner of using the four species, rests on tradition. A question as to the correctness of the accepted interpretation of the passage is raised in Lev. R. xxx. 15 (comp. also Tan., Emor, 20); and the answer is, quoting Prov. xxx. 24, "There be four things which are little upon the earth, but they are exceeding wise," that the "wise" explained the four species to mean etrog, lulab, myrtle, and willow-branches. A justification is attempted in Suk. 32b on the ground that "boughs of thick trees" implies a tree whose leaves cover the branches, and that this is characteristic of the myrtle, or a tree whose fruit and wood taste alike (have the same aroma), which again is a peculiarity of the myrtle. The presence of the latter characteristic is given as justification for the choice of the etrog also (*ib.* 37a). In Ta'an. 2b the four species are put in close relation with the prayers for the annual rainfall (comp. also Lev. R. xxx. 13), which was believed to be determined upon on the Feast of Tabernacles (R. H. 16a; comp. Suk. 37b); and it is added that the choice of them is suitable, for as "they can not exist without water, so also the world can not exist without water."



Lulab.
(After Picart.)

In addition to these explanations, the Midrash (*ib.* 9-14; comp. Tan., Emor, 17) indulges in many symbolical explanations of the four species, *e.g.*, they refer to God Himself in His various attributes and activities; they remind one of the three patriarchs and Joseph, or of the four mothers of Israel; they represent the great Sanhedrin with the scholars and their disciples and scribes attached to it; or the whole people of Israel in its four divisions of (1) pious and learned, (2) learned but not pious, (3) pious but not learned, and (4) those who are neither; and lastly they symbolize the four chief constituents of the human body—the spinal column, the heart, the eye, and the mouth. The Samaritans and Karaites refer the passage in Leviticus to the parts constituting the booth ("sukkah"), pointing to Neh. viii. 15, where, however, some different species ("olive-branches" and "branches of wild olive") are enumerated.



Lulab.
(From a photograph.)

The assumption—drawn from the fact that Plutarch ("Symp." iv. 6, 2) and Josephus ("Ant." xiii. 13, § 5: "for it is the custom among the Jews for each to have on the Feast of Booths a thyrsus of palms and citrons"; comp. also II Macc. x. 7) refer to the lulab as "thyrse" (θύρσος), and the latter, in "Ant." iii. 10, § 4 ("carrying in their hands a bunch of myrtle, willow-branches, palms, and citrons"), as εἰρεσιώνη—that the carrying of the lulab was connected with the Bacchic celebrations, or with the Pyanepsia and Thargelia, ignores the spirit and tendency of the Judaism of the Maccabean period. It is repudiated, in his manner, even by Tacitus ("Hist." v. 5).

A. I. M. C.

LULIANI BEN ṬABRIN: Palestinian scholar of the beginning of the fourth century. The name, which is the equivalent of "Julianus ben Tiberianus," has been corrupted into יולימנא בן עבדי in Pesiḳ. R. 7 (ed. Friedmann, p. 26a). His father's name, the usual form of which is טברין, is written also טברינאי (Ex. R. xliv.) and טורין (Gen. R. xcviii. 24). Luliani is particularly known as the transmitter of haggadot of his teacher, Isaac Nappaḥa. He is frequently mentioned in pre-Talmudic literature and in the Midrash. There is, however, one haggadah ascribed to Luliani himself: "When the lesser people listen to the great and yet the latter do not alleviate the burden of the former, they shall account for it to God" (Ruth R., Introduction, 6); but a similar sentence is ascribed to R. Isaac in Deut. R. i. 8. The statement of Midrash Tehillim (to Ps. xviii. 29) that Luliani transmitted a haggadah of R. Ishmael is apparently a mistake due to the abbreviation ר"י. Luliani is mentioned also as having asked his teacher Isaac a halakic question (Yer. Meg. 75c). Luliani was the father of the Ḥiyya b. Luliani who is frequently mentioned in the Jerusalem Talmud and who is stated to have caused rain to fall in time of drought (Ta'an. 25a).

LUMBROSO. See LOMBROSO.

LUMBROZO, JACOB or JOHN: Physician, planter, and trader resident in the palatinate of Maryland, America, in the middle of the seventeenth century; born at Lisbon; died between Sept. 24, 1665, and May 31, 1666. From Portugal he removed to Holland, and ultimately established himself in Maryland Jan. 24, 1656. His arrival formed, directly or indirectly, an important event in the life of the province. He early exercised his profession, and apparently enjoyed a lucrative practise. On Sept. 10, 1663, letters of denization were issued to him, together with certain privileges, enabling him to take up land under the liberal terms established by the proprietary—a privilege of which he promptly availed himself. A "Mistress Lumbrozo" was living in Sept., 1663, having arrived in Maryland in the preceding year. She was probably not of Jewish descent. Lumbrozo appeared as a witness in a lawsuit in 1657, and served as a juror in 1663. In 1665 he was granted a commission to trade with the Indians. He seems to have been in active intercourse with London merchants and to have corresponded with a sister in Holland. He amassed considerable wealth both in real and in personal property.

Although Jews were resident in Maryland probably from its settlement, Lumbrozo is the first Israelite—indeed the only one of that time—of whose faith there is documentary evidence. He was one of the earliest medical practitioners in the palatinate, and for nearly a decade continued to be an important figure in its economic activity. His career is of widest interest in its relation to the history and nature of religious toleration in Maryland. After living for at least two years in undisturbed quiet as a recognized Jew, and probably as a professed one, he was in 1658, through the activity of zealots and in consequence of his own indiscretion, arrested, under the provisions of the so-called Toleration Act of 1649, for "blasphemy," that is, for denial of the doctrine of the Trinity, thus becoming liable to punishment by death and forfeiture of lands and goods. The general amnesty proclaimed in the province ten days later, upon the accession of Richard Cromwell to the English protectorate, gave him freedom. Whether in consequence of his high economic importance or because of the milder interpretation put upon the statute in the case of discreet unbelievers, no further attempt was made to vindicate the letter of the law; and thereafter Lumbrozo gradually succeeded in exercising most of the rights of a fully naturalized citizen.

Record exists of a **John Lumbrozo,** born in June, 1666, who apparently was a posthumous child of Jacob's. But the widow married very soon after his birth; and the name "Lumbrozo" figures no more in Maryland colonial records.

A. J. H. Ho.

LUMLEY, BENJAMIN: Director of Her Majesty's Theatre, Drury Lane, London; born in Canada 1811; died in London March 17, 1875. He was the son of Louis Levy, a Canadian merchant who died in London about 1831. Benjamin was educated at King Edward's School, Birmingham, and early in life assumed the name "Lumley." In 1832 he became a solicitor in London, and from 1837 to 1842 was a parliamentary agent, publishing in 1838 a standard book on "Parliamentary Practise on Passing Private Bills." From 1836 to 1841 he superintended the finances of Her Majesty's Theatre for Laporte, and on Sept. 25, 1841, succeeded him in the management. He transformed the whole system of opera, and employed artists like Grisi, Persiani, Mario, Tamburini, and Lablache in grand opera, and Taglioni, Cerito, and Elssler in the ballets. These latter he made much more elaborate, introducing the famous "pas-de-quatre" in 1845. In 1847, however, as the result of many quarrels with his "stars," a rival opera-house was opened in Covent Garden, and Lumley was saved from ruin only by securing the services of Jenny Lind. On her retirement from the stage in 1849, Lumley's fortunes became embarrassed; and his attempt at controlling the Paris Opera House in 1850-51 led to further pecuniary difficulties. After the burning of Covent Garden Theatre in 1856 Lumley resumed the management of the Drury Lane house; but he failed to make it pay, and finally became reduced to such circumstances that he accepted the results of two benefit performances (1863). He introduced into England over thirty Italian operas, including Donizetti's "La Favorita," Verdi's "Ernani" and "La Traviata," and Auber's "Masaniello."

Lumley wrote two fantastic works of fiction: "Sirenia," 1862; and "Another World," 1873; the latter, describing a utopia in the planet Mars, had some success, and ran through three editions. He published also his "Reminiscences," 1864.

G. L.—J.

LUNCZ, ABRAHAM MOSES: Russian scholar and editor; born Dec. 9, 1854, at Kovno, Russia; went when very young to Jerusalem, where he still (1904) lives. Luncz, who has been blind for many years, has founded, in conjunction with Dr. Koisewski, an institution for the blind at Jerusalem.

In the exploration of the Holy Land, Luncz has rendered great services from the historical, geographical, and physical standpoints, through his guide-books for Palestine, his Palestine annuals, and his Jerusalem almanac: (1) "Netibot Ẓiyyon we-Yerushalayim: Topography of Jerusalem and Its Surroundings" (vol. i., 1876); (2) "Jerusalem, Jahrbuch zur Beförderung einer Wissenschaftlich Genauen Kenntnis des Jetzigen und des Alten Palästina" (Hebrew and German, 6 vols., 1881–1903); (3) "Literarischer Palästina-Almanach" (Hebrew; since 1894). He owns a Hebrew printing-press, from which he has begun the issue of a Palestinian library, Estori Farḥi's "Kaftor wa-Feraḥ" and Schwarz's "Tebu'ot ha-Areẓ" being the first works published. He has now (1904) in the press a new edition of the Jerusalem Talmud with commentary and introduction.

S. M. L. B.

LUNEL (Hebr. לוניל): Chief town of the department of Hérault, France; at times it is called מגדל ירחו and בקעת יריחו (see Zeraḥiah Gerundi, preface to "Ma'or," and I. de Lattes, "Sha'are Ẓiyyon," p. 75). The Jewish community here is an ancient one; important in the eleventh century, it became still more prominent in the twelfth. Benjamin of Tudela, who visited it in 1166, says ("Itinerary," i. 3) that it consisted of 300 members, some of whom were very learned and wealthy and took pleasure in offering hospitality to poor students eager to attend its famous academy. This institution had become so important in the twelfth century that it was at times called the "dwelling-place of the Torah" ("Ma'or" to Pes. vii.), and the "vestibule of the Temple" ("Temim De'im," No. 7).

The lords of Lunel were in general very well disposed toward the Jews. In 1252 one of them, Gaucelin, employed two Jews of his dominion as intermediaries to consult the Spanish Jewish doctor Ibrahim in behalf of Alphonse of Poitiers, whose eyesight had become seriously affected. In 1295 Rosselin of Lunel, in spite of the interdictions of the Church councils, pawned the revenues of his barony to a Jew named Thauros. In 1319 the Jews of Lunel were arrested, and the property was seized of those among them who were charged with having, during the preceding Holy Week, "in outrageous mockery" carried a crucifix through the streets of Lunel and trailed it in the dust (MS. Aubais, in the Nîmes Library, fol. 60).

At present there is not a single Jewish family in Lunel, and only a few vestiges of the synagogue remain in the former Hôtel de Bernis (now belonging to A. Ménard) in the Rue Alphonse Ménard. According to a document in the municipal archives (case 5, book i., No. 2319) the cemetery was situated on the Mas Desports road.

The following scholars, or "sages of Lunel," are mentioned in the twelfth and thirteenth centuries: Meshullam b. Jacob, a very learned man; Judah b. Saul ibn Tibbon, physician and translator; Samuel ibn Tibbon, translator of Maimonides' "Moreh Nebukim"; the Talmudists Zeraḥiah b. Isaac ha-Levi (Gerundi), Jonathan b. David ha-Kohen, and Manoah; Abba Mari b. Moses b. Joseph (Don Astruc of Lunel), author of the "Minḥat Ḳena'ot," a collection in which he preserved the letters exchanged from 1303 to 1306 between the champions of orthodoxy and the advocates of science and philosophy (among the former were the Lunel rabbis Isaac b. Abigdor Simeon b. Joseph, called "En Duran of Lunel," and Meïr b. Isaiah; among the latter, Solomon b. Isaac, called the "prince," who was commissioned in 1286, together with several other Jews, to collect the taxes imposed by King Philip the Fair upon the Jews in the jurisdiction of the seneschal of Carcassonne); the physician Solomon, who is probably identical with Maestro Solomon Davin, author of a work on fever; Sen Samuel, commentator of the "Moreh Nebukim"; and the astronomer Salmon; and in the fourteenth century, the philosopher Asher b. Abraham Cohen.

Several scholars from Lunel bore the surname "Yarḥi" (= "of Lunel"), among them: Abraham b. Nathan ha-Yarḥi, David ha-Yarḥi, Aryeh Judah ha-Yarḥi b. Levi (Zunz, "Literaturgesch." p. 495; *idem*, "Z. G." p. 469), and Solomon b. Abba Mari ha-Yarḥi, who lived in the second half of the fourteenth century and wrote a Hebrew grammar entitled "Leshon Limmudim." The name "Lunel" is still a very common one among the Jews of southern France.

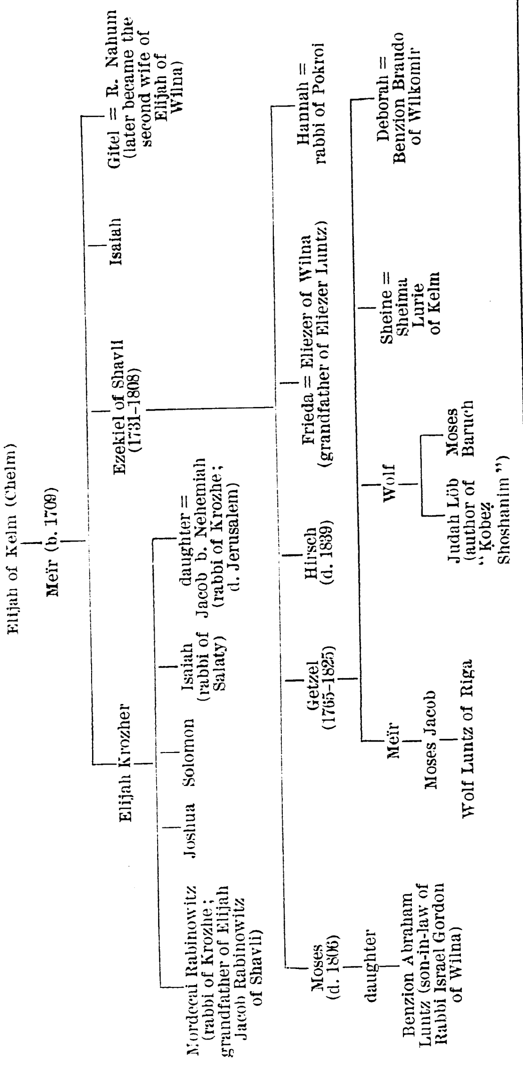
LUNTSCHITZ, SOLOMON EPHRAIM. See EPHRAIM, SOLOMON BEN AARON.

LUNTZ: Name of a family descended from the Loans, or Loanz, family of Worms. According to a family tradition, Elijah, the sixth in line of direct descent from Moses, son of Joselman Loans, emigrated from Worms and settled in the little town of Kelm (Chelm; now in the government of Kovno) about the year 1700, and became its rabbi. He left a son, Meïr (b. 1709), whose first son, Elijah of Krozhe (Krozher; 1723?–1814), was a wealthy and pious Talmudist, and whose descendants adopted the name of Rabinowitz. His second son, Ezekiel, became rabbi of Shavli about 1749, and continued in that position until his death in 1808. One of Ezekiel's sons, Moses, enjoyed the rare distinction of being magistrate of Shavli. Another son, Getzel, was the great-grandfather of Wolf Luntz of Riga, a well-known communal worker and one of the founders of the Zionist movement in Russia. Abraham Moses Luncz of Jerusalem does not belong to this family, whose pedigree follows:



Elijah of Kelm (Chelm)
Meïr (b. 1709)
Gitel = R. Nahum (later became the second wife of Elijah of Wilna)
Isaiah
Ezekiel of Shavli (1731–1808)
Elijah Krozher
daughter = Jacob b. Nehemiah (rabbi of Krozhe; d. Jerusalem)
Isaiah (rabbi of Salaty)
Solomon
Joshua
Mordecai Rabinowitz (rabbi of Krozhe; grandfather of Elijah Jacob Rabinowitz of Shavli)
Hannah = rabbi of Pokroi
Frieda = Eliezer of Wilna (grandfather of Eliezer Luntz)
Hirsch (d. 1839)
Getzel (1765–1825)
Moses (d. 1806)
Deborah = Benzion Braudo of Wilkomir
Sheine = Sheima Lurie of Kelm
Wolf
Moses Baruch
Judah Löb (author of "Ḳobeẓ Shoshanim")
Meïr
Moses Jacob
Wolf Luntz of Riga
daughter
Benzion Abraham Luntz (son-in-law of Rabbi Israel Gordon of Wilna)

Bibliography: Judah Löb Luntz, *Ḳobeẓ Shoshanim*, pp. 58–64, Warsaw, 1891.

LÜPSCHÜTZ. See Lipschitz; Lipschütz.

LURIA: A family with wide ramifications and several of whose members were distinguished for mystical tendencies and rabbinical knowledge.

Abraham b. Nissan Luria: Russian rabbi and grammarian of the first half of the nineteenth century. He was rabbi of Skod (Shad ?) in Lithuania, and is known chiefly through his grammatical work "Nisyonot Abraham" (Wilna, 1821). It consists of two parts, of which the first is on the grammatical passages in Rashi's commentary on the Bible, and the second on similar passages occurring in the older commentaries on the Mishnah and Talmud.

Bibliography: Fürst, *Bibl. Jud.* ii. 257; Fuenn, *Safah le-Ne'emanim*, p. 149, Wilna, 1881.

David b. Aaron Luria: Russian educator; born in Minsk about 1800; died in Königsberg, Prussia, July, 1873. The son of wealthy parents, he was given a liberal Jewish education, which he later supplemented by the acquisition of a knowledge of the secular sciences. After Lilienthal's failure (1842) to induce the Jews of Minsk to establish a school for Jewish children, Luria took up the work and succeeded beyond all expectations. At first opposed by the Orthodox, he soon overcame all opposition, and in 1843 gained control of the Talmud Torah of Minsk. As its superintendent, he transformed it into a modern institution; and his admirable management won the recognition not only of the local authorities, but even of the central government (see "Journal of the Ministry of Public Education," vol. 53, i. 40).

Luria's success not only turned his former antagonists into warm supporters, but induced the well-to-do Jewish merchants to open a school for their children so that they might be enabled to receive as good an education as was given to the orphans in the Talmud Torah. Thus a merchants' school was founded, also under Luria's management; but it failed on account of circumstances over which he had no control. The support it had received, however, encouraged him to establish the Midrash Ezraḥim or citizens' school, for children of the middle class, which proved a great success, although its fees were more than double those of the local gymnasium. But all his hopes were destroyed when his classes in the Talmud Torah and his Midrash Ezraḥim were closed by order of the government, to make room for the government schools which were then being established in Jewish communities. Greatly disappointed, "his only rewards being a gold medal from the czar and a short poem by Gottlober" ("Ha-Nizzanim," p. 214, Wilna, 1850), he retired to his books and his studies, and for the rest of his life took but little interest in public affairs.

Luria was the author of "'Omer ba-Sadeh" (Wilna, 1853), a book for the young, in which Biblical passages are explained in a moral and patriotic sense.

Bibliography: *Yevreiskaya Biblioteka*, iii. 360 *et seq.*; *Ha-Shaḥar*, iv. 569; Zeitlin, *Bibl. Post-Mendels.* pp. 220–221.

Enoch Zundel b. Isaiah Luria: Russian preacher and author; died in Brest-Litovsk Feb. 13, 1847. He lived for several years in Wilna, and later became successively preacher in New Zhagory and Novogrudok, both in the government of

Kovno. He wrote "Kenaf Renanim" on "Pereḳ Shirah" (Krotoschin, 1842; Presburg, 1859; Warsaw, 1888). He wrote also "Moṭot Kenafayim," sermons and addenda to his former work, but it remained in manuscript. A review of the "Kenaf Renanim" is given in "Orient, Lit." 1842, No. 26.

Bibliography: Fuenn, *Keneset Yisrael*, p. 312; Feinberg, *'Ir Tehillah*, p. 228, Warsaw, 1886.

H. R. P. Wi.

Lives as Hermit.

Isaac ben Solomon Ashkenazi Luria (ARI): Founder of the modern Cabala; born of German parents at Jerusalem in 1534; died at Safed Aug. 5, 1572. While still a child he lost his father, and was brought up by his rich uncle Mordecai Francis, tax-farmer at Cairo, who placed him under the best Jewish teachers. Luria showed himself a diligent student of rabbinical literature; and, under the guidance of Bezaleel Ashkenazi, he, while quite young, became proficient in that branch of Jewish learning. At the age of fifteen he married his cousin, and, being amply provided for, was enabled to continue his studies undisturbed. When about twenty-two years old, becoming engrossed with the study of the Zohar, which had recently been printed for the first time, he adopted the life of a hermit. He removed to the banks of the Nile, and for seven years secluded himself in an isolated cottage, giving himself up entirely to meditation. He visited his family only on the Sabbath, speaking very seldom, and always in Hebrew. Such a mode of life could not fail to produce its effect on a man endowed by nature with a lively imagination. Luria became a visionary. He believed he had frequent interviews with the prophet Elijah, by whom he was initiated into sublime doctrines. He asserted that while asleep his soul ascended to heaven and conversed with the great teachers of the past.

Disciples.

In 1569 Luria removed to Palestine; and after a short sojourn at Jerusalem, where his new cabalistic system seems to have met with but little success, he settled at Safed. There he formed a circle of cabalists to whom he imparted the doctrines by means of which he hoped to establish on a new basis the moral system of the world. To this circle belonged Moses Cordovero, Solomon Alkabiz, Joseph Caro, Moses Alshech, Elijah de Vidas, Joseph Hagiz, Elisha Galadoa, and Moses Bassola. They met every Friday, and each confessed to another his sins. Soon Luria had two classes of disciples: (1) novices, to whom he expounded the elementary Cabala, and (2) initiates, who became the depositaries of his secret teachings and his formulas of invocation and conjuration. The most renowned of the initiates was Ḥayyim Vital of Calabria, who, according to his master, possessed a soul which had not been soiled by Adam's sin. In his company Luria visited the sepulchers of Simeon ben Yoḥai and of other eminent teachers, the situation of which had been revealed to him by his constant mentor, the prophet Elijah. Luria's cabalistic circle gradually widened and became a separate congregation, in which his mystic doctrines were supreme, influencing all the religious ceremonies. On Sabbath Luria dressed himself in white and wore a fourfold garment to signify the four letters of the Ineffable Name. His followers looked upon him as a saint who had the power to perform all kinds of miracles, while he himself pretended to be Messiah ben Joseph, the forerunner of Messiah ben David.

His Utterances.

Luria used to deliver his lectures extempore and, with the exception of some cabalistic poems in Aramaic for the Sabbath service, did not write anything. The real exponent of his cabalistic system was Ḥayyim Vital. He collected all the notes of the lectures which Luria's disciples had made; and from these notes were produced numerous works, the most important of which was the "'Eẓ Ḥayyim," in six volumes (see below). At first this circulated in manuscript copies; and each of Luria's disciples had to pledge himself, under pain of excommunication, not to allow a copy to be made for a foreign country; so that for a time all the manuscripts remained in Palestine. At last, however, one was brought to Europe and was published at Zolkiev in 1772 by Satanow. In this work are expounded both the speculative Cabala, based on the Zohar, and the practical or miraculous Cabala (קבלה מעשית), of which Luria was the originator.

The Sefirot.

The characteristic feature of Luria's system in the speculative Cabala is his definition of the Sefirot and his theory of the intermediary agents, which he calls "parẓufim" (from πρόσωπον = "face"). Before the creation of the world, he says, the En Sof filled the infinite space. When the Creation was decided upon, in order that His attributes, which belong to other beings as well, should manifest themselves in their perfection, the En Sof retired into His own nature, or, to use the cabalistic term, concentrated Himself (צמצם את עצמו). From this concentration proceeded the infinite light. When in its turn the light concentrated, there appeared in the center an empty space encompassed by ten circles or dynamic vessels ("kelim") called "Sefirot," by means of which the infinite realities, though forming an absolute unity, may appear in their diversity; for the finite has no real existence of itself. However, the infinite light did not wholly desert the center; a thin conduit (צינור) of light traversed the circles and penetrated into the center. But while the three outermost circles, being of a purer substance because of their nearness to the En Sof, were able to bear the light, the inner six were unable to do so, and burst. It was, therefore, necessary to remove them from the focus of the light. For this purpose the Sefirot were transformed into "figures" ("parẓufim"). The first Sefirah, Keter, was transformed into the potentially existing three heads of the Macroprosopon ("Erek Anfin"); the second Sefirah, Ḥokmah, into the active masculine principle called "Father" ("Abba"); the third Sefirah, Binah, into the passive, feminine principle called "Mother" ("Imma"); the six broken Sefirot, into the male child ("Ze'er"), which is the product of the masculine active and the feminine passive principles; the tenth Sefirah, Malkut, into the female child ("Bat"). This proceeding was absolutely necessary. Had God in the beginning created these figures instead of the Sefirot, there would have been no evil in the world, and consequently no reward and punishment; for the source of evil is in the broken Sefirot or vessels, while the light of the En Sof produces only that which is good. These five figures are found in each of the four worlds; namely, in the world of emanation (עולם האצילות); in that of creation (עולם הבריאה); in that of formation (עולם היצירה); and in that of action (עולם העשיה), which represents the material world.

Luria's psychological system, upon which is based his practical Cabala, is closely connected with his metaphysical doctrines. From the five figures, he says, emanated five souls, Neshamah, Ruaḥ, Nefesh, Ḥayyah, and Yeḥidah; the first of these being the highest, and the last the lowest. Man's soul is the connecting-link between the infinite and the finite, and as such is of a manifold character. All the souls destined for the human race were created together with the various organs of Adam. As there are superior and inferior organs, so there are superior and inferior souls, according to the organs with which they are respectively coupled. Thus there are souls of the brain, souls of the eye, souls of the hand, etc. Each human soul is a spark ("niẓoẓ") from Adam. The first sin of the first man caused confusion among the various classes of souls: the superior intermingled with the inferior; good with evil; so that even the purest soul received an admixture of evil, or, as Luria calls it, of the element of the "shells" ("ḳelipot"). From the lowest classes of souls proceeded the pagan world, while from the higher emanated the Israelitish world. But, in consequence of the confusion, the former are not wholly deprived of the original good, and the latter are not altogether free from sin. This state of confusion, which gives a continual impulse toward evil, will cease with the arrival of the Messiah, who will establish the moral system of the world upon a new basis. Until that time man's soul, because of its deficiencies, can not return to its source, and has to wander not only through the bodies of men and of animals, but even through inanimate things such as wood, rivers, and stones.

Return of the Soul.

To this doctrine of metempsychosis Luria added the theory of the impregnation ("'ibbur") of souls; that is to say, if a purified soul has neglected some religious duties on earth, it must return to the earthly life, and, attaching itself to the soul of a living man, unite with it in order to make good such neglect. Further, the departed soul of a man freed from sin appears again on earth to support a weak soul which feels unequal to its task. However, this union, which may extend to three souls at one time, can only take place between souls of homogeneous character; that is, between those which are sparks of the same Adamite organ. The dispersion of Israel has for its purpose the salvation of men's souls; and the purified souls of Israelites unite with the souls of men of other races in order to free them from demoniacal influences. According to Luria, man bears on his forehead a mark by which one may learn the nature of his soul: to which degree and class it belongs; the relation existing between it and the superior world; the wanderings it has already accomplished; the means by which it can contribute to the establishment of the new moral system of the world; how it can be freed from demoniacal influences; and to which soul it should be united in order to become purified. This union can be effected by formulas of conjuration.

Influence on Ritual.

Luria introduced his mystic system into religious observances. Every commandment had for him a mystic meaning. The Sabbath with all its ceremonies was looked upon as the embodiment of the Divinity in temporal life; and every ceremony performed on that day was considered to have an influence upon the superior world. Every word, every syllable, of the prescribed prayers contain hidden names of God upon which one should meditate devoutly while reciting. New mystic ceremonies were ordained and codified under the name of "Shulḥan 'Aruk shel Ari." This tendency to substitute a mystic Judaism for the rabbinical Judaism, against which Luria was warned by his teacher of Cabala, David ibn Abi Zimra, became still stronger after Luria's death. His disciples, who applied to him the epithets "Holy" and "Divine," sank further in mysticism and paved the way for the pseudo-Messiah Shabbethai Ẓebi.

The following are the works attributed to Luria by his disciples, given in the order of their publication:

1595. Marpe Nefesh, on the purification of the soul. Venice.
1600. Tiḳḳune ha-Teshubah, on penitence. Published by Elijah Moses de Vidas. Venice.
1615. Seder we-Tiḳḳun Ḳeri'at Shema', mystic explanations of the Shema'. Prague.
1620. Sefer ha-Kawwanot, mystic explanations of the prayers. Venice. (With corrections by Pethahiah ben Joseph, Hanau, 1624; Amsterdam, 1710; Jessnitz, 1723; abridged, under the title "Zot Ḥuḳḳat ha-Torah," by Abraham Ḥazzeḳuni, Venice, 1659.)
1624. Tiḳḳune Shabbat, mystic poems for Sabbath, and explanations of the Sabbath ceremonies. Venice.
1652. Sefer Ma'yan ha-Ḥokmah, on Creation and on the union between the higher and lower spheres, first published by Abraham Ḳalmanḳes. Amsterdam.
1663. Derek Emet, annotations on the Zohar and the "Sefer ha-Tiḳḳunim." In three parts, Venice, 1663.
1663. Notes on the "Zohar he-Ḥadash," with text. Venice.
1680. Shulḥan 'Aruk, mystic explanations of many religious ceremonies.
Mubḥar she be-Abot, cabalistic commentary on Pirḳe Abot.
1710. Re'amim u-Re'ashim, prognostications. Constantinople.
1715. Notes on the Zohar, with text. Amsterdam.
1719. Perush Sefer Yeẓirah, commentary on the "Sefer Yeẓirah." Amsterdam.
1728. Tiḳḳun Ashmurot, midnight prayers termed "ḥaẓot." Amsterdam.
1737. Golel Or, on metempsychosis. Published by Meïr ben Ḥalifah Bikayim. Smyrna.
1766. Ḥadrat Melek, commentary on the Zohar. Published by Shalom ben Moses Buzaglio. Amsterdam.
1781. Seder ha-Tefillah, a book of prayer. Published by Aryeh ben Abraham. Zolkiev.
1785. Liḳḳuṭe Shas, cabalistic dissertations on several Talmudic treatises. Korzec.
1785. Zohar ha-Raḳia', commentaries on the Zohar, with the text. Korzec.
1785. Ḳol be-Ramah, on the Idra Rabba, with additions by Jacob ben Ḥayyim Ẓemaḥ. Korzec.
1788. Kelalot Tiḳḳunim we-'Aliyyot ha-'Olamot, on the ascension of the soul. Lemberg.
1839. Ma'or we-Shemesh, cabalistic collectanea. Published by Judah ben Abraham Raphael Koriat. Leghorn.

Ḥayyim Vital, as stated above, produced from the notes of Luria's lectures a work entitled "'Eẓ Ḥayyim" (Korzec, 1784), in six volumes: (1) "Oẓerot Ḥayyim," containing twenty-one cabalistic essays; (2) "Sefer Derushim," cabalistic explanations of the Bible; (3) "Sefer Kawwanot," mystic explanations of the prayers; (4) "Ṭa'ame ha-Miẓwot," on the precepts; (5) "Sefer ha-Gilgulim," on metempsychosis; (6) "Sefer Liḳḳuṭim," miscellanea. According to Azulai, Luria wrote in the earlier part of his life novellæ on Zebaḥim and Beẓah. A halakic consultation addressed by Luria to Joseph Caro is inserted in "Abḳat Rokel" (§ 136).

Johanan ben Aaron ben Nathanael Luria: Alsatian Talmudist; lived successively at Niedernheim and Strasburg at the end of the fifteenth century and in the beginning of the sixteenth. After having studied for many years in German yeshibot, he returned to Alsace and settled in Strasburg, where he founded a yeshibah by permission of the government. Luria was the author of an ethical work entitled "Hadrakah" (Cracow, *c.* 1579) and of "Meshibat Nefesh" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 257), a haggadic and mystical commentary on the Pentateuch, founded on Rashi. To this commentary was appended a dissertation in which Luria refuted the arguments advanced by Christians against Judaism.

K. I. Br.

Solomon b. Jehiel Luria: Rabbi and author; born in Brest-Litovsk, Lithuania, 1510; died at Lublin Nov. 7, 1573. When still a youth his parents sent him to Posen, where he studied under the guidance of his grandfather Rabbi Isaac Klauberia. He left Posen in 1535, owing to an extensive fire which destroyed his grandfather's property. On his return to his native place he assiduously continued his studies. Here he married Lipka, daughter of Rabbi Kalonymus. After some time he was elected rabbi of Brest, and established a yeshibah there. About 1550 he received the appointment of rabbi and head of the yeshibah at Ostrog, and in 1555 he moved to Lublin, where he became head of the famous yeshibah.

His Method of Study.

Concerning his method of study and teaching he says: "I was painstaking always to trace the last source of the Halakah, which I used to discuss with my friends and pupils, spending sometimes a week in research and close reasoning till I came upon the root of the matter; then I used to put it down in my book. And it was always my habit to quote all the opinions of my predecessors, according to their rank of authority, also the decisions and rulings of those who compiled the responsa, in order to avoid the suspicion of plagiarism or the reproach that I had overlooked the opinion of some great authority. In two years I did not reach in my studies further than half of the tractate Yebamot. I spent a whole year on two chapters of the tractate Ketubot; and the chapter 'Miẓwat Ḥaliẓah' [Yebamot] took me half a year." It is therefore not surprising that Luria was very independent, and was not afraid to say in public: "Do not take any notice of what people have been accustomed till now to consider as permitted; for most of them used to read only the 'Ṭur Oraḥ Ḥayyim' by Rabbi Jacob ben Asher. He gave permission in the name of his father, Rabbi Asher; and in his introduction he even asserts that whenever he quotes the ruling of his father, it should be considered as decisive for practise. And, indeed, many people took it for granted that it is to be looked upon as the last and absolute decision, as though it were handed down to us as a tradition of Moses from Mount Sinai. The fact that he agrees with his father does not pledge us to agree with him; indeed, so it is in many ritual matters that the general usage is against him." Nor does he spare even Joseph Caro, whom he accuses of having occasionally expressed merely superficial views in his effort to harmonize conflicting laws, as well as of having sometimes based his decisions on the reading of corrupt texts.

With even more asperity he speaks of Benjamin Zeeb and his responsa, "Binyamin Ze'eb," which he warns the public are worthless and full of plagiarisms. Of some of the rabbis of his time he says as follows: "The ordained are many; but those who know something are few. The number of overbearing ones is steadily increasing, none of whom knows his place. As soon as they are ordained they begin to domineer and, by means of their wealth, to gather about themselves disciples, just as lords hire slaves to run before them. They rule over the scholars and the congregation. They excommunicate and anathematize, and they ordain pupils who did not study under them, and receive therefor money and reward. They are always seeking their own interests."

Friendship with Isserles.

Though Luria was not on very good terms with most of his contemporaries, yet he formed an intimate friendship with Rabbi Moses Isserles of Cracow, as may be seen from their correspondence. But this friendship did not prevent Luria from remonstrating with Isserles when he learned that the latter was devoted to the study of philosophy, for he exhorted him with the words: "Thou art turning to the wisdom of the uncircumcised Aristotle. Wo unto my eyes that they have seen such a thing! This is a sin for such a prince in Israel." The adherents of the Cabala he censured severely, saying: "These modern ones pretend to belong to the sect of the cabalists. . . . They can not see in the light of the Zohar, which they do not understand. . . . Therefore, do not go in their ways. Have nothing to do with things secret."

Luria's works include: (1) "Ḥokmat Shelomoh" (Cracow, 1582), critical notes on the Talmud and its earlier commentaries; it has been appended to the later editions of the Talmud; (2) Responsa (Lublin, 1574); (3) "Yam shel Shelomoh" (Prague, 1615, and later), novellæ on different treatises of the Talmud: on Baba Ḳamma; on Ḥullin (Cracow, 1646); on Yebamot (Altona, 1740); on Beẓah (Lublin, 1636); on Ḳiddushin (Berlin, 1766); and on Giṭṭin (*ib.* 1766); (4) "Yeri'ot Shelomoh," supercommentary on the commentary of Elijah Mizraḥi on Rashi, prepared for print by his pupil Jehiel ben Meshullam; (5) "'Ammude Shelomoh" (Basel, 1600), commentary on the book of precepts by Rabbi Moses of Coucy; (6) "'Aṭeret Shelomoh"; (7) "Zemirot" (Venice, 1602), commentary on the "Sha'are Dura" of Isaac of Düren (Lublin, 1598), liturgical songs; and others. Many of Luria's works are still extant in manuscript.

LUTHER, MARTIN*: German church reformer; born at Eisleben Nov. 10, 1483; died there Feb. 18, 1546. The Reformation originated in the Renaissance, being due partly to the general critical examination of traditional doctrines, and partly to the study of ancient languages, particularly of Greek and Hebrew, a study which was advocated and fostered by the Humanists, and the necessity of which was implied in the fundamental principle of Luther that Scripture alone is the infallible guide in religious belief. Luther attempted from the start to win over Reuchlin, the author of the first Hebrew grammar written by a Christian and the defender of rabbinical literature against the attacks of the apostate Pfefferkorn and against the Dominicans who supported him; but while Melanchthon, Reuchlin's nephew, was Luther's truest friend, and while he did not succeed in winning Reuchlin over to his cause, he incurred the enmity of Reuchlin's foes, one of them being the Dominican friar, Hoogstraten.

Scant Knowledge of Hebrew.

While Luther always upheld the Bible as the basis of belief, and while he speaks very highly of Hebrew, which he calls the best, the richest, and at the same time the plainest language, he himself did not go back to the original text; indeed, he admits that he was not a Hebrew scholar, and especially that he knew nothing of Hebrew grammar (*ib.* lxii. 313). A Hebrew book he had received, he gave to a friend, saying, "Excedit enim vires meas" ("Luther's Sämmtliche Werke," ii. 612, "Briefe"). His exegetical principle is one which reveals the context by inspiration rather than by grammatical exposition, and while he speaks very highly of Moses and David Ḳimḥi, whose works he knew through Nicholas de Lyra and Paulus of Burgos, he often inveighs, in his characteristically coarse manner, against what he calls the perversions of the rabbinical exegetes who "versuchen, drehen, deuten, martern fast alle Wort" (*ib.* xxxii. 174 ["Von den Juden und Ihren Lügen"] and lxii. 311-317; see Geiger, "Das Studium der Hebr. Sprache in Deutschland," pp. 5-7,132, Breslau, 1870). He speaks highly of the Jews as having been chosen by God as the instruments for the promulgation of His message to the world. "The Jews," he says, "are of the best blood on earth" (Luther, *l.c.* xxv. 409); "through them alone the Holy Ghost wished to give all books of Holy Scripture to the world; they are the children and we are the guests and the strangers; indeed, like the Canaanitish woman, we should be satisfied to be the dogs that eat the crums which fall from their master's table" (xxv. 260).

In Luther's attitude toward the Jews two periods have to be distinguished. During the earlier, which lasted until 1537 or shortly before, he is full of compassion for their misery and enthusiastic for their conversion to Christianity; in the later, toward the end of his life, he denounces them in unmeasured terms, saying that it is useless to convert any Jew, and accusing them of a relentless hatred of Christianity and of all the crimes which their enemies ever charged them with — well-poisoning, ritual murder, cowardly assassinations of their patients, etc. He wishes the princes to persecute them mercilessly and the preachers to set the mob against them. What caused this change of attitude is not exactly known. Luther himself speaks of polemical works written by Jews in which they blasphemed Jesus and Mary, of the propaganda which they made among Christians and which caused quite a number of Christians in Moravia to embrace Judaism, and of three Jews who had come to him to convert him.

"Dass Jesus ein Geborner Jude Sei."

The first of Luther's works dealing with the Jews is a pamphlet entitled "Dass Jesus ein Geborner Jude Sei," which appeared in 1543 and was republished seven times in the same year (*ib.* xxix. 45–74). The occasion for publishing the pamphlet was the accusation hurled against Luther, evidently by his Catholic opponents, that he had denied the supernatural birth of Jesus. After defending himself against the charge of being a Jew at heart, he speaks of the Jews and of the way to convert them to Christianity. "Our fools, the popes, bishops, sophists, and monks, these coarse blockheads ["die groben Eselsköpfe"], dealt with the Jews in such a manner that any Christian would have preferred to be a Jew. Indeed, had I been a Jew and had I seen such idiots and dunderheads [Tölpel und Knebel] expound Christianity, I should rather have become a hog than a Christian" (*ib.* xxix. 46–47). The accusation that Roman Catholicism presented Christianity in such a repulsive form that Jews could not be won over by it occurs repeatedly in his works. "If I were a good Jew, the pope could never persuade me to accept his idolatry. I would rather ten times be racked and flayed" ("ehe wollte ich mich zehen Mal lassen raedern und aedern"; *ib.* lxii. 355). In another passage he tells the anecdote, derived from Boccaccio, of a Jew who desired to embrace Christianity but wished first to see the pope. When the Jew returned from Rome he asked a priest to baptize him, "for the God of the Christians must indeed be a God who forgives all iniquity if he suffers all the rogueries of Rome"

---

*This article is limited to the presentation of Luther's relation to Jews and Judaism.

(*ib.* lxii. 377). "If the Apostles had dealt with the heathen as the Christians deal with the Jews, none ever would have been converted to Christianity" (*ib.* xxix. 47).

Luther closes this remarkable pamphlet with the following appeal: "I would advise and beg everybody to deal kindly with the Jews and to instruct them in the Scripture; in such a case we could expect them to come over to us. If, however, we use brute force and slander them ["gehen mit Luegentheiding umb"], saying that they need the blood of Christians to get rid of their stench, and other nonsense of that kind, and treat them like dogs, what good can we expect of them? Finally, how can we expect them to improve if we prohibit them to work among us and to have social intercourse with us, and so force them into usury? If we wish to make them better we must deal with them not according to the law of the pope, but according to the law of Christian charity. We must receive them kindly and allow them to compete with us in earning a livelihood, so that they may have an opportunity to witness Christian life and doctrine; and if some remain obstinate, what of it? Not every one of us is a good Christian" (*ib.* xxix. 74).

Hope of Conversion of Jews.

This book was undoubtedly written with the purpose of winning the Jews over to Christianity, as may be inferred from the fact that he sent it in the year of publication to a converted Jew named Bernhard (Geiger, "Jüd. Zeit." vii. 24 *et seq.*). Luther was an enthusiastic believer in the Christianity of the apostle Paul, and therefore expected from the Reformed Church the fulfilment of Paul's prophecy that all Israel shall be saved (Rom. xi. 26). "If this prophecy has not been fulfilled yet, it is because papacy has presented such a perverted Christianity that the Jews have been repulsed by it." It is very probable that Luther expected the attestation of the truth of Christianity by a general conversion of the Jews, and, being disappointed, changed his attitude toward them. In one of his letters he speaks of a Polish Jew who had been hired to assassinate him, but this was most likely merely a vague rumor in which he did not himself believe (Geiger, "Jüd. Zeit." vii. 26). In 1537, when Duke John Frederick of Saxony, who was a strong supporter of the Reformation, ordered the expulsion of the Jews from his country, Josel Rosheim, the advocate of the Alsatian Jews, armed with a letter of introduction from Luther's friend Capito, asked Luther to intercede with the duke in behalf of his coreligionists. Luther, however, refused to act, saying that the Jews had not appreciated the kindness he had shown them in his book and that they were "doing things which are unbearable to Christians." The somewhat obscure allusions of this letter seem to indicate that he was incensed at the Jews for their refusal to become Christians (*ib.* v. 78-80; Geiger, "Jüd. Zeit." v. 28; "R. E. J." xiii. 112).

"Von den Juden und Ihren Luegen."

Two books published by Luther in 1544 are especially marked by bitterness—"Von den Juden und Ihren Luegen" and "Vom Schem Hamphoras und vom Geschlecht Christi," both printed in Wittenberg (*ib.* xxxii. 99-358). The occasion for writing the first book was, as he states, the audacity with which the Jews attacked the Christian dogmas and especially the Christological exposition of the Old Testament. The bitterness noticeable in the writings of his last years and which was due to disappointment at the slow progress of his work, to the dissensions among his followers, and, not the least, to his physical ailments, is evident to a degree which is grievous to his most ardent admirers. He must have been influenced by some converts from Judaism, such as Antonius Margaritha and Bernhard Ziegler (*ib.* xxxii. 357), probably the Bernhard referred to above, for he attacks the views expressed in the prayer-book as blasphemous, and repeats the old accusations that the Jew does not consider the "goyim" as human beings, that he prays for their misfortune (*ib.* xxxii. 193), and that when a Christian comes to his house he says to him "Sched willkomm," which the Christian understands as a welcome, though in reality the Jew is calling him a "devil" (*ib.* xxxii. 222). Luther praises the "dear Emperor Charles" for having expelled the Jews from Spain (*ib.* xxxii. 231, evidently meaning Ferdinand, Charles V.'s grandfather), and expresses great satisfaction at a recent edict of expulsion from Bohemia. He repeatedly urges that their synagogues be burned, and is sorry that he can not destroy them with hell-fire. He further advises that their houses be torn down, their books taken from them, their rabbis prohibited from teaching; that no safe-conduct be granted them; that their usury be prohibited; that their public worship be interdicted; that they be forced to do the hardest labor; and he admonishes everybody to deal with them in a merciless manner, "even as Moses did, who slew three thousand of them in the wilderness." The invectives which he uses against them are vile even for sixteenth-century standards. After admonishing his readers not to have the slightest intercourse with the Jews, he says: "If that which you already suffer from the Jew is not sufficient strike him in the jaw." The most fanatic statement is the following: "If I had power over them I would assemble their most prominent men and demand that they prove that we Christians do not worship the one God, under the penalty of having their tongues torn out through the backs of their necks" (*ib.* xxxii. 257).

"Shem Hamphoras."

His "Shem Hamphoras" was written to refute a statement made by some Jews that Jesus performed his miracles with the aid of magic art. He attacks cabalistic and rabbinical literature, saying that if Jews possess the knowledge of magic art they must have had it from Judas Iscariot (*ib.* xxxii. 342 *et seq.*). In both works he repeatedly declares it useless to attempt the conversion of any Jew, for a Jewish heart is so "stocksteineisenteufelhart" that it can never be changed (*ib.* xxxii. 276). He also quotes, in his "Table-Talks," a report that in a church of Cologne is the statue of a dean who was a convert from Judaism and who had ordered the statue to be made with a cat in one hand and a mouse in the other, because just as mouse and cat will never live in harmony, neither will Jew and Christian (*ib.* lxii. 371).

These books aroused grave fears among the Jews, and Josel Rosheim asked the city council of Strasburg to allow him to publish a book in refutation of Luther's pamphlets (July 11, 1543); but this the council considered unnecessary. Josel complains that although he made seven attempts to see Luther he was never admitted, and in his memoirs, written in the year following Luther's death, he speaks with bitterness of the great reformer's attitude toward the Jews, expressing the hope that he was in hell, both body and soul ("R. E. J." xvi. 92; see also, on Josel's relations with Luther, Feilchenfeld, "Rabbi Josel von Rosheim," p. 121, Strasburg, 1898). Luther often referred to the Jews in his commentaries on the Bible, as in his exposition of the 109th Psalm, in which he explains the reference to the lot of the wicked to be a prophecy of Israel's misery. The argument that the sufferings of the Jews are the just punishment for their rejection of Jesus is as common with him as with all medieval theologians. The totally different attitudes which he took at different times with regard to the Jews made him, during the anti-Semitic controversies of the end of the nineteenth century, an authority quoted alike by friends and enemies of the Jews.

D.

LUTSK (LUTZK): District city in the government of Volhynia, Russia, situated on the right bank of the Styr at its junction with the Gizhtza. Between the years 1224 and 1227 about 300 Karaite families removed from Wilna to Volhynia, and some of them settled in Lutsk. About the same time a number of Rabbinite Jews also came to Volhynia. Lutsk Jews are mentioned in Witold's charter of privileges granted to the Jews of Lithuania July 1, 1388. Reference is made to them also in the grant of the Magdeburg Rights to the burghers of Lutsk by Ladislaus Jagellon Oct. 31, 1432, whereby the Jews and Armenians of that city are accorded the same rights as those of Cracow and Lemberg, except as regards the collection of customs duties, which the king reserves for himself. Toward the end of the fifteenth century the Jewish community of Lutsk had acquired considerable wealth and influence, and some of its members figured prominently as tax-farmers. The records of that time mention the names of the brothers Ostashka and Jonathan Ilyich, Shakna Novakhovich, Israel, Esko, Judah, Enka Momotlivy, and Olkon. The last-named is probably the Alkan Danilevich to whom King Casimir Jagellon at the time of his death owed 415 kop groschen, a debt partly repudiated by his heir, Alexander Jagellon.

In the Fourteenth and Fifteenth Centuries.

On the expulsion of the Jews from Lithuania in 1495 the extensive estates owned by the wealthy Jews of Lutsk were distributed among Alexander's favorites. Thus on June 26, 1495, he presented to the Polish nobles Soroka and his brother two estates in the district of Lutsk belonging to the Jews Enka Momotlivy and Itzkhak Levanovich; on March 12, 1496, he gave the estate of Topoli, formerly the property of the Jew Simchich, to the alderman of Lutsk; on June 5, 1496, he presented another Jewish estate to Prince Ostrozhski; and on July 31, 1497, for the encouragement of Christian settlers, he made to the Christian inhabitants of Lutsk a general grant of the vacant lands and houses belonging to the exiled Jews. On the return of the Jews to the city in 1503 they organized two separate communities, one Rabbinite and the other Karaite, having their respective synagogues, as appears from a decree issued by King Sigismund Dec. 22, 1506, by which he grants the petition of the Jews of Lutsk for the removal of the burdensome tax of 12 kop groschen on each of the two synagogues. To some extent at least the Jews regained their former wealth and influence, becoming prominent as before in the farming of the taxes and as leaseholders, and engaging in important commercial undertakings. The more important of them were Shamakh Danilevich and Missan Kozka (1507); Mishko Polchekovich, Abraham Shakhnovich, Mordas Chagadayevich, Frush, Nissan Shimchich, and Rebinko Leveyevich (1509). In 1509 the collection of taxes in Lutsk and in other towns was awarded to the Jew Michael Jesofovich, who again farmed the taxes on salt and wax in Lutsk from 1520 to 1526.

Jewish Tax-Collectors.

During the first half of the sixteenth century the Jews of Lutsk continued to share in the prosperous condition of their coreligionists throughout Poland and Lithuania. They were often granted special privileges and exemptions, as is evidenced by a number of contemporary documents. By a royal decree dated July 18, 1528, the Jews equally with the burghers were freed from the payment of taxes to the crown for a period of ten years, and of municipal taxes for five years. This decree was issued in response to a petition for such exemption on account of a destructive fire which had devastated the city. Similarly in 1551 the Jews of Lutsk, in common with those of other towns, were exempted from the payment of the special tax called "Schereb-schisna"; and on July 30, 1556, King Sigismund August exempted them from the payment of customs duties on all commodities except wax and salt, on the same conditions as the Christian inhabitants.

Documents of the middle of the sixteenth century bear witness to the growing friction between the Jewish community of Lutsk and the local authorities. In 1545 both the Rabbinite and the Karaite community made complaint that Prince Matvei Chetvertinski, ignoring the privileges granted to the Jews of Lutsk by the king, had blocked the road to their cemetery and cut off access to a certain pond. An inspector sent to investigate the case reported thereon to King Sigismund August, who ordered the prince to reopen the road and to abstain from further obstructing it. As time went on the friction increased, due largely to the great power of the Jewish leaseholders and tax-farmers, who were under the immediate jurisdiction of the king, and who naturally refused to acknowledge the authority of the local officials. For instance, in 1560 Mendel Isakovich, a Lutsk Jew,

In the Sixteenth Century.

complained to the king that the authorities of Volhynia had placed under their jurisdiction his (Mendel's) secretaries and other employees engaged in the collection of the taxes. The king ordered that henceforth these officials should not be interfered with. Again, in 1561, the burgomaster and alderman of Lutsk complained in the name of the burghers that the agents of the Jewish leaseholder Yeska Shlomich had caused them great damage by collecting during the fair of St. Simon large sums for the privilege of selling spirituous liquors, in consequence of which the visitors had departed and the burghers "were obliged to wander in the villages like Gipsies." Moreover, the same agents had prohibited the burghers from leaving the town with spirituous liquors in their possession, thereby causing them pecuniary loss. In 1566 the burghers of Lutsk descended on the royal estate of Guidovskoye and seized the Jew Shmoila Gooshich, whom they put to death notwithstanding the protest of the other employees on the estate. In 1569 the alderman of Lutsk, Prince Koritzki, imprisoned the Jews of the city on account of the non-payment of their share of the tax levied on the Jews of Lithuania. King Sigismund August, however, ordered their release, since they had already paid the poll-tax of 15 groschen determined upon by the Diet of Grodno. The king ordered also the removal of the seals which had been placed on the synagogue and other property of the Jews. In the same year the whole of Volhynia was added to Poland, and the members of both of the Jewish communities of Lutsk took the oath of allegiance (June 23, 1569).

A considerable number of legal documents dating from the latter half of the sixteenth century make mention of the Jews of Lutsk and of their relations to their neighbors. In 1571 John Stefanovich, the superior of the monastery of Derwansk, stated in his will that he had paid in behalf of the town secretary of Lutsk the sum of 2½ groschen to the Jews Izel and Yesko for the building of a cellar. In the list of property left by Andrei Rusin, Bishop of Pinsk and Turov, reference is made to certain documents belonging to a Jew and relating to three properties "at the end of the crooked bridge of Lutsk"; also to ten documents written in Hebrew. Among the servants of the bishop are enumerated several bought from this Jew. In 1583 Batko (Simeon) Misanovich, who had recently been baptized, requested the alderman of Lutsk to enter in the city records his bequest to his son Moshka of certain moneys due to him (Simeon).

A number of documents preserved in the central archives of Kiev, and dated 1563, afford interesting information concerning the life of the Jews of Lutsk at this time. Among these is the complaint of the Jew Yakhna Leveyevich, a soldier in the service of Prince Constantin Ostrozhski, against his father-in-law, Nissan Rabiyevich of Klevan, who in Yakhna's absence had visited his house, taken away his wife and his goods, and had then disappeared. The enumeration of the articles abstracted includes Turkish knives, a Hungarian sword with silver mountings, a silver dagger, saddles, and gold ornaments, besides household utensils.

In the Seventeenth Century.

In 1601 Prince Grigori Sangushko Koshirski presented for entry in the city records of Lutsk a copy of the lease to the Jews Abraham Shmoilovich of Turisk, Getz Pertsovich of Torchinsk, and their heirs, of his estates in the town of Gorokhov, the estate and village of old Gorokhov, and a number of other estates and villages. The lease was for a period of three years, and the lessees were permitted among other things to exercise complete jurisdiction over the peasants, even to the extent of inflicting the death penalty if necessary.

On March 6, 1625, Leib Israilevich and Ilia Abramovich, Jewish scholars of Lutsk, reported for entry in the city records an attack made upon them by the nobles Lesetzki and their followers while the complainants were accompanying to the cemetery the body of Leib Isakovich. The Lesetzkis had filled in the freshly dug grave, had destroyed the bridge leading to the cemetery, had nailed fast the cemetery gates, and had refused to allow the burial to take place until a debt due to one of them should have been paid. The priest, appealed to by the Jews, ordered the Lesetzkis not to molest the Jews; but the nobles collected an armed mob, drove off the Jews, many of whom were wounded, and threw the body of Isakovich into the ditch.

In Oct., 1637, the burghers of Lutsk lodged a complaint against all the Jews to the effect that they paid nothing into the city treasury, that they had freed many houses from local jurisdiction, that they had built many others on land belonging to the burghers, and had established on the city walls breweries and distilleries, thus diminishing the city's power of defense; further, that they had refused to perform military and guard duty, and that they had purchased liquor from the merchants of places outside of the city limits, reselling it within the city. Complaint of excessive taxation was also made by Jewish leaseholders and their representatives.

In 1647 one of the priests of Lutsk forbade the communicants of his church to buy meat from Jewish butchers. The matter was carried to the courts, and the priest was ordered to pay damages.

During the Cossack uprising under Chmielnicki (1648–49) the Jewish community suffered severely, and a number of Jews were killed. In 1662 the Diet of Volhynia exempted the Jews of Lutsk and other Volhynian towns from the payment of all taxes except that on braid.

In 1637 Lutsk possessed a yeshibah which was destroyed probably by the Cossacks in 1648. In the "Sefer Zikkaron" of the Karaites (Neubauer, "Ginze Petersburg," p. 130) is a statement concerning the Karaites of Lutsk and commencing as follows: "These are the names of the members of our community who were killed by the Cossacks." During the same uprising the prayer-houses were destroyed and all the books burned (Graetz, "Hist." Hebrew ed., vol. vii.). In 1699, at the request of Charles XII. of Sweden, Mordecai ben Nissan, sexton of a Karaite synagogue, went to Lutsk and wrote an account of his observations in "Lebush Malkut," in which he denounces the Rabbinite Jews.

Among the tombstones in the Jewish cemetery are those of: Hannah Ginzburg, died in 1317 (?); a woman who died in 1595; Rabbi Eliakim Getzel, died in 1715; Rabbi Mordeccai ben Shalom, died in 1723; Judah Zeeb ben Tobias, martyred in 1764; and the maggid of Lutsk, Meïr ben Ḥayyim, died in 1819 ("Ha-Meliẓ," 1860, No. 19).

In 1791, the year of its annexation to Russia, Lutsk contained only fifty houses owned by the burghers; the rest belonged to the Rabbinite Jews and the Karaites. In 1864 there were 3,423 Rabbinite Jews and 221 Karaites in a total population of 4,973; in 1895 the numbers were 12,007 and 72 respectively in a total population of 15,125. In the last-cited year the community possessed eighteen synagogues and prayer-houses besides a Karaite prayer-house, one Jewish hospital, and one Jewish dispensary. At the same date there were in the district of Lutsk, exclusive of the city, 42 Karaites and 18,775 other Jews in a total population of 188,636.

H. R.

LUTZYN: Russian town in the government of Vitebsk; it is situated near a chain of mountains and surrounded by lakes and streams. Lutzyn is an ancient city, and was fortified by the Livonian Order in the twelfth century. According to tradition and local inscriptions, Jews began to settle at Lutzyn in the fifteenth century; but when Ivan the Terrible conquered Polotsk, Lebezh, and Lutzyn, those of the Jews in the neighborhood who did not flee were exterminated. The Jews of Polotsk and Lebezh were drowned by the order of Ivan, but the Jews of Lutzyn, according to tradition, escaped, together with a number of the Poles and Catholic clergy. At the end of the sixteenth century, after the Russians had been driven out, Jews again commenced to settle in and around Lutzyn, but their number remained small until the second half of the eighteenth century. After the first partition of Poland (1772) the Jews of Lutzyn became the subjects of Russia, but they remained an unorganized community, without rabbi, charitable institution, or cemetery, until 1783. At this time a great misfortune befell them. Some Catholic priests and Jesuits attempted to convert the Jewish tailor Moses, and when the latter, during a dispute, answered in a way that was unpleasant to his opponents and reflected upon the Christian religion, he was burned alive. On the day after this crime was committed, the Jews collected the ashes of their martyr, buried them with impressive ceremonies on the spot where he had been burned, and decided to organize themselves; they finally succeeded in bringing to justice the murderers of their "ḳadosh" (martyr).

In 1795 David Ziony was appointed rabbi of Lutzyn; he held the rabbinate for two years, and died at the age of thirty-eight. His eldest son, Naphtali, succeeded him when not quite twenty years of age, and served his community more than fifty years. He established several charitable institutions, and, when he died in 1848, was succeeded by his eldest son, Aaron Selig. R. Aaron Selig died in 1875, after occupying the rabbinate for twenty-seven years. He was the author of "Sefer Ẓiyyoni" (Wilna, 1872), on various religious and theological subjects.

Aaron Selig was succeeded by Eleazar Don-Echi, a nephew, and his oldest son-in-law. The latter is the author of "Eben Shetiyah," and is the present (1904) rabbi of Lutzyn.

Blood Accusation.

In the early spring of 1883 a Christian girl, who had been for several months a servant in the household of the Jew Zimel Lotzov, disappeared, and was afterward found drowned near the town. The procurator of the government, influenced by the clergy, made out a case against the Lotzov family and the whole community. Prince Urusoff, the Russian jurist and philanthropist, left St. Petersburg to defend the Jews, the result being that the jury declared them innocent of any connection with the drowning of the girl. But the procurator was not satisfied with this verdict and transferred the case to the courts of Vitebsk, where Lotzov and his wife were sentenced to Siberia—Lotzov to penal servitude for life in the government mines, his wife to imprisonment for six years. Prince Urusoff again defended them, but his eloquence, as well as the testimony of physicians and other witnesses, failed to save them, because the representatives of the government used every possible means, lawful and unlawful, to influence the minds of the Vitebsk judges. The Lotzovs were declared guilty, not as murderers themselves, but as the shelterers of murderers who had killed a Christian girl for some unknown reason.

The Jews of Lutzyn contributed materially to the establishment of Jewish agricultural colonies in Kherson, Yekaterinoslav, and northwestern Russia. In 1835 many Jews of Lutzyn sold their property for small sums and went to South Russia, where the government gave them farming land. A few decades after the migration to the Kherson and Yekaterinoslav colonies, two Jewish agricultural colonies were founded by the government near Lutzyn.

Lutzyn has a population of 6,000, half of which are Jews. Of these 310 are artisans and 65 day-laborers. The educational institutions consist of: a Jewish one-class school with 30 pupils, 20 ḥadarim with 150, and a Talmud Torah with 42; there are also 49 Jewish pupils attending the district and common schools.

LUXEMBURG: Grand duchy of central Europe, its capital bearing the same name. The sources do not definitely indicate when Jews first settled in Luxemburg. The first record of a Jew residing there occurs in a document of the year 1276. At this time the Jewish population of the duchy seems to have been small and in indigent circumstances; for the impoverished nobility of Luxemburg transacted their money affairs with the Jews of Treves, Coblenz, Saarburg, and Wittlich.

Early History.

During the entire Middle Ages the Jews lived in a ghetto, where there were a Jews' gate, a cemetery, and a synagogue. It appears that subsequently the cemetery ceased to exist; for down to the beginning of the nineteenth century the Jews buried their dead at Freudenburg, in the district of Saarburg, province of the Rhine. As elsewhere in the German empire, the Jews of Luxemburg were the "servi cameræ" of the German emperors, and as a source of income to the imperial exchequer they were placed by the emperors under the protection of the local princes. Thus, on May 7, 1350, at the time of the Black Death, Charles IV. ordered the governor and the provost of Luxemburg to look to the safety of the Jews living there. In 1370, when the Jews of Brussels were accused of having desecrated a holy wafer, Wenzel, Duke of Brabant and Luxemburg, expelled all the Jews from Brabant; and none are met with in the country during the next fifty or sixty years.

With the beginning of the Burgundian rule (1441) Jews are again found at Luxemburg; each of them had to pay two gulden for a protection that was merely nominal. In March, 1470, notwithstanding the presence of the governor and the militia, the townspeople attacked the Jews, plundered and demolished their houses, and maltreated them, so that they were barely able to flee to the castle on the Bockfelsen (Clausener Berg), to which they were admitted by the governor and whence they subsequently reached places of safety.

In the Sixteenth Century.

In the beginning of the sixteenth century there were Jews at Echternach, Luxemburg, Arlon, and Igel. But no Jews are mentioned after 1527, and probably none were living at Luxemburg from the time of the Spanish rule, 1555, to the end of the eighteenth century, although Maranos seem to have lived there in the seventeenth century. All the more worthy of note is it that, as is shown by a tablet in the wall of the present fortress of the city, the famous citadel of Luxemburg was built by a Jewish engineer, Isaac de Traybac, in 1644. Little is known of the Maranos' occupations. They were probably engaged in retail business; for by a decree of the provincial council, dated April 15, 1513, they were forbidden to sell cloth otherwise than by the piece. They were never required to wear the so-called Jews' hat or yellow badge; and although they were compelled to take an oath "more Judaico" they were not required to submit to the humiliating ceremonies that usually accompanied it. A decree of Philip V., issued Sept. 6, 1703, determined the poll-tax that traveling Jews had to pay at the bridges of various cities, this decree being confirmed Sept. 20, 1720. These conditions seem to have obtained during the entire eighteenth century down to the beginning of the French Revolution; for as late as 1787 a Jew complained of this unjust tax, without receiving satisfaction.

In the Eighteenth and Nineteenth Centuries.

By the laws of Jan. 28 and July 20, 1790, and Sept. 27 and Nov. 13, 1791, the Jews were granted equal civic rights with the other citizens. The community, numbering seventy-five persons, was organized by a law of March 17, 1808, and was placed under the jurisdiction of the consistory of Treves. When, on the termination of the French rule, Luxemburg was incorporated with the Netherlands (1815), the community was joined to the synagogue of Maestricht; and when Holland was separated from Belgium by the Belgian revolution of 1830 the grand duchy of Luxemburg became autonomous, and the Jewish community independent. A rabbinate, subventioned by the state, was organized, the first incumbent being Dr. Samuel Hirsch (1843-66), former rabbi of Dessau. As an advocate of religious reform he had to contend with many difficulties. He was succeeded by the French rabbi Sopher, of Dijon (1866-1870). In 1871 Dr. Isaac Blumenstein was elected rabbi, and upon his death (Aug. 3, 1903) Dr. Samuel Fuchs was called to the rabbinate. A new cemetery was laid out in 1884, and a handsome new synagogue was built in 1894. On Jan. 12, 1899, the supreme court declared the community, as represented by its president, to possess the rights of a corporation. There are also Jewish communities at Ettelbrück, Grevenmacher, Esch, and Medernach; and Jews are living in about twenty other smaller localities. The communities of Ettelbrück and Grevenmacher have each their own cemetery; at Esek a new synagogue was built in 1899.

The grand duchy has about 1,200 Jews in a total population of 236,543, and the capital 407, in 20,938. Only the community in the city of Luxemburg is officially recognized. It is under city and state supervision, and enjoys all the privileges accorded other ecclesiastical bodies. The affairs of the community are directed by a board of seven members, whose election is subject to confirmation by the government. Although legally the Jews of Luxemburg have full civic rights, they hold no government offices and are not represented in municipal councils. One exception, however, is to be recorded, due principally to local circumstances. In Hamm, near Luxemburg, the office of mayor is held by a Jew, Jules Godchaux, his predecessors having been his father, Samson, and the latter's cousin, Paul Godchaux. The Luxemburg Jews are engaged in industry, commerce, and agriculture. In their cloth-, glove-, and furniture-factories, they employ hundreds of working men, thus contributing materially to the national wealth. Socially, the Jews are on the same footing as the other citizens; and anti-Semitism has made no progress there, although clericalism in its organ "Luxemburger Wort" has occasionally started an anti-Jewish agitation. In one case the editor was fined 500 francs for libeling Jews and Judaism (April 2, 1889).

D. I. Bl.

LUZ: 1. Older name of the city of Beth-el (Gen. xxviii. 19, xxxv. 6, xlviii. 3; Josh. xvi. 2, xviii. 13; Judges i. 23).

2. Name of a city in the land of the Hittites, built by an emigrant from Beth-el, who was spared and sent abroad by the Israelitish invaders because he showed them the entrance to the city (Judges i. 26). "Luz" being the Hebrew word for an almond-tree, it has been suggested that the city derived its name from such a tree or grove of trees. Winckler compares the Arabic "laudh" ("asylum"). Robinson ("Researches," iii. 389) identifies the city either with Luwaizah, near the city of Dan, or (*ib.* iii. 425) with Kamid al-Lauz, north of Heshbon (now Ḥasbiyyah); Talmudic references seem to point to its location as somewhere near the Phenician coast (Soṭah

46b; Sanh. 12a; Gen. R. lxix. 7). Legend invested the place with miraculous qualities. "Luz, the city known for its blue dye, is the city which Sennacherib entered but could not harm; Nebuchadnezzar, but could not destroy; the city over which the angel of death has no power; outside the walls of which the aged who are tired of life are placed, where they meet death" (Soṭah 46b); wherefore it is said of Luz, "the name thereof is unto this day" (Judges i. 26, Hebr.). It is furthermore stated that an almond-tree with a hole in it stood before the entrance to a cave that was near Luz; through that hole persons entered the cave and found the way to the city, which was altogether hidden (Gen. R. *l.c.*).

3. Aramaic name for the os coccyx, the "nut" of the spinal column. The belief was that, being indestructible, it will form the nucleus for the resurrection of the body. The Talmud narrates that the emperor Hadrian, when told by R. Joshua that the revival of the body at the resurrection will take its start with the "almond," or the "nut," of the spinal column, had investigations made and found that water could not soften, nor fire burn, nor the pestle and mortar crush it (Lev. R. xviii.; Eccl. R. xii.). The legend of the "resurrection bone," connected with Ps. xxxiv. 21 (A. V. 20: "unum ex illis [ossibus] non confringetur") and identified with the cauda equina (see Eisenmenger, "Entdecktes Judenthum," ii. 931–933), was accepted as an axiomatic truth by the Christian and Mohammedan theologians and anatomists, and in the Middle Ages the bone received the name "Juden Knöchlein" (Jew-bone; see Hyrtl, "Das Arabische und Hebräische in der Anatomie," 1879, pp. 165–168; comp. p. 24). Averroes accepted the legend as true (see his "Religion und Philosophie," transl. by Müller, 1875, p. 117; see also Steinschneider, "Polemische Literatur," 1877, pp. 315, 421; *idem*, "Hebr. Bibl." xxi. 98; *idem*, "Hebr. Uebers." p. 319; Löw, "Aramäische Pflanzennamen," 1881, p. 320). Possibly the legend owes its origin to the Egyptian rite of burying "the spinal column of Osiris" in the holy city of Busiris, at the close of the days of mourning for Osiris, after which his resurrection was celebrated (Brugsch, "Religion und Mythologie," 1888, pp. 618, 634).

K.

LUZKI, SIMḤAH ISAAC BEN MOSES: Karaite writer and bibliographer; born at Lutsk at the end of the seventeenth century; died, according to Firkovich, at Chufut-Kale, Crimea, or, according to another source, at Lutsk, March, 1766. He was well versed in rabbinical literature and was also a diligent student of Cabala. An indefatigable and able copyist, he went in 1751 to Chufut-Kale, where there was a flourishing Karaite community which possessed a rich library of Karaite manuscripts. He was received into the house of the Karaite writer Mordecai ben Berakah Yerushalmi, and succeeded Samuel Ḳala'i as teacher of the bet ha-midrash at Chufut-Kale. Luzki rendered great services to Karaite literature both as copyist and as writer. To his labors are due the preservation of many valuable works; and his book on bibliography (see below), although sometimes lacking critical sense, became an indispensable guide to the student of ancient Karaite literature.

Works.

The following are Luzki's works in the chronological order of their composition, as given by himself in his "Oraḥ Ẓaddiḳim": "Be'er Yiẓḥaḳ," commentary on Judah Gibbor's "Minḥat Yehudah" on the Pentateuch; "Siaḥ Yiẓḥaḳ," commentary on the prayer אדני שפתי תפתח for the Day of Atonement; "Reshit Ḥokmah," commentary in three volumes on the daily prayers; "Me'irat 'Enayim," code in two volumes, of which the first, entitled "Ner Miẓwah," comprises the Commandments and their explanations, and the second, entitled "Ner Ẓaddiḳim," enumerates the differences between the Rabbinites and the Karaites and gives a genealogy of the Karaite scholars and a list of their works; "Sha'are Ẓedeḳ," on the calendar; "'Aḳedat Yiẓḥaḳ," on the laws concerning the slaughtering of animals, and on the ten Karaite articles of belief; "Kebod Elohim," commentary on Joseph ben Mordecai Troki's mystic prayer "Ha-Elef Leka"; "Arba' Yesodot," on the four dogmatic principles, namely, the creation of the world, the existence of an invisible God, His holiness and spirituality, and His unity; "Tefillah le-Mosheh," questions and answers exchanged between God and Moses; "Halikot 'Olam," description of the creation of the world and of the nature of all things according to their quantitative and qualitative attributes; "'Ene Yiẓḥaḳ," commentary on Elijah Bashyaẓi's calendric tables; "Toledot Yiẓḥaḳ," religious poems, enigmas, letters, etc., in two volumes; "Ṭure Zahab u-Neḳuddot ha-Kesef," on the precepts, in two volumes, of which the first, "Ṭure Zahab," enumerates in verse all the precepts, arranged in the order of the 620 letters of the Decalogue; the second, "Neḳuddot Kesef," being a commentary thereon; "Sefer Bereshit," a mystic explanation of the Creation; "Rekeb Elohim," on the mysteries of the Divine Chariot; "Kebod Melakim," a mystic explanation of the letters of the Hebrew alphabet; "Sefer ha-Tappuaḥ," on the Creation and on the Divine Chariot, according to the modern Cabala; "Libnat ha-Sappir," on the ten Sefirot.

The only two writings of Luzki's which have been printed are: (1) "Or ha-Ḥayyim" (Koslov, 1835), commentary on Aaron ben Elijah's philosophical work "'Eẓ Ḥayyim," and (2) "Oraḥ Ẓaddiḳim" (Vienna, 1837), which is an abridgment of the "Ner Ẓaddiḳim." Another redaction of the last-named work, prepared by Luzki in 1756 at the request of Mordecai ben Berakah Yerushalmi, and entitled "Iggeret Miḳra'e Ḳodesh," gives a fuller description of the works enumerated in the "Oraḥ Ẓaddiḳim."

Luzki was a strong believer in Cabala, which he defends in his "Or ha-Ḥayyim," "Libnat ha-Sappir," and "Sefer ha-Tappuaḥ." He asserts that the Zohar was composed before the Mishnah, although it became known only at the time of Joseph Gikatilla. Had Maimonides, he says, known this divine book he would not have spent his time on the futilities of philosophy; and when Luzki criticizes the Cabala it is only the practical and not the speculative Cabala. Luzki cites the great rabbinical authorities who believed in the authenticity of the Zohar, from Abravanel down to Joseph Delmedigo. According to him there were cabalists even among the Karaites. Luzki was the author also of many religious poems, five of which have been incorporated into the Karaite ritual (part iii., beginning).

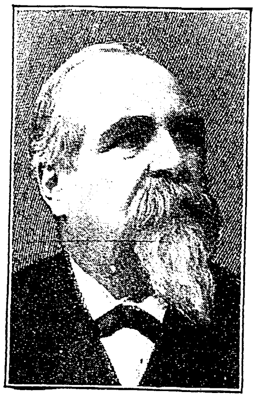
K. I. BR.

LUZZATTI, LUIGI: Italian statesman and political economist; born at Venice March 11, 1841; studied at the University of Padua (Doctor of Law 1863) and in Venice. While in the latter city he was strongly influenced by Politeo, professor of philosophy, and by Zanella, the lyric poet and teacher of literature from Vicenza. At the age of twenty Luzzatti had already given lectures on economics in Venice. He was an enthusiastic supporter of the doctrine of free trade. At twenty-two he became a teacher at the Istituto Tecnico in Milan; in 1867, professor of economics in the University of Padua; and in the same year the government appointed him commissioner for the Paris Exposition.



Luigi Luzzatti.

In 1869 he became general secretary under Minghetti in the agricultural department of the ministry. Shortly afterward he entered Parliament as deputy from Oderzo, and later was chosen as the representative of Padua.

Luzzatti has held his seat in Parliament uninterruptedly for more than thirty years. He is one of the leaders of the Right, and has repeatedly been president of the budget committee. In matters relating to economic development he has rendered his country incalculable service. He introduced the ideas of Schultze-Delitzsch into Italy, and made them national. He also labored in behalf of cooperative associations and for the establishment of postal and school savings-banks. He is an authority on all questions connected with the tariff, and has a firm grasp of the subject of commercial treaties.

Luzzatti is a tireless worker, speaker, and writer. At all times he upholds Italy's friendship with France. He has frequently been entrusted by successive Italian governments with delicate international negotiations. As one of the delegates who arranged (1902) the commercial treaty with France, he received the grand cross of the Legion of Honor. When in 1901 King Victor Emmanuel III. established the Order of Labor, Luzzatti, in recognition of his labors in behalf of the working classes, was the first to receive the new decoration. He fights against the Agrarians, who have now become so powerful in Germany; and he endeavors to make propaganda in favor of commercial treaties to prevent "Middle-Age economics" from invading Europe.

From Feb., 1891, to May, 1892, and from July, 1896, to June, 1898, Luzzatti was minister of the treasury in Rudini's cabinet. He then returned to his chair of economics at the University of Rome. At present (1904) he is minister of the treasury in the cabinet of Giolitti.

His works include the following: "Il Socialismo e le Questioni Sociali Innanzi ai Parlamenti d'Europa," 1883; "Schultze-Delitzsch," 1883; "Emulazione e Progressi delle Banche d'Emissione in Italia," 1886; "L'Abuso del Credito e la Finanza Italiana," 1889; "La Pace Sociale all' Esposizione di Parigi," 1890.

Chron.* Nov. 6, 1903.

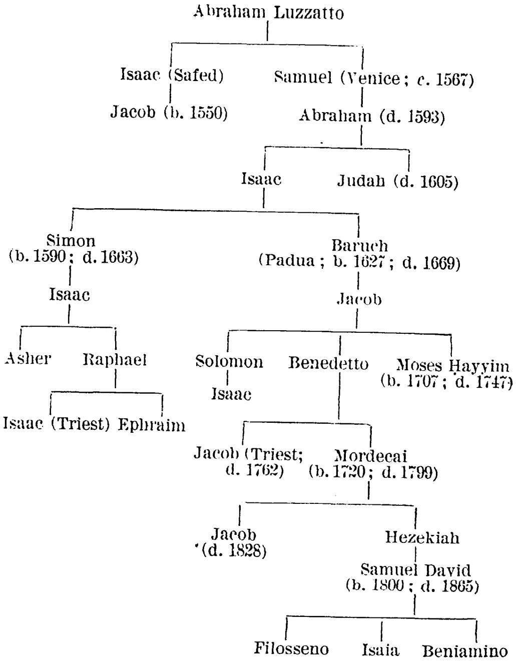
S. S. MUN.

LUZZATTO (LUZZATTI): Name of a family of Italian scholars whose genealogy can be traced back to the first half of the sixteenth century. According to a tradition communicated by S. D. Luzzatto the family descends from a German who immigrated into Italy from the province of Lausitz, and who was named after his native place ("Lausatia," "Lausiatus" = "Luzzatto"). The name "Luzzatti," which one branch of this family bears, can similarly be traced back to the plural form "Lausiati." The German rite is credibly reported to have been observed in the family synagogue (Scuola Luzzatto) in Venice.

The earliest member of the family of whom there is record is one Abraham Luzzatto, who lived at Safed at the beginning of the sixteenth century. His descendants may be grouped with some degree of probability in the following pedigree:



BIBLIOGRAPHY: *Autobiografia di S. D. Luzzatto Preceduta di Alcune Notizie Storico-Letterarie sulla Famiglia Luz-*

zatto a Datare del Secolo Decime Sesto, Padua, 1878-82; Brann, *Die Familie Luzzatto*, in *Samuel David Luzzatto: Ein Gedenkbuch zum Hundertsten Geburtstag*, Berlin, 1900; Mortara, *Indice*.

S. Be.—J.

Benedetto (Baruch) Luzzatto: Italian preacher and poet; flourished in the seventeenth century at Padua, where he was chief rabbi toward the close of his life. He united Talmudic learning with profound classical scholarship, and was especially well versed in history and philosophy. In 1636 he wrote a finished Italian sonnet for his friend Immanuel Porto Rapa's mathematical treatise "Porto Astronomico."

Luzzatto was highly esteemed by contemporary scholars. The anatomist and botanist Giovanni Weslingio was his intimate friend, and Leon of Modena in a list of his pupils praises his halakic learning. None of his works has been published.

Bibliography: S. D. Luzzatto, *Autobiografia*, p. 12; Brann, in *Samuel David Luzzatto, ein Gedenkbuch*, p. 36.

D. I. E.

Beniamino Luzzatto: Italian physician; born at Padua Dec. 3, 1850; died there June 22, 1893; son of Samuel David Luzzatto. Educated at the university of his native town (M.D. 1872), he became physician at the general hospital. In 1876 he was appointed lecturer on pathology, and in 1882 assistant professor and chief of the propædeutic clinic of Padua University.

Luzzatto wrote essays on the systolic murmur of the apex of the heart (Padua, 1875); on chronic broncho-pneumonia and tuberculosis (Milan, 1876); on tetanus traumaticus in pregnancy (Padua, 1876); and he was also the author of: "Embolia dell' Arteria Pulmonale," Milan, 1880; "Vade Mecum di Percussione," Padua, 1882; "Lezioni di Propedeutica Clinica," *ib.* 1883.

Bibliography: Pagel, *Biog. Lex.*

S. F. T. H.

Ephraim Luzzatto: Italian physician and poet; born at San Daniele, Friuli, in 1729; died at Lausanne, Switzerland, in 1792; studied medicine at the University of Padua, graduating in 1751. After practising in Italy for some years, he settled, in 1763, in London, where he was appointed physician in the hospital of the Portuguese congregation. In 1792 he left London, and was on his way to Italy when he died. Luzzatto was a highly gifted Hebrew poet, and he exercised his talent with equal success in national, mythological, moral, and sometimes amorous themes; the beauty of his style and the richness and delicacy of his vocabulary place his productions far above the average. He seems, however, to have lacked conviction and to have wavered sometimes between the extremes of religion and atheism, between Judaism and paganism.

Luzzatto wrote "Eleh Bene ha-Ne'urim," poems on various subjects (London, 1766), and "Ḳol Shaḥal" (Berlin, 1796). A second edition of the former work was published by Meïr Letteris (Vienna, 1839).

S. I. Br.

Filosseno (Philoxene) Luzzatto: Italian scholar; son of Samuel David Luzzatto; born at Triest July 10, 1829; died at Padua Jan. 25, 1854. Luzzatto (whose surname is the Italian equivalent of the title of one of his father's principal works, "Oheb Ger," which was written at the time of Filosseno's birth) showed from childhood remarkable linguistic aptitude, and having mastered several European languages, he devoted himself to the study of Semitic languages and Sanskrit. When a boy of thirteen he deciphered some old inscriptions on the tombstones of Padua which had puzzled older scholars. Two years later, happening to read D'Abbadie's narrative of his travels in Abyssinia, he resolved to write a history of the Falashas. In spite of his premature death, he wrote several important works: "L'Asia Antica, Occidentale e Media" (Milan, 1847); "Mémoire sur l'Inscription Cunéïforme Persane de Behistan," in "Journal de l'Institut Lombard" (*ib.* 1848); "Le Sanscritisme de la Langue Assyrienne" (Padua, 1849); "Etudes sur les Inscriptions Assyriennes de Persépolis, Hamadan, Van, et Khorsabad" (*ib.* 1850); "Notice sur Abou Jousouf Hasdai ibn Shaprout" (*ib.* 1852); "Mémoire sur les Juifs d'Abyssinie ou Falashas" (printed posthumously in "Arch. Isr." xii.-xv.). He also translated into Italian eighteen chapters of Ezekiel, adding to the same a Hebrew commentary. Luzzatto contributed to many periodicals, mostly on philological or exegetical subjects. Of special interest are his observations on the inscriptions in the ruins of the ancient Jewish cemetery in Paris ("Mémoires des Antiquités de France," xxii. 60).

S. M. Sel.

Isaia Luzzatto: Italian notary; born at Padua Sept. 27, 1836; died there Nov. 7, 1898; son of S. D. Luzzatto; graduated in law at the university of his native city. He was for some time attorney for one of the principal Jewish families of the community. His life was saddened by illness and other troubles. Besides a small work, written in his youth, on the battle of Legnano, he wrote various books to serve as a guide for the publication of his father's writings: "Materiale per la Vita di S. D. Luzzatto" (extract from the "Corriere Israelitico"), Triest, 1877; "Index Raisonné des Livres de Correspondance de Feu S. D. Luzzatto de Trieste, Precédé d'un Avant-Propos et Suivi d'un Essai de Pensées et Jugements Tirés de Ses Lettres Inédites," Padua, 1878; "Materiale per la Illustrazione degli Scritti Editi e Inediti di S. D. Luzzatto," *ib.* 1878; "Catalogo Ragionato degli Scritti Sparsi di S. D. Luzzatto, con Riferimento Agli Altri Suoi Scritti, Editi e Inediti," *ib.* 1881.

Bibliography: *Vessillo Israelitico*, 1898, p. 380.

S. U. C.

Jacob ben Isaac Luzzatto: Oriental rabbi and preacher; flourished at Safed in the second half of the sixteenth century. In the pinḳes of Venice it is stated that a Jacob Luzzatto died in that city April 13, 1587, at the age of about sixty; he may well have been the subject of this article, though there is nothing to sustain the identification.

Luzzatto was the author of "Kaftor wa-Feraḥ" or "Yashresh Ya'aḳob" (Basel, 1580), containing besides some stories from the "Sefer Ḥasidim," 165 haggadot explained according to Rashi, the Tosafot, Solomon b. Adret, and R. Nissim; parallel passages being cited from the Yerushalmi, Midrashim, and cabalistic works. The particular object of this work was to defend the Haggadah against the attacks of ecclesiastical censors. As at the end of the book Luzzatto calls himself "corrector," S. D. Luzzatto concluded that it was Jacob Luzzatto who wrote the "Haggahot," or explanatory notes to the Talmud, printed at Basel, 1578-80, under the censorship of Marco Marino. The object of those notes was to show that the haggadot which seem to be directed against Christianity have really an allegorical meaning. Luzzatto wrote also "Ḳehillat Ya'aḳob" (Salonica, 1584), novellæ on the Talmud, and edited and supplied a preface and index to Solomon Molko's "Sefer ha-Mefo'ar" (Cracow, 1570) and to Menahem Recanati's "Ṭa'ame ha-Miẓwot" (Basel, 1581). From his preface (rimed) to the latter work, it is seen that though born at Safed, his Hebrew pronunciation was that of the German Jews, indicating his German origin.

S. M. SEL.

Moses Ḥayyim Luzzatto: Italian cabalist and poet; born at Padua 1707; died at Acre May 6, 1747. His father was the wealthy merchant Jacob Luzzatto, and his mother also was a descendant of the Luzzatto family. He was carefully educated by his father in Latin and in other languages. At the age of thirteen he entered the Talmud Torah of his native city, which was then widely known through the teachings of Judah Minz, and which numbered among its instructors Isaiah Bassani and Isaac Ḥayyim Cohen de Cantarini, with the former of whom Luzzatto was especially intimate. He read omnivorously in the library of the Talmud Torah, being attracted particularly by the cabalistic works he found there.

Benjamin ha-Kohen Vital of Reggio (comp. Kaufmann in "Monatsschrift," xli. 700 *et seq.*), a pupil of Moses Zacuto and father-in-law of Bassani, seems to have exerted a great influence on Luzzatto's development as poet and cabalist. Luzzatto soon took up Isaac Luria's works, endeavoring to master the practical Cabala by their aid; and he instructed his former teachers in its mysteries in a school which he opened in his own house after Bassani had moved to Reggio.

The Talmud and mysticism, however, did not satisfy Luzzatto's versatile mind; and at an early age he began a thorough study of the Hebrew language and of poetic composition. He wrote epithalamia and elegies, a noteworthy example of the latter being the dirge on the death of his teacher Cantarini, a lofty poem of twenty-four verses written in classical Hebrew. Before completing his twentieth year Luzzatto had begun his composition of one hundred and fifty hymns modeled on the Biblical Psalter. In these psalms, composed in conformity with the laws of parallelism, he freed himself from all foreign influences, imitating the style of the Bible so faithfully that his poems seem entirely a renaissance of Biblical words and thoughts. They provoked the criticism of the Rabbis, however, and were one of the causes of the persecutions to which Luzzatto was later subjected. R. Jacob Poppers of Frankfort-on-the-Main thought it unpardonable presumption to attempt to equal the "anointed of the God of Jacob." Only two psalms are known of which it can with certainty be said that they belonged to Luzzatto's psalter ("Bikkure ha-'Ittim," 1825, p. 56; 1826, p. 99); in addition seven hymns by him which were sung at the inauguration of the enlarged Spanish synagogue at Padua appeared in the work "Ḥanukkat ha-Maron" (Venice, 1729); but it is not certain whether they were taken from the psalter.

His Psalter.

As a youth Luzzatto essayed also dramatic poetry, writing at the age of seventeen his first Biblical drama, "Shimshon u-Felistim," of which only fragments have been preserved, in another work of his. This youthful production foreshadows the coming master; it is perfect in versification, simple in language, original and thoughtful in substance. This first large work was followed by the "Leshon Limmudim," a discussion of Hebrew style with a new theory of Hebrew versification, in which the author showed his thorough knowledge of classical rhetoric. It is in a certain sense a scientific demonstration of the neoclassic Italian style, in contrast with the medieval. There is a vast difference between Luzzatto's style, which recalls the simplicity, smoothness, and vigor of the Bible, and the insipid, exaggerated, and affected work of his contemporaries. The book, dedicated to his teacher Bassani, was printed at Mantua 1727, with a text which deviates from the manuscript formerly in the possession of M. S. Ghirondi.

In the same year or somewhat later, Luzzatto wrote his allegorical festival drama "Migdal 'Oz" (or "Tummat Yesharim"), on the occasion of the marriage of his friend Israel Benjamin Bassani. This four-act play, which shows Latin and Italian as well as Biblical influence, illustrates the victory of justice over iniquity. It is masterly in versification and melodious in language, the lyrical passages being especially lofty; and it has a wealth of pleasing imagery reminiscent of Guarini's "Pastor Fido." The drama was edited by M. Letteris, and published with notes by S. D. Luzzatto and prolegomena by Franz Delitzsch, Leipsic, 1837.

Cabalistic Productions.

The Cabala, however, attracted Luzzatto more than did science or poetry; and he was seized with the illusion that he enjoyed the special favor of a heavenly genius ("maggid") which vouchsafed divine revelations to him as it had done to his cabalistic predecessors. He imagined that he beheld heavenly visions and that he conversed with the prophet Elijah, Adam, the Patriarchs, and others; and he finally became convinced that he was the Messiah, called to redeem humanity and more especially Israel. Many cabalistic works, including "Shib'im Tiḳḳunim," "Kelale Ḥokmat ha-Emet," "קל״ח Pitḥe Ḥokmah," "Ma'amar ha-Ge'ullah," "Liḳḳuṭe Kawwanot," "Ḥibbur 'al Ḳohelet," "Ma'amar ha-Wikkuaḥ," "Perush 'al 'Aseret ha-Dibrot," "Ma'amar 'al ha-'Iḳḳudim Asher be-Sefer ha-

Zohar," "Perush la-Tiḳḳunim ha-Meyuḥasim le-RaSHBI," were the fruit of these aberrations of a great mind. He explained his teachings in pure, simple Hebrew reminiscent of the language of the Mishnah. In his cabalistic commentary on the Pentateuch, on the other hand, which he entitled "Zohar Tinyana," he imitated the language of the Zohar, thinking that this "second Zohar" would in time take the place of the first.

None of these works, however, was published; and only two sympathetic disciples, Isaac Marini and Israel Treves, were initiated by Luzzatto into his esoteric doctrine and were deemed worthy to meet him for daily cabalistic discussion. Chance revealed their secret. While Luzzatto was visiting his teacher Bassani at Reggio, a scholar by the name of (Raphael) Israel Ḳimḥi (author of the "'Abodat Yisrael") came to Padua for a few days, and Luzzatto's disciples showed him their master's writings. Ḳimḥi guarded his discovery while in Padua; but at Venice he told of it. Luzzatto's reputation as a cabalist soon spread far and wide, attracting many pupils, while his native city also began to awaken to his greatness and to honor him in various ways.

Opposition and Polemics.

Among Luzzatto's pupils was a Pole, Jekuthiel b. Löb Gordon of Wilna, who had come to the university in 1729 to study medicine. At home he had given much time to the Talmud and to other Jewish literature; and now, putting his other studies aside, he took up the Cabala under Luzzatto. Fascinated by his teacher, he described his impressions, together with Luzzatto's visions, in a letter to Meïr H. Bösing, which, by a trick of fate, fell into the hands of the court agent Mordecai Jaffe of Vienna. Jekuthiel then wrote a letter to R. Joshua Höschel of Wilna, in which he enclosed a leaf from the "Zohar Tinyana." Luzzatto's reputation thus spread beyond Italy; and while the followers of the Cabala rejoiced in its new disciple, its opponents, who had not forgotten the troubles caused by Shabbethai Ẓebi, looked with apprehension upon Luzzatto's work. Chief among these was Moses Ḥagiz of Altona. The Venetian rabbis had still another cause for complaint against Luzzatto, for when Leon of Modena's anticabalistic work "Ari Noham" (or "Sha'agat Aryeh") fell into his hands he wrote the pointed reply "Ḥoḳer u-Meḳubbal" (or "Ma'amar ha-Wikkuaḥ"), in which he unsparingly attacked the famous Venetian rabbi. The other rabbis thereupon indignantly opposed Luzzatto, who now found himself unwillingly the center of public discussion. Every effort was made to condemn him; and letters and responsa multiplied in Padua, Venice, Leghorn, and Altona. No decisive steps were taken at the time in Italy itself; but the German rabbis, yielding to Luzzatto's enemies who were headed by Moses Ḥagiz, pronounced the ban upon any who should write in the language of the Zohar, in the name of the "faithful shepherd," or of other saints.

The Venetian rabbis thereupon requested Bassani at Reggio to explain to Luzzatto the consequences of his actions, and to take an active part in the controversy generally. Bassani then went to Padua and induced Luzzatto to declare in writing before the delegates of the Venetian rabbinate that he would renounce the teachings of the Cabala, would not show his works to any one, and would publish nothing in future without the approval of his teacher Bassani and other reliable men. Luzzatto's works were locked up in a casket, one key of which was given to Bassani and another to the representatives of the Venetian rabbinate. Luzzatto himself received the title of rabbi.

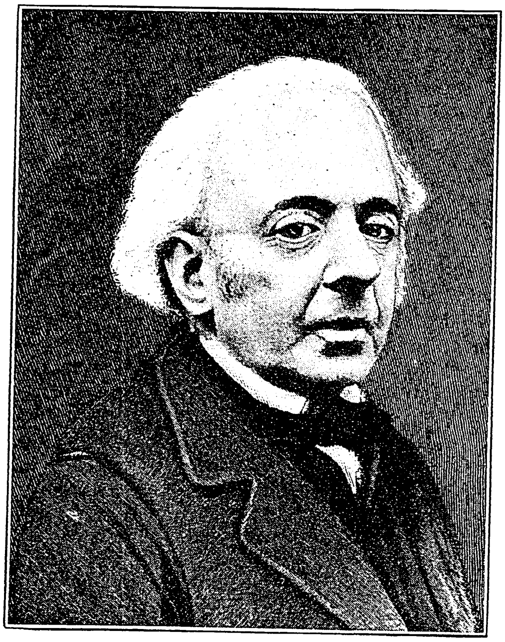
Renewed Cabalistic Activity.

He now seemed definitely to have renounced his connection with the Cabala, and he turned again to literature, producing his finest poems. He traveled, cultivated his friends, married the daughter of R. David at Mantua, and took part also in the business affairs of his relatives. Despite all this, he could not permanently resist the attractions of the Cabala. It seems that decreasing prosperity once more led him to mysticism; for, notwithstanding his promises, he composed the cabalistic works "Kelalim Rishonim le-Ḥokmat ha-Emet," "Tefillah we-Shir 'al Ge'ullat Miẓrayim," "Tefillah we-Shir 'al Mattan Torah," and "Wikkuaḥ ben ha-Sekel weha-Neshamah," and Bassani was weak enough to slur his duty and to refrain from opposition to this activity. The news reached the Venetian rabbis, who had been informed that Luzzatto intended also to publish his polemic against Leon of Modena. They lent a credulous ear to those who had been set to watch Luzzatto; and when he refused to take an oath that he would publish no more works without submitting them to the censorship of the Venetian rabbinate, the six rabbis of Venice pronounced (Dec., 1734) a ban upon him and his works, and made it incumbent upon every one who possessed any copies of his writings to deliver them to the rabbinate. News of the ban was sent to all the communities of Germany; and Ḥagiz was informed of the victory he had gained.

It was now impossible for Luzzatto to remain in Italy; for he was abandoned by all except Bassani and a few faithful friends. He therefore decided to emigrate to Amsterdam. On the journey he did not neglect to exhort his pupils to endurance and harmony. In Frankfort-on-the-Main a deep humiliation awaited him: he had to promise under oath to give up his mystic studies and not to print or even write a sentence cabalistic in content. Not until his fortieth year would he be permitted to study the mysteries of the Cabala, and then only in the Holy Land in company with worthy men. This declaration was communicated to many rabbis in different countries; and Luzzatto's works were taken away from him.

At Amsterdam.

Luzzatto was welcomed at Amsterdam with great honor. He was received into the house of the prominent Moses de Chaves, whose son he taught, and the Sephardic community offered him a salary; but, preferring his personal independence, he supported himself by grinding optical lenses. He devoted his spare time to study and teaching, and was soon able to send for his wife, son, and parents, who likewise were cordially received. Luzzatto now resumed his correspondence with Bassani and his pupils; he commended the latter to his teacher and exhorted them to remain faithful to the study of the Cabala. This correspondence became known to the Venetian rabbis, and as they could do nothing further to Luzzatto, they attacked Bassani, who was suspected of having opened the casket which contained Luzzatto's works (though perhaps the psalms were not included [Kahana, "Luzzatto," p. 10, note 2]) and of having restored them to him. This casket, which was supposed to be guarded by a cherub (Zunz, "Die Monatstage des Kalenderjahrs," p. 26), is said to have found its way to Prague after many vicissitudes (comp. Kaufmann, "Contributions à la Biographie de Mosé Hayyim Luzzatto, Yekutiel Gordon et Mosé Hages:—La Caisse des Manuscrits de Luzzatto et Jacob Cohen Popers," in "R. E. J." xxiii. 256-261). The ban was then renewed against those having forbidden works by Luzzatto in their possession and failing to deliver the same to the rabbinate of Venice.



Samuel David Luzzatto.

Meanwhile Luzzatto's reputation was increasing at Amsterdam. He won the friendship of the foremost men there and displayed great activity as a teacher, still continuing his cabalistic studies. In that city he published the following works: "Mesillat Yesharim" (1740), a popular survey of religious ethics, which was widely read; the Talmudic and methodologic treatise "Derek Tebunot" (1743); the smaller works, dealing with various subjects, "Ma'amar ha-'Iḳḳarim," "Ma'amar 'al ha-Aggadot," "Derek Ḥokmah," "Ma'amar ha-Ḥokmah" (1743); and the allegorical drama "La-Yesharim Tehillah," written on the marriage of his pupil Jacob de Chaves—"a work of art unique in Neo-Hebraic literature, masterly in form, language, and thought, a monument to his great gifts, fitted to immortalize him and the tongue in which he composed it." This drama, which in its simple plot bears much resemblance to that of the "Migdal 'Oz," is closely connected in sentiment with the ethical works written by Luzzatto at Amsterdam and is filled with lofty thought. It was imitated by many on account of its style, which is modeled, though with great freedom, on that of the Bible. Luzzatto had only fifty copies printed, which he distributed among the prominent members of the Sephardic community of the city.

At Amsterdam Luzzatto lived quietly and comfortably for ten years, making one short visit to London. When his period of renunciation of the Cabala drew to a close he was filled with a longing for the Holy Land, and after many hardships he arrived with his wife and son at Safed. He exchanged some letters with his disciples at Padua, in which he spoke of his aims and hopes; but in the midst of his plans for the future he, together with his wife and son, died of the Plague in his fortieth year, and was buried at Tiberias beside R. Akiba.

S. E. N.

Samuel David (ShaDaL) Luzzatto: Italian philologist, poet, and Biblical exegete; born at Triest Aug. 22, 1800; died at Padua Sept. 30, 1865. While still a boy he entered the Talmud Torah of his native city, where besides Talmud, in which he was taught by Abraham Eliezer ha-Levi, chief rabbi of Triest and a distinguished pilpulist, he studied ancient and modern languages and profane science under Mordecai de Cologna, Leon Vita Saraval, and Raphael Baruch Segré, whose son-in-law he later became. He studied Hebrew also at home, with his father, who, though a turner by trade, was an eminent Talmudist.

Luzzatto manifested extraordinary ability from his very childhood, so that while reading the Book of Job at school he formed the intention to write a commentary thereon, considering the existing commentaries to be deficient. In 1811 he received as a prize Montesquieu's "Considérations sur les Causes de la Grandeur des Romains," etc., which contributed much to the development of his critical faculties. Indeed, his literary activity began in that very year, for it was then that he undertook to write a Hebrew grammar in Italian, translated into Hebrew the life of Æsop, and wrote exegetical notes on the Pentateuch (comp. "Il Vessillo Israelitico," xxv. 374, xxvi. 16). The discovery of an unpublished commentary on the Targum of Onkelos induced him to study Aramaic (preface to his "Oheb Ger").

Early Ability.

At the age of thirteen Luzzatto was withdrawn from school, attending only the lectures in Talmud of Abraham Eliezer ha-Levi. While he was reading the "'En Ya'akob" by Jacob ibn Ḥabib, he came to the conclusion that the vowels and accents did not exist in the time of the Talmudists, and that the Zohar, speaking as it does of vowels and accents, must necessarily be of later composition. He propounded this theory in a pamphlet which was the origin of his later work "Wikkuaḥ 'al ha-Ḳabbalah."

In 1814 there began a most trying time for Luzzatto. His mother dying in that year, he had to do the housework, including cooking, and to help his father in his work as a turner. Nevertheless, by the end of 1815 he had composed thirty-seven poems, which form a part of his "Kinnor Na'im," and in 1817 had finished his "Ma'amar ha-Niḳḳud," a treatise on the vowels. In 1818 he began to write his "Torah Nidreshet," a philosophico-theological work of which he composed only twenty-four chapters, the first twelve being published in the "Kokebe Yiẓḥaḳ," vols. xvi.-xvii., xxi.-xxiv., xxvi., and the remainder translated into Italian by M. Coen-Porto and published in "Mosé," i.-ii. In 1879 Coen-Porto published a translation of the whole work in book form. In spite of his father's desire that he should learn a trade, Luzzatto had no inclination for one, and in order to earn his livelihood he was obliged to give private lessons, finding pupils with great difficulty on account of his timidity. From 1824, in which year his father died, he had to depend entirely upon himself. Until 1829 he earned a livelihood by giving lessons and by writing for the "Bikkure ha-'Ittim"; in that year he was appointed professor at the rabbinical college of Padua.

Critical Treatment of Bible.

At Padua Luzzatto had a much larger scope for his literary activity, as he was able to devote all his time to literary work. Besides, while explaining certain parts of the Bible to his pupils he wrote down all his observations. Luzzatto was the first Jewish scholar to turn his attention to Syriac, considering a knowledge of this language necessary for the understanding of the Targum. His letter published in Kirchheim's "Karme Shomeron" shows his thorough acquaintance with Samaritan. He was also the first Jew who permitted himself to amend the text of the Old Testament; and his emendations have met with the approval of Christian scholars. Through a careful examination of the Book of Ecclesiastes, Luzzatto came to the conclusion that its author was not Solomon, but some one who lived several centuries later and whose name was Ḳohelet. The author, Luzzatto thinks, ascribed his work to Solomon, but his contemporaries, having discovered the forgery, substituted the correct name "Ḳohelet" for "Solomon" wherever the latter occurred in the book. As to the Book of Isaiah, in spite of the prevalent opinion that chapters xl.-lxvi. were written after the Captivity, Luzzatto maintained that the whole book was written by Isaiah. Difference of opinion on this point was one of the causes why Luzzatto, after having maintained a friendly correspondence with Rapoport, turned against the latter. Another reason for the interruption of his relations with the chief rabbi of Prague was that Luzzatto, though otherwise on good terms with Jost, could not endure the latter's rationalism. He consequently requested Rapoport to cease his relations with Jost; but Rapoport, not knowing Luzzatto personally, ascribed the request to arrogance.

Views on Philosophy.

Luzzatto was a warm defender of Biblical and Talmudical Judaism; and his opposition to philosophical Judaism brought him many opponents among his contemporaries. But his opposition to philosophy was not the result of fanaticism nor of lack of understanding. He claimed to have read during twenty-four years all the ancient philosophers, and that the more he read them the more he found them deviating from the truth. What one approves the other disproves; and so the philosophers themselves go astray and mislead students. It is for this reason that while praising Maimonides as the author of the "Yad," Luzzatto blames him severely for being a follower of the Aristotelian philosophy, which, he says, brought no good to himself while causing much evil to other Jews ("Penine Shadal," p. 417). Luzzatto attacked Abraham ibn Ezra also, declaring that the latter's works were not the products of a scientific mind, and that as it was necessary for him in order to secure a livelihood to write a book in every town in which he sojourned, the number of his books corresponded with the number of towns he visited. Ibn Ezra's material, he declared, was always the same, the form being changed sometimes slightly, and at other times entirely ("Kerem Ḥemed," iv. 131 *et seq.*). Luzzatto's pessimistic opinion of philosophy made him naturally the adversary of Spinoza, whom he attacked on more than one occasion.

During his literary career of more than fifty years, Luzzatto wrote a great number of works, both in Hebrew and in Italian. Besides he contributed to most of the Hebrew and Jewish periodicals of his time. His correspondence with his contemporaries is both voluminous and instructive; there being hardly any subject in connection with Judaism on which he did not write. The following is a list of Luzzatto's works:

IN HEBREW.

Kinnor Na'im, collection of poems. Vol. i., Vienna, 1825; vol. ii., Padua, 1879.

Kinah, elegy on the death of Abraham Eliezer ha-Levi. Triest, 1826.

Oheb Ger, guide to the understanding of the Targum of Onkelos, with notes and variants; accompanied by a short Syriac grammar and notes on and variants in the Targum of Psalms. Vienna, 1830.

Hafla'ah sheba-'Arakin of Isaiah Berlin, edited by Luzzatto, with notes of his own. Part i., Breslau, 1830; part ii., Vienna, 1859.

Seder Tannaïm wa-Amoraïm, revised and edited with variants. Prague, 1839.

Betulat Bat Yehudah, extracts from the diwan of Judah ha-Levi, edited with notes and an introduction. Prague, 1840.

Abne Zikkaron, seventy-six epitaphs from the cemetery of Toledo, followed by a commentary on Micah by Jacob Pardo, edited with notes. Prague, 1841.

Bet ha-Oẓar, collection of essays on the Hebrew language, exegetical and archeological notes, collectanea, and ancient poetry. Vol. i., Lemberg, 1847; vol. ii., Przemysl, 1888; vol. iii., Cracow, 1889.

Ha-Mishtaddel, scholia to the Pentateuch. Vienna, 1849.

Wikkuaḥ 'al ha-Ḳabbalah, dialogues on Cabala and on the antiquity of punctuation. Göritz, 1852.

Sefer Yesha'yah, the Book of Isaiah edited with an Italian translation and a Hebrew commentary. Padua, 1855-67.

Mebo, a historical and critical introduction to the Maḥzor. Leghorn, 1856.

Diwan, eighty-six religious poems of Judah ha-Levi corrected, vocalized, and edited, with a commentary and introduction. Lyck, 1864.

Yad Yosef, a catalogue of the Library of Joseph Almanzi. Padua, 1864.

Ma'amar bi-Yesode ha-Diḳduḳ, a treatise on Hebrew grammar. Vienna, 1865.

Ḥereb ha-Mithappeket, a poem of Abraham Bedersi, published for the first time with a preface and a commentary at the beginning of Bedersi's "Ḥotam Toknit." Amsterdam, 1865.

Commentary on the Pentateuch. Padua, 1871.

Perushe Shedal, commentary on Jeremiah, Ezekiel, Proverbs, and Job. Lemberg, 1876.

Naḥalat Shedal, in two parts; the first containing a list of the Geonim and Rabbis, and the second one of the payyeṭanim and their piyyuṭim. Berlin, 1878–79.

Yesode ha-Torah, a treatise on Jewish dogma. Przemysl, 1880.

Ṭal Orot, a collection of eighty-one unpublished piyyuṭim, amended. Przemysl, 1881.

Iggerot Shedal, 301 letters, published by Isaiah Luzzatto and prefaced by David Kaufmann. Przemysl, 1882.

Penine Shedal (see below). Przemysl, 1883.

IN ITALIAN.

Prolegomeni ad una Grammatica Ragionata della Lingua Ebraica. Padua, 1836.

Il Giudaismo Illustrato. Padua, 1848.

Calendario Ebraico. Padua, 1849.

Lezioni di Storia Giudaica. Padua, 1852.

Grammatica della Lingua Ebraica. Padua, 1853.

Italian translation of Job. Padua, 1853.

Discorsi Morali agli Studenti Israeliti. Padua, 1857.

Opere del De Rossi. Milan, 1857.

Italian translation of the Pentateuch and Hafṭarot. Triest, 1858–60.

Lezioni di Teologia Morale Israelitica. Padua, 1862.

Lezioni di Teologia Dogmatica Israelitica. Triest, 1864.

Elementi Grammaticali del Caldeo Biblico e del Dialetto Talmudico. Padua, 1865. Translated into German by Krüger, Breslau, 1873; into English by Goldammer, New York, 1876; and the part on the Talmudic dialect, into Hebrew by Ḥayyim Ẓebi Lerner, St. Petersburg, 1880.

Discorsi Storico-Religiosi agli Studenti Israeliti. Padua, 1870.

Introduzione Critica ed Ermenutica al Pentateuco. Padua, 1870.

Autobiografia (first published by Luzzatto himself in "Mosé," i.-vi.). Padua, 1882.

Isaiah Luzzatto published (Padua, 1881), under the respective Hebrew and Italian titles "Reshimat Ma'amare SHeDaL" and "Catalogo Ragionato degli Scritti Sparsi di S. D. Luzzatto," an index of all the articles which Luzzatto had written in various periodicals.

The "Penine Shedal" (= "The Pearls of Samuel David Luzzatto"), published by Luzzatto's sons, is a collection of eighty-nine of the more interesting of Luzzatto's letters. These letters are really scientific treatises, which are divided in this book into different categories as follows: bibliographical (Nos. i.–xxii.), containing letters on Ibn Ezra's "Yesod Mora" and "Yesod Mispar"; liturgical-bibliographical and various other subjects (Nos. xxiii.–xxxi.); Biblical-exegetical (Nos. xxxii.–lii.), containing among others a commentary on Ecclesiastes and a letter on Samaritan writing; other exegetical letters (Nos. liii.–lxii.); grammatical (Nos. lxiii.–lxx.); historical (Nos. lxxi.–lxxvii.), in which the antiquity of the Book of Job is discussed; philosophical (Nos. lxxviii.–lxxxii.), including letters on dreams and on the Aristotelian philosophy; theological (Nos. lxxxiii.–lxxxix.), in the last letter of which Luzzatto proves that Ibn Gabirol's ideas were very different from those of Spinoza, and declares that every honest man should rise against the Spinozists.

S. M. SEL.

Simeon (Simḥah) ben Isaac Luzzatto: Italian rabbi and apologist; born about 1580; died Jan. 6, 1663, at Venice, where he was rabbi. Luzzatto was one of the most prominent demagogues of his time, and when still a young man he had already acquired renown as a rabbi and scholar. He is styled "rabbi" at the head of a long responsum entitled "Mish'an Mayim," which he wrote in 1606 in regard to the "miḳweh" of Rovigo ("Mashbit Milḥamot," pp. 38b–56b). He shared the rabbinate of Venice with Leon of Modena, who held him in great esteem; according to Wolf ("Bibl. Hebr." iii. 1150), they wrote together a work on the Karaites. The above-mentioned responsum shows him to have been an authority in rabbinics; and he is quoted by Isaac Lampronti ("Paḥad Yiẓḥaḳ," i., *s.v.* אשה אינה מתקדשת), Raphael Meldola ("Mayim Rabbim," No. 11), Mordecai Jaffe ("Lebush," end of "Eben ha-'Ezer"), and other rabbinical authorities.

His "Discorso."

As may be seen from his Italian writings, Luzzatto was well acquainted with ancient literature and philosophy as well as with the literature of his time, while he is praised by Joseph Delmedigo as a distinguished mathematician (comp. Conforte, "Ḳore ha-Dorot," p. 50a). Luzzatto wrote two important works in Italian—"Discorso Circa il Stato degli Hebrei" (Venice, 1638) and "Socrate" (*ib.* 1651). The former is a treatise on the position of the Jews, particularly of those that lived in Venice. It is an apology for the Jews in eighteen arguments, each of which forms a chapter. For instance, one chapter defends them on the ground of their usefulness in commerce; another explains the causes of decreases in certain revenues of a state and shows that encouragement of the activities of the Jews would tend to increase those revenues. He points out that the Jews are especially fitted for commerce; that they loyally observe the laws of the state; that the Venetian republic reaped great advantages from their relations with them. The chief merit of this book is its impartiality, for while Luzzatto depicts the better characteristics of the Jews he does not ignore their faults. He shows remarkable knowledge of the commerce of his time and of the political influences that affected it. According to him, the common people felt little antipathy toward the Jews, upon whom, to some extent, they depended for their living. It was among the patricians that the fanatical religious zealots were found who, out of envy, advocated restrictions and even banishment. Wolf translated the last three chapters into Latin; they comprise (1) an examination of Hebrew literature and of the various classes of Jewish scholars; (2) an account of the directions in which the Jews were permitted freedom, and of their sufferings; and (3) a survey of the Jews in non-Italian countries ("Bibl. Hebr." iv. 1115–1135). The thirteenth chapter was translated into Hebrew by Reggio in his "Iggeret Yashar" (i. 65–70).

His "Socrate."

In the second work, "Socrate," written in his youth, Luzzatto endeavors to prove the impotence of human reason when unaided by divine revelation. It is in the form of a parable, in which he puts his thoughts into the mouth of Socrates. Reason, being imprisoned by Orthodox Authority, appealed for liberation to the Academy of Delphi, which had been founded to rectify the errors of the human intellect. The academy granted her petition notwithstanding the remonstrance of Pythagoras and Aristotle, who argued that Reason, when free, would spread abroad most frightful errors. Liberated Reason caused great mischief, and the academicians did not know what to do, when Socrates advised combining Reason with Revelation. It is apparent that Luzzatto was a thinker and a believer as well; he did not share Manasseh b. Israel's dream that the ten tribes still exist together in some part of the world. He maintained that Daniel's revelation refers not to a future Messiah, but to past historical events. This utterance of Luzzatto was either misunderstood or deliberately perverted by the convert Samuel Nahmias (Giulio Morosini), who, in his "Via della Fide," makes Luzzatto say that Daniel's revelation may perhaps point to Jesus as the Messiah (comp. Wolf, *l.c.* iv. 1128).

Luzzatto, who dedicated this book to the doge and Senate of Venice, stated that his ancestors had settled in Venice two centuries previously. In the first book (pp. 5a, 99a), Luzzatto quotes a work of his own entitled "Trattato dell' Opinioni e Dogmi degl' Hebrei e dei Riti Loro Piu Principali." Jacob Aboab asserts that he saw in Venice a collection of Luzzatto's speeches and responsa, which included a decision in regard to the use of a gondola on the Sabbath.

LWOW, AARON MOSES BEN ẒEBI HIRSCH: Grammarian, scribe, and dayyan of Lemberg in the eighteenth century. He wrote: "Shirah Ḥadashah" (Zolkiev, 1764), a Hebrew grammar in verse, divided into six poems with explanations in prose, composed after the model of Elijah Levita's "Pereḳ Shirah"; "Ohel Mosheh" (*ib.* 1765), a complete Hebrew grammar in four parts, following Ḳimḥi's "Sefer ha-Zikkaron" and criticizing Zalman Hanau (RaZaH); also "Halakah le-Mosheh," novellæ on the Talmud and decisions; and "Ohel Mo'ed," a treatise on the Hebrew language, both of which works are still unpublished.

LYDDA or **LOD** (לד): City in Palestine, later named **Diospolis**; situated one hour northeast of Ramleh, about three hours southeast of Jaffa, and, according to the Talmud (Ma'as. Sh. v. 2; Beẓah 5a), a day's journey west of Jerusalem. It seems to have been built originally by a descendant of Benjamin (I Chron. viii. 12), and to have been occupied again by Benjamites after the Exile (Ezra ii. 33; Neh. xi. 35). According to the Talmud (Yer. Meg. i. 1) it was a fortified city as early as the days of Joshua. At the time of the Syrian domination the city and district belonged to Samaria, and Demetrius II. (Nicator) apportioned it to Judea (I Macc. xi. 34; Josephus, "Ant." xiii. 4, § 9). Cestius Gallus, Roman proconsul under Nero, burned Lydda when he advanced upon Jerusalem from Cæsarea (Josephus, "B. J." ii. 19, § 1), but soon afterward it is named as the capital of one of the toparchies into which Judea was later divided, surrendering as such to Vespasian (*ib.* iii. 3, § 5; iv. 8, § 1). Josephus describes it as a "village" equal in size to a "city" ("Ant." xx. 6, § 2).

At a time which can not definitely be fixed, but which was during the Roman period, the name of the place was changed to Diospolis, which name is found on coins struck under Septimius Severus and Caracalla. The city is frequently mentioned by Eusebius and Jerome. It became a bishopric at an early date, its bishops signing at the various councils either as bishops of Lydda or as bishops of Diospolis (comp. Reland, "Palestina ex Monumentis Veteribus Illustrata," p. 877; Robinson, "Palästina," iii. 263 *et seq.*). At an early date Lydda was a center of the veneration of St. George, for both Antoninus Martyr (*c.* 600) and Benjamin of Tudela refer to it as the burial-place of the saint (comp. Reland, *l.c.*). On the varying fortunes of the city see Robinson, "Palästina" (*l.c.*). The present village of Lidd still preserves traces of the historical Lydda, which is described in tradition as second only to Jerusalem (comp. Van de Velde, "Reise Durch Syrien und Palästina," i. 332; Munk-Levy, "Palästina," pp. 148 *et seq.*; Schwarz, "Das Heilige Land," p. 104; Neubauer, "G. T." pp. 76 *et seq.*; Socin, "Palästina und Syrien," 2d ed., pp. 11 *et seq.*).

After the Fall of Jerusalem.

After the destruction of Jerusalem, Lydda was famous as a seat of Jewish scholarship, and the academy which flourished there is frequently mentioned in the Talmud and other works of traditional literature. The term "scholars of the South" ("ziḳne Darom," Ḥul. 132b; Zeb. 23a: "rabbanan di-Daroma," Lev. R. 20, 163b: "rabbanan mi-Daroma," Yer. M. Ḳ. iii. 82; and simply "Deromayya," Yer. Pes. v. 32) doubtless refers to the Lydda teachers of the Law, whose wisdom is recognized also in the sentence "Ha-roẓeh she-yaḥkim yadrim" = "Let him who wishes to attain to wisdom go to the South" (B. B. 25b; comp. also Schürer, "Gesch." ii. 302).

Rabbi Eliezer lived at Lydda (Yad. iv. 3; Sanh. 32b); R. Ṭarfon taught there (B. M. 49b); and it was also the scene of R. Akiba's activity (R. H. i. 6). Responsa from Lydda are often mentioned (Tosef., Miḳ. vii. [viii.], end); but despite the reputation which the teachers at the academy enjoyed, there seems to have been a certain feeling of animosity against them in consequence of their arrogance, and it was therefore denied that they possessed any deep knowledge of the Law (comp. Pes. 62b; Yer. Pes. 32a; Yer. Sanh. 18c, d; Bacher, "Ag. Pal. Amor." i. 60, iii. 16).

At Lydda, in the garret of one Nitsa, during the Hadrianic persecutions, was adopted the historical resolution that where martyrdom was the only alternative, all the religious laws, excepting three, might be transgressed, the three exceptions being the laws concerning idolatry, incest, and murder (Yer. Sheb. iv. 35; Sanh. 74a; Yer. Sanh. iii. 21; comp. Pesiḳ. xiii.). At another meeting held in Nitsa's garret the question whether the study of the Law is more important than the practise of the Law was unanimously decided in the affirmative (Ḳid. 40b; comp. Sifre to Deut. xi. 13 [ed. Friedmann, p. 79b] and parallels).

J. E. N.

LYING (Hebr. "shaḳar," "kazab," "kaḥash," and "shaw"): Telling a falsehood with the intent of deceiving.—**Biblical Data:** Lying is most vigorously condemned in the Law: "Keep thee far from a false matter" (Ex. xxiii. 7); "Neither deal falsely, neither lie one to another" (Lev. xix. 11). Regarding the false oath see Perjury. Lying on the witness-stand to harm another is a crime specially mentioned in the Decalogue (Ex. xx. 16), and the punishment is that the false witness be dealt with as the one witnessed against would have been dealt with if guilty (Deut. xix. 15–21). Regarding lying in fraudulent dealing see Fraud and Mistake.

Lying is abhorred throughout Scripture as an offense against the holy God who "lieth not" (I Sam. xv. 29; Ps. lxxxix. 34–35); it is "an abomination of the Lord" (Prov. xii. 29). "He that telleth lies shall not tarry in my sight" (Ps. ci. 7; comp. xxiv. 4 and xv. 2). "They speak falsely every one with his neighbor; with flattering lips and with a double heart. . . . The Lord shall cut off all flattering lips" (Ps. xii. 3–4, Hebr. [A. V. 2–3]). "Speak ye every one the truth to his neighbor . . . love no false oath: for all these are things that I hate, saith the Lord" (Zech. viii. 16–17). "The remnant of Israel shall not do iniquity, nor speak lies; neither shall a deceitful tongue be found in their mouth" (Zeph. iii. 13). With the Psalmist, one should "hate every false way" and "abhor lying" (Ps. cxix. 104, 128, 163).

——**In Apocryphal and Rabbinical Literature:** Ben Sira warns against the habit of lying as even worse than theft, because it brings ruin and disgrace (Ecclus. xx. 24–26; comp. vii. 12–14); he warns also against duplicity of tongue (*ib.* v. 9, 14; xxviii. 13), which "is a snare of death" ("Didache," i. 4). The spirit of lying is one of the seven evil spirits in man (Test. Twelve Patr., Reuben, 3). "Hate lying in order that the Lord may live among you and Belial flee from you," warns Dan (*ib.* Dan, 1–6). Especially emphatic are the Rabbis in condemning lying. "God's seal is truth" (Shab. 55a; Gen. R. lxxxi.). "He who changes his word acts as if he were worshiping other gods" (Sanh. 92a). Among the "three God hateth is he who speaks the thing he means not," "with duplicity of tongue" (Pes. 113b). "Liars can not behold the majesty of God" (Soṭah 42a). "To conceal the truth, or to deceive others by creating a false impression, even for a good purpose, is a transgression of the command, 'Thou shalt keep thee far from a false matter'" (Shebu. 31a). To pretend an affectionate feeling in order to win the good opinion of another is sinning against truth (Tos. to B. Ḳ. vii. 8). The Shammaites declared it sinful even to lavish, at the wedding-feast, laudations on a bride which are not in harmony with the truth, as, for instance, to call her beautiful when she is ugly (Ket. 17a). "In case of doubt, train thy tongue always to say 'I do not know,' lest thou be caught in an untruth" (Ber. 4a). "Never tell a child 'I shall give you so-and-so' unless you actually will give it to him; else the child will learn to utter untruths himself" (Suk. 46b). "Canaan, in his last will, told his children not to speak the truth" (Pes. 113b). "Let thy 'yea' be 'yea' and thy 'nay' 'nay'" (B. M. 49a). "Truth will abide; falsehood will not abide" (Shab. 104a). In case a life depends upon your telling a falsehood, as, for instance, when a robber or murderer inquires after one he pursues, the law permits lying (Ned. ii. 4; Shulḥan 'Aruk, Yoreh De'ah, 232, 14; see also Hypocrisy; Truth). In the Daily Prayers the silent prayer begins with the words, "My God, keep my tongue from evil and my lips from speaking falsehood!" (Ber. 17a); and at the beginning of the Morning Prayers are recited these words, taken from Tanna debe Eliyahu Rabbah 21: "At all times man should be God-fearing in secret also, and ever confess the truth and speak the truth in his heart."

K.

LYON, ABRAHAM DE: One of the first Jewish settlers in Georgia, U. S. A.; ancestor of the well-known family of that name which has figured prominently in the annals of that state. According to a family tradition he was born in Spain. The early records, however, invariably describe him as "a vineron from Portugal" and as having been for years prior to his emigration "a vineron in Portugal." He went to America in the same year that the colony of Georgia was founded by Oglethorpe, and settled in 1733 in Savannah, where he soon became a freeholder.

The trustees of the colony were especially desirous of making Georgia a wine-producing country; and De Lyon soon attracted the attention of their agents by his ability as a horticulturist and vine-grower. He introduced viticulture and cultivated several kinds of grapes, among them the Porto and Malaga, to great perfection. He proposed to the trustees that if they would lend him £200 sterling he would employ that sum, with a further sum of his own, in importing from Portugal "vines and vinerons." His proposition was accepted, and the money was sent to Oglethorpe, who, however, gave only a part of it to De Lyon, claiming that "he had other uses for the money."

In his journal, under date of Dec., 1737, Col. William Stephens, the agent of the trustees, gives an elaborate description of De Lyon's vineyard.

De Lyon probably removed from Georgia about 1740, when the illiberal policy of the trustees caused both Jewish and Christian settlers to leave; and there is a definite record of Mrs. De Lyon's departure in that year in the trustees' journal. In all likelihood, however, De Lyon soon returned to Savannah and died there.

LYON, GEORGE LEWIS: English journalist and communal worker; born at Portsea, England, Dec. 11, 1828; died in London Feb. 14, 1904. After acting for a time as secretary of the Portsmouth Hebrew Benevolent Institution, Lyon went to London in the early fifties and became secretary of the Jews' and General Literary and Scientific Institution. On resigning this position he devoted himself to financial journalism, and became city correspondent of many London and provincial newspapers. In Feb., 1873, he founded and edited the "Jewish World," which journal, however, passed into other hands some years before his death.

Lyon was secretary of the Jews' Infant School and subsequently of the Jews' Emigration Society.

LYON, HART. See HIRSCH, LEVIN JOSEPH.

LYON (LEONI), MYER: Operatic singer and ḥazzan; died at Kingston, Jamaica, about 1800; uncle of John Braham; both he and his nephew were choristers at the same time at the Great Synagogue, London. Lyon was also a public singer; and his voice was said to have surpassed that of his nephew in sweetness and melody. His first appearance was at Covent Garden (1775) in "Artaxerxes." He subsequently joined Giordani in the management of an English opera-house in Dublin, and was also engaged by Palmer for the Royalty Theatre. He finally became ḥazzan in the English and German Synagogue, Kingston, Jamaica, being the first qualified ḥazzan in the English colonies.

Lyon composed many morceaux for both theater and synagogue, particularly for the "Musaf" of Rosh ha-Shanah and Yom Kippur.

J. G. L.

The name "Leoni" is given to the melody associated in English hymnals with the verses commencing "The God of Abraham praise." These were composed by Thomas Olivers, a Wesleyan minister London, on a Friday evening in 1770, and was deeply (1725-99). He had attended the Great Synagogue, moved by the service, carrying away a keen impression of the singing of Myer Lyon (Leoni) in the closing hymn YIGDAL. Lyon afterward gave him the melody, and Olivers called it by his name. The hymn was an immediate success. Eight editions were called for in two years, and the thirtieth edition was reached in 1779.

The melody thus furnished was the tune then (and still) used by the English Jews for the concluding hymn in the Sabbath eve service. The characteristic and effective tune, of no great age, is also utilized among Continental Jews on the festivals. A tune by the late Sir John Stainer is now more often sung with Olivers' verses in the Church of England service.

J. F. L. C.

LYON, ROBERT: American journalist; born in London, England, Jan. 15, 1810; died in New York city March 10, 1858. After a brief business career in London, he emigrated to the United States (1844), and, meeting no success in a manufacturing enterprise, began to publish (Oct. 26, 1849) "The Asmonean," the first American Jewish weekly of its kind, which he conducted until his death. He edited at the same time the New York "Mercantile Journal," an organ devoted to trade. For a time Isaac M. Wise and other Jewish writers of the day were regular contributors to "The Asmonean," which, however, failed to win more than local fame.

A. A. S. I.

LYONS: City on the Rhône, France. Jews seem to have been established in the surrounding region at an early date. The fact that Pope Victor in the fifth century prohibited the Archbishop of Vienne (France) from celebrating Easter with the Jews shows not only that there were Jews in the towns surrounding Lyons, but also that the Christians were on terms of comparative intimacy with them.

First Mention.

It is chiefly in the ninth century that the presence of Jews in Lyons is incontestably demonstrated. They then formed a prosperous community and lived in a special quarter situated at the foot of the Fourvière hill, of which one street is still called "Rue Juiverie." Protected by the King of France, Louis le Debonnaire, and by Judith, his wife, they were special objects of aversion to the bishop AGOBARD, who, however, succeeded only in alienating himself from his sovereign, and failed utterly in his struggle against them.

The Jews continued to live in Lyons until the middle of the thirteenth century. The arrival of Pope Innocent IV., who took refuge in the domain of the archbishop, seems to have been fatal to them. The council held at Lyons in 1245 under the presidency of the pope expressed indignation at the relations existing between Jews and Christians and tried to repress the former. Not only were they precluded from holding any office; they were also obliged to wear on their dress a piece of cloth of a special color and circular in form. About the same time Archbishop Philip of Savoy, setting an example which was to be imitated three years later by Jean, Bishop of Vienne, expelled them from Lyons.

For nearly a century there were no Jews, except temporary residents, in the whole district. A manuscript copy of a tariff of taxes paid to the archbishop or metropolitan chapter for merchandise in 1340 shows that every Jew who passed through Lyons was obliged to pay 12 deniers on entering the city or else to receive a blow ("Archives du Rhône," an inedited manuscript).

In the Fourteenth Century.

Beginning with the fourteenth century, official records show that Jews had returned to Lyons and were living there. The ordinance of Charles V., dated Sept. 27, 1364, decreeing that the Jews of Lyons should contribute to the common charges, clearly proves their presence in the city. At that time they lived in the same quarter, St. Georges, which their predecessors had occupied two centuries earlier. In 1379 Jean de Tabaru drove them out of the Rue Dorée, adjacent to the Rue Juiverie, and bade them settle in another quarter, situated on the right bank of the Rhône. Their number increased daily, as is seen from a document of the time in which the city complains of the benefits derived by the clergy from the Jews ("Archives du Rhône," carton CC, 290). In 1386 Charles VI. by letters patent renewed the ordinance of his father ordering the Jews to contribute to the expenses of the city ("Archives de la Ville de Lyon," CC, 290). They had then, as under Louis II., a conservator of their rights, the "magister Judæorum." In 1393 the archbishop claimed jurisdiction over the Jews, who protested, declaring themselves subject to the king. They lost their case, however, as is shown by a document of the fourteenth century in which are found the names of certain Jews of Lyons: Josson of Montmelian, Josson of Vermenton, Dalmon Moyses, Saussin, and Abraham Noblet ("Archives du Rhône," ch. metrop., fols. 116-119).

Expulsion.

The edict of Sept. 17, 1394, by which Charles VI. expelled all Jews from France, did not immediately affect those at Lyons. Several historians give 1420 as the date of their definite departure from the city and of their arrival at Trevoux, whither they transferred the gold- and silver-thread industry. The names "Trefousse," "Dreyfus," etc., are probably Alsatian corruptions of "Trevoux," as certain malcontents among these Lyonnaise Jews were driven out later from Trevoux and took refuge in Alsace.

From this time until the middle of the eighteenth century Jews were not allowed to live in Lyons. Two documents, dated respectively 1548 and 1571, show that their presence was at these dates considered a scandal to the city and the Christian religion.

Syndic of the Community.

Toward the end of the reign of Louis XV. several Jewish families again settled at Lyons. Some of them came from the cities of the south—Avignon, Carpentras, and Cavaillon; others, from Bordeaux or Alsace. At the very beginning of this reign the community numbered about fifteen families. A special vault was assigned to them for burial in the ground adjoining the hospital; and the mortuary records, still extant in the archives of the city, show that between the years 1767 and 1787 thirty-two bodies were interred there. The syndic of the new community was Elijah Rouget of Avignon. In a letter dated 1781 the lieutenant-general of the police of Lyons confers this dignity upon him and indicates to him the formalities to be observed before the magistrates by those Jews who live in the city and by those who are merely passing through Lyons. The successor of Elijah Rouget in the syndicate was Benjamin Naquet, who held the office for twenty years.

During the Revolution little attention was paid to the Jews of Lyons, since there was only a small number of them in the city, and they passed unnoticed. One of them, however, figures among the victims executed by the revolutionary tribunal which was instituted under the Reign of Terror; this was Azariah Vidal, executed in 1793.

After becoming French citizens by the decree of the convention of Sept. 27, 1791, the members of the Lyonnaise community in 1795 acquired for a cemetery, at a cost of 12,000 francs, a piece of land located at the Guillotière.

The Rabbinate.

The history of the community during the first half of the nineteenth century includes nothing of particular interest. Numbering only 200 souls under the empire and 500 under the Restoration and the constitutional monarchy, it was controlled after 1808 by the consistory of Marseilles, its affairs being regulated by a board of administration. Of the numerous administrators may be mentioned Isaac Helft (1808–18), Isaac Cerf of Ricqlès (1828–38), and Nordheim (1838–51). Religious services were held in a modest prayer-house, first in the Rue Bellecordière, on the second floor of a house occupied by numerous tenants, then on the ground floor of one in the Rue du Peyrat. Until 1850 the service was performed by an officiating minister. In that year a decree of the president of the republic instituted a rabbinate at Lyons, which included in its jurisdiction the department of the Rhône, of the Isère, and of the Loire. On Dec. 26, 1850, Jacques Weinberg, rabbi at Ribeauville, was called to fill the post.

The Synagogue.

In 1854 the suggestion was made to create a new consistory with Lyons as its center. This was effected Aug. 24, 1857: it comprises the departments of the Loire, the Ain, the Isère, the Jura, the Saône and Loire, and the Doubs. The consistory of Lyons has been represented at the central consistory by the Orientalist Salomon Munk (1858–67); by Michel Alcan, professor in the Conservatoire des Arts et Métiers (1867–77); by the poet Eugène Manuel (1877-1900); and by M. Camille Lyon, departmental chief in the council of state (the present representative). In the ten years succeeding its foundation the Israelitish population had become doubled. The consistory obtained from the municipal council of Lyons for the site of a synagogue a parcel of land situated in one of the most beautiful quarters, on the Quai Tilsitt, facing the hill of the Fourvière. On June 23, 1864, the new synagogue, built according to the plans of Abraham Hirsch, was inaugurated. It is considered to be one of the most beautiful in France. In 1864 a home for the aged was built. In 1870 a new cemetery, adjacent to the old one, was purchased. The various presidents of the consistory have been: J. Kuppenheim, Abraham Hirsch, Leon Kahn, and Henri Gaisman. M. Weinberg, who was the first to occupy the post of grand rabbi after the creation of the consistory, and who died in 1879, was succeeded by the present (1904) incumbent, Alfred Lévy, who was installed at

Lyons July 1, 1880, having previously been rabbi at Dijon (1867-69) and at Lunéville (1869-80).

Present Condition.

The Jews of Lyons at present (1904) number about 1,500 in a total population of 466,767. The annual communal budget includes 40,000 francs for religious purposes and 25,000 francs for charities. Besides the home for the aged mentioned above, there are: a board of charities, destined especially to help poor travelers, of whom there are always a great number at Lyons; two women's charitable societies; a young women's society for the protection of poor girls; a young people's society for educating poor boys; and two mutual aid societies.

Among those members who hold honorable offices and render distinguished services to the state may be mentioned: Edouard Millaud, senator; Abraham Hirsch, honorary chief architect of the city of Lyons; Aron, councilor of the Court of Appeal; Aron, chief engineer of the Paris-Lyon-Mediterranean Railway Company; Brahm, solicitor of the Court of Appeal; Edmond Weil, professor in the faculty of medicine; Emmanuel Lévy, lecturer in the faculty of law; Lang, director of the Ecole la Martinière; Lévy Léon and Weil, professors at the Lycée; Seyewetz, subdirector of the school of chemistry; Marc Lévy, professor at the school of commerce; Isidore, commandant of artillery and subdirector of the arsenal.

G. A. L.

LYONS, ISRAEL: Hebrew teacher and author; born in Poland; died 1770. He emigrated to England and settled in Cambridge. Here he practised the craft of silversmith and acquired a reputation as a Hebrew scholar. This led to his appointment as "teacher of the Hebrew tongue" in the University of Cambridge. He wrote "The Scholar's Instructor, or Hebrew Grammar, with Many Additions and Emendations Which the Author Has Found Necessary in His Long Course of Teaching Hebrew," a second edition of which appeared in 1757 and a fourth in 1823, while his treatise "Observations and Enquiries Relating to Various Parts of Scripture History" was printed by the Cambridge Press in 1768 and published by subscription.

Bibliography: Nichols, *Literary Anecdotes*, ii. 327, 419, London, 1812.

J. I. Co.

LYONS, ISRAEL: English astronomer, botanist, and mathematician; born at Cambridge 1739; died in London 1775; son of Israel Lyons. In his earliest youth he showed a remarkable aptitude for study, especially for mathematics. He began in 1755 the study of botany, which he continued till his death. In 1758 he published a "Treatise on Fluxions," dedicated to his patron, Dr. Smith, master of Trinity College; and in 1763 "Fasciculus Plantarum Circa Cantabrigiam Nascentium, Quæ post Raium Observatæ Fuere." Lyons was invited by Sir Joseph Banks, president of the Royal Society, who had received his earliest lessons in science from him, to lecture at Oxford in 1762, but he soon returned to Cambridge. He was appointed by the board to accompany Captain Phipps (afterward Lord Mulgrave) on a voyage to the north pole in 1773. On his return he married and settled in London, where he died in about a year. At the time of his death he was engaged in publishing some papers of Edmund Halley, secretary of the Royal Society.

J. I. Co.

LYONS, JACQUES JUDAH: American minister; son of Judah and Mary Lyons; born in Surinam, Dutch Guiana, Aug. 25, 1814; died in New York Aug. 12, 1877. He was educated in Surinam, and was minister of the Spanish and Portuguese congregation there, Neweh Shalom, for five years. He left Surinam in 1837 and went to Richmond, Va., where for two years he was minister of the Congregation Beth Schalom. In 1839 he was elected minister of the Spanish and Portuguese congregation Shearith Israel, New York city, in succession to Isaac Seixas, and served the congregation thirty-eight years, successfully combating every movement to change the form of worship in his congregation.

Lyons was among those who founded The Jews' (now Mount Sinai) Hospital; he was actively concerned in founding the Jewish Board of Delegates and Hebrew Free Schools and was superintendent of the Polonies Talmud Torah School, in connection with his own congregation. For many years he was president of the Hebra Hased ve-Emet and of the Sampson-Simpson Theological Fund. Lyons was an ardent student and collected a library that is now in possession of the Jewish Theological Seminary of America. In 1857, in connection with the Rev. Dr. Abraham De Sola of Montreal, he prepared and published a Hebrew calendar covering fifty years, together with an essay on the Jewish calendar system.

A. F. H. V.

LYRA, NICOLAS DE: French exegete; born at Lyre, near Evreux, Normandy, about 1270; died at Paris Oct. 23, 1340. The only certain dates in connection with his life are furnished by his epitaph in the monastery of the Minorites at Paris, which has been edited by Wadding. He entered the Franciscan order at Verneuil in 1291 and studied later at Paris, where he became doctor of theology and taught at the Sorbonne until 1325, when he was appointed provincial of his order for Burgundy.

Lyra, who was later declared to be of Jewish descent, wrote an anti-Jewish work entitled "De Messia Ejusque Adventu Præterito." His most important activities, however, were exegetical. Of the four methods of interpretation indicated in the mnemonic verse

> "Littera gesta docet, quid credas allegoria,
> Moralis quid agas, quo tendas anagogia,"

he was the first to emphasize as the most important that dependent upon the literal sense ("sensus litteralis"), and he endeavored to apply this system of Biblical exegesis to the exclusion of all others. His chief work, to which he devoted himself from 1322 to 1330, is his "Postillæ Perpetuæ, sive Brevia Commentaria in Universa Biblia" (first printed at Rome 1471-72, Cologne 1478, Venice 1482, and often since, either in whole or in part). After his death his book was supplemented by such additions as the general introduction, "De Libris Canonicis et Non Canonicis," and by numerous prefaces. The "Postillæ" includes fifty books of commentary on the entire Old and New Testaments and the Apocrypha, which latter is regarded as less binding in character. There are also thirty-five books of "Moralities" ("Moralia"). The author presents his point of view in the three prologues to his work, especially in the second—"De Intentione Autoris et Modo Procedendi." Even in cases which tradition has interpreted mystically he still considers the literal meaning as the decisive one; he offers esoteric explanations but seldom, and then almost always with a Christological tendency, for he seeks to find the deeds of the New Testament the fulfilment of the words of the Old.

Lyra used the original texts of the Old and New Testaments rather than the corrupt Latin translations. His knowledge of Jewish tradition was drawn from Rashi, whom he transcribes almost word for word, and who also was an advocate of literal exegesis ("peshaṭ"). Raymond Martin was his authority for Aramaic and Arabic, and he was frequently indebted to many others, particularly to Thomas Aquinas on the Book of Job. During the Middle Ages, Lyra was highly esteemed and widely read on account of his sound scholarship, judicious interpretation, and freedom from dogmatic prejudice. Luther frequently used Lyra's works; to them he owed his rabbinical knowledge, especially his acquaintance with Rashi, and it is to this influence that the well-known verse alludes—"Si Lyra non lyrasset, Lutherus non saltasset."

LYRE. See Harp and Lyre.

LYSIAS: Syrian statesman of royal descent; died 162 B.C. (I Macc. iii. 32; Josephus, "Ant." xii. 7, § 2). When Antiochus Epiphanes undertook a campaign against the Parthians in 166-165, he appointed Lysias regent and guardian of his heir, Antiochus V. (Eupator), who called Lysias brother (II Macc. xi. 22). The new viceroy was charged with the suppression of the Jewish revolt, and on the defeat of his generals he himself led a strong army against the rebels (165). He seems to have marched along the Palestinian coast to southern Judea, but he was defeated at Beth-Zur, south of Jerusalem, and was obliged to retreat to Antioch (I Macc. iii. 34-36, iv. 26-35; "Ant." xii. 7, § 5).

According to II Maccabees, which Niese regards as the best authority on the subject, this campaign took place after the consecration of the Temple by Judas Maccabeus. The same source states also that Lysias made peace with Judas and quotes the letter in which the former is supposed to have granted the demands of the Jews (II Macc. xi. 1-21).

According to I Maccabees, however, this peace was not concluded until a later date. After the death of Antiochus Epiphanes, Lysias went to Judea (163) with the young king Antiochus V. He again attacked from the south, besieged Beth-Zur, and thus compelled Judas to raise the siege of Acre and give battle. The Jewish army was defeated near Beth-Zechariah, and Beth-Zur fell into the hands of the victors. The Syrians had already laid siege to Jerusalem, then held by the Jews, who would, in all probability, have been utterly defeated had not Lysias been compelled to make war upon his rival Philip, who had been appointed guardian of Antiochus V. (I Macc. vi. 28-48; II Macc. xiii. 1-17; "Ant." xii. 9, §§ 3-5; *idem*, "B. J." i. 1, § 5). The regent found it advisable, therefore, to make peace with the Jews, whom he allowed to resume their former prerogatives (I Macc. vi. 55-62; II Macc. xiii. 23-26; "Ant." xii. 9, §§ 6-7).

Realizing that it was impossible to deprive the Jews of their religious freedom, Lysias proved himself a better politician than his king, Antiochus Epiphanes. He would have conquered Philip had not his own soldiers betrayed him and his ward, Antiochus V., to the pretender Demetrius I. (Soter), who put them both to death (162; I Macc. vii. 1-4; II Macc. xiv. 2; Appian, "Syrian War," § 47; "Ant." xii. 10, § 1).

J. S. Kr.

LYSIMACHUS: Anti-Jewish Alexandrian writer; lived before Apion. Like the Stoic Chæremon, he went beyond even Manetho in his inimical account of the exodus of the Jews from Egypt. According to Lysimachus, the Jews, numbering 110,000, left Egypt in the reign of King Bokchoris, journeyed through the desert on the advice of a certain Moyses, and after many hardships finally arrived at Judea, where they founded the city of Hierosyla (= "Temple robbery"), which they subsequently called "Hierosolyma."

The fragments of Lysimachus found in Josephus ("Contra Ap." i. 34 *et seq.*), as well as in the works *Θηβαϊκὰ Παράδοξα* and *Νόστοι*, which are often quoted in ancient literature, have been collected by C. Müller in "Fragmenta Historicorum Græcorum," iii. 334-342 (see, also, Reinach, "Textes d'Auteurs Grecs," pp. 117 *et seq.*).

Bibliography: Josephus, *Contra Ap.* i. 34 *et seq.*; ii. 2, 14; Schürer, *Gesch.* iii. 403 *et seq.*; Westermann, in Pauly-Wissowa, *Real-Encyc.* iv. 1311.

G. M. K.

M

MAACAH: 1. Small Aramean kingdom east of the Sea of Galilee (I Chron. xix. 6). Its territory was in the region assigned to the half-tribe of Manasseh east of the Jordan. Maacah, its king, became a mercenary of the Ammonites in their war against David (II Sam. x. 6). It is probable that the city Abel of Beth-maachah in Naphtali (*ib.* xx. 15) derived its name from its relation to this kingdom and people.

2. A wife of David, and daughter of Talmai, King of Geshur (*ib.* iii. 3), a near neighbor of the Maachathites.

3. King of Gath, to whose son, Achish, Shimei's servants fled early in Solomon's reign (I Kings ii. 39). About a half-century earlier than this event, David with 600 men had fled to Achish, son of Maoch, King of Gath (I Sam. xxvii. 2); but the identification of Maoch is doubtful, though kinship is exceedingly probable.

4. Wife of Rehoboam, King of Judah, and mother of Abijah; in I Kings xv. 2 she is called the daughter of "Abishalom," but of "Absalom" in II Chron. xi. 20, 21. She was removed from her position as queen mother by her grandson Asa (*ib.* xv. 16).

Other persons of this name are mentioned in Gen. xxii. 24; I Chron. ii. 48, vii. 15, viii. 29, xi. 43, xxvii. 16.

E. G. H. I. M. P.

MA'ALI IBN HIBAT ALLAH, ABU AL-: Egyptian physician; lived at Fusṭaṭ (Cairo) at the end of the twelfth century. He was the physician of Salaḥ al-Din (Saladin) and, after the death of the latter, of his brother Al-Malik al-'Adil. Ibn Abi Uṣaibi'ah, in his biographies of the Arabic physicians, speaks highly of Abu al-Ma'ali's learning, generosity, and great influence at court. He relates further that almost all his children embraced Islam. Al-Ma'ali wrote many works and essays on medicine, which are no longer in existence. Steinschneider is inclined to identify Ma'ali with the brother-in-law of Maimonides and the secretary of the mother of the vizier Al-Faḍal. Ma'ali wrote a work on medicine entitled "Ta'aliḳ wa-Maghrabat."

Bibliography: Steinschneider, *Die Arabische Literatur der Juden*, § 155.

MA'AMAD. See Mahamad.

MA'ARABI (AL-MAGHREBI), ISRAEL BEN SAMUEL HA-DAYYAN: Karaite scholar; lived at Cairo in the thirteenth and fourteenth centuries; teacher of the Karaite physician and writer Japhet ibn Ẓaghir of Cairo. Ma'arabi wrote, in Arabic, a work on the precepts (probably "Kitab al-Fara'iḍ"), of which only the part dealing with the laws concerning the slaughtering of animals and the part treating upon the calendar (but in a Hebrew translation) are extant in manuscript, the former in London (Brit. Mus., Or. No. 2528), St. Petersburg (Firkovich collection, No. 640), and Strasburg (No. 50), the latter in Leyden (Nos. 25 and 60) and St. Petersburg (No. 716, where the name of the author is erroneously given as "Elijah ha-Dayyan"). A Hebrew translation of the part on the laws of slaughtering was published under the title "Hilkot 'Inyan Sheḥiṭah" at Vienna (1830); a Hebrew translation of the part treating upon the calendar was incorporated in the "Tiḳḳun ha-Ḳara'im," reproduced by Wolf in his "Bibliotheca Hebræa" (iv. 1077 *et seq.*). In addition to the work on the precepts, Ma'arabi wrote: "Tartib al-'Aḳa'id al-Sittah," on the six articles of belief (the belief in God, in His messenger [Moses], in the Prophets, in the Torah, in Jerusalem, in the Last Judgment); "Sharḥ 'Aseret ha-Debarim," a commentary on the Decalogue (St. Petersburg, Firkovich collection, No. 638); "Iggeret," a decision in a contested case of marriage (Fischl MSS., No. 59 E.); "Muḳaddimah," a commentary on Prov. iii. 13, or, according to Neubauer, a prayer for the dead ("ẓidduḳ ha-din").

Ma'arabi attacked, in his work on the precepts, the theories of the "Ba'ale ha-Rikkub" with regard to the laws of incest, and advocated the reform that had been preconized by Joseph ha-Ro'eh.

J. I. Br.

MA'ARABI, NAHUM: Moroccan Hebrew poet and translator of the thirteenth century ("Ma'arabi," "Maghrabi" = "the western" or "the Moroccan"). His poems are found only in Moroccan collections. Two of them, of a liturgic character, were published by L. Dukes in "Zur Kentniss der Hebräischen Poesie" (pp. 162–163), and they were translated into German by M. Sachs in "Die Religiöse Poesie" (p. 131). Ma'arabi translated from Arabic into Hebrew: (1) Maimonides' "Iggeret Teman," under the title "Petaḥ Tiḳwah," to which he added a preface in verse (Basel, 1631); (2) the commentary to the "Sefer Yeẓirah" by Isaac Israeli or Jacob b. Nissim, prefacing it with a poem (a fragment of it was published by L. Dukes in "Ḳonṭres ha-Massoret," pp. 5–10); (3) Joseph ibn Ẓaddiḳ's "Microcosmos," under the title "Ha-'Olam ha-Ḳaṭon" (the translation is anonymous, but see Steinschneider ["Hebr. Uebers." pp. 408–409]); (4) Saadia's commentary on the thirteen hermeneutic rules ("Shelosh 'Esreh Middot") of R. Ishmael.

Bibliography: Steinschneider, *Hebr. Uebers.* pp. 395, 409, 930, 935; idem, *Cat. Bodl.* col. 2021; idem, *Hebr. Bibl.* xv. 13; L. Dukes, *Konṭres ha-Massoret*, pp. 5–10; idem, *Zur Kentniss*, pp. 162 *et seq.*; *Oẓar Ṭob*, 1885, p. 11.

G. M. Sel.

MA'ARIB: The evening prayer, from the first benediction in which the name is taken, the Talmudic term being "Tefillat 'Arbit"; one of the three daily prayers instituted in conformity with the practise of David ("Evening, and morning, and at noon, will I pray," Ps. lv. 18 [A. V. 17]) and Daniel (Dan. vi. 10). The Talmud ascribes to the Patriarchs the origin of the prayers, and credits Jacob with the "Ma'arib," because it is said: "And he lighted ["wa-yifga'"] upon a certain place . . . because the sun was set" (Gen. xxviii. 11), interpreting "wa-yifga'" as "and he prayed" (comp. "tifga'" = "make intercession," Jer. vii. 16).

In Biblical times prayers were devotional in character and were considered as voluntary offerings. But after the destruction of the Temple, prayers became obligatory as substitutes for the sacrifices: "So will we render as bullocks the offering of our lips" (Hos. xiv. 2, R. V.). But inasmuch as the offering of sacrifices in the Temple occurred only twice a day, morning and afternoon, only the corresponding two prayers became an obligation, while the "Ma'arib" still remained a voluntary prayer, according to the best authority (Ber. 27b). This of course refers to the standing-prayer, "Shemoneh 'Esreh," and not to the "Shema'," which it is obligatory to read morning and evening. Consequently in Talmudic times and in a greater part of the geonic period, as the "Seder R. Amram Gaon" clearly shows, the standing-prayer was omitted from the "Ma'arib" service. To replace the Eighteen Benedictions, eighteen scattered Biblical verses, each mentioning the name of God, were introduced at the end of the "Ma'arib" service. This composition, beginning with "Baruk Adonai le-'olam," was arranged by the rabbis of Babylonia and accepted by the rabbis of Palestine. Maimonides admits that the "Ma'arib" is only voluntary, but he claims that since the Jews everywhere, by common custom, consented to say the prayer regularly, it is equivalent to an obligation ("Yad," Tefillah, i. 6).

Order of Prayer.

"Ma'arib" usually follows the "Minḥah" prayer at the synagogue, to avoid the trouble of a second gathering of the congregation. The time for the "Ma'arib" service begins when three stars are visible in the heavens. The time may be extended to midnight, and in case of an emergency to the rising of the morning star (Ber. i. 1). The service begins with "Wehu Raḥum" and "Baraku," and continues with the first benediction, "Asher bi-Debaro," the second benediction, "Ahabat 'Olam," "Shema'" (Deut. vi. 4-10, xi. 13-22; Num. xv. 37-41), the third benediction, "Emet we-Emunah," the fourth benediction, "Hashkibenu" (Ber. 4b), the eighteen verses mentioned above, "Yire'u 'Enenu," the standing-prayer, and the "'Alenu." If the "Ma'arib" service is conducted by a quorum of ten, the leader does not repeat the standing-prayer.

On Friday evening the "Ma'arib" service commences somewhat earlier, preceded by "Leku Nerannanah." The Sephardim begin with "Wehu Raḥum," as usual, but the Ashkenazim omit this, as the Sabbath is a day of joy not to be disturbed with any supplication or devotional prayer of the character of "Wehu Raḥum." The Zohar gives another reason for the omission—that on Sabbath "the Higher Judgment must not be revoked" (Zohar, Terumah, p. 130a, ed. Wilna, 1882). The leader of the congregation repeats a part of the standing-prayer for Sabbath, "Magen Abot," "Bame Madliḳin" (the second chapter of Shabbat, relating to the lighting of Sabbath lights), the "Alenu," and "Yigdal." See DEVOTIONAL LITERATURE; PRAYER.

J. J. D. E.

MAARSSEN, JOSEPH BEN JACOB:

MAARSSEN, JOSEPH BEN JACOB: Dutch scholar and publisher; member of a family of printers; lived at Amsterdam in the seventeenth and eighteenth centuries. Maarssen published the following works: (1) A Judæo-German translation, by himself, from the Dutch of an account of the uprising that occurred at Amsterdam in 1696. It was edited (Amsterdam, 1707), under the title "Eine Beschreibung von die Rebelerei zu Amsterdam," by the translator's father, who had witnessed the events. (2) "Ḥanok la-Na'ar," models of Judæo-German letters, with a glossary containing more than one hundred Latin, French, and German words, compiled by him in collaboration with Moses Bendin (Amsterdam, 1714-15). (3) "Leshon Zahab," or "Miktam le-Dawid," by David Maarssen, models of Hebrew letters, published as a supplement to the preceding work (*ib.* 1714). (4) "Yehoshua' ben Sirak," the wisdom of Ben Sirah, translated by Maarssen into Judæo-German from the Dutch (*ib.* 1712). (5) "Schöne Artliche Geschichten," seven stories of Boccaccio's, translated, also by Maarssen, from the Dutch (*ib.* 1710). (6) "Tiḳḳun Soḥarim we-Tiḳḳun Ḥillufim," specimens of commercial notes and of the laws concerning commercial bills, compiled by him in collaboration with Ẓebi Hirsch ben Gershon Szczebrszeszyn and Moses Bendin (*ib.* 1714).

D. I. BR.

MAAS, JOSEPH: English musician and singer; born at Dartford, Kent, Jan. 30, 1847; died at London Jan. 16, 1886. Maas acted as chorister for five years at Rochester Cathedral (from 1856) and studied under J. C. Hopkins and Madame Bodda-Pyne. When his voice broke he became a clerk in the dockyards at Chatham. In 1869 he went to Milan, returning to England in 1871, when he appeared at one of the Henry Leslie Choir Concerts at St. James's Hall; he sang in "Babil and Bijou" at Covent Garden in Sept., 1872. He made his reputation as an operatic singer in America, where he remained for a number of years, chiefly as first tenor in various English opera companies. On his return to England he was engaged by Carl Rosa, and appeared in "The Golden Cross" at the Adelphi Theatre in 1878. In 1879 he appeared at Her Majesty's Theatre as *Rienzi* in Wagner's opera of that name. In the ballad operas of Balfe and Wallace his popularity was unequaled; one of his best and most successful parts was that of the hero in Massanet's "Manon" at Drury Lane Theatre. Maas sang for a short time in Italian opera at Her Majesty's and Covent Garden theaters. On the concert platform he had few rivals in English ballads and as a soloist in Handel's oratorios.

BIBLIOGRAPHY: *The Times* (London), Jan. 18 and 23, 1886.

J. G. L.

MAAS, MYRTIL: French mathematician; born in France in 1792; died in Paris Feb. 27, 1865. He early showed an aptitude for mathematics, and in 1813 entered the Ecole Normale at Paris, where he studied until the political upheaval of 1815 caused the suspension of the school. In that year, when walking with some of his schoolfellows in the Champ de Mars, where the troops were drilling, he was accidentally shot in the leg, and the wound never perfectly healed. Being a Jew, he was unable to obtain a chair in mathematics; but he found employment first in a porcelain factory and then as a private tutor. In 1818 he was employed as actuary by the Compagnie d'Assurances Générales of Paris. He then studied in London, returned to Paris, was chosen by the company from among three distinguished mathematicians, and soon became its vice-president. In 1828 he became president of a new life- and fire-insurance company, founded by the Foulds. Maas labored actively in the interests of the Jews; in 1830 he became a member of the Central Consistory, and thirteen years later its vice-president. His death was caused by a malady that developed from his wound. A eulogy upon him was read in the directors' room of the company, and his old schoolfellows had a medal engraved in his honor: this was delivered to his son, who assumed the position and responsibilities of his father.

S. N. D.

MAʻASEH BERESHIT; MAʻASEH MERKABAH (literally, "work of Creation" and "work of the Chariot"): Talmudic terms for the esoteric doctrine of the universe, or for parts of it (comp. CABALA). Maʻaseh Bereshit, following Gen. i., comprises the cosmogony of the Talmudic times; Maʻaseh Merkabah, based on the description of the Divine Chariot in Ezek. i., and on other prophetic descriptions of divine manifestations, such as that in Isa. vi., is concerned with the theosophic views of those times. The secret doctrine might not be discussed in public. Ecclesiasticus (iii. 21-22) inveighs against its study: "Seek not out the things that are too hard for thee, neither search the things that are above thy strength. But what is commanded thee, think thereupon with reverence; for it is not needful for thee to see with thine eyes the things that are in secret." Ḥag. ii. 1 says: "Maʻaseh Bereshit must not be explained before two, nor Maʻaseh Merkabah before one, unless he be wise and understands it by himself"; Ḥag. 13a then goes on to explain that the chapter-headings of Maʻaseh Merkabah may be taught, as was done by R. Ḥiyya. According to Yer. Ḥag. ii. 1, the teacher read the headings of the chapters, after which, subject to the approval of the teacher, the pupil read to the end of the chapter. R. Zera said that even the chapter-headings might be communicated only to a person who was head of a school and was cautious in temperament. According to R. Ammi, the secret doctrine might be entrusted only to one who possessed the five qualities enumerated in Isa. iii. 3. A certain age is, of course, necessary. When R. Johanan wished to initiate R. Eliezer in the Maʻaseh Merkabah, the latter answered, "I am not yet old enough." A boy who recognized the meaning of חשמל (Ezek. i. 4) was consumed by fire (Ḥag. 13b), and the perils connected with the unauthorized discussion of these subjects are often described (Ḥag. ii. 1; Shab. 80b).

Creation Mystery.

Ḥag. 11b states that it is permissible to inquire concerning the events of the six days of Creation, but not regarding what happened before the Creation. In no case, then, is the entire cosmogony included in the term "Maʻaseh Bereshit," but only its more mystic aspects, nor can all the passages of the Talmud and the Midrash dealing with these problems be considered as parts of the doctrine. Thus, ideas like those regarding the ten agencies by means of which God created the world, or questions as to whether heaven or earth was first created, or concerning the foundations of the world, or as to whether there are two heavens or seven (all these problems being mentioned in connection with the interdiction against teaching the Maʻaseh Bereshit to more than one person), do not belong to the doctrine itself, for such arguments are forbidden by the dictum, "Thou mayest speak of the seven heavens, but of the things thereafter thou mayest not speak." The views which are found scattered throughout the Talmud, and especially in Gen. R. i.-xii., are generally haggadic in character; indeed the question arises whether anything more than mere allusions may be expected therein regarding the Maʻaseh Bereshit in so far as it is esoteric in content. Some information seems to be given, though only by intimation, in the well-known story in Ḥag. 14b-15b of the four scholars that entered paradise (that is, penetrated the mysteries of the secret doctrine), of whom only R. Akiba remained uninjured. R. Akiba's words at the beginning of the story (14b), "When ye reach the shining marble stone do not cry out 'Water, water,'" seem to point to those theories of Creation which assume water to be the original element.

Ben Yoma is represented as interested in the determination of the space between the upper and lower waters. Ḥag. ii. 1 also indicates this in the story of R. Judah b. Pazzi, who opened his discourse on Maʻaseh Bereshit with the words, "In the beginning the world was water in water." Thus the question of the primal elements undoubtedly belongs to this field. Here again one must distinguish haggadic and devotional from mystic and philosophical thought, and must not teach views such as that the world was created out of "tohu" and "bohu" and "ḥoshek," or that air, wind, and storm were the primal elements, as component parts of the doctrine of Creation. In like manner the cosmogonic conceptions of the Apocrypha and of geonic mysticism must not be considered as indications of the secret teachings of the Maʻaseh Bereshit.

Chariot of Fire.

Somewhat simpler is the question regarding the nature of the Maʻaseh Merkabah, which is designated as "an important matter" in the Talmud (Suk. 28a) and which, perhaps, occupies on the whole a more prominent position than the Maʻaseh Bereshit. Just as in the case of the latter, the purely haggadic explanations of Ezek. i., as found, for instance, in Ḥag. 13b, must not be taken into consideration. This chapter of Ezekiel, it is declared, may be studied even by young pupils, because a boy can seldom recognize the doctrines implied therein. The object, therefore, was to find special secrets in these verses. R. Akiba is said (Ḥag. 15b–16a) to have gathered his mystic deductions from Deut. xxxiii. 2 ("and he came with ten thousands of saints"), Cant. v. 10 ("the chiefest among ten thousand"), Isa. xlviii. 2 ("The Lord of hosts is his name"), and I Kings xix. 11, 12 (Elijah's great theophany). The Ma'aseh Merkabah, therefore, dealt with esoteric teachings concerning the visible manifestations of God, and hence with angelology and demonology, though not to the same degree as in Talmudic literature. As the story of R. Akiba indicates, the other theophanies mentioned in the Bible were used in the Ma'aseh Merkabah; Ḥag. 13b shows, *e.g.*, that this was the case with Isa. vi.

Practical Applications.

The Ma'aseh Merkabah seems to have had practical applications. The belief was apparently current that certain mystic expositions of the Ezekiel chapter, or the discussion of objects connected with it, would cause God to appear. When R. Eleazar b. 'Arak was discoursing upon the Ma'aseh Merkabah to R. Johanan b. Zakkai, the latter dismounted from his ass, saying, "It is not seemly that I sit on the ass while you are discoursing on the heavenly doctrine, and while the Divinity is among us and ministering angels accompany us." Then a fire came down from heaven and surrounded all the trees of the field, whereupon all of them together began to recite the hymn of praise. R. Jose ha-Kohen and R. Joshua (according to Yer. Ḥag. ii. 1, R. Simon b. Nathanael) had similar experiences. The belief in the appearance of God is indicated also in the popular idea that all who inquire into the mysteries of the Ma'aseh Merkabah without being duly authorized will die a sudden death. Such a divine interposition is expressly mentioned in connection with the "story of the Creation" in Sanh. 95b. Rab Hananiah and Rab Hoshaiah studied the "Sefer Yeẓirah" and the "Hilkot Yeẓirah" respectively every Sabbath evening and succeeded in creating a calf as large as a three-year-old ox.

This esoteric tendency, originating in pagan conceptions in connection with certain Bible stories, must have led often to pessimistic and nihilistic views, as is shown by the accounts of Aher or Elisha b. Abuyah (Ḥag. 15a, b), and the Mishnaic passage, "He who speaks of the things which are before, behind, above, and below, it were better he had never been born."

According to a tradition handed down by Jose b. Judah, a tanna of the second half of the second century (Tosef., Ḥag. ii. 2; Ḥag. 14b; Yer. Ḥag. ii. 1), Johanan b. Zakkai was the founder of the secret doctrine. In the same passage, in both Talmuds, it is said, however, that he refused to discuss it, even in the presence of a single person, although, as already stated, R. Eleazar b. 'Arak discoursed on it with him and was extravagantly praised by him; two other pupils of his, R. Joshua and R. Jose ha-Kohen, also discussed it with him. According to tradition, the second one to give instruction in these matters was R. Joshua, vice-president of the Sanhedrin under R. Gamaliel. He was succeeded by R. Akiba, and the last to teach them was R. Neḥunya b. ha-Ḳanah. R. Jose the Galilean and Pappus discussed the subject with R. Akiba (Ḥag. 14a; Gen. R. xxi.). The tradition, quoted above, of the four who studied the secret doctrine mentions, besides Akiba, Simeon b. 'Azzai, Simeon b. Zoma, and Elisha b. Abuyah. The fate of the last-named, who was driven from Judaism by his experience, is said to have given rise to restrictive measures. The study of profane books was forbidden (Sanh. 100), and an interdiction of the public discussion of these subjects was issued, only R. Ishmael objecting. In the time of R. Judah, R. Judah b. Pazzi and Bar Ḳappara delivered public discourses on these mysteries (Yer. Ḥag. ii. 1; Gen. R. i.). R. Levi regarding this as inadmissible, R. Ḥiyya declared that the chapter-headings might be taught. R. Judah ha-Nasi was at this time the authority to whom, as formerly to R. Johanan, such matters were referred. In later times the interdiction against public discussions of the story of the Creation was accepted without protest, but by way of warning this saying (Ḥag. 16a) of Resh Laḳish was added: "His eyes shall be dull who looketh on three things—the rainbow [because it resembles Ezekiel's vision], the king [because he resembles God in majesty], and the priest [because he utters the name of God]."

Source of Doctrines.

This Talmudic doctrine may well be connected with the old Jewish esoteric teachings of the time of the Second Temple, as partly preserved in the Apocrypha and the pseudepigrapha; but the theosophic and cosmogonic portions of this literature can not with certainty be regarded as the source of the Talmudic doctrine, nor can the literature of the so-called geonic mysticism, crystallized in the Ma'aseh Bereshit and the Ma'aseh Merkabah and designated in its literary form by these names, be regarded as the immediate continuation of Talmudic mysticism. Although much of the material found in the former may belong to the Talmud, yet the entire doctrine of the heavenly halls, angelology, and the doctrine of the Creation as it is found, for instance, in the "Sefer Yeẓirah," must not be regarded as Talmudic in origin. The very fact that there are so many Talmudic and midrashic parallels to the conceptions of the geonic period leads to the conclusion that they contain only a limited amount of original material from the ancient esoteric teachings. It may be mentioned, finally, that Maimonides interprets Ma'aseh Bereshit as referring to physics and Ma'aseh Merkabah as referring to metaphysics. See also MERKABAH.

MA'ASEH BOOKS: Books written in Judæo-German in Hebrew script, and containing stories, legends, and tales ("ma'asim") on various subjects, most of them relating to Jews and Judaism. They originated about the beginning of the fifteenth century, when Jews were living in the Rhenish provinces, and were further developed during the migrations to Russia and Poland. Like the name "ma'aseh-buch" itself, this entire literature is a mixture of Jewish and German, both in language and in substance. The first products of Judæo-German literature, which is very voluminous, were principally translations of the prayer-books and the Bible, and devotional books. The ma'aseh books constitute a group by themselves; their object was to furnish entertainment and instruction for women and girls, who, unlike the men, were not in duty bound to learn Hebrew. Where the subject is a non-Jewish one, Hebrew words may be altogether lacking in the story, except the invariable formula at the end of the book—סליק and אכי"ר (אם כן יהי רצון), or a note in Hebrew regarding the author, and a Hebrew verse on the title-page. At first the writers generally chose non-Jewish stories, but as the literature developed, Jewish subjects were given the preference. It is to be noted, furthermore, that in the earlier period consecutive stories of considerable length were employed, while later the ma'aseh collections took the form of readers and anthologies containing short stories ending with a moral; for this reason fables also are included.

Subjects.

The non-Jewish subjects at first selected were various in nature. Indeed the Jews were led to make these collections by their acquaintance with the stories from the cycles of King Arthur, Dietrich of Bern, and the "Nibelungenlied," all of which were well known in the region of the Rhine. Thus a Judæo-German version was made of the poem "Ritter aus Provincienland, Sigmund Is Sein Name Genannt, und Magdalena, Tochter des Königs von England." In 1501 Elijah Levita composed at Venice the well-known Baba Buch or "Bovo-Ma'aseh," a Judæo-German rimed version of the English romance of Bevis of Hampton, following Italian versions in which the hero is called "Bovo d'Antonia," the form of the name which gave Levita's rendering its title. Sources apparently the most remote were drawn upon for material, such as the facetiæ of Till Eulenspiegel, and even Boccaccio's frivolous tales, which found their way into Judæo-German from Dutch versions.

Side by side with this foreign material Jewish tales were developed and remodeled. The Bible, especially the stories of Joseph, David, and Samuel (the "Schmuel-Buch," Basel, 1612), offered rich material, while Jewish history and literature furnished an abundance of subjects. There are also Judæo-German historical works, such as the "Yosippon," "Shebeṭ Yehudah," and "She'erit Yisrael" (Grünbaum, "Jüdisch-Deutsche Chrestomathie," pp. 345, 357, 361). The stories of Judith and Esther, of the heroic wars of the Maccabees and the destruction of the Temple, were retold, mingled with many legends; and later works, such as the "Ben ha-Melek weha-Nazir" (Prince and Dervish), were also translated.

Modifications Introduced.

Jewish readers, curiously enough, preferred the books dealing with non-Jewish subjects (comp. Cornelius Adelkind's introduction to Levita's translation of the Psalms and the introduction to the ma'aseh book of 1602). Although Perles has shown ("Monatsschrift," 1876, pp. 351 *et seq.*) that in the stories belonging to the Dietrich cycle the passages with a Christian coloring were replaced by others, a change which was probably made also in other non-Jewish stories, yet such alterations did not suffice for the real purpose of the ma'aseh books, which was to furnish instruction in Jewish history and literature for those who were ignorant of Hebrew. To remedy this defect a pious Jew issued in 1602 a work known simply as "Ma'aseh-buch," purporting to be a collection of Jewish legends and historical tales and without any admixture whatever of foreign elements. The collector indicates his purpose in the preface as follows: "Here cometh a beautiful Ma'aseh Book, ye dear sirs and dames; now look upon the beautiful Ma'aseh Book, which has never before been published in the world, and contains some three hundred ma'asim, all made from the Gemara and also from the רבתא and Beḥai; and also from R. Judah Ḥasid's ma'asim ye will miss none; and also from the Sefer Ḥasidim, and the Sefer Musar, and the Yalḳuṭ, as ye may see below in my 'simanim.' Therefore, ye dear dames, ye now have the German books all before you, and ye have likewise the German Gemara, even as ye have 'kol hattoro kullo gor.'" Then in Hebrew: "By order of Jacob b. Abraham of blessed memory, of Meseritsch in Lithuania. Here at Basel the great [city], 362 [*i.e.*, 1602], by Herr Conrad Waldkirch."

Despite the author's intention, some non-Jewish stories found their way into this book. Steinschneider assumes that its compiler lived in western Germany in the last third of the sixteenth century. A German translation of it was published by Christoph Hellwig (Helvicus), together with notes that are anti-Jewish in tone (Giessen, 1612). The "Ma'aseh Adonai" and the "Ma'asehbuch" (Wilmersdorf and Rödelheim, 1752) from which Grünbaum published extracts ("Chrestomathie," pp. 385 *et seq.*), may also be noted here. All the works belonging to this class of literature are very similar in content, being compilations of an undigested series of anecdotes from various Jewish books, especially from the Babylonian Talmud, the Midrash, Yalḳuṭ, the Zohar, and such historical books as the "Yuḥasin," "Shalshelet ha-Ḳabbalah," and "Shebeṭ Yehudah." Each story begins with the words "Ma'aseh es geschach" or "Ma'aseh es wor einmal" ("a 'ma'aseh' happened," or "there was a 'ma'aseh' once upon a time"). The authors prefer to narrate instructive stories or miracles of anonymous ḥasidim, and they frequently tell tales of famous Jewish rabbis like Maimonides and Luria, or of earlier ones like Joshua ha-Levi and Akiba. Often the stories are noble and lofty and sincere in their religious feeling, and are told in simple, straightforward language. The ma'aseh books contain highly valuable material for the knowledge of the life and thought of the Jews of the Middle Ages, but as yet they have scarcely been studied from this point of view. A detailed bibliographical list of this literature is given by Steinschneider in his Bodleian catalogue.

MA'ASER. See Tithe.

MA'ASEROT (מעשרות = "tithes"): Seventh masseket of the Mishnah, Tosefta, and Palestinian Gemara, in the Talmudic order of Zera'im. It deals with the tithes of agricultural produce due to the Levites (Num. xviii. 21). In contradistinction to the tithe called "ma'aser sheni," which the owner must consume at Jerusalem (Deut. xiv. 22 *et seq.*), and to the triennial poor man's tithe (Deut. xiv. 28 *et seq.*, xxvi. 12 *et seq.*), called "ma'aser 'ani," the tithe treated in this masseket is denominated "ma'aser Lewi" (the Levite's tithe) or "ma'aser rishon" (first tithe; see Ma'as. Sh. v. 6, 10). The latter name was formerly applied to this treatise (see Joshua ha-Levi, "Halikot 'Olam," i. 1; Frankel, "Darke ha-Mishnah," p. 257), which is so styled in the Erfurt manuscript of Tosefta (ed. Zuckermandel). The treatise is divided into five chapters (three in the Tosefta), and its contents, briefly stated, are as follows:

Ch. i.: Whatever is edible, and is private property, and grows in the ground is subject to tithe. Plants that are edible while young as well as when full grown are subject to tithe before maturity (if any part of the crop is taken before maturity); but of plants that are not properly eatable before they reach a certain stage of ripeness one may eat, without separating the tithes, until they develop. The Mishnah then proceeds to designate the respective stages at which plants come under the general head of edibles and are consequently subject to tithe. As between picking for marketing and for domestic consumption a distinction is made: in the latter case one may use small quantities before bringing the mass under shelter (comp. iii. 5).

Ch. ii.-iv.: Under what circumstances a Ḥaber may eat of the produce of an 'Am ha-Areẓ without first separating the ma'aser. If a laborer, hired to assist in gathering figs, stipulates with his employer that he be allowed to eat of the fruit, he may eat without regard to tithing; but if his stipulation includes one of his dependents, or if he sends one of his dependents instead, the latter will not be privileged to partake of the fruit before the tithe is properly set aside. [The laborer is by law entitled to eat of the produce he handles (see B. M. vii. 2 *et seq.*), as a kind of charity; comp. B. M. 92a *et seq.*] After the crop reaches the employer's enclosed premises the laborer may eat thereof only if his employer has not promised to board him.

Ch. v.: Laws regarding cases in which one is required to pay tithes when he transplants vegetables; laws regarding the sale of crops to one who is suspected of non-observance; law regarding the paying of tithes in the case of vegetable fields purchased in Syria.

S. S. S. M.

MA'ASIYYOT. See Anecdotes.

MACCABÆAN, THE: Monthly magazine of Jewish life and literature published in New York; established Oct., 1901, as the outcome of a resolution unanimously passed at a convention of the societies affiliated with the Federation of American Zionists, held at Philadelphia in the June preceding.

Until June, 1902, "The Maccabæan" was issued partly in English and partly in Yiddish under the editorship of Louis Lipsky. By a resolution of the convention held in Boston in June, 1902, the Yiddish department was dropped, and the editorial chair has since been occupied by J. de Haas. In 1903 (Jan.) the publication was incorporated as a stock-company, the Federation holding the majority of the stock, and Prof. Richard Gottheil being appointed president of the company. The present (1904) president is G. H. Mayer; M. B. Laude, William Morris, and J. H. Lieberman are respectively vice-president, treasurer, and secretary.

G. S.

MACCABÆANS, THE: Association of English Jewish professional men and others; founded in 1892; its aim is social intercourse and cooperation among its members with a view to the promotion of the higher interests of the Jewish race. At first membership was not limited to any one class in the community, but shortly after the establishment of the club admission was restricted to Jewish professional men. The term "professional men" was, however, very widely interpreted, and subsequent legislation has empowered the committee to elect in any year ten Jews who have become prominent by reason of their public services or their connection with literature, science, or art. These specially elected members must not number more than one in four of the ordinary membership.

The establishment of the Maccabæans was primarily due to Herman Cohen, with whom the idea originated, and whose efforts were well supported by several professional friends, including Solomon J. Solomon, A.R.A. (first president); and Asher I. Myers (treasurer). Herman Cohen himself became first honorary secretary. The Maccabæans hold frequent meetings for the reading and discussion of papers of Jewish interest. Not only do these meetings offer a free platform on which all parties in the community meet and discuss controversial topics of general interest, but as a result of papers read before the Maccabæans the Jewish Lads' Brigade, the Jewish Athletic Association, and the Education Aid Society, among other movements, have been started.

MACCABEES, THE (Greek, Οἱ Μακκαβαῖοι): Name given to the Hasmonean family. Originally the designation "Maccabeus" (Jerome, "Machabæus") was applied solely to Judas, the third son of Mattathias the Hasmonean (I Macc. ii. 4, iii. 1, *et passim*), Mattathias' other sons having different surnames; but as Judas became the leader of the party after his father's death, and as he was also the most heroic warrior, his surname was applied not only to all the descendants of Mattathias, but even to others who took part in the revolutionary movement under the leadership of the Hasmoneans. Hence the title "Books of the Maccabees."

The etymology of the name, in spite of the efforts of the scholars, who have advanced various theories on the subject, remains undetermined. According to Jerome ("Prologus Galeatus"), the First Book of the Maccabees was originally written in Hebrew. Origen (in Eusebius, "Hist. Eccl." book vi., last chapter) even gives the Hebrew title, שרבט שר בני אל; thus the Greek and Latin forms of the name must have been transliterations from the Hebrew.

But the original Hebrew text is lost; and there is no mention of the name either in the Talmud or in the Midrash, where the family is always referred to as "the Hasmoneans." In later Hebrew writings the name occurs in two forms, מכבי, transliterated from the Latin, and מקבי, according to the Greek spelling. The latter form is generally explained as meaning "the hammer," a surname given to Judas on account of his heroism. Iken ("Symbolæ Litterariæ," i. 184, Bremen, 1744) derives it from the Arabic "manḳab" (= "general"), while, according to others, the name originated in the fact that Modin, where Mattathias dwelt, was in the territory of Gad (Reland, "Palästina," p. 901), the banner of which tribe bore the inscription מקב, the final letters of the names Abraham, Isaac, and Jacob.

מכבי is, however, the preferred form; it occurs in "Yosippon" (ch. xx.), and is explained by Gorionides as meaning "the hero," though it is not known in what way. Others explain it as composed of the initials of מי כמוך באלים יהוה (Ex. xv. 11), written on the banner of the Hasmoneans, or as the initials of מתתיהו כהן בן יוחנן. But the statement that it was the surname of Judas only is against these interpretations. Curtiss ("The Name Machabee," Leipsic, 1876) derives it from כבה = "to extinguish"; thus מכבי would mean "the extinguisher," which agrees with the interpretation of Gorionides. Finally, the following two opinions may be added: (1) that the Hebrew read מחבאי = "he who hides himself," referring to the fact that the Hasmoneans hid themselves in the mountains (I Macc. ii. 28); (2) that of Filosseno Luzzatto that it is a Greek word, an anagram of Βιαιομάχος = "violent warrior." For the history of the Maccabees see HASMONEANS; JUDAS MACCABEUS; MATTATHIAS MACCABEUS.

J. M. SEL.

MACCABEES, BOOKS OF: I. There are four books which pass under this name—I, II, III, and IV Maccabees. The first of these is the only one of the four which can be regarded as a reliable historical source.

I Maccabees: The First Book of the Maccabees covers the period of forty years from the accession of Antiochus (175 B.C.) to the death of Simon the Maccabee (135 B.C.). Its contents are as follows: Ch. i. 1–9 is a brief historical introduction; i. 10–ii. 70 treats of the rise of the Maccabean revolt; iii. 1–ix. 22 is devoted to the Maccabean struggle under Judas; ix. 23–xii. 53, to the fortunes of Israel under Jonathan; xiii. 1–xvi. 24, to the administration of Simon. The events are followed with intense interest and sympathy. At times the enthusiasm of the writer rises to a high pitch and breaks out into poetry of a genuine Semitic character (comp. iii. 3–9). The style is simple, terse, restrained, and objective, modeled throughout on that of the historical books of the Old Testament. The fact that just proportions are observed in treating the different parts of the narrative proves the author to have been a writer of considerable skill. He dates all events in terms of the Seleucid era.

Original Language.

It is clear from the Semitic idioms which occur throughout the work that it was composed in a Semitic language (see, for example, ii. 40, iv. 2), and certain passages indicate with great clearness that the original language was Hebrew (see ii. 39, iii. 19). To this fact Origen and Jerome also bear testimony, though it is possible that the version or paraphrase known to them was Aramaic.

The Hebrew original seems not to have borne the name "Maccabees," though it is not known what was its real designation. Eusebius ("Hist. Eccl." vi. 25) quotes Origen as authority for the name *Σαρβηθ Σαβαναι* Ελ, a name which has been explained in many different ways. For some of these see Grimm ("Das Erste Buch der Makkabäer," p. xvii.). Dalman ("Grammar," p. 6), whom Torrey (Cheyne and Black, "Encyc. Bibl.") follows, takes the name as a corruption of ספר בית חשמנאי (= "Book of the Hasmoneans"). If this be the correct interpretation, an Aramaic translation of the book must have been made at an early time, and it was this translation which was known to Origen and Jerome—a view which does not seem improbable. Be this as it may, the Hebrew was translated very early into Greek, and the Greek only has survived. The Greek version seems to be a literal one, often preserving the Semitic, and sometimes even the Hebrew, idiom; but it is clear, and probably it is, on the whole, a satisfactory translation. It is transmitted in three uncial manuscripts of the Septuagint—the Codex Sinaiticus, the Codex Alexandrinus, and the Codex Venetus—as well as in several cursives.

Author.

Concerning the author no information is obtainable beyond that which may be inferred from the book itself. He was a devout and patriotic Jew who lived and wrote in Palestine. This latter fact is proved by his intimate and exact geographical knowledge of the Holy Land (comp. iii. 24; vii. 19; ix. 2–4, 33, 34, 43; xii. 36–40; xiii. 22, 23; xvi. 5, 6) and by his lack of accurate knowledge of any of the foreign countries which he mentions. The author was also a loyal admirer of the Hasmonean family; he believed that to it Israel owed her deliverance and existence. He admired not only the military deeds of Judas (comp. v. 63), but also those of Jonathan (comp. x. 15–21) and Simon (comp. xiv. 4–15). The narrative is told not as though deliverance came by miracle, but as though it was due to the military genius of these men, exercised under the favoring guidance of God (i. 64, iii. 8). Curiously enough the word "God" does not appear in the work, nor does the word "Lord." The idea is not lacking, however, as in the Book of Esther, but is represented by "Heaven," or by the pronoun "He." The author was a deeply religious man in spite of this mannerism. He was very zealous for the Law and for the national religious institutions (see i. 11, 15, 43; ii. 20–22; iii. 21), for the Scriptures (i. 56, iii. 48), and for the Temple (i. 21, 39; iii. 43).

It should be noted, also, that throughout the work the priesthood is represented in a favorable light. The renegade priests Jason and Menelaus are not mentioned—a fact in striking contrast with the treatment which the Second Book of the Maccabees accords them. From these facts Geiger conjectured that the author was a Sadducee, and most recent writers follow him in this opinion, although they consider him wrong in calling the First Book of the Maccabees a partizan document; its temperate and just tone certainly redeems it from such a stricture. The *terminus a quo* of the work is found in the fact that John Hyrcanus I., who began to reign in 135 B.C., is mentioned at the close of the book (xvi. 21–24). As the Romans are throughout spoken of in terms of respect and friendliness, it is clear that the *terminus ad quem* must be sought at some time before the conquest of Jerusalem by Pompey in 63 B.C. As to whether the date can be more nearly determined scholars are not agreed. The determining fact is held by most to be the statement in xvi. 23, 24, that the "rest of the acts of John . . . are written in the chronicles of his high-priesthood." It is thought by many that this implies that John had died and that a sufficient time had elapsed since his death to permit the circulation of the chronicles. Bissell (Lange's "Commentary," p. 479) thinks that not more than a score or two of years had passed, while Schürer ("Hist. of the Jewish People," div. ii., vol. iii., p. 8) and Fairweather (in "Cambridge Bible" and Hastings, "Dict. Bible") think that not more than a decade or two had elapsed, and date the work in the first or second decade of the first century B.C. Torrey, on the other hand, thinks ("Encyc. Bibl.") that this reference to the chronicle of the priesthood is an imitation of well-known passages in the Books of Kings, that it was intended solely as a compliment to John, and that the work was composed early in his reign (*i.e.*, soon after 135 B.C.) by one who had been an interested spectator of the whole Maccabean movement. The vivid character of the narrative and the fact that it closes so abruptly after the death of Simon make this a very plausible view.

Date.

Sources and Integrity.

Those who maintain the later date of the work are obliged to account for the vivid details which it contains by supposing that the writer employed older sources, such as letters and memoranda. In Torrey's view no such sources are needed, as the author, where he did not have personal knowledge, could have talked with participants or eye-witnesses of the events. In either case the First Book of the Maccabees is one of the best sources known for the history of the Jews.

J. D. Michaelis held that Josephus used the Hebrew original of the book, which differed in some important particulars from the present text. Destinon ("Die Quellen des Josephus," 1882) revived this theory and endeavored to prove (pp. 80 *et seq.*) that ch. xiv.–xvi. were not contained in the edition used by Josephus. Destinon bases his argument on the fact that Josephus treats this portion very scantily in comparison with his treatment of the other material of the book, although these chapters contain quite as much and as interesting material. He has been followed by Wellhausen ("I. J. G." pp. 222 *et seq.*). But Torrey (in "Encyc. Bibl."), by utilizing the investigations of Mommsen, has shown that Josephus actually knew some of this material and introduced it at a later point in his work ("Ant." xiv. 8, § 5), in describing the history of Hyrcanus II. In all probability, therefore, the First Book of the Maccabees has retained its original form.

Bib. Lit.* xxii. 51–59.

II Maccabees: The Second Book of the Maccabees opens with two letters written by Jews resident in Palestine to brethren dwelling in Egypt. The first letter occupies ch. i. 1–10a; the second, ch. i. 10b–ii. 18. These letters, it is thought by some, formed no part of the original work. The preface is found in ch. ii. 19–32, and states that Jason of Cyrene had composed five books on the Maccabean revolt, which the writer undertakes to epitomize for his readers. Ch. iii. relates how the attempt of Heliodorus to plunder the Temple was miraculously thwarted; ch. iv. narrates the wickedness of the high priests Jason and Menelaus, and of Simon, the Temple overseer; ch. v., how Antiochus began the persecution of the Jews; ch. vi. and vii., the story of the martyrdom of Eleazar and the seven young men and their mother; while ch. viii.–xv. are occupied with the history of the wars of Judas Maccabeus.

Historical and Religious Character.

The time covered by this material is barely fifteen years, from the very end of the reign of Seleucus IV., whose servant was Heliodorus, to the victory of Judas over Nicanor (175–160 B.C.). The reason why the book terminates here is to be found in its aim, which was to set before the Jews of the Diaspora the importance of observing the two Maccabean feasts—the Feast of the Dedication and the Feast of Nicanor. In no other way, the writer believed, could they share in the glory and the fruits of the great struggle for liberty. The author is so intent on this that though he has lauded Judas as a splendid example of religious patriotism he passes in silence over his death. The writer further takes occasion often to impress upon his readers the sacred character of the Temple at Jerusalem, which the Diaspora might easily undervalue. In contrast with I Maccabees, the language of II Maccabees is highly religious. God appears as the great "Sovereign" who miraculously delivers His people (see iii. 24 and, perhaps, ii. 21). The author is a religious teacher (see iii. 1 *et seq.*, iv. 15–17, v. 17–20, *et al.*); he did not write for the sake of the history as such. This places his work in a very different class from that of I Maccabees. In the earlier part he supplies some welcome information not contained in I Maccabees, and in nearly every chapter are interesting facts—some of them confirmed by Josephus—which may, with caution, be used. But his purpose, style, and temperament are such that, since the time of Ewald, it has been recognized that the work is not a sober and restrained history like I Maccabees, but is rhetorical and bombastic.

One important fact to be noted is the writer's belief in the bodily resurrection of the dead (see vii. 9, 11, 14, 36; xiv. 16; and especially xii. 43–45). This, together with his attitude toward the priesthood as shown in his lifting the veil which I Maccabees had drawn over Jason and Menelaus, led Bertholdt and Geiger to regard the author as a Pharisee and the work as a Pharisaic party document. This much, at least, is true—the writer's sympathies were with the Pharisees. The author claims that he epitomized the work of Jason of Cyrene (ii. 23), which seems to have been his only source, unless he himself prefixed the two letters to his work. Jason is thought by Schürer (*l.c.* p. 212) to have compiled his work from hearsay shortly after 160 B.C. at Cyrene. If this is true, the work of Jason, like II Maccabees, concluded with the victory over Nicanor. There can be no doubt that both the work of Jason and that of his epitomizer (*i.e.*, the author of II Maccabees) were written in Greek, and that the latter was a Hellenistic Jew.

Sources.

There is a reference in ch. xv. 37 to the Book of Esther, which would preclude any earlier date of authorship than about 130 B.C. (see Cornill, "Einleitung," p. 252). On the other hand, II Maccabees was known to the author of the Epistle to the Hebrews (see Peak, in "The Century Bible," p. 223) and to Philo (see Schürer, *l.c.* p. 214). The work, therefore, must have been composed about the beginning of the common era.

The Letters.

The two letters prefixed to II Maccabees have excited much discussion. Some scholars regard them as the basis of the author's work, which he himself prefixed to it because they treat of the topics of which he wished to speak—the Temple at Jerusalem and the importance of observing its feasts. Others hold that the letters were placed in their present position by a later hand, while some believe them to be fabricated. There is in the letters nothing which is inconsistent with their belonging to the time from which they profess to come, and there seems to be no good reason for doubting that it was the epitomist himself who prefixed them to the book. For details see the works mentioned below.

III Maccabees: The Third Book of the Maccabees has in reality nothing to do either with the Maccabees or with their times. It received its name probably because it is a fiction concerning the persecution of the Jews by a foreign king; that king was Ptolemy Philopator (222–205 B.C.). The story runs as follows: After Ptolemy's defeat of Antiochus III. in 217 B.C., at the battle of Raphia, the former visited Jerusalem and tried to enter the Temple, but was miraculously prevented (i. 1–ii. 24). Returning to Alexandria, he assembled the Jews in the hippodrome to be massacred, but the necessity of writing down their names exhausted the paper in Egypt, so that they escaped (ii. 25–iv. 21). Next the king devised a plan for having the Jews trampled to death by elephants; this also was frustrated in various improbable ways (v. 1–vi. 21). The king then underwent a change of heart and bestowed great favor on the Jews, and the day on which this occurred was ever after celebrated as a festival in memory of the deliverance (vi. 22–vii. 23).

Authorship and Character.

The author of this fiction was certainly an Alexandrian Jew who wrote in Greek, for its style is even more rhetorical and bombastic than that of II Maccabees. The work begins abruptly and is thought to be but a fragment of a once larger whole. Whether there is any foundation for the story concerning Philopator with which the writer begins there is no means of knowing. If true, it is one of a very few grains of fact in the whole account. Josephus ("Contra Ap." ii. 5) tells how Ptolemy Physco (146–117 B.C.) cast the Jews of Alexandria, who, as adherents of Cleopatra, were his political opponents, to intoxicated elephants. When the elephants turned on his own people the king saw a sudden apparition and gave up his purpose. The Jews, it is added, celebrate the day of their deliverance. It would seem that the author of III Maccabees, anxious to connect this celebration with Jerusalem, has transferred it to an earlier Ptolemy and given it an entirely unhistorical setting. His narrative can not be regarded as a successful fiction, as it abounds in psychological as well as historical improbabilities.

This work was written later than II Maccabees, for its author made use of that book (see ii. 9; comp. II Macc. vi. 18 *et seq.* and xiv. 35 with III Macc. iii. 25–33; see also Grimm, *l.c.* p. 220). He can not have written earlier, therefore, than the end of the first century B.C. On the other hand, he can not have written later than the first century C.E. or his work would not have been used by Christians. Ewald regarded this work as a polemic against Caligula and dated it accordingly about 40 C.E.; this view has been abandoned by more recent writers, since Philopator is not represented as claiming divine honors.

IV Maccabees: The Fourth Book of the Maccabees, so called, is a semiphilosophic discourse, or sermon, on the "supremacy of the pious reason" (ch. i. 1). It consists of a prologue (i. 1–12) and of two principal parts. The first of these (i. 13–iii. 18) is devoted to the elucidation of the author's philosophical thesis, and the second (iii. 19–xviii. 24) to the illustration of the thesis by examples drawn from II Maccabees. In the latter portion of the work there is, first (iii. 19–iv. 26), a brief review of the sufferings of the Jews under Seleucus and his son (?) Antiochus Epiphanes; the conquering power of reason is illustrated (v. 1–vii. 23) by the example of Eleazar, drawn from II Macc. v. 18–31; by that of the seven brethren (vii. 24–xiv. 10), drawn from II Macc. vii. 1–23; and by that of their mother (xiv. 11–xvi. 25), taken from II Macc. vii. 25 *et seq.* In ch. xvii. and xviii. the author expresses his impressions with reference to these martyrdoms.

It appears, therefore, that the only connection this work has with the Maccabees is in the fact that the author's illustrations are drawn from the Second Book of the Maccabees.

Integrity and Character.

Ch. xviii. 3–24 has been thought by several scholars to be the work of a later hand, but the opinion does not appear to be well founded. Ch. xvii. 2 would form a weak ending to the book, while xviii. 20–24 suits well the style of the author of the earlier parts, and the apparent incongruity of xviii. 6–19 would seem to be designed in this hortatory composition to make a strong impression on its hearers. This latter view is strengthened if it be remembered that the work is throughout a discourse addressed directly to listeners (comp. i. 1, 7; ii. 13; xiii. 19; xviii. 1). Ewald and Freudenthal called it a sermon and held that it is an example of Alexandrian synagogue preaching, but this view is now abandoned, for even in the Diaspora the sermon of the synagogue was usually founded on a passage from the Bible. This discourse, also, is too abstruse for an ordinary congregation; it is an address to a more select circle.

Its style is oratorical and ornate, though not so extravagant as that of III Maccabees. It contains a large philosophic element of the Stoic type, though its author possessed a taste for philosophy rather than real philosophical insight. It contains also a core of Judaism. The writer was a Jew who could clothe his religion in a philosophic garb in accordance with the tendency of the times. The Hellenic and the Jewish elements in his work both appear at their best and in a combination almost without a parallel; the nearest example is the New Testament Epistle to the Hebrews.

Author and Date.

It is probable, therefore, that the author of IV Maccabees was an Alexandrian Jew. Eusebius ("Hist. Eccl." iii. 10) and Jerome ("De Viris Illustribus," xiii.) ascribe the work to Josephus—an opinion which was for a long time followed, and which has caused the text of IV Maccabees to be included in many editions of the works of Josephus. But the language and style of the work differ so radically from those of the writings of Josephus that it is clear that this is a mistaken opinion. Of some of its historical combinations, as in iv. 5 and v. 1, Josephus could hardly have been guilty. The writer of IV Maccabees had certainly come under the influence of the culture of Alexandria, even if he lived and wrote in some other city. As to the time when the book was written, the data for an opinion are the same as in the case of III Maccabees: it was written probably at the close of the last century B.C. or during the first century C.E., and before the time of Caligula, for the Jews seem to have been at peace at the time.

Eschatology.

The writer is a strong believer in immortality, but he has abandoned the Pharisaic standpoint of II Maccabees, which recognizes a bodily resurrection, and holds to the view that all souls exist forever, the good being together in a state of happiness (xvii. 18), with the Patriarchs (v. 37) and with God (ix. 8 and xvii. 18). These views are the more striking as they are entwined with the same narratives which in II Maccabees express the more materialistic view. The writer holds, also, that the suffering of the martyrs was vicarious; by it they wrought deliverance for their nation (comp. i. 11, xvii. 19–23, xviii. 24).

G. A. B.

I Maccabees.

II.[*] I Maccabees, now extant only in Greek, was originally composed in Hebrew or Aramaic, most probably the former; but the original can not have been long in circulation. The fragment of a Hebrew text of I Maccabees published by Chwolson (1896) and again by Schweizer (1901) is not part of the original; and it may well be that even Origen knew only an Aramaic translation and not the original. He calls (Eusebius, "Hist. Eccl." vi. 25) I Maccabees Σαρβηθ Σα(ρ)βαναιελ, a title which has given rise to much conjecture. Only two suggestions need be named: Derenbourg's ספר בית שר בני אל ("Book of the Family of the Chief of the People of God"), given in his "Essai sur l'Histoire et la Géographie de la Palestine" (p. 450, Paris, 1867), and Dalman's ספר בית חשמנאי, in his "Grammatik des Jüdisch-Palästinischen Aramäisch" (p. 6, Leipsic, 1894). Of the name "Maccabees" it may be mentioned that in a text of the Megillat Anteyukas ("J. Q. R." xi. 291 *et seq.*) the reading is מקנאי (="the zealot"), which would be very acceptable were it better attested.

As to the date of the book, much turns on the meaning of the last two verses. Some critics, indeed, doubt the authenticity of the whole of the last section (xiv. 16–xvi. 24), but the trend of opinion is in favor of the integrity of the book. Schürer and Niese (in "Kritik der Beiden Makkabäerbücher," Berlin, 1900) maintain that the last verses imply that I Maccabees was written after the death of John Hyrcanus (105 B.C.), but there is good reason for holding that the reference is to the beginning (135 B.C.) *and not to the end* of Hyrcanus' reign (see "J. Q. R." xiii. 512 *et seq.*).

Critics are practically unanimous in attaching great value to I Maccabees as a historical record. "On the whole, the book must be pronounced a work of the highest value, comparing favorably, in point of trustworthiness, with the best Greek and Roman histories" (Torrey). This is high praise; but it is fully deserved (comp. Schürer, "Gesch." iii. 141). Niese (*l.c.*) has done good service in vindicating the authenticity of Judas' embassy to Rome; and it is no peculiar demerit in I Maccabees that in the reports of the numbers engaged in battle, of speeches, and even of documents, its account is inexact and sometimes quite incredible. Such defects are shared by Thucydides and Livy. The substance, not the exact form, of documents was given by ancient historians. On the other hand, it differs somewhat from the Biblical histories in its standpoint. The divine element is not wanting, and success is ultimately traced (as in Mattathias' deathbed utterances) to God. Judas invariably sings psalms of thanksgiving for victory, and the key-note of the revolt is "Not unto us, O Lord, not unto us, but unto thy name give glory" (Ps. cxv. 1). The period also, as many hold, gave rise to numerous new psalms. But in I Maccabees, nevertheless, history is written from the human standpoint. Victory is earned by endeavor as well as bestowed by grace. Partly because of this phenomenon, it was urged by Geiger ("Urschrift," 1857, pp. 200-230) that one may detect a dynastic purpose in the book and that its author was a Sadducean apologist for the Hasmoneans.

---

[*] A second article on the Book of Maccabees is inserted as treating the subject from a Jewish standpoint.—J.

It is certainly true that the author is silent concerning the worst excesses of the (Sadducean) high priests, and attaches primary importance to the founder of the dynasty, Mattathias. Mattathias is unknown to II Maccabees, though the latter is supposed by Geiger to be a Pharisaic counterblast to the Sadducean I Maccabees. Yet, strangely enough, in the Pharisaic tradition of the Talmud and Synagogue Mattathias plays a large part, so large that Judas is thrown into the background.

On one important point some modern writers are unfair to the book. God is not "named" in it; the term "heaven" replaces the divine name. From this the inference has been drawn that "God was absolutely conceived as reigning in the remote heaven, and no longer as dwelling among the people by the Shekinah" (Fairweather and Black, "I Maccabees," Introduction, p. 47). This is as false an inference as would be a similar conclusion from the opening words of the Lord's Prayer, "Our Father who art in Heaven." God is not "named" throughout the Lord's Prayer. In I Maccabees the personal pronoun is most significantly used (iii. 22, 51; iv. 10, 55) with relation to the term "heaven"; and, more remarkable still, the pronoun is sometimes used (ii. 61) without any noun at all: "And thus consider ye from generation to generation, that none that put their trust in him shall want for strength." That there grew up a disinclination to "name" God is undoubted; but whatever the origin of this scrupulosity, it was not any sense of the remoteness of God (see discussion by Benjacob, "Im Namen Gottes," p. 164, Berlin, 1903). From the Maccabean period onward God becomes ever nearer to Israel. If there was a fault at all, it was not that God became too transcendent; the tendency was rather in the direction of overfamiliarity than of undue aloofness.

II Maccabees.

Unlike I Maccabees, the book known as II Maccabees was written in Greek. For the history of the war it is of less value than I Maccabees, though some recent writers (in particular Niese) have maintained the opposite opinion. It adds, however, important particulars regarding the events that led up to the Maccabean revolt. Besides this, II Maccabees, written quite independently of I Maccabees, is a strong support of the general truth of the familiar story of the revolt, though II Maccabees is embellished with angelical and miraculous ornament foreign to the first book. Its style is rhetorical, its purpose didactic. It emanated from Alexandria and was addressed to the Greek-speaking Jews of the Diaspora. It was designed to impress on them the unity of Judaism, the importance of Jerusalem as the center of religious life, and the duty of observing the two feasts of Ḥanukkah and Nicanor's Day (see Nicanor). That the book has a Pharisaic color is undoubted, but not in the sense of being a partizan pamphlet in reply to I Maccabees, which, indeed, the author of II Maccabees most probably did not know. Moreover, II Maccabees takes no account of Mattathias, nor, indeed, of any of the band of heroes except Judas; and this is not easily forced into evidence of Pharisaic partizanship. On the other hand, in II Macc. xiv. 6 Judas is represented as the leader of the Hasidæans, who have many points in common with the Pharisees, and from whom the Hasmoneans were soon alienated.

Of specifically non-Sadducean doctrines, II Maccabees has a very clear expression of belief in the resurrection. Death is a "short pain that bringeth everlasting life" (II Macc. vii. 36; comp. other passages in the same chapter and xiv. 46). Judas is represented (II Macc. xii. 43 *et seq.*) as making offerings for the dead because "he took thought of the resurrection." The reference to such offerings is, however, without parallel in Jewish literature, and nothing is otherwise known of such offerings being made at the Temple in Jerusalem (see Israel Lévi, "La Commemoration des Ames dans le Judaïsme," in "R. E. J." xxix. 48).

The book is usually held to belong to the latter part of the first century B.C.; Jason (of whose work it purports to be an epitome) wrote at least a century earlier. Niese places II Maccabees at the date 125-124 B.C., thus regarding it as older than, as well as superior to, I Maccabees. In this preference of the second to the first book, Niese stands practically alone, but he has done great service in vindicating the importance and value of the former (comp. also Sluys, "De Maccabæorum Libris I et II Quæstiones," Amsterdam, 1904). It remains to add that the authenticity of the letters prefixed to II Maccabees has been fiercely assailed. Yet it is coming to be recognized that the letters have a clear bearing on the design of the book, as explained above, and it is quite conceivable, though very improbable, that they were part of the original work of Jason. On these letters see, besides earlier literature, Herkenne, "Die Briefe zu Beginn des Zweiten Makkabäerbuchs," Freiburg, 1904.

One point remains. The martyrdoms described in II Maccabees, especially of the mother and her seven sons, have given the book undying value as an inspiration and encouragement to the faithful of all ages and creeds. As will be seen below (in connection with IV Maccabees), this feature of the Maccabean heroism made a special appeal to the Christianity of the first four centuries. "The figure of the martyr, as the Church knows it, dates from the persecution of Antiochus; all subsequent martyrologies derive from the Jewish books which recorded the sufferings of those who in that day were strong and did exploits" (E. Bevan, "House of Seleucus," 1902, ii. 175).

III Maccabees purports to record a persecution of the Jews in Alexandria during the reign of Ptolemy (IV.) Philopator (222-204 B.C.). The Jews are assembled in the hippodrome, and 500 infuriated elephants are to be let loose upon them. In the event the elephants turned against the persecutors, and the Jews not only escaped, but were treated with much honor by the king. That there is much of the fabulous in this story is obvious, and it may well be that the similar story told in Josephus ("Contra Ap." ii. 5) concerning Ptolemy (VII.) Physcon is, as most assume, the original of III Maccabees.

III Maccabees.

The book would thus belong at the latest to the first century C.E.; at the earliest to the last century B.C. Recently important new light has been thrown on the book by the discovery of early Jewish settlements in the Fayum. On independent gounds, the present writer ("J. Q. R." ix. 39) and Prof. A. Büchler ("Tobiaden und Oniaden," pp. 172 *et seq.*, Vienna, 1899) have put forward the theory that the book refers to a persecution in the Fayum. Certainly, the rapid transference of Jewish allegiance from Egyptian to Syrian hegemony about 200 B.C. finds its explanation if the Jews of Egypt were then undergoing persecution. That the author was an Alexandrian is unquestionable. On the other hand, Willrich ("Hermes," 1904, xxxix. 244) disputes the Fayum theory and supports the view that the book is best explained as referring to Caligula.

IV Maccabees.

The beautiful work known as IV Maccabees is a homily, not a history. As Freudenthal was the first to show, it is a sermon addressed to a Greek-speaking audience, and delivered probably on Ḥanukkah ("Die Flavius Josephus Beigelegte Schrift über die Herrschaft der Vernunft [IV Makkabäerbuch]," Breslau, 1869), the thesis being that, reason (religion) can control the passions; the author illustrates this from many examples, especially from the story of the Maccabean martyrdoms as related in II Macc. vi., vii. A very noble level of eloquence is reached by the writer, and the book is in many ways one of the best products of the syncretism of Hebraic and Greek thought.

The authorship of IV Maccabees was at one time ascribed (as by Eusebius, Jerome, and other authorities) to Josephus, but this is clearly wrong. Nothing can with definiteness be asserted as to the date of the book; it belongs probably to the period shortly before the fall of Jerusalem. In its present form it contains possibly some Christian interpolations (*e.g.*, vii. 19, xiii. 17, xvi. 25), but they are certainly very few and insignificant. Later on, Christian homilists used the same topic, the martyrdoms, as the theme for sermons; the Church maintained a Maccabean feast (though not on the same date as the Jews) for at least four centuries. Homilies by Gregory Nazienzen and Chrysostom for the festival of Aug. 1 (the "Birthday of the Maccabees") are extant on this subject. On the "Maccabees as Christian Saints" see Maas in "Monatsschrift," xliv. 145 *et seq.*

V Maccabees.

V Maccabees, so called by Cotton ("Five Books of Maccabees," 1832), is known also as the Arabic II Maccabees. It is included in the Paris and London Polyglots. It has clear relations to II Maccabees, the Arabic "Yosippus," and the Hebrew "Yosippon." Late in origin and without historical value, the book is, however, of considerable importance from other points of view.

J. I. A.

MACEDONIA: Country of southeastern Europe; now a part of the Turkish empire. It is the native country of Alexander the Great, who is, therefore, called "Alexander the Macedonian" in rabbinical writings. In Dan. xi. 30 the Macedonians are mentioned under the name "Kittim" (R. V.), and Eusebius and the Hebrew Josephus or Gorionides (Knobel, "Völkertafel," p. 103) use the same designation.

In the apocalyptic literature this kingdom is known as the "fourth beast" (Dan. vii. 7). The First Book of the Maccabees, which originally was written in Hebrew, also uses the word "Kittim" for Macedonians, and mentions Philip and Alexander (i. 1), as well as Philip III. and his illegitimate son Perseus (viii. 5), as kings of the Macedonians. Since the Greek Syrians style themselves "successors of Alexander," these Syrians also are called "Macedonians" (II Macc. viii. 20).

The Rabbis, whose acquaintance with Greek life was one acquired during the Macedonian era, identified the Hebrew "Yawan" (Javan) with Macedonia (Targ. Yer. to Gen. x. 2; Targ. of I Chron. i. 5; Yoma 10a; Gen. R. xxxvii. 1), and to them, as to Daniel, Macedonia represented the eschatological kingdom (Mek. to Ex. xx. 18; Targ. of I Sam. ii. 4); with them the expression "Javan" is interchangeable with "Macedonia." They mention, probably in a figurative sense, the "jaundice" of Macedonia (Targ. Yer. to Deut. xxviii. 22); also the gold from the same country (Targ. to Esth. viii. 15; 2d Targ. to Esth. vi. 10).

Many Macedonian idioms, it is claimed, are found in the Jewish-Hellenistic language, especially as it appears in the Septuagint (Swete, "Introduction to the O. T. in Greek," p. 291, Cambridge, 1900). Cities having Macedonian names were founded on Palestinian soil, such as Berœa, Dion, Pella. Certain weapons of the Macedonians are referred to by Josephus ("B. J." v. 11, § 3).

Many Jews must have lived in Macedonia, since Christian doctrines found a ready and early acceptance there. Paul visited the Macedonian regions on his second missionary journey (Acts xvi. 9; comp. I Cor. xvi. 5); his fellow workers Silas and Timothy labored there (Acts xvii. 14, xviii. 5). Paul visited it again on his third journey (Acts xx. 1; II Cor. i. 16, ii. 13, vii. 5), stopping in the cities Philippi, Thessalonica, and Berœa. Jewish inscriptions have been found in Thessalonica ("R. E. J." x. 78), and the presence of Jews in Macedonia is proved also by Agrippa's letter to Caligula (Philo, "Legatio ad Caium," § 36 [ed. Mangey, ii. 587]).

For an account of the Jews in Macedonia in modern times see TURKEY.

G. S. KR.

MACHADO: Name of a family of Maranos which appears to have emigrated to America from Lisbon. The name is met with in Mexico and the West Indies at a very early date. As early as 1600, during the course of the trial of Jorge de Almeida by the Inquisition in Mexico, **Isabel Machado** and her father, **Antonio Machado,** were charged with being Jews. **Abraham de Macado** is mentioned as a resident of Martinique in 1680, and **M. Machado** is known to have been a planter in Surinam, about 1690.

The most important family bearing the name in America is the one in New York. It is descended from **David Mendez Machado,** who went from Lisbon, as a refugee from the Inquisition, to England, where he joined the emigrants going to Georgia, arriving at Savannah in 1733. David Mendez Machado married Zipporah, daughter of Dr. Samuel Nuñez, one of the early settlers of Georgia, and shortly afterward left Savannah for New York; there, in 1734, he became ḥazzan of the Spanish and Portuguese congregation Shearith Israel, with which he remained until his death in 1753. **Aaron Machado,** presumably a brother, became a freeman in New York in 1739. David Mendez Machado had two children: **Rebecca,** born in New York, 1746, married at Philadelphia, in 1762, Jonas Phillips (see Phillips); and **Sarah,** married Mr. Moses of Charleston, S. C. Among the distinguished descendants of David Mendez Machado may be mentioned Commodore Uriah P. Levy, Henry M. Phillips, Jonas B. Phillips, Mordecai M. Noah, and N. Taylor Phillips.

Following is a family tree of the Machado family of New York :

MACHÆRUS: Mountain fortress in Peræa, on the boundary between Palestine and Arabia. Alexander Jannæus first built a fortification there (Josephus, "B. J." vii. 6, § 2). His wife Salome Alexandra turned over to the Sadducean party all the citadels with the exception of Hyrcania, Alexandrium, and Machærus (Josephus, "Ant." xiii. 16, § 3), where the Hasmoneans had their treasures. Gabinius advanced upon Machærus; Alexander surrendered, and the fortification was razed to the ground by the former ("Ant." xiv. 5, §§ 2, 4). Shortly afterward Aristobulus fortified himself there, and Gabinius captured the position again after a siege of two days ("B. J." i. 8, § 6). Herod restored it as a frontier fort against the Arabs, founded a walled city there, and built towers, turning the whole mountain-top into a fortification. In the middle of the fortified space he built a splendid palace ("B. J." vii. 6, § 2). According to Pliny ("Historia Naturalis," v. 16, § 72), it was, next to Jerusalem, the strongest fortress in Palestine. In the war against the Romans it was occupied by Jews after the Roman garrison had retired from it ("B. J." *l.c.*).

Not till two years after the fall of Jerusalem did Lucilius Bassus advance upon Machærus with a Roman army. The fort was defended by a heroic youth called Eleazar; he fell into the hands of the Romans and was to have been crucified; but the Jews, to save him, surrendered the city on condition that they be allowed a safe retreat. The Romans, however, broke their word; about 1,700 men were killed, and the women and children were sold as slaves; 3,000 Zealots who had joined the fugitives from Machærus were killed in a bloody battle near the Jordan (*ib.* vii. 6, §§ 1-6).

Several wonderful features of Josephus' narrative can be explained through Talmudic accounts. According to Josephus, in the Herodian palace was a rue which grew as high as a fig-tree ("B. J." vii. 6, § 2); with this statement should be compared Yer. Peah vii. 4 and Ket. 111b (see Winer, "B. R." *s.v.* "Senf"). Josephus says that from two hills in the vicinity flowed two springs, one warm and the other cold, and that together they afforded an agreeable and healthful bath; allusion is made to these hills in the Talmud also when it declares that the goats in the mountains of Machærus grew fat upon the odors from the Temple (Tamid 30; Yoma 39b), meaning probably odors from the mountain of Machærus itself, which was used as a signal-fire station for the announcement of New Moon (R. H. 23b; Tosef., R. H. ii. 2).

The spelling of the name Machærus varies in the rabbinical writings between מכוור and מכבר, also מכאוור; it was pronounced "Mekhawar" (comp. Μαχαβέρως, "Machaveros" in writings of the Middle Ages). Accordingly, Μαχαιροῦς in Josephus is probably only a Greek form of the Semitic name, and is not connected with *μαχαίρα* (= "knife"). Strabo (xvi. 2, § 40) and Stephen of Byzantium also mention the place. John the Baptist is said to have been killed at Machærus ("Ant." xviii. 5, § 2). It is identified with the present Mukaur, east of the Dead Sea (Raumer, "Palästina," p. 264; Brann, in "Monatsschrift," 1873, p. 345).

MACHIM, MASAHOD COHEN: Moorish envoy to England, in 1813, from Mulai Sulaiman, Emperor of Morocco (1794-1822), in whose reign Christian slavery was abolished in Morocco. His son **Meïr Cohen Machim** visited England in the same capacity in 1827.

J. I. Co.

MACHIR: 1. The first-born son of Manasseh (Josh. xvii. 1; I Chron. vii. 14); founder of the most important or dominant branch of the tribe of Manasseh. His importance is shown by the collocation of Ephraim and Machir (instead of Manasseh) in Deborah's Song (Judges v. 14), which seems to imply that the whole tribe was once known by his name. This is confirmed by the statement that Machir was the only son of Manasseh (Num. xxvi. 29). In Gen. l. 23 the children of Machir are said to have been "born upon Joseph's knees" (R. V.), that is, they were adopted by Joseph (Gunkel, "Genesis," p. 442; Stade's "Zeitschrift," 1886, pp. 145 *et seq.*).

Machir removed to the east of the Jordan, conquered Gilead (Num. xxxii. 39, 40; Deut. iii. 15), and added Bashan to his territory. Hence Machir is spoken of as the father of Gilead (I Chron. ii. 21, 23; vii. 14; Num. xxvi. 29), and Gilead is called the son of Machir (Num. xxvii. 36; Josh. xvii. 3; I Chron. vii. 17). The conquest of Gilead is generally regarded as made not during the first invasion of the lands east of the Jordan, but subsequently by a reflex movement from western Palestine.

The Midrash (Num. R. xiv. 19) mentions three sons of Machir, for whom the three whole offerings referred to in Num. vii. 57 were brought by the chief of the tribe of Manasseh. These sons inherited the possessions of their brother Jair, who died childless.

2. Son of Ammiel, who had an estate at Lo-debar, east of the Jordan, not far from Mahanaim (II Sam. ix. 4 *et seq.*, xvii. 27). He remained faithful to the house of Saul, giving refuge to the son of Jonathan, Merib-baal, or Mephibosheth. Later, however, he showed his loyalty to David by supplying his army at Mahanaim during the rebellion of Absalom (Smith, "Samuel," pp. 310, 356, New York, 1900).

J. E. I. N.

MACHIR: A Babylonian scholar who settled in Narbonne, France, at the end of the eighth century and whose descendants were for many generations the leaders of that important community. According to a tradition preserved by Abraham ibn Daud in his "Sefer ha-Ḳabbalah," Machir was a descendant of the house of David. He was sent to Narbonne by the calif Harun al-Rashid at the request of Charlemagne, who, it is said, received the Babylonian scholar with great honor, conferred upon him and his descendants the title of "king of the Jews," and gave him a section of the city of Narbonne. Although this relation between Machir and Charlemagne is probably legendary, it is a fact that the Machir family enjoyed for centuries many privileges and that its members bore the title of "nasi" (prince). Benjamin of Tudela, who visited Narbonne in 1165, speaks of the exalted position occupied by the descendants of Machir, and the "Royal Letters" of 1364 (Doat Collection, pp. 53 *et seq.*, 339-353) also record the existence of a Jewish "king" at Narbonne. The place of residence of the Machir family at Narbonne was designated in official documents as "Cortada Regis Judæorum" (Saige, "Hist. des Juifs du Languedoc," p. 44). Machir is said to have founded a Talmudical school there which vied in greatness with those of Babylonia and which attracted pupils from many distant points.

E. C. I. Br.

MACHIR BEN ABBA MARI: Author of a work entitled "Yalḳuṭ ha-Makiri," but about whom not even the country or the period in which he lived is known. Steinschneider ("Jewish Literature," p. 143) supposes that Machir lived in Provence; but the question of his date remains a subject of discussion among modern scholars. The work itself is similar in its contents to the "Yalḳuṭ Shim'oni," with the difference that while the latter covers the whole Bible, Machir extended his compilation of Talmudic and midrashic sentences only to the books of Isaiah, Jeremiah, Ezekiel, the twelve Minor Prophets, Psalms, Proverbs, and Job. In the introductions, apparently very similar, to these books, Machir gives the reason which induced him to undertake such a work: he desired to gather the scattered haggadic sentences into one group. He seems to have thought it unnecessary to do the same thing for the Pentateuch and the Five Scrolls, as it had been done already, to a certain extent, in the Midrash Rabbah; but it may be concluded that Machir intended to make such a compilation on the earlier prophetical books also. From his introduction to the part on Isaiah it would seem that he began with Psalms and finished with Isaiah, though in his introduction to the part on the Psalms he mentions the other parts.

Machir used the following sources in his compilation: the two Talmuds, the Tosefta, the minor treatises, the Sifra, the Sifre, the Pesiḳta, Midrash Rabbah on the Pentateuch, Midrash Ḳohelet, Midrash Tehillim, Midrash Mishle, Midrash Iyyob, Midrash Tanḥuma, a Midrash quoted as דשחנו״ע, Pirḳe Rabbi Eli'ezer, Seder 'Olam, and Haggadat Shir ha-Shirim, frequently quoting the last-named Midrash in the part on Isaiah. Machir had another version of Deuteronomy Rabbah, of which only the part on the section "Debarim" exists now (comp. S. Buber, "Liḳḳuṭim mi-Midrash Eleh ha-Debarim Zuṭa," Introduction). It is difficult to ascertain whether Machir knew of the Midrash Yelammedenu; he quotes only Midrash Tanḥuma, but the passages which he cites are not found in the present text of that work, so that it is possible that he took these passages from the Yelammedenu.

Only the following parts of the "Yalḳuṭ ha-Makiri" are extant: Isaiah, published by I. Spira (Berlin, 1894; comp. Israel Lévi in "R. E. J." xxviii. 300) from a Leyden manuscript; Psalms, published by S. Buber (Berdychev, 1899) from two manuscripts (one, previously in the possession of Joseph b. Solomon of Vyazhin, was used by David Luria, and its introduction was published by M. Straschun in Fuenn's "Ḳiryah Ne'emanah," p. 304; the other is MS. No. 167 in the Bodleian Library); the twelve Minor Prophets (Brit. Mus., Harleian MSS., No. 5704); Proverbs, extant in a MS. which is in the possession of Grünhut ("Zeit. für Hebr. Bibl." 1900, p. 41), and which was seen by Azulai ("Shem ha-Gedolim," ii., *s.v.* "Yalḳuṭ ha-Makiri").

Gaster ("R. E. J." xxv. 43 *et seq.*) attached great importance to Machir's work, thinking that it was older than the "Yalḳuṭ Shim'oni," the second part of which at least Gaster concluded was a bad adaptation from the "Yalḳuṭ ha-Makiri." Gaster's conclusions, however, were contested by A. Epstein ("R. E. J." xxvi. 75 *et seq.*), who declares that Machir's "Yalḳuṭ" is both inferior and later than the "Yalḳuṭ Shim'oni." Buber conclusively proved, in the introduction to his edition of the "Yalḳuṭ ha-Makiri," that the two works are independent of each other, that Machir lived later than the author of the "Yalḳuṭ Shim'oni," and that he had not seen the latter work. Poznanski thinks that Machir lived in the fourteenth century.

Bibliography: Poznanski, in *R. E. J.* xl. 282 *et seq.*, and the sources mentioned above.

MACHIR BEN JUDAH: French scholar of the tenth and eleventh centuries; born at Metz; brother of Gershom Me'or ha-Golah. He is known by his dictionary entitled "Alfa Beta de-R. Makir," not extant, but quoted often by Rashi, RaSHBaM, Eliezer b. Nathan, Jacob Tam, and other tosafists. As the title indicates, the dictionary was arranged in alphabetical order, and from the many quotations by Rashi in his commentary on the Talmud (Ḥul. 20b; Pes. 50a *et passim*) it seems that it dealt chiefly with the difficult words and passages of the Talmud; but (by Rashi) he is quoted also for the interpretation of the word "boṭnim," in Gen. xliii. 11. Machir adopted for the most part the interpretations of his brother, who was Nathan ben Jehiel's teacher. Still he sometimes differed from his brother in the interpretation of words, and in such cases Nathan often adopted the opinion of Machir (comp. Jacob Tam, "Sefer ha-Yashar," p. 58b), though he never quotes him in his "'Aruk." The quotations from Machir by Rashi and the other rabbis mentioned above were collected by Solomon L. Rapoport in his biography of Nathan b. Jehiel ("Bikkure ha-'Ittim," x. 8, xi. 82).

MACHLUP, ADOLF: Hungarian merchant and philanthropist; born at Eisenstadt in 1833; died at Budapest Jan. 1, 1895. He studied at Budapest, and at the Polytechnic School in Vienna, and took part in the revolutionary movement of 1848. In 1867 he and his brother Eduard built at Budapest the first leather-factory in Hungary, and in 1868 the first factory for stearin candles and soap. Both these enterprises did much to advance Hungarian industry and trade. Machlup left large sums to many Jewish as well as non-Jewish societies, including a bequest of 200,000 gulden to found a nonsectarian Home for Convalescents in the city of Budapest.

S. L. V.

MACHORRO (מאגורו; spelled also **Machorre, Maczoro, Magoro**): Name of a family of Sephardim that flourished in Brazil, Germany, Holland, Hungary, and Italy. Thirteen persons bearing the name are buried in Altona, the earliest epitaph being dated 1620 and the latest 1782. A Jac[ob] de Dan[iel] Machorre was one of the contributors to an album which contained the autographs and verses of thousands of persons who had inspected Prof. D. Mill's model of the Temple of Solomon at Utrecht (*c.* 1748–57). Mention is made of a Maczoro, in Temesvar, Hungary, in 1772 **Abraham, Moses,** and **Solomon Machorro** flourished at Amsterdam about the middle of the seventeenth century. The first two were members of the society Temime Derek. Abraham is highly praised by De Barrios as one skilled equally in the use of the flute and of the pen. **Elijah Machorro,** a kinsman of Abraham Machorro, lived in Brazil about the same time. **Moses ben Daniel Machorro** was rabbi in Venice about 1693. One of his decisions with reference to the cutting of the hair on the "middle days" of the festivals ("ḥol ha-mo'ed") is published in Moses Ḥagiz' "Leḳeṭ ha-Ḳemaḥ," on Yoreh De'ah (pp. 31–32, Amsterdam, 1706; see Beard). A Portuguese version of this responsum, not known to bibliographers, seems to have been circulated in Amsterdam about 1704 (comp. "Catalogue Cardozo," p. 75, Amsterdam, 1870). It is well worth mention that one of the numerous Maranos figuring in the trial of Gabriel de Granada in Mexico (1642–45) was named Juan Pacheco de Leon, alias Solomon Machorro ("Publications Am. Jew. Hist. Soc." No. 7, p. 3).

A. G. A. K.

MACHPELAH.—Biblical and Post-Biblical Data: Name of a field and cave bought by Abraham as a burying-place. The meaning of the name, which always occurs with the definite article, is not clear; according to the Targumim and the Septuagint it means "the double," while Gesenius ("Th."), with more reason, connects it with the Ethiopic for "the portion." It appears to have been situated near Mamre, or Hebron, and to have belonged to Ephron the Hittite. Abraham needed a burying-place for Sarah, and bought the field of the Machpelah, at the end of which was a cave, paying four hundred silver shekels. The cave became the family burying-place, Sarah being the first to be buried there; later, Abraham, Isaac, Rebekah, Leah, and Jacob were placed there (Gen. xxiii. 9, 16–20; xxv. 9; xlix. 30–31; l. 13). It is designated twice only as the "cave" of the Machpelah (Gen. xxiii. 9, xxv. 9); in the other instances it is called "the cave of the field of the Machpelah" or "the cave in the field of the Machpelah." No further reference is made to it or to the burying-place of the Patriarchs, though some scholars find an allusion to it in II Sam. xv. 7, 9.

Josephus speaks of the purchase of Ephron's field at Hebron by Abraham as a place of burial and of the tombs (Μνημεῖα) built there by Abraham and his descendants, without, however, mentioning the name "Machpelah" ("Ant." i. 14, 22). In the twelfth century the cave of the Machpelah began to attract visitors and pilgrims, and this aroused the curiosity and wonder of the natives. Benjamin of Tudela relates: "At Hebron there is a large place of worship called 'St. Abraham,' which was previously a Jewish synagogue. The natives erected there six sepulchers, which they tell foreigners are those of the Patriarchs and their wives, demanding money as a condition of seeing them. If a Jew gives an additional fee to the keeper of the cave, an iron door which dates from the time of our forefathers opens, and the visitor descends with a lighted candle. He crosses two empty caves, and in the third sees six tombs, on which the names of the three Patriarchs and their wives are inscribed in

Hebrew characters. The cave is filled with barrels containing bones of people, which are taken there as to a sacred place. At the end of the field of the Machpelah stands Abraham's house with a spring in front of it" ("Itinerary," ed. Asher, pp. 40-42, Hebr.). Samuel b. Samson visited the cave in 1210; he says that the visitor must descend by twenty-four steps in a passageway so narrow that the rock touches him on either hand ("Pal. Explor. Fund," Quarterly Statement, 1882, p. 212). Now the cave is concealed by a mosque; this was formerly a church, built by the Crusaders between 1167 and 1187 and restored by the Arabs (comp. Stanley, "Sinai and Palestine," p. 149). See Hebron.

E. G. H. M. Sel.

Tomb of Adam and Eve.

——**In Rabbinical Literature:** The name of "Machpelah" (= "the doubled one") belongs, according to the Rabbis, to the cave alone, their reasons for the name being various: it was a double cave, with two stories (Rab); it contained pairs of tombs (Samuel); it had a double value in the eyes of people who saw it; any one buried there could expect a double reward in the future world; when God buried Adam there He had to fold him together (Abahu; 'Er. 53a; Gen. R. lviii. 10). Adam and Eve were the first pair buried there, and therefore Hebron, where the cave was situated, bore the additional name of "Kirjath-arba" (= "the city of four"; *i.e.*, of the tombs of Adam and Eve, Abraham and Sarah, Isaac and Rebekah, Jacob and Leah ('Er. 53a; Soṭah 13a; comp. Gen. R. lviii. 4).

According to Pirḳe R. El. xxxvi., the cave of Machpelah was at Jebus, and the reason that induced Abraham to buy it was the following: When Abraham went to fetch the calf for his guests (comp. Gen. xviii. 7) it escaped to the cave of Machpelah. Abraham ran after it, and when he entered the cave he saw Adam and Eve lying in their beds as though they were sleeping, while lighted candles were around them, exhaling a fragrant odor. Abraham, filled with a desire to possess the cave, determined to buy it at any price. The Jebusites, however, refused to sell it to him until he had sworn that when his descendants conquered the land of Canaan they would spare the city of Jebus (Jerusalem). Abraham accordingly took the oath, and the Jebusites inscribed it on brazen idols which they placed in the markets of the city. This was the reason why the children of Benjamin did not drive out the inhabitants of Jebus (Judges i. 21). Abraham secured his purchase of the cave of Machpelah by a formal deed signed by four witnesses: Amigal, son of Abishua the Hittite; Elihoreph, son of Ashunah the Hivite; 'Iddon, son of Ahira the Gardite; Aḳdul, son of 'Abudish the Zidonite ("Sefer ha-Yashar," section "Ḥayye Sarah," p. 37a, Leghorn, 1870).

Title-Deeds.

After Isaac's death, Jacob, desirous of becoming sole owner of the cave of Machpelah, acquired Esau's part of it in exchange for all the riches left him by his father. This sale was also ratified by a document, which Jacob put in an earthen vessel to preserve it from decay (*ib.* section "Wayesheb," p. 77b). Nevertheless, at the burial of Jacob the cave was the subject of a violent dispute between Jacob's children and Esau. The latter opposed the burial of Jacob in the cave on the ground that there was room only for four pairs, and that Jacob, by burying Leah, had filled up his part. Naphtali returned to Egypt for the title-deed, but meanwhile Hushim, the son of Dan, struck Esau on the head with a stick so that the latter's eyes fell on Jacob's knees (Soṭah *l.c.*; comp. "Sefer ha-Yashar," *l.c.* pp. 97a-98a, where it is said that Hushim cut off Esau's head, which was buried on the spot). There is another tradition, to the effect that Esau was slain by Judah in the cave of Machpelah at Isaac's burial (Midr. Teh. xviii.; Yalḳ., Gen. 162).

MADAI. See Media.

MADRID: Capital of Spain. Jews lived there as early as the twelfth century. By the old municipal law ("Fuero de Madrid") they were given the same privileges as the other inhabitants, with the one exception that Christian butchers were forbidden to sell "carne trefa" (meat which the ritual laws forbid Jews to eat), or any other flesh of animals slaughtered by Jews, under penalty of a fine of 10 maravedis or of imprisonment. A certain Yuçaf de Don Salomon Aben Çahal (Sahal) in Madrid, in the year 1336, sold a vineyard belonging to him situated in Ensiniella, near Madrid, to Garcia de Canillas; the deed, bearing the date of March 21, 1336, signed by Leon Çag(Isaac) Çaragoçi as witness, is printed in the "Boletin de la Real Academia de la Historia" (x. 160). In the years 1343 and 1369 Jews were living in villages in the neighborhood of Madrid—Parla, Torrejon de Vedasco, Polvoranca, Alcavendas, Barajas, and Coveña. Undoubtedly they were numerically insignificant, for in the year 1474 the taxes of the Jews in Madrid, Ciempozuelos, Pinto, Barajas, and Torrejon de Vedasco amounted to only 1,200 maravedis. In the year 1384 the monastery of S. Domingo in Madrid received from King John I. an annuity of 3,000 maravedis, payable from the taxes of the Jews.

As was the case with the Jews in the remainder of Castile in 1391, of those in Madrid some were plundered and murdered and others were forcibly baptized. The city council, as in Valencia, demanded the punishment of the rioters and their leaders; some were captured, and others, among them Ruy Sanchez de Urosco, Lope Fernandez and Diego de Vargas, and Ruy Garcia de la Torre, took to flight; the government empowered the council to confiscate the property of those found guilty. The destruction of the Jewry in Madrid inflicted great loss upon the monastery of S. Domingo. The Jewry was situated in the Calle de la Fé, in the immediate vicinity of Las Damas street and next to the S. Laurencia Church; this street contained the synagogue, and until 1492 was known as "Synagogue street." After 1391 the Jewry was rebuilt. By an order of Ferdinand and Isabella of May 28, 1480, it was surrounded by a wall, the gates of which were locked at dusk.

Several Jewish physicians lived in Madrid. One of them, Rabbi Jacob, was privileged (Nov. 9, 1481) to live outside the Jewry, so that he might visit his patients at night unhindered. As physicians or surgeons there were appointed by the council, in 1481 and 1489, Don Juda and his son Maestre Zulema (Salomon) and Rabbi Jacob (probably the one already mentioned) and his son Rabbi Joseph. The Jews were compelled to take part in the public church festivals. At one of these festivals, held on June 22, 1480, both the Jews and the Moors in Madrid were compelled to give an exhibition of the dancing peculiar to their respective races.

Since 1869 Jews have again begun to live in Madrid, going there from Tunis, Mogador, Lisbon, Alexandria, and from various cities in France and elsewhere—about twenty families in all. They have not formed a congregation nor consecrated a cemetery; but they hold services on New-Year and on the Day of Atonement in a private house.

G. M. K.

MAFṬIR: 1. The reader of the concluding portion of the Pentateuchal section on Sabbaths and holy days in the synagogue. On regular Sabbaths that portion forms a part of the section read by the seventh reader, and is repeated by the one appointed to read the Hafṭarah. For special Sabbaths and holy days the mafṭir reads a separate Pentateuchal portion bearing on the occasion. Such was the custom established by Rashi and his teachers. But the general custom of the congregations in France was that the mafṭir on such occasions recited the last portion of the regular lesson besides reading the special one (Meg. 23a). All congregations have since accepted the decision of Rashi. The mafṭir is not counted in the quorum of readers, which must not be less than seven on Sabbaths or than five on holy days. Since the mafṭir repeats but a few sentences and is not counted in the necessary quorum, it was held that he received somewhat less honor than the other readers, and therefore he was compensated in Talmudic times by being granted the privilege of reading the "Shema'" and the "'Amidah" on the same day (Meg. iv. 6, 24a).

2. The reader of the Hafṭarah. He should not begin to read the Hafṭarah unless he has previously read a portion of the Torah (Meg. 23a); nor should he read the Hafṭarah until the scroll is rolled up (Soṭah 39b). The text of the Hafṭarah must not be less than twenty-one verses in the books of the Prophets, three verses being thus allowed for each of the seven readers of the Torah (Meg. 23a). The benedictions recited by the mafṭir (other than the two for the reading of the Pentateuchal portion) are five—one before and four after the Hafṭarah; they are mentioned in Soferim xiii. 9. The first benediction begins with "Praised be the Lord, . . . who chose goodly prophets and approved their words spoken in truth"; the end of the second benediction reads, "who is faithful in all His words"; the third ends with "who is building Jerusalem"; the fourth with "the shield of David"; the fifth with "who sanctified the Sabbath" (or "the holy days"). Maimonides copied the older version reading "building Jerusalem"; but R. Abraham ben David amends this to "who maketh Zion joyful through her children," which version has since been retained.

The reading of the Hafṭarah is generally reserved for a bar miẓwah, or for a bridegroom on the Sabbath before his marriage. On Shebu'ot, after the first benediction and before the Hafṭarah, the mafṭir recites a poem beginning "Yeẓib pitgam."

3. Sometimes, the usher or sexton whose duty it was to watch at the conclusion of the prayer-service at the synagogue and to gather and usher in the students in the bet ha-midrash. 'Awira Shammai was a mafṭir for the yeshibah of the "great teacher" (perhaps Judah ha-Nasi I.; Ḥul. 51a). See Bar Miẓwah; Hafṭarah; Law, Reading from the.

MAGAZIN FÜR DIE WISSENSCHAFT DES JUDENTHUMS: Journal founded by Dr. Abraham Berliner Jan. 1, 1874. It appeared first as a bimonthly, in quarto form, under the title "Magazin für Jüdische Geschichte und Literatur," and contained a series of articles by Berliner on Hebrew manuscripts in the Italian libraries, besides studies in the history of Jewish culture, criticisms of new publications, extracts from midrashim, etc. Many of the most prominent Jewish scholars were contributors, and the success of the magazine justified Berliner in enlarging its scope. With its third volume (1876) it was changed to an octavo quarterly in order that lengthier and more strictly scientific articles (exegetical, philological, historical) might be admitted, its title became "Magazin für die Wissenschaft des Judenthums," a special Hebrew supplement ("'Oẓar Ṭob") was added to contain principally material from unpublished Hebrew manuscripts, and Dr. David Hoffmann became associated in the editorship. The excellence of the contributions, including many by the editors and by such scholars as Steinschneider, D. Kaufmann, D. Oppenheim, M. Wolff, Harkavy, A. Epstein, and Bacher, was maintained for twenty years, when pressure of other duties compelled the editors to suspend publication (1893).

MAGDALA: Town in Palestine in the province of Galilee; probably the birthplace of Mary Magdalene. There is a Talmudic sentence which declares that Magdala was destroyed (by the Romans) on account of its immorality (Lam. R. ii. 2). Jesus once went to Magdala by ship on the Sea of Gennesaret (Matt. xv. 39; even if the reading *Μαγαδάν* [= *Μαγαδάλ*] be accepted in place of *Μαγδαλά*, it must be inferred that Magdala is meant). Because he made the journey by boat some have held that the town was on the eastern shore of the sea; such a conclusion is not necessary, however, and Magdala was more probably on the western shore, perhaps the present Al-majdal, a small village an hour and a quarter north of Tiberias.

Rabbinical accounts are clear only in indicating Magdala as situated near Tiberias. In Tosef., 'Er. vi. 13 (ed. Zuckermandel, p. 145; comp. Yer. 'Er. v. 22d, where the description is more detailed and accurate), it is true, Tiberias is placed near Gadara also, which latter place is known to have been situated east of the Jordan. But the proximity to Tiberias is noted also in Yer. Ma'as iii. 50c; and

Simeon ben Laḳish, who had a quarrel with the patriarch, fled to Magdala from the neighboring Tiberias (Yer. Sanh. ii. 19d; Hor. iii. 47a). There were in Magdala a seminary or a synagogue, and a school for children (Eccl. R. x. 8). In several passages in the Talmud and Midrash "Magdala" occurs as a variant of "Migdal Ẓabba'aya" (tower of the dyers). Neubauer is consequently of the opinion that the latter as well as other names compounded with "Migdal" refers to a quarter in the town of Magdala; but this is not the case. Only so much is certain, that a few teachers of the Law were born in Magdala—*e.g.*, R. Isaac (B. M. 25a) and Yudan (Yer. Ber. ix. 14a; Ta'an. i. 64b). In the Talmud besides the usual Aramaic name "Magdala" the Hebrew form "Migdol" occasionally occurs (*e.g.*, Tosef. 'Er. vi. 13). This is without significance, however, as is shown by the fact that the Biblical "Migdol" is regularly rendered by the Septuagint as *Μάγδωλος* (*e.g.*, in Num. xxxiii. 7).

MAGDEBURG: Capital of the Prussian province of Saxony; situated on the Elbe. It has a population of 229,633, of whom about 2,000 are Jews. There were Jews at Magdeburg as early as the tenth century. The district occupied by them lay without the city and was called "Judendorf zu Magdeburg" (Hagedorn, in "Geschichtsblätter für Stadt und Land Magdeburg," xx. 93). Politically as well as geographically they belonged to the archbishopric of Magdeburg rather than to the town; probably they never lived within the city itself. The first inflow of Jews to Magdeburg is supposed to have been from the Rhine district, but the date when this took place is unknown. The earliest mention of them there occurs in a document of Otto the Great, dated July 9, 965, in which the "Jews and other traders" living in the city are placed under the exclusive control and jurisdiction of the Archbishop of Magdeburg (Aronius, "Regesten zur Gesch. der Juden in Deutschland," p. 55). The way in which Jews are described in this and in a similar document of Otto II. dated June 4, 973 (Aronius, *l.c.* p. 56), justifies the inference that even at that period they formed a community of fair size and were of such importance commercially that they contributed materially to the prosperity of Magdeburg. If Westberg's view is correct that the word "Maznbrgh," found in an Arabic source, is a corruption of "Magdeburg," it was there that the Judæo-Arabic traveler Ibrahim ibn Ya'ḳub "the Israelite" appeared in 965 at the court of Otto the Great, perhaps as a member of an embassy from Cordova, and obtained from the emperor valuable information concerning the Slavs, which he used in the account of his travels, written in Arabic.

Under the Archbishop.

Early Middle Ages.

Judendorf Destroyed 1213.

The history of the Jews in Magdeburg in the succeeding centuries resembles in all respects the record of other Jewish communities in Germany during the Middle Ages. It may be inferred that they were prosperous from the fact that many Jews of Magdeburg accompanied the funeral procession of Archbishop Walthard in 1012 and manifested their grief in lamentations (see Aronius, *l.c.* p. 61). On the other hand, the First Crusade (1096) is said to have caused the expulsion of the Jews from the Judendorf (Aronius, *l.c.* p. 93; comp. p. 111). In a communication from Pope Innocent III. to the clergy of the archbishopric of Magdeburg, dated Dec. 31, 1199, in which they are urged to come to the assistance of the Christians in the Orient, there is the provision that the secular arm shall compel the Jews to release their Christian debtors from paying interest and that, until they shall have done so, they shall not be permitted to have any intercourse with Christians (Aronius, *l.c.* p. 155). How far this regulation was observed is unknown. Archbishop Albrecht of Magdeburg, although friendly to the Jews, could not prevent the destruction of the Judendorf in 1213 by the troops of Otto IV. (A. Levy, "Gesch. der Juden in Sachsen," p. 8, Berlin, 1900). In 1261, on the Feast of Tabernacles of that year, when Jews from other cities were in the Judendorf, Archbishop Robert, finding it necessary to refill his empty coffers, seized their money and valuables, and held the richest of them for high ransoms. He seems to have done the same at Halle; no less than 100,000 silver marks are said to have been extorted from the Jews of the two cities (Aronius, *l.c.* p. 281; M. Spanier, "Zur Gesch. der Juden in Magdeburg," in "Zeitschrift für die Gesch. der Juden in Deutschland," v. 273). His successor as archbishop, Conrad of Sternberg, was unfriendly to the Jews on religious grounds.

Persecutions, 1301 and 1348.

The religious fanaticism awakened by the Crusades and the desire of the cities for independence found vent at this time in wholesale persecutions of the Jews. When in 1301 a Christian girl from the Judendorf circulated the rumor that the Jews had nailed an image of Jesus to a cross, recrucifying him in effigy, the citizens fell upon the ghetto, plundered it, and killed some Jews and drove others away. A document of 1312 has been preserved, according to which the Jews bought four fields for the extension of their cemetery. At the time of the Black Death (1348) the citizens and peasants of the vicinity again fell upon the Judendorf, pillaged it, and burned many Jews in their houses. This time, however, Archbishop Otto and the magistrate Von Vorn took the Jews under their protection, so that the uprising gained little headway, although during it the rabbi of the community, Rabbi Shalom, died the death of a martyr (see Salfeld, "Martyrologium," p. 247; comp. p. 284). A tombstone in the old Jewish cemetery also names a martyr, Samuel, of the year 1356. Between 1361 and 1367 Archbishop Dietrich employed a Jewish court banker, Schmoll or Shemuel. In 1385, according to a document, the cemetery was again enlarged. This fact, together with the names mentioned in this record, justifies the conclusion that the community was growing considerably at that time through additions from other cities.

In 1410 Archbishop Günther issued a patent to the Jews of Magdeburg, assuring them of his protection for six years, in return for which they were to pay a tax of 40 silver marks in half-yearly payments. This patent, however, which contains benevolent provisions regarding the legal status of the Jewish community, was not meant seriously, for in the following year Günther would have extorted money from the Judendorf had not the citizens of Magdeburg frustrated his design lest they should lose the securities they had deposited with the Jews. When Ernst von Sachsen entered the city as archbishop in the year 1476, the Jews also did homage to him; but in 1492 the archbishop, yielding to the inflamed passions of the citizens and the clergy, decreed the banishment of the Jews from Magdeburg on account of an unimportant altercation between two Jews and two monks. The edict was enforced nine months later after the councilor Von Sudenburg had paid the Jews the equivalent of their houses and goods. More than 1,400 emigrated. The synagogue of the Judendorf was turned into a chapel in honor of the Virgin Mary and named "Marienkapelle," and the name "Judendorf" was changed to "Mariendorf" (see H. A. Erhard, "Das Judendorf bei Magdeburg und der Erzbischof Ernst zu Magdeburg, Judenverfolgung im Jahre 1493," in Ledebur's "Archiv für die Geschichtskunde des Preussischen Staates," 1830, i. 318).

Banished 1492.

Of the internal life of the community up to the time of its banishment very little is known. It submitted religious questions to Meïr Rothenburg (d. 1293; Responsa, No. 32, ed. Cremona, 1557) and to various French scholars. At the time of Isaac ben Moses of Vienna (1200-70) there lived in Magdeburg a Rabbi Hezekiah ben Jacob, with whom the former was in correspondence (Steinschneider, "Hebr. Bibl." viii. 2). In the fifteenth century Jacob Mölln mentions a scholar, Rabbi Isaac, of Magdeburg ("Minhagim," Hilkot Ḥanukkah). At that time the community seems to have been active and flourishing and to have had a yeshibah which was attended also by students from other places, who were assured of safe-conduct by a patent of protection issued in 1410.

Permission to Return.

After the banishment (1493) no Jew was allowed the right to settle in Magdeburg, whose magistrate, in a letter to the king dated Sept. 14, 1711, speaks of that right as "a high royal favor." It was not until 1720 that a Jew, Gumpert by name, obtained permission to reside in the Altstadt of Magdeburg, and up to 1806 only one protected Jew at a time enjoyed this privilege. If Jews attempted to remain in the Neustadt, the council of the city was soon forced to expel them, as is seen from the case of Lewin Bauer (see M. Spanier, *l.c.* pp. 392 *et seq.*).

The present community did not come into existence until the third decade of the nineteenth century. Its first preacher, who was also the principal of the newly founded religious school of the community (the first of its kind in North Germany), was Ludwig Philippson, who was rabbi from 1833 to 1862 (Kayserling, "Ludwig Philippson," pp. 47 *et seq.*, Leipsic, 1898). Philippson, in his reminiscences, speaks of an old rabbi named Salme, to whom he was for a time assistant. Philippson was succeeded as rabbi by M. Güdemann (1862-66) and M. Rahmer (1869-1904). During Rahmer's illness Grzymisch was his substitute. A new synagogue was built in 1850-51. The community has a burial association, institutions for the support of invalids, widows, and orphans, various other benevolent foundations, a Jewish women's society, and a society for Jewish history and literature.

MAGDEBURG LAW (MAGDEBURG RIGHTS): General name for a system of privileges "securing the administrative independence of municipalities," which was adopted in many parts of Germany, Poland, and Bohemia ("Encyc. Brit."). Usually it was introduced into the Slavic countries at the instance and for the benefit of the German merchants and artisans, who formed the most important part of the population of many cities. Jews and Germans were always competitors in those cities, and as the Jews lived under special privileges and were not considered a part of the native population, not only were they excluded from participating in the benefits of the Magdeburg law, but their condition usually was rendered worse wherever it was introduced. In Wilna, where the Magdeburg law was granted to the municipality as early as the fourteenth century, the Jews were expressly excluded from its benefits, but in the near-by city of Troki the Jewish community secured from Grand Duke Casimir Jagellon the Magdeburg rights for itself, and independently of the Christian community, which had received the same rights earlier. This grant, dated March 27, 1444, gave the Jews of Troki equal rights with their Christian neighbors (see Lithuania).

One of the most interesting provisions of the Magdeburg law relating to Jews was that a Jew could not be made "Gewaersmann," that is, he could not be compelled to tell from whom he acquired any object which had been sold or pledged to him and which was found in his possession. This actually amounted to permission to buy stolen property.

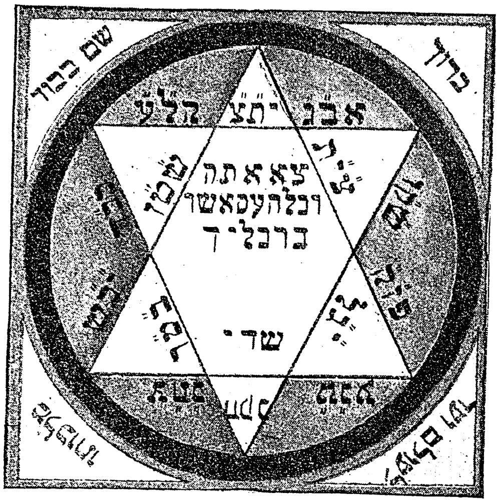
MAGEN DAWID ("David's shield"): The hexagram formed by the combination of two equilateral triangles; used as the symbol of Judaism. It is placed upon synagogues, sacred vessels, and the like, and was adopted as a device by the American Jewish Publication Society in 1873 (see illustration, Jew. Encyc. i. 520), the Zionist Congress of Basel (*ib.* ii. 570)—hence by "Die Welt" (Vienna), the official organ of Zionism—and by other bodies. The ḥebra ḳaddisha of the Jewish community of Johannesburg, South Africa, calls itself "Ḥebra Ḳaddisha zum Rothen Magen David," following the designation of the "red cross" societies.

The Jewish view of God, which permitted no images of Him, was and still is opposed to the acceptance of any symbols, and neither the Bible nor the Talmud recognizes their existence. It is noteworthy, moreover, that the shield of David is not mentioned in rabbinical literature. The "Magen Dawid," therefore, probably did not originate within

Rabbinism, the official and dominant Judaism for more than 2,000 years. Nevertheless, a David's shield has recently been noted on a Jewish tombstone at Tarentum, in southern Italy, which may date as early as the third century of the common era (see Herbert M. Adler in "J. Q. R." xiv. 111). The earliest Jewish literary source which mentions it, the "Eshkol ha-Kofer" of the Karaite Judah Hadassi (middle of the 12th cent.), says, in ch. 242: "Seven names of angels precede the mezuzah: Michael, Gabriel, etc. . . . Tetragrammaton protect thee! And likewise the sign called 'David's shield' is placed beside the name of each angel." It was, therefore, at this time a sign on amulets.



A "Magen Dawid" from a "Mizraḥ."

Magic Papyri.

In the magic papyri of antiquity, pentagrams, together with stars and other signs, are frequently found on amulets bearing the Jewish names of God—"Sabaoth," "Adonai," "Eloai"—and used to guard against fever and other diseases (Wessely, "Neue Zauberpapyri," pp. 68, 70, and note). Curiously enough, only the pentacle appears, not the hexagram. In the great magic papyrus at Paris and London there are twenty-two signs side by side, and a circle with twelve signs, but neither a pentacle nor a hexagram (Wessely, *l.c.* pp. 31, 112), although there is a triangle, perhaps in place of the latter. In the many illustrations of amulets given by Budge in his "Egyptian Magic" (London, 1899) not a single pentacle or hexagram appears. The syncretism of Hellenistic, Jewish, and Coptic influences did not, therefore, originate the symbol. It is probable that it was the Cabala that derived the symbol from the Templars (see Vajda in "Magyar Zsidó Szemle," xvii. 314 *et seq.*; German reprint in Grunwald's "Mitteilungen der Gesellschaft für Jüdische Volkskunde," x. 138 *et seq.*). The Cabala, in fact, makes use of this sign, arranging the Ten Sefirot, or spheres, in it, and placing it on amulets (see illustrations, Jew. Encyc. i. 181, 550: iii. 475).

Solomon's Seal.

The pentagram, called **Solomon's seal,** is also used as a talisman, and Henry thinks that the Hindus derived it from the Semites ("Magic dans l'Inde Antique," p. 93, Paris, 1904), although the name by no means proves the Jewish or Semitic origin of the sign. The Hindus likewise employed the hexagram as a means of protection, and as such it is mentioned in the earliest source, quoted above. In the synagogues, perhaps, it took the place of the mezuzah, and the name "shield of David" may have been given it in virtue of its protective powers. The hexagram may have been employed originally also as an architectural ornament on synagogues, as it is, for example, on the cathedrals of Brandenburg and Stendal, and on the Marktkirche at Hanover. A pentacle in this form, ⛤, is found on the ancient synagogue at Tell Hum. Charles IV. prescribed for the Jews of Prague, in 1354, a red flag with both David's shield and Solomon's seal, while the red flag with which the Jews met King Matthias of Hungary in the fifteenth century showed two pentacles with two golden stars (Schwandtner, "Scriptores Rerum Hungaricarum," ii. 148). The pentacle, therefore, may also have been used among the Jews. It occurs in a manuscript as early as the year 1073 (facsimile in M. Friedmann, "Seder Eliyahu Rabbah we-Seder Eliyahu Zuṭa," Vienna, 1901).

J. L. B.

MAGGID. See Cabala.

MAGGID: Itinerant preacher, skilled as a narrator of stories. A preacher of the more scholarly sort was called "darshan" and usually occupied the official position of rabbi. The title of "maggid mesharim" (= "a preacher of uprightness"; abbreviated מ״ם) probably dates from the sixteenth century. There always have been two distinct classes of leaders in Israel—the scholar and rabbi, and the preacher or maggid. That the popular prophet was sometimes called "maggid" is maintained by those who translate "maggid mishneh" Zech. ix. 12, by "the maggid repeats" (Löwy, "Beḳoret ha-Talmud," p. 50). Like the Greek sophists, the early maggidim based their preaching on questions addressed to them by the multitude. Thus the Pesiḳta, the first collection of set speeches, usually begins with "yelammedenu rabbenu" (= "let our master teach us"). An excellent example is the Passover Haggadah, which is introduced by four questions; the reciter of the answer is called "maggid." When there were no questions the maggid chose a Biblical text, which was called the "petiḥah" (opening).

Popularity of the Maggid.

The greater popularity of the maggid as compared with the darshan is instanced by the fact that the people left the lecture-room of R. Ḥiyya, the darshan, and flocked to hear R. Abbahu, the maggid. To appease the sensitive Ḥiyya, Abbahu modestly declared, "We are like two merchants, one selling diamonds and the other selling trinkets, which are more in demand" (Soṭah 40a).

Talmudists like R. Meïr combined the functions of a darshan and a maggid (Sanh. 38b). When R. Isaac Nappaḥa was requested by one in his audience to preach a popular haggadah, and by another a halakic discourse, he answered, "I am like the man who had two wives, one young and one old, and each wishing her husband to resemble her in appearance; the younger pulled out his gray hair while the older pulled out his black hair, with the result that he became entirely bald." R. Isaac thereupon delivered a lecture that embraced both halakah and haggadah (B. Ḳ. 60b).

In Geonic Times.

Levi ben Sisi, his son Joshua, and others were at the head of a regular school of rabbinical maggidim. R. Ze'era was opposed to their methods of twisting and distorting the Biblical verses to suit their momentary fancy. In Ze'era's estimation their works were of no more value than books on magic (Yer. Ma'as. iii. 9). In the geonic period and in the Middle Ages the principal of the yeshibah, or the rabbi, delivered a lecture before each festival, giving instructions in the laws governing the days of the festival. The maggid's function was to preach to the common people in the vernacular whenever occasion required, usually on Sabbath afternoon, basing his sermon on the sidra of the week. The wandering, or traveling, maggid then began to appear, and subsequently became a power in Jewry. His mission was to preach morality, to awaken the dormant spirit of Judaism, and to keep alive the Messianic hope in the hearts of the people. The maggidim's deliverances were generally lacking in literary merit, and were composed largely of current phrases, old quotations, and Biblical interpretations which were designed merely for temporary effect; therefore none of the sermons which were delivered by them have been preserved.

Maggidism reached a period of high literary activity in the sixteenth century. The expulsion of the Jews from Spain in 1492 revealed a master maggid in Isaac Abravanel. His homiletic commentary on the Bible became an inexhaustible source of suggestion for future maggidim. In his method of explaining every chapter, preceded by a number of questions, he followed the early maggidim and sophists. His long argumentations in an easy and fluent style were admirably suited to the purposes of a maggid. Moses Alshech, a maggid in Safed, Palestine, preached every Sabbath before large audiences. In his commentaries he followed closely the method of Abravanel. Alshech also became an authority for the maggidim, who quoted him frequently.

Relation to Messianism.

The persecutions of the Jews brought forth a number of maggidim who endeavored to excite the Messianic hope as a balm to the troubled and oppressed Jewry. Asher Lemmlein preached in Germany and Austria, announcing the coming of the Messiah in 1502, and found credence everywhere. Solomon Molko preached, without declaring the date of the advent, in both Italy and Turkey, and as a result was burned at the stake in Mantua in 1533. R. Höschel of Cracow (d. 1663) delighted in the elucidation of difficult passages in the midrash known as the "Midrash Peli'ah" (= "wonderful" or "obscure" midrash). H. Ersohn's biography of Höschel, in his "Ḥanukkat ha-Torah" (Pietrkov, 1900), gives a collection of 227 "sayings" gathered from 227 books by various writers, mostly Höschel's pupils. These sayings became current among the maggidim, who repeated them on every occasion. Some maggidim copied his methods and even created a pseudo-Midrash Peli'ah for the purpose of explaining the original ingeniously in the manner initiated by R. Höschel.

The "Shebeṭ Musar."

Elijah b. Solomon Abraham of Smyrna, in the beginning of the eighteenth century, published his "Shebeṭ Musar," which he divided into fifty-two chapters, one for each week. This book caused him to be known as the "Terror Maggid"; he preached moral and religious conduct as a safeguard against the terrible punishments of the day of judgment. Dante could not picture the horrors of hell and the punishments awaiting the wicked more minutely than did the author of the "Shebeṭ Musar." It established a new "fire and brimstone" school of maggidim. Judah Rosanes of Constantinople (d. 1727), in his "Parashat Derakim," combined the darshan with the maggid. He adopted a new method of harmonizing the acts of Biblical personages with the legal views of Talmudic scholars. For instance, Pharaoh, in refusing to release Israel from bondage, acted according to the contention of Abaye, while Moses insisted on Israel's release in accordance with the decision of Rabba. This far-fetched pilpulism had many followers, some of whom asserted that Ahasuerus concurred in the decision of Maimonides, and that Vashti coincided with the opinion of RaBaD.

The "Dubner Maggid."

Jacob Kranz of Dubno, the "Dubner Maggid" (d. 1804), author of "Ohel Ya'aḳob," adopted the Midrash's method of explaining by parables and the incidents of daily life, such as the relations between the man of the city and the "yeshubnik" (village man), between the bride, the bridegroom, and the "meḥuttanim" (contracting parents), and compared their relations to those between Israel and Yhwh or between the Gentiles and the Jews. He drew also moral lessons from the "Arabian Nights" and from other secular stories in illustrating explanations of a midrash or a Biblical text. Moses Mendelssohn named Kranz the "Jewish Æsop." Kranz's pupil Abraham Bär Plahm and a host of other maggidim adopted this method. In the same period there were Jacob Israel of Kremnitz, author of "Shebeṭ mi-Yisrael," a commentary on the Psalms (Zolkiev, 1772); Judah Löw Edel of Slonim, author of "Afiḳe Yehudah," sermons (Lemberg, 1802); Ḥayyim Abraham Katz of Moghilef, author of "Milḥamah be-Shalom" (Shklov, 1797); Ezekiel Feiwel of Deretschin, author of "Toledot Adam" (Dyhernfurth, 1809) and maggid in Wilna (Levinsohn, "Bet Yehudah," ii. 149).

The most celebrated maggid during the nineteenth century was Moses Isaac ben Noah Darshan, the "Kelmer Maggid" (b. 1828; d. 1900, in Lida). He was among the "terror" maggidim of the "Shebeṭ Musar" school and preached to crowded synagogues for over fifty years in almost every city of Russian Poland. Another prominent maggid was Ḥayyim Ẓedeḳ, known as the "Rumsheshker" (Gersoni, "Sketches of Jewish Life and History," pp. 62–74, New York, 1873). The "philosophical" maggid is one who preaches from Arama's "Aḳedat" and Baḥya's "Ḥobot ha-Lebabot." Enoch Sundl Luria, the author of "Kenaf Renanim," on "Pirḳe Shirah" (Krotoschin, 1842), was a noted philosophical maggid.

Philosophical Maggidim.

Meïr Leibush Malbim (d. 1880), in his voluminous commentaries on the Bible, followed to some extent Abravanel and Alshech, and his conclusions are pointed and logical. Malbim's commentaries are considered to offer the best material for the use of maggidim.

From the "terror," or "Musar," maggid developed the "penitential" maggid, who, especially during the month of Elul and the ten days of penitence between New-Year's Day and Yom Kippur, urged the wicked to repent of their sins and seek God's forgiveness. Jacob Joseph, chief rabbi of the Russian Jews in New York (d. 1902), formerly maggid of Wilna, was one of these. In the middle of his preaching he would pause to recite with the people the "Shema'," the "Ḳolenu," and the "Ashamnu," raising the audience to a high pitch of religious emotion. The maggid usually ends his preaching with the words, "u-ba le-Ẓiyyon goel," etc. (a redeemer shall come to Zion speedily in our days; let us say "Amen"). Some of the wandering maggidim act also as meshullaḥim. The yeshibot in Russia and the charitable institutions of Jerusalem, especially the Wa'ad ha-Kelali, send abroad meshullaḥ-maggidim. The resident maggid who preaches at different synagogues in one city is called the "Stadt Maggid," as in Wilna and other large cities in Russia. The modern, or "maskil," maggid is called "Volksredner" (people's orator), and closely follows the German "Prediger" in his method of preaching. Ẓebi Hirsch Dainow (d. 1877) was the first of the modern type of maggid, which soon developed into that of the "national," or "Zionistic," maggid. Hirsch Masliansky and Joseph Zeff, both of New York, are representatives of the latter class. See Homiletics.

J. J. D. E.

MAGGID (STEINSCHNEIDER), HILLEL NOAH: Russian genealogist and historian; a descendant of the family of Saul Wahl; born at Wilna 1829; died there Oct. 29, 1903. His father was a bibliographer, and his grandfather Phinehas was rabbi at Polotsk and Wilna, the emissary of Elijah of Wilna in his struggle with the Ḥasidim, and the author of nine exegetical works. Having lost his father at the age of eighteen, Maggid learned the calling of a lapidary, but not content with cutting epitaphs on tombstones and monuments, he occasionally composed inscriptions. He early joined the Progressionists of Wilna, among whom were Fuenn, Lebensohn, and M. A. Günzburg. He indulged his taste for general literature and published various articles and bibliographical papers in the current Hebrew periodicals. Among these may be noted his biography of David Oppenheim, rabbi of Prague (in "Gan Peraḥim," 1882), and his notes on the history of the Jewish community of Lemberg (in "Anshe Shem," 1895). Maggid also collaborated with Fuenn in the latter's history of the Jewish community of Wilna ("Ḳiryah Ne'emanah"). Maggid's most important work was "Ir Wilna," the first volume of which appeared in Wilna in 1900; it contains the biographies of more than three hundred prominent rabbis, preachers, and communal workers. The notes alone, referring to genealogical literature, show that the author was familiar with responsa literature as well as with general rabbinical and historical works in Hebrew literature. Maggid left in manuscript two other volumes, containing biographies of the important scholars and communal workers of Wilna in more recent times. The third volume contains also new material for the history of the Jews in Wilna and Lithuania, and includes numerous documents hitherto unpublished. A sketch of his life was written by Ben 'Ammi in his "Ocherki o Litvye" (in "Voskhod"). Maggid's son is **David Maggid** of St. Petersburg, author of "Toledot Mishpaṭ," Günzburg.

Bibliography: Halpern, in *Sbornik Budushchnost*, iv. 249, St. Petersburg, 1904; *Voskhod*, Nov., 1903.

MAGGID MISHNEH. See Periodicals.

MAGHARIYYAH, AL-: Arabic name of a Jewish sect, meaning "Men of the Caves." According to the account given by Joseph al-Ḳirḳisani this sect was founded in the first century before the common era and derived its designation from the fact that it kept its books in caves. Except the writings of one named "the Alexandrinian," and a later work entitled "Sefer Yadua'," these books, he says, were of little value. The sect reckoned the months from the appearance of the new moon and prohibited games of every kind. It possessed strange commentaries on the Bible, and, contrary to the Sadducees, it was opposed to all anthropomorphisms. Believing God to be too sublime to mingle with matter, the sect rejected the idea that the world was created directly by Him, and invented an intermediary power. This power was an angel who produced the world, in which he is God's representative. The Law and all communications to prophets proceeded from this angel, to whom are referable all the anthropomorphic expressions concerning God found in the Bible.

This account of the tenets of the Maghariyyah agrees with that of the Jewish sect erroneously called by Shahrastani "Al-Muḳaribah," and coupled by him with that of the Yudghanites founded in the eighth century ("Kitab al-Milal wal-Nuḥal," ed. Cureton, p. 168). This confusion of names and dates led to the erroneous ascription of its foundation to Benjamin ben Moses al-Nahawendi, who was influenced by the writings of the Maghariyyah (some of them were still extant at the time of David ben Merwan al-Muḳammaẓ), as, according to Ḳirḳisani, was also Arius, the founder of the Christian sect of the Arians.

Harkavy identifies the Maghariyyah with the Essenes. The reasons given by him for this identification are: (1) the name of the sect, which, according to him, does not refer to its books, but to its followers, who lived in caves or in the desert, this being known to have been the Essene mode of life; (2) the coincidence in the date of its foundation with that of the Essenes; (3) the theory of the angel, which is in keeping with the tenets of the Essenes; (4) Kirkisani's omission of the Essenes from his list of the Jewish sects, which omission would be unaccountable had he not considered the Maghariyyah to be identical with the Essenes. Harkavy goes still further and identifies the "Alexandrinian" author with Philo, whose sympathies with the Essenes are well known, and sees in the theory of the angel a perfect analogy to Philo's "Logos."

MAGI. See Babylonia.

MAGIC (כשפים): The pretended art of producing preternatural effects; one of the two principal divisions of occultism, the other being Divination. The effects produced may be either physical (as a storm or death under conditions insufficient to explain its occurrence, or any phenomenon impossible in the ordinary course of nature) or mental, and the latter either intellectual (as preternatural insight or knowledge) or emotional (as love or hate arising or disappearing in obedience to the arbitrary will of the magician). The methods of producing these effects include on the one hand actions of various sorts, and on the other incantations, invocations, and the recitation of formulas. Even in the Talmud the act and the results produced by it are regarded as the criteria of magic, and these two factors appear in all forms of witchcraft as essential characteristics. Closely connected with magic are Superstition and Demonology. In so far as gods are invoked (demons frequently being degraded gods), magic is akin to idolatry, and, in a certain sense, to Astrology.

In the Bible.

Jewish magic is mentioned as early as Deut. xviii. 10-11, where various classes of diviners, astrologers, and exorcists are named, their ceremonies being forbidden as idolatrous (comp. II Kings xxi. 6; II Chron. xxxiii. 6). Nor is there any doubt expressed as to the actual potency of magic, and the magician, who may misuse it, is accordingly feared and abhorred (Micah v. 11 [A. V. 12]; Jer. xxvii. 9; Ex. xxii. 17-23; *et al.*). The commonest form of magic was the love-charm, especially the love-charm required for an illicit amour. Such magic was practised especially by women, so that magic and adultery frequently are mentioned together (II Kings ix. 22; Nah. iii. 4; Mal. iii. 5). The law (Ex. xxii. 17 [A. V. 18]) which punishes sorcery with death speaks of the witch and not of the wizard. This was correctly interpreted by the Talmud (Sanh. 67a) as implying that magic was practised chiefly by women, and the context of the passages in Exodus which mention sorcery clearly shows that it was associated with sexual license and unnatural vices (Blau, "Das Altjüdische Zauberwesen," pp. 17-18, Strasburg, 1898; see Witchcraft). The frequency of allusions to it in the Bible indicates that the practise of magic was common throughout ancient Israel.

In Talmudic Literature.

More abundant information is found in post-Biblical literature, especially in the Babylonian Talmud, where the great number of the passages alluding to magic furnishes incontrovertible evidence of its wide diffusion. It was, however, only the practise of witchcraft which was prohibited, for a knowledge of magic was indispensable to a member of the chief council or of the judiciary, and might be acquired even from the heathen. The most profound scholars were adepts in the black art, and the Law did not deny its power. The people, who cared little for the views of the learned, were devoted to witchcraft, though not so much as the Babylonians, Egyptians, Greeks, and Romans (Blau, *l.c.* pp. 17 *et seq.*). "Adultery and sorcery have destroyed everything" (Soṭah ix. 13); the majesty of God departed from Israel and His wrath came upon the world when the "wizards" became too numerous (Tosef., Soṭah, xiv. 3); Simon b. Shetah hanged eighty witches in a single day (Sanh. 45b); Ecclesiasticus (Sirach) xlii. 9-10 is quoted in Sanh. 100b with the addition of the words "When the daughter grows old she will probably deal in magic" (see further examples in Blau, *l.c.* pp. 23-26).

This ingrained belief in magic infected even the scholars; for although they did not practise witchcraft for gain or for unlawful ends, they occasionally counteracted black magic by white. They were even able to create a calf when they needed food (*ib.* pp. 26 *et seq.*). Healing by means of white magic is not condemned except when the means employed are pagan or idolatrous. Many scholars consumed men with a glance, or reduced them to a heap of bones, but since this magic was regarded as a punishment for sins which had been committed, the passages of the Talmud which mention it take no exception to it (Blau, *l.c.* pp. 49-61). Exorcism also flourished, although not as widely as in Judæo-Christian circles (Acts viii. 9, xiii. 6-9). Jesus was regarded in the Talmud and by the ancient world generally as a magician (Sanh. 106b; Soṭah 47b; see Jesus in Jewish Legend). The Greco-Roman world regarded the Jews as a race of magicians (Juvenal, vi. 542-547; Suidas, *s.v.* 'Εζεκίας, *et passim*).

Magic Agencies.

The means adopted in witchcraft were manifold. The most potent was human speech, to which all peoples attribute invincible power. "Open not thy mouth for evil" (Ber. 19a and parallels). Those words of the magician are all-powerful which he utters at the right time and place and under proper conditions (Blau, *l.c.* pp. 68-82). Since official Judaism bitterly opposed black magic, there was a constant stream of prohibitions against it, and from these the existence of various forms of witchcraft can be inferred. The secret Jewish name of God was a powerful factor in incantation, as is shown by the Egyptian magic papyri written in Greek, in which heathen and Jewish names of the Deity are frequently found in juxtaposition or combination, termed משתף (= "union") by the Talmud (*ib.* pp. 117-146).

In addition to the magic word and the magic formula there were various magic objects (*ib.* pp. 156–165) which were used to avert the Evil Eye. Women and children, and even animals, as being weaker and less capable of resistance, were protected by Amulets and Talismans. These charms consisted either of natural objects or of papers with writing on them. Copies of the Bible had protective power and were carried especially on journeys, while the tefillin, as their Greek name, Phylacteries, implies, were also regarded as preservative, at least in Hellenistic circles, as were the slips of paper ("mezuzot") attached to the door-posts. Blau (*ib.* pp. 96–117) has edited, translated, and explained two Hellenistic exorcismal formulas, one of which was found in a grave in Hadrumetum (in the ancient Byzacium), in the Roman province of Africa.

Apocrypha.

In addition to the official sources from which the data given above are derived, the Apocrypha, in view of its antiquity, deserves attention in connection with the subject of magic. The general picture which it presents is the same as that given by the Bible and the Talmud. According to the Book of Enoch (ix. 7), the angels taught the daughters of men "incantations, exorcisms, and the cutting of roots, and revealed to them healing plants" (comp. viii. 1 *et seq.* with vii. 6, ix. 8; x. 7–8 with xiii. 2, xvi. 3, and lxix. 12 *et seq.*). The heart, liver, and gall are magic agencies, and the blind Tobit recovers his sight when his eyes are anointed with the gall of a fish (vi. 4 *et seq.*, viii. 2, xi. 10; see Sibyllines, iii. 220 *et seq.*, discussed in "Alter Orient," iii. 41; Ascensio Isaiæ, ii. 5; Syriac Apoc. Baruch, lx. 1, where the muttering of the incantations of the Ammonites is mentioned; see Kautzsch, "Apokryphen," ii. 435, note). Noah's book of healing (Jubilees, x.) was magical in character, as were the writings of Solomon and Moses, mentioned elsewhere.

Medieval Jewish Magicians.

In the Middle Ages, as in antiquity, the Jews were regarded as magicians, and many of them doubtless profited by the general delusion. In the ninth century a Jewish magician named Zambrio is found in Italy (Güdemann, "Gesch." ii. 40; comp. p. 255), and Sicilian sorcerers flourished even a century earlier (Zunz, "Z. G." p. 486; "Magyar Zsidó Szemle," xv. 47). The Arabic author Mas'udi speaks of a Jewish magician (Budge, "Egyptian Magic," p. 23). The Jews were considered sorcerers in Germany also (Güdemann, *l.c.* iii. 233; comp. "Israelitische Monatsschrift," 1899, No. 7; "Hebräische Bibliographie," 1903, No. 24; Micelle, p. 30, "Judæi . . . pessimi magici"; "Jüdische Wahrsager," in Van Vloten, "Recherches sur la Domination Arabe," pp. 55 *et seq.*, Amsterdam, 1894). In times of drought, during the Middle Ages, the people turned to the Jews, who were supposed to be able to cause rain, and they are still regarded by some peoples as magicians.

Sources of Jewish Magic.

The diversity existing within ancient Jewish magic and the essential contradiction between witchcraft and monotheism are in themselves evidences of foreign influence on the system. The scholars of the first centuries of the present era refer frequently and unanimously to Egypt as the original home of magic arts (Blau, *l.c.* pp. 37–49). In the Bible the real homes of all varieties of witchcraft are given as Egypt (Ex. vii. *et passim*) and Babylon (Isa. xlvii. 9–15). It is very probable that in this respect both countries influenced Israel, and their political power and high civilization made it inevitable that that influence should be deep, although the lack of historical data renders it impossible to determine its extent or trace its course. The influence of Egypt admits of no doubt as regards post-Biblical Judaism, which was for a long period under the control of the Ptolemies both in its civilization and its government. The Egypto-Hellenistic syncretism influenced first the Hellenistic Jews, especially those of Alexandria, and through them the Jews of Palestine. The Jewish and Judæo-Christian view as to the source of Hebrew magic is confirmed by the Books of Hermes and by the recently discovered Greek and Coptic magic papyri, in which the Jewish element is no small factor; and Jacob ("Im Namen Gottes") has recently proved that the belief in the almighty power of the name of God is Egyptian in origin. Although Assyro-Babylonian and other elements are not lacking, they are for the most part astrological and divinatory in character. Egypt, therefore, gave ancient Judaism its magic and Babylonia gave it its divination, while Hellenism served as the connecting-link.

In view of the authority which the Talmud possessed for posterity the magic in it could not but influence later generations. There is no doubt that the majority of the theurgic and magic elements in the post-Talmudic literature which Jellinek collected in his "Bet ha-Midrash," date from Talmudic, and in part even from pre-Talmudic, times (see Gnosticism). This may be assumed also for the magical portions of the geonic literature in general, especially as the Geonim lived and worked in Babylonia. This ancient magic, blended with Hellenistic and medieval European elements, was incorporated in the "practical Cabala." At the close of the Middle Ages the Cabala influenced the Jewish and the Christian world alike. The "Nishmat Ḥayyim" of Manasseh ben Israel, chief rabbi in Amsterdam in the seventeenth century, is filled with superstition and magic, and many Christian scholars were deluded. The evil deeply and widely infected the people, and is still active, especially among the Ḥasidim. See Abracadabra; Abraxas; Asmodeus; Astrology; Asusa; Augury; Balaam; Bibliomancy; Blessing and Cursing; Cursing; Death; Folk-Medicine; Hermes, Books of; Liver; Necromancy; etc.

MAGINO, MEÏR DI GABRIELE: French silk-manufacturer; lived at Venice. In 1587 he went to Rome to promote the manufacture of silk, which had been begun in that city; and on June 4 of the same year the monopoly of silk-manufacture by his improved process was secured to him for sixty years, only the sister of the pope taking a share of the profits. He was also permitted to live outside the ghetto for fifteen years. In 1588 Magino printed his Italian lectures on the uses of silk and on its manufacture, dedicating the book to Pope Sixtus V. In the same year he received a privilege and patent for polishing mirrors and cut glass with a vegetable oil which he had discovered.

MAGNUS, EDUARD: German painter; born at Berlin Jan. 7, 1799; died there Aug. 8, 1872. After studying successively medicine, architecture, and philosophy, he finally adopted the profession of painting, attending the Berlin Academy of Fine Arts. From 1826 to 1829 he traveled in France and Italy, revisiting the latter country in 1831. In 1850-53 he again toured through France and also visited Spain. In 1837 he became a member of the Berlin Academy, and in 1841 received the title of professor. His general culture secured for him considerable influence in artistic circles. He is best known by his portraits, of which "Thorwaldsen," "Prince Radziwill as a Child," "Count Wrangel," "Mendelssohn-Bartholdy," "Gustav Magnus," "Countess Arnim," "Madame Egells," "Henrietta Sontag," "Jenny Lind" (National Gallery, Berlin), and "E. Mandel" are the most important. His genre pictures include: "The Fisher Boy of Nice," "The Returning Greek," "Italian Women," "Children Playing with Flowers," and "Italian Landscape" (a very poetic production). In recognition of his ability he was decorated with the ribbon of the Order of Michael, the Order of the Red Eagle of the fourth class, and several gold medals.

MAGNUS, HEINRICH GUSTAV: German chemist and physicist; born in Berlin May 2, 1802; died there April 4, 1870. He was graduated from the University of Berlin in 1827, afterward studying a year at Stockholm under Berzelius, and later spending some time in Paris under Gay-Lussac and Thénard. In 1831 Magnus began teaching as privatdocent in Berlin; in 1834 he became assistant professor of physics and technology in the university there, and in 1845 was appointed professor. The physical cabinet of the university was formed by him. He ceased teaching in Feb., 1869.

The first work published by Magnus was "Ueber die Selbstentzündlichkeit des Feinzerteilten Eisens" (1825). While at Stockholm in 1828 he discovered the compound known as "the green salt of Magnus." He discovered also sulfovinic, ethionic, and isethionic acids, and (with Ammermüller) periodic acid; investigated the diminution in density produced in garnet and vesuvianite by melting; and studied the property inherent in the blood of absorbing carbonic acid and oxygen (founding thereon the theory of the absorption of the blood). On Dec. 13, 1841, he published the results of his experiments upon the coefficient of the dilatation of gases (Regnault having published his results in the same field on Nov. 25 of the same year); in 1860 and 1861 he announced the results of his experiments on the transmission of heat through gases by conductibility and radiation, which led to a long controversy with Tyndall.

He made researches also in magnetic and in thermal electricity, hydraulics, the deflection of projectiles from firearms, the diathermal power of gases, the polarization of radiant heat, etc. The results of his experiments and researches may be found in Poggendorff's "Annalen" or in the publications of the Berlin Academy of Sciences.

S. N. D.

MAGNUS, LADY KATIE: English authoress and communal worker; born at Portsmouth May 2, 1844; daughter of E. Emanuel; wife of Sir Philip Magnus. She has been connected with various committees of the Berkeley Street Synagogue, has taken a great interest in the Jews' Deaf and Dumb Home, and is treasurer of the Jewish Girls' Club. Lady Magnus has written much on Jewish topics, beginning with "Little Miriam's Bible Stories" and "Holiday Stories," as well as two sketches of Jewish history—"About the Jews Since Bible Times" (London, 1881) and "Outlines of Jewish History"; the latter has run into three editions, and has been republished (with additional chapters on America) by the Jewish Publication Society of America (Philadelphia, 1900). She has contributed much to the periodicals, and a collection of her various papers was published under the title "Salvage" (1899). Those relating to Jewish topics are included in her "Jewish Portraits," which has run into a second edition (London, 1901). She is also the author of "First Makers of England," London, 1901.

Bibliography: *Jewish Year Book*, 5664 (1903-4).

J.

MAGNUS, LAURIE: English author and publisher; son of Sir Philip Magnus; born in London in 1872; educated at Magdalen College, Oxford. He was the Berlin correspondent of the London "Morning Post" (1897-98) and leader-writer for the same paper. He is now (1904) joint managing director of George Routledge & Sons, Ltd. Magnus has edited a series of "Secondary Education Text-Books" for the publishing-house of John Murray, has published "A Primer of Wordsworth," translated the first volume of "Greek Thinkers" (from the German of Prof. T. Gomperz), and has edited "Prayers from the Poets" and "Flowers of the Cave" (in conjunction with Cecil Headlam). He has written "Aspects of the Jewish Question" (1902), reprinted and enlarged from the "Jewish Quarterly Review."

BIBLIOGRAPHY: *Jewish Year Book*, 1901-2.

J. M. W. L.

MAGNUS, LUDWIG IMMANUEL: German mathematician; born in Berlin March 15, 1790; died there Sept. 25, 1861; cousin of Heinrich Gustav Magnus. His father died when he was young; and his mother induced him to enter his uncle's bank; after business hours he studied Euclid. In the Napoleonic wars he was a volunteer in the artillery, being soon promoted to the rank of gunner and serving from 1813 to 1815. On the conclusion of peace he again took up the business of banking in Berlin; in his leisure hours studying higher mathematics, and teaching that subject in the academy founded in 1816 by a brother of the sculptor Cauer. On the removal of the academy to Charlottenburg (1826) Magnus continued to be one of its regular staff of teachers; and he held that position until 1834, when Cauer died. Magnus then abandoned teaching, and spent the next nine years as head revenue officer in the recently founded Berliner Kassenverein, retiring in 1843 on a competency. Hard work had, however, broken his health, and he did nothing more for mathematics. During the latter part of his life he was an invalid, suffering from a disease of the eyes.

By 1834 Magnus' reputation as a mathematician had become established, and the University of Bonn conferred upon him the honorary degree of doctor. Magnus' mathematical writings appeared in Gergonne's "Annales des Mathématiques," vols. xi. and xvi. (1820–25); in Crelle's "Journal," vols. v., vii., viii., and ix. (1830–32); in the third part (1833) of Meier Hirsch's "Sammlung Geometrischer Aufgaben"; and in "Sammlung von Aufgaben und Lehrsätzen aus der Analytischen Geometrie des Raumes" (published in 1837, but written long before).

MAGNUS, MARKUS: Elder of the Jewish congregation of Berlin in the first quarter of the eighteenth century; court Jew to the crown prince, afterward King Frederick William I. The Jewish community of Berlin was divided into two hostile camps by Magnus' quarrels with his rival, Jost Liebmann. Frederick I. favored the latter, while the crown prince supported Magnus. After the death of Liebmann his widow and sons continued these quarrels, which ended in the victory of Magnus. He induced the members of the congregation to substitute a public synagogue for the two private synagogues hitherto maintained by Liebmann, Veit, and Riess (see JEW. ENCYC. iii. 70–71, iv. 317). When the government (March 16, 1722) issued a new regulation for the administration of the Berlin Jewish congregation, Magnus and Moses Levi Gumpertz were appointed permanent chief elders with a salary of 300 thalers each.

BIBLIOGRAPHY: Geiger, *Gesch. der Juden in Berlin*, i. 19–21, 38, Berlin, 1871; Grätz, *Gesch.* x. 309–310, 350, Leipsic, 1868.

D. S. MAN.

MAGNUS, PAUL WILHELM: German botanist; born at Berlin Feb. 29, 1844; educated at the Werdergymnasium and the university of his native city and at the University of Freiburg-im-Breisgau (Ph.D. Berlin, 1870). He became in 1875 privat-docent at his alma mater, where since 1880 he has occupied the position of assistant professor of botany. He was a member for botany of the Prussian commission for the exploration of the seas, and as such took part in the expeditions of 1871 in the Baltic Sea, of 1872 in the North Sea, and of 1874 on The Sley. He made reports of these expeditions, which were published by the government. Magnus contributed articles on botany to various scientific journals, and is the author of: "Beiträge zur Kenntniss der Gattung Najas," 1870; "Morphologie der Sphacelaricen," 1873; "Pilze des Kantons Graubündten," 1890.

S. F. T. H.

MAGNUS, SIR PHILIP: English educationist; born in London Oct. 7, 1842; educated at University College in that city, and at the University of London (B.A. 1863; B.Sc. 1864). Destined for the Jewish ministry, he pursued his studies in Berlin (1865–66). On his return to England he became one of the ministers of the Berkeley Street Synagogue, London. At the same time he did much private teaching, and was professor of mechanics at the Catholic University. His "Lessons in Elementary Mechanics" (London, 1874) was for a long time the standard text-book on the subject. In 1880 he was appointed secretary of the City and Guilds of London Institute for the Advancement of Technical Education, and in that capacity became the leading authority on technical education in the United Kingdom. He was a member of a royal commission for this subject (1881–84), visiting in connection therewith the chief educational centers of western Europe. In 1886 he was knighted in recognition of his services to education. In 1888 he published a work on "Industrial Education," as one of a series of text-books on education edited by him. He was principal of the Finsbury Technical College from 1883 to 1885, and a member of the London School Board in 1890 and 1891. In 1900 he became fellow of the senate of London University, and at the present time (1904) is connected in an honorary capacity with many important educational institutions.

Magnus' work at the Guilds Institute caused him to resign his position in the Jewish ministry; but he has retained his interest in many communal institutions, being vice-president of the Anglo-Jewish Association, president of the Deaf and Dumb Home, and a representative on the board of deputies of the Berkeley Street Synagogue, of which he has been also a warden.

MAGYAR ZSIDÓ SZEMLE: Hungarian Jewish monthly review; established in 1884 by Josef Simon, secretary of the Jewish chancery, Wilhelm Bacher, and Josef Bánóczi; the two latter being professors in the "Landesrabbinerschule" of Budapest. Its purpose is to promote the scientific knowledge of Judaism, and at the same time to disseminate information concerning the social and legal conditions of the Jews. The editorship was assumed by Bánóczi and Bacher, who retired in 1890 in favor of L. Blau and F. Mezey. The latter resigned at the end of 1895 after the Ungarisch-Israelitischer Litteraturverein had been founded through the efforts of the "Magyar Zsidó Szemle," which thereafter became a quarterly under the sole editorship of Blau. Its list of contributors includes Americans as well as Europeans. It is the first and at present (1904) the only Jewish scientific periodical published in Hungarian, and has attracted a large number of contributors from among the younger generation.

MAGYAR ZSINAGOGA. See PERIODICALS.

MAH NISHTANNAH (lit. "wherein is distinguished"): The opening words of the child's questions to the father in the Passover Haggadah; the whole of the domestic service of the Passover is sometimes, familiarly, so named. The questions are often chanted in the students' cantillation of the Talmudical schools; the text thus intoned may be found in JEW. ENCYC. iii. 550.

A. F. L. C.

MAHAMAD (more correctly **MA'AMAD** [מעמד]): The board of directors of a Spanish-Portuguese congregation. The word is of Neo-Hebrew origin, and in the Talmud is applied to the representatives of the people present at the Temple service (Ta'an. 15b). The board consisted of four wardens and a treasurer, and its members were elected, or, more exactly, cooptated, from the "yehidim"—those who had full rights of membership in the synagogue. Whenever a vacancy occurred between elections, which happened chiefly through death, the remaining members, with eight ex-members, formed an electoral committee, and conferred upon one of their number, by lot, the right to nominate a new colleague from the congregation. If the assembly approved of the choice, it held good. This system naturally resulted in a monopoly of the administration of the congregation by a limited number of families. That this oligarchic circle might not become too narrow, it was decided that no one could be a member of the mahamad at the same time as his son, grandson, son-in-law, stepson, brother, brother-in-law, nephew, or cousin; and, furthermore, in order to insure just decisions, no one under twenty-five could be elected treasurer of the mahamad, and no one under forty could be warden, unless he had already served as treasurer. This was the rule in the BEVIS MARKS SYNAGOGUE of London, and the regulations were practically the same in the other Portuguese communities.

Rules of Election.

Despotic Rule.

The laws of the mahamad, according to which the affairs of the synagogue were administered, were called ASCAMOT. Basing its authority on them, the mahamad exercised over the members of the congregation a despotic control which degenerated into a sort of police supervision. No member could marry or be divorced without the consent of this board, nor could one bring a lawsuit against a fellow member without first consulting the mahamad on the subject, except in cases where such a delay in bringing complaint would cause him injury. No book, and no treatise of a religious or political nature, in any language whatsoever, could be printed without the permission of the mahamad. Thus Haham David Nieto published his "Maṭṭeh Dan" "con licencia de los Señores del Mahamad" (London, 1714), and Isaac Nieto dedicates his sermon on Yom Kippur "a los muy Ilustres SSrs. del Mahamad, y por su Orden Impresso" (*ib.* 1756). In London, for the greater political security of the congregation, every one was forbidden by the mahamad to join parties "which any of the people may form against the government, the ministry, or the judicial administration of the kingdom."

In the synagogue, or in the law-court of the mahamad, no one might oppose an order of the mahamad or of the presiding officer who represented it, or criticize such an order, or write or circulate writings containing adverse criticisms of actions taken by it. The haham of the congregation enjoyed the same protection. No non-Portuguese Jew might pray in the Portuguese synagogue without the permission of the mahamad, nor might any one refuse an office or function in the services, or in the administration of synagogal affairs, which the mahamad or its president might assign him. According to the ascamot of the Bevis Marks Synagogue of London, any one who did not accept election as a member of the mahamad, or who had not shown his willingness to accept it before the expiration of eight days, was fined £40; if he had been elected treasurer, he was fined £30. The strict application of this rule, in 1813, led Isaac D'Israeli to sever his connection with the Bevis Marks Synagogue, since he would neither accept the office of warden nor pay the fine of £40. The board was especially strict in the observance of the first ascama, that no one might hold services outside the synagogue, except in a house of mourning during the first seven days thereof.

Disciplinary Measures.

The mahamad was very prompt in imposing penalties where its regulations were ignored or violated, though excommunication, exclusion from the synagogue for a certain length of time, fines for the benefit of the poor-fund, withdrawal of all "miẓwot," forfeiture of the right to vote, and similar disciplinary measures began naturally in the course of time to lose their desired effect. Occasionally, moreover, the mahamad appealed to the secular authorities to execute its decrees, as in London in 1783, when it desired to remove those who, during the service on Purim, according to ancient custom, beat on the synagogue kettle-drums whenever the name of Haman was read from the Megillah. At Amsterdam, in the year 1670, the mahamad applied to the magistracy for confirmation and support in the execution of its decree that no one might sever his connection with the congregation even when under the strictest excommunication. A confession of repentance made by the delinquent before God and the congregation was sufficient to bring about a mitigation of the punishment or to secure a total revocation of the decree of excommunication.

The members of the mahamad were at the same time members of the tax-commission, and in this capacity were comprised among the "fintadores" (see Jew. Encyc. v. 388b, *s.v.* Finta).

In the Portuguese communities the affairs of the congregation and of the synagogue are still administered by a mahamad, although the disciplinary powers granted by the old ascamot have been very materially curtailed. The régime of the old mahamad of London is humorously described by Israel Zangwill in "The King of Schnorrers" (pp. 105 *et seq.*).

D. M. Sc.

MAHANAIM: City on the east of the Jordan, near the River Jabbok; first mentioned as the place where Jacob, returning from Aram to southern Canaan, had a vision of angels (Gen. xxxii. 1-2). This implies that Mahanaim was a sanctuary at a very early period. In the records in the Book of Joshua of the allotments to the tribes Mahanaim is accounted a part of the inheritance of the tribe of Gad (xxi. 38). Apparently it was on the border between Gad and Manasseh, and it was assigned as a Levitical city (Josh. xiii. 26, 30; xxi. 38; comp. I Chron. vi. 80).

Mahanaim gained a temporary prominence in the days of the beginnings of the kingdom. It was then a stronghold, adapted to serve as a refuge for fugitives of importance (II Sam. xviii. 24). To it Abner, Saul's general, brought Ish-bosheth, Saul's son and successor (II Sam. ii. 8); during his brief and ill-starred reign Mahanaim was his capital. To Mahanaim David fled at the time of Absalom's rebellion (II Sam. xvii. 24, 27; I Kings ii. 8), and made it his residence until his recall to Jerusalem. Later on it was the headquarters of one of Solomon's commissary officers (I Kings iv. 14). According to Maspero ("The Struggle of the Nations," p. 773), Mahanaim was among the cities plundered by Shishak during his invasion (I Kings xiv. 25) of Israelitish territory. There is no subsequent reference to the city in the annals. It is not improbable that a vigorous resistance to Shishak or to some other invader brought about its utter demolition. The form of the name appears to be dual, hence the common rendering "two companies" or "camps." The narrator of Jacob's plan (Gen. xxxii. 7) for avoiding the loss of all his property so understood the name. Many scholars at the present day prefer to regard the termination in this case as the expansion of a shorter ending rather than as a sign of the dual.

The exact location of Mahanaim is very uncertain, the Biblical data being inconclusive. The city was certainly in northern Gilead and in a situation which commanded an extensive view (II Sam. xviii. 24); it was approached from the south by way of the Jordan valley and probably through a wadi that debouched into it (II Sam. ii. 29). Most explorers agree in placing it at or near the wadi 'Ajlun.

MAHLER, ARTHUR: Austrian archeologist; born in Prague Aug. 1, 1871. After completing his studies at the gymnasium in Prague, he studied the history of art and archeology at the universities of Prague and Vienna (Ph.D.), and in 1902 became privat-docent in archeology at the German university at Prague. He has contributed a number of articles to the "Jahreshefte des Oesterreichischen Archäologischen Institutes" (of which institute he is a corresponding member), the "Revue Archéologique," and the "Journal d'Archéologie Numismatique." He is the author of "Polyklet und Seine Schule: ein Beitrag zur Gesch. der Griechischen Plastik" (Leipsic, 1902). He also delivered a series of lectures at the American School for Archeology at Rome.

S.

MAHLER, EDUARD: Austrian astronomer; born in Cziffer, Hungary, 1857. He was graduated from the Vienna public school in 1876, and then studied mathematics and physics at the university in that city, taking his degree in 1880. From Nov. 1, 1882, till the death of T. Oppolzer (Dec., 1886) Mahler shared in the latter's scientific labors. On June 1, 1885, he was appointed assistant in the royal Austrian commission on measurement of degrees.

Mahler has devoted himself chiefly to chronology. In early life he paid considerable attention to ancient Oriental history, Assyriology, and Egyptology, in which subjects he is at present privat-docent at the University of Budapest. On Sept. 6, 1889, he received the royal gold medal "litteris et artibus" of Sweden and Norway; and since 1898 he has been an official of the Hungarian National Museum.

Mahler has published: "Fundamentalsätze der Allgemeinen Flächentheorie," Vienna, 1881; "Astronomische Untersuchung über die in der Bibel Erwähnte Aegyptische Finsterniss," *ib.* 1885; "Die Centralen Sonnenfinsternisse," *ib.* 1885; "Untersuchung einer im Buche Nahum auf den Untergang Ninive's Bezogenen Finsterniss," *ib.* 1886; "Biblische Chronologie und Zeitrechnung der Hebräer," *ib.* 1887; "Fortsetzung der Wüstenfeld'schen Vergleichungs-Tabellen der Mohammedanischen und Christlichen Zeitrechnung," Leipsic; 1887; "Chronologische Vergleichungs-Tabellen," Vienna, 1889; "Maimonides' Kiddusch-Hachodesch," *ib.* 1890 (translated and explained); besides many papers in Hungarian as well as contributions to various German scientific journals, as "Zeitschrift der Deutschen Morgenländischen Gesellschaft," "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften," "Journal Asiatique," "Zeitschrift für Assyriologie," "Zeitschrift für Mathematik und Physik," and "Zeitschrift für Aegyptische Sprache."

Bibliography: Eisenberg, *Das Geistige Wien*, ii. 321-322.

S. N. D.

MAHLER, GUSTAV: Austrian composer; born at Kalischt, Bohemia, July 7, 1860; studied at the gymnasiums at Iglau and Prague, and entered the University of Vienna in 1877. He attended also the conservatorium in that city, studying pianoforte with Epstein, and composition and counterpoint with Bruckner. After conducting theater orchestras at Hall (Upper Austria), Laibach, and Cassel (where he directed the grand musical festival as a leave-taking), he was in 1885 appointed the successor of Anton Seidl at Prague, where, among other works, he conducted Wagner's "Ring der Nibelungen," "Meistersinger," and "Tristan und Isolde," the symphony of Bruckner, and the Ninth Symphony of Beethoven. From 1886 to 1888 he was kapellmeister at the Stadttheater in Leipsic, where, in the absence of Nikisch, he conducted the opera for six months. During the following years he contributed, by his splendid ability and skilful management, to bring about a thorough reorganization of the Royal Opera at Budapest, to which place he had been called in 1888. In 1891 he was appointed conductor at the Stadttheater in Hamburg, and held this position until 1897, when he accepted the position of kapellmeister of the Royal Opera, Vienna, succeeding Wilhelm Jahn as director in October of the same year. Soon thereafter he was converted to Christianity.

While generally recognized as one of the greatest musical leaders of the day, Mahler has, within the past few years, aroused considerable interest also by his compositions, among which the following are the most noteworthy: "Die Drei Pintos," an opera (Leipsic, 1888); symphony in D major (performed at Budapest in 1891, and also at the Weimar Music Festival); two symphonies, C minor (1895) and F major (1896); "Humoreske," for orchestra; "Das Klagende Lied," for soli, choir, and orchestra; three books of songs.

MAHOMET. See Mohammed.

MAHOZA (מחוזא, *i.e.*, "The City"): Babylonian city on the Tigris, three parasangs south of Ctesiphon. Near it was the citadel of Koke (אקרא דכובי, Χώχη), which was regarded as a part of Maḥoza. Owing to its proximity to the royal canal, Nehar Malka, it was called also "Maḥoza Malka" (Maoga-Malcha). Maḥoza existed in the third century (see below) and seems to have been inhabited solely by Jews, for one of the amoraim expressed his astonishment at not seeing a "mezuzah" on the gates of Maḥoza (Yoma 11a). Most of the Jews there were descendants of proselytes (Ḳid. 73a, b) and they are represented as given over to luxury, on account of which they were denounced as "children of Hell" (בני גיהנם; R. H. 17a), as "effeminate" (Shab. 109a), and as "drunkards" (Ta'an. 26a). The women of Maḥoza had a passion for jewelry, and when Levi b. Sisi promulgated a halakah permitting women to wear their jeweled head-dress on Sabbath, eighteen women of one street alone took advantage of that decision, while only twenty-four women in the whole city of Nehardea followed their example (Shab. 33a). On the other hand, the people of Maḥoza were intelligent (owing to their drinking the water of the Tigris; Ber. 59b) and charitable (B. Ḳ. 119a).

Maḥoza had an academy, seemingly founded about the middle of the third century by Joseph b. Ḥama, Raba's father, who was succeeded by Rabbah (Sherira, in Neubauer, "M. J. C." i. 29). The academy was most prosperous under Raba, who attracted thither many students and thereby caused the decline of Abaye's academy at Pumbedita. Thus Maḥoza, after Pumbedita, may with justice be called the home of the Talmud; but after Raba's death, owing to the lack of able successors, the academy of Maḥoza gave way to that of Pumbedita. Maḥoza was destroyed in 363 by the Romans under Julian the Apostate, during the war against the Persians. It was rebuilt, however, and became later the capital of a small Jewish state governed by the Prince of the Captivity (the "Resh Galuta"). This Jewish independence did not last long, for the Jewish army, under Mar Zutra, the exilarch, was defeated by Kobad, King of Persia, and Mar Zuṭra, with his grandfather Mar Ḥanina, was executed on the bridge of Maḥoza (*c.* 520); the Jews there were taken captive by Kobad, and the family of the exilarch escaped to Judea.

About the middle of the sixth century Chosroes Nushirvan built in the vicinity of Maḥoza a town on the plan of Antioch; he called it "Antiocheia-Rumia," but the Arabs called it "Al-Maḥoza" (Gregory Bar Hebræus, "Ta'rikh al-Duwal," ed. Pokocke, Arabic text, p. 150). This town also had a large Jewish population, the greater part of which was put to death by the Persian general Mebodes when he captured the town in the beginning of the seventh century.

MÄHRISH-OSTRAU: Town in Moravia, Austria. The congregation of Mährish-Ostrau is one of the youngest in Moravia, for Jews were not allowed to settle there until 1792, and it was not until 1848, when general freedom of residence was granted, that the congregation began to grow rapidly. It is now the second largest Jewish congregation in Moravia, and embraces a number of smaller neighboring communities, including Oderberg; it numbers 6,500 souls. It became a chartered congregation in 1875 and dedicated its synagogue in 1879 (on which occasion Chief Rabbi Jellinek officiated). The first rabbi of the congregation was Dr. B. Zimmels, who died in 1893. He was followed, in 1894, by the present (1904) incumbent, Dr. Jacob Spira. The community, since 1871, has supported a parochial school, which has now 200 pupils.

Among its institutions are the Jewish Women's Society, the Biḳḳur Ḥolim (with a membership of 220), and a bet ha-midrash. The community supports also a number of poor students.

D. J. Sr.

MAḤZOR (plural, **Maḥzorim**): Term applied to the compilation of prayers and piyyuṭim; originally it designated the astronomical or yearly cycle. By the Sephardim it was used for a collection which contains the prayers for the whole year, while the Ashkenazim employed it exclusively for the prayer-book containing the festival ritual. The Maḥzor varies with the custom (מנהג) of the countries or cities in which it is used. Among the different European Maḥzorim the oldest is the "Maḥzor Romaniya," known also as "Ḥazzaniyya shel Romaniya," or "Grigos." It originated in the Byzantine empire (whence the name "Romaniya"), and differs from the Ashkenazic in that it contains fewer poetical compositions of Ḳalir. It was edited by Elijah ben Benjamin ha-Levi (who enriched it with poetical compositions of his own), and according to Zedner was published first at Venice, in the printing-office of Daniel Bomberg, and then at Constantinople (1573–1576). It is divided into two large volumes and contains, besides the prayers for the year and the piyyuṭim, the Five Scrolls, the Book of Job, the Haggadah of Passover, the beginnings and endings of the Sabbatical sections of the Pentateuch, and calendric rules.

Roman Rite.

From the Byzantine empire the use of piyyuṭim was introduced into southern Italy, and thence into Rome. The Romans adopted some parts of the Maḥzor Romaniya, discarded others, and added much that was new, thus forming a new rite known by the name "Minhag Bene Roma," or "Minhag Lo'azim," or "Minhag Iṭalyani." The Roman ritual was widely disseminated from Rome, and after 1520 the Greek ritual was based upon the Roman Maḥzor, which served also as a basis for the rituals of Corfu and Kaffa. The Roman Maḥzor was published first at Soncino in 1485. Johanan Treves wrote a commentary on it under the title "Ḳimḥa de-Abishona," which was published, together with the text, at Bologna in 1540. An Italian translation of the Maḥzor was published at Bologna in 1538, at Vienna in 1823, and at Leghorn in 1837.

Ashkenazic Rite.

The use of piyyuṭim was introduced into northern Europe probably from Italy. There, again, the Maḥzor underwent many changes, and a German ("Ashkenazi") ritual was established which is contained in the "Maḥzor Ashkenaz," the "Maḥzor Pehm [Bohemia] we-Polin [Poland]," and the "Minhag Ẓarfat" (= "French ritual"). Of these the first two only are now in use. The French ritual was never published; it is extant partly in manuscript and partly in the ritual of the three Italian communities of Asti, Fassano, and Moncalvo, where many French Jews settled after their expulsion from France in 1306 and 1394. The several Maḥzorim included in the Ashkenazic ritual vary in some details, but agree in essentials. They are distinguished from those of other rituals in containing numerous piyyuṭim based upon the Halakah and Haggadah. The German ritual is used by the Jews in Germany, Bohemia, Moravia, or Silesia, Prussian Poland, Russia, Austria, Hungary, France, and England. The Ashkenazic Maḥzor was first published about 1521, the Polish in 1522. Among the commentaries on the German and Polish Maḥzor, which have often been published together with the text, are those of: Benjamin ben Meïr ha-Levi of Nuremberg (Tanhausen, 1540), Isaac ben Jacob Jozebel (entitled "Hadrat Ḳodesh," Venice, 1554), an anonymous writer (entitled "Ma'agle Ẓedeḳ," Venice, 1568), Ẓebi Hirsch Zundels (Lublin, 1579), Nathan Shapira (Cracow, 1604), Joseph Bezaleel Kaẓ Meḥoḳeḳ (Prague, 1616), a second anonymous writer (with additions entitled "Sefer ha-Masbir," by Joseph עששא, and with glosses and notes entitled "Masbir he-Ḥadash," by Moses Kosmann, Amsterdam, 1667), Hirz Shatz (Wilhelmsdorf, 1673), Benjamin Wolf Heidenheim (Rödelheim, 1800), Uri Feibus ben Aryeh Löb (entitled "Ḳeri'e Mo'ed," Breslau, 1805), Moses Israel Büdinger (Metz, 1817), and Jehiel Michael ha-Levi (entitled "Maṭṭeh Lewi," Slobuta, 1827).

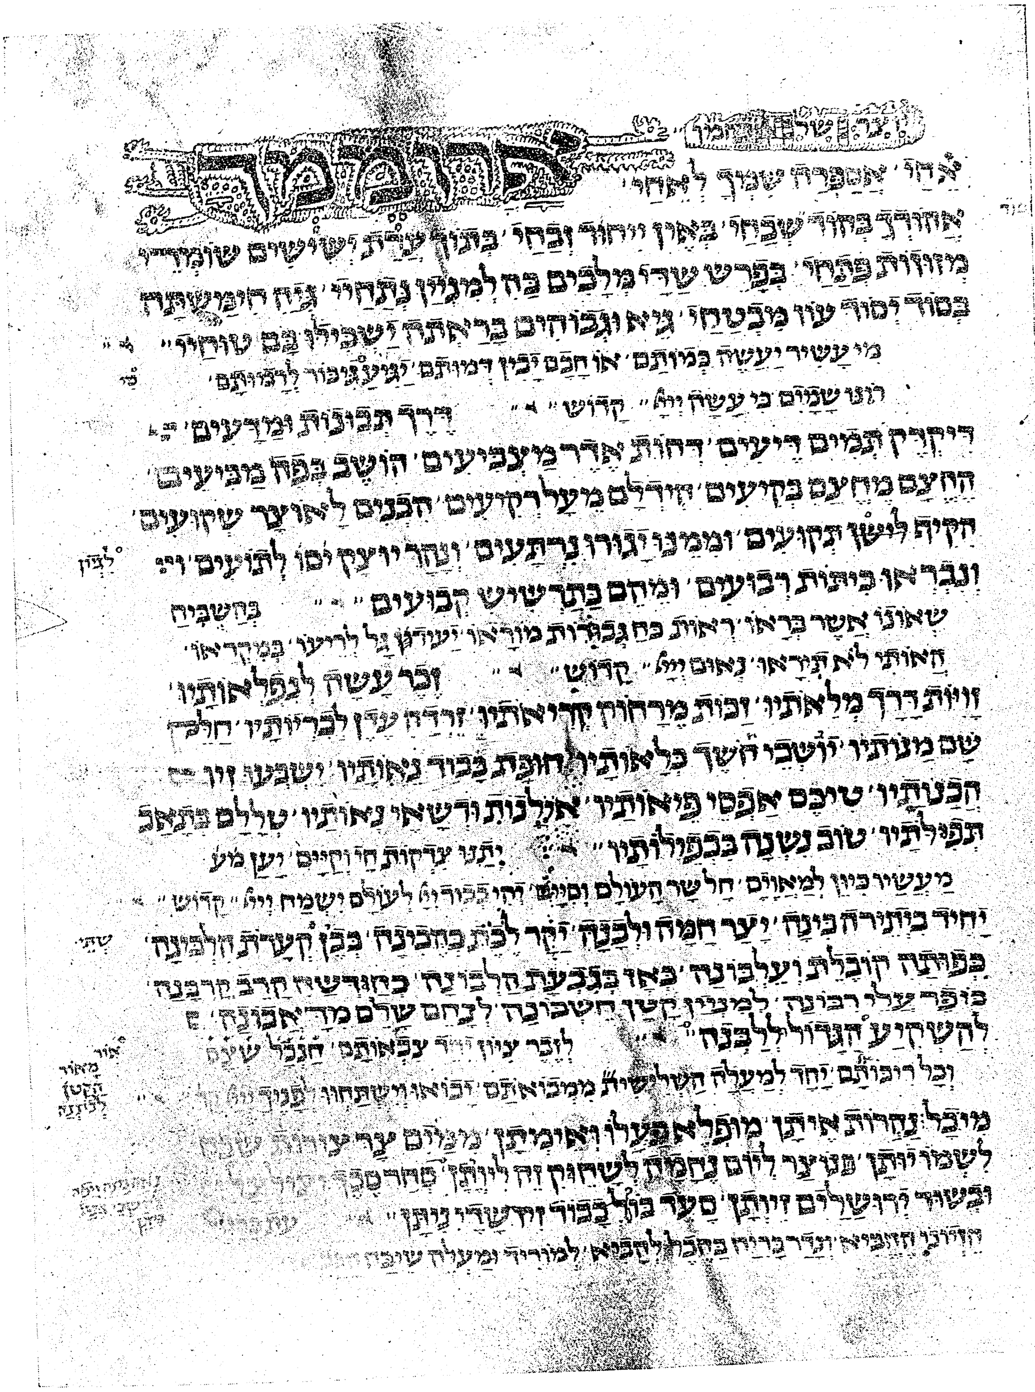
Translations into German.

Translations of parts of the German Maḥzor into the vernacular of the countries in which they were used began to be made as early as the fourteenth century. In 1571 Abigdor ben Moses published a Judæo-German translation of the Maḥzor for New-Year and the Day of Atonement. In 1600 the Judæo-German translation of the whole Maḥzor was published by Meïr Anshel ben Joseph Mordecai of Posen. A German translation of the whole Maḥzor was first published by Benjamin Wolf Heidenheim, 1800. He was followed by Prosper of Alsace (Metz, 1817), Moses ben Israel Landau (Prague, 1834), Moritz Frenkel (Berlin, 1838–40), I. N. Mannheimer (Vienna, 1840), Moses Pappenheimer and Jeremiah Heinemann (Berlin, 1840–41), Raphael Jacob Fürstenthal (Krotoschin, 1845), Meïr ha-Levi Letteris (Prague, 1845), and Michael Sachs (Berlin, 1855). A French translation of the whole Maḥzor was published by Elhanan Durlacher (Paris, 1852).

The first attempt to render the Maḥzor into English was made by A. Alexander, who in 1787 published the piyyuṭim for the eve of the Day of Atonement, and in 1789 the whole service for New-Year. In 1794 David Levi published an English version of the services for New-Year, the Day of Atonement, and the feasts of Tabernacles and Pentecost, and thirteen years later gave a new version of the whole Maḥzor. In 1860 a new English version was published by David Aaron de Sola. A Dutch translation of the entire Maḥzor was published by Gabriel Isaac Pollack in 1841. The services for New-Year and the Day of Atonement were rendered into Russian by Rabbi Hurwitz after 1880.

In Spain.

Spain, in the Middle Ages the home of Jewish poetry, could hardly be satisfied with the piyyuṭim of Ḳalir, which had been introduced either from Babylonia with the "Siddur" of R. Amram Gaon, or from Italy. These, therefore, were replaced by new piyyuṭim composed by Spanish poets, as Joseph ben Abitur, Solomon Gabirol, Isaac Ghayyat, Judah ha-



Page from a Folio Manuscript Maḥzor of the Fourteenth Century.

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

Levi, and Abraham and Moses ibn Ezra. Indeed, the number of piyyuṭim composed by Spanish poets was so great that almost every Spanish city had its own ritual. After the Spanish exile the same ritual was adopted by all the Sephardim with the exception of the Catalonian and Aragonian congregations of Salonica, which still use their old Maḥzor for New-Year and the Day of Atonement.

The Maḥzor of the Sephardic ritual was first published at Venice in 1614. As representing distinct branches of the Sephardic ritual may be regarded: the Tripoli Maḥzor for New-Year and the Day of Atonement (published first at Venice in 1648, under the title "Sifte Renanot"); the Maḥzor of Tunis (published at Pisa); the Maḥzor of Algiers ("Minhag Algaza'ir," published first at Amsterdam in 1685); and the maḥzorim of Provence and Languedoc, four of which are still extant—those of Avignon, Carpentras, Cavaillon, and Montpellier. Many piyyuṭim of the Sephardim were incorporated into the Maḥzor of northern France, and some of them entered the German Maḥzor. Parts of the Spanish Maḥzor, like the "'Abodah" of Joseph ben Abitur, the "Azharot" of Solomon ibn Gabirol, and various poems by Isaac ibn Ghayyat, were annotated by Jacob Anatoli, Moses ibn Tibbon, Isaac ben Todros, Simon Duran, and by others. Jacob Tam compiled a maḥzor modeled upon the Spanish Maḥzor, and many liturgical poems of Spain are found in the Maḥzor Vitry, compiled by Simḥah ben Samuel of Vitry, pupil of Rashi.

The Spanish Maḥzor exerted an influence upon the Karaite ritual. Several rabbinical poems of Spanish origin were introduced into the Karaite service before it was arranged by Aaron ben Joseph. See Liturgy; Poetry; Siddur.

MAIMING. See Mayhem.

MAIMON (MAIMUN) BEN JOSEPH: Spanish exegete and moralist; born about 1110; father of Moses Maimonides. He studied under Joseph ibn Migash at Lucena, and became a dayyan. He was the author of a commentary, in Arabic, on the Pentateuch, fragments of which are quoted by his grandson Abraham. Maimon wrote in Arabic also on the "dinim" concerning the ritual and the festivals. It is, possibly, from this source that Maimonides quotes in his commentary on the Mishnah (Bek. viii. 7; 'Eduy. i. 3, iv. 7; and Sheb. vi. 7) and in his "Yad" (Sheḥiṭah, xi. 10). His only extant work, however, is a letter of consolation which has been identified with the "Iggeret ha-Shemad" attributed to his son; the Arabic text was edited and translated by L. M. Simmons ("J. Q. R." ii. 66–101). It was written in the year 1160, while Maimon and his son Moses were at Fez. They left Fez in 1165 and arrived at Jerusalem on Oct. 12 in that year (see Moses ben Maimon).

J.

MAIMON, MOISEI LEIBOVICH: Russian painter; born at Wilkowiszk, government of Suwalki, Russian Poland, Feb. 4, 1860. After attending the schools of painting in Warsaw and Wilna he entered, in 1880, the Academy of Fine Arts at St. Petersburg; in 1881 he was awarded a silver medal for a painting from life, and in 1883 was graduated. At the exhibitions of the academy in 1884 and 1885 he was again awarded silver medals. In 1885 and 1886 Maimon executed portraits of the daughter of General Minkevitz and of the son of Baron Ungern von Sternberg. In October of the latter year he was awarded a gold medal by the academy for his "St. Irene Cures St. Sebastian," and for his "Ivan the Terrible Taking Orders Before His Death from the Metropolitan" the title of "Artist of the First Degree" was conferred upon him. He painted many portraits, among them those of the czar, czarina, the three princes, and Prof. Daniel Chwolson (1900; St. Petersburg Artists' Exhibition). His paintings include: "The House-Cleaner," "The Wagons at the Market-Place," "An Applicant," and "The Poli-

ticians" (exhibited 1889 and 1891; these represent chiefly peasant types); "He Lost His Way," "An Old Man," "A Girl's Head," and "The Fishers" ("Blanc et Noir" exhibition of 1891); "A Corner in the Theater," "In the Kitchen," "Buying Groceries," and "Repairing His Property" (academy exhibition of 1892); "A Cheap Restaurant" (St. Petersburg Art Exhibition of 1892); "The Maranos" (1893; Academy of Fine Arts); "The Mushroom-Seller," "A Girl Student," and "The Peasant Elder" (St. Petersburg Artists' Exhibition of 1894); "The Invitation," "The Broken Heart" (1895); "A Prayer in the Woods," "The Bouquet Fading Away," "The Southern Girl," "The Servant-Girl," "An Old Man" (1896); "A Woman's Head" (St. Petersburg Exhibition, 1899, held in the palace of Baron Shtiglitz).

Maimon attained also considerable success in caricature. In 1900 he published two albums, one containing ten portraits of women, and the other ten portraits of men, all of persons mentioned in the Bible; some of these were copies from works of the great masters.

"The Maranos" represents a Passover night in a rich Marano home. The family is seated at the table, at the head of which an old man, clothed in white, is reading from the Haggadah. The door opens suddenly and a masked and armed force of the Inquisition enters. The family is horror-stricken, with the exception of the old man, who continues to read quietly, with his hand on the arm of the chair, and by his attitude seeming to say: "I will finish my reading and then I shall be ready." For this painting he was made "Academician and Titular-Rath."

Maimon contributed several articles to the weekly edition of the "Voskhod," and an article of his in Hebrew was presented, in the form of a pamphlet, by "Ha-Meliẓ" to its readers.

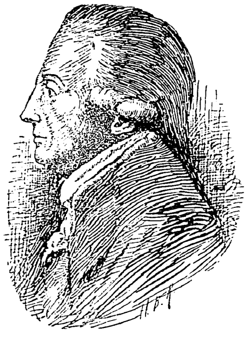
H. R. J. G. L.

MAIMON, SOLOMON BEN JOSHUA: Philosophical writer; born at Nieszwicz, Lithuania, in 1754; died at Niedersiegersdorf, Silesia, Nov. 22, 1800. Endowed with greaty ability, he became versed in rabbinical literature while still a child. He was married at the age of twelve, by his father, to the daughter of a widow of his native town; at the age of fourteen Maimon was a father. Pressed by his mother-in-law, with whom he was perpetually quarreling, to earn a livelihood, he became tutor to the family of an innkeeper in a neighboring village. His days were spent in expounding the Pentateuch to his unpromising pupils, and the greater part of his nights in studying Jewish philosophical literature. He derived special pleasure from speculative science. Maimonides' "Moreh Nebukim" became his guiding star, and it was in token of reverence for that great master that he assumed the name of "Maimon." He soon plunged into cabalistic mysticism, which he endeavored to place upon a philosophical basis, being convinced that the Cabala was an attempt, veiled in allegory and fable, at a scientific explanation of existence. This endeavor of Maimon's irritated the Ḥasidim with whom he associated, and he received rebukes instead of the expected compliments. Disillusioned, he turned to secular studies. Maimon began to study physics, especially optics, from old German books, which he procured at considerable pains. The further he advanced in the study the stronger grew his innate thirst for knowledge, and, being harassed both by his implacable mother-in-law and by his coreligionists, who began to regard him as a heretic, he decided to go to Germany and there study medicine. A pious merchant accorded him passage to Königsberg, and, after many struggles, at the age of twenty-five he reached Berlin.



Solomon Maimon.

Early Studies.

But a rude reception awaited the future philosopher, whose words Goethe was to treat with respect, and to whom Schiller and Kerner were to pay tributes of praise; he was refused admission as a vagabond by the Jewish gatekeeper. In his despair Maimon appealed to a rabbi he had met, showing him the manuscript of his commentary on the "Moreh." Unfortunately, the rabbi belonged to those for whom Maimonides' philosophical work is the symbol of heresy. For six months Maimon wandered about the country, in company with a professional beggar, until he reached Posen. There he was befriended by the pious rabbi Hirsch Janow, who, conceiving a high opinion of Maimon's rabbinical learning, furnished him with means of subsistence. After two years of comfortable life Maimon grew weary of his superstitious surroundings, and recklessly wounded the religious feelings of his Orthodox protectors. Again he went to Berlin; this time, owing to the protection of a countryman of his settled there, he was admitted. Soon a happy accident brought him into contact with Moses Mendelssohn. In reading Wolff's "Metaphysics" Maimon was quick to detect the deficiencies in his proofs of the existence of God; Maimon wrote a criticism of them and sent it to Mendelssohn, who, recognizing in him a profound thinker, took him under his protection.

Received in Berlin.

Maimon had now an excellent opportunity to begin an honorable career; but his mind, fed on metaphysical problems, had become inadaptable to any regular occupation. He abandoned his project of studying medicine and took up pharmacy; but after three years of study he was not in a position to exercise it professionally. He frequented bad society, acquired habits of intemperance, and made a profession of cynicism which scandalized his protectors. Finally he was abandoned by Mendelssohn and had to leave Berlin. Mendelssohn, however, gave him letters of recommendation which secured him a good reception in the leading Jewish circles of Holland, whither he went after a short stay in Hamburg. In Holland, again, his uncouth manners and unman-

Resorts to Conversionists.

ageable temper alienated his friends. In desperation he returned to Hamburg and, in order to improve his position, decided to embrace Christianity. Addressing a letter to a Lutheran clergyman, he expressed his readiness to abandon Judaism. Maimon, however, had a natural aversion to hypocrisy, and naively confessed that it was not religious conviction that made him prefer Christianity, for, he says, Judaism is more in keeping with reason than is Christianity. The honest clergyman naturally refused to baptize him, but procured him the means of entering the gymnasium of Altona in order that he might improve his knowledge of languages.

After two years Maimon left the gymnasium and returned to Berlin. His former friends, especially Mendelssohn, befriended him again, and sent him to Dessau, where he was to translate into Hebrew German scientific works intended for circulation among the Russian and Polish Jews. Their publication, however, was abandoned, and Maimon, dissatisfied with his friends, went to Breslau, where, through the assistance of Ephraim Kuh and Professor Grave, he found pupils. While there Maimon received a visit from his son, then twenty years of age, who demanded, in the name of his mother, that Maimon should return to his family or give her a letter of divorce. Maimon had refused a similar demand, made through a messenger, while he was still in Hamburg, because he hoped to be able in the near future to support his family in his native country; now that he could no longer entertain such a hope he endeavored to persuade his wife and son to join him in Germany. They refused, however, and Maimon finally gave the desired divorce.

Philosophic Essays.

In 1786 Maimon once more returned to Berlin, and, protected by Ben David, Asher, and Marcus Herz, devoted himself to literary-philosophic activities. In 1790 Count Kalkreuth gave him an asylum on his estate at Niedersiegersdorf. Until that year Maimon had published only philosophical articles. In 1788 he became acquainted with Kant's philosophy, and under its influence wrote "Versuch über die Transcendentale Philosophie" (Berlin, 1790), in reference to which Kant declared, in a letter to Marcus Herz, that of all his critics and opponents Maimon was the most acute. In 1791 Maimon published a philosophical lexicon, in which he had collected a series of dissertations on the principal points of philosophy. This work gave rise to a violent controversy between him and Reinhold; Maimon defended his views in "Streifereien im Gebiete der Philosophie" (*ib.* 1793).

His "Kritische Untersuchungen."

After having published three historical and critical works on philosophy—"Ueber die Progresse der Philosophie" (*ib.* 1793); "Versuch einer Neuen Logik" (*ib.* 1794), in which he attempted to expound an algebraic or symbolic system of logic; and "Die Kategorien des Aristoteles" (*ib.* 1794), with explanatory notes—propædeutic to his theory of logic—Maimon produced his most important work, "Kritische Untersuchungen über den Menschlichen Geist" (*ib.* 1797), which secured him a prominent place among the historians of philosophy. Therein he originated that speculative monistic idealism which, during the first half of the nineteenth century, pervaded not only philosophy, but all sciences, and by which Fichte, Schelling, and Hegel were influenced. The great question at issue in Kant's analysis of the mind was, "Has man any ideas which are absolutely and objectively true?" the answer to which depends on another question, "Has man any ideas independent of experience?" for if all ideas depend on experience, there can be no question of objective ideas, experience being essentially subjective.

Kant answered the second question in the affirmative, and the first in the negative. He showed that in consciousness certain elements are given which are not derived from experience, but which are necessarily true. However, these given elements or "things in themselves" man knows only as they appear to him, but not as they are "per se." This concept of "things in themselves" is rejected by Maimon, who holds that the matter of exterior objects which produce impression on man's sensibility is absolutely intelligible. He also contested the Kantian distinction between sensibility and understanding as well as the subjectivity of the intuitions of time and space. For him, sense is imperfect understanding, and time and space are sensuous impressions of diversity, or diversity presented as externality. In practical philosophy he criticized Kant for having substituted an unpractical principle for the only motive for action—pleasure. The highest pleasure is in knowing, not in physical sensation, and because it recognizes this fact the "Ethics" of Aristotle is much more useful than the Kantian.

Autobiography.

Maimon's autobiography was published by K. Ph. Moritz (Berlin, 1793). In this work he gives a résumé of his views on the Cabala, which he had expounded in a work written while he was still in Lithuania. According to him the Cabala is practically a modified Spinozism, in which not only is the world in general explained as having proceeded from the concentration of the divine essence, but every species of being is derived from a special divine attribute. God, being the ultimate substance and the ultimate cause, is called "En Sof," because He can not be predicated by Himself. However, in relation to the infinite beings, positive attributes were applied to Him, and these attributes were reduced by the cabalists to ten—the ten sefirot. The ten "circles" correspond to the ten Aristotelian categories, without which nothing can be conceived. In the same work Maimon expresses his views on Judaism. He divides Jewish history into five main periods: (1) the period of natural religion, extending from the Patriarchs to Moses; (2) that of revealed or positive religion, from Moses to the Great Sanhedrin; (3) the mishnaic period; (4) the Talmudic period; (5) the post-Talmudic period. Maimon censures the Rabbis for having burdened the people with minute prescriptions and ceremonies, but praises their high moral standard. Only those, he says, who have not penetrated into the real spirit of the Talmud and who are not familiar with the custom of the ancients, especially of Orientals, of veiling their theological, ethical, and philosophical teachings in fable and allegory, can find in the old rabbinical writings matter for derision.

Maimon was the author of the following Hebrew works, of which only the first has been published: "Gib'at ha-Moreh," a commentary on the first part of Maimonides' "Moreh Nebukim," preceded by a sketch of the history of philosophy (Berlin, 1791); "Ta'alumot Ḥokmah," on mathematical physics; and "Ḥeshek Shelomoh." The last work is in four parts: (1) "Ma'aseh Nissim," on the twelve sermons of R. Nissim; (2) "'Ebed Abraham," on Ibn Ezra's commentary on the Pentateuch and Psalms; (3) "Ma'aseh Libnat ha-Sappir," reflections; (4) "Ma'aseh Ḥosheb," on algebra.

MAISON, KARL: Bavarian merchant, manufacturer and deputy; born in Oberdorf, Württemberg, Sept. 18, 1840; died in Munich Sept. 29, 1896. He was educated at the primary and Latin schools at Oberdorf, and received a business training at Offenbach-on-the-Main. When Maison attained his twenty-fourth year he became a partner in the firm of A. Maison, established in Munich. In 1871 Maison was appointed a "Commerzienrat" and became a member of the Upper Bavarian Chamber of Commerce and Manufacture in 1875. Subsequently he was elected a director of that body and chosen Danish and Swedish-Norwegian consul. Maison represented Munich in the Chamber of Deputies from 1887 to 1896.

MAJOR, JULIUS: Hungarian composer of music; born Dec. 13, 1859, at Kaschau on the Hernad, chief town of Aber Uj Var district, Hungary. He commenced his studies at the Realschule in Pesth, intending to become an engineer, but left that institution and entered the Landesmusikakademie, where he was a pupil of Volkmann and Erkel. Subsequently he was appointed music-teacher in various institutions, and at the present time (1904) he holds the office of instructor in music at the Jewish teachers' seminary at Budapest. At the Pesth gymnasium he organized a pupils' orchestra; in 1894 he founded the Hungarian Women's Chorus; and in 1896 he established a school of music which enjoyed considerable popularity.

Major is an excellent pianist and has become known through his composition of chamber-music. His works include: two trios; several violin sonatas; a piano concerto; a serenade for stringed orchestra; a "Hungarian Sonata"; several songs; and choruses for female voices.

MAJOR, SOLOMON IBN: Turkish rabbi; flourished toward the end of the sixteenth century at Salonica, where he was head of the yeshibah. Many distinguished rabbis were Major's pupils, among them being Joseph Florentin, Abraham Falcon, and his own son Moses ibn Major. He was the author of a number of responsa, some of which are printed in the "Teshubot" of Ḥayyim Shabbethai (Salonica, 1651), some in the latter's "Torat Ḥayyim" (*ib.* 1713), and some in Judah Lerma's "Peleṭat Bet Yehudah" (Venice, 1647).

MAJORCA. See Balearic Islands.

MAJORITY (רוב): 1. More than half of a given number or group; the greater part: applied to opinions. In their endeavor to find a Biblical basis for every principle of law the Rabbis interpreted Ex. xxiii. 2 so as to derive the majority principle from it (Sanh. 3b). But since this passage stands in connection with laws regulating the administration of justice, the principle was applied only where a definite number (רובא דאיתא קמן) was concerned, as when a difference of opinion arose among the judges constituting a court of justice (see Acquittal); or as in the case, frequently quoted in the Talmud, where a piece of meat was found in a street that contained nine shops for kasher meat and one for ṭerefah, in which case it was held that the meat came from one of the kasher shops, since they were in the majority. Other Biblical passages and laws had to be employed in order to find a Mosaic basis for the majority principle where the numbers were not definite (רובא דליתיה קמן; Ḥul. 11a, b). The principle was followed in all legal and ritual enactments and gave rise to a number of maxims, by which the Rabbis were guided in the decision of various cases. For instance, the majority of women marry when they are virgins (Ket. 16a); most children are born after nine months of pregnancy (Yeb. 37a); most women give birth to healthy children (Yeb. 36a); the majority of idolaters are loose in their moral conduct (Ket. 13b); most of those engaged in the ritual slaughtering of animals are expert (Ḥul. 3b); most of the actions of minors are of no value (Ḥul. 86a); the majority of animals yield milk only after they have borne young (Bek. 20b); most sick people recover, while most of those who are dangerously sick ("goses") do not recover (Giṭ. 28a).

These and many similar maxims scattered throughout the Talmud were valuable not only in the decision of a doubtful case (see Ḥazaḳah), but also in determining the state of an object. There were, however, some rabbis who would not be guided entirely by the majority principle, holding that the case under consideration might belong to the exceptional minority (חייש למיעוטא). R. Meïr (Yeb. 61b) forbade a minor from performing the levirate rite or the ḥaliẓah, declaring that he might later be found to be impotent, although the majority of persons are not impotent. R. Jose (Yeb. 67a, b), R. Akiba (Bek. 20b), R. Ṭarfon (Mak. 7b; comp. Ḥul. 11b; Tos. Ḥul. 11b, *s.v.* "Laḥosh"), and many other tannaim and amoraim also, were careful to provide for the minority. But the consensus of opinion among the Rabbis was to follow the majority in all cases, even where capital punishment was involved (Sanh. 69a).

"Majority" of an Act.

The performance of the greater part of an act was sometimes counted, on the majority principle, as equivalent to the performance of the whole act. If, in slaughtering an animal, one cuts through the greater part only of the esophagus and the windpipe, although the Law requires that both these be severed, the animal is ritually fit for food (Ḥul. 27a; see SHEḤIṬAH). Similarly, after the greater part of a child's body protrudes from the womb, the child is considered as born (Nid. 29a).

When the principle of majority conflicted with the principle of ḥazaḳah the former took precedence (Ḳid. 80a). The same is the case when it conflicts with the principle of proximity ("ḳarob"; B. B. 23b). The principle of majority does not apply to monetary cases (B. B. 92b; B. Ḳ. 27b; Tos. B. Ḳ. 27b *s.v.* "Ko."). While in the case of a disagreement among the judges the opinion of the majority is followed (see ACQUITTAL), in the case of disagreeing witnesses majority is entirely disregarded. If a hundred witnesses testified to a certain fact and two witnesses refuted their testimony the testimony of none was believed (Mak. 5b; Maimonides, "Yad," 'Edut, xviii. 3; see EVIDENCE).

2. The age at which the law permits one to manage his own affairs; full age; maturity. No definite age of maturity is given in the Bible. To the army, only those above twenty years of age were admitted (Num. i. 3). This was also the age-limit for those who had to pay the half-shekel when the people were counted (Ex. xxx. 14). The Levites were admitted to service at the age of thirty (Num. iv. 23; comp. viii. 24, where twenty-five is given as the age-limit; in I Chron. xxiii. 27 and in Ezra iii. 8 the age-limit is put at twenty; comp. Ḥul. 24a), and were dismissed from service at the age of fifty (comp. *ib.*). In the case of vows to the sanctuary ("'arakin"), mention is made of various ages with regard to determining the assessment value of the individual (Lev. xxvii. 1-8; see ESTIMATE; VOW).

The Age of Maturity.

The Rabbis, however, reckoned the age of maturity from the time when the first signs of puberty appear (Nid. 52a), and estimated that these signs come, with women, about the beginning of the thirteenth year, and about the beginning of the fourteenth year with men. From this period one was regarded as an adult and as responsible for one's actions to the laws of the community. In the case of females, the rabbinic law recognized several distinct stages: those of the "ḳeṭannah," from the age of three to the age of twelve and one day; the "na'arah," the six months following that period; and the "bogeret," from the expiration of these six months. In the case of males, distinction was made in general only between the period preceding the age of thirteen and one day and that following it, although, as will be seen below, other stages were occasionally recognized.

The attainment of the age of majority, however, did not of itself render one an adult; the prescribed age and the symptoms of puberty together were necessary to establish the majority of a person. If there were no signs of puberty at the age of majority (*i.e.*, at the beginning of the thirteenth year in a female and at the beginning of the fourteenth in a male) the person retained the status of a minor until the age of twenty. If after that period signs of impotence developed, thus explaining the absence of the signs of puberty, the person was admitted to the status of an adult; if such signs did not develop, the person remained in the status of a minor until the age of thirty-five years and one day—the greater part of the time allotted to man on earth (comp. Ps. xc. 10). In the case of a woman, the bearing of children was regarded as sufficient to establish her majority (Yeb. 12b; Maimonides, "Yad," Ishut, ii. 9; comp. "Maggid Mishneh" and "Leḥem Mishneh" *ad loc.*; for the whole subject see Nid. v. 3-8; vi. 1, 11-12; "Yad," *l.c.* ch. ii.).

Marriage of Minors.

The ḳeṭannah might be given in marriage by her father, and the marriage was valid, necessitating a formal divorce if separation was desired. Her earnings and her findings, also, belonged to her father, and he could annul her vows and accept a divorce for her (Nid. 47a; Ket. 46b). In the absence of her father, her mother or her brothers might contract a marriage for her, but such a marriage might be annulled by her without any formality before she reached the age of maturity (see MI'UN). Illegitimate intercourse with her carried with it the regular punishment for the transgressor, although she could not be punished (Nid. 44b). The na'arah, however, although still under the control of her father (Ḳid. 41a), was considered a responsible person; her vows were valid (Nid. 45b). The bogeret was regarded as entirely independent of her father's will and was looked upon as an adult in all respects (Nid. 47a).

The Rabbis recognized in males a stage similar to that of the ḳeṭannah. A boy nine years of age was regarded as being of a nubile age, so that if he had illegitimate intercourse with a woman forbidden to him she would be liable to punishment, although he could not be punished until he reached the age of maturity—thirteen years and one day (Nid. 44a). His marriage, however, was not valid (Ḳid. 50b; "Yad," *l.c.* iv. 7), although he could acquire a "yebamah" through intercourse (Nid. 45a; B. B. 156b). A stage similar to that of the na'arah was recognized by the Rabbis in the case of the rebellious son (Deut. xxi. 18-21). The period during which one might become liable to the punishment inflicted upon the rebellious son was extended to include the three months (six months in Yer. Sanh. viii. 1) immediately succeeding the age of maturity (Sanh. 69a). After a boy had reached the age of maturity he was regarded a responsible person in all ritual and criminal matters, and the court inflicted punishment upon him for any transgressions. The Rabbis entertained the belief that heavenly punishment was not visited for sins committed before the age of twenty (Shab. 89b; comp. B. B. 121b; Maḥzor Vitry, ed. Hurwitz, p. 550; Ḥakam Ẓebi, Responsa, § 49; but comp. "Sefer Ḥasidim," ed. Wistinetski, § 16, where the opinion is expressed that the heavenly punishment does not depend on age but on the intelligence of the transgressor; see also Asher ben Jehiel, Responsa, xvi. 1).

Business Transactions of Minors.

According to the Mosaic law minors are unable to enter upon any business transaction. The Rabbis, however, provided that those who are above the age of six and manifest an appreciation of business dealings should be able to dispose of movable property (Giṭ. 59a, 65a). After they had reached the age of maturity they might dispose even of real property that came into their possession through gift or purchase, but they could not dispose of inherited immovable property until they reached the age of twenty (B. B. 155a, 156a; see Consent; Gifts; Infancy). The same principle was followed with regard to their testimony. After the age of thirteen and one day their testimony was admitted, though in general only when the disposition of movable property was involved. If, however, they showed signs of intelligence and of an appreciation of the value of their testimony, they might testify also in cases involving immovable property (B. B. 155b; "Yad," 'Edut, ix. 8). Minors were disqualified from testifying in any case, although the testimony of an adult with regard to incidents that he had witnessed in his minority was in some cases admitted into evidence (Ket. 28a; B. Ḳ. 88a; see Evidence). For the age at which one might become a judge see Judge in Rabbinical Literature.

Although the minor was considered not responsible for any act of his and could not be summoned to court for any injury caused to another by him or by his property, still when one of his animals showed signs of viciousness (see Goring Ox) the court was obliged to appoint some one to take charge of the animal. There is a difference of opinion among the Rabbis as to what should be done if it caused damage after that, some thinking that the damage should be collected from the minor's property, and others that the trustee should pay the damages (B. Ḳ. 39a).

Religious Majority.

On arriving at the age of maturity the boy is obliged to observe all the commandments of Judaism (Ab. v. 21; comp. Maḥzor Vitry, *l.c.*; see Bar Miẓwah). From that time on he may be counted as one of the ten needed for public worship (Shulḥan 'Aruk, Oraḥ Ḥayyim, 55, 9), and he may even act as ḥazzan in case of emergency, although, as a rule, the ḥazzan is required to have a full beard (Ḥul. 24b; Shulḥan 'Aruk, *l.c.* 53, 6-8). While the minor is regarded in many respects as incapable of performing religious observances (Kil. xvii. 15; Ṭoh. viii. 6; Maksh. vi. 1) and is placed in the same category as the deaf-mute and the idiot (see Deaf and Dumb; Insanity) still parents are enjoined to train their children in the observance of religious duties and customs even before they reach the age of maturity. On the Day of Atonement children of nine years of age should be made to fast part of the day, and those who have reached the age of eleven and are healthy should fast the whole day (Yoma 78b, 82a). In all other religious observances, as in making the pilgrimage to Jerusalem on every festival (Ḥag. 2a, 6a), in attending the general assembly on Sukkot following the Sabbatical year (Ḥag. 3a; see Deut. xxxi. 12), and in wearing ẓiẓit or tefillin ('Ar. 2b), the father is expected to train his child during various stages of its minority.

MAKAI, EMIL: Hungarian poet; born at Mako Nov. 17, 1871; died at Budapest Aug. 6, 1901; son of Rabbi A. E. Fischer. He was educated at the Rabbinical Seminary in Budapest and distinguished himself as a student by his poetical talent. Some of the medieval Hebrew poets, like Gabirol, Ha-Levi, Moses ibn Ezra, Al-Ḥarizi, and Immanuel of Rome, he made known by his happy renderings of their productions. He wrote also "Absalom," a Biblical drama; "Zsidó Költökböl" (1891), a collection from the Hebrew poets; and "Enekek Eneke" (1892); and he published a few volumes of lyric poetry.

s. A. Ke.

MAKKEDAH: City situated, according to the Priestly description of tribal boundaries and groups of cities contained in the Book of Joshua (xv. 41), among the foot-hills bordering upon Judah and extending westward to the maritime plain. It is mentioned also several times in the narrative (Josh. x.) of the pursuit of the routed forces of the allied southern kings by the Israelites under Joshua, and once (xii. 16) in the list of the princes conquered during the southern campaign. Apparently Makkedah was a stronghold of some importance, being deemed worthy of especial mention side by side with Libnah, Lachish, and Hebron (x. 28-37). Near the city was a large cave in which the five allies sought refuge. When this was reported to Joshua he ordered the exit of the cave to be blocked by boulders and guarded. The army then followed the fleeing enemy and accomplished its utter defeat. On its return to Makkedah the five kings were led out and executed.

The site of Makkedah is much in doubt. Warren was the first to identify it with the modern Al-Mughar ("the cave"), several miles southwest from Ekron, and about eight miles from the sea and twenty-five miles from Gibeon. The determining reason for this identification is the presence of caves at Al-Mughar. According to Major Conder it is the only site in the Shefelah where caves are to be found. Eusebius declared that Makkedah was eight miles east of Eleutheropolis, but this seems incredible.

MAKKOT (מכות = "blows," "punishments"): Treatise of the Mishnah, Tosefta, and Gemara (Palestinian and Babylonian). It is fifth in the order of Neziḳin ("Damages"), following Sanhedrin, to which in contents it is closely related and with which it was formerly united (see Maimonides, "Haḳdamah"). It is divided into three chapters (containing respectively 10, 8, and 16 mishnayot), and treats of the conditions under which false witnesses are pronounced guilty of, and punished for, conspiracy (Deut. xix. 16 *et seq.*); of the conditions under which the homicide is interned in a city of refuge (Ex. xxi. 13; Deut. xix. 4-5); of the penalty of flagellation (Deut. xxv. 1 *et seq.*), when incurred and how administered. Following is an epitome of its contents:

Contents of First Section.

I. According to the Pentateuchal law, the false witness suffers the penalty which he intended should fall on his guiltless brother (Deut. xix. 19). However, there are cases where the same penalty can not be inflicted, as where conspirators would degrade a priest by falsely declaring him to be the offspring of a union between a priest and a divorcée, a union that would debar him from participating in priestly functions (Lev. xxi. 13-14); or where they would bring about an innocent man's banishment to a city of refuge by falsely charging him with manslaughter. In either case the same penalty can not be imposed: in the first instance, because the witnesses' children, who are entirely innocent, would be tainted; in the second, because the cities of refuge are for the protection of the involuntary homicide only (see HOMICIDE). Therefore the penalty is commuted from degradation or internment to flagellation. But in general the same penalty is meted out to false witnesses. Thus, where they conspire to have one adjudged indebted to another in a certain sum of money, and it is legally proved that their testimony is fabricated, they are jointly condemned to pay the accused a like sum. Or, where they testify that A had borrowed from B a certain sum to be repaid at the end of a month, and it is proved that the loan was made for ten years, they are jointly fined to the amount that would be given for the use of the sum in question for the period of ten years less the one month.

Where the penalty involved is capital or corporal punishment, each of the confuted witnesses is subjected to the full penalty. Thus, if they aver that a certain man had been sentenced to receive thirty-nine lashes, but had escaped before the execution of the sentence, and it is legally proved that their testimony is false, each of them will receive thirty-nine lashes. However, to subject the confuted witnesses to the penalty attached to the crime charged by them it must be legally demonstrated that they themselves could not possibly have witnessed the crime or the transaction concerning which they have testified, supposing it to have been committed, and it is necessary that the court should have pronounced their intended victim guilty, but should not have executed the sentence before the confutation. Nor can the false witnesses be found guilty of plotting and be subjected to the penalty involved by their accusation unless they constitute a legal number and a legal "set," and unless the whole set is confuted. (See ALIBI.)

If among a large number of witnesses one is discovered to be debarred from testifying in the case before the court, or to be disqualified from bearing witness anywhere, the whole number is disqualified. An escaped convict, being recaptured and brought before the tribunal that had originally convicted him, can have no new trial, but is dealt with according to the sentence passed. If such a one is brought before another tribunal and a legal number of witnesses testify that in their presence a certain court had found him guilty of a certain crime, and that he had escaped before suffering the penalty, the latter court is bound to have the convict duly punished. The chapter concludes with sentiments opposed to capital punishment. A sanhedrin that averages one sentence of death in every seven years is a murderous tribunal; Eleazar b. Azariah is of opinion that it is such if it average one sentence of death in seventy years; and Ṭarfon and Akiba declare that they would never have permitted the execution of a human being. Simon b. Gamaliel, however, believes that removing the fear of punishment would contribute toward an increase in bloodshed.

Accusation of Accidental Homicide.

II. Accidental homicide subjects its author to exile in one of the cities assigned as cities of refuge. Every Israelite is subject to this law, no exception being made on account of descent or station or relationship. A parent accidentally killing a child, or vice versa, is subject to exile; and so is the high priest. The only exception allowed is in favor of the sightless. But as "accidents" admit of gradation, not all accidental homicides are subject to the penalty of exile (see HOMICIDE). The number of the cities of refuge is six—three in Canaan and three beyond the Jordan (Num. xxxv. 13-14), and careful provision is made for their easy reach. On his way to the city the exile is accompanied by scholars whose duty it is to defend him against the avenger of blood. Once interned in one of the cities he remains there for life, or until the death of the high priest during whose term the accident occurred (Num. xxxv. 25 *et seq.*). If the high priest himself is the exile, the death of his successor does not release him; neither does the death of a high priest free an exile who has slain a high priest. If the exile goes beyond the bounds of the city, the avenger of blood may kill him with impunity (see AVENGER). In case the exile again becomes subject to exile, he is transferred from the district in which he had resided to another, but he must not leave the city. If honors are offered the exile in his asylum, he must not accept them without first acquainting the people with the reason for his presence there; if then the people think him worthy he may accept. When, on the death of a high priest, he returns to his original home, all the property he had left there is restored to him; but he can not resume an office which he held at the time of his banishment.

III. The third chapter enumerates fifty-nine offenses, each entailing flagellation. Of these, three are marital sins of priests; four, prohibited intermarriages; seven, sexual relations of an incestuous

Penalty of Flagellation.

nature; eight, violations of dietary laws; twelve, various violations of the negative precepts; twenty-five, abuses of Levitical laws and vows. When the offense has been persisted in, the punishment depends on the number of forewarnings (see Hatra'ah). The Mishnah gives thirty-nine as the maximum number of stripes the court may impose for any one misdemeanor; but the convict must be examined as to his physical ability to endure the full count without endangering his life. The convict is bound in bent position to a post, and the public executioner administers the punishment with a leather strap while one of the judges recites appropriate Scriptural verses (Deut. xxviii. 15, 29; xxix. 8; Ps. lxxviii. 38). Any one guilty of a sin which is punished by excision may be cleared by flagellation. The author of this midrash, Ḥanina b. Gamaliel, adds, "If by the commission of a sin one forfeits his soul before God, so much the more reason is there for the belief that, by a meritorious deed, such as voluntary submission to punishment, his soul is saved."

Gemarot.

The tractate concludes with a few haggadic passages bearing upon the punishment awaiting the sinner and the reward reserved for the righteous. The Gemara, Jerusalem as well as Babylonian, elaborates the concise rules embodied in the Mishnah, citing opinions and counter-opinions, Scriptural texts to prove one or the other, and precedents. Haggadot also abound there, but chiefly in the Babylonian. The following is quoted from the Yerushalmi: Referring to the provision that the roads leading to the several cities of refuge must be kept in good order (ii. 5 [ed. Krotoschin, p. 8]), Eleazar b. Jacob asserts that there were signs bearing the direction "miḳlaṭ" (= "refuge," "asylum"), and Abun states more exactly that the roads were provided with sign-posts attached to which were index-hands inscribed with the word "miḳlaṭ." Thereupon Phinehas remarks, "From the consideration of such merciful provisions one can learn the meaning of the saying of the Psalmist, 'Good and upright is the Lord, therefore will He point sinners the way [to the city of refuge]' " (Ps. xxv. 8, Hebr.).

S. S. S. M.

MAKO: Town in Hungary, in the county of Csanad. It has a total population of 33,722, of which 1,642 are Jews (1900). Jews began to settle there about the middle of the eighteenth century, under the protection of Stanislavich, the Bishop of Csanad, who, in 1740, assigned a special quarter to them. They soon formed a community, and by 1747 had established a ḥebra ḳaddisha. The first rabbi of Mako was Judah b. Abraham ha-Levi, who occupied the rabbinate from 1778 to 1824. He was succeeded by Salomon Ullman (1826–63). Ullman wrote a commentary on certain sections of Yoreh De'ah, under the title "Yeri'ot Shelomoh" (Vienna, 1854). He was followed by Anton Enoch Fischer (1864–96), former rabbi of Duna-Földvar. Fischer introduced German and (later) Hungarian in his sermons. Mako has a Jewish school (of which Marcus Steinhardt has been one of the teachers for forty years), established in 1851, a Jewish women's association, a Jewish students' aid society, and a Jewish women's lying-in hospital. The present (1904) incumbent is Dr. A. Kecskemeti.

D. A. Ke.

MAKOWER, HERMANN: German jurist; born at Santomischel, Posen, March 8, 1830; died at Berlin April 1, 1898. His father, recognizing the inadequate educational facilities of the town, sent him, alone and almost penniless, at the age of nine, to win a living and an education in Berlin. There he attended the Französische Gymnasium, secured a position as chorister in a synagogue, and met Siegmund Meyer, a boy of the same age, with whom he formed a friendship that lasted throughout his life. Makower gave private lessons, and after graduation served as "Referendarius" and assessor, and ultimately became "Grundbuchrichter" at the Berlin city court, a position never before held by one of his coreligionists. In 1857 he published his first contribution to legal literature, "Die Stellung der Vertheidigung im Preussischen Strafverfahren" (Berlin, 1857). He gave up his prospects for judicial advancement for the more substantial rewards of a career as legal practitioner.

Makower's activities in the sphere of commercial law were inaugurated by his "Studien zur Konkursordnung vom 8. Mai 1855" (Berlin, 1861). In the following year appeared his great work, in the preparation of which his friend Siegmund Meyer cooperated with him—"Das Allgemeine Deutsche Handelsgesetzbuch, Nebst dem Preussischen Einführungsgesetze vom 24. Juni 1861, und der Instruktion vom 12. Dezbr. 1861, für den Praktischen Gebrauch aus den Quellen Erläutert" (Berlin, 1862; 11th ed., 1893); this was followed by "Zur Revision der Deutschen Konkursordnung" (*ib.* 1894), and by a number of minor writings on insurance companies and the protesting of bills and notes, and by discussions of various points in commercial law.

He enjoyed a very large and lucrative practise, and won for himself a clientele among the greatest men of his time. One of the celebrated causes with which he was identified was that of the historian Theodor Mommsen, charged with slandering Prince Bismarck. He opened his argument at one of the several trials of this case with these words: "Two princes represent antithetical views; one, a prince of diplomacy, the other, a prince of learning; one, a man who makes history, the other, a man who writes history"; after appealing to the highest courts of the empire Mommsen was finally acquitted (1883).

Makower was zealously interested in the communal and congregational life of the Jews in Berlin, and earnestly supported the efforts to sustain the Lehranstalt für die Wissenschaft des Judenthums. For its benefit he delivered a lecture, Jan. 10, 1881, entitled "Unsere Gemeinde" (Posen, 1881). Another contribution to the literature of Jewish communal affairs was his treatise on "Die Gemeinde-Verhältnisse der Juden in Preussen" (Berlin, 1873). He was instrumental in the publication of the "Regesten zur Geschichte der Juden im Deutschen Reich," and was one of the most active in collaboration on the "Grundsätze der Jüdischen Sittenlehre." From 1866 to 1892 he was a member of the board of the Jewish community of Berlin; from 1870 to 1892 he was its president.

MAḲRE DARDEḲE: Name given in the Middle Ages to Hebrew glossaries primarily intended for the use of students of the Bible; its literal meaning is "teacher of children." The first and most noteworthy work of this kind is the one published at Naples in 1488, the author of which is Perez Trévôt. The work gives every Hebrew vocable, accompanied by a translation into Italian and Arabic and a short explanation in Hebrew, at times quoting the French glosses occurring in the Bible commentary of Rashi and in the works of R. David Ḳimḥi. The work was composed in 1395, in southern Italy, with the purpose of promoting a better understanding of the Scriptures among the Italian Jews (who had neglected Biblical for Talmudic studies), in order to enable them to answer successfully Christian and Moslem attacks on Judaism. This work is of importance for the fourteenth-century Italian it contains. Similar works, based on this, were afterward produced in other countries, French, German, or Spanish being substituted for the original Italian and Arabic. The Italian glosses of the "Maḳre Dardeḳe" were published separately by M. Schwab in "R. E. J." (xvi. 253 *et seq.*).

G. C. L.

MAKSHAN, SAMUEL BEN PHINEHAS HA-KOHEN: Bohemian Talmudist of the sixteenth century; born in Prague. He wrote: "Teḥillat Dibre Shemuel," commentary on the Targum of Esther (Prague, 1594 [according to Zunz, "Z. G." p. 278; 1601 according to other bibliographers]); "Bet Din shel Shemuel," commentary on Rashi to Esther and Ruth and on the Targum of the latter (Lublin, 1606); "Yegon Leb," commentary on Lamentations (Cracow, n.d.).

Bibliography: Fürst, *Bibl. Jud.* ii. 318; Steinschneider, *Cat. Bodl.* col. 2435.

D. M. Sel.

MAKSHIRIN ("Predisposings"): Name of the eighth tractate, in the Mishnah and Tosefta, of the sixth Talmudic order Ṭohorot ("Purifications"). This tractate contains six chapters, divided respectively into 6, 11, 8, 10, 11, and 8 sections, while the Tosefta has only three chapters and 31 sections. It treats of the effects of liquids in rendering foods with which they may come into contact susceptible, under certain conditions, of Levitical uncleanness. It is based on the Scriptural provision, "If any water be put upon the seed, and any part of their carcass fall thereon, it shall be unclean" (Lev. xi. 38; see 34 *et seq.*). From this the Rabbis deduce (1) that foods are not susceptible of uncleanness by contact with the carcass of a reptile unless the foods have first been moistened (see Ḥul. 36a); and (2) that as Scripture, in the passage just cited, uses the expression כי יתן, which, when vowelless, may be read either "ki yuttan" (= "if it be put") or "ki yitten" (= "if one will put"), and as "putting" is necessarily the result of intention, "being put" also must be accompanied by intention (see B. M. 22b). Where this condition is absent the contact of liquid with foods will have no effect. Hence the general rule elaborated in the first chapter following.

General Principle.

Ch. i.: All liquids ("mashḳin"; see vi. 4 *et seq.*), when originally desired (expected to be beneficial), though ultimately unwelcome, or when the reverse is the case (not desired originally, but ultimately acceptable), predispose loose fruit moistened by them to Levitical uncleanness. Thus if one shakes a tree to bring down some fruit, or a dead reptile, and at the same time some drops of water fall from the tree on fruit lying near by, the water does not come under the law of ki yuttan, or the fruit under liability to uncleanness by contact with a defiling object; but when one's intention is to shake off the rain-water or the dewdrops, the loose fruit moistened thereby becomes susceptible to uncleanness. Where water is used for other than its ordinary purposes, as where one submerges fruit or vegetables to secrete them from thieves, the effect is not to render the fruit liable to defilement. A precedent under this rule is cited from the history of the last days of Judea's struggle against the Romans, when some citizens of Jerusalem secured their fig-cakes from the sicarii by hiding them under water, the Rabbis deciding that, under the circumstances, the submersion did not predispose the food to uncleanness. Similarly, fruit that is floated down a river is not subject to the rule of ki yuttan.

Doubtful Cases.

Ch. ii.: In doubtful cases, objects and conditions are classified by a majority rule. For example, the defiling effects of receptacles of waste water used in common by Jews and Gentiles will depend on the majority using them; if the majority are non-Jews the water will be considered Levitically unclean, but where the majority are Jews the water will be considered Levitically clean. Where these are equally divided the presumption of uncleanness will prevail. The majority rule is not limited to questions of clean and unclean; it serves as a criterion in other matters, ritual and even civil.

Ch. iii.-vi. 3 continue the discussion of the main subject in connection with the Scriptural expression "ki yuttan." Ch. vi. 4-8 enumerates the mashḳin which render loose fruit liable to Levitical uncleanness through contact with defiling objects. According to the Rabbis, the term "mashḳin" covers seven kinds of liquid: dew, water, wine, oil, blood, milk, and honey (see Tosef., Shab. viii. [ix.] 24–28, where Scriptural phraseology is adduced to prove the connotation of "mashḳeh"). "Water" includes discharges of the eye, ear, and other organs. There is no Gemara, Yerushalmi or Babli, to this treatise.

MALABAR. See Cochin.

MALACH, ḤAYYIM. See Ḥayyim Mal'ak.

MALACHI, BOOK OF.—Biblical Data: The Book of Malachi is the last in the canon of the Old Testament Prophets. It has three chapters in the Masoretic text, while in the Septuagint, the Vulgate, and the Peshiṭta it has four. The King James Version also, following the latter versions, has four chapters. As in the books of Isaiah, Lamentations, and Ecclesiastes, the last verse in the Masoretic text is a repetition of the last verse but one. The style of the book is more prosaic than that of any of the other prophetical books; the parallelism met with in the others is here less pronounced, and the imagery often lacks force and beauty. The method of treatment is rather novel; it approaches the teaching method of the schools; Cornill speaks of it as "casuistic-dialectic." Thus the prophet first states his proposition; then he follows with remonstrances that might be raised by those he addresses; finally he reasserts his original thesis (comp. i. 2 *et seq.*, 6 *et seq.*; ii. 13 *et seq.*, 17; iii. 8, 13 *et seq.*). This form adds vividness to the argument. The book may be divided into three sections—(1) i. 1–ii. 9; (2) ii. 10–17; (3) iii. (A. V. iii. and iv.), the divisions given being those of the Masoretic text.

Contents.

Ch. i. 2–ii. 9 represent Yhwh as Ruler and loving Father. It opens with a tender allusion to the love shown by Yhwh to Judah in the past; yet Judah acted faithlessly, deserting its benefactor. Malachi then addresses himself to the priests, those who are to lead the people in the way of Yhwh. He castigates them for being derelict in their duty by offering on Yhwh's altars polluted bread and animals that have blemishes. By doing so they show that they despise Yhwh (i. 6–10). But Yhwh can do without their worship, for the time will come when the whole heathen world will worship Him (i. 11–14). If the priests will not heed the admonition, dire punishment will be visited upon them (ii. 1–8).

Ch. ii. 10–17 speaks of Yhwh as the supreme God and Father of all, and inveighs against those who had left their Jewish wives and married heathen women.

Ch. iii. (A. V. iii. and iv.) speaks of Yhwh as the righteous and final Judge. It begins with the announcement that the messenger of Yhwh will come to prepare the way for Him by purifying the social and religious life (1–4). Yhwh will call to judgment all those who have transgressed the moral law and have been lax in the observance of the ritual; He invites all who have gone astray to return to Him and receive His blessings (5–15). The faithful will be blessed, while those who persist in disobeying the law of God will be punished (16–21). The book closes with a final exhortation to the godly.

Prophetic Tone.

Malachi, as opposed to the other prophetical books, lays much stress upon ceremonial observance (i. 6 *et seq.*, 13 *et seq.*; iii. 7 *et seq.*, 22): the priest is Yhwh's messenger (ii. 7, iii. 3 *et seq.*), and the law of Moses, with its statutes and observances, must be strictly observed (iii. 22). Yet he is not a formalist; the book breathes the genuine prophetic spirit. Thus, from the idea of the brotherhood of all Israelites he deduces the social duties which they owe to one another (ii. 10). Ceremonial observance is of value in his eyes only so long as it leads to spiritual service. In scathing language he lays bare the moral degeneracy of his time, a time given over to adultery, false swearing, oppression of the hireling and the widow and the fatherless (iii. 5 *et seq.*). Especially severe is he toward those who had entered into wedlock with heathen women (ii. 11–16).

The conditions that existed under his predecessors Haggai and Zechariah seem to have existed at the time of Malachi. The Exile is a matter of the past; the Temple is built, and sacrifices are being offered (i. 10, iii. 1–10). Malachi describes most faithfully the temper of his generation. The people had strayed away from Yhwh, and sought, by an assumption of indifference and by mockery, to hide their restlessness. The exiles had been disillusioned when they found the land of their fathers a wilderness. Drought, locusts, failure of harvests (iii. 10 *et seq.*) had deepened their discontent. Yhwh's sanctuary had been rebuilt, but still their condition did not improve; they were growing impatient and were asking for proofs of Yhwh's love (iii. 13 *et seq.*). Under the pressure of these unfavorable circumstances, priests and people neglected to show Yhwh the honor due to Him (i. 2 *et seq.*). Malachi lays stress upon the inevitableness of the Day of Judgment, the coming of which would prove to the skeptical that devotion and fear of God are not in vain, but will be rewarded. The messenger of Yhwh and the Last Judgment form the closing theme of Malachi's prophecy. The messenger will come in the person of Elijah, who will regenerate the people and restore them to union with Yhwh.

——**In Rabbinical Literature:** Malachi is identified with Mordecai by R. Naḥman and with Ezra by Joshua b. Ḳarḥa (Meg. 15a). Jerome, in his preface to the commentary on Malachi, mentions that in his day the belief was current that Malachi was identical with Ezra ("Malachi Hebræi Esdram Existimant"). The Targum of Jonathan ben Uzziel to the words "By the hand of Malachi" (i. 1) gives the gloss "Whose name is called Ezra the scribe." According to Soṭah 48b, when Malachi died the Holy Spirit departed from Israel. According to R. H. 19b, he was one of the three prophets concerning whom there are certain traditions with regard to the fixing of the Jewish almanac. A tradition preserved in pseudo-Epiphanius ("De Vitis Proph.") relates that Malachi was of the tribe of Zebulun, and was born after the Captivity. According to the same apocryphal story he died young, and was buried in his own country with his fathers.

——**Critical View:** The name מלאכי is not a "nomen proprium"; it is generally assumed to be an abbreviation of מלאכיה (= "messenger of Yhwh"), which conforms to the *Μαλαχίας* of the Septuagint and the "Malachias" of the Vulgate. The Septuagint superscription is *ἐν χειρὶ ἀγγέλου αὐτοῦ*, for ביד מלאכי. Wellhausen, Kuenen, and Nowack consider ch. i. 1 a late addition, pointing to Zech. ix. 1, xii. 1. Cornill states that Zech. ix.–xiv. and Malachi are anonymous, and were, therefore, placed at the end of the prophetical books. Mal. iii. 1 shows almost conclusively that the term מלאכי was misunderstood, and that the proper name originated in a misconception of the word. The consensus of opinion seems to point to 432–424 B.C. as the time of the composition of the book. This was the time between the first and second visits of Nehemiah to Jerusalem. Some assert that the book was written before 458 B.C., that is, before the arrival of Ezra in Jerusalem.

MALACHI, ABRAHAM. See ABRAHAM MALAKI.

MALACHI B. JACOB HA-KOHEN: Prominent Talmudist and methodologist of the eighteenth century; the last of the great rabbinical authorities of Italy; died before 1790. He was dayyan at Leghorn, and apparently lived to an old age. A decision by him, dated Nisan, 1732, and referring to a civil case at Rome, is included in the responsa of Rabbi Isaiah Bassani of Reggio ("Todat Shelamim," No. 11, Venice, 1741). In the controversy between Eybeschütz and Emden he sided with the former (letter of the rabbinate of Leghorn in "Luḥot 'Edut," p. 22). He is especially famous for his "Yad Mal'aki" (Leghorn, 1767; Berlin, 1856; Przemysl, 1877), a methodological work in three parts: part one contains an alphabetical list of all the rules and technical terms found in the Talmud, with explanations; part two deals with rules regarding the codifiers; part three treats of the rules relating to legal decisions, explaining certain general principles of legal responsa. Malachi wrote also a liturgical work, "Shibḥe Todah" (Leghorn, 1744), containing prayers for the 22d of Shebaṭ, a fast-day instituted by the community of Leghorn.

MALAGA (מלקה, מאלקה, מאלאקה): Spanish Mediterranean seaport; capital of the province of Malaga; said to have been founded by the Phenicians. Malaga was an important place of commerce in the time of the Romans and had Jewish inhabitants at a very early date. During the Moorish supremacy the Jews there enjoyed complete equality and, especially in the time of Samuel ibn Nagdelah, were even held in high esteem, although under the Almohades they shared the sufferings of their brethren in the rest of Spain. The sources of information are very scanty concerning the Jewish community of Malaga, which, although not so large as those of Seville, Cordova, and Granada, was still of some importance. When the city was taken by the Spanish, Aug. 18, 1487, the Jews from Seville and Cordova, who had been baptized by force and had sought protection in Malaga from the persecutions of the Inquisition, were cruelly tortured and killed. All the Malaga Jews, 400 to 450 in number, mostly women who spoke Arabic and dressed like Moorish women, were taken captive and condemned to slavery with the remainder of the inhabitants. The young Solomon ibn Verga was sent to the Spanish communities to collect money for their ransom, and succeeded in raising 20,000 gold doubloons. With this sum, added to the money and jewels the captives themselves possessed, they were redeemed and sent to Africa in two sailing vessels by the chief tax-collector Don Abraham Senior, who had become a Christian and who, probably because of his change of faith, is not mentioned by the contemporary Jewish chroniclers. After the year 1492 Jews were no longer allowed to live in Malaga, though Maranos were still found there in the eighteenth century. Malaga is the birthplace of Solomon ibn Gabirol, and there lived Isaac ha-Levi ibn Ḥakam ha-Sofer (a contemporary of Isaac b. Sheshet), Judah and Moses Alashkar, and others.

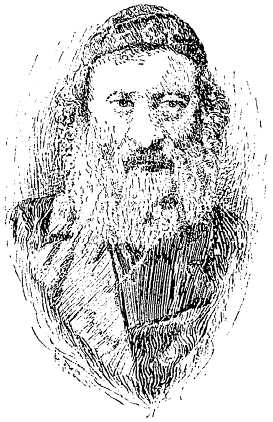
MALBIM, MEÏR LÖB BEN JEHIEL MICHAEL: Russian rabbi, preacher, and Hebraist; born at Volochisk, Volhynia, in 1809; died at Kiev Sept. 18, 1879. The name "Malbim" is derived from the initials of his name (מלבים), and became his family name by frequent usage. Malbim was educated in Hebrew and Talmud by his father and by his stepfather (R. Löb of Volochisk). He showed unusual talent from his early childhood, and his works indicate that he had a considerable knowledge of secular sciences. From 1838 to 1845 he was rabbi of Wreschen, district of Posen, and in the latter year was called to the rabbinate of Kempen, where he remained until 1860; he was thereafter known as "der Kempener." In 1860 Malbim became chief rabbi of Bucharest, Rumania. But he could not agree with the rich German Jews there; they wished to introduce the Reformed rite, and did not shrink even from violence in the pursuit of their aims. By intrigues they succeeded in throwing him into prison, and though he was liberated through the intervention of Sir Moses Montefiore, it was upon the condition that he leave Rumania.



Meïr Löb Malbim.

Malbim went to Constantinople and complained to the Turkish government, but obtained no satisfaction. After staying six months in Paris, he went to Lenczíza, government of Kalisz, Russian Poland, as successor to his deceased father-in-law, Ḥayyim Auerbach (1866). Shortly after he was rabbi at Kherson, and thence was called to the rabbinate of Moghilef, on the Dnieper (1870). There, too, his lack of subservience provoked the resentment of the richer Jews; these denounced him as a political criminal, and the governor of Moghilef ordered him to leave the town. Malbim then went to Königsberg as chief rabbi of the Polish community, but there he fared no better than in Bucharest and Moghilef; he was continually harassed by the German Jews. When Malbim passed through Wilna in 1879 the community there would have appointed him rabbi in place of Isaac Elijah Landau, but the governor of Wilna opposed the election on the ground that he could not sanction the appointment of a rabbi who had been expelled from Moghilef as a political criminal. In September of the same year Malbim was on his way to Krementchug, to the rabbinate of which town he had been appointed, when he fell sick and died at Kiev.

Malbim was the author of: "Arẓot ha-Ḥayyim," commentary and novellæ on the Shulḥan 'Aruk, Oraḥ Ḥayyim (Breslau, 1837); "Arẓot ha-Shalom," collection of sermons (Krotoschin, 1839); "Ha-Torah weha-Miẓwah," commentary on the Pentateuch and Sifra (Warsaw, 1874–80); "Miḳra'e Ḳodesh," commentary on the Prophets and Hagiographa (*ib.* 1874; this commentary is double—on the words and on the sense; Malbim always endeavored to explain the different meanings of synonyms); "Mashal u-Meliẓah," dramatic philippic, in verse, against hypocrisy (Paris, 1867).

MALCHA: Russian town, in the government of Grodno. A Jewish community existed in Malcha in 1583, when, in consequence of rumors current as to the killing of a Christian laborer by the Jews, the ḳahal of Malcha invited the constable of the district of Brest, Alexander Shavlovski, to visit Malcha and investigate the matter. No evidence being found to justify the rumor, the Jews made a formal protest against the spreading of the accusation. It has a total population (1903) of about 3,000, half of whom are Jews. Of the latter, 291 are artisans. In the ḥadarim 90 Jewish children are instructed, and in the two Talmud Torahs, 40. The charitable organizations consist of a biḳḳur ḥolim, a gemilut ḥasadim, etc.

MALCHIN. See MECKLENBURG.

MALCHUS (CLEODEMUS THE PROPHET): Hellenistic writer of the second century B.C. His Semitic name, "Malchus," a very common one in Phenicia and Syria but not met with among the Jews, combined with the pagan traditions abounding in his work, has given rise to discussions concerning his origin. Ewald supposes him to have been a Phenician; Herzfeld, a Syrian; Freudenthal endeavors to prove that he was a Samaritan; and Schürer holds that he must have been either a Jew or a Samaritan.

Cleodemus was the author of a history of the Jews in Greek, in which Jewish traditions are blended with Greek mythology. A short notice of this history, which is no longer in existence, is quoted by Josephus ("Ant." i. 15) from Alexander Polyhistor. Cleodemus relates that among the sons of Abraham and Keturah were three, Apher, Surim, and Japhran ('Αφέραν, 'Ασουρείμ, 'Ιάφραν), from whom the town of Aphra, the land of Assyria, and Africa derived their names. He relates further that these three sons helped Hercules in his fight against Libya and Antæus, and that Hercules married the daughter of Aphra, by whom he had a son, Didorus, from whose son Sophon the Sophacians derived their name.

T. I. BR.

MALEA (MALEHA; MELEA), MEÏR DE: "Almoxarif mayor"; chief farmer of taxes of King Ferdinand III. (the Holy) of Castile, whose favor he gained through his honesty and zeal in the interest of the state. Don Meïr, who was versed in the Talmud and was held in high esteem by his coreligionists, is called by Moses ben Naḥman "the great prince, the learned Don Meïr Almoxarif." Ferdinand's son and successor, Alfonso X. (the Wise), whose finances, in consequence of the troubled condition of the state, were in great confusion, employed, after the death of Don Meïr, his sons Don Zag (Isaac) and Don Juzef, who inherited the influence and position of their father, to remove the financial difficulties. When Alfonso desired to subdue his vassal Aben Nathfot de Niebla, Don Zag undertook the provisioning and administration of the entire army, being given as security the lease of all the customs duties and taxes.

Don Zag remained the only lessee of taxes until 1276, when he met competitors in the persons of his brother-in-law Don Abraham ibn Xuxen (Shushan) and one Roy Fernandez of Sahagum, and was compelled to enter into partnership with them. For two years these three paid the king an annual rent of 80,000 gold maravedis. Don Zag, who possessed the complete confidence of the king, took, with his brother Don Juzef, in addition to the lease of the taxes, that of the fines, most of which were concerned with commerce and customs, and the officials of the king were placed at their disposal to recover such fines. They certainly rendered in this capacity great services to the state, but they nevertheless incurred in no small measure the anger of the population.

Don Zag, who was exceedingly wealthy, fell suddenly, through the following incident, from the height upon which he stood: When King Alfonso undertook the siege of the city of Algeziras, he ordered the almoxarif to employ in victualing the army the large sum which he had collected as tax-lessee. Just then Don Zag was accidentally met by the infante, Don Sancho, who was in conflict with his royal father, and the infante succeeded in taking the money from Don Zag under the pretext that he wished to send it to his mother, Donna Violante, living in separation from the king. The king, exceedingly enraged, ordered Don Zag and the other Jewish tax-lessees to be thrown into dark dungeons. When the infante returned to Seville from his victorious campaign against the Moors, in the autumn of 1280, the king had the unfortunate Don Zag dragged through the city and executed in the presence of the infante. The infante had endeavored to relieve the almoxarif, who was suffering on his account and who had rendered such valuable services to the state, but all his endeavors proved futile. One Sabbath shortly after, when all the Jews of Castile and Leon were in their synagogues, they were seized by order of Alfonso, who demanded 12,000 gold maravedis, and imposed a fine of another 12,000 for every day of delay. The deposition of Alfonso, which took place several years later, stands in no relation to the execution of Don Zag.

MALKA BEN AHA: Gaon of Pumbedita from 771 to 773. The only fact known concerning him is that, with Ḥaninai Kahana ben Huna (765–775), he opposed Naṭronai ben Ḥabibai, who, for unknown reasons, endeavored to supplant the exilarch Zakkai ben Aḥunai; the two geonim succeeded in compelling Naṭronai to leave Babylonia. Naṭronai probably settled in Kairwan.

MALKI, EZRA BEN RAPHAEL: Rabbi of Rhodes in the seventeenth century; brother-in-law of Hezekiah de Silva, the author of "Peri Ḥadash." Malki was the author of "Malki ba-Ḳodesh" (Salonica, 1749). This work contains novellæ on the laws of Passover given in the Shulḥan 'Aruk (Oraḥ Ḥayyim) and in the "Bet Yosef"; commentaries on the Pesaḥ Haggadah and on the parts of the Yad ha-Ḥazaḳah which contain the laws concerning the Passover lamb, Rosh ha-Shanah, Yom Kippur, and lulab; novellæ on the "Sefer Miẓwot ha-Gadol"; and collectanea. He wrote also: "Shemen la-Ma'or" (Constantinople, 1760), novellæ on the first chapter of Baba Meẓi'a, in which he defends Zerahiah ha-Levi against the attacks of Naḥmanides; "'En Mishpaṭ" (*ib.* 1770), responsa; "'Enot Mayim" (Salonica, 1811), sermons.

MALTER, HENRY: American rabbi and scholar; born at Zabno, Galicia, March 23, 1867; educated at the Zabno elementary school, and at the universities of Berlin (1889–93) and Heidelberg (Ph.D. 1894). He pursued his Jewish studies at the Veitel Heine-Ephraimsche Lehranstalt, Berlin (under Steinschneider) from 1890 to 1898, and at the Berlin Hochschule from 1894 to 1898, receiving his rabbinical diploma from the latter institution. He acted as librarian of the scientific library of the Jewish community at Berlin in 1899, and in 1900 was appointed professor of medieval philosophy and Arabic at the Hebrew Union College, Cincinnati; since 1902 he has also filled the office of rabbi of the Sheerith Israel Congregation of Cincinnati. His publications include: "Sifrut Yisrael," a Hebrew edition of Steinschneider's "Jewish Literature," with additional bibliographical notes; "Die Beschneidung in der Neueren Zeit" (in Glasberg's "Die Beschneidung," Berlin, 1896); "Die Abhandlung des Abu Hamid al-Gazzali" (Frankfort-on-the-Main, 1896); "Katalog der von Fischel Hirsch Nachgelassenen Bücher" (Berlin, 1899). He has also contributed to "Ha-Maggid," "Ha-Shiloaḥ," "Mi-Mizraḥ umi-Ma'arab," "Jüdischer Volkskalender," "Deborah," "American Journal of Semitic Languages," and the "Hebrew Union College Journal" and "Annual."

A.

MALVANO, GIACOMO: Italian diplomat; born at Turin Dec. 14, 1841. In 1862 he entered the diplomatic service, and by 1887 had become envoy extraordinary and minister plenipotentiary; two years later he was appointed councilor of state, and shortly afterward became general secretary in the ministry of foreign affairs. In 1875–76 he formed one of a committee appointed to draft certain commercial treaties; in 1879 he attended the monetary conference held at Paris, as the delegate of the Italian government. In 1891–92 he arranged a number of commercial treaties with Austro-Hungary, Germany, and Switzerland. He was repeatedly nominated vice-president and member of council of the Italian Geographical Society; he still (1904) occupies the latter position.

S. V. C.

MAMON (MAMMON): Mishnaic Hebrew and Aramaic for "riches." The word itself is given in the Sermon on the Mount: "Ye can not serve God and mammon" (Matt. vi. 24). There is no evidence that there was a Syriac god of this name, the modern idea that such a god existed being derived from Milton's personification of the name—"Mammon, the least erected spirit that fell from heaven" ("Paradise Lost," i. 679). The word occurs in Abot ii. 12, where almsgiving is called "the salt of Mammon or riches." Gesenius suggests that the word was derived from "maṭmon" ("treasure"), with assimilation of the "ṭet." The spelling with three "m's," however, is apparently not justified; the Greek form with two is held by most scholars to be correct.

J.

MAMRAN: A check; an expression used by Polish Jews from the end of the sixteenth to the beginning of the nineteenth century. The word is derived from "membrana," Low Latin equivalent for "promissory note." It was first used by Mordecai Jafeh in "'Ir Shoshan" (ch. 48), and was recognized by the law of East Prussia of 1801. Later laws, declaring that in legal documents only the language of the country may be used, threw the term into disuse. There are various forms of the word—"mamre," "mamram," "mamrama," "mamrame," etc., and a number of false etymological derivations (*e.g.*, from המיר = "to exchange"; or from "Maharam" [Meïr] Lublin, supposed to have introduced it).

MAMZER. See Bastard.

MAN, SON OF (Hebrew, "ben adam" or "ben enosh"; plural, "bene adam"; Aramaic, "bar enash," "bar nasha," or "bar nash"): Individual of the species man; synonym of "man." While "ben enosh" occurs only in Ps. cxliv. 3, the term "ben adam" is found exclusively in poetic (Num. xxiii. 19; Ps. viii. 5 [A. V. 4]) and prophetic passages (Isa. li. 12; Jer. xlix. 18). The expression is used with particular force about ninety times in Ezekiel, from ch. ii. 1 on, as the title by which the prophet is addressed by Yhwh, obviously to accentuate the great distance between him, the earth-born mortal, and the sublime God who speaks to him. Most of the Jewish commentators, whom modern exegetes follow, take the title in that sense. "God addressed him thus in order to make him feel that, though God speaks to him, he is still a frail human being" (comp. "bene adam" with "bene ish" [the former denoting the humbler, and the latter the higher, classes of men] in Ps. xlix. 3 [A. V. 2]).

In Daniel.

The expression "son of man" ("bar enash") has a peculiar use in Dan. vii. 13. Daniel in a vision sees "one like the son of man coming on [A. V. "with"] the clouds of heaven and appearing before the Ancient of Days," to receive from Him "the dominion, the glory, and the kingdom for all time" (Hebr.). There is no dispute among commentators that Israel is thereby meant; but they differ as to the question whether the "son of man" depicted is merely a personification of the people, or whether the writer had in mind a concrete personality representing Israel, such as the Messiah or Israel's guardian angel, the archangel Michael. The latter interpretation, proposed by Cheyne and adopted by others, has little in its favor compared with the older opinion that the person of the Messiah is alluded to—a view shared by the Rabbis (Sanh. 98a; Midr. Teh. to Ps. ii.; comp. the name "'Anani" in Targ. to I Chron. iii., and "bar nefele" [= "son of the clouds"] in Sanh. 96b) and the Apocalyptic as well as Christian writers (Enoch xxxvii.-lxxi.; IV Esdras xiii. 3; Justin Martyr, "Dialogus cum Tryphone," p. 31, and Ephraem Syrus in his commentary to Daniel, *l.c.*; see also the commentaries of Nowack and others to the passage).

It is this double use of the term "son of man" in the New Testament time and in New Testament documents which has caused great confusion to the recorders and translators as well as to the exegetes of the New Testament. As is seen in Enoch and IV Esdras (*l.c.*), "son of man" was among the Apocalyptic writers a favorite term for the Messiah, and accordingly it occurs frequently in Messianic apocalypses embodied in the New Testament (Matt. xxiv.-xxv.; Mark xiii. 26; Luke xxi. 27, 36) and in Messianic prophecies which are ascribed to Jesus regarded, in accordance with this conception, as the "son of man" in the clouds (of glory) (Matt. xii. 40; xiii. 27, 41; xvi. 27; xix. 28; xxvi. 64; Mark viii. 38, xiv. 62; Luke xii. 40; xvii. 22-30; xviii. 8, 31; xxii. 69; John i. 51, iii. 13, v. 27, vi. 62).

The term "son of man" has a quite different meaning in such sayings as "the son of man is lord even of the Sabbath day" (Matt. xii. 8 and parallels). It denotes simply man as master over the Sabbath in the same sense given it in the saying of the Rabbis, "The Sabbath is given over unto you, but not you unto the Sabbath" (Mek., Ki Tissa, 1).

Generalized Use of Term.

In many passages the expression "son of man" is used in the sense of "that person," or "myself," a use of it known to have been common in Talmudic times. Thus when Jesus says "the son of man hath not where to lay his head" (Matt. viii. 20), he means simply "myself"; and likewise when he speaks of his future suffering and betrayal, the term "son of man" has nothing to do with the Messianic title (Matt. xvii. 22 and parallels). Afterward the records confounded the two usages, and consequently Matthew uses the term promiscuously in a manner which has to this day puzzled most of the commentators (see Wellhausen, "Des Menschen Sohn," in "Skizzen und Vorarbeiten," 1899, pp. 187-215; and comp. Dalman, "Die Worte Jesu," 1898, pp. 191-218).

The following passage in Yer. Ta'an. ii. 65b is remarkable. Commenting on Num. xxiii. 19 ("God is not a man that he should lie, neither the son of man that he should repent"), R. Abbahu, who had frequent disputations with Christians in Cæsarea and was therefore acquainted with their terminology, said: "If a man says, 'I am God,' he lies; if he says, 'I am the son of man,' he will repent; if he says, 'I will ascend to heaven,' he will not succeed."

Bibliography: Cheyne, *Encyc. Bibl.*; Wellhausen, *Skizzen und Vorarbeiten*, 1899, pp. 187-215.

K.

MANASSEH: **1.** The elder of two sons born before the famine to Joseph and Osnath, daughter of the priest of Heliopolis (Gen. xli. 50-51, xlvi. 20). Biblical etymology, deriving his name from נשה (= "to forget"), makes it signify "He who causes one to forget," and explains it in the passage "God . . . hath made me forget all my toil" (*ib.* xli. 51). According to Gen. xlviii. 5, Manasseh and Ephraim were put by the patriarch Jacob on an equality with Reuben and Simeon as progenitors of separate tribes. In the blessings invoked by Jacob on the heads of Manasseh and Ephraim, Manasseh, although the elder, was made subordinate to Ephraim (*ib.* xlviii. 14). Tradition does not tell what caused Jacob's preference for Ephraim (see Ephraim and Junior Right). Notwithstanding his subordination, Manasseh's blessing was not to be despised. Manasseh, like Ephraim, was to be protected by "the Angel which redeemed" Jacob "from all evil," and was to grow into a great people (*ib.* xlviii. 16, 19). Because Gen. xlviii. 20 reads, "in thee shall Israel bless, saying, God make thee as Ephraim and as Manasseh," the phrase "God make thee as Ephraim and as Manasseh" has been given a place in the benediction Jewish parents pronounce over their sons on the eves of Sabbaths and holy days. I Chron. vii. 14 reports that Manasseh was married to a Syrian concubine. Targums Yerushalmi and pseudo-Jonathan to Gen. xlii. 23 make the statement that Manasseh was steward in Joseph's house, acted as interpreter for Joseph when the latter talked to his brothers, and possessed extraordinary physical strength, which he displayed at the imprisonment of Simeon.

J. W. R.

2. One of the twelve tribes of Israel which received a portion in the land of Canaan; its eponym was a son of Joseph. While at the time of the Exodus Manasseh numbered 32,200 (Num. i. 35, ii. 21) against Ephraim's 40,500 (Num. i. 32–33, ii. 19), before Israel's entrance into Canaan forty years later Manasseh had increased to 52,700 (Num. xxvi. 34), and Ephraim had fallen to 32,500 (Num. xxvi. 37). This made Manasseh rank sixth in numerical importance, the tribes more numerous being Judah, Issachar, Zebulun, Dan, and Asher.

During the march through the Sinaitic desert Manasseh's position was, with Ephraim and Benjamin, on the western side of the Tabernacle (Num. ii. 18–24); the chief of the tribe was Gamaliel, son of Pedahzur (Num. i. 10, ii. 20, vii. 54).

The Targums of Jerusalem and pseudo-Jonathan to Num. ii. 18 report that the standard of the three Rachel tribes revealed the figure of a boy, with the inscription: "The cloud of the Lord rested on them until they went forth out of the camp"; and the Talmud mentions that Manasseh's tribal banner, during the journey to the Promised Land, consisted of a black flag with the embroidered figure of a unicorn. Among the twelve spies sent by Moses to report on Canaan, Manasseh was represented by Gaddi, son of Susi (Num. xiii. 11). Manasseh is recorded as prompting the enactment of laws regulating the possession of property in Canaan by daughters where the father had died without a son: the particular case in question was that of the daughters of Zelophehad (Num. xxvii. 1–8).

Manasseh was valorous. It took a prominent part in the defeat of the natives encountered on both sides of the Jordan. Reference is made to its prowess in Num. xxxii. 39; Deut. iii. 14; Josh. xvii. 1; and particularly in I Chron. v. 18–22. Its warriors Machir, Jair, and Nobah conquered the most difficult districts, Argob and the hills of Gilead. The fearless chieftains Gideon, who with a small army defeated the Midianites (Judges vi. 15), and Jephthah, who vanquished the Ammonites (Judges xi.), belonged to Manasseh.

The territory inhabited by Manasseh lay on both sides of the Jordan. The part east of the Jordan was acquired after the conquest of Gilead (Num. xxxii.), and was requested on the ground of being specially adapted for the grazing of cattle—the same argument as that urged by Reuben and Gad for preferring that section of Canaan. The boundaries of Eastern and Western Manasseh can not be given with exactness. Eastern Manasseh probably extended from the Jabbok to Mount Hermon (its northern portion consisting of Argob and Bashan), while Western Manasseh extended from Ephraim, lying directly south, to the slopes of Mount Carmel (comp. Josh. xvii. 15: "Get thee up to the wood country").

Territory of Manasseh.

Although more numerous than Ephraim shortly before the conquest of Canaan, Manasseh did not compare with Ephraim in wealth, power, and population in later times; Western Manasseh never completely expelled the natives (Josh. xvii. 12; Judges i. 27).

At the time of David's accession to the throne, Western Manasseh sent to Hebron 18,000, and Eastern Manasseh 120,000—Reubenites and Gadites included. After this event Eastern Manasseh gradually disappears and Western Manasseh lacks prominence, although both sections had separate rulers; Joel, son of Pedaiah, governed the latter, and Iddo, son of Zechariah, governed the former (I Chron. xxvii. 20–21).

Manasseh is heard of in the revival under Asa; in the Passover celebration in the days of Hezekiah; in the subsequent attack on idolatry; in the reform instituted by Josiah; and in the restoration of the Temple (II Chron. xv. 9; xxx. 1, 10–11, 18; xxxi. 1; xxxiv. 6, 9).

Like Reuben and Gad, Manasseh ultimately lost its identity; it became assimilated with the inhabitants of the country, whose idolatries it practised. The children of Manasseh "transgressed against the God of their fathers, and went a-whoring after the gods of the people of the land, whom God destroyed before them" (I Chron. v. 25). In Ps. lx. 9 (A. V. 7) and cviii. 8 Manasseh is called a most precious possession.

J. W. R.

3. According to II Kings xxi. 1, Manasseh, the successor of Hezekiah upon the throne of Judah, was but a boy of twelve at his father's death. His reign of fifty-three years is the longest recorded in the annals of Judah. There can be no doubt that Sennacherib, the King of Assyria, departed to his capital in the days of Hezekiah (II Kings xix. 36), regarding Judah as a conquered and tribute-paying province; and so it remained during the reigns of Esarhaddon and Assurbanipal, his successors upon the throne of Assyria. In their published inscriptions Manasseh of Judah is distinctly mentioned as a vassal king (Schrader, "K. B." ii. 148, 238). That these sovereigns cherished a real interest in their western domain is shown by their settlement of colonists in Samaria (Ezra iv. 2, 9–10). Each of them invaded and plundered Egypt and maintained protracted sieges of the strong cities of Phenicia.

In II Kings, written within a century or so of Manasseh's death, there is no hint of revolt. The Chronicler, however, declares (II Chron. xxxiii. 11) that in consequence of the deliberate unfaithfulness of Judah God brought upon the nation "the captains of the host of the King of Assyria," who took Manasseh in chains to Babylon. Thence, having truly repented, he was restored to his throne, where he demonstrated the genuineness of his change of heart by giving himself to measures of defense, administration, and religious reform. To harmonize the Chronicler's testimony with that of the Hebrew contemporary writings is even more difficult. The crying need in the days of Josiah, Manasseh's immediate successor, was religious reform; Jeremiah declared (xv. 4; comp. II Kings xxiii. 26) that Manasseh's sins had yet to be expiated.

Relations with Assyria.

The writer in Kings emphasizes three deplorable details of the reign of Manasseh: the religious reaction which followed hard upon his accession; its extension by the free adoption of foreign cults; and the bitter persecution of the prophetic party. During Manasseh's half-century the popular worship was a medley of native and foreign cults, the influence of which was slow to disappear (Ezek. viii.).

Such a reaction involved the persecution of those who had bitterly condemned the popular syncretism. The prophets were put to the sword (Jer. ii. 30). "Innocent blood" reddened the streets of Jerusalem (II Kings xxiv. 4). For many decades those who sympathized with prophetic ideas were in constant peril.

J. F. K. S.

4. Son of Johanan the high priest and brother of Jaddua; married Nicaso, daughter of Sanballat (Josephus, "Ant." xi. 7, § 2). In Neh. xiii. 28 he is referred to as "one of the sons of Joiada, the son of Eliashib the high priest," but is not mentioned by name. It is further said (*ib.*) that, owing to his being Sanballat's son-in-law, Nehemiah had deposed him from the priesthood.

Josephus describes this fact at greater length. He says that the high priest Jaddua, Manasseh's brother, was himself indignant at Manasseh on account of his marriage with a foreign woman, and, joining the people of Jerusalem, he gave Manasseh the alternative of divorcing his wife or of leaving the priesthood. Manasseh went to Sanballat, and declared to him that in spite of his love for his wife he gave the preference to the priesthood. Whereupon Sanballat promised him that if he would retain his wife he would obtain for him from the king the dignity of a high priest. He further promised that he would build with the king's approval a temple upon Mount Gerizim, where Manasseh should officiate as high priest. Manasseh, accordingly, remained with his father-in-law and became high priest in the Samaritan temple on Mount Gerizim ("Ant." xi. 8, §§ 2-4). Still, Josephus says (*ib.* xii. 4, § 1) that Manasseh officiated as high priest at Jerusalem between the priesthood of his nephew Eleazar and that of Onias II. (see SANBALLAT).

MANASSEH, PRAYER OF: Greek poetic composition attributed to Manasseh, son of Hezekiah, King of Judah, "when he was holden captive in Babylon" (II Chron. xxxiii. 11-13, 18-19). It is found among the Canticles which, in some of the Septuagint manuscripts, are appended to the Book of Psalms, and is placed at the end of II Chronicles in some Latin manuscripts (see Swete, "The Old Testament in Greek," ii., pp. viii. and xi., and iii., pp. vi. and 802-804; Sabatier, "Bibl. Lat." iii. 1038). It is found also in the "Apostolic Constitutions" (ii. 22) and in the "Didascalia" (where it follows a reference to II Chron. xxxiii.). The Latin translation found in some Vulgate manuscripts is not by Jerome, but is, according to Fritzsche, "certainly of more recent origin." The Prayer of Manasseh was never distinctly recognized as canonical by the Church; but it has been deservedly retained by Luther, and is included in the authorized English version, among the Apocrypha.

The Story.

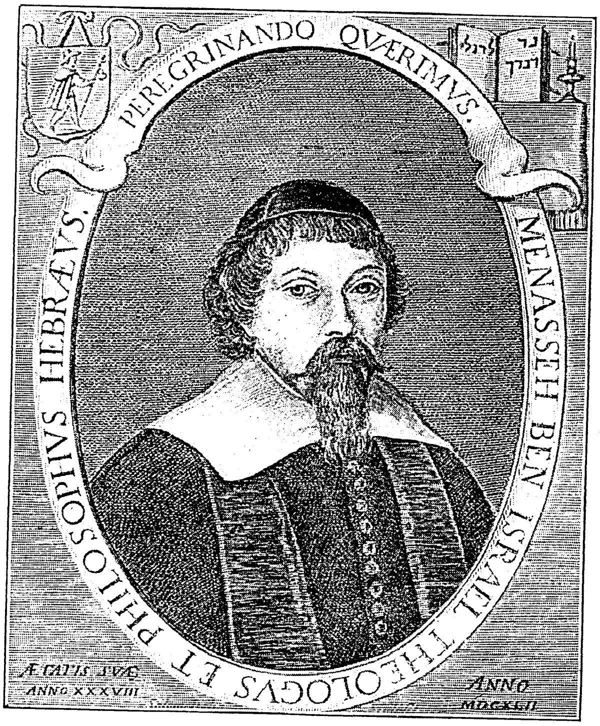
In the "Apostolic Constitutions" (ii. 22) the whole story of Manasseh is given as an instructive lesson to bishops in their dealings with the erring and in the administration of justice. The story is based upon II Kings xxi. and II Chron. xxxiii. After recounting the sins of Manasseh it relates that he was taken captive to Babylon, bound in shackles of iron, and cast into prison. Bread made of bran and water mixed with vinegar was given him in small quantities, only so much as would keep him alive. In his great affliction he repented of his sins, humbled himself, and sought YHWH's forgiveness. Then follows the prayer, after which YHWH had compassion upon him. A flame of fire appeared about him, his chains and shackles melted, and he was restored to Jerusalem and to his kingdom. Thereafter he worshiped YHWH only and sought to undo the evil he had done in the earlier part of his reign. Julius Africanus (*c.* 221 C.E.), apparently, had read the story in this form, for he says that "while Manasseh was reciting a hymn his bonds burst asunder, iron though they were, and he escaped" (see Hastings, "Dict. Bible").

The Prayer.

The prayer opens with an invocation addressed to the "Lord, Almighty, God of our fathers, Abraham, Isaac, and Jacob, and of their righteous seed." His power, glory, and majesty are described, and His compassion, long-suffering, and grace to the repentant sinner. The passage following (not found in the Greek MSS. of the LXX.) declares that God has promised forgiveness to the transgressor and has "appointed repentance unto sinners, that they may be saved." He has not appointed repentance only to persons such as the Patriarchs, who have not sinned, but "unto me that am a sinner." There follows a confession of sin, couched for the most part in general terms. The only approach to specific statement is in the words, "I did not Thy will, neither kept I Thy commandments" (omitted by Codex A, "Apostolic Constitutions," and by Latin MSS.); "I have set up abominations and multiplied offenses." This, of course, may be understood as referring to his idolatrous practises. Next he pleads for forgiveness, and concludes with a confident expectation that God will save him and with an outburst of praise for His mercy.

Ewald and, more recently, Budde (Stade's "Zeitschrift," 1892, pp. 39 *et seq.*) have maintained the view that the Greek version of the prayer is a translation from a Hebrew original. This is not impossible, but it is not supported by sufficient evidence.

Authorship. The author was evidently a Jew, but the place and date of composition can not be definitely ascertained. The story in II Chronicles assumes the existence of a Prayer of Manasseh and of various details of his life in the "history of Hozai" (R. V.) or "of the seers" (LXX., *ἐπὶ τῶν λόγων τῶν ὁρώντων*). This history must have been lost, and the Greek prayer is, most probably, the attempt of some pious Jew of later times to reproduce it. Schürer ("Hist. of the Jewish People," division ii., vol. iii., p. 188) compares the interpolation of the prayers of Mordecai and Esther as supplements to the Book of Esther, and the Prayer of Azariah and the Song of the Three Holy Children as supplements to the Book of Daniel. There is, indeed, nothing in the conception of God's forgiving grace to the repentant sinner which is not implied in the story in Chronicles as well as in other still earlier Old Testament passages, as Ex. xxxiv. 6-7, and Ps. xxxiv. 18, li. 17. The emphasis, however, upon the fact that God is God of the penitent as well as of the righteous, and the conception of the Patriarchs as conspicuous examples of the latter, point to the later Judaism. F. C. Porter (Hastings, "Dict. Bible") thinks it is a Hellenistic composition. So does Swete ("Introduction to the O. T. in Greek," p. 253). Nestle ("Septuagintastudien," 1899, iii.) maintains that the text of the prayer in the Greek manuscripts of the Septuagint comes from the "Apostolic Constitutions," or from the "Didascalia," and that it is not, as has been commonly supposed, drawn by the latter from the Septuagint.



Manasseh ben Israel.
(From the engraving by Salom Italia.)

There appears to be no trace of the Prayer of Manasseh in Jewish tradition. The Jerusalem Talmud (Sanh. x. 2) relates that Manasseh was put into an iron mule, beneath which a fire was kindled. In his torture he prayed in vain to the idols he had formerly worshiped. At last he besought the God of his fathers, and was delivered (comp. Apoc. Baruch, vi. 4).

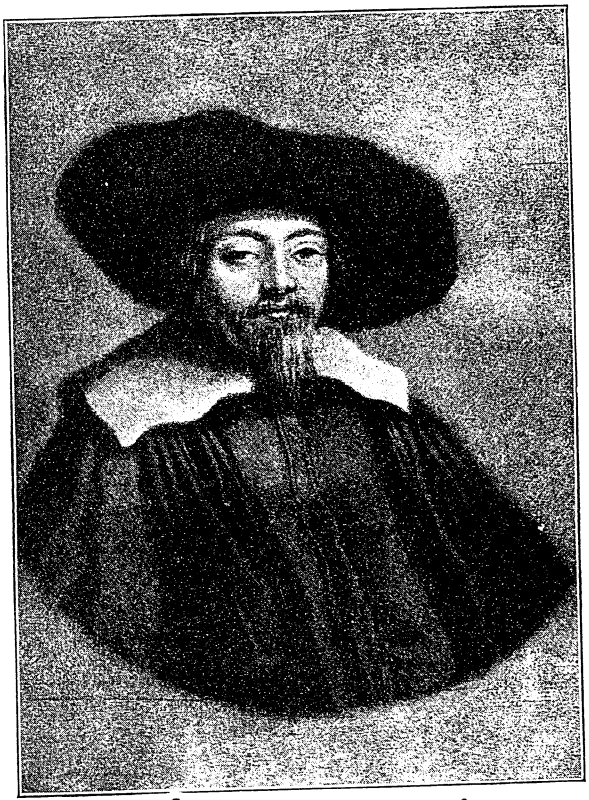
MANASSEH BEN ISRAEL: Dutch polyhistor; born at La Rochelle about 1604 (see Bethencourt in "Jew. Chron." May 20, 1904); died at Middleburg, Netherlands, Nov. 26, 1657. After the auto da fé of Aug. 3, 1603, his parents had thought it prudent to leave Lisbon. They soon passed on from La Rochelle to Amsterdam, where Manasseh was brought up under Isaac Uzziel of Fez, the rabbi of the new congregation Neveh Shalom; the latter died in 1620 and was succeeded by Manasseh. Two years later Manasseh married Rachel Soeiro. He soon became distinguished as one of the best orators of the Amsterdam pulpit, rivaling even Isaac Aboab. The contrast between their preaching was acutely indicated by a Spanish priest of the time, Fra Antonio Vieyra, who reported, after hearing both, that "Manasseh said what he knew and Aboab knew what he said." Neither preaching nor private tuition being sufficient to provide him with a suitable livelihood, Manasseh started the first Hebrew press in Amsterdam (indeed, in all Holland), in which he produced a Hebrew prayer-book (Jan. 12, 1627) set up from entirely new type, an index to the Midrash Rabbah (1628), a Hebrew grammar of his teacher's, Isaac Uzziel (1628), and an elegant and handy edition of the Mishnah.

Meanwhile Manasseh ben Israel was occupied with the compilation of his chief work, "El Conciliador," a laborious enumeration and discussion of all the passages contained in the Old Testament which seem to conflict with one another. Manasseh brought his very extensive rabbinical knowledge to bear upon each of these, and wrote, in fluent Spanish, an exposition of the recognized Jewish method of reconciling the seeming inconsistencies. The book was almost the first written in a modern language by a Jew which had an independent interest for Christian readers, and it accordingly gave Manasseh a wide-spread reputation in the learned world. Some of the best scholars of his time had correspondence with him—

His Friendships.

Isaac and Dionysius Vossius, Hugo Grotius, Caspar Barlæus, Cunæus Bochart, Huet, and Blondel; Anna Marie de Schurman consulted him. His Jewish acquaintance was even more numerous, and included Emanuel Frances, and the Buenos, Abravanels (relatives of his wife), Pintos, Abudientes, and Henriques. He corresponded also with Zacuto Lusitano, Daniel Caceres, and Diego Barrassa (to whom he dedicated one of his works), and assisted Joseph Delmedigo to publish a selection of his works at Amsterdam.

Notwithstanding this wide fame, Manasseh ben Israel still found it difficult to obtain a living for himself, wife, and three children; he determined, therefore, on settling in Brazil, whither, in 1638, he had sent his brother-in-law, Ephraim Soeiro, on a joint venture. At this time the three synagogues of Amsterdam were reorganized, and, as seems probable, Manasseh ben Israel lost his position as rabbi of the Neveh Shalom. In preparation for his departure he dedicated the second part of the "Conciliador," which appeared about that time, to members of the Jewish community of Pernambuco. At this moment the brothers Pereira came to his aid and established a yeshibah, placing him at the head (1640). Manasseh was thus enabled to devote himself entirely to authorship and to his ever-widening correspondence with Jewish and Christian literati.



Menasseh ben Israel

(After the mezzotint by Rembrandt.)

Manasseh was most profoundly interested in Messianic problems, being convinced, for example, of the Davidic origin of the Abravanel family, from which his own wife was descended. He was full of cabalistic opinions, though he was careful not to expound them in those of his works that were written in modern languages and intended to be read by Gentiles. In particular, he was convinced that the restoration to the Holy Land could not take place until the Jews had spread into and inhabited every part of the world. In 1644 he came in contact with Antonio de Montesinos (Aaron Levi), who convinced him that the North-American Indians were the Lost Ten Tribes. He appears to have directed his attention to the countries in Europe where Jews were not permitted to live, trusting that by obtaining their admission the coming of the Messiah would be accelerated. He entered into correspondence with Christina, Queen of Sweden, ostensibly regarding matters of Hebrew learning, but probably with the design of getting her help in obtaining for the Jews admission into Sweden. But his chief attention was directed to securing the readmission of Jews into England, with many leading theologians of which country he was in active correspondence on this point.

Manasseh attracted the notice of many Protestant theologians who likewise were convinced of the speedy coming of the Messiah and who naturally desired to know the views of Jewish theologians on a topic so specifically Jewish. Among these Christian theologians were Abraham von Frankenberg, the Silesian mystic, and Johannes Mochinger. But it was especially several of the more mystical-minded of the Puritans in England who had become interested in the question, and Manasseh entered into correspondence with several of them, including John Dury, Thomas Thorowgood, and Nathaniel Holmes. The first-named had written to Manasseh on the subject of the Israelitish descent of the American Indians, thereby redirecting his attention to Antonio de Montesinos' views. Manasseh determined, therefore, to write a treatise on the Lost Ten Tribes, and in support of the readmission of the Jews into England published his "Esperança de Israel" (Hope of Israel; 1650).

Advocates Readmission of Jews into England.

This work appeared first in Spanish, then in a Latin translation; to the latter he wrote a prefatory epistle addressed to the Parliament or Supreme Court of England in order to gain its favor and goodwill for the Jews. The pamphlet aroused much interest in England, several replies being written, especially with regard to the identity of the North-American Indians with the Lost Ten Tribes. One of the replies, "An Epistle to the Learned Manasseh ben Israel" (London, 1650), was written by Sir Edward Spencer, member of Parliament for Middlesex; another appeared anonymously under the title "The Great Deliverance of the Whole House of Israel" (*ib.* 1652). Both these replies insisted upon the need of conversion to Christianity before the Messianic prophecies about Israel could be fulfilled, and it was, perhaps, for this reason that the matter was dropped for a time.

Meanwhile Cromwell's attention had been drawn to the subject, and before the negotiations with Holland were broken off by the Navigation Act of 1652 Cromwell's representative at Amsterdam was put into communication with Manasseh; the latter addressed the English council of state on the subject of the readmission, and a pass was issued to enable him to go to England. After the cessation of the war between Holland and England, Manasseh sent his son Samuel and his nephew David Dormido to consult with Cromwell. They being unsuccessful, Samuel returned to Amsterdam in 1655 to persuade his father to attempt the task himself.

Manasseh arrived in London in October of that year, and immediately printed his "Humble Addresses to the Lord Protector," the result being a national conference held at Whitehall in December, 1655. It does not appear that Manasseh spoke at this conference, though his pamphlet was submitted to it. A formal declaration was made by the lawyers present at the conference that there was nothing in English law to prevent the settlement of Jews in England, though the question of its desirability was ingeniously evaded by Cromwell (see CROMWELL). Prynne wrote his "Short Demurrer" against the proposal, and this was answered by Manasseh ben Israel in his "Vindiciæ Judæorum" (London, 1656). Meanwhile the opening of the Robles case had brought the question to a practical issue, though not in the sense Manasseh was striving for. He appears to have quarreled with the London Jews, and had to go for help to Cromwell, who, at the end of 1656, made him a grant of £25, and in the following year gave him a pension of £100 a year. In September, 1657, his son Samuel died; with the aid of a grant from Cromwell, Manasseh took the body to Holland to be buried at Middleburg, where he himself died two months later. Though he had not succeeded in obtaining formal permission for the resettlement of the Jews in England, he had by the publicity of his appeal brought the subject prominently before the ruling minds of England, and thus indirectly led to the recognition of the fact that there was nothing in English law against the readmission.

His Works.

The pamphlets connected with the return of the Jews to England have been republished, with an introduction, by Lucien Wolf through the Jewish Historical Society of England (London, 1901); the first part of the "Conciliador" appeared at Frankfort-on-the-Main in 1632; the remaining three parts at Amsterdam in 1641, 1650, and 1651. Manasseh wrote also: a series of works in Latin on various theological problems, giving the usual rabbinic solutions, all printed at Amsterdam—"De Creatione" (1635), "De Resurrectione Mortuorum" (1635), "De Termino Vitæ" (1639); an essay in Spanish, "De la Fraglidad Humana" (1642); and a list of the 613 commandments in Portuguese, entitled "Thesoro dos Dinim" (1645). Several of his works have been translated: "Conciliador" into Latin by Vossius (Amsterdam, 1632), and into English by E. H. Lindo (London, 1642; reprinted, Edinburgh, 1904). His "Esperança de Israel" was translated into English by M. Wall, and had three editions between 1650 and 1652; into German by M. Drucker (1651); into Hebrew by Eliakim ben Jacob (1697). His "Vindiciæ Judæorum" was translated into German, with a preface by Moses Mendelssohn (reprinted 1782). Manasseh contemplated writing a large number of other works "on the influence of tradition," "on the divine origin of the Mosaic law," "a summary of Jewish theology," a "bibliotheca rabbinica," and a "Hebrew-Arabic lexicon"; none of these works saw the light, nor did the "Historia Heroyca," which he intended as a sequel to Josephus. Of special interest is his book on the statue of Nebuchadnezzar—"Estatua de Nebuchanassar" (Amsterdam, 1657 ?). This was illustrated by four plates by Rembrandt, explained by Manasseh in his prefatory remarks. Rembrandt etched a portrait of Manasseh, and another engraving of him was executed by Salom Italia in 1642. There is a portrait by Rembrandt at St. Petersburg alleged to be of Manasseh, but its dissimilarity to the authorized portrait renders it impossible that the two can be of the same person.

Manasseh claimed to read and understand ten languages, and printed works in five—Hebrew, Latin, Portuguese, English, and Spanish. His erudition was wide, but he had no claims to accuracy or thoroughness, and he is now chiefly remembered for his untiring labors toward the readmission of the Jews into England.

S. M. FR.

MANASSEH BEN JOSEPH OF ILYE (known also as **Ben Porat**): Russian rabbinical writer and philosopher; born at Smorgony, government of Wilna, 1767; died at Ilye, in the same government, 1831. At seven years of age he was acquainted with some original sources in rabbinical literature, but his father would not permit him to study Hebrew grammar and the Bible lest these might interfere with his Talmudic studies. According to the custom of that time Manasseh was married early; at the age of thirteen he became the husband of the daughter of a wealthy citizen of

Smorgony; but he soon divorced her and married the daughter of a merchant in the village of Ilye, where he spent most of his life. His erudition early drew a circle of friends and disciples around him, and in discussing with them the rabbinical laws and regulations he did not hesitate to criticize such authorities as the Shulḥan 'Aruk and Rashi. He even dared to interpret some parts of the Mishnah in contradiction to the explanation given by the Gemara; for such daring he probably would have been put under the ban had not an influential rabbi, Joseph Mazel of Wyazyn, come to his rescue. The latter took great interest in Manasseh and threw open to him his extensive and valuable library of rabbinical and philosophical literature.

Relation to Elijah of Wilna.

Manasseh became acquainted also with Elijah Gaon of Wilna, whom he visited once a year; but when Elijah discovered that Manasseh visited Zalman of Liozna, the leader of the northern Ḥasidim, he credited those of his disciples who asserted that Manasseh showed Ḥasidic leanings, and held aloof from him, though Manasseh explained to the gaon that only a love of knowledge induced him to visit Zalman, and that his views differed widely from those of the Ḥasidim. Manasseh really sympathized somewhat with the latter, expecting that their movement might develop into something better than the existing rabbinical orthodoxy. In his writings Manasseh holds Elijah of Wilna in high esteem, declaring in "Binat Miḳra" (Grodno, 1818) that from him he had learned to interpret the Talmud by the simple philological method of the "peshaṭ," while the majority of Talmudic teachers used the less scientific methods of the "derash." He even says that but for Elijah of Wilna the Torah would have been forgotten in Israel ("Alfe Menashsheh," § 102; comp. § 177).

The suspicions of the Orthodox members of Manasseh's community increased when he began to study philosophy, mathematics, and astronomy. He had formed the resolution to go to Berlin for the purpose of becoming acquainted with the circle of Moses Mendelssohn; but at Königsberg he was stopped by some of his Orthodox coreligionists, who induced the Prussian authorities to refuse him a passport. Thus he was forced to return home, where, with the sole aid of some old manuals, he studied German, Polish, natural philosophy, and mechanics.

Shows Advanced Tendencies.

Manasseh had large ideas of educating the Russo-Jewish youth, but the rabbis of his time were not prepared to accept them. In his "Pesher Dabar" (Wilna, 1807) he complains "that the Jews are divorced from real life and its practical needs and demands; that the leaders of the Jews are short-sighted men who, instead of enlightening their followers, darken their intellect with casuistic restrictions, in which each rabbi endeavors to outdo his predecessors and contemporaries. The wealthy class thinks only of its profits, and is not scrupulous with regard to the means of getting money. Even those who are honest and endeavor to help their poorer brethren do it in such an unintelligent way that they do harm rather than good. Instead of educating the children of the poor to become artisans, they add to the number of idlers, and are thus responsible for the dangerous consequences of such an education." Plungiansky (see bibliography) is of the opinion that these words were directed against Elijah; and from the preface to "Pesher Dabar" it is evident that Manasseh desired to make peace between the leader of the Ḥasidim and the gaon. The consequences to the author of this daring appeal to the rabbis were serious; many rabbis destroyed his book, and some of his disciples and nearest friends left him.

Manasseh's father-in-law having lost his fortune, Manasseh left his native town and went to Brody, where he made the acquaintance of R. Jacob Landau, who expressed his disapproval of Manasseh's radical criticism of Rashi. He went next to Brest-Litovsk, where R. Aryeh Löb Katzenellenbogen engaged him as teacher to his sons, on the express condition that he adopt the interpretation of Rashi. Manasseh, however, could not abandon his critical methods, and, being dismissed, returned to Ilye. During his stay in Volhynia, on his way to Brody, Manasseh had begun to print his "Alfe Menashsheh," but when the printer became acquainted with the radical spirit of the work he threw both proofs and manuscript into the fire. Manasseh at once proceeded to rewrite his book, and owing to his remarkable memory was able to complete it; he published it in Wilna in 1827 (republished in Warsaw in 1860). In this work Manasseh demonstrates that in accordance with the rabbinical teachings the Rabbis have the power to amend certain Jewish legal decisions when there is a necessity for it. Manasseh was compelled to suppress the paragraph containing this (§ 20) because Samuel Katzenellenbogen threatened that if it were not withdrawn he would order the work publicly burned in the synagogue-yard.

When the Russian government ordered the establishment of rabbinical schools, Manasseh wrote a work on higher mathematics, mechanics, and strategics and asked his friends to induce some scholar to translate this work into Russian in order to show the government what a Jew could produce on those lines. His friend Joseph of Wyazyn feared, however, the unfavorable comment of the officials, who might say that the Jews, instead of working on farms, were preparing war plans. It was resolved therefore to burn the manuscript. Judah Löb of Kovno, Samuel Eliasberg, and Wolf Adelsohn may be mentioned among Manasseh's friends.

Manasseh was undoubtedly a great scholar, and his mind was remarkable for subtlety and power of analysis; he was also a friend of the people, and translated his "Samma-de-Ḥayye" into Judæo-German for the purpose of reaching them. In another work, "Sheḳel ha-Kodesh" (Shklov, 1823), he defends himself against the accusation of being an ambitious innovator. He says that his opponents can not even understand that one can risk his peace by antagonizing influential rabbis out of mere love for one's people. He asserts that he never sought wealth, fame, or pleasure, and that he lived on bread and water; but that the thirst for self-perfection would not allow him to rest until he had fulfilled his mission. In the same book he shows that it is erroneous to suppose that the earthly life is only a vale of tears and misery and the antechamber to a future life.

Manasseh was one of the first victims of the cholera epidemic of 1831. He did not live to realize any of his aspirations, but he prepared the ground for the Maskilim, who disseminated his ideas. Besides the above-named works Manasseh left one on mathematics and some other writings in manuscript.

MANCHESTER: City in Lancashire, England, and one of the chief British manufacturing centers. It has a population of 543,969, of whom about 25,000 are Jews (the second largest Jewish community in the British empire). The history of the Manchester Jewish community dates from about 1780, when Jews commenced to settle near Shudehill and Long Millgate. The first synagogue was founded by two brothers, Lemon and Jacob Nathan, from Liverpool, where a congregation had recently been organized. The upper part of a house in Long Millgate served as the first place of worship of the new community. Lemon Nathan became its first president and Rabbi Ahron (Aaron Jacobs) its first minister. A son of Rabbi Ahron, Alexander Jacobs, became an early president of the Manchester Jews, and in 1804 established their first local charity. It was known as the Manchester Jewish Philanthropic Society, and its object was to grant relief during the winter months to poor resident Jews. The original cemetery was opened in 1794, in the neighborhood of St. Thomas' Church, Pendleton. The congregation next worshiped in Ainsworth Court, Long Millgate, removing, in 1824, to Halliwell street, where it erected a synagogue for itself. Sixteen years later a schism occurred, in consequence of which a separate congregation was formed which worshiped in Miller's lane, acquiring a cemetery of its own at Miles Platting; after a time, however, the two congregations were reunited. A third cemetery was acquired at Prestwich, in 1843.

The appointment of Dr. Schiller-Szinessy as rabbi of the Halliwell Street Synagogue was productive of another schism, which led to the establishment, in 1856, of a Reform synagogue, under the auspices of Professor Theodores, Horatio Micholls, Dr. Hesse, Sigismund Schloss, and others. On the retirement of Dr. Schiller-Szinessy, in 1861, he was succeeded by Dr. Gustav Gottheil, who ministered at Manchester for thirteen years, until called to America to fill the pulpit of Temple Emanu-El, New York. Dr. Gottheil's most prominent successor at Manchester was the Rev. L. M. Simmons (d. 1900).

The Halliwell Street Congregation continued to grow, and in 1858 it removed to Cheetham Hill, where a magnificent place of worship was built, which became known as the "Great Synagogue" and is now the principal synagogue in Manchester. Prof. S. M. Isaacs of Liverpool—the first regular English preacher in Great Britain—became preacher of the Great Synagogue in that year, dividing his ministrations between the two cities. In 1863 he left Liverpool and thenceforth devoted himself entirely to the Manchester synagogue; he died in 1878, and was succeeded by the Rev. Dr. B. Salomon. In 1871 two new synagogues were established, one in Oxford road, for the Jews living in South Manchester, and another in York street, for the Spanish and Portuguese Jews. The rapid growth of the community since 1890 has necessitated the foundation of several new congregations, and there are now nearly thirty synagogues.

In 1838 the Manchester Hebrew Association had founded religious classes, and in 1842, as an outcome of these classes, a Jewish school was established through the instrumentality of Abraham Franklin and his brother Jacob Franklin (subsequently editor of the "Voice of Jacob"), Philip Lucas (who became the first president), and Eleazar Moses. A couple of rooms were engaged, in the first instance, at the Salford Lyceum Institution, and an enlarged building in York street was acquired in 1851. In 1869 the present structure in Derby street was erected. The school now (1904) has 2,300 scholars (800 in the boys' and girls' classes respectively, and 700 infants). The head master, Ephraim Harris, M.A., has occupied that position since 1869. The Jewish Board of Guardians was founded in 1867.

Other important Jewish institutions in Manchester are: the Hebrew Philanthropic and Loan Society (established 1861); the Sustentation Fund (connected with the Manchester Congregation of British Jews); the Visiting Committee (founded in 1885, in conjunction with Liverpool, for hospital and prison visitation); the United Sisters' Maternity Society; the Jewish Ladies' Visiting Association; the Children's Holiday Home; the Jewish Home for Aged and Needy Jews; the Hebrew Bread, Meat, and Coal Society; the Soup Kitchen for the Jewish Poor; the Talmud Torah School; the Jewish Working Men's Club (founded 1887); the Manchester Board of Shechita; the Manchester Naturalisation Society; the Manchester branch of the Jewish Lads' Brigade; and the Manchester Jewish Hospital. Zionism is also strongly represented in Manchester.

MANDÆANS: Eastern religious sect that professes and practises an admixture of Christian, Jewish, and heathen doctrines and customs. The members of the sect live in Lower Babylonia, in the territory of Wasiṭ and Bassora, near Khuzistan, and speak the languages of the localities in which they are settled (Arabic and Persian). Their sacred books are in an Aramaic dialect which has close affinities with that of the Talmud of Babylon, and they are written in peculiar characters resembling Old Palmyrenian script.

Language.

Besides the name "Mandæans," derived from מנדא דחיא (= "word of life"), the most important figure in the Mandæan religious system, they take, in their dealings with other communions, the name of "Sabians," and call the wise and learned among them "Nasoræans" (נצוריא). To European scholars of the seventeenth century, who first heard of their existence through Christian missionaries, they were known under the erroneous appellation of "Christians of St. John" (the Baptist), on account of the reverence in which St. John is held among the members of the sect and because of their frequent baptisms. The sacred books of the Mandæans consist of fragments, of various antiquity, derived from an older literature. Of these the most important is the גנזא (= "treasure") or סדרא רבא (= "the great book"), which dates from somewhere between 650 and 900 C.E. It is divided into two unequal parts: the larger, intended for the living, is termed ימינא (= "to the right hand"); the smaller, containing prayers to be read on the burial of priests, is called סמאלא (= "to the left hand"). In this book, and in some other works of lesser importance, is expounded the Mandæan religious system, in which Jewish influence is distinctly visible. It is essentially of the type of ancient Gnosticism, traces of which are found in the Talmud, the Midrash, and in a modified form in the later Cabala.

Gnostic Elements.

The גנזא gives three conflicting accounts of the Creation, the least complicated of which may be summarized as follows: A triad of divinities existed at the beginning of all things—Pira Rabba (= "the great fruit"), Ayar Ziwa Rabba (= "the ether of great brilliancy"), and Mana Rabba. (According to Joseph Halévy, Mana is the Biblical מן, which the Talmud and Midrash regarded as a celestial food. The connection between Pira and Mana is easily explained by the Gnostic idea which compares the divine essence to the grain of a fig.) The last-named, the most prominent of the three, is the King of Light, from whom all things proceeded. From him emanated the Great Jordan, which permeates the whole ether, the domain of Ayar. (The idea that water, air [ether], and fire existed before the creation of the world is found in a Palestinian midrash of the fourth century; see Epstein, in "R. E. J." xxix. 77.) Then Mana called into existence Ḥayye Ḳadmaye ("primal life"), and, when the act was accomplished, withdrew into strictest privacy, being visible only to the souls of pious Mandæans.

Series of Revelations.

As the revealed and governing deity, Ḥayye Ḳadmaye is entitled to the chief worship and adoration. Ḥayye Ḳadmaye produced, besides the numerous angels (עותריא) that arose from the further development and combination of these primary manifestations, Ḥayye Tinyane ("secondary life"), or Yushamin (= יה שמיא, the Jehovah of the Hebrews being considered by the Gnostics as a divinity of second rank). The next emanation after Yushamin was Manda de-Ḥayye (מנדא דחיא), the Primal Man (גברא קדמיא; in the Cabala, אדם קדמין). Then a revolution occurred in heaven. Yushamin attempted to seize the government, but failed, and was punished by ejection from the pure ethereal world into that of inferior light. (A similar story of the revolt of Satan and of his banishment to the subterranean regions is found in the haggadic literature; see Gen. R. iv.) Manda de-Ḥayye revealed himself to humanity in a series of incarnations, first taking the forms of the three brothers Hibil, Shitiel, and Anosh (the Biblical Abel, Seth, and Enoch). The most prominent of these is Hibil, who possesses the same attributes as Manda de-Ḥayye, with whom he is often confounded.

Among the "'utre" (angels) who emanated from Ḥayye Tinyane the most prominent is Ḥayye Tlitaye ("third life"), often called Abatur ("father of the 'utre"). He sits on the verge of the world of light that lies toward the lower regions, and weighs in his balance the deeds of the spirits ascending to him from the earthly life. Beneath him originally was an immense void, with troubled black water at the bottom in which his image was reflected, the reflection ultimately becoming solidified into Petaḥiel, called also Gabriel, who partakes of the nature of matter. Petaḥiel received the mission to build the earth and to people it. Accordingly he made Adam and Eve, but was unable to make them stand upright; whereupon Hibil, Shitiel, and Anosh were sent by Ḥayye Ḳadmaye to infuse into their forms spirit from Mana Rabba himself. Hibil then instructed man in the true religion, and apprised him that his Creator was not Petaḥiel, but the Supreme God who is far above him. Petaḥiel was then exiled to the under world, made up of four vestibules and three hells. Each of these vestibules has two rulers—Zartay and Zartanay, Hag and Mag (see GOG AND MAGOG), Gaf and Gafan, Antan and Kin. In the highest hell rules the grisly king Shedum (in Haggadic literature, Ashmedai; see ASMODEUS).

Invested with the power of Mana Rabba, Hibil descended into these lower regions and brought forth Ruḥa, the mother of falsehood and lies, the queen of darkness, and prevented her return to the nether world (see LILITH). She then bore the devil Ur; he in his pride sought to storm the world of light, but was overpowered by Hibil, who cast him into the black waters and imprisoned him within seven iron and seven golden walls. By Ur, Ruḥa bore three sets of sons, seven, twelve, and five respectively. They all were translated by Petaḥiel to the heavenly firmament, the seven forming the seven planets and the twelve the signs of the zodiac, while the fate of the remaining five is unknown.

True and False Prophets.

According to the Mandæan belief the appointed duration of the world is four hundred and eighty thousand years, divided into seven epochs, in each of which one of the planets rules. The whole human race, with the exception of one single pair, has been destroyed three times. The Mandæans consider the Biblical saints as false prophets. Such were Abraham (who lived, according to their computation, 6,000 years after Noah, during the reign of the sun), Misha (Moses, in whose time the true religion was professed by the Egyptians, from whom the Mandæans claim to descend), and Shlimon (Solomon, son of David, to whom the devils yielded obedience: comp. Giṭ. 57a). A true prophet was Yaḥya (John), son of Zechariah, who was an incarnation of Hibil.

During forty years Yaḥya baptized myriads of men in the Jordan. By a mistake he baptized the false prophet Yishu Meshiḥa (Jesus), son of the devil Ruḥa Ḳadishta. Thereupon Hibil's younger brother Anosh descended from heaven, caused himself to be baptized, performed miracles, and brought about the crucifixion of the false Messiah. Then he preached the true religion, destroyed the city of Jerusalem ("Ur-Shalom" = "the devil finished it"), which had been built by Adonai, and dispersed over the world the Jews, who had put Yaḥya to death. It is interesting to note that the Mandæans accuse the Christians of using the blood of Jewish children in the preparation of hosts.

J. I. Br.

MANDEL, PAUL: Hungarian jurist and deputy; born at Nyirbator Jan. 6, 1839. He studied law in Budapest and Vienna, and in 1875 was elected to the Hungarian Parliament as representative of his native city. He has retained his seat from that time up to the present (1904); he became a member of the law committee in 1881, and has taken a prominent part in framing the laws concerning guardianship, copyright, and the office of royal notary public. His parliamentary speeches in 1878 against capital punishment aroused much attention, as did those in 1884 in the cause of religious freedom, and in 1885 against the anti-Semites.

S. L. V.

MANDELKERN, SOLOMON B. SIMḤAH DOB: Russian poet and author; born in Mlynov, Volhynia, 1846; died in Vienna March 24, 1902. He was educated as a Talmudist. After his father's death he went to Dubno (he was then fourteen), where he continued his Talmudical studies. He became associated with the Ḥasidim in that community and with their "rabbi," Mendel of Kotzk, with whose son David he spent some time studying Jewish philosophy and Cabala. Later he became identified with the Haskalah movement. After his marriage he went to Wilna, entered its rabbinical school, and graduated as a rabbi. Mandelkern subsequently studied Oriental languages at St. Petersburg University, where he was awarded a gold medal for an essay on the parallel passages of the Bible. In 1873 he became assistant rabbi at Odessa, where he was the first to deliver sermons in Russian, and where he studied law at the university. The degree of Ph.D. was conferred upon him by the University of Jena. About 1880 he settled in Leipsic and occupied himself with literary work and with teaching. In 1900 he visited the United States; he returned to Leipsic in 1901, and was visiting Vienna when he suddenly became ill and died in the Jewish hospital of that city.

Solomon Mandelkern.

Mandelkern was a prolific writer in several languages, especially in Hebrew, in which he produced poetical works of considerable merit. His literary career began in 1886 with "Teru'at Melek Rab," an ode to Alexander II., followed by "Bat Sheba'," an epic poem, "Ezra ha-Sofer," a novel (transl. from the German by L. Philippson), and a satirical work entitled "Ḥizzim Shenunim" (all published in Wilna). Other works of his are: "Dibre Yeme Russiya," a history of Russia (Warsaw, 1875; written for the Society for the Promotion of Culture Among Russian Jews; for this work he was presented by the czar with a ring set with brilliants); "Shire Sefat 'Eber," Hebrew poems (2 vols., Leipsic, 1882 and 1889); and "Shire Yeshurun," a translation of Byron's "Hebrew Melodies" (*ib.* 1890). He published also: "Bogdan Chmelnitzki," in Russian, a translation of Hanover's "Yewen Meẓulah" (St. Petersburg, 1878; Leipsic, 1883); a Russian edition of Lessing's fables (*ib.* 1885); and "Tamar," a novel in German (*ib.* 1885; really a translation of Mapu's "Ahabat Ẓiyyon," without any mention of Mapu as the author). Sermons by him in Russian, and Russian and German translations of his Hebrew songs and articles, have appeared in various periodicals; and most Hebrew journals and year-books published within the last thirty years (especially "Ha-Shaḥar," "Ha-Asif") contain articles, poems, and epigrams by him.

Mandelkern's greatest work is the "Hekal ha-Ḳodesh," or "Veteris Testamenti Concordantiæ," a Hebrew-Latin concordance of the Hebrew and Chaldaic words found in the Bible (Leipsic, 1896), which has almost superseded all similar works of that nature. An abridged edition of this monumental work appeared under the title "Tabnit Hekal" (*ib.* 1897; for the various criticisms which were made of Mandelkern in connection with the two editions of the concordance, and for lists of errata, see Stade's "Zeitschrift," xviii. 165, 348; xix. 187–191, 350; xxii. 320; xxiii. 94, 352; xxiv. 146; etc.).

In his last years Mandelkern was engaged in the composition of a Talmudic and Midrashic concordance, part of which, probably, is among the many complete and incomplete works which he left in manuscript.

H. R. P. Wi.

MANDELLI, DAVID: Hungarian linguist; born about 1780 at Presburg; died at Paris Dec. 22, 1836. He was one of the greatest linguists of his time, and is said to have excelled in his knowledge of foreign languages even the celebrated Cardinal Giuseppe Mezzofanti. The favorite studies of Mandelli were Hebrew, Arabic, Persian, Chinese, Greek, and Latin, from a combination of which he formed a language of his own (Oettinger, "Moniteur des Dates").

S. I. War.

MANDELSTAMM, BENJAMIN B. JOSEPH: Russian Hebraist and author; born in Zhagory about the end of the eighteenth century; died in Simferopol May 8, 1886. He was the eldest of several sons and received a liberal education. In the first part of his "Ḥazon la-Mo‘ed" (Vienna, 1877) Benjamin describes a journey which he made from Zhagory to Moscow about 1835. The second part of the work consists of letters which he wrote from Wilna in 1841-43 in regard to LILIENTHAL's mission in Russia. Like most of the leading Maskilim of the time, Mandelstamm was at first very enthusiastic about the movement; but he was much disappointed at the results and expressed strong disapproval of Lilienthal's methods. The third part contains a description of the Crimea with plans for bettering the condition of the Russian Jews.

Mandelstamm was employed by the Günzburgs, with some intervals, for more than forty years, and from 1864 until the time of his death he was their representative in Simferopol. He visited Paris in 1875 and gave a graphic description, in Hebrew, of the French capital in his "Paris" (Warsaw, 1878). He furthermore wrote "Mishle Binyamin," which appeared in the first two volumes of "Ha-Asif" (published also separately), and contributed to "Ha-Meliẓ" (1892, Nos. 267-271) a very interesting description of the younger days of his brother Leon and to "Ha-Ẓefirah" (xv., Nos. 12 *et seq.*) an article on the anti-Jewish riots of 1881-82. He is considered one of the best of Hebrew prose-writers, although his too florid style and his continual deviations from the subject can hardly please a modern reader.

H. R. P. WI.

MANDELSTAMM, LEON (ARYEH LÖB) B. JOSEPH: Russian Hebraist, poet, and educator; born in Zhagory, government of Kovno, in 1809; died in St. Petersburg Sept. 12, 1889. He was the fourth son of Joseph Mandelstamm, a man of liberal and progressive views who had imbibed German ideas and collected German books during his business travels in Germany. Under the guidance of his father and older brothers Leon acquired a large amount of rabbinical and secular knowledge before he was fifteen years of age. He married while very young, and settled with his wife's parents in Keidany, government of Wilna; but his progressive thoughts and habits were considered heretical there, and he was compelled to divorce his wife after about six months of married life.

Mandelstamm then resumed his studies with renewed vigor, and about 1832 went to Wilna with the intention of entering its university; but that institution being about to be transferred to Kiev, he entered the University of Moscow instead. He graduated as a "candidate" (bachelor) in philology from the University of St. Petersburg in 1844, being the first Jew in Russia to attain that honor.

Mandelstamm acted as secretary to the rabbinical commission called at St. Petersburg in the summer of 1843 to draw up a system of education for the Jews of Russia. When LILIENTHAL, who had been selected to carry out the plans of the commission, or rather the plans of Uvarov, the Russian minister of public instruction, suddenly left Russia in 1845, Mandelstamm was appointed in his place and served under Uvarov and his successors until he retired in 1857. In these twelve years he wrote, edited, and published various books for use in Jewish schools, superintended the establishment of schools in various localities, including the rabbinical schools of Wilna and Jitomir, and appointed teachers for them (see Gottlober in "Ha-Maggid," xvii. 392). He had charge also of the disbursement of the candle-tax funds, which were for the purpose of supporting those schools; the conservative masses, hating both the tax and the purpose for which it was levied, saw in him the embodiment of all the evil of the new movement. The ill-feeling against him disappeared in later years (see Gurland in "Ha-Shaḥar," iv. 112).

After his retirement from the service of the government he engaged in various financial enterprises, but few of which were successful. He spent much time in Germany, especially in Berlin, where most of his works were published. His Russian translation of the Bible was at first prohibited in Russia, and was permitted later only on condition that it would not be sold without the Hebrew text ("Allg. Zeit. des Jud." 1870, pp. 438-439; *ib.* 1871, p. 340). His last years were spent in poverty and neglect. Having died suddenly on a ferry-boat, he was buried in a pauper's grave; several days afterward, however, he was disinterred and buried with proper honors in the Jewish cemetery of St. Petersburg. His library was taken to the United States by A. M. Bank and was sold to the New York Public Library, where it formed the nucleus of the Jewish department of that institution.

Mandelstamm was the author of: "Stikhotvoreniya," poems (Moscow, 1840); "Ḥinnuk Ne‘arim," Hebrew and German text-book for schools, in two parts (Wilna, 1849-50); notes to the Bible, in the edition (24 vols.), with the German translation, printed (under his supervision) by the Russian government (St. Petersburg, 1852) and known as the "Mandelstamm edition" of the Bible; "Shene Peraḳim," better known as "Kebod Melek," in Hebrew and German (*ib.* 1852); "V Zashchitu Yevreyev" (*ib.* 1858); "Sefer Millim," Russian-Hebrew and Hebrew-Russian dictionary (*ib.* 1859); "Horæ Thalmudicæ," in German (Berlin, 1860); Russian translation of the Pentateuch (*ib.* 1862; 2d ed. 1871); "Die Bibel, Neu Uebersetzt und Erklärt" (the Book of Genesis and a dramatization of Canticles, both annotated; *ib.* 1862); "Biblische Studien," in two parts (*ib.* 1862); "Saratovskie Mucheniki," an account of a ritual-murder trial of 1857 (Berlin, 1863); "Einleitung in den Pentateuch" (*ib.* 1864); "Yevreiskaya Semyya," a drama (*ib.* 1864; 3d ed., St Petersburg, 1872); "O Zheleznikh Dorogakh," on Russian railroads (St. Petersburg, 1865-67); "Bibleiskoe Gosudarstvo," in "Yevreiskaya Biblioteka," for 1871; "Stimmen in der Wüste," German songs (London, 1880). He also contributed numerous articles to periodicals in various languages. A part of his "Horæ Thalmudicæ," under the title "Rabbi Joshua ben Hanania," appeared in an English translation (Berlin, n.d.). The four volumes of extracts from Maimonides' Yad ha-Ḥazaḳah, with German translation, published by the Russian government (St. Petersburg, 1851), were prepared, under Mandelstamm's supervision, by his townsman Ḥayyim Sack.

Mandelstamm had a son, **Joseph,** a physician, who died long before him. A daughter, by a second marriage, is the wife of Dr. M. L. Zimmerman of Philadelphia.

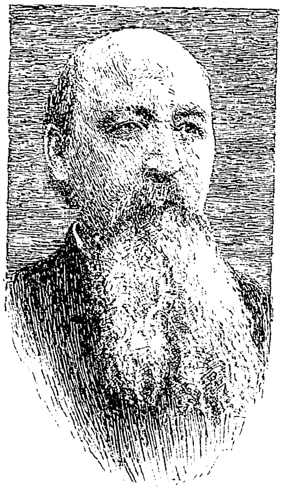
H. R. P. Wi.

MANDELSTAMM, MAX (EMANUEL): Russian physician and Zionist; born in Zhagory, government of Kovno, in 1838. His father, Ezekiel Mandelstamm, younger brother of Benjamin and Leon Mandelstamm, taught him French and German, in addition to the usual studies of the "ḥeder." Later Max attended a school in Mitau for about a year, and the gymnasium at Wilna from 1850 to 1854. At the age of sixteen he entered the University of Dorpat as a medical student, and later studied at Kharkof, where he graduated in 1860. After practising medicine in Chernigov for about four years he went to Berlin (1864) and entered the university, where he studied ophthalmology under Graefe and pathology under Virchow. Later he studied for some time in Heidelberg under Helmholtz, and in 1866 he became assistant physician in Pagenstecher's hospital for eye-diseases in Wiesbaden. Two years later he settled in Kiev, where he still (1904) resides. He is considered one of the leading oculists in Russia. He was privat-docent at the University of Kiev for twelve years, and was thrice chosen professor; but the election was each time declared void on account of his being a Jew. He was for four years the head of the clinic for eye-diseases at the university, and is now the head of a private ophthalmic hospital which he established in 1880.



Max Mandelstamm.

Mandelstamm takes a prominent part in Jewish affairs both in Kiev and in Russia generally. He was president of a committee to assist emigration in 1881 and 1882, and was one of the two Jewish representatives who were permitted to plead the cause of the Jews before the commission which investigated Jewish affairs after the riots of 1881. He has taken a leading part also in Zionism since the inception of the movement, and has been a conspicuous figure at all the Zionist congresses held during recent years. Most of Mandelstamm's writings are on subjects relating to his scientific specialty, and have appeared in Graefe's "Archiv" (vols. xi., xiii., xix.) and "Centralblatt für Praktische Augenheilkunde"; only one essay has been translated into English, under the title "How Jews Live;" London, 1900. His articles on Zionism appeared in "Welt" and "Ost und West."

MANDL, CHRISTOF: Hungarian author; converted to Christianity in 1534. His godfather was George, Margrave of Brandenburg, to whom Mandl dedicated his "Dass Jesus Christus Sey das Ewig Wort" (1536), in which Jesus is represented as the Redeemer. His other works are "Rechnung der 70 Wochen Danielis" (1552) and another, published in 1557, in which Jesus is described as the Messiah (Büchler, "A Zsidók Története Budapesten," Budapest, 1901).

D. A. Bü.

MANDL, LUDWIG LAZAR: Hungarian anatomist and pathologist; born at Budapest Dec., 1812; died in Paris July 5, 1881; educated at Vienna and Budapest (M.D. 1836). He then settled in Paris to study microscopy. His researches in the embryology of the higher mammalia attracted the attention of the Parisian Society of Physicians, which, in 1845, requested him to prepare anatomical specimens. In 1846 he began to lecture on microscopic anatomy at the Collège de France. In the same year he was made a knight of the Legion of Honor. After 1862 he lectured before the Medical Clinic of Paris on diseases of the vocal organs.

Mandl was a prolific writer; the following are among his principal works: "Sanguis Respectu Physiologico" (Budapest, 1836); "Anatomie Microscopique" (Paris, 1838-58); "Traité Pratique du Microscope" (*ib.* 1839); "Mémoires d'Anatomie Pathologique" (*ib.* 1840); "Manuel d'Anatomie Générale" (*ib.* 1843; awarded a prize by the French Academy in 1858); "Traité d'Anatomie Microscopique" (*ib.* 1847; awarded a prize by the French Institute in 1850); "Mémoires Concernant la Pathologie et la Thérapeutique des Organes de la Respiration" (*ib.* 1855); "Traité Pratique de Maladies de Larynx et de Pharynx" (*ib.* 1872).

MANDL, MORITZ: Austrian dramatist and journalist; born in Presburg May 13, 1840. He went to Vienna and there joined the editorial staff of the "Wanderer" (1862) and later that of the "Neue Freie Presse." Since 1877 he has been assistant editor of the "Fremdenblatt."

Mandl has written: "Deutschland und der Augenblick" (Leipsic, 1861), a pamphlet that won some attention; "Käthchen von Heilbronn" (Vienna, 1873), a German epic; a dramatic prologue to the Vienna "Kleist-Feier" of 1876; and several plays.

MANE. See WEIGHTS AND MEASURES.

MANESSIER DE VESOUL: French communal leader; originally from Vesoul and probably of the family of Héliot of Vesoul, whose ledger has been published by Isidore Loeb (in "R. E. J." viii., ix.). He is chiefly known in connection with the Paris community. It was he who negotiated for the return of the Jews to France about the year 1358. He was appointed by the king "procureur général" of the Jews, with the function of granting or withholding the right of entrance into France to every individual Jew, being in turn responsible for their contributions to the treasury. He held this position as late as 1376. Associated with him about 1370 was one Jacob de Pont St. Maxence. After a time these two quarreled, and Jacob accused Manessier and Vivant (Manessier's brother) of certain malversations in his office, of having established a synagogue without the king's permission, and of having pronounced an edict of excommunication contrary to the provisions of the act of Parliament of Feb. 3, 1374. Manessier was imprisoned in the Châtelet, Paris. The king's proctor demanded a fine, with imprisonment until the fine had been paid. It is, however, probable that this was remitted, as Manessier afterward recovered his credit with the court, after having made peace with Jacob.

MANETHO (Greek, *Μανεθώς* or *Μανεθών*): Greco-Egyptian writer whose history of Egypt, forming a source of Josephus, especially in his book "Contra Apionem" (i. 14 *et seq.*; ed. Niese, §§ 73-105; 228-251), possesses special interest for the history of Israel.

Manetho was high priest of Sebennytus in the Delta (according to some, erroneously, of Heliopolis), and lived under the first two Ptolemies. His history was written after 271 B.C.; its importance rests on Manetho's ability to use hieroglyphic sources directly. Though he seems to have enjoyed considerable reputation among the contemporary Greeks, it does not appear that his history was much read in the first century of the common era. Josephus is the only writer who furnishes coherent extracts. After him, Julius Africanus (221) and Eusebius (326) extracted chronological tables of Egyptian dynasties and kings for their Biblical chronographies. Both extracts were preserved by Georgius Syncellus (*c.* 792). The confusion of facts and names in Josephus' extracts (especially on the Exodus, "Contra Ap." i. 26; ed. Niese, §§ 228 *et seq.*) is almost incredible. Some of the errors may be attributed to Josephus himself. What Josephus reports about the Hyksos (or Hykussos) dynasty contains valuable information; but the connection of those kings and the Israelites is an untenable theory. What remains of the Manethonian Exodus account after the correction of the most manifest blunders seems, however, to show that the writer used the Biblical narrative and tried to combine it with some popular Egyptian tales.

BIBLIOGRAPHY: The extant fragments of Manetho have often been collected (by Rosellini, Bunsen, and others). They are most conveniently accessible in C. Müller, *Historici Græci Minores*, ii. 511; and the most valuable treatise on them is Unger, *Die Chronologie des Manetho*, 1867. For scattered literature see Wiedemann, *Gesch. Aegyptens*, p. 121.

T. W. M. M.

MANETTI, GIANNOZZO: Italian statesman and Christian Hebraist; born in Florence 1396; died at Naples Oct. 26, 1459. At the suggestion of Pope Nicholas V., who had made him one of his secretaries, Manetti learned Hebrew from a Jew named Manuel. He is said to have had a Jewish servant with whom he spoke Hebrew; and his son Agnolo from an early age was taught Hebrew besides Latin and Greek.

Manetti translated the Psalms at Nicholas' request, but had to defend the principles of his translation in a special treatise. In the hope of gaining the 5,000 ducats promised by the pope for the discovery of the original Hebrew of the Gospel of Matthew, Manetti collected many Hebrew manuscripts which are now in the Vatican. He also began a large apologetic work against the Jews.

MANI, ELIJAH: Turkish rabbi; died in Hebron, Palestine, in the summer of 1899. He was a native of Bagdad, where he was held in great esteem for his piety and his knowledge of the Cabala. About 1856 he went to Jerusalem, and two years later settled in Hebron. When R. Moses Pereire of that city died, Mani succeeded him as rabbi of the Sephardim. For fourteen years he accepted no remuneration, but later was forced by poverty to overcome his scruples. He was very active in charitable and communal affairs, and his simple and noble life won for him the respect and admiration of all the inhabitants of that ancient city; Mohammedans as well as Jews thronged to his funeral. He is said to have written eleven works, which he refused to publish.

MANISSA (the ancient **Magnesia ad Sipylum**): Town in the Turkish vilayet of Aidin, twenty-eight miles northeast of Smyrna. It has a population of 40,000, of whom 1,800 are Jews (against 1,200 in 1838). The community there is said to be older than that of Smyrna. Richard Pococke, who visited the city about 1733-34, says ("Description of the East," ii. 56): "Several Jews [of Manissa] exported goods to Smyrna and Europe. They also manufactured calicoes, and usually were rich. To-day they are the commercial leaders. As artisans, they are chiefly shoemakers, tinsmiths, etc. The young women have recently begun to learn the manufacture of Turkish rugs, and this industry is in quite a flourishing condition." When Tournefort visited the district in 1702 ("Voyage au Levant," ii. 490) he found three synagogues there; now there are five—named Shalom, Mayorca, Toledo, 'Eẓ Ḥayyim, and Talmud Torah. The oldest of these, Shalom, was destroyed by fire, but has been rebuilt.

Among its benevolent societies are the ḥebra ḳaddisha; the Hospital Society; the Mohar u-Mattan, which assists and dowers girls who wish to marry; the Ḥesed shel Emet, which provides for poor families in time of mourning; the Shilluḥim, to assist strangers and the poor to emigrate; and the 'Ozer Dallim, which provides the poor with shoes. The different societies have their own revenues.

There are two cemeteries, one old and the other dating back about a century. In the former, tombstones dated 5406 (= 1646) have been found. A portion of the old cemetery was occupied for some years by Mohammedan refugees, who mistook it for vacant ground, and built houses there. To save the new cemetery from a similar fate, it was enclosed with walls in 1900 by the ḥebra ḳaddisha, which spent for this purpose 400 Turkish livres. The community has a small but well-organized hospital, which was founded in 1869 on the initiative of Rabbi Ḥayyim Maẓliaḥ and Rabeno Algranati. Before the establishment of schools by the Alliance Israélite Universelle (one for boys in 1892 and another for girls in 1896) the Talmud Torah was the only educational center. The school buildings stand on a fine estate belonging to the community. After the foundation of these schools the Talmud Torah ceased to exist, and modern ideas of progress have been adopted. Hebrew, French, and Turkish are taught in the schools, and a reading-room was established in 1895. Greek, Turkish, and Judæo-Spanish are the vernaculars. The community is governed by a chief rabbi, who is also the government representative. Since the abolition of the communal tax called "'arikah," the tax upon salt has met the communal needs and the salaries of the rabbis and shoḥeṭim.

The oldest of the chief rabbis of whom any mention is made was Aaron Lapapa, the author of the "Bene Aharon" (Smyrna, 1674), who was succeeded by Benjamin Melammed. After Melammed, the next rabbis known were Zerahiah Azulai, author of "Sukkat Dawid"; Raphael Abraham Maẓliaḥ, author of "Ma'amar ha-Melek" (Salonica, 1806); Joseph Maẓliaḥ, Abraham Maẓliaḥ, Joseph Ḥakim, Moses Maẓliaḥ, and David Gomel, the present (1904) rabbi. Two blood accusations have been brought against the Jews of Manissa, one in 1883 and the other in 1893. In 1837 two hundred Jews died of the Plague.

In a chest in the synagogue Shalom is preserved a parchment manuscript of eight books of the Bible, in three volumes. The first volume contains the books of Genesis and Exodus; the second those of Leviticus, Numbers, and Deuteronomy; and the third Joshua, Judges, and Isaiah. At the end of the last volume is the name of the copyist, Reuben bar Todros, and the date of the book, 5049 (1289). These books are greatly venerated. Some years ago the second volume was sent to Paris to be sold in order to obtain money for the needs of the community. As soon as the book had left Manissa there occurred a succession of sudden and premature deaths. Attributing these misfortunes to the removal of the volume, the community telegraphed for its immediate return.

Among the famous Jews born in Manissa was Samtob (Shem-Ṭob) Shikar, a composer of Oriental music.

About eighty years ago, in the time of Kara Oglu Osman, Chelebi Aaron Franco was the government treasurer; on the downfall of the former, Franco shared his disgrace; Franco's enemies went so far as to pass sentence of death on him, but he was saved through the efforts of Ḥayyim Palaggi, chief rabbi of Smyrna. One of the contemporaries of Franco was a certain Chelebi Abrahamaji Mayo, proprietor of a large estate. Samtob (Shem-Ṭob) Joseph is at present the veterinary surgeon of Manissa and its dependencies; several Jews are members of local tribunals, and David Franco is the present dragoman of the Italian vice-consulate.

D. A. Ga.

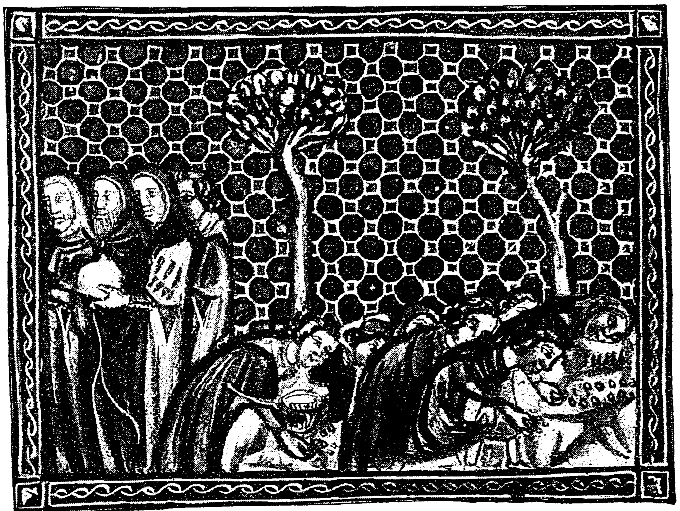
MANN, LOUIS: American actor; born in New York city 1865; son of Daniel and Caroline Mann. He began his career as an actor when but six years of age. In 1880 Mann went on tour with a small company, and subsequently was engaged by the elder Salvini (1881), by Lewis Morrison (1882), and by J. K. Emmett (1888). At the conclusion of these engagements Mann set out as a "barnstormer" in classical drama. Among the parts he has created may be mentioned that of *Utterson* the lawyer, in Robert Louis Stevenson's "Dr. Jekyll and Mr. Hyde," as presented by Daniel Bandmann (1887). Mann next appeared in "Incog," in which he took one of the leading parts (1891). His next conspicuous success was in 1896, in a burlesque of the character of *Svengali* in "The Merry World." Later he turned his attention to German comedy parts and originated those in "The Strange Adventures of Miss Brown" (1896), "The Girl from Paris" (1897), "The Telephone Girl" (1898), "All on Account of Eliza" (1901), and "Master and Pupil." Since then Mann has devoted himself especially to these and character parts. In 1902 he took the leading rôle in "The Red Kloof," and later joined Weber and Fields of New York, being associated with them in their productions until the dissolution of their partnership in 1904.

A. F. H. V.

MANNA (מן).—Biblical Data: The miraculously supplied food on which the Israelites subsisted in the wilderness. Its name is said to have originated in the question מן הוא ("What is it?" Ex. xvi. 15, R. V.; comp. Rashi *ad loc.*), asked by the Israelites when they first saw it. According to George Ebers ("Durch Gosen zum Sinai," p. 236), the name comes from the Egyptian "mennu" (= "food"). The manna is also designated "bread" (Ex. xvi. 4); it is called "the corn of heaven" and "the bread of the mighty" in Ps. lxxviii. 24-25, R. V., and, in a depreciative sense, "the light bread" in Num. xxi. 5. The manna descended in the night in the form of coriander-seed of the color of bdellium (Num. xi. 7), so that in the morning the ground looked as if it were covered with hoar frost. The grains were ground or pounded into flour, and then the flour was prepared and baked in the form of cakes, the taste of which was like that of "wafers made with honey" or "as the taste of fresh oil" (Ex. xvi. 31; Num. xi. 8).

The gathering of the manna was connected with several miracles: it was collected before sunrise, for, in spite of its hard substance, it melted in the sun. The quantity collected made exactly one omer for every person, whether one collected much or little. On Friday morning the portions were double, for the manna could not be found on Sabbath. The manna was eaten the day it was gathered; if it were left until the following morning it corrupted and bred worms, though the manna gathered on Friday and kept for the Sabbath remained fresh. It continued to descend during the forty years the Israelites were in the wilderness, but when they arrived at Gilgal, on the 14th of Nisan, and began to eat the grain grown there, the manna ceased to fall. In order to perpetuate the memory of this providence, Aaron was told to put an omer of manna in a vessel and lay it "before the testimony" (Ex. xvi. 17-35; Josh. v. 10-12). Num. xxi. 5 makes it appear that manna was the only food of the Israelites while they were in the wilderness, although references to provisions of fine flour, oil, and meat are met with elsewhere. It may be either that the manna constituted their main but not only food-supply during the whole forty years, or that it became their exclusive food after the provisions they took with them from Egypt were exhausted.

Certain modern scholars attempt to identify the manna of Exodus with the exudation of the tamarisk-trees (named by Ehrenberg the "Tammarix mannifera") of the Sinaitic peninsula. The Arabs call it "mann al-sama" (= "heavenly manna"), and collect it and sell it to pilgrims. It has been identified also with the exudations of other trees found in those regions. A more recent view identifies the Biblical manna with lichen and allied species of plants found in Arabia and other parts of western Asia. The reports of modern travelers, however, are contradictory in regard to "manna."



Israelites Gathering Manna in the Desert.
(From the Sarajevo Haggadah of the fourteenth century.)

E. C. M. Sel.

——**In Rabbinical Literature:** Manna was one of the ten things created on the first Friday of Creation, in the twilight (Abot v. 9; comp. Targ. pseudo-Jonathan to Ex. xvi. 4, 15). According to Zabdi b. Levi, the manna which fell near the camp of the Israelites in the wilderness covered an area two thousand cubits square; it remained on the ground until four hours after sunrise, when it melted. It fell to a depth of sixty cubits, or, according to Isi b. Akiba (Midr. Teh. to Ps. xxiii.), of fifty cubits, and the quantity which fell every day would have sufficed to nourish the people for two thousand years. The question why was it necessary that the manna should fall every day is answered by the Rabbis in different ways: the Israelites could not be encumbered with its burden; they needed warm food every day, and the manna was warm when it fell; they needed that their hearts should be turned to God for their daily bread. It was so conspicuous that all the kings of the East and West could see it from their palaces (Yoma 76a; Tan., Beshallaḥ, 21).

In order that the manna might remain clean, a north wind first swept the ground, and then rains washed it. Then, after the ground had been covered with a layer of dew, the manna fell upon it, and was itself then covered with dew (Mek., Beshallaḥ, Wayassa', 3; comp. Sifre, Num. 89). It so fell that the righteous had no trouble in gathering it, finding it at the doors of their tents; those of less firm belief had to go farther for it; the wicked had to go far from the camp to gather it (Yoma 75a). A very different statement, but of the same nature, is given in Tan., Beshallaḥ, 22: The diligent went out into the field to gather the manna; the less diligent went just outside their tents; but the indolent lay in their sleeping-places while the manna fell into their outstretched hands. Created only for the children of Israel, the heathen could not secure the smallest quantity of it, for when one stretched out his hand to pick it up, it slipped from his grasp (Sifre, Deut. 313; Midr. Abkir, in Yalḳ., Ex. 258); according to another opinion, it tasted bitter to the heathen (Tan., *l.c.*).

The melting of the manna formed streams which furnished drink to many deer and other animals, and when those animals were afterward killed by heathen, the latter recognized in the meat the taste of the manna (Tan., *l.c.*; comp. Targ. pseudo-Jonathan to Ex. xvi. 21). It was only in this way that the heathen could know the true taste of the manna, for the water itself was bitter to them (Tan., *l.c.*). With the manna precious stones fell every morning (Yoma *l.c.*). The manna was adapted to the taste of each individual; to the adult it tasted like the food of the adult, while to the sucking child it tasted like the milk of its mother's breasts. By wishing, one could taste in the manna anything desired, whether fowl or fruit; thus the statement that the people ground it, or pounded it, and then baked it (Num. xi. 8), is only figurative, for if one so wished it tasted like food made of flour ground or pounded, baked or cooked. According to a different interpretation, the wicked were compelled to grind it and prepare it until it was fit for food, while for the righteous it was ground by angels before it fell from heaven.

Characteristics.

The manna exhaled a fragrant odor, and during the forty years the Israelites wandered in the wilderness it served the women as perfume. Being a heavenly food, the manna contained nutritious matter only, without any waste products, so that during the whole time the Israelites lived upon it the grossest office of the body remained unexercised. The Israelites, nevertheless, complained of it (comp. Num. xi. 6): "Shall a human being not discharge of what he eats? our bowels will surely be swollen" (Yoma *l.c.*; Sifre, Num. 87–89; Tan., *l.c.*). A miracle attended the collecting of the manna, in that the number of omers gathered by each family was found to correspond to the number of its members. This rendered the manna useful in solving most difficult problems. For instance, when two people came before Moses, one accusing the other of having stolen his slave and the other claiming to have bought the slave, Moses deferred his decision to the following morning, when the number of omers of manna in their respective houses showed to whom the slave belonged. In this way many otherwise inextricable complications could be unraveled (Yoma 75a).

The Rabbis disagreed as to the period of time for which the pot of manna was placed by Aaron "before the testimony." It was placed there only for the following generation; it was placed there for all future generations; it was to be kept there until the coming of the Messiah. It is one of the three things which will be restored by Elijah. Jeremiah, when remonstrating with the children of Israel for their neglect of the Torah, showed them the pot of manna: "See how God nourishes those that occupy themselves with the study of the Law." There is also a disagreement between the Rabbis with regard to the length of time after Moses' death in which the Israelites ate the manna—whether for forty days, seventy days, or for the fourteen years during which the land of Canaan was conquered and divided among the tribes. According to R. Joshua, the manna ceased to descend immediately after Moses' death, and the Israelites were compelled to eat what they had gathered previously (Mek., *l.c.*). The manna is reserved as the future food of the righteous, for which purpose it is ground in a mill situated in Sheḥaḳim, the third heaven (Ḥag. 12b; Tan., *l.c.*).

E. C. M. Sel.

MANNE, MORDECAI ẒEBI: Russian Hebrew poet and painter; born at Rodzkowitz, government of Wilna, 1859; died there in 1886. He received the Talmudic training usual in Poland, and was taught Hebrew grammar by his father. At thirteen he entered the yeshibah at Minsk, and he remained there until 1876, when he removed to Wilna, studied at the yeshibah there, and, on the advice of Joshua Höschel Levin, entered the school of painting and design. His first poetical writings also belong to that time. In 1880 he went to St. Petersburg and enrolled as a student at the Imperial Academy of Fine Arts, receiving, in 1882, a silver medal from the grand duke Vladimir for extraordinary progress.

Manne's poems, "Mebasser ha-Abib," "Ha-Abib," "Ha-Shoshannah," and "Mas'at Nafshi" (which has been set to music and is sung often in Zionist gatherings), place him among the foremost Hebrew poets. His best poems are somewhat didactic in character, as "Tiḳwah la-'Obed," a fragmentary work, depicting the contrast between hope and despair. Another fragmentary poem, "We-Zaraḥ ha-Shemesh u-Ba ha-Shemesh," is an elegy on the death of Emperor Alexander II. His first prose article, on the art of painting, especially among the Jews, appeared in "Ha-Ẓefirah" in 1882. This was followed by a whole series of papers on art, artists, and esthetics, including one on the art of poetry and a paper on the Jewish painter Oppenheim. His writings have been published in two volumes, under the title "Kol Kitbe Mordekai Ẓebi Manne" (Warsaw).

H. R. J. G. L.

MANNHEIM: Town in the grand duchy of Baden, Germany. It has a population of 141,131, including 5,478 Jews (1900). Jews are not known to have lived in Mannheim before the middle of the seventeenth century. On Sept. 1, 1660, thirteen families, eleven of German and two of Portuguese origin, obtained permission from the elector Karl Ludwig to reside there. A deed dated 1656 mentions the first burial-ground, which in 1661 was exchanged for another; the latter was used until 1839. The first rabbi was Naphtali Herz (1657–71). His successor was Isaac Brilin (1671–78), who was appointed rabbi at Mannheim after the expulsion of the Jews from Hammelburg. Upon his death his son-in-law, Eliezer b. Jekuthiel, became rabbi; but, like his successor, Moses Grotwohl (1679), he held the office only a short time. Even at that early date there were 78 Jews in Mannheim, a fact which induced the municipal administration to submit a request to the government of the Palatinate not to grant any more permits to Jews. Isaac Aaron Worms of Metz was rabbi from 1685 to 1693. The devastation of the Palatinate by the French compelled the Jews of Mannheim, who had assisted in the defense of the city, to go elsewhere; nearly 70 families lost their homes by fire. Heidelberg received 26 families until their houses at Mannheim were rebuilt (1691). Among the new houses was the large quadrangular building erected by the court factor Emanuel Oppenheimer of Vienna, son of the famous Samuel Oppenheimer, and which, until 1729, was the temporary residence of the elector Karl Philipp. A concession granted in 1698, whose object was to bring about the reconstruction of the city as soon as possible, increased the number of Jewish inhabitants to 150 families. In 1701 the Jews obtained permission to extend their burial-place and to build a synagogue.

The first rabbi after the reconstruction of the city was Joseph David Ulf (1706–29). It was at this period that a Klaus was founded at Mannheim through the generosity of Lemle Moses Reinganum, with a capital of 100,000 gulden. The building, including a synagogue and bet ha-midrash, was dedicated in 1708, and, with some alterations, exists to-day. Similar institutions, but smaller, were established by

Michael May and Elias Haium. The rabbi at that time was Samuel Helmann (1726–51), an opponent of Jonathan Eybeschütz. On Helmann's appointment as rabbi at Metz, David (Tebele) Hess was elected chief rabbi in Mannheim. During his tenure of office occurred the notorious divorce dispute of Cleve, which involved a member of the Mannheim congregation and aroused a bitter controversy among the rabbis of Germany (1766; see "Or Yisrael," Cleve, 1770; Horovitz, "Frankfurter Rabbinen," iv. 27–31, Frankfort-on-the-Main, 1885; Lubetzki, "Bidke Battim," p. 44b, Paris, 1896). The elector Karl Theodor granted more Jews the right to live in Mannheim (1744), at the same time, however, ordering them to settle in the side streets, as they should not be allowed to own a house in the main street. For thirty-two years the chief rabbi at the klaus was Naphtali Hirsch Katzenellenbogen. The "Stadtrabbiner" was Hirschel Levin (1770–73), who left Mannheim for Berlin. In 1784 Michel Scheuer, from Mayence, was appointed "Stadtrabbiner"; he held the office for twenty-five years and died in 1809. His successors were: Gottschalk Abraham, who had been klaus rabbi and "Oberland" rabbi (d. 1824); Hirsch Traub (d. 1849); Moses Praeger (d. 1861), who introduced a Reform service (1856); B. Friedman (1863–79); and the present (1904) rabbi, M. Steckelmacher (since 1880). Mannheim contains many Jewish philanthropic institutions.

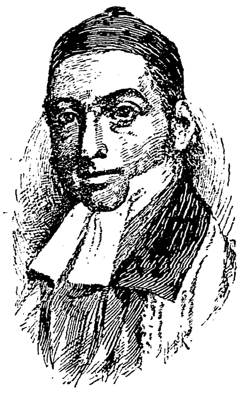
S. N. D.

MANNHEIMER, ISAAC NOAH: Jewish preacher; born at Copenhagen Oct. 17, 1793; died at Vienna March 17, 1865. The son of a ḥazzan, he began the study of the Talmud at an early age, though not to the neglect of secular studies. On completing the course of the cathedral school at Copenhagen, he took up philosophy, Oriental languages, and theology at the university there, at the same time continuing his studies in Talmud and Jewish science. When the Jews of Denmark were emancipated in 1814 confirmation was made obligatory, and the office of catechist was instituted by the state, Mannheimer being the first incumbent (1816). The first confirmation took place May, 1817. In 1821 Mannheimer went to Vienna, where there was then no congregation, the community being divided into two opposing parties. Mannheimer, who was welcomed by both factions, soon succeeded in organizing a congregation, drafting a program and ritual on the traditional basis and harmonizing the views of the two parties. He returned to Copenhagen in December of the same year. Failing in his attempt to secure a new synagogue for Reform services, he accepted a call to the pulpit left vacant by Zunz in Berlin. German services, however, were interdicted in that city; the temple formerly under the ministry of B. Beer was closed, and the royal cabinet order of Dec. 26, 1823, obtained by the Orthodox party, frustrated the attempt to adapt the old ritual to new forms by delivering German sermons in the chief synagogue. Mannheimer therefore left Berlin and took temporary charge of the pulpit of Hamburg, preaching also at Leipsic during the fairs. In 1824 he married Liseke Damier, and in November of the same year he was called to the new synagogue of Vienna. As he could not receive the title of preacher or rabbi, he was inducted, in June, 1825, as "Direktor der Wiener K. K. Genehmigten Oeffentlichen Israelitischen Religionsschule"; he dedicated the new temple in April, 1826, and officiated there until 1829.



Isaac Noah Mannheimer.

Mannheimer's success was due in great measure to his oratorical gifts. His sermons were, for their time, models (Geiger, "Einleitung in das Studium der Jüdischen Theologie," in "Nachgelassene Schriften," ii. 31). His German translation of the prayer-book and of the fast-day prayers, and his arrangement of the fast-day liturgy, are of permanent importance for the ritual, the conservative spirit in which this work was undertaken leading to its adoption by many communities.

In 1848 Mannheimer was returned by Brody to the Austrian Reichstag, where he delivered two memorable speeches, one on the Jew-tax (Oct. 5, 1848) and the other on the abolition of capital punishment (Jan. 29, 1849). On his seventieth birthday the city of Vienna conferred honorary citizenship upon him. He devoted the gifts bestowed by the community upon him on that occasion to a foundation for the aid of rabbis, preachers, and teachers, which still bears his name.

Mannheimer published the following works: "Prædikener Holdte ved det Mosaiske Troes-Samfund's Andagts-Övelser i Modersmaalet i Sommerhalvaaret 1819" (Copenhagen, 1819); "Gottesdienstliche Vorträge Gehalten im Israelitischen Bethause zu Wien im Monate Tischri 5594" (Vienna, 1834); "Gottesdienstliche Vorträge für die Wochenabschnitte des Jahres," vol. i., Genesis and Exodus (*ib.* 1835; partly translated into Hebrew by E Kuttner, under the title מי נח, *ib.* 1865); a translation of the prayer-book and of the fast-day prayers according to the ritual of the Vienna Temple (1840; frequently reprinted). His polemics and responsa include: "Gutachten für das Gebetbuch des Hamburger Tempels" (1841); "Gutachten Gegen die Reformpartei in Frankfurt-am-Main in Angelegenheit der Beschneidungsfrage" (1843); "Einige Worte über Juden und Judenthum" (supplement to the "Oesterreichische Medicinische Wochenschrift," 1842, No. 34), directed against Professor Rosa's statements in reference to the Jewish question (1848). Two numbers of his "Gottesdienstliche Vorträge" appeared posthumously, edited by S. Hammerschlag (Vienna, 1876).

J. E. N.

MANNHEIMER (HERSCHMAN), LOUISE: Writer and poetess; born at Prague Sept. 3, 1845. In 1866 she went with her parents to New York, where she became the wife of Prof. Sigmund Mannheimer. She wrote German and English poems, and articles and reviews for German and English periodicals. Zimmermann's "Deutsch in Amerika" (Chicago, 1894) contains some of her poems and a short biographical notice. Among her productions in English are "The Storm," a translation of one of Judah ha-Levi's poems, and "The Harvest," a prize poem (printed in "The American Jews' Annual," Cincinnati, 1897). In 1895 she published under the title of "The Jewish Woman" a translation of Nahida Remy's "Das Jüdische Weib" (2d ed. 1897). She is the author of "The Maiden's Song," and is the founder of the Cincinnati Jewish Industrial School for Boys and the inventor of the Pureairin Patent Ventilator.

A. S. MAN.

MANNHEIMER, SIGMUND: American educator; born at Kemel, Hesse-Nassau, May 16, 1835. Educated at the teachers' seminary at Ems, Nassau, he became teacher in the Jewish schools of Schierstein (1853) and Hegenheim (1858). In 1861 he entered the University of Paris (Bachelier ès Lettres, 1863), becoming professor of German in 1864. In 1865 he went to America and lived successively in Baltimore (to 1867), New York (to 1873), St. Louis (to 1876), and Rochester, N. Y. (where he became teacher at the Jewish school). In 1884 he was appointed professor of exegesis and Aramaic, and librarian, at Hebrew Union College, Cincinnati, Ohio.

Mannheimer has published: "Die Wahrheit über den Talmud" (Basel, 1858; translated from the French of T. Klein); "Hebrew Reader and Grammar" (New York, 1873; 4th ed., Cincinnati, 1903); "Anti-Semitism" (Cincinnati, 1897; translated from the French of Leroy-Beaulieu); "Iggeret Musar," an English translation of Solomon Alami's "Iggeret Musar" (*ib.* 1898).

A. F. T. H.

MANOAH B. JACOB: French Talmudist; lived at Lunel in the second half of the thirteenth century. He is sometimes quoted under the abbreviation ר"ם (= "R. Manoah"; Halberstam MSS., No. 345). Manoah often cites decisions in the name of his father. After a brief residence at Narbonne, where he studied with Meïr b. Simon and Reuben b. Ḥayyim, Manoah returned to Lunel. Like several of his contemporaries, he was a student of the works of Maimonides, and wrote a commentary on the latter's Yad ha-Ḥazaḳah, which is quoted in "Sha'are Ẓiyyon" under the title "Sefer ha-Manoaḥ," and in "Ḳore ha-Dorot," under the title "Sefer ha-Menuḥah." It was printed at Constantinople in 1518.

MANOAH OF LUNEL. See MANOAH B. JACOB.

MANOAH B. SHEMARIAH HANDEL: Polish author; born at Brzeszticzka (ברעסטיצקא), Volhynia; died in 1612. He was the author of the following works: "Ḥokmat Manoaḥ," glosses to the Talmud (printed in the Cracow 1602–5 edition of the Talmud, and separately at Prague, in 1602, by his son); "Menoaḥ ha-Lebabot," commentary to Baḥya ben Joseph's "Al-Hidayah ila Fara'iḍ al-Ḳulub" (Lublin, 1596; frequently reprinted); "Manoaḥ Maẓa Ḥen," on the title-page of which the emperor Rudolph and King Matthias are mentioned. Manoah must have composed a number of other works, for his son, who preserved those already noted, speaks of his intention to publish "all" his father's works on the Talmud, the Cabala, and astronomy.

MANRESA: Town in Spain, in the province of Barcelona. In the twelfth century it is said to have contained 500 Jewish families, most of which lived in a narrow lane named "Grau dels Jueus," near the town hall; their cemetery, still called "Fossana dels Jueus," was outside the city. In the thirteenth and fourteenth centuries the Jews there were engaged in manufacturing, in trading (including that in slaves), in money-lending (at the rate of 20 per cent, the usual interest at that time), and in the cultivation of their vineyards and estates. The hostility of the Christians toward the Jews which prevailed throughout Catalonia was manifested in Manresa also. In 1325 the Christian inhabitants of the town endeavored to prevent the Jews from baking their Passover bread, so that the latter were obliged to appeal to the king for protection. The Jews in Manresa did not escape the general persecution of 1391, and many of them professed to accept Christianity. After 1414 comparatively few Jews remained in the town, and in 1492 they sold their property for whatever they could get for it and left the country. At the beginning of the fifteenth century Manresa had 30,000 inhabitants; three centuries later it contained barely one-fifth of that number. Several members of the Zabarra (Sabara) family lived in Manresa. The town is not mentioned in the "Shebeṭ Yehudah."

MANSION HOUSE AND GUILDHALL MEETINGS: Meetings held at the summons of the lord mayor of London by citizens of the English metropolis to protest against the persecution of the Jews. The first of these was held on July 3, 1840, to protest against the blood accusation brought against the Jews of Damascus. A demand for this meeting was made by 210 important residents of the city. Speeches were delivered by Daniel O'Connell, Alderman Thompson, Dr. Bowring, and others, expressing their disbelief in the accusation and demanding the release of the accused. The resolutions of the meeting were sent by the lord mayor to the chief ambassadors of foreign powers residing in England, and an especially favorable reply was received from the Emperor of Russia. Over forty years later meetings were convened by the lord mayor of London to protest against the persecutions of the Jews in Russia. Attention had been called to these by articles in the London "Times" of Jan. 9 and 11, 1882, written by Joseph Jacobs, and a requisition was made for a Mansion House Meeting in consequence. The requisition was signed by thirty-eight persons, including the Archbishop of Canterbury, Cardinal Manning, Charles Darwin, John Tyndall, and eighteen members of Parliament. This meeting was followed by numerous others throughout the United Kingdom, including one at the University of Oxford.

The requisition for the Guildhall Meeting of Dec. 10, 1890, was signed by eighty-three persons, again headed by the Archbishop of Canterbury and Cardinal Manning, and including nineteen peers, twenty-seven members of Parliament, and the foremost representatives of nearly every learned profession. The following resolution, proposed by the Duke of Westminster and seconded by the Bishop of Ripon, was adopted: "That in the opinion of this meeting the renewed sufferings of the Jews in Russia from the operation of severe and exceptional edicts and disabilities are deeply to be deplored, and that in this last decade of the nineteenth century religious liberty is a principle which should be recognized by every Christian community as among the natural human rights." In the name of the citizens of London a memorandum was addressed to the czar to this effect, praying that the Jews of Russia should be granted political and social equality with the rest of his subjects. The czar refusing officially to receive the communication, it was returned through the foreign office.

As a consequence of the first of the two last-mentioned meetings, a Mansion House Fund was raised of £108,000 and was administered by a **Mansion House Committee**; this later took over the £100,000 collected after the Guildhall Meeting, when it became known henceforth as the **Russo-Jewish Committee.** In the early stages of its work the Mansion House Committee supervised the transportation of large numbers of Russo-Jewish refugees from Brody to America, having a branch committee at Liverpool presided over by B. L. Benas. The chairman of both committees was Sir Julian Goldsmith, and the honorary secretary was N. S. Joseph. The committee took part also in all the conferences held to consider the position of the Russian Jews and helped to found agricultural colonies at Moosomin, Canada; Painted Woods, N. Dak.; Vineland, N. J.; and elsewhere. None of these colonies, however, had a very long life. The Russo-Jewish Committee, besides assisting the Jewish Board of Guardians by arranging for the immigration, repatriation, and settlement of refugees, founded also in London a Location and Information Bureau as a labor registry, and evening classes in English for the refugees, so as to enable them to earn their living outside the congested districts.

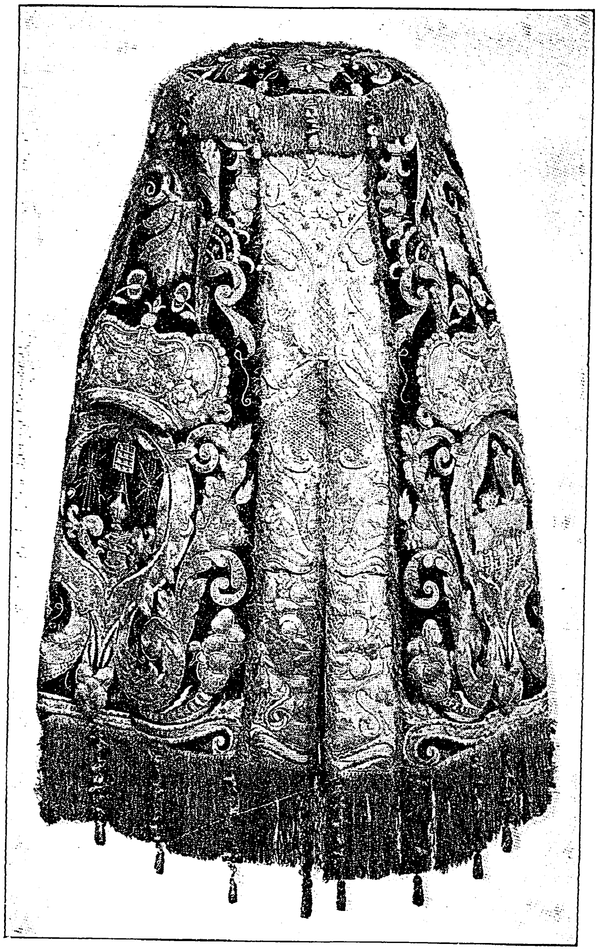
MANTINO, JACOB BEN SAMUEL: Italian physician; died at Damascus in 1549. His parents —and perhaps Mantino himself—were natives of Tortosa, Spain, which place they left at the time of the banishment of the Jews from Spain (1492). Mantino studied medicine and philosophy at the universities of Padua and Bologna. Having graduated, he established himself at the latter place, and devoted his hours of leisure to the translation of scientific works from Hebrew into Latin. By these translations he soon acquired a high reputation, and he was befriended by the highest dignitaries of the court of Pope Clement VII.

The war of 1527 compelled Mantino to leave the Pontifical States. He settled at Verona, where the new bishop, Giberti, protected him. In 1528, when Giberti left Verona for Rome, Mantino decided to settle at Venice, where the Council of Ten exempted him from wearing the Jews' hat. This privilege was granted him, at first for a term of several months, upon the recommendation of the French and English ambassadors, the papal legate, and other dignitaries whom he numbered among his patients. At the expiration of the prescribed term Mantino found an influential protector in another of his patients, Théodore Trivulce, marshal of France and governor of Genoa; the latter, urging his own services to the Venetian Republic, insisted that the council should make the exemption perpetual.

The efforts of the English king Henry VIII. to get rid of his wife Catherine on the pretext that their marriage was contrary to the Biblical law, and that the dispensation obtained from Pope Julius II. was invalid, involved Mantino in difficulties. Henry sent Richard Croke to Italy in order to obtain opinions favorable to his case, and the latter addressed himself to Jewish as well as to Christian scholars. Pope Clement VII., in his turn, consulted Mantino, who decided against Henry. This decision created for Mantino many enemies in Venice, where Croke had won a favorable opinion from the famous physician and scholar Elijah Menahem Ḥalfon, among others. Meanwhile the Messianic dreamer Solomon Molko, whom Mantino had energetically opposed while he was in Venice, went to Rome, followed by Mantino. Having many friends and protectors at the court of Clement VII., Mantino soon acquired great influence in Rome, which he employed in crushing Molko. Mantino attained the zenith of his influence at the accession to the papal throne of Paul III. (1534), who appointed him his physician. This high position did not prevent Mantino from concerning himself with the affairs of the Jewish community of Rome, in whose records he appears as a member of the rabbinate, with the title "gaon." In 1544, for some unknown reason, Mantino returned to Venice, where again he was exempted from wearing the Jews' hat. Five years later he accompanied, as physician, the Venetian ambassador to Damascus, where he died soon after his arrival.



Mantle of the Law, Velvet, Seventeenth Century.

(In the Victoria and Albert Museum, London.)

Mantino translated the following commentaries of Averroes: "Paraphrasis Averrois de Partibus et Generatione Animalium," with the commentary of Levi ben Gershon (dedicated to Pope Leo X.; Rome, 1521); commentary (the compendium) on Aristotle's "Metaphysics"; the "middle commentaries" on Aristotle's "Isagoge"—books i.-iv. of "Topics" and "Poetics" (Venice, 1550); commentary on Plato's "Republic" (dedicated to Pope Paul III.); proem to the large commentary on Aristotle's "Physics"; the large commentary on the third book of Aristotle on the soul; proem to book xii. of Aristotle's "Metaphysics"; the "middle commentary" on Aristotle's "Physics." He translated also Averroes' medical work "Colliget" ("Kullayot"), the first book of Avicenna's "Canon," and Maimonides' "Shemonah Peraḳim."

MANTLE OF THE LAW (מפה): The cover of the scroll of the Pentateuch. The Hebrew name "mappah" is derived from the Greek μάππα. Originally, a wrapping of fine silk was spread along the full length of the parchment, to protect the writing from dust and injury when the scroll was rolled up. The mantle is mentioned in Soferim iii. 16. "A scroll that has no mantle shall be turned face down, so as not to expose the writing" (Yer. Meg. i. 9). The custom of completely covering the writing with silk, when the mantle is not in use, is still practised by the Sephardim in the Orient. The color chosen is usually green. Probably, in earlier times the less expensive method was adopted of using a narrow strip of silk to cover the writing at the opening of the scroll, which would account for the word μάππα = "kerchief" or "napkin." Another kind of covering was called "miṭpaḥat," and was used to wrap the scroll after it had been rolled up. It appears from the Mishnah that all books or scrolls were provided with coverings (Kelim xxiv. 14). When Levi b. Samuel and Huna b. Ḥiyya were preparing coverings for the books of R. Judah, they thought the scroll of Esther did not require a miṭpaḥat, for which opinion they were rebuked by R. Judah (Sanh. 100a). In the Orient, mantles are often not used, carved wooden boxes being substituted for them.

The "mantle of the Law," as it is popularly called, is made in the form of a bag, to fit the scroll after it is rolled up. It is open at the bottom and closed at the top except for two openings to allow the scroll-handles ("'eẓ ḥayyim") to pass through. The mantle is made of expensive material, which must not have been used for any other purpose. Old, worn-out mantles should not be thrown away, but should be stored in the genizah or sewed into a shroud for a corpse to be buried in (Shulḥan 'Aruk, Oraḥ Ḥayyim, 154, 4). Between the sectional readings of the Pentateuch at the synagogue the scroll is closed and covered with the mantle. On special occasions, when two scrolls are read from, the one first used must be rolled up and covered before the mantle is removed from the second scroll (*ib.* 147). The mantle of the Law is usually decorated or embroidered with the Crown of the Law, the Lion of Judah, and with tassels and ornaments. The mantle is often made and presented to the synagogue by women, and sometimes bears the name of the donor or donors.

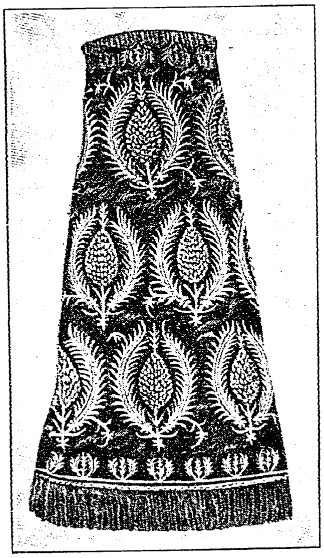
MANTUA: Fortified Italian city, on the Mincio; capital of the duchy of Mantua. It has a population of 29,160, including 1,100 Jews (1901). In 1858 it had 2,523 Jews—the greatest number in its history. The first mention of Jews in Mantua dates from the twelfth century, when Abraham ibn Ezra finished (1145) there his grammatical work "Ẓaḥot." Apparently he was in that city again in 1153. There are no further references to Jews in connection with Mantua until they are mentioned in the new statutes of the city at the end of the fourteenth century, when a large number seem to have lived there. In 1459 a special tax of 2,000 ducats was imposed on the community, though by vigorous protest they succeeded in having it reduced to 600 ducats. The importance of the community about that time is evident from the fact that two famous rabbis, Joseph Colon and Judah da Napoli (Messer Leon), officiated in Mantua, although, on account of their inability to agree, both were expelled from the city in 1475. In the following year, with the consent of the pope, the Jews were permitted to lend money at interest, and eight years later Bernardino da Feltre founded a "monte di pietà" there, the granting of its charter being one of the first acts of the government of the new prince, Francesco Gonzaga (1466–1519), who was generally ill-disposed toward the Jews. In 1485 he ordered all of them, with their wives, to attend Bernardino's anti-Jewish sermons. In 1496, when the preachers again demanded that restrictions be placed on courtezans and Jews, the wife of the prince, during his absence, ordered the wearing of the Jewish badge.

Under the Gonzagas.

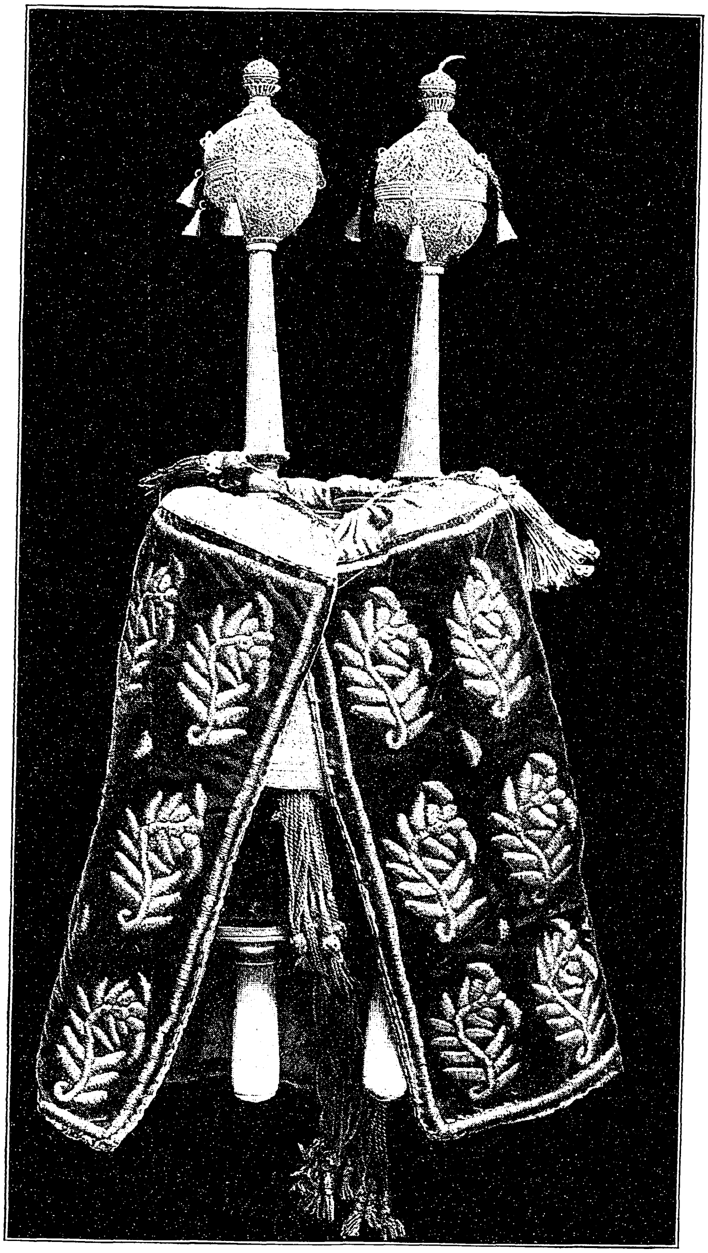
From this time the treatment of the Jews varied, and intermittently they were favored by the princes. Although Frederick Gonzaga, the first Duke of Mantua, had a Jewish physician, Abraham Portaleone, he forbade the Jews to keep Christian servants, an exception being made in regard to necessary services performed on the Sabbath. In 1531 the Marano Solomon Molko was burned publicly at the stake during the visit of Emperor Charles V. Although the congregation had received permission from Pope Clement VII. in 1530 to build an Ashkenazic synagogue, the duke did not confirm it until 1540, at the earnest solicitation of Isaac Porto; the last-named was called to the rabbinate of Mantua in 1550, as the first of an uninterrupted succession of rabbis whose names are preserved in the communal archives.

The condition of the Jews improved under Duke Frederick's successors. A decree of 1545 says: "We desire that the Jews shall be as free and secure in pursuing their business and professions in our city and in our duchy as the Christians." These were the best days of the community, the numbers of which probably were augmented by Portuguese immigrants. The Jewish merchants of Mantua carried on extensive business with foreign countries. Jews were often welcomed at court, and after 1542 the duke had Jewish musicians and Jewish actors. Nevertheless, oppressive measures were enacted against them; their cemetery was taken from them in



Mantle of the Law, Padua, Eighteenth Century.
(From Frauberger.)

1549 that an extension to a monastery might be built in its place. Guglielmo Gonzaga, who was also the first Duke of Monferrato, confirmed their old privileges and suppressed a riot which threatened them in 1562. The security which the community enjoyed enabled it to interest itself in Jewish affairs at large, and it was instrumental in securing the reception of a delegation from the Jewish communities, in 1563, by the Council of Trent, which delegation obtained permission to print Hebrew books.



Mantle of the Law, Oriental.
(In the United States National Museum, Washington, D. C.).

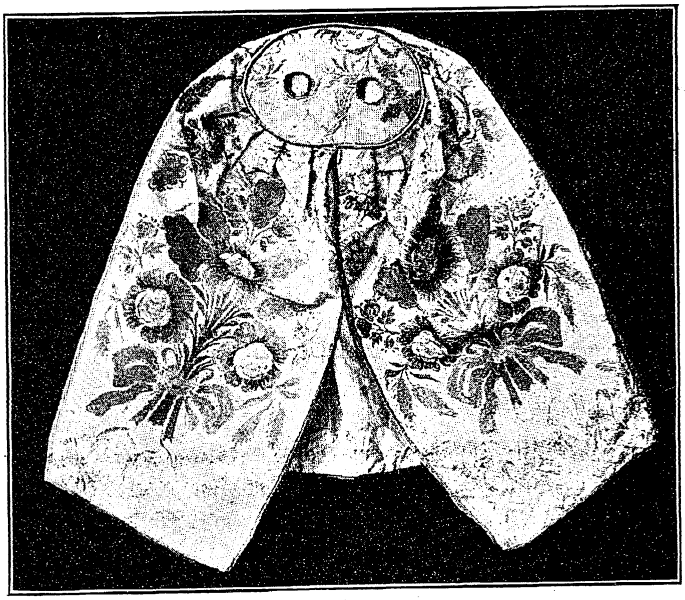
In 1577 new edicts were issued regarding the wearing of the badge. Evil times came with Vincenzo Gonzaga (1587-1612), who, in 1590, expelled all foreign Jews from the city to prevent the increase of the Jewish population. In the following year this decree was reinforced by menaces against the entire community. On April 22, 1600, Giuditta Franchetti, eighty years of age, was publicly burned on a charge of witchcraft, and other members of the community were sentenced to heavy punishments. In 1602, however, in spite of these rigorous proceedings, the Franciscan monk Bartolomeo da Salutivo publicly accused the prince of leniency toward the Jews. As the populace was threatening them, Vincenzo was obliged to interfere sternly in their behalf (Aug. 14), although at the beginning of the year he had issued orders for the complete separation of Jews and Christians. He next forbade Jewish physicians to treat Christians without special permission, and, at the instance of Pope Clement VIII., decreed (Nov. 7) that the Jews should sell all their real estate within a year; he placed all their civic and commercial affairs under the jurisdiction of a special official termed "commissario degli Ebrei," and in certain other relations they were subjected to ecclesiastical control. This office of Jewish commissioner existed until 1765. In 1610 the establishment of a ghetto was decreed, and in Feb., 1612, the Jews were compelled to move into it. The new edict called the "Tolleranza Generale" subjected them to still more rigorous treatment; it was renewed every eight years, on payment of a large sum, and remained in force until 1791.

Charles of Rethel, who succeeded to the dukedom on the extinction of the house of Gonzaga in 1628, assured the Jews of his favor. During the siege of Mantua by Emperor Ferdinand II., in the same year, they helped to fortify and defend the city, even breaking the Sabbath; and when the city was betrayed (1630) to the enemy 1,800 Jews were expelled and their property confiscated; nor could they return until after many bitter experiences, as Abraham Masserani has recounted in his "Ha-Galut weha-Pedut" (Venice, 1634). In 1699 the community was released from the obligation of attending

Christian sermons, and about 1700 various Jews received extensive industrial privileges, and were even entrusted with the management of state domains.

Under the Hapsburgs.

When Mantua came into the possession of the Hapsburgs, after the war of the Spanish succession, the Austrian governors tried to protect the Jews from the many petty annoyances which the latter had to suffer through clerical intrigues; for the decree issued in 1740 by the grand inquisitor of the Roman Curia marked the culmination of the persecution and humiliation of the Jews by Rome. In Mantua they were permitted to institute a suit for compensation for annoyance on the street on the testimony of a single witness. To avoid being insulted by the students of the gymnasium—it had become customary for the students to insult Jews whenever they met them—the Jews made a yearly payment in kind to the principal. On special occasions, as during sieges, large assessments were levied upon the community, which was especially taxed during the reign of Maria Theresa, though under her the civic status of the Jews began to improve. In 1752 the sanitary laws were declared to be equally binding upon Jews and Christians, and the restriction regarding Jewish physicians was abrogated.



Mantle of the Law.
(In the British Museum.)

The condition of the Jews improved still further when Joseph II. was made coregent. In 1772 they were allowed to loan money at the "monte-di-pietà," while in 1779 many of the ancient restrictions were repealed, the badge was abolished, Jews were admitted to the public schools and were allowed to acquire real estate, and the tribunal of the Inquisition was suppressed. Under Leopold II. (1790–92) a deputation sent to Vienna succeeded in having the "Tolleranza Generale" made permanent and in securing the repeal of all special taxes on the community, while the emperor declared that he would put the Jews on an equality with all other citizens in all points compatible with the general welfare. But under Francis I. (1792–1835) the Jews had more troubled times and were again heavily taxed.

The community of Mantua, like all other Italian communities, had a period of freedom in 1797, during the French invasion of Italy. Two Jews, David Pavia and Felice Coen, were made members of the municipal council, and the latter became also a member of the central administration of the district of the Mincio, while Rabbi Abraham de Cologna was a member of the cabinet of the Cisalpine Republic. The gates of the ghetto were torn down by the people in 1798, but in the following year the city was retaken by the Austrians, and the political suspects, including some Jews, were imprisoned. Zechariah Carpi has given an account of his sufferings in his "Toledot Yiẓḥaḳ" (Cracow, 1892). The French, however, soon retook the city, and Napoleon's pro-Jewish legislation went into force. Abraham de Cologna represented Mantua at the Congress of Lyons in 1801, and he took part also in the Convention of Notables at Paris, being made vice-president of the Sanhedrin (1806–7) and subsequently president of the consistory.

In 1814 Mantua again came under Austrian rule. The Jews retained their rights, but were not permitted to hold public offices, with the exception of those connected with the possession of real estate, and even this exception was declared to be revocable. The number of Jewish families was to be limited, special permission being necessary for immigration and for marriage. Francis I., however, declared that he would endeavor to place the Jews upon an equality with the other citizens, his desire being to see that all shared alike in the welfare of the state. He ordered that the rabbis of the community should give proof of sufficient secular and religious education. In 1821 Mantua proposed to the communities of Lombardy and Venice that a rabbinical seminary should be founded, and as a result the institute at Padua was opened in 1829. The community continued to suffer from its insecure legal status and from the enmity of the populace, and was imperiled by the riots of 1824 and 1842. The Jews did not obtain full civic liberty until Mantua was incorporated in the kingdom of Italy by the peace of 1866. One of the heroes of the Italian struggle for unity, Giuseppe Finzi, was a Mantuan Jew.

The community of Mantua repeatedly held an important position in Judaism. At the time of the Renaissance it was distinguished for the number of its scholars and liberal thinkers; it was the birthplace of Azariah dei Rossi. For a long time the com-

Scholars and Rabbis.

munity was obliged to furnish to the dukes of Gonzaga a company of actors who from 1525 to 1597 gave dramatic representations, which form an important chapter in the early history of the Italian stage. The dramaturge of the company, Leone Sommo, produced in his "Dialoghi sull' Arte Rappresentativa" the first work of its kind; in recognition of his merits as a poet he was made a knight, and a member of the Academy of Padua. Among the Jewish musicians at the court of Mantua were the harpists Abraham dell' Aspra and his grandson; Isacchino Massarano was distinguished as a lutist, a singer, and a dancing-master; Solomon Rossi was known as a composer of religious and secular songs, while his sister Europa was a singer, and her son Anselmo and Davide Cività were esteemed as composers. Mordecai Finzi was a mathematician and Abraham Colorni an engineer. Mantua was foremost, also, in the sixteenth century in the field of Jewish science. As a century previously Joseph Colon had taught there, so now the brothers Moses and David Provençal were famous as Talmudists, founding the rabbinical academy which flourished down to modern times; while a third brother, Judah Moscato, was famous as a preacher and philosopher. The brothers Provençal were so enthusiastic in the cause of science that David and his son Abraham determined to establish a university in their house (1564), and issued a detailed prospectus inviting students ("Ha-Lebanon," v. 418 *et seq.*; "Berliner Festschrift," pp. 164 *et seq.*). Subsequently Mantua became the chief seat of the cabalists.

The community of Mantua has had many famous rabbis, and a number of rabbinical families whose members succeeded one another in office. The most noteworthy names are: Basilea, Brieli, Cases, Cologna, Fano, Jarè, Modena, Mortara, Moscato, Portaleone, Provençal, Dei Rossi, Romanelli, Saraval, Viterbi, and Zacuto. Marco Mortara officiated from 1842 until 1894, and was succeeded by Isaiah Levi.

Synagogues.

Since the sixteenth century the community has had six places of worship: Scuola Grande (built 1537), transferred a century later to its present site); Scuola Norsa Torazzo (founded 1513); Scuola Cases (founded 1590); Scuola Beccaria (founded in 1595 over a slaughter-house and named after it); Scuola Porto (founded 1540); and Scuola Ostiglia (founded 1558). In the first three the Italian ritual is followed, in the last three the German. Their foundations have recently been in part united. The community owns a large library containing numerous manuscripts and important archives, from which Stern has published a number of documents. Among Mantua's philanthropic institutions is the Casa di Ricovero, an asylum for the aged founded in 1825 and connected with a foundation for the promotion of trade and industry among the Jews and a home for apprentices. In 1834 Samuele Trabotti devoted his entire fortune to a fund for dowering Jewish brides, educating Jewish youths in the arts and sciences, establishing prizes for artisans, and relieving the sick and the poor. This richly endowed foundation absorbed the existing institutions of similar character.

D. I. E.

——**Typography**: Mantua was among the earliest places at which Hebrew works were printed. The physician Abraham Conat started printing there as early as 1476, when he produced the Ṭur Oraḥ Ḥayyim; some of his productions may have been begun even in the preceding year. He had the merit of producing the only Hebrew incunabulum published during its author's lifetime—"Nofet Ẓufim." His wife, Estellina Conat, made herself responsible for the "Beḥinat 'Olam," issued from his press after his death. In the printing of Levi ben Gershon's Pentateuch, Conat was associated with Abraham of Cologne, possibly identical with the Abraham de Tintori who afterward emigrated to Bologna. Hebrew printing was resumed at Mantua in 1513 by Samuel Laṭif, who appears to have been forced from business a year later by the competition of the Soncinos. The next printers of Hebrew books were Christians—the Rufinellis and Philipponis (1561–97); their printer's sign was a peacock. A large number of Jewish workmen, including Meïr Sofer, his son, and his son-in-law, were employed by them. In the seventeenth century Eliezer de Italia started a Hebrew printing-press (1612), being followed by Judah di Perugia in 1622. In the eighteenth century Isaac Jarè and Raphael Ḥayyim di Italia printed at Mantua. For reproductions from books printed at Mantua see Jewish Encyclopedia, iv. 172, 173, 205; vii. 261.

J.

MANUEL, EUGÈNE: French educator and poet; born at Paris July 13, 1823; died there June 1, 1901. A grandson on his mother's side of the famous Paris ḥazzan Lovy, he remained throughout his brilliant career intimately attached to the faith of his ancestors. After having finished his studies at the Collège Charlemagne he entered the Ecole Normale (1843–46), where he had as comrades Emile Burnouf, Paul Janet, Gaston Boissier, Caro, Alfred Mézières, and Pasteur, all of whom have become renowned in the world of letters and science. Manuel became professor of rhetoric successively at the colleges of Dijon, Grenoble, Tours, and in the lyceums Charlemagne (1849) and Saint-Louis and the Collège Rollin in Paris. After the Franco-Prussian war Jules Simon, having become minister of public instruction, appointed Manuel his "chef du cabinet" and in 1872 "directeur du secrétariat."

Soon after, Manuel became inspector-general of secondary public instruction (1876). He now began to devote much of his energy and time to literature. In 1852 he had already published an edition of the "Morceaux Choisis des . . . Œuvres Lyriques" of Rousseau. His second work, written in collaboration with his brother-in-law Lévi-Alvarès (1854-58), was in four volumes, and was entitled "La France sous l'Aspect Géographique, Historique et Administratif." His earliest poems, "Pages Intimes," date from the year 1866, and it was they which laid the foundation for his literary fame. The ring of patriotism in his "Poèmes Populaires," which appeared in 1871, rendered them very popular. "Henri Regnault," "Les Pigeons de la République," "En Voyage," and "Pendant la Guerre" have placed Manuel in the rank of the foremost poets of his time. This last dramatic poem and "Les Ouvriers" were played at the Théâtre Français with Coquelin and Sarah Bernhardt in the leading rôles (Jan. 17, 1870). About this time "L'Absent" and "Pour les Blessés" were represented at the Théâtre Français. Manuel made several unsuccessful attempts to gain admission to the Académie Française.

Those of Manuel's poems which bear a special relation to Judaism are: "La Place du Pauvre," dedicated to his friend Isidore Cahen, the director of the "Archives Israélites"; "Le Verset"; "La Prière"; "Caïn et Abel"; and "Les Trois Peuples" (Jerusalem, Athens, Rome). His biography of his grandfather Israel Lovy, in the "Archives Israélites" (1850), deserves special mention. For twenty years Manuel was professor of Greek and Latin literature at the Jewish Theological Seminary at Paris, and he was one of the six founders of the Alliance Israélite Universelle, remaining a member of that institution until his death. After the death of Michel Alcan, Manuel was elected to represent the Jews of Lyons in the Central Consistory of the Jews of France (1877). He was a commander of the Legion of Honor. On Oct. 27, 1901, the Société Historique d'Auteuil et de Passy, of which he was one of the founders, placed a memorial tablet on the house in which the poet died.

S.

MANUSCRIPTS: The first materials used for writing were such substances as stone, wood, and metal, upon which the characters were engraved with a stylus. At a very early time, however, animal substances were employed, and letters were written upon them with various liquid preparations. The usual word for a written document, "sefer," which occurs 182 times in different forms in the Bible, and is to be supplied in many places, as, for instance, with "Torah," designates the skin of an animal, the writing material anciently employed by the Orientals, and not papyrus. The usual word for writing, "katab," the fundamental meaning of which is "to place signs in succession," is found in the Bible 220 times (Blau, "Studien zum Althebräischen Buchwesen," pp. 9 *et seq.*). For private writing in the first centuries of the common era various materials were used, including clay tablets for bills. Books might be written only on skins of animals, of which three kinds were prepared —"gewil," "ḳelaf," and "doksosṭos." Gewil is the plain hide with the hair scraped off (*i.e.*, leather); ḳelaf is parchment, made by paring away the skin, and which received the writing upon the flesh side (*i.e.*, a membrane); doksosṭos is another form of parchment (*ib.* pp. 22 *et seq.*).

Writing Material.

Parchment.

Copies of the Bible were, as a rule, made from whole skins, as at the present day, which were prepared from clean animals. To this the copyist ("sofer") himself generally attended. A gaon says, "We have never seen a Torah scroll which was written on parchment." There is a possibility, however, that in ancient times there were Biblical books written on papyrus; in regard to non-Biblical writings this supposition is even probable. The skin used for writing was ruled, and there were special regulations for margins and for the number of lines. Only black, effaceable ink, which was renewed when necessary, might be used for Biblical works. Metallic ink was known, but was forbidden. The Letter of Aristeas (§§ 176-179), however, relates that the copy of the Bible sent by the high priest to the Egyptian king Ptolemy was written in gold, and the Talmud also speaks of gold-writing, which may have been a Jewish invention (Blau, *l.c.* pp. 13, 150 *et seq.*; see Index).

Scroll and Codex.

Both the Jewish and the non-Jewish world in antiquity had books in the form of scrolls (Isa. xxxiv. 4; Job xxxi. 35-36; Jer. xxxvi.; Ezek. ii. 8-9; Ps. xl. 8; Zech. v. 1). In post-Biblical times the employment of such scrolls may be traced for a thousand years, and in copies of the Pentateuch for the synagogue this usage has survived until the present time. Both the Letter of Aristeas (*l.c.*) and I Macc. iii. 48 speak of scrolls. On the arch of Titus a man is depicted carrying on his back a long roll, undoubtedly a representation of the Torah scroll of the Temple of Jerusalem, which was taken to Rome (see Josephus, "B. J." vii. 5, § 5). The Talmud and Midrash know books only in this form (Blau, *l.c.* pp. 40-43), and the Christian documents of the first three centuries testify also to the use of rolls (Schulze, in "Greifswalder Studien Hermann Cremer Dargebracht," pp. 148-158). When and where the codex form first appeared among the Jews is as yet unknown. It is not impossible that the word "diftera," in Soferim iii. 6, designates a codex. The oldest complete and dated manuscript of the Bible, the codex of the Prophets at St. Petersburg, was written in 916. In ancient times school children had tablets for their first lessons in reading and writing, while wax tablets (πίναξ) were in general use among citizens, so that the prototype of the book was familiar from a very early period. There is, therefore, no need to assume foreign influence, whether Greco-Roman or Oriental and Christian, to explain the development of the scroll into the codex. The transition probably began in the seventh century and proceeded gradually, since no distinct mention of a codex has yet been discovered in the Talmud and Midrash.

The books of antiquity were always of small size (II Kings xxii. 8-10; II Chron. xxxiv. 15 *et seq.*; Neh. viii. 1 *et seq.*; see references from the Talmud, Midrash, and classic literature in Blau, *l.c.* pp. 72 *et seq.*), and people sat cross-legged when reading them.

Size, Compass, and Distribution.

The largest scroll, the official copy of the Torah, which was used in the Second Temple had at most a height of six and a diameter of two handbreadths (*ib.* pp. 76 *et seq.*). The smallness of the books was compensated by the minuteness of the characters (*ib.* p. 79 *et seq.*). The contents of a manuscript might be very small, as, for example, one of the Book of Obadiah, or the original roll of fasts (*c.* 100 C.E.), while the normal size probably never exceeded that of the collection of the Twelve Prophets. At the time of the first selection of the canon (*c.* 4th cent. B.C.) large scrolls could not have been popular, as is shown by the division of the Torah into five parts, by the division of the Book of the History of the Kings into the books of Samuel and Kings, by the separation of the books of Ezra and Nehemiah from the Chronicles, and by other instances. About the year 100 C.E., however, there were certainly collective scrolls which contained the three sections of the Bible in one roll each, while there were even some which included all the books of the Scriptures in one large roll. Such a one, probably, was the Hexapla of Origen. There was, moreover, no lack of copies of single portions, which contained a section of a book, such as the Roll of Jealousy (= Num. v. 11-23, etc.; Blau, *l.c.* pp. 46-70).

Book-Trade.

The preparation of books has had an eventful history. At the time of the chroniclers (*c.* 3d cent. B.C.) Bible copies were rare; they had been almost entirely destroyed by the Syrians before the Maccabean revolt. Afterward, however, their number increased steadily, since it was made incumbent on every one to write a copy of the Torah for himself, and each congregation owned at least one. In the Talmudic period there was an enormous number of copies, especially as it was customary to wear portions of the Bible (chiefly Torah rolls) around the arm as amulets. Manuscripts of the Bible were found also in heathen families, and pagans even liked to trade in these books, which they were able to write themselves. Christians converted from Judaism or paganism owned many Hebrew writings (*ib.* pp. 84-97). In consequence of the ever-increasing demand a kind of book-trade developed as early as the first century. In general, however, people ordered their manuscripts direct from the copyist, according to ancient custom. The Apocrypha, the original of which has been lost, and other non-Biblical Hebrew books, were not in special demand and did not circulate in large numbers.

Oldest Codices.

The high value placed upon the Scriptures is evidenced by the great care taken for their preservation. The scrolls were wound on a stick, the Torah on two sticks. Coverings of various kinds served to protect them, and cases of various forms were used for keeping them. The rolls were firmly tied with a cord, and sometimes they were sealed to prevent any one from reading them without permission (*ib.* pp. 173-188 *et seq.*). When worn out the manuscripts of the Bible were protected against profanation by being placed in the coffins of dead scribes. In consequence of this custom not a single Biblical manuscript has been preserved from ancient times, nor is there any hope that one will ever come to light. Nevertheless, a few archetypes which existed in antiquity are mentioned. In the first rank among these stands the copy of the Torah of the Second Temple, already noted (I Macc., Introduction; II Macc. ii. 14; Josephus, "Ant." v. 1, § 17; Blau, *l.c.* pp. 99 *et seq.*). "The Book of the Court" (M. Ḳ. iii. 4a *et al.*) was the copy from which the high priest read on the Day of Atonement and which served as a model (Blau, *l.c.* p. 107).

Three other codices from the Temple court are mentioned: "Sefer Me‘on," "Sefer Za‘aṭuṭe," and "Sefer Hi," and they still served as models at the beginning of the fourth century (*ib.* p. 104). After the destruction of the Temple the Torah of the celebrated copyist R. Meïr, the codex of Emperor Severus, and others (*ib.* p. 111) are mentioned, while from post-Talmudic times date the codices of Hillel, Sanbuki, and others. The most celebrated was the codex of Ben Asher, used by Maimonides (H. L. Strack, "Prolegomena Critica in Vetus Testamentum Hebraicum"). See BIBLE MANUSCRIPTS.

J. L. B.

It is now necessary to inquire how the Hebrew manuscripts collected in various public and private libraries were written, and in what form the material of which they consist was presented. The time over which the inquiry extends ranges, roughly speaking, from about the year 900 of the common era down to the present day, though in some instances, notably in the case of papyri, an earlier period is referred to. For inscriptions on stone, metal, and other hard substances see PALEOGRAPHY.

Earliest Papyri.

I. Materials Used to Receive Writing.—Papyrus (Greek, πάπυρος, from the ancient Egyptian word "p-apa"; but in Herodotus always βύβλος, no doubt also from an Egyptian term; Hebrew, "neyar," apparently representing the Arabic "naur"): The number of Hebrew papyri hitherto discovered is quite insignificant as compared with the numerous classical papyri recently brought into Europe from Egypt. There is the small number of Egyptian-Aramaic papyri belonging to the late Ptolemaic or early Roman period, of which the British Museum papyrus No. cvi.* is a good representative specimen (see the first specimen of writing on Plate I.; also "Proc. Soc. Bibl. Arch." xxv., parts 4 and 5). Some pieces dating from the sixth to the ninth century have been described by Steinschneider, Chwolson, and others (for references see bibliography below). The Cambridge University Library possesses a mutilated liturgical codex assigned to the ninth century. The papyrus of the Decalogue in the same library, first described by S. A. Cook ("Proc. Soc. Bibl. Arch." xxv., part i.; see JEW. ENCYC. iv. 493, *s.v.* DECALOGUE), may be assigned to the sixth or seventh century (see Pl. III., No. 59). A few Oxford fragments, probably of the sixth century, have been described by A. Cowley in "J. Q. R." Oct., 1903 (see Pl. I., No. 2).

Skins (Hebrew, "'or," known also as "gewil"; Greek, *διφθέρα*, a term which in early times was transferred to papyrus, and was later on applied to vellum also): None of the skin was peeled off, but the hair was carefully rubbed away; for it was the hair side that was used for writing upon. The ancient rule of using only skins for Torah rolls has not, however, been universally followed in the period under consideration. The Yemenite rolls (Pentateuch, Esther, and קצת חנה) are indeed all of red skin; and the Pentateuch rolls written in the eighteenth century for the Jews of K'ai-Fung-Foo, China (*e.g.*, Brit. Mus. MS. Add. 19,250), are of white leather. The oldest Pentateuch roll (14th cent., Spanish origin) in the British Museum is also of leather; but there are many specimens on vellum belonging to the sixteenth century and onward. Of the forty-seven Karaite Pentateuch rolls in the Imperial Library, St. Petersburg, only five are of leather, the remaining forty-two being of vellum. This proportion no doubt represents the greater deviation among the Karaites from the old synagogue rolls. For the Book of Esther vellum appears to have been more largely used than for the Torah. A roll of the Hafṭarot on leather, written in Corfu in 1560, found its way into Europe a few years ago. For manuscripts in book form skins would in early times have been naturally superseded by parchment or vellum as material fitted for receiving writing on both sides.

Parchment and Vellum (Hebrew, "ḳelaf" and "doksosṭos," for the exact meaning of which see above): For practical purposes, that is to say, so far as the manuscripts now under consideration are concerned, it is enough to remark that "ḳelaf," not unlike the term "parchment" in its more restricted sense, signifies the rougher article, while by "doksosṭos," as by the term "vellum," the finer variety is meant. The Jews were no doubt at all times adepts in the art of producing parchment and vellum, as they had so much need of the materials, and as a religious intention during the manufacture was considered important; but their art would naturally be conditioned, to a large extent at any rate, by the degree of perfection attained in it in the countries where they were domiciled. The finest kinds of vellum used for Hebrew manuscripts were of Spanish and Italian origin. As examples of the former may be mentioned Brit. Mus. MS. Or. 5866 (liturgy, middle of 15th cent.: thin vellum, delicately worked, smooth surface), and Brit. Mus. MSS. Or. 2626-2628 (Bible, 1482-1483: stout, crisp, and pretty smooth). A fine specimen of Italian vellum of about the middle of the same century is furnished by Brit. Mus. MSS. Add. 19,444-19,445 (Florentine liturgy: material very carefully prepared and slightly tinted). Rougher sorts of material were to be found by the side of the finer kind in both countries.

Examples of Old Vellum.

Among representative codices of earlier times, the British Museum Pentateuch dating from the ninth century (MS. Or. 4445, apparently of Babylonian origin) consists of strong, crisp, and very smooth vellum. Brit. Mus. MS. Harley 5720 (probably of early part of 12th cent.; also of Eastern origin) is hard and strong, with surface not very smooth. The British Museum copy of the Maḥzor Vitry (MSS. Add. 27,200-27,201: 12th cent.; French origin) is written on a very inferior sort of material. French as well as German vellum employed for Hebrew in the Middle Ages is, in fact, as a rule coarse as compared with the Spanish and Italian kinds; but Brit. Mus. MS. Add. 11,639 (collection of works, 12th cent.), from the south of France, is an example of exceedingly fine, smooth vellum. The vellum used for Hebrew charters in England in the twelfth and thirteenth centuries (note especially the large collection belonging to Westminster Abbey) is fairly good, though fineness of manufacture can not be expected in material used for this particular purpose. Some of the early examples of vellum (11th and 12th cent.) found in the Cairo Genizah are stout and smooth; other specimens are of a rougher manufacture. No example of purple-stained vellum, of which there are fair numbers among Greek and Latin manuscripts, has so far come to light among Hebrew ones. On the comparative use of vellum and paper see below.

Paper (Greek, *πάπυρος*, name taken over from "papyrus"; called also "charta bombycina," "charta Damascena," etc.; Hebrew, ניר, also taken over from the Hebrew name for papyrus): This material was known to the Chinese at a very early period; and the Arabs are said to have first learned its use at Samarcand about the middle of the eighth century (for an account of recent researches on this matter see "J. R. A. S." Oct., 1903, first article, where further references will be found). A Judæo-Persian document lately brought from Khotan, written (in Persian in Hebrew characters) on paper, appears to belong to the eighth century (see "J. R. A. S." Oct., 1903, fifth article). Another extant example of a Judæo-Persian document is dated 1020 ("J. Q. R." 1899, pp. 671 *et seq.*).

Karaite Manuscripts.

The Karaites, standing as they did in very close connection with the Arab world, and being also less tied by this kind of conservatism, appear to have used no other material than paper for their manuscripts in book form. Karaite collections of manuscripts are, therefore, an excellent means of studying the kinds of paper made in Palestine, Egypt, and Turkey during a practically uninterrupted period from the tenth century onward. Thus Brit. Mus. MS. Or. 2540 (Exodus: Hebrew text in Arabic characters; see the first two specimens on Pl. IV., col. 2) belongs to the tenth century. Among the dated Karaite manuscripts are found specimens belonging to 1004, 1024, 1027, 1211, 1331, 1564, 1614, 1700, 1744, and 1869. Like early Oriental paper generally, the older kind of Karaite paper (apparently made for the most part of fine linen rag) is stout, of a yellowish tint, and with a glossy surface. In later times the yellowish tint gradually disappears, the texture becomes rougher, and the surface less smooth. The early specimens of paper used by the Karaites are, moreover, much finer than the Khotan Hebræo-Persian document (probably Chinese paper) already referred to. An early dated example of a Rabbinite manuscript on paper is Brit. Mus. MS. Or. 73 (1192; Rashi's commentary on Baba Meẓi'a, written in the East). A British Museum copy of the "Taḥkemoni" (MS. Add. 27,113; Spanish Oriental writing) is dated 1282. The last-named two manuscripts show the same kind of slight yellowish tint; but the paper of the second is thicker than that of the first. A specimen of Italian paper of 1363–64 is furnished by Cambridge University Library MSS. Dd. 11, 12; and Brit. Mus. MS. Add. 27,293 (also of about the middle of the 14th cent.) is a specimen of fairly early Spanish paper.

The European Jews were slow in allowing paper to displace vellum; for though several paper-factories are known to have existed in the thirteenth and fourteenth centuries (indeed, the earliest known mention of paper made in Europe occurs in the tract of Peter, Abbot of Cluny, 1122–50), there are comparatively few Hebrew paper manuscripts of the fourteenth century. There is a fair number of the following century; and the proportion kept on growing until the use of paper became quite common among the Jews from the seventeenth century onward.

Paper in Egypt.

Egypt as a center of Arab life would naturally abound in paper manuscripts fairly early; and the contents of the Cairo Genizah accordingly include specimens dated 832 (in the possession of E. N. Adler), 977, 1005, etc. (at the British Museum and elsewhere). In Yemen paper was used by the Jews pretty freely side by side with vellum from the fifteenth century and probably earlier. The older specimens of Yemenite paper often show an exaggerated kind of yellow tint. For the rest, the Jews of the different countries would naturally depend on the paper manufactured there; and the information contained, *e.g.*, in Sir E. M. Thompson's "Greek and Latin Palæography," will, therefore, be found to apply to Hebrew manuscripts also in so far as vellum can be shown to have in some degree given place to paper.

II. Writing-Fluids, etc.: The ink (Hebrew, "deyo"; Arabian variety, "ḥibr") used by the Jews during the period here considered would naturally be much the same as that used by their Gentile neighbors in different countries. On the manufacture of ink generally see Thompson, *l.c.* pp. 50, 51. The ink sanctioned by Maimonides, and no doubt used by him for writing his own scroll of the Law, was, according to a responsum discovered a few years ago, made of oil, pitch, resin, gum arabic, etc. By burning these substances a soot was formed which was mixed with gum and honey, and the thin slices formed of it were finally dissolved in an infusion of galls (see "J. Q. R." July and Oct., 1899). Vitriol (קלקנתום; *χάλκανθος*) is expressly excluded by Maimonides, though he does not absolutely forbid it. His point is that the ink should cleave firmly to the vellum, but that, at the same time, one should be able to erase it (on this point, as on the preparation of ink generally, see Löw, "Graphische Requisiten und Erzeugnisse bei den Juden," p. 145; and Ink).

Kinds of Ink.

With regard to the appearance of the ink actually used in the manuscripts now under observation, it should be noted that Torah rolls are all written with black ink (though early Samaritan scrolls are written with ink of a reddish hue). Brit. Mus. MS. Or. 4445 (9th cent.) and in fact many of the early manuscripts written in the East are in black or bluish black. Several of the finest Spanish codices show a yellow tint, while the finer sort of Italian manuscripts present a more or less violet one. German ink is generally black, though not very pronouncedly so. Early Cairo Genizah fragments often show a yellow tint; but Yemenite ink is usually black.

Red ink is sometimes, though but rarely, used alternately with the usual writing-fluid. Pigments of different kinds, though generally red, are sometimes used for initial words, etc. On the use of gold as a writing-fluid see p. 313 under "Illuminations."

Kinds of Pens.

With regard to writing-instruments, only the reed ("ḳulmos"; *κάλαμος*) and the quill pen need be considered here. It is difficult to say when the quill came into use, and for how long the reed was used alongside of it. Syrian scribes are known to have used the quill as far back as 509 (Wright, "Cat. Syriac MSS. in Brit. Mus." p. xxvii.); and the Ostrogoth Theodoric (*c.* 454–526) is reported to have used a quill for writing his name. The reed, on the other hand, continued in use to some extent through the Middle Ages, and appears to have survived in Italy into the fifteenth century (Thompson, *l.c.* p. 49). Several early Hebrew codices of Eastern origin appear to have been written with a reed; but the greater suitability of the more flexible quill pen could not have been overlooked by Jewish scribes even in comparatively early times.

III. Forms of Books: Apart from contracts of small size ("get," "sheṭar ḥaliẓah," etc.), which would naturally be preserved flat, there call for consideration (1) the roll and (2) manuscripts in book form.

Size of Rolls.

The Roll (Hebrew, "megillah"; Latin, "volumen"; used only for the five scrolls, the Torah roll itself being always called "Sefer Torah"): This consists of a number of strips of leather or vellum sewed together to form a continuous whole. It is, at one end, fixed to a stick round which it is rolled; and it is usually provided with a flat, round border-piece at top and bottom to keep the roll even. The number of columns to a strip varies considerably; and there is also great diversity in the height of rolls. Brit. Mus. MS. Harley 7619, which is about 26¾ ins. high, is probably one of the largest extant. Esther rolls are sometimes of very diminutive dimensions. A very remarkable and perhaps unique specimen of a roll is Brit. Mus. MS. Add. 26,883 (containing cabalistic prayers written in Italy in the 15th cent.), which, though measuring about 125 ins. from end to end (the height being about 4½ ins.), is all of one piece instead of consisting of strips sewed together. The vellum of this roll is very fine; and the workmanship in straightening out so long a piece must have been exceedingly elaborate. Rolls of Ruth, Lamentations, the Song of Solomon, and Ecclesiastes are far less frequent than those of Esther. The Yemenite rolls of the קצת חנה (to which the hafṭarah for the Ninth of Ab is found attached), as also a leather roll of 1560 containing the hafṭarot, have already been mentioned. For Karaite Torah rolls consult Harkavy and Strack, "Catalog der Hebräischen Bibelhandschriften zu St. Petersburg," Nos. 1–47. For Samaritan rolls see Harkavy, "Catalog der Hebräischen und Samaritanischen Handschriften der Kaiserlichen Oeffentlichen Bibliothek" (in Russian), St. Petersburg, 1875.

Manuscripts in Book Form: Manuscripts in book form date from the whole period under consideration, and were doubtless in use for a number of centuries before. Most of the early codices that have been preserved are very large. Thus Brit. Mus. MS. Or. 4445 measures about 16½ ins. by 13 ins.; the St. Petersburg codex of 916, about 14¾ ins. by 12⅙ ins.; the Vatican codex of the Sifra, dating from 1073, about 12¾ ins. by 10 ins.; the British Museum copy of the Maḥzor Vitry, about 15½ ins. by 12 ins. Small sizes are, however, not wanting. German codices of the Bible and liturgy written in the thirteenth and fourteenth centuries are generally very large. Among manuscripts written in Italy the quarto and octavo sizes are much more common than in Germany. Spanish Bible codices of the thirteenth to the fifteenth century are as a rule handsome quartos; but the comparatively few Spanish service-books extant are usually very small, probably on account of the proscription under which Jewish worship lay in Spain, and owing to the fact that small volumes could be more easily hidden away. North-African manuscripts of the fourteenth and fifteenth centuries are more often octavos than quartos. Yemenite Bible codices are generally folios, and liturgies either folios or quartos. The Karaites had a great predilection for the octavo size.

Size of Books.

In the arrangement of quires (generally 8 or 10 leaves to a gathering), etc., Hebrew manuscripts do not differ from contemporary Latin and Greek ones; and the student may, therefore, be referred to general works on paleography. When a Hebrew vellum manuscript is opened, "the two pages before the reader have the same appearance, either the yellow tinge of the hair side or the whiter surface of the flesh side" (Thompson, *l.c.* pp. 62–63). There is usually at the end of each quire a catchword indicating the first word of the next quire. Signatures in Hebrew letters—in the case of Hebrew-Arabic works, sometimes in either Arabic letters or numerals—were generally placed in the left-hand lower corner on the last page of a quire, but occasionally in the right-hand upper corner of the first page. In some cases both methods were adopted. In Karaite manuscripts the signatures are often in the left-hand upper corner of the first page.

Ruling of Manuscripts.

The ruling of Hebrew manuscripts is not different from that observable in contemporary classical ones. There are usually perpendicular lines to mark off the columns, besides the horizontal ruling. The prickings in the margin made to mark the distances between the horizontal lines have in many cases been cut away in the process of binding. The writing sometimes depends from the ruled line instead of standing on it; so, *e.g.*, Brit. Mus. MS. Or. 4445 (9th cent.; comp. Blau, "Studien zum Althebräischen Buchwesen," p. 147).

The earlier codices of large size have usually either two (*e.g.*, St. Petersburg codex of the year 916) or three columns (*e.g.*, Brit. Mus. MS. Or. 4445) (see Blau, *l.c.* pp. 138–139). Manuscripts of small size generally exhibit but one column to a page. In later times the single column became much more frequent even in manuscripts of larger size.

IV. Styles of Writing: The style of writing Hebrew has in each country been influenced more or less by causes similar to those which produced what may fairly be called national differences in calligraphy generally. So far as Europe is concerned, Hebrew penmanship most probably was brought first to the countries of the southern coast, more especially to Spain and Italy; and spread thence into France, Germany, and divers other countries, assuming various modifications in its course. The locality in which a manuscript was written is, however, not always a safe guide to the kind of calligraphy used, as it sometimes happened that a scribe belonging to one part of the world prosecuted his profession for a longer or shorter time in a different country. It should also be remarked that after the introduction of printing there arose a tendency to copy from printed forms; so that, in Europe at any rate, the square character has for several centuries past been almost everywhere conforming to one particular form of calligraphy. The earlier printed books were, it is true, set up in types that were cut differently in different countries (compare especially the early Spanish with the early Italian printed books); but the Spanish forms soon superseded all the others, and they have on account of their greater regularity ever since maintained their ground both in printing and in writing.

Copying from Printed Forms.

In the following observations the specimens of writing given in the accompanying four plates are referred to their sources and localities, and attention is occasionally directed to some peculiarities of penmanship. As a rule, however, the specimens are left to speak for themselves.

A. Square Writing: This series is, for the sake of completeness, preceded by two lines taken from the above-mentioned British Museum papyrus No. cvi.[*] (belonging to the late Ptolemaic or early Roman period), as the Hebrew-Aramaic writing then used exhibits a close affinity with the Palmyrene character, and thus forms an important link in the transition to the square character. Then follow specimens of:

Early Oriental (Nos. 2–8): No. 2 is taken from an Oxford papyrus belonging to the sixth or seventh century ("J. Q. R." xvi., No. 61); No. 3, from the Hebræo-Persian document (apparently of the 8th cent.) lately brought from Khotan in central Asia and already referred to; No. 4, from Brit. Mus. MS. Or. 4445 (9th cent.); No. 5, from the St. Petersburg codex of the Later Prophets (dated 916); No. 6, from Codex Gaster No. 150 (belonging to about the same period); No. 7, from a contract (dated 980) on vellum, brought to the British Museum from the Cairo Genizah; No. 8, from Brit. Mus. MS. Or. 1467 (Per-

sian origin, probably 11th cent.). With regard to No. 3 it should be noted that though the final "nun" (of which, however, no instance appears in the specimen) is long in the document, this is no mark of later date; for the long form of the letter appears in early papyri (as in specimen No. 2). In Nos. 4-6 the final "nun" is uniformly short. No. 8 shows the superlinear punctuation combined with the ordinary mode of accentuation.

Syro-Egyptian (Nos. 9-11): No. 9 is taken from a Hebrew letter, dated 1055, brought to the British Museum from the Cairo Genizah; No. 10, from the text of the Hebrew Ecclesiasticus (Sirach), also from the Cairo Genizah (11th-12th cent.); No. 11, from Pl. I. of Neubauer's portfolio of facsimiles (referred to hereafter as "Neubauer") printed to illustrate his catalogue of Oxford manuscripts (12th-13th cent.). In No. 9 note the peculiar combined form of אל (which is really Rabbinic). The mark over the second word of line 2 in No. 10 refers to a marginal note in the original. In No. 11 both the punctuation and the accentuation are superlinear.

Spanish (Nos. 12-15): No. 12 is taken from the Brit. Mus. MS. Harley 5720 (11th cent.); No. 13, from Brit. Mus. MS. Or. 2201 (dated 1246); No. 14, from a Bible codex belonging to the Earl of Leicester (13th cent.; see C. D. Ginsburg, "Facsimiles," London, 1898); No. 15, from Brit. Mus. MS. Or. 2626 (dated 1483). No. 12 may fairly be described as representing a transition stage from the early Oriental square writing to the Spanish.

Italian (Nos. 16-18): No. 16 is taken from Brit. Mus. MS. Arundel Or. 2 (dated 1216); No. 17, from Brit. Mus. MS. Or. 2736 (dated 1390); No. 18, from Brit. Mus. MS. Add. 18,692 (handwriting of Abraham Farissol, dated 1478). It should here be remarked that instead of the square writing in the proper sense of the word, Italian scribes often employ for Bible codices the semi-Rabbinic character exemplified in No. 45 (see below).

Franco-German (Nos. 19-21): No. 19 is taken from Brit. Mus. MS. Add. 10,455 (dated 1310); No. 20, from Cambridge University Library MSS. Ec, 8, 9 (dated 1347; see the "Oriental Series of the Palæographical Society" [hereafter referred to as "O. S."], Pl. XLI.); No. 21, from Neubauer, Pl. XI. (written before 1471). Note especially the sloping character of No. 20, a peculiar mark of German writing.

Greek (Nos. 22-24): No. 22 is taken from the Carlsruhe codex of the Prophets (dated 1105-6; "O. S." Pl. LXXVII.); No. 23, from Brit. Mus. MS. Add. 27,205 (dated 1179); No. 24, from Neubauer, Pl. XXI. (written before 1263).

Yemenite (Nos. 25-28): No. 25 is taken from Brit. Mus. MS. Or. 2373 (13th-14th cent.); No. 26, from Brit. Mus. MS. Or. 2370 (dated 1460-61); No. 27, from Brit. Mus. MS. Or. 2210 (dated 1468); No. 28, from Neubauer, Pl. XXXI. (dated 1561).

Varia (Nos. 29-31): No. 29 is taken from Brit. Mus. MS. Or. 2496, showing Karaite square writing of apparently the thirteenth century; No. 30, from a Pentateuch roll written for the Jews of K'ai-Fung-Foo, China (18th cent.; Brit. Mus. MS. Add. 19,250; showing the dependence of Chinese on Persian writing); No. 31, from Neubauer, Pl. XXXIX. (see Harkavy, "Neuaufgefundene Bibelhandschriften," Table II.—perhaps a forgery).

B. Square Rabbinic or Semi-Rabbinic Writing: This series shows an approximation in greater or less degree to the freer Rabbinic style of writing.

Syro-Egyptian (Nos. 32-38): No. 32 is taken from an Oxford papyrus of the sixth or seventh century (see "J. Q. R." xvi., No. 61); No. 33, from a manuscript of the above-mentioned Hebrew Ecclesiasticus (perhaps 9th cent.) belonging to E. N. Adler; No. 34, from the Genizah document Brit. Mus. MS. Or. 5538 (dated 1003); No. 35, from the Genizah document Brit. Mus. MS. Or. 5536 (dated 1015); No. 36, from the Genizah document Brit. Mus. MS. Or. 5545 (dated 1089); No. 37, from the Genizah document Brit. Mus. MS. Or. 5551 (dated 1151); No. 38, from Neubauer, Pl. IV. (signature of Maimonides). The Rabbinic tendency in No. 35 is only slight; but the ת is written freely, and the general appearance of the specimen shows affinity with semi-Rabbinic. It is necessary to note the slighter approximation of the square to the freer Rabbinic forms.

Spanish and North-African (Nos. 39-42): No. 39 is taken from Brit. Mus. MS. Harley 5530 (13th cent.); No. 40, from Brit. Mus. MS. Or. 5866 (middle of 15th cent.); No. 41, from Brit. Mus. MS. Or. 5600 (15th cent.); No. 42, from Brit. Mus. MS. Add. 19,780 (17th cent.). No. 40 appears to be of decidedly Spanish origin, the remaining three numbers being North-African (No. 42 can be definitely located as Algerian).

Italian (Nos. 43-46): No. 43 is taken from the Leyden copy of the Talmud Yerushalmi (dated 1281; see "O. S." Pl. LVI.); No. 44, from Brit. Mus. MS. Add. 18,690 (written between 1332 and 1350); No. 45, from Brit. Mus. MS. Add. 19,944 (dated 1441); No. 46, from Brit. Mus. MS. Or. 1081 (dated 1390). No. 46 appears to show French characteristics combined with Italian ones.

Franco-German (Nos. 47-50): No. 47 is taken from the Vatican copy of the Sifra (dated 1073; see "O. S." Pl. XC.); No. 48, from Brit. Mus. MS. Add. 27,214 (dated 1091); No. 49, from Brit. Mus. MS. Arundel Or. 51 (dated 1189); No. 50, from Brit. Mus. MS. Or. 5466 (dated 1690). In Nos. 47-49 the tendency to semi-Rabbinic is but slight.

Greek (No. 51): This specimen is taken from Brit. Mus. MS. Harley 5583 (15th-16th cent.).

Yemenite (Nos. 52-53): No. 52 is taken from Brit. Mus. MS. Or. 4837 (a fine copy of Ibn Janah's "Kitab al-Uṣul," 14th cent.); No. 53, from Neubauer, Pl. XXXII. (dated 1491).

Karaite (Nos. 54-56): No. 54 is taken from Neubauer, Pl. XXXIV. (13th-14th cent.); No. 55, *ib.* Pl. XXXV. (written before 1353); No. 56, *ib.* Pl. XXXVI. (dated 1747).

Persian (Nos. 57-58): No. 57 is taken from Brit. Mus. MS. Or. 5446 (Pentateuch in Persian; dated 1319); No. 58, from Brit. Mus. MS. Or. 2451 (dated 1483).

C. Rabbinic Writing: This series exhibits various styles of writing of a decided Rabbinic character.

Early Oriental (Nos. 59-60): No. 59 is taken from the Decalogue papyrus referred to above (probably 6th or 7th cent.); No. 60, from Brit. Mus. MS. Or. 73 (perhaps written at Mosul; dated 1190).

Syro-Egyptian (Nos. 61-63): No. 61 is taken from

Brit. Mus. MS. Or. 5519 (12th cent.); No. 62, from Neubauer, Pl. III. (13th-14th cent.); No. 63, *ib.* Pl. VI. (14th cent.?).

Spanish (Nos. 64–65): No. 64 is taken from Brit. Mus. MS. Add. 14,763 (dated 1273); No. 65, from Brit. Mus. MS. Or. 5866 (middle of 15th cent.; for semi-Rabbinic forms from the same manuscripts see No. 40).

North-African, etc. (Nos. 66–68): No. 66 is taken from Brit. Mus. MS. Add. 27,113 (dated 1282); No. 67, from Neubauer, Pl. VII. (dated 1480; described as Syrian Rabbinic Maghrebi character); No. 68, *ib.* Pl. XIII. (15th cent.; described as Oriental Provençal).

Italian (No. 69): Specimen taken from Brit. Mus. MS. Or. 5024 (dated 1374).

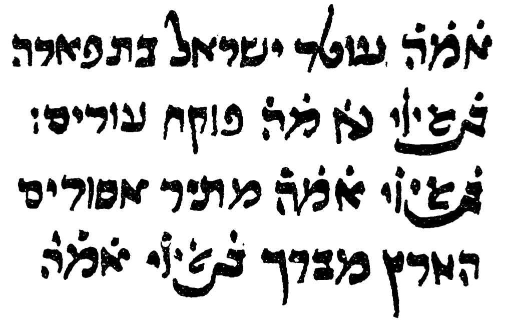
Franco-German (Nos. 70–72): No. 70 is taken from Brit. Mus. MS. Add. 17,049 (dated 1394); No. 71, from Cambridge University Library MS. Add. 560 (dated 1401; see "O. S." Pl. LXVIII.); No. 72, from Brit. Mus. MS. Add. 27,199 (Elijah Levita's autograph; dated 1515).

Greek (Nos. 73–74): No. 73 is taken from Neubauer, Pl. XXIII. (written before 1184); No. 74, *ib.* Pl. XXV. (dated 1375).

Specimens of Cursive.

D. Cursive Writing: This series is preceded by two specimens (Karaite) of writing in which the Hebrew text is written in the Arabic character and provided with Hebrew punctuation. No. 75 is taken from Brit. Mus. MS. Or. 2540 (10th cent.), and No. 76 from Brit. Mus. MS. Or. 2549 (11th cent.). No. 77 (Neubauer, Pl. XIX.; dated 1506) is Oriental. No. 78 (*ib.* Pl. X.; handwriting of Jacob b. Ḥayyim, early 16th cent.) is a specimen of Spanish cursive. Nos. 79–83 are Italian. No. 79, from Neubauer, Pl. XXIX., is old Italian; No. 80, from Brit. Mus. MS. Add. 27,096, is Mordecai Dato's writing (16th cent.). No. 81, from Brit. Mus. MS. Add. 27,148, is Judah Modena's autograph (1648); No. 82, from Brit. Mus. MS. Add. 26,991, is Solomon Portaleone's autograph (17th cent.); and No. 83, from Brit. Mus. MS. Add. 27,103, is Joseph Almanzi's autograph. Nos. 84 and 85 are German, the former being taken from Brit. Mus. MS. Add. 18,695 (a Maḥzor in a Judæo-German translation, dated 1504), and the latter from Neubauer, Pl. XVII. (Heidenheim's autograph). No. 86 is Karaite German cursive writing, dated 1826 (Neubauer, Pl. XXXVII.).

Here may fitly be added a specimen of writing from Codex Gaster 80, fol. 23b, which contains forms rarely found elsewhere. Remarkable is the abbreviation of אלהינו in line 2. The manuscript contains Maimonides' "Sefer ha-Madda'," and may belong to the fourteenth or to the thirteenth century. The writing appears to combine Yemenite with Persian characteristics (perhaps displaying the former more than the latter).



Comparative Frequency of Illuminations.

V. Illuminations: Illuminations in Hebrew manuscripts are far from being rare. Roughly speaking, the proportion of illuminated codices in a large and representative collection of Hebrew manuscripts would probably be found to be about seven or eight, if not more, in every hundred. On some early Eastern illuminations of Biblical codices (mostly in gold) see M. Gaster, "Hebrew Illuminated Bibles of the IXth and Xth Centuries (Codices Gaster 150, 151)." A fair specimen of early Persian chain-like ornamentation can be seen in "O. S." Pl. LIV. (Brit. Mus. MS. Or. 1467). Fine specimens of arabesque border illumination are found, *e.g.*, in Brit. Mus. MSS. Or. 2626–2628 of the year 1483–84, and in Brit. Mus. MSS. Harley 5698 and 5699, a page of which has been reproduced in colors for the present article (see frontispiece). In this instance, however, the arabesque form has been much modified. On Haggadah illuminations see Haggadah.

Spain and Provence seem to have been foremost in the last-named branch of illustration. Fine German illuminations are comparatively rare. The ornamentations, or what were meant for such, found in German copies of the Bible, etc., are as a rule grotesque rather than appropriate. Very interesting specimens of French illuminations, however, are found in Brit. Mus. MS. Add. 11,639 (12th and 13th cent.), containing a collection of Biblical, liturgical, and other texts. A finely ornamented page of an early Karaite Biblical text (10th cent.) has been reproduced in colors in G. Margoliouth, "Catalogue of the Hebrew and Samaritan MSS. in the British Museum," vol. i., Pl. V. (Brit. Mus. MS. Or. 2540).

Palimpsests and Colophons.

VI. Palimpsests: Hebrew palimpsests, *i.e.*, manuscripts showing Hebrew written over erased or partly erased earlier writing, are rare. The Jews, as was only natural, did not, as a rule, like to utilize for sacred purposes material that had been used for other objects. Some notable examples of Hebrew palimpsests have, however, been found in the Cairo Genizah. From this source come the Oxford fragments containing Hebrew writing of apparently the twelfth century over Palestinian Syriac of the sixth and seventh, and eighth and ninth centuries (see Gwilliam and others in "Anecdota Oxoniensia," Semitic Series, 1893-96). More interesting still are the Cambridge palimpsests which contain Hebrew of the eleventh and twelfth centuries written over portions of Aquila's Greek version of the Old Testament and Origen's Hexapla (see F. C. Burkitt, "Fragments of the Books of Kings According to the Translation of Aquila," 1897; and C. Taylor, "Hebrew-Greek Cairo-Genizah Palimpsests," 1900). A page of palimpsest in which a Hebrew liturgical text of 1179 was written over Latin writing of the tenth century can be seen in "O. S." Pl. LXXVIII. (Brit. Mus. MS. Add. 27,205); see also Jew. Encyc. *s.v.* Aquila.

VII. Colophons: At the end of a manuscript, and sometimes also at the conclusion of parts of the same, a colophon (Greek, *κολοφών*) or "finishing stroke" is often found. In its fullest form the colophon contains (1) the title of the work, (2) the name of the scribe, (3) the name of the person for whom the manuscript was written, (4) the place of writing, (5) the date, and (6) precative and benedictive sentences, usually taken from the Bible (see Colophon).

The mention of the title in a colophon is, in the case of unknown or little-known works, helpful for identification, if, as not infrequently happens, the beginning of the manuscripts has been lost. The entries of scribes' names at times reveal long genealogies of families among which the profession of copying had descended from father to son for a number of generations. Scribes sometimes mark off their names also in the initial letters of one or more pages of the manuscripts. The complimentary epithets lavished by the scribe on his rich, or comparatively rich, employer are often conspicuous enough; but the more important references to descent and position are not wanting. There are also cases in which the scribe writes his manuscript for himself or for one or other of his children. The mention of the place of writing is, of course, useful for localizing the different styles of writing, though, as has already been mentioned, caution has to be exercised in this respect.

The manner of dating a manuscript demands special notice. For some points connected with the subject see Chronology and Era. Mention should be made first of the two specifically Jewish modes of dating, and then of eras borrowed from other nations.

Methods of Dating Manuscripts.

(1) The era of the Creation is in common use in manuscripts written in most parts of Europe; and as it appears to have been generally adopted about the middle of the tenth century of the common era, it was used in the entire period here dealt with. If the full number of years from the Creation is given, the reckoning is styled "peraṭ gadol" (abbreviated פ"ג); and the year of the common era is obtained by subtracting the number 3760 (or 3761, if the manuscript was written, or rather finished, in the first three months of the Jewish year). But the thousands are often omitted; and the reckoning is then called "peraṭ ḳaṭon" (abbreviated פ"ק). In such cases the number 1240 (or 1241) has to be added in order to obtain the date of the common era.

(2) Dating from the destruction of the Second Temple (*i.e.*, from the year 68) is comparatively rare in manuscripts, but it is not, as has been thought, strictly confined to Greece; for this mode of dating is found not only in the Carlsruhe copy of the Prophets, which was written in a Greek Ashkenazic hand in 1105-6 (דא תתסו ליצירה ובתתרלח לחרבן בית הבחירה = 4866 of the Creation or 1038 from the destruction of the Temple), but also in the Vatican copy of the Sifra written in a French hand in 1073, and (see below) in a manuscript from Yemen.

A very common mode of dating manuscripts written in the East is (3) by the Seleucidan or Greek era ("le-ḥeshbon ha-Yewanim," "le-minyan sheṭarot," or simply "li-sheṭarot"; sometimes considered to synchronize with the cessation of prophecy). In order to obtain the corresponding C.E. date, 311 (or 312 if the manuscript is dated within the first three months of the Jewish year) has to be subtracted. This era is by far the most common in Hebrew manuscripts written in Yemen, though the era of the Creation as well as the Mohammedan era is also occasionally met with, one era being sometimes followed by another. The Karaites use also the Greek era; but the reckoning from the Creation is more common in their colophons. The Karaites add the Mohammedan era more frequently than do the Jews of Yemen.

"Minyan Sheṭarot."

(4) The Mohammedan era just referred to is generally introduced under the designation "ḥeshbon ha-Yishme'elim"; but the expression "le-ḳeren ze'era" (in allusion to Dan. vii. 8) is also found.

(5) The common era is of very rare occurrence in Hebrew colophons; and it then only follows the year of the Creation previously given. Thus Brit. Mus. MS. Harley 5704 (containing a unique copy of the Yalḳuṭ Makiri on the Minor Prophets, written for Cardinal Ægidius) is dated "Tuesday, the 16th day of Ab, in the year 274 of the 'small reckoning' [ורחמך לפ"ק: this being at the same time an example of utilizing the numerical value of a Scriptural phrase for dating], and according to their reckoning 1514" (the term "li-yeẓirah" being then added by mistake). There are some instances where the Christian month is given side by side with the year of the Creation.

Multiple Dating.

A remarkable instance of multiple dating (though given at the beginning of the manuscript, and, therefore, not in the form of a colophon) is found in Brit. Mus. MS. Add. 27,294 (containing an Arabic commentary in Hebrew characters on Maimonides' Mishneh Torah, ch. i.-iv.; see "J. Q. R." xiii. 488), which was written by the scholarly Yemenite compiler Sa'id ibn Daud. It contains the following datings: (1) לחרבן ראשון אתתפט (1889 years since the destruction of the First Temple); (2) לחרבן שני אשצח (1398 since the destruction of the Second Temple); (3) . . . ליציאת מצרים (date of Exodus no longer legible); (4) לשטרות אתשעח (1778, according to the era of contracts); (5) . . . ליצירה (date of the Creation no longer legible); (6) לסלוק הנבואה אתשעח (1778 since the cessation of prophecy; the same as No. 4).

It should here be remarked that the date of a manuscript may, in the absence of a colophon, be computed from the table of calendar cycles of nineteen years that is sometimes (more especially in liturgical manuscripts) added to the text. Thus Brit. Mus. MS. Add. 27,205 must have been written about 1180; for the table of cycles commences with רסא, the two hundred and sixty cycles past yielding 260 × 19 = 4940 A.M. = 1180 C.E. In manuscripts containing digests of Talmudical law, the date may sometimes be gathered from the year given in the form of the letter of divorcement ("geṭ"), etc.

A curious addition, sometimes attached to colophons (in certain cases standing by itself), is the inprecative phrase that the scribe should suffer no injury (לא יזק) "until an ass should mount on the ladder [dreamed of by Jacob]" (עד שיעלה חמור בסולם [אשר יעקב אבינו חלם]; see "O. S." description of Pl. LXVIII).

VIII. Owners, etc.: A large number of manuscripts contain the names of those who at one time or another owned them. These are generally found on fly-leaves at the beginning or at the end, but sometimes also in the margin of inner leaves. Occasionally owners record the births of their children on the fly-leaves, more rarely deaths and other events. In a number of instances manuscripts are marked as having been obtained by an owner at the division of his late father's or another testator's property. Contracts of transfer of manuscripts by sale are also often found; and occasionally the pawning of a manuscript is recorded on one of its fly-leaves. The money value that was at the time attached to the manuscript is sometimes stated in the notices of sale.

IX. Censors: On this subject see CENSORSHIP OF HEBREW BOOKS. The following few remarks may, however, be added to what is said in that article: An instance of self-imposed censorship in France, about 1291, is found in a Hebrew manuscript at the British Museum (Add. 19,664). Brit. Mus. MS. Add. 17,050 contains (in the form of a fly-leaf) a document, dated Lugo, Feb. 16, 1610, by which permission was given to carry the codex to Modena. Brit. Mus. MS. Or. 74 contains an entry made for the censor by his notary. Very often the entries of several censors are found on the same page, the manuscript having been from time to time subjected to fresh examinations.

Besides these there are other collections not yet catalogued; some in private hands, *e.g.*, those of Dr. M. Gaster of London, and of the late D. Kaufmann at Budapest, others in public libraries, as, for example, the Alliance Israélite Library. The fragments of the Cairo Genizah, numbering many thousands, and scattered in Cambridge, Oxford, London, and Paris, are not included. Many libraries, as the Bodleian and Bibliothèque Nationale, have received notable accessions since their catalogues were printed.

MA'OZ ẒUR (מעוז צור): Commencement of the hymn originally sung only in the domestic circle, but now used also in the synagogue, after the kindling of the lights on the Feast of Dedication (ḤANUKKAH). The acrostic signature is that of Mordecai. Zunz ("Literaturgesch." p. 580) is inclined to place the author of this hymn in the middle of the thirteenth century. He may have been the Mordecai ben Isaac ha-Levi who wrote the Sabbath table-hymn "Mah Yafit" (Majufes), or even the scholar referred to in Tos. to Niddah 36a. Or, to judge from the appeal in the closing verse, now generally suppressed, he may have been the Mordecai whose father-in-law was martyred at Mayence in 1096.

The Traditional Tune.

The bright and stirring tune now so generally associated with "Ma'oz Ẓur" serves as the "representative theme" in musical references to the feast (comp. ADDIR HU; AḲDAMUT; HALLEL). Indeed, it has come to be regarded as the only Ḥanukkah melody, four other Hebrew hymns for the occasion being also sung to it (comp. Zunz, *l.c.* pp. 422, 429; D. Kaufmann, in "Ha-Asif," ii. 298), as well as G. Gottheil's paraphrase, "Rock of Ages," in the "Union Hymnal" (No. 107). It was originally sung for "Shene Zetim" ("Olives Twain"), the "Me'orah," or piyyuṭ, next preceding the SHEMA' in the Morning Service of the (first) Sabbath in the eight days of the Feast of Dedication. Curiously enough, "Shene Zetim" alone is now sometimes sung to a melody which two centuries ago was associated rather with "Ma'oz Ẓur." The latter is a Jewish-sounding air in the minor mode, and is found in Benedetto

Marcello's "Estro Poetico Armonico," or "Parafrasi Sopra li Salmi" (Venice, 1724), quoted as a melody of the German Jews, and utilized by Marcello as the theme for his "Psalm XV." This air has been transcribed by Cantor Birnbaum of Königsberg in the "Israelitische Wochenschrift" (1878, No. 51).

The present melody for the Ḥanukkah hymn has been identified by Birnbaum as an adaptation from the old German folk-song "So weiss ich eins, dass mich erfreut, das pluemlein auff preiter heyde," given in Böhme's "Altdeutsches Liederbuch" (No. 635); it was widely spread among German Jews as early as 1450. By an interesting coincidence, this folk-melody was also the first utilized by Luther for his German chorals. He set it to his "Nun freut euch lieben Christen gmein" (comp. Julian, "Dictionary of Hymnology," *s.v.* "Sing praise to God who reigns above"). It is familiar among English-speaking people as the tune for a translation by F. E. Cox of the hymn "Sei lob und ehr dem höchsten gut," by J. J. Schütz (1640-1730). As such it is called "Erk" (after the German hymnologist), and, with harmonies by Bach, appears as No. 283 of "Hymns, Ancient and Modern" (London, 1875). The earliest transcription of the Jewish form of the tune is due to Isaac Nathan, who set it, very clumsily indeed, to the poem "On Jordan's Banks" in Byron's "Hebrew Melodies" (London, 1815). Later transcriptions have been numerous, and the air finds a place in every collection of Jewish melodies. It was modified to the form now favored by English Jews by the delicate liturgical taste of Mombach, to whom is due the modulation to the dominant in the repetition of the first strain, shown in the transcription above.

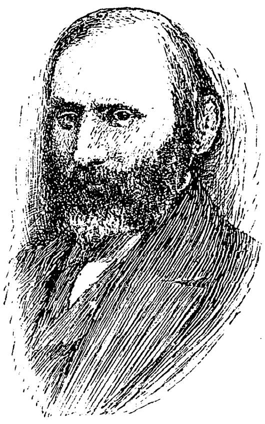
MAPU, ABRAHAM: Russian Hebrew novelist; born near Kovno Jan. 10, 1808; died at Königsberg Oct. 9, 1867. Mapu introduced the novel into Hebrew literature. His early education in Bible and Talmud was received at the ḥeder, on leaving which, at the age of twelve, he continued the study of the Talmud in private, and was so successful that he soon acquired the name of "'Illui" (Friedberg, "Zikronot," in "Hausfreund," i. 22). Moved thereto by his own poetical and impulsive disposition and influenced by his father, Jekuthiel, himself a mystic and cabalist, Mapu took up, at the age of fifteen, the study of Cabala. According to an anecdote related of him, he attempted to give his studies practical effect by endeavoring to render himself invisible. Though he carefully followed cabalistic prescriptions he was cruelly disillusioned by being addressed by a friend at the very moment when he thought himself secure from mortal observation (*ib.*). Mapu later studied Talmud and Cabala with Elijah Kalisher (Ragoler), rabbi at Slobodka (Mapu's birthplace). In Kalisher's house he found a copy of the Psalms with a Latin translation, and this awakened within him a desire to study Latin, which he did from that translation. A better opportunity to study Latin presented itself when he formed the acquaintance of a Catholic priest while teaching in a country school; and he made such good progress in the language that he wrote a book in Latin (*ib.* i. 24).

From this time dates Mapu's devotion to secular studies, particularly to languages and literatures, which he pursued henceforth assiduously. In the forties he removed with his family to Rossieny, government of Kovno; there he became acquainted with the scholar Senior Sachs, who greatly heightened his love for ancient Hebrew history and literature and for the beauties of Biblical diction, of which Mapu made later such good use in his romances (Brainin, "Abraham Mapu," p. 36). A few years later he became teacher in the house of Apatov Parnes at Wilna, and then was appointed teacher of Jewish religion and German at the gymnasium of Kovno. In 1860 his health began to fail; he suffered especially from palsy in his right hand, which made writing difficult for him; in 1867 he went for medical treatment to Königsberg, where he died (*ib.* i. 67).



Abraham Mapu.

The literary activity of Mapu fell in a period of barrenness for Hebrew literature, as far as fiction was concerned. Here and there a poem of moderate value, or a translation of a French romance, had appeared, but there was not one original novel. His first book, "Ahabat Ẓiyyon," begun in 1831 and published at Wilna in 1853, is a romance of the time of King Hezekiah and Isaiah. In this as well as in his other works, one recognizes the unmistakable influence of the French Romantic school—of Victor Hugo, Dumas (père), and Eugène Sue, particularly of the last-named, whom Mapu always admired (*ib.* i. 49). Perhaps through their influence Mapu succeeded in giving to his characters genuine naïveté and naturalness, which combined with a highly successful use of Biblical diction to make this work classic. "Ahabat Ẓiyyon" was translated into German as "Tamar" by S. Mandelkern (2d ed., Leipsic, 1897), without mention of Mapu's authorship; into English, under the title "Amnon, Prince and Peasant," by Frank Jaffe (London, 1887), and by Schapiro, under the title "In the Days of Isaiah" (New York, 1903); into Yiddish, in Warsaw (1874). His second work, "Ashmat Shomeron" (Wilna, 1865), is likewise a work of powerful imagination. It is a romance of the days of Ahaz, King of Judah, and of Pekah b. Remaliah and Hosea b. Elah, kings of Israel, depicting the wild, orgiastic character of Samaritan society and setting against it the purity and simplicity of Judean society. "'Ayiṭ Ẓabua'" (Wilna, 1857-61) is a novel, in five parts, of modern life, picturing the struggle of the Maskilim against the "painted vulture," or hypocrite—a standing epithet at that time for the ultra-Orthodox.

His "Ahabat Ẓiyyon."

Mapu wrote also "Ḥozeh Ḥezyonot," a romance, in ten parts, of the times of Shabbethai Ẓebi; but owing to the intervention of the "hypocrites" of his town the manuscript was destroyed while on its way to the minister of public instruction for approval, only a fragment being preserved. His other works are "Ḥanok la-Na'ar" and "Amon Padagug," Hebrew text-books (Wilna, 1859, and Königsberg, 1868), and "Hausfranzose" (Wilna, 1861).

MAR (מר): Aramaic noun meaning "lord." Daniel addresses the king as "Mari" (= "my lord": Dan. iv. 16 [A. V. 19]; comp. Hebr. "Adoni," used in speaking to the king). In the Palestinian schools "Mari" and "Rabbi" were customarily employed in addressing the sages. It is said of King Jehoshaphat that on seeing a scholar he rose from his throne, and saluted him with the words, "Abi, abi; rabbi, rabbi; mari, mari" (Ket. 103b; Mak. 24a). Jesus was addressed by his disciples both as "Mari" and as "Rabbi" (comp. Dalman, "Die Worte Jesu," i. 269 *et seq.*). In conversation, "Mari" was used as a respectful form of address in Palestine (comp. Yer. Pes. 21b, lines 48–49: איקריה דמרי, לא יבעום מרי); "Mar," in Babylonia (comp. Yoma 20b: לימא מר). In the latter country "Mar" became also a title preceding the name, and it was sometimes customary to call scholars "Mar" and not "Rab," particularly in the case of the two great contemporaries of Rab (Abba Arika)—Mar Samuel and Mar 'Uḳba. When Abaye was speaking of his uncle and teacher Rabbah bar Naḥmani, he merely said "Mar," without adding any name (Pes. 101a). When Tabyomi, R. Ashi's son, cited in a lecture sentences by his father, he did not refer to him by name, but said "Abba Mari" (= "my father, my lord").

Tabyomi's contemporaries never referred to him by name, but called him "Mar"; in the Talmud he is, therefore, designated only as "Mar bar Rab Ashi." "Mar" and "Rab" (= "lord" and "master") together became a customary title of the Babylonian scholar in the geonic period. Sherira Gaon is the first one to use this combination, in the letter in which he refers to the first geonim—Mar Rab Hanan at Pumbedita and Mar Rab Mar at Sura (where "Mar" is already a proper name; see Jew. Encyc. v. 568, *s.v.* Gaon)—and he always prefixes the double title "Mar Rab" to their names (*ib.* v. 571). In the prayer "Yeḳum Purḳan," dating from the time of the Geonim, the scholars are designated as "Maranan we-Rabbanan" (= "our lords and masters"). The title "Mar Rab," also, was combined with the personal suffix of the first person plural, so that the Geonim were called "Marana Rabbana" (= "our lord, our master"). This seems to have been the official title in the headings of the questions addressed to the Geonim (comp. Harkavy, "Responsen der Gaonen," p. 149; Neubauer, "M. J. C." i. 41, etc.), and it is the exact ramaic counterpart of the Hebrew "Adonenu we-Rabbenu," by which, according to the tannaitic Halakah, the king was to be addressed (Tosef., Sanh. iv. 3). The gaon was called also simply "Marana" (Harkavy, *l.c.* pp. 83, 107, 140, 143), or the Hebrew "Adonenu" was used instead (*ib.* pp. 88, 187, 278, 314), which was rendered in Arabic by "Sayyiduna." "Mar Rab" was applied

Title and Name.

also to scholars who were not geonim (Harkavy, *l.c.* pp. 24, 172).

The title "Mar" was not customary in the West, so that Abraham ibn Daud, in his "Sefer ha-Kabbalah," refers to the Geonim merely as "Rab." Menahem Meïri distinguishes only the scholarly and noble Todros and his son Levi of Narbonne by the title "Marana we-Rabbana" (Neubauer, *l.c.* ii. 229). Isaac Lattes (*ib.* ii. 238) likewise designates certain scholars of Narbonne by the title "Maran" (מרן = מרנא), which also means "our lord." This is the title subsequently applied as a mark of respect to Joseph Caro, the author of the Shulḥan 'Aruk (comp. Azulai, "Shem ha-Gedolim," i. 82). One of Lattes' manuscripts has "Morenu" (מורנו) instead of "Maran." The title "Morenu," which originated in the fourteenth century, is developed from the older form "Marana" (Güdemann, "Gesch." iii. 31). The Hebrew form "Morenu" instead of "Marana" occurs sporadically even in the geonic period (comp. Harkavy, *l.c.* pp. 275 and 276, where the gaon Saadia is entitled "Morenu we-Rabbenu"). There are other indications, also, which show that the two words were regarded as synonymous (comp. Targ. to Prov. v. 13, where מורי is translated by מרוותי = "my lords, my masters"; Sanh. 98, where רבי ומרי is to be read instead of ר' ומורי; and Dalman, *l.c.* p. 268). Thus the old Hebrew title "Marana" was changed to "Morenu," with the meaning "doctor noster," perhaps under the influence of the custom which had become prevalent among Christian scholars of addressing one another with the title "doctor." As shown in the examples given above, מר itself designated the teacher and sage.

S. S. W. B.

MARAH (lit. "bitter"): The name of a station or halting-place of the Israelites in the wilderness (Ex. xv. 23; Num. xxxiii. 8), so called in reference to the water of the well found there. It was reached by the Israelites three days after crossing the Red Sea and after they had passed the valley of Shur and the wilderness of Athan. The well is variously identified with 'Ayun Musa, 'Ain Naba, or Al-Gharkadah (comp. Holzinger, "Exodus," p. 55; Dillman, "Exodus," p. 177). The Talmud says that at Marah three laws were added to the seven commands already given to Noah—those regarding the institution of tribunals, Sabbath observance, and obedience to parents (Suk. 56b; Levy, "Neuhebr. Wörterb." iii. 244b).

J. E. I. N.

MARANO (plural, **Maranos,** generally written **Marranos**): Crypto-Jews of the Iberian Peninsula. The term, which is frequently derived from the New Testament phrase "maran atha" ("our Lord hath come"), denotes in Spanish "damned," "accursed," "banned"; also "hog," and in Portuguese it is used as an opprobrious epithet of the Jews because they do not eat pork. The name was applied to the Spanish Jews who, through compulsion or for form's sake, became converted to Christianity in consequence of the cruel persecutions of 1391 and of Vicente Ferrer's missionary sermons. These "conversos" (converts), as they were called in Spain, or "Christãos Novos" (Neo-Christians) in Portugal, or "Chuetas" in the Balearic Isles, or "Anusim" (constrained) in Hebrew, numbered more than 100,000. With them the history of the Pyrenean Peninsula, and indirectly that of the Jews also, enters upon a new phase; for they were the immediate cause both of the introduction of the Inquisition into Spain and of the expulsion of the Jews from that country. The wealthy Maranos, who engaged extensively in commerce, industries, and agriculture, intermarried with families of the old nobility; impoverished counts and marquises unhesitatingly wedded wealthy Jewesses; and it also happened that counts or nobles of the blood royal became infatuated with handsome Jewish girls. Beginning with the second generation, the Neo-Christians usually intermarried with women of their own sect. They became very influential through their wealth and intelligence, and were called to important positions at the palace, in government circles, and in the Cortes; they practised medicine and law and taught at the universities; while their children frequently achieved high ecclesiastical honors.

Classes of Maranos.

The Maranos and their descendants may be divided into three categories. The first of these is composed of those who, devoid of any real affection for Judaism, and indifferent to every form of religion, gladly embraced the opportunity of exchanging their oppressed condition as Jews for the brilliant careers opened to them by the acceptance of Christianity. They simulated the Christian faith when it was to their advantage, and mocked at Jews and Judaism. A number of Spanish poets belong to this category, such as Pero Ferrus, Juan de Valladolid, Rodrigo Cota, and Juan de España of Toledo, called also "El Viejo" (the old one), who was considered a sound Talmudist, and who, like the monk Diego de Valencia, himself a baptized Jew, introduced in his pasquinades Hebrew and Talmudic words to mock the Jews. There were also many who, for the sake of displaying their new zeal, persecuted their former coreligionists, writing books against them, and denouncing to the authorities those who wished to return to the faith of their fathers, as happened frequently at Valencia, Barcelona, and many other cities (Isaac b. Sheshet, Responsa, No. 11).

The second category consists of those who cherished their love for the Jewish faith in which they had been reared. They preserved the traditions of their fathers; and, in spite of the high positions which they held, they secretly attended synagogue, and fought and suffered for their paternal religion. Many of the wealthiest Maranos of Aragon belonged to this category, including the Zaportas of Monzon, who were related by marriage to the royal house of Aragon; the Sanchezes; the sons of Alazar Yusuf of Saragossa, who intermarried with the Cavallerias and the Santangels; the very wealthy Espes; the Paternoys, who came from the vicinity of Verdun to settle in Aragon; the Clementes; the sons of Moses Chamoro; the Villanovas of Calatayud; the Coscons; and others.

The third category, which includes by far the largest number of Maranos, comprises those who yielded through stress of circumstances, but in their

Temporary Maranos.

home life remained Jews and seized the first opportunity of openly avowing their faith. They did not voluntarily take their children to the baptismal font; and if obliged to do so, they on reaching home washed the place which had been sprinkled. They ate no pork, celebrated the Passover, and gave oil to the synagogue. "In the city of Seville an inquisitor said to the regent: 'My lord, if you wish to know how the Maranos keep the Sabbath, let us ascend the tower.' When they had reached the top, the former said to the latter: 'Lift up your eyes and look. That house is the home of a Marano; there is one which belongs to another; and there are many more. You will not see smoke rising from any of them, in spite of the severe cold; for they have no fire because it is the Sabbath.' Pretending that leavened bread did not agree with him, one Marano ate unleavened bread throughout the year, in order that he might be able to partake of it at Passover without being suspected. At the festival on which the Jews blew the shofar, the Maranos went into the country and remained in the mountains and in the valleys, so that the sound might not reach the city. They employed a man specially to slaughter animals, drain away the blood, and deliver the meat at their homes, and another to circumcise secretly" ("Shebeṭ Yehudah," pp. 96 *et seq.*). The Jews of that time judged the Maranos gently and indulgently; in Italy a special prayer was offered for them every Sabbath, asking that "God might lead them from oppression to liberty, from darkness to the light of religion" (אחיכו אנוסי ישראל הנתונים בצרה ובשביה המקום ירחמם ויחון אותם בעבור שמו הגדול ויושיעם ויושיענו ויוציאם ויוציאנו מצרה לרוחה ומאפילה לאורה ונאמר אמן; MS. Roman Maḥzor of the year 1441). To the Maranos who lived in secret conformity with the Jewish law, the Rabbis applied the Talmudic passage: "Although he has sinned, he must still be considered a Jew"; and Anusim, who took the first opportunity of going to a foreign country and openly professing Judaism, might act as witnesses in religious matters according to rabbinic law. A distinction was frequently made between Spanish and Portuguese Maranos in regard to marriage and divorce (Isaac b. Sheshet, *l.c.* Nos. 4, 11; Saadia ibn Danan, in Edelmann, "Ḥemdah Genuzah," pp. 14 *et seq.*; Joseph b. Leb, Responsa, i. 15; the responsa of Moses ben Ḥabib, Samuel de Medina, and many others).

In Spain.

The large numbers of the Maranos, as well as their wealth and influence, aroused the envy and hatred of the populace, whom the clergy incited against them as unbelieving Christians and hypocrites. The Neo-Christians were hated much more than the Jews, and were persecuted as bitterly as their former coreligionists had been. The first riot against them broke out at Toledo in 1449, and was accompanied with murder and pillage. Instigated by two canons, Juan Alfonso and Pedro Lopez Galvez, the mob plundered and burned the houses of Alonso Cota, a wealthy Marano and tax-farmer, and under the leadership of a workman they likewise attacked the residences of the wealthy Neo-Christians in the quarter De la Magdelena. The Maranos, under Juan de la Cibdad, opposed the mob, but were repulsed and, with their leader, were hanged by the feet. As an immediate consequence of this riot, the Maranos Lope and Juan Fernandez Cota, the brothers Juan, Pedro, and Diego Nuñez, Juan Lopez de Arroyo, Diego and Pedro Gonzalez, Juan Gonzalez de Illescas, and many others were deposed from office, in obedience to a new statute. Another attack was made upon the Neo-Christians of Toledo in July, 1467. The chief magistrate ("alcalde mayor") of the city was Alvar Gomez de Cibdad Real, who had been private secretary to King Henry IV., and who, if not himself a "converso," as is probable, was at least the protector of the Neo-Christians. He, together with the prominent Maranos Fernando and Alvaro de la Torre, wished to take revenge for an insult inflicted by the counts de Fuensalida, the leaders of the Christians, and to gain control of the city. A fierce conflict was the result. The houses of the Neo-Christians near the cathedral were fired by their opponents, and the conflagration spread so rapidly that 1,600 houses were consumed, including the beautiful palace of Diego Gomez. Many Christians and still more Maranos perished in the flames or were slain; and the brothers De la Torre were captured and hanged.

Riots at Cordova.

The example set by Toledo was imitated six years later by Cordova, in which city the Christians and the Maranos formed two hostile parties. On March 14, 1473, during a procession in honor of the dedication of a society which had been formed under the auspices of the fanatical Bishop D. Pedro, and from which all "conversos" were excluded, a little girl seems to have accidentally thrown some dirty water from the window of the house of one of the wealthiest Maranos, so that it splashed over an image of the Virgin. Thousands immediately joined in the fierce shout for revenge which was raised by a smith named Alonso Rodriguez; and the rapacious mob straightway fell upon the Maranos, denouncing them as heretics, killing them, and plundering and burning their houses. To stop the excesses, the highly respected D. Alonso Fernandez de Aguilar, whose wife was a member of the widely ramified Marano family of Pacheco, together with his brother D. Gonzalo Fernandez de Cordova ("el gran Capitan"), the glory of the Spanish army, and a troop of soldiers, hastened to protect the Neo-Christians. D. Alonso called upon the mob to retire, but instead of obeying, the smith insulted the count, who immediately felled him with his lance. The people, blinded by fanaticism, regarded their slain leader as a martyr. Incited by Alonso de Aguilar's enemy, the knight Diego de Aguayo, they seized weapons and again attacked the Maranos. Girls were outraged; and men, women, and children were pitilessly slain. The massacre and pillage lasted three days; those who escaped seeking refuge in the castle, whither their protectors also had to retire. It was then decreed that, in order to prevent the repetition of such excesses, no Marano should thenceforth live in Cordova or its vicinity, nor should one ever again hold public office.

Like the persecution of the Jews in 1391, the attack on the Maranos in 1473 spread to other cities. At Montoro, Bujalance, Adamur, La Rambla, Santaella, and elsewhere, they were killed, and their houses were plundered. At Jaen the populace was so bitter against them that the constable Miguel Lucas de Iranzo, who undertook to protect them, was himself killed in church by the ringleaders (March 21, 22). The Maranos were fiercely attacked by the populace in Andujar, Ubeda, Baeza, and Almodovar del Campo also. In Valladolid the populace was content with plundering the Neo-Christians, but the massacre was very fierce at Segovia (May 16, 1474). Here the attack, instigated by D. Juan Pacheco, himself a member of a Marano family, was terrible; corpses lay in heaps in all the streets and squares, and not a Neo-Christian would have escaped alive had not the alcalde Andreas de Cabrera interfered. At Carmona every Marano was killed.

Introduction of Inquisition.

The introduction of the Inquisition was bitterly opposed by the Maranos of Seville and other cities of Castile, and especially of Aragon, where they rendered considerable service to the king, and held high legal, financial, and military positions. As D. Miguel Lucas de Iranzo, constable of Castile, had been slain in the cathedral of Jaen, so the inquisitor Pedro Arbues was assassinated twelve years later in the cathedral of Saragossa, the former by Christians, the latter by Maranos. The murderers of De Iranzo went scot-free, while those of the inquisitor were punished most cruelly. Together with the introduction of the Inquisition an edict was issued that henceforth the Jews must live within their ghetto and be separated from the Maranos. Despite the law, however, the Jews remained in communication with their Neo-Christian brethren. "They sought ways and means to win them from Catholicism and bring them back to Judaism. They instructed the Maranos in the tenets and ceremonies of the Jewish religion; held meetings in which they taught them what they must believe and observe according to the Mosaic law; and enabled them to circumcise themselves and their children. They furnished them with prayer-books; explained the fast-days; read with them the history of their people and their Law; announced to them the coming of the Passover; procured unleavened bread for them for that festival, as well as kasher meat throughout the year; encouraged them to live in conformity with the law of Moses, and persuaded them that there was no law and no truth except the Jewish religion." All these charges were brought against the Jews in the edict issued by Ferdinand and Isabella, and formed the grounds for their banishment from the country. The decree of expulsion materially increased the number, already large, of those who purchased a further sojourn in their beloved home by accepting baptism.

In Portugal.

The Portuguese Maranos or Christãos Novos clung much more faithfully and steadfastly than their Spanish brethren to the religion of their fathers, bearing the most terrible tortures for the sake of their faith. The scholar Simon Mimi of Lisbon, who would not renounce Judaism even in prison, his wife, his sons-in-law, and other Maranos were enclosed in a wall built up to their necks, the prisoners being left for three days in this agonizing situation. As they would not yield the walls were torn down, after six of the victims had died, and Mimi was dragged through the city and slain. Two Maranos who served as wardens in the prison buried the body of the martyr in the Jewish cemetery at the risk of their lives (Abraham Saba', "Ẓeror ha-Mor," p. 105b; Grätz, "Gesch." viii. 398).

Massacre at Lisbon.

The Portuguese, being even more fanatical than the Spaniards, hated the Maranos much more than the Jews, considering them neither Christians nor Jews, but atheists and heretics. Many a Portuguese preferred death to being treated by a Marano physician. The hatred which was felt for the Maranos, and which had long smoldered, broke out at Lisbon. On April 17, 1506, several Maranos were discovered who had in their possession "some lambs and poultry prepared according to Jewish custom; also unleavened bread and bitter herbs according to the regulations for the Passover, which festival they celebrated far into the night." Several of them were seized, but were released after a few days. The populace, which had expected to see them punished, swore vengeance. On the same day on which the Maranos were liberated, the Dominicans displayed in a side-chapel of their church, where several Neo-Christians were present, a crucifix and a reliquary in glass from which a peculiar light issued. A Neo-Christian, who was so incautious as to explain this ostensible miracle as being due to natural causes, was dragged from the church and was killed by an infuriated woman. A Dominican roused the populace still more; and two others, crucifix in hand, went through the streets of the city, crying "Heresy!" and calling upon the people to destroy the Maranos. All Neo-Christians found in the streets were killed; and a terrible massacre ensued. More than 500 Maranos were slain and burned on the first day; and the scenes of murder were even more atrocious on the day following. The innocent victims of popular fury, young and old, living and dead, were dragged from their houses and thrown upon the pyre. Even Christians who in any way resembled Maranos were killed. Among the last victims, and the most hated of all, was the tax-farmer João Rodrigo Mascarenhas, one of the wealthiest and most distinguished Maranos of Lisbon; his house was entirely demolished. In this manner at least 2,000 Maranos perished within forty-eight hours. King Manuel severely punished the inhabitants of the city. The ringleaders were either hanged or quartered, and the Dominicans who had occasioned the riot were garroted and burned. All persons convicted of murder or pillage suffered corporal punishment, and their property was confiscated, while religious freedom was granted to all Maranos for twenty years.

The Neo-Christians of Portugal, who were distinguished for their knowledge, their commerce, and their banking enterprises, but were bitterly hated, despised, and reviled by the Christians, were led to entertain better hopes for the future by the appearance of a foreign Jew, David Re'ubeni. Not only was this Jew invited by King John to visit Portugal; but, as appears from a letter (Oct. 10, 1528) of D. Martin de Salinas to the infante D. Fernando, brother of the emperor Charles, he also received permission "to preach the law of Moses" ("Boletin Acad. Hist." xlix. 204). The Maranos regarded Re'ubeni as their savior and Messiah. The Neo-Christians of Spain also heard the glad news; and some of them left home to seek him. The rejoicing lasted for some time; the emperor Charles even addressed several letters on the matter to his royal brother-in-law. In 1528, while Re'ubeni was still in Portugal, some Spanish Maranos fled to Campo Mayor and forcibly freed from the Inquisition a woman imprisoned at Badajoz. The rumor spread at once that the Maranos of the entire kingdom had united to make common cause. This increased the hatred of the populace, and the Neo-Christians were attacked in Gouvea, Alemtejo, Olivença, Santarem, and other places, while in the Azores and the island of Madeira they were even massacred. These excesses led the king to believe that the Inquisition might be the most effective means of allaying the popular fury.

The Portuguese Maranos waged a long and bitter war against the introduction of the tribunal, and spent with some satisfactory results immense sums to win over to their cause the Curia and the most influential cardinals. The sacrifices made by both the Spanish and the Portuguese Neo-Christians were indeed astonishing. The same Maranos who from Toledo had instigated the riot of the communes in 1515, Alfonso Gutierrez, Garcia Alvarez "el Rico" (the wealthy), and the Zapatas, offered through their representative 80,000 gold crowns to Emperor Charles V. if he would mitigate the harshness of the Inquisition ("R. E. J." xxxvii. 270 *et seq.*). All these sacrifices, however, especially those made by the Mendes of Lisbon and Flanders, were powerless to prevent or retard the introduction of the Holy Office into Portugal. The Maranos were delivered over to the popular fury and to the heartless servants of the Inquisition. They suffered unspeakably. At Trancoso and Lamego, where many wealthy Maranos were living, at Miranda, Viseu, Guarda, Braga, and elsewhere they were robbed and killed. At Covilhão the people planned to massacre all the Neo-Christians on one day; and to achieve this the more easily, the prelates petitioned the Cortes in 1562 that the Maranos be required to wear special badges, and that the Jews in the cities and villages be ordered to live in ghettos as before.

Dispersion.

The Maranos, who were constantly threatened and persecuted by the Inquisition, tried in every way to leave the country, either in bands or as individual refugees. Many of them escaped to Italy, attracted thither by the climate, which resembled that of the Iberian Peninsula, and by its kindred language. They settled at Ferrara, and Duke Ercole I. d'Este granted them privileges, which were confirmed by his son, Alfonso I., to twenty-one Spanish Maranos, physicians, merchants, and others (*ib.* xv. 113 *et seq.*).

Spanish and Portuguese Maranos settled also at Florence; and Neo-Christians contributed to make Leghorn a leading seaport. They received privileges at Venice, where they were protected from the persecutions of the Inquisition. At Milan they materially advanced the interests of the city by their industry and commerce, although João de la Foya captured and robbed large numbers of them in that region. At Bologna, Pisa, Naples, Reggio, and many other Italian cities they freely exercised their religion, and were soon so numerous that Fernando de Goes Loureiro, an abbot from Oporto, filled an entire book with the names of the Maranos who had drawn large sums from Portugal and had openly avowed Judaism in Italy. In Piedmont Duke Emanuel Philibert of Savoy welcomed the Maranos from Coimbra, Pablo Hernando, Ruy Lopez, and Rodriguez, together with their families, and granted them commercial and industrial privileges, as well as the free exercise of their religion. Rome was full of Maranos. Pope Paul III. received them at Ancona for commercial reasons, and granted complete liberty "to all persons from Portugal and Algarve, even if belonging to the class of Neo-Christians." Three thousand Portuguese Jews and Maranos were living at Ancona in 1553. Two years later the fanatical Pope Paul IV. issued orders to have all the Maranos thrown into the prisons of the Inquisition which he had instituted. Sixty of them, who acknowledged the Catholic faith as penitents, were transported to the island of Malta; twenty-four, who adhered to Judaism, were publicly burned (May, 1556); and those who escaped from the Inquisition were received at Pesaro by Duke Guido Ubaldo of Urbino. As Guido was disappointed, however, in his hope of seeing all the Jews and Maranos of Turkey select Pesaro as a commercial center, he expelled (July 9, 1558) the Neo-Christians from Pesaro and other districts (*ib.* xvi. 61 *et seq.*). Many Maranos were attracted to Ragusa, formerly a considerable seaport. In May, 1544, a ship landed there filled exclusively with Portuguese refugees, as Balthasar de Faria reported to King John.

In France.

At this same period the Maranos were seeking refuge beyond the Pyrenees, settling at St. Jean de Luz, Tarbes, Bayonne, Bordeaux, Marseilles, and Montpellier. They lived apparently as Christians; were married by Catholic priests; had their children baptized, and publicly pretended to be Catholics. In secret, however, they circumcised their children, kept the Sabbath and feast-days as far as they could, and prayed together. King Henry III. confirmed the privileges granted them by Henry II., and protected them against such slanders and accusations as those which a certain Ponteil brought against them. Spanish and Portuguese Maranos petitioned Henry IV. to permit them to emigrate to France, saying that should he do so, a large number of their fellow sufferers, "good men all of them," would choose France as their home; but many Neo-Christians who entered French territory were obliged to leave within a short time. Under Louis XIII. the Maranos of Bayonne were assigned to the suburb of St. Esprit. At St. Esprit, as well as at Peyrehorade, Bidache, Orthez, Biarritz, and St. Jean de Luz, they gradually avowed Judaism openly. In 1640 several hundred Maranos, considered to be Jews, were living at St. Jean de Luz; and at St. Esprit there was a synagogue as early as 1660.

In Flanders.

Next to Turkey the Maranos turned chiefly to Flanders, attracted by its flourishing cities, such as Antwerp, where they settled at an early date, and Brussels. Before the end of the sixteenth century Portuguese Maranos, under the leadership of Jacob Tirado, arrived at Amsterdam. So many others followed these that the city was called a new Jerusalem, while hundreds of Neo-Christian families settled at Rotterdam also. Maranos from Flanders, and others direct from the Pyrenean Peninsula, went under the guise of Catholics to Hamburg and Altona about 1580, where they established commercial relations with their former homes. Christian IV. of Denmark invited some Neo-Christian families to settle at Glückstadt about 1626, granting certain privileges to them and also to the Maranos who came to Emden about 1649.

Large numbers of Maranos, however, remained in Spain and Portugal, despite the extensive emigration and the fate of countless victims of the Inquisition. The Neo-Christians of Portugal breathed more freely when Philip III. came to the throne and by the law of April 4, 1601, granted them the privilege of unrestricted sale of their real estate as well as free departure from the country for themselves, their families, and their property. Many, availing themselves of this permission, followed their coreligionists to Africa and Turkey. After a few years, however, the privilege was revoked, and the Inquisition resumed its activity. But the Portuguese who were not blinded by fanaticism perceived that no forcible measures could induce the Maranos to give up the religion of their fathers.

Individual Neo-Christians, as Antonio Fernandez Carvajal and several from Spain, Hamburg, and Amsterdam, went to London, whence their families spread to Brazil, where Maranos had settled at an early date, and to other countries of America. The migrations to Constantinople and Salonica, where refugees had settled after the expulsion from Spain, as well as to Servia, to Rumania and Bulgaria, and even to Vienna and Temesvar, continued down to the middle of the eighteenth century.

Whether there are still Maranos in Spain or not, this much is certain, that there are many persons in Barcelona, Saragossa, Madrid, Cordova, Toledo, and Burgos who, conscious of their Jewish descent, are well disposed toward the Jews. In Portugal there is a community of Maranos at Covilhã. See INQUISITION.

MARBE HASKALAH. See SOCIETY FOR THE PROMOTION OF CULTURE AMONG THE JEWS OF RUSSIA.

MARBLE (שיש): A stone composed mainly of calcium carbonate or of calcium and magnesium carbonates. It is mentioned in the Old Testament in three very late passages only. According to I Chron. xxix. 2, David prepared, among other materials, white "marble stones" for the building of the Temple. The account of the building in the Book of Kings does not mention the use of marble. In the Song of Solomon (v. 15) the author compares the legs of the bridegroom to marble pillars in golden sockets. Finally, Esther i. 6 speaks of marble columns and of a pavement of white and colored marble in the palace of the Persian king. In the last-cited passage it is not wholly certain if the text is intact in the versions; consequently there is doubt whether marble is really meant. In the other two passages also the correctness of the text has been doubted (see "Encyc. Bibl." *s.v.* "Marble").

Moreover, the fact that all the old authorities, especially the accounts of the building of the Temple, preserve complete silence on the subject shows that the Hebrews in olden times were not acquainted with the use of marble as a building-stone. Its employment for building purposes seems to have been very limited even among the Assyrians.

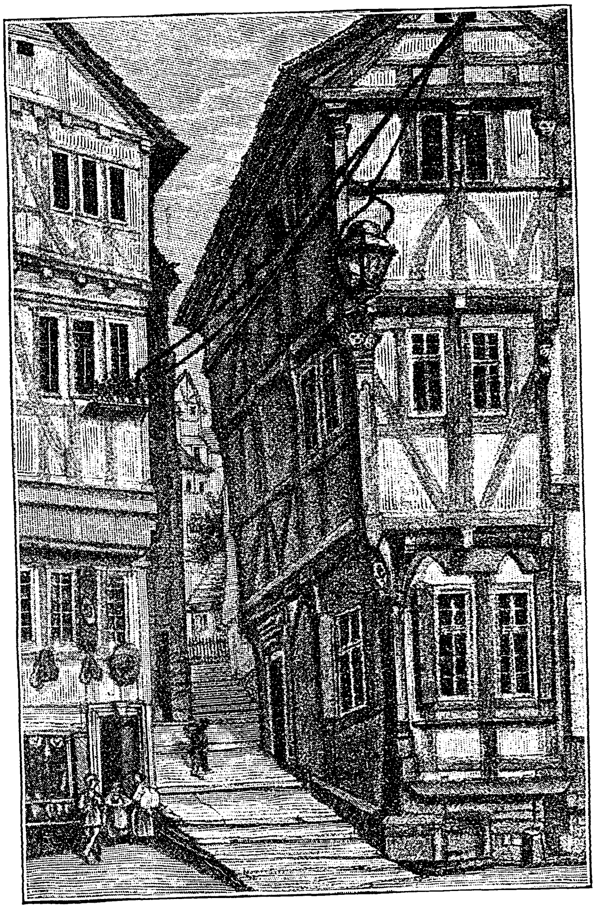
MARBURG: 1. Town in the Prussian province of Hesse-Nassau. Jews are first mentioned as living in Marburg in a document dated May 13, 1317, which indicates that they were then organized as a community and possessed a synagogue; also that they dwelt in a special quarter of the town. From a document of 1452 it appears that the synagogue was demolished in that year, and that the Jewish cemetery passed into Christian hands; hence the Jews must have been expelled from Marburg about that time. They gradually returned to the city; and in 1532 Landgrave Philipp revoked the decree of expulsion issued by him in 1524, and permitted the Jews provisionally to remain in his territory for a period of six years. Two Jews, named respectively Liebmann and Gottschalk, availed themselves of this permission in 1536.

As the Hessian cities repeatedly petitioned against the admission of Jews, the number of the latter remained very small: in 1744 there were only six Jewish families at Marburg; in 1776, eight. No one was permitted to harbor foreign Jews, except at the times of the fairs, on pain of being fined and of losing the privilege of protection. The Marburg community increased somewhat with the granting of freedom of residence; but even as late as 1902 it numbered only about 300 members in a total population of 16,668. It possesses a handsome synagogue (built in 1897), a parochial and a religious school, and a home for pupils and apprentices (opened in 1901) with seventy inmates.

Since 1823 Marburg has been the seat of the board of management of the union including the Jewish communities in the districts of Marburg, Kirchhayn, Frankenberg, and Ziegenhain. Marburg is the seat also of a district rabbinate, which includes not only the former districts, but also those of Biedenkopf and Wetzlar. The district rabbis have been: Moses Solomon Gosen, 1824–62; Liebmann Gersfeld, 1862–76; and Dr. Leo Munk, the present (1904) incumbent, appointed in 1876. There are a number of educational and philanthropic societies. Hermann Cohen has been for a number of years professor of philosophy at the University of Marburg.

D. L. MU.

2. Austrian town, the second in the duchy of Styria. It has a population of 24,501, including about 100 Jews. Jews first settled at Marburg toward the end of the thirteenth century; gravestones of that period are still found there. According to the records they had a synagogue in their ghetto in 1277, as well as a school and a bath-house. The Jews of Marburg were respected merchants; they owned houses, fields, mills, and vineyards, and lived peaceably with their neighbors. They were not affected by the great persecutions of 1336 and 1338, and many Jews persecuted elsewhere found refuge at Marburg on payment of an annual tax of 40 gulden. In the old tax-records of Marburg the Jews are described as quiet and wealthy merchants who paid their taxes promptly. The Jews who were expelled from the territory of the neighboring city of Cilli in 1404 were received at Marburg, to the benefit of its commerce and industry. The decree of Frederick III. (1410–1493) relating to the importation of Hungarian wines was especially favorable to the Jewish wine-merchants. About this time R. Israel ISSERLEIN, one of the foremost rabbis of the fifteenth century, and a native of Marburg, officiated there. Up to the middle of the fifteenth century the Jews of Marburg were generally respected; the Jew Elijah was one of its most prominent citizens, and Gerl, Jacob, and Aram Rorer were in the employ of noblemen as their treasurers. Mention is made also of the Jews Cham, who owned six, and Maul, who owned three, houses in Marburg. The wealthy money-lender Abraham b. Isaac advanced the money for part of the expenses of the Diet and contributed large sums for the equipment of the army. The Jews Hirsel, Süsskind, and Aaron b. Söldmann are mentioned among those who gave money to the Christian Church.



The "Judengasse" of Marburg in Hesse.
(From an old print by Joh. Aug. Koch.)

Marburg is one of the four cities of Styria the Jews of which had a special judge ("Judenrichter"), whose position was regarded as "very lucrative"; about 1440 it was held by the governor Sigmund von Rogendorf himself. There were special "Judenmeister" for internal Jewish affairs. Notes of debts held by Jews against Christians had to be indorsed by the city judge. In 1477, when the Jews of Marburg were building a new synagogue, David b. Aram, who had removed a short time before to Radkersburg, refused to pay the contribution of twelve gulden which the community levied upon him. The result was a tedious lawsuit, which Frederick III. finally settled by deciding that the defendant's assessment should be remitted, and that he should be neither excommunicated nor subjected to coercion of any other kind. The Jews of the city continued to enjoy the protection of the authorities and the good-will of their Christian fellow citizens until 1496, when the emperor Maximilian decreed the expulsion of all Jews from Styria. Those in Marburg, apparently, were permitted to remain until they had settled their financial affairs, for as late as 1499 some were still living there. Their property was purchased by Christian families, the synagogue being taken by Bernardin Drukher, who transformed it into a Christian church. After Drukher's death the records contained in the building were destroyed by the magistrate of the city, and the church was turned into a storehouse; in 1659 it was again converted into a church; in 1785 it became a storehouse again; it is now (1904) in use as a tenement. The ritual bath-house was destroyed during the last century. After the expulsion Jews were not permitted even to pass through Marburg except on the payment of a poll-tax. In 1783 they were allowed to attend some of the fairs in Styria, but not at Marburg. In 1811 three Jews were baptized in that city, but none settled there again until 1867, when the merchant Jacob Schlesinger was admitted. Some of the Jews now resident there are government and district officials.

MARC, CHARLES CHRÉTIEN HENRI: French physician; born in Amsterdam Nov. 4, 1771; died in Paris Jan. 12, 1841. He took the degree of M.D. at Erlangen in 1792, and practised at Vienna, Bamberg, and in Bohemia. In 1795 he went to Paris, where with Fourcroy, Cabanis, Desgenelles, and others, he founded the Société Médicale d'Emulation. For several years he had a hard struggle, but by 1811 his position had become secure; his books won him fame, and he became a member of the Board of Health (1816) and of the Academy of Medicine (soon after its foundation, in 1820). In 1829, with Esquirol, Parent-Duchâtelet, Orfila, and others, he founded the "Annales d'Hygiène Publique et de Médecine Légale," to which he wrote the introduction. After the Revolution of July, 1830, he became first physician to Louis Philippe. He embraced Christianity.

Marc published: "Observations Générales sur les Poisons" (1795, translated into several languages); "Sur les Hémorrhoïdes Fermées" (Paris, 1804, translated from the German of Hildenbrand); "Manuel d'Autopsie Cadavérique Médico-Légale" (1808, translated from Roze); "Recherches sur l'Emploi du Sulfate de Fer dans le Traitement des Fièvres Intermittentes" (*ib.* 1810); "La Vaccine Soumise aux Simples Lumières de la Raison" (*ib.* 1810 and 1836); "De la Folie Considérée dans Ses Rapports avec les Questions Médico-Judiciaires" (2 vols., *ib.* 1840; one of the first works to show the connection between crime and insanity); etc. He contributed many articles to the "Bibliothèque Médicale," the "Dictionnaire de Médecine," the "Dictionnaire des Sciences Médicales," and to other journals.

MARC-MOSSÉ, JOSEPH: French poet and author; born in Carpentras about 1780; died in Paris Feb. 21, 1825. His name appears to have been originally "Moses"; he was known also under the pseudonyms "L'Ami" and "Lejoyeux de Saint Acre." At the age of six Joseph wrote verses, and at seven knew by heart the finer scenes of Racine's "Athalie," and had versified passages from Fénelon's "Télémaque." In 1787 he was kidnaped by the Catholic clergy, baptized, and shut up in a monastery, whence for five years his friends, notwithstanding great efforts, found it impossible to extricate him. In 1792, however, after the outbreak of the Revolution, he was restored to his family, transformed into a little "abbé galant"—diseased in body, depraved in taste, corrupt in morals, and given over to laziness and sensuality. He presently went to Paris, where he showed himself a born courtier and frequenter of the society of the great, and where he was much sought after and admired. The irregularities of his life gradually brought on consumption, and, rather than endure the trials that lay before him, he committed suicide, in company with his English wife.

Marc-Mossé wrote: "Chronique de Paris" (1819); "Archives des Lettres, des Sciences et des Arts" (1820–21); "Eucharis, ou les Sensations de l'Amour" (1824); "La Caninéide" (epic-satiric poem); "Le Printemps" (idyl read by the author at the Paris Athénée in 1810); "Odes" (to the refugees from Spain, to war, to Napoleon's marriage); "La France Consolée," etc.; a critical examination of Lamennais' "Essai sur l'Indifférence en Matière de Religion" (in defense of the Israelites). He wrote also many amatory poems, studies, and treatises upon the art of pleasing, the art of preserving and increasing beauty, the art of making oneself loved by women, etc. (1808–11), and he left a large number of works in manuscript.

MARCELLO, BENEDETTO: Italian musician; born at Venice 1686; died there 1739. He is particularly celebrated for his settings to the Psalms, fifty of which, under the title of "Estro Poetico-Armonico, Parafrasi Sopra li Salmi," were published at Venice between 1724 and 1727, in eight volumes. These compositions, in the cantata form, for from one to four voices, with accompaniments for organ, violoncello, two violas, or other obligato strings, are noble and dignified; and their grandeur and beauty have earned them republication in numerous editions. Important for the study of Hebrew melody is the circumstance that for the themes of eleven of the earlier Psalms, Marcello utilized Jewish airs, taking six from the German and five from the Spanish tradition. Some historians of music, led by Forkel, have fallen into the error of assuming that Marcello's selected melodies reproduce the ancient Temple intonations for the Psalms. The list of Hebrew originals, given by Marcello himself, should, however, have guarded against this. The themes utilized by Marcello are: (1) to Ps. ix., a chant of the Spanish Jews for Ps. clxiv.; (2) to Ps. x., a German drone for Ps. cxiv.; (3) to Ps. xiv., a "Hallel" air used in the Spanish ritual; (4) to Ps. xv., a German melody for "Ma'oz Ẓur"; (5) to Ps. xvi., a Spanish chant for Ps. xcvi. and xcviii. (comp. De Sola and Aguilar, "Ancient Melodies," No. 13; Cohen and Davis, "Voice of Prayer and Praise," No. 16); (6) to Ps. xvii., a Spanish hymn by Solomon ben Mazzal Ṭob, No. 233 in Soncino's collection (Constantinople, 1545), for the Sabbath when a bridegroom attends the synagogue; (7) to Ps. xvii., a German melody for the hymn "Ha-Mabdil"; (8) to Ps. xviii., a Spanish melody to Ibn Gabirol's hymn "Sha'ar Asher Nisgar" (Dukes, "Ehrensäulen," p. 76; F. H. Cowen has employed the same melody for the "Dance of the Reapers" in his oratorio "Ruth," composed for the Worcester Musical Festival of 1887); (9) to Ps. xix., a German melody for the Sabbath evening hymn "Lekah Dodi"; (10) to Ps. xxi., a German melody for Ibn Gabirol's hymn "Shofet Kol ha-Areẓ" (comp. Baer, "Ba'al Tefillah," Frankfort-on-the-Main, No. 1426); (11) to Ps. xxii., a German air, in the major mode, for the "Ḳaddish" at the conclusion of the service on the eve of the New-Year.

MARCUS AURELIUS ANTONINUS. See Antoninus.

MARCUS, BRENTGEN: First Jewish court singer in Germany; flourished toward the end of the seventeenth century. She lived with her father, Isaac Marcus, in the town of Wesel in Brandenburg, where, in 1690, Frederick of Brandenburg, afterward King Frederick I. of Prussia, heard her sing. Admiring her voice, and desiring to secure for her a musical education, he sent her and her father to Berlin. On July 16 of that year he wrote to the Prince of Anhalt and the council notifying them of his discovery and his wishes concerning Brentgen, and commended her to the attention of his wife, the princess Sophie Charlotte, who, however, was not at Berlin when the singer arrived. On July 25 the Prince of Anhalt wrote to the crown prince that he and others had heard and admired her unusually fine voice, and that provision would be made for her in accordance with his wishes.

MARCUS, LEWI (LEWIN): German lawyer; born Oct. 15, 1809, at Rhena, Mecklenburg; died Oct. 7, 1881, at Manchester, England. On account of his indefatigable exertions in behalf of his coreligionists he became known as the "Gabriel Riesser of Mecklenburg." He was the first Jewish deputy of the Mecklenburg Diet, of which he became vice-president. He was made honorary citizen of the city of Schwerin, and for seventeen years was acting president of its municipal council (Kayserling, "Gedenkblätter," Leipsic, 1892), and president of the Jewish community of Schwerin.

S. I. War.

MARCUS, LOUIS. See Markus, Ludwig.

MARCUSE, ADOLF: German astronomer; born Nov. 17, 1860, in Magdeburg; educated at the universities of Strasburg and Berlin (Ph.D. 1884). Before his graduation he took part, as assistant, in the German expedition (1882) to South Carolina to observe the transit of Venus. In 1885 he studied at the Russian observatory at Pulkova, near St. Petersburg; in 1886 he went to Santiago, Chile, as astronomer-in-chief to the national observatory, remaining there for two years; while in South America he visited the Argentine Republic, Brazil, and Peru. On his return to Germany he received an appointment at the royal observatory in Berlin, where in behalf of the Centralbureau der Internationaal Erdmessung he was engaged, until 1891, in making continuous observations of the periodical changes of latitude. In April, 1891, he was commissioned by the same society to conduct the astronomical-geodetic expedition to the Hawaiian Islands; as a result of his observations the investigation of the changes of geographical latitude was considerably advanced.

After his return from the South Sea Islands and from a journey to Samoa, Australia, and Ceylon, he constructed a large photographic zenith-telescope in Berlin for the purpose of improving the photographic method of determining the altitude of the pole, and of rendering it available for scientific purposes. His lectures at the Royal University of Berlin are chiefly on the determination of geographical and nautical locations by means of astronomy, with practical demonstrations at the observatory. He improved also the photographic method of determining locality by constructing a photographic instrument for purposes of travel. Since 1903 he has been one of the editors of the "Geographisches Jahrbuch" (Gotha).

Marcuse is a member of the international astronomical and of the geographical societies of Berlin, of the Free Photographic Association, and of the German society for the study of aerial navigation. Of his writings the following may be mentioned: "Die Physische Beschaffenheit der Cometen" (Berlin, 1884); "Beobachtungsergebnisse der Königlichen Sternwarte" (part 4, *ib.* 1888); "Die Hawaiischen Inseln" (*ib.* 1894); "Die Atmosphärische Luft" (*ib.* 1896); "Die Photographische Bestimmungsweise der Polhöhe" (*ib.* 1897); "Die Fehler der Sinneswahrnehmungen bei Präcisionsmessungen" (*ib.* 1897); "Beiträge zur Nautischen Astronomie" (*ib.* 1899); "Anwendung Photographischer Methoden zur Geographischen Ortsbestimmung" (*ib.* 1899); "Die Neuere Entwickelung der Geographischen Ortsbestimmung" (*ib.* 1901); "Physik der Erde" (*ib.* 1902); "Bearbeitung der Berliner Polhöhen 1889–1890 im Auftrage des Centralvereins der Internationalen Erdmessung" (*ib.* 1902); "Handbuch der Geographischen Ortsbestimmung" (Brunswick, 1904).

S.

MARCZALI, HEINRICH: Hungarian historian; born at Marczali April 3, 1856; educated at Raab, Papa, Budapest, Berlin, and Paris. In 1878 he became professor at the gymnasium of his native town. He became a member of the Hungarian Academy in 1893, and two years later he was appointed professor of Hungarian history at the University of Budapest. In addition to numerous contributions to specialist journals, he has written the following books: "A Földrajzi Viszonyok Befolyása Magyarország Történetére" (Budapest, 1874); "A Magyar Történet Kútföi" (*ib.* 1880; German transl. "Quellen der Ungarischen Gesch." Berlin, 1882); "Regesták a Külföldi Levéltarakból" (Budapest, 1882); "Ujkor Története" (*ib.* 1883–86); "Magyarorszóg Története II. Jozsef Korában" (*ib.* 1882-88); "Maria Theresia" (*ib.* 1891); "A Legujabb Kor Története" (*ib.* 1892); "Az Arpádok és Dalmáczia" (French transl. under the title "Les Relations de la Dalmatie du XI. au XIII. Siècle," Paris, 1898); the first, second, and eighth volumes of the great history of Hungary published by Szilágyi.

S. L. V.

MARETZEK, MAX: Austrian impresario; born at Brünn, Moravia, June 28, 1821; died at Pleasant Plains, New York, May 14, 1897. He was a pupil of Seyfried in Vienna, and also attended the university in that city. Several years later he became connected with Italian opera in London. In 1848 he went to New York, where he began his career as leader of the orchestra at the Italian opera. From 1849 to 1878 he was organizer and manager of grand opera at the Astor Place Opera House, the Academy of Music, and Pike's Opera House (now the Grand Opera House). He occasionally made professional tours to other cities of the United

States, and to Mexico and Cuba. In 1849 he brought to America the celebrated singer Mlle. Bertucca, who afterward became his wife.

In Oct., 1854, Maretzek leased the Academy of Music, and in the following year had a brilliant season, his company including La Grange, Brignoli, Vestvali, and Badiali. "Semiramide" and "Il Trovatore" were produced for the first time in America during that season. "Rigoletto" was brought out in 1855, and "Traviata" and "William Tell" in 1856. In 1858 Maretzek engaged Piccolomini, and on Nov. 24 of that year he introduced Adelina Patti. He controlled the Academy from 1864 until it burned down in 1866. Among his singers of that period were Gazzaniga, Clara Louise Kellogg, Ronconi, Adelaide Phillips, Mazzolini, and Succi. On Nov. 25, 1863, he conducted the first performance of "Faust" in America, the cast including Kellogg, Sulzer, Mazzolini, and Biacchi.

Upon the restoration of the Academy of Music in 1867, opera was given there under his direction, with Kellogg, Mazzolini, Ronconi, Minnie Hauck, and Antonicci in the cast. In the following year he leased Pike's Opera House, but returned to the Academy in 1869, where he brought out the French tenor Lefranc. It was here also that Lucca made her first appearance under Maretzek's management in 1872.

The list of operas introduced by Maretzek to the New York public, in addition to those already mentioned, includes the following: "Forza del Destino"; "Ione"; "Carneval de Venice"; "Don Sebastiano"; "Saffo"; Peri's "Judith"; "Fra Diavolo"; "Le Prophète"; "L'Africaine"; "Aroldo"; "I Masnadier"; "Medea"; "Crispino e la Comare"; "Romeo et Juliette"; "L'Etoile du Nord"; "Luise Müller"; "I Due Foscari"; "Attila"; "Roberto"; "Anna Bolena"; "Policlito"; "Maria di Rohan"; "Linda di Chamounix"; "La Favorita"; "Don Pasquale"; "Macbeth"; "Marino Faliero"; "Belisario"; "Betty"; "I Lombardi." During the latter part of his life Maretzek enjoyed great popularity as a teacher of singing in New York. On Oct. 12, 1889, his golden jubilee was celebrated, Mme. Lehmann, Herr Kalisch, Signor Perotti, Mme. Fursch-Madi, Miss Anna Juch, Herr Alvary, Herr Fischer, the Daly and Palmer companies, as well as several other artists, participating. Maretzek composed the operas "Hamlet" (Brünn, 1843) and "Sleepy Hollow" (Academy of Music, New York, 1879). He composed also orchestral and chamber music, pianoforte pieces, songs, etc., and wrote "Crotchets and Quavers," New York, 1857.

MARGALIOT, MARGALIOTH. See MARGOLIOTH.

MARGALITA, AARON: Polish convert to Christianity; born 1663 at Zolkiev. He was a learned rabbi, and traveled as a maggid in Poland and Germany, preaching in the synagogues. In Holland he remained for seven years teaching rabbinics at Leyden. He thus became intimate with Trigland, through whose influence he was converted to the Reformed Church, as Margalita himself relates in his work "Oblatio Aaronis seu Tractatus de Passionibus Christi," Frankfort-on-the-Oder, 1706.

Disappointed in his hope of receiving support which would enable him to study for an academic career, he left Holland and went to Berlin. Here he denounced the Talmudic Haggadah as containing blasphemies against the Christian religion, whereupon King Frederick I. of Prussia ordered that the copies of a new edition of the Midrash Rabbah, which had been published at Frankfort-on-the-Oder in 1705, should be placed under seal until the Christian theological faculty of that city should render an opinion upon the work. This opinion being favorable, the order of suspension was revoked and the sale of the book was permitted.

Through the protection of King Frederick, Margalita was appointed professor of rabbinic Hebrew at the University of Frankfort-on-the-Oder. Here he remained but a short time, and it is said that in 1712 he became a convert to the Lutheran Church at Hamburg. Jöcher says in his lexicon that for having expressed a desire to return to Judaism, Margalita was imprisoned at Copenhagen, where he died a few years later.

D. S. MAN.

MARGARITA, ANTONIUS: Convert to Christianity in the first half of the sixteenth century; born about 1500 at Ratisbon (Regensburg), where his father, Jacob Margolioth, was rabbi; died at Vienna; baptized in 1522 at Wasserburg, Bavaria. He was teacher of Hebrew successively at Augsburg, Meissen, Zell, Leipsic, and (from 1537 till his death) at the University of Vienna.

He wrote "Der Gantz Jüdisch Glaub mit Sampt ainer Gründlichen und Wahrhafften Anzaygunge, Aller Satzungen, Ceremonien, Gebetten, Haymliche und Offentliche Gebreuch, Deren sich dye Juden Halten, Durch das Gantz Jar, Mit Schönen und Gegründten Argumenten Wyder Jren Glauben," Augsburg, 1530; Frankfort-on-the-Main, 1544, 1561, 1689; Leipsic, 1705, 1713. The author ridicules Jewish ceremonies, accuses the Jews of usury and of sentiments hostile to Christians and Christianity, and argues against their Messianic hopes. He denounces the 'ALENU prayer as anti-Christian in tendency. Declaiming against the usury and idleness of the Jews, he appeals to the magistrates to remedy the evil and to force the Jews to perform manual labor. He charges the Jewish physicians with ignorance and greediness, and asserts that, despite their minuteness in ritual, the Jews are neither pious nor charitable, and that, notwithstanding their apparent aversion to proselytism, they are eager to gain adherents to their faith.

This libelous book had a great influence upon Luther, who made use of it in writing his "Von den Juden und Ihren Lügen." It was praised by Hoornbeck, B. Lutherus, and Joseph Müller; but Wagenseil speaks of it less favorably. When it appeared, JOSEL OF ROSHEIM, being at that time at Augsburg, made complaint to Emperor Charles V., who appointed a committee to examine the denunciations contained in the book. The author was imprisoned and later expelled from Augsburg.

MARGOLIOTH PEDIGREE.

MARGOLIOTH (מרגליות; the name occurs also as **Margaliot, Margolis, Margulies, Margolouth**, and in various other forms): Polish family of Talmudic scholars that traces its descent from Rashi, on the one side, and from the families of Shor and Samuel Edels on the other. The first Margolioth known was **Samuel**, dayyan at Posen about 1550; one of his sons, **Moses Mordecai**, was rabbi at Cracow. The daughter of R. Moses Mordecai married a relative, **Mendel Margolioth**, rabbi at Przemysl (d. April 2, 1652), and bore him eight sons, all of whom were distinguished Talmudists. It is not certain from which one of Mendel Margolioth's sons **Judah of Potok** (d. 1672) was descended. From **Mordecai b. Menahem Monis**, the great-great-grandson of Judah of Potok, descended a line of scholars. Mordecai himself was a cabalist and had Talmudic controversies with the author of "Noda' bi-Yehudah," among others. The most renowned of this branch of the Margolioth family was **Ephraim Solomon** of Brody (d. there Aug. 5, 1828). Ephraim Solomon was not a rabbi, but his numerous works were accepted in the rabbinical world as authoritative. There are numerous scholars bearing the name of Margolioth whose relationship to the family, though probable, can not be determined.

J. A. S. W.

Abi Ezra Selig Margolioth: German Talmudist; flourished in the first half of the eighteenth century; born at Kalisch, where he was subsequently preacher. He preached also at Prague for a short time. He then went to HALBERSTADT, where he was prebendary of the "Klaus" founded by Berent Lehmann in 1703. According to Steinschneider, he then went with his wife to Palestine, Lehmann furnishing him with the necessary funds. Margolioth was the author of: "Kesef Nibḥar," commentary on the Pentateuch (Amsterdam, 1712); "Ḥibbure Liḳḳuṭim," novellæ and responsa (Venice, 1715).

D. A. PE.

Abraham Elijah b. Nathan Margolioth: Rabbi of Nachod, Bohemia, where he was a "moreh ẓedeḳ" (acting rabbi) at the beginning of the eighteenth century. With Eliezer b. Pethahiah, ḥazzan of Worms, he wrote "Tefillah le-Kibbuẓ Galyotenu," published at Amsterdam in 1705 (Benjacob, "Oẓar ha-Sefarim," p. 661; Steinschneider, "Cat. Bodl." No. 3347; Wolf, "Bibl. Hebr." iii. 21).

D. P. WI.

Alexander Margolioth: Polish rabbi; died in Satanov, Podolia, Jan. 3, 1802. He succeeded his father, Ẓebi Hirsch, as rabbi of Zbaraz, Galicia, and was there in 1774. Later he became rabbi of Satanov, where he remained until his death. He is spoken of very highly by contemporary rabbis like R. Ezekiel Landau and R. Aryeh Löb of Stry (author of "Ḳeẓot ha-Ḥoshen"). A collection of his responsa from 1776 to 1791 was published more than half a century after his death, under the title "Teshubot ha-RAM." (Warsaw, 1859). He was the teacher of his nephew Ephraim Solomon Margolioth of Brody.

Asher Solomon Margolioth. See JUDAH LÖB BEN ASHER MARGOLIOTH.

Ephraim Zalman Margolioth: Galician rabbi; born in Brody Dec. 19, 1762; died Aug. 24, 1828. He received his Talmudic education at different yeshibot, in which he distinguished himself for the acuteness of his intellect and for his astonishing memory. His correspondence with Ezekiel Landau and other leading Talmudists soon gained for him a high reputation. He established a banking-house which proved so successful that within a short time he became quite wealthy. In 1785 he published his responsa entitled "Bet Ḥadash ha-Ḥadashot"; and in the following year the rabbis of Brody elected him one of their number. Being of independent means, he opened in his house a yeshibah of which he was the head; and several of his pupils became eminent rabbis.

Margolioth was considered a high rabbinical authority. He published the following works: "Bet Efrayim" (2 vols., Lemberg, 1809–10), commentary on parts of the Yoreh De'ah; oration at the funeral of R. Meïr Kristianopoler (*ib.* 1815); "Bet Efrayim" (4 parts, *ib.* 1818), responsa on the four parts of the Shulḥan 'Aruk; "Yad Efrayim" (Dubno, 1820), commentaries on Shulḥan 'Aruk, Oraḥ Ḥayyim; "Sha'are Efrayim" (*ib.* 1820), on the rules pertaining to the reading of the Law; "Yad Efrayim" (Zolkiev, 1823), extensive commentaries on the names of men and of women to be employed in letters of divorce; "Shem Efrayim" (Berdychev, 1826), commentary on the Pentateuch; "Maṭṭeh Efrayim" (Zolkiev, 1834), on the ritual laws to be observed from the beginning of the month of Elul until after the Feast of Tabernacles, as well as on the regulations regarding the Ḳaddish of orphans; "Zera' Efrayim" (Lemberg, 1853), commentary on the Pesiḳta Rabbati. Many other works by him are still in manuscript.

S. S. B. FR.

Ḥayyim Mordecai Margolioth: Polish rabbi; died at Dunajowce 1818; brother of Ephraim Solomon Margolioth. Ḥayyim Mordecai was at first rabbi at Brestitzki, and later became rabbi in Great Dubno, where he established a printing-office. He was among those who elected the three deputies sent to St. Petersburg to confer with the government upon Jewish affairs, and was the author of "Sha'are Teshubah," commentary to Shulḥan 'Aruk, Oraḥ Ḥayyim (Dubno, 1820); it contains extracts from other works and appears in most editions of the Shulḥan 'Aruk.

BIBLIOGRAPHY: '*Ir Dubno we-Rabbaneha*, p. 26, Cracow, 1902; Steinschneider, *Cat. Bodl.* No. 4698; Fürst, *Bibl. Jud.* ii. 327.

Isaac ben Jacob Margolioth: Rabbi of Prague, where he died April 17, 1525; son of Jacob Margolioth, rabbi of Nuremberg. He is mentioned in connection with the Mintz-Margolioth affair, in which he sided with his father. He wrote the preface to his father's "Seder Giṭṭin wa-Ḥaliẓah."

BIBLIOGRAPHY: Eisenstadt-Wiener, *Da'at Ḳedoshim*, pp. 17, 68, St. Petersburg, 1897–98; S. Rapoport, *Gal 'Ed*, p. 30, Prague, 1856.

E. C. A. S. W.

Jacob Margolioth of Nuremberg: German rabbi of the fifteenth century; died at an advanced age about 1492. His contemporaries Joseph Colon (Responsa, No. 26) and Judah Minz (Responsa, No. 13) speak of him as one of the greatest rabbis of his time, which caused Grätz ("Gesch." viii. 268) to hold that in all probability he presided over the meeting of German rabbis held in Nuremberg in 1474. Emperor Frederick III. ordered, in 1487, the two brothers Abraham and Solomon of Ulm to submit their disputes to Jacob Margolioth, "Hochmeister" of Nuremberg (see Wiener, "Regesten zur Gesch. der Juden in Deutschland," No. 126). In the quarrel between Moses Capsali and Joseph Colon, Margolioth sided with the former. Later, according to Grätz ("Gesch." viii. 58), he opposed Jacob Pollack, who is said to have been his pupil; but the above-quoted responsum of Judah Minz proves this to be only a surmise.

Zunz ("Z. G." p. 106), and after him Grätz and Fuenn, confounded this Jacob Margolioth with a younger contemporary at Ratisbon, of the same name, who corresponded with Reuchlin. It is probable that Jacob Margolioth "of Nuremberg" is identical with R. Jacob Margolioth "of Worms," and perhaps with R. Jacob Margolioth "of Lucca" (?) and Jacob Marmonda Margolioth (Moses Minz, Responsa, Nos. 73, 114). He is commonly accepted as the author of "Seder Giṭṭin wa-Ḥaliẓah," and, consequently, as the father of Isaac b. Jacob Margolioth of Prague (d. 1525), the editor of that work, which appeared together with the "Ṭib Giṭṭin" of Ephraim Zalman Margolioth (Zolkiev, 1823).

BIBLIOGRAPHY: Eisenstadt-Wiener, *Da'at Ḳedoshim*, Appendix, pp. 67–68, 74, St. Petersburg, 1897–98; Fuenn, *Keneset Yisrael*, pp. 555–556, Warsaw, 1886; idem, *Ḳiryah Ne'emanah*, p. 328, Wilna, 1860; Wiener, in *Monatsschrift*, 1868, xvii. 345 *et seq.*

Jacob Margolioth of Ratisbon: German rabbi and Hebraist; flourished about 1500. He is known chiefly by a Hebrew letter addressed to Reuchlin, which is preserved in "Epistolæ Clarorum Virorum ad Reuchlinum" (see text in Fuenn, "Keneset Yisrael," pp. 555–556, where he is confounded with Jacob Margolioth, rabbi of Nuremberg). His son, the apostate Antonius MARGARITA, relates the great services which Jacob rendered his townsmen by interceding in their behalf with Siegmund von Rohrbach, who was imperial governor at Ratisbon from 1499 to 1512 (quoted by Wiener from Margarita's "Der Gantz Jüdisch Glaub," p. 138, Leipsic (1705). According to the same authority this Jacob Margolioth had another son, who was a musician in Prague; this led Wiener to believe that this musician may be identical with R. Isaac b. Jacob Margolioth of Prague (d. 1525), who edited his father's "Seder Giṭṭin wa-Ḥaliẓah" (see MARGOLIOTH, JACOB, OF NUREMBERG); but the supposition seems improbable.

BIBLIOGRAPHY: Wiener, in *Monatsschrift*, 1868, xvii. 345 *et seq.* (where all other sources are quoted and discussed).

D. P. WI.

Jacob Koppel b. Ẓebi Margolioth: Polish preacher and moralist of the seventeenth century; died 1673 (?). He came from Vladimir, Volhynia, where he was an eye-witness of the massacres of 1648–49, from which he escaped to Germany. He was the author of "Mar'ot Ya'aḳob," tables of ethical rules (Venice, 1662); "Mizbaḥ Ya'aḳob," a sermon on penitence and some haggadic novellæ (*ib.* 1662); and "Ḳol Ya'aḳob," on the Pentateuch and the Talmud, to which is appended an elegy on the victims of the above-mentioned massacres (Amsterdam, 1708).

BIBLIOGRAPHY: Fuenn, *Keneset Yisrael*, p. 556; Fürst, *Bibl. Jud.* ii. 328; Lewinstein, in *Dor Dor we-Dorshaw*, p. 109, Warsaw, 1899.

H. R. P. WI.

Judah Löb ben Asher Margolioth: Grandson of R. Mordecai Jaffe; died at Frankfort-on-the-Oder June 14, 1811. He was successively rabbi at Busnow, Szebrszyn, Polotsk, Lesla, and Frankfort-on-the-Oder, and wrote the following works: "Ḳorban Reshit," responsa and discussions on Rosh ha-Shanah (Frankfort-on-the-Oder, 1778); "Peri Tebu'ah," responsa (parts i. and ii., Novidvor, 1796; parts iii. and iv. are still in manuscript); "Ṭal Orot," treatises on the essence of the soul, on immortality, etc. (Frankfort-on-the-Oder, 1751); "Or 'Olam," treatises on natural philosophy, to which is appended Saadia Gaon's commentary on Canticles (*ib.* 1777); "Bet Middot," on ethics, in prose and verse (Dyhernfurth, 1778); "'Aẓe 'Eden," homilies on belief, philosophy, pride, and humility, with a criticism of Mendelssohn's "Jerusalem" (*ib.* 1802); "Amirah Ne'imah," on the Haggadah and the Pentateuch (in manuscript); "Iggeret ha-Meliẓah," on style (Novidvor, 1794); "Sefer Ṭob we-Yafeh," collection of poems on dogmatic, grammatical, and liturgical subjects (Frankfort-on-the-Oder, 1770). He was probably the first Judæo-Polish author to write on natural philosophy.

BIBLIOGRAPHY: *Ha-Zeman*, i. 97; Fuenn, *Keneset Yisrael*, p. 413, Warsaw, 1886; Steinschneider, *Cat. Bodl.* No. 5740; Fürst, *Bibl. Jud.* ii. 328; Zeitlin, *Bibl. Hebr.* p. 229.

E. C. A. S. W.

Meïr b. Ẓebi Hirsch Margolioth: Polish rabbi and author; born probably at Horodenka, Galicia; died at an advanced age at Ostrog, Volhynia, April 24, 1790. He was rabbi of the district of Lemberg for more than forty years (*c.* 1742–82), at the time when Lemberg had two rabbis, one for the city proper and one for the surrounding district. In 1782 he seems to have gone to Ostrog, where he remained until his death. Margolioth was a pupil of R. Israel Ba'al Shem Ṭob (BEShT), the reputed founder of Ḥasidism, and was probably the greatest Talmudical authority of the time to confess to such discipleship. He was the author of "Meïr Netibim," responsa and novellæ (Polnoi, 1791), "Sod Yakin u-Bo'az," on the Cabala (*ib.*), and "Derek ha-Ṭob weha-Yashar," on the Shulḥan 'Aruk (Polnoi and Shklov, 1799).

Margolioth left four sons: **Joseph Naḥman,** rabbi of Polnoi and father of R. Ḥayyim of Ostrog; **Bezaleel,** rabbi of Zwahil and successor to his father as rabbi of Ostrog; Saul, rabbi successively of Komorn, Zbaraz, and Lublin; and **Naphtali Mordecai.** Margolioth's daughter married Naphtali Herz ha-Kohen, rabbi of Scharigrod. Margolioth had also an older brother, **Isaac Dob Bär** (rabbi of Jazlowicz and the district of Podolia; author of "Be'er Yiẓḥaḳ"), who is mentioned in his works. Isaac Dob Bär was one of the three rabbis (the other two being R. Israel Ba'al Shem and R. Ḥayyim Cohen Rapoport of Lemberg) who represented the Talmudist position in the discussion with the Frankists under the auspices of Bishop Mikulski in 1759. Margolioth's mother was a sister of R. Aryeh Lebush b. Mordecai Auerbach of Stanislau (d. 1772).

D. P. WI.

Moses b. Judah Löb Margolioth: Rabbi at Semnitz, Hungary, in the nineteenth century; son of Judah Löb Margolioth. He was the author of "Ḥaḳirat ha-Gemul," treatises on retribution and punishment, with an appendix under the title "Keter Malkut," a poem by W. Buchner (Budapest, 1829; Steinschneider, "Cat. Bodl." No. 6518).

Moses Mordecai ben Samuel Margolioth: Talmudist and cabalist; born probably at Posen, where his father was rabbi, about 1540; died at Cracow Nov. 21, 1616. On the death of Joseph Katz (1591) Moses Mordecai Margolioth became head of the yeshibah at Cracow, which office he retained over twenty years. He wrote: "Ḥasde Adonai," on the thirteen attributes of God (Cracow, 1589); "Seliḥah 'al ha-Ḳedoshim," prayer for the martyrs of 1596, published in an edition of seliḥot (Dyhernfurth, 1702); "Zohar Ḥadash 'im Midrash ha-Ne'lam" (Cracow, 1603).

BIBLIOGRAPHY: Zunz, *'Ir ha-Ẓedeḳ*, p. 42, Lemberg, 1874; Steinschneider, *Cat. Bodl.* No. 6517; Fürst, *Bibl. Jud.* ii. 330.

Naphtali Margolioth (Margaritha): Scholar and author; born at Vienna 1562. He embraced Christianity in 1603, taking the name of **Julius Conrad Otto,** and later became professor of Hebrew at Altorf. Subsequently he returned to Judaism. He wrote: "Usus Ebreæ Linguæ" (Nuremberg, 1604); "Grammatica Hebræa" (*ib.* 1605);

"Lexicon Radicale," a dictionary of rabbinical and Talmudic words (*ib.* 1607); "Gale Razaya," a work full of false Talmudic citations and of misinterpretations of Talmudic sayings regarding the Messianic idea and the doctrine of the Trinity (*ib.* 1605).

BIBLIOGRAPHY: Wolf, *Bibl. Hebr.* i. 480, iii. 365, iv. 845; De le Roi, *Evangelische Christenheit*, i. 133; Steinschneider, *Cat. Bodl.* No. 6702; Fürst, *Bibl. Jud.* ii. 330.
E. C. A. S. W.

Saul b. Meïr Margolioth: Polish rabbi; died in Lublin Dec. 13, 1800 (?); son of R. Meïr of Ostrog and Lemberg (author of "Meïr Netibim") and pupil of R. Israel Ba'al Shem-Ṭob. He was rabbi successively of Zbaraz, Galicia, and of Komorn, before he went to Lublin, where he remained until his death.

Saul is often mentioned in the records of the community of Lublin as the author of useful communal measures. He left no works, but is mentioned in the above-cited work of his father's. His son **Ẓebi Hirsch,** who married a daughter of R. Löb of Amsterdam, succeeded Saul b. Meïr as rabbi in the city of Lublin.

H. R. P. WI.

MARGOLIS, ISAAC BEN ELIAH: Russo-Polish rabbi and author; born in Kalvariya, government of Suwalki, Russian Poland, 1842; died in New York Aug. 1, 1887; son of the rabbi of Wizhajny, and a descendant of Yom-Ṭob Lipmann Heller of Prague.

His youth was devoted to the study of the Talmud; and in 1862 he settled in Meretz, government of Wilna, where later on he embarked in business. The zealots of that city and business reverses rendered his life there unpleasant; and in consequence he removed to Kovno, where he soon found employment as tutor in the house of Ezekiel Jaffe. Later he became rabbi of Druskeniki, government of Grodno. In 1884 he emigrated to the United States and became rabbi of the Congregation Anshe-Kalvariya, New York.

Margolis was the author of "Ma'oz ha-Talmud" (Warsaw, 1868), an apologetic work in defense of the Talmud and the Shulḥan 'Aruk against certain critics; "Ma'oz ha-Yam" (Wilna, 1870), a reply to the attacks of M. L. Lilienblum in "Megillah 'Afah"; and "Sippure Yeshurun" (Berlin, 1876), a collection of Talmudic and Midrashic legends, anecdotes, etc., written in an elegant Hebrew style. He also contributed largely to the Hebrew periodicals "Ha-Maggid," "Ha-Ẓefirah," and "Ha-Meliẓ."

H. R. I. S. B.

MARGOLIS, MAX LEOPOLD: American philologist; born at Meretz, government of Wilna, Russia, Oct. 15, 1866; son of Isaac Margolis; educated at the elementary school of his native town, the Leibnitz gymnasium, Berlin, and Columbia University, New York city (Ph.D. 1891). In 1891 he was appointed to a fellowship in Semitic languages at Columbia University, and from 1892 to 1897 he was instructor, and later assistant professor, of Hebrew and Biblical exegesis at the Hebrew Union College of Cincinnati. In 1897 he became assistant professor of Semitic languages in the University of California; in 1898, associate professor; and since 1902 he has been acting head of the Semitic department.

Of Margolis' works may be mentioned: "The Columbia College MS. of Megillah," New York, 1892; "Notes on Semitic Grammar," parts i.–iii., in "Hebraica" ("American Journal of Semitic Languages and Literatures"), 1894, 1896, 1902; "The Theology of the Old Prayer-Book," in "Year Book of the Central Conference of American Rabbis," 1897; "The Theological Aspect of Reformed Judaism," Baltimore, 1904.

MARGOLIUT, MARGULIES, MARGULIOTH. See MARGOLIOTH.

MARGOLIUTH, MOSES: Convert to Christianity; born in Suwalki, Poland, Dec. 3, 1820; died in London Feb. 25, 1881. He went to Liverpool, England, in 1837, where he met a convert named Lazarus, and the Rev. H. S. Joseph; the latter baptized Margoliuth in April, 1838. He entered Trinity College, Dublin, Jan., 1840; became curate of St. Augustine, Liverpool, June 30, 1844; and had many ecclesiastical appointments, ultimately becoming vicar of Little Linford, Buckinghamshire (1877–81). He took the degree of Ph.D. at Erlangen in 1857. In 1847 he started a Hebrew-Christian monthly magazine entitled "The Star of Jacob."

Margoliuth wrote the following works, all published in London: "Modern Judaism" (1843); "The History of the Jews of Great Britain" (1857; a work of some merit in the last two volumes); "A Pilgrimage to the Land of My Fathers" (1858); "The Curates of Riverdale" (1860); "The Spirit of Prophecy" (1864); "The Poetry of the Hebrew Pentateuch" (1871). Margoliuth was one of the revisers of the English version of the Old Testament. He wrote also a considerable number of minor works.

J. G. L.

MARGULIES, SAMUEL HIRSCH: Rabbi; born at Brzezan, Galicia, Oct. 9, 1858; a descendant of Rabbi Ephraim Zalman Margolioth; educated at the theological seminary at Breslau. He was from 1885 to 1887 rabbi of the Congregation Newe Shalom in Hamburg; till 1890, of the congregation at Weilburg, Hesse-Nassau; and since 1890 he has been chief rabbi of Florence. In 1899 he was appointed principal of the Collegio Rabbinico Italiano, which was later transferred from Rome to Florence.

Margulies has published several essays in Berliner's "Magazin" and in the "Monatsschrift," and is the author of: "Saadja Alfajûmi's Arabische Psalmen-Uebersetzung," Breslau, 1884; "Zwei Pesach-Predigten," Frankfort-on-the-Main, 1888; "Dichter und Patriot," Treves, 1896. He is also (1904) editor of the "Rivista Israelitica."
S. F. T. H.

MARḤAB IBN AL-ḤARITH: Jewish Arabian warrior and poet; killed during Mohammed's invasion of Khaibar about 628. Marḥab, who was of Himyarite descent, distinguished himself by his bravery in defending one of the forts of Khaibar. He is represented in the "Ta'rikh al-Ḥamis" (quoted by Caussin de Perceval) as a man of uncommon strength and audacity, wearing two cuirasses, a double turban and a helmet, and a sword at each side, and brandishing a three-pointed lance. According to the custom of Arab warriors, Marḥab sent a poem challenging any of Mohammed's heroes to single combat. Ali, Mohammed's cousin and third successor, answered the challenge, and Marḥab was killed. According to Ibn Hisham, Mohammed's biographer, it was Mohammed ibn Maslamah, who, wishing to avenge his brother, killed on the previous day, offered to fight Marḥab. Ibn Hisham further says that the two combatants kept a tree between them as a defense, and that the branches of the tree immediately over their heads were soon cut away. Marḥab accidentally dropping his sword, Mohammed seized the opportunity to deal him a fatal blow.

MARḤESHWAN. See ḤESHWAN.

MARI BEN DIMI: Second gaon of Pumbedita. When the Jewish scholars were compelled to leave the Babylonian academies, Mari, with others, went to Firuz-Shabur and there established a new academy which became associated with his name. After the death of the gaon Ḥanan of Isḳiya, in 609, he was elected successor in the gaonate. Two halakic decisions of his have been preserved—one, quoted by Judah Gaon, concerning two unknown plants mentioned in the Talmud (Chaim M. Horowitz, "Halachische Schriften der Geonim," ii. 56, Frankfort-on-the-Main, 1851; "Teshubot ha-Geonim," p. 45, ed. Lyck, 1864), and the other concerning the marriage of a "mamzer" ("Halakot Gedolot," ed. Vienna, p. 22a).

E. C. M. SC.

MARIA THERESA. See AUSTRIA.

MARIAMNE: 1. Wife of Herod the Great; the first of this name. She was the daughter of the Hasmonean Alexander, a son of Aristobulus II., who was conquered and put to flight by Herod's father, Antipater. Her mother was Alexandra, daughter of the reigning prince Hyrcanus II. When Herod, at that time tetrarch, entered Jerusalem in triumph in 42 B.C., Alexandra sought to bring about the marriage of her daughter to him, hoping thus to avoid the ruin of her house (Josephus, "Ant." xiv. 12, § 1; *idem*, "B. J." i. 12, § 3). The war, however, left Herod no leisure; and not until five years after his betrothal to Mariamne, and three years after he had become nominal king of Judea, did he leave the siege of Jerusalem, in 37 B.C., and celebrate his marriage in Samaria ("Ant." xiv. 15, § 14; "B. J." i. 17, § 8). Mariamne bore him three sons, Alexander, Aristobulus, and one who died young, and two daughters, Salampsio and Cypros.

The marriage proved an unhappy one. The king, indeed, loved the beautiful woman passionately; but the queen could not forget that Herod had been the murderer of all her family and that he had succeeded to the throne really at the cost of her paternal house. She displayed a natural pride toward this parvenu which was especially felt by Herod's mother and by his sister Salome, who wrought so much evil in the course of her life.

Left in Charge of Joseph.

The queen ruled the king completely. This was made manifest when Alexandra insisted that her son, Mariamne's brother, should be made high priest. On the advice of Dellius, the friend of Antony—who wished to give the latter's passion another direction—she sent pictures of her two beautiful children to the Egyptian queen, Cleopatra. Antony had, in fact, designs on the youthful Aristobulus; and since Mariamne also asked the favor of the king, he found himself obliged to make the youth high priest (35 B.C.; "Ant." xv. 2, § 6; "B. J." i. 22, § 3), although, in reality, only to kill him on a suitable occasion. When, later, Herod was obliged to justify before Antony at Laodicea the killing of Aristobulus, he placed Mariamne under the protection of Joseph, his brother-in-law, commanding him to kill her in case he (Herod) should not return alive. As Joseph had occasion to associate a good deal with Mariamne in connection with governmental affairs, he good-naturedly told her of the boundless love the king felt for her and of the secret instructions which Herod had given him. A false report of Herod's death being circulated, Mariamne sought refuge with the Roman legions. Herod, however, was dismissed with the favor of Antony. On his return Salome accused Mariamne of adultery with Joseph. Herod at first would not believe the charge; but it chanced that the queen reproached him for the secret commission he had entrusted to Joseph, and this convinced Herod of the criminality of Joseph and Mariamne. In his anger he caused Joseph to be put to death immediately, and he would have similarly disposed of Mariamne had not his love for her been greater than his anger. He, however, threw Alexandra into prison (34 B.C.) as the instigator of the scandal ("Ant." xv. 3, §§ 5-9; "B. J." i. 22, §§ 4-5).

Falsely Accused by Salome.

In the spring of the year 30, Herod visited Augustus in Rhodes. He left Mariamne and her mother under the protection of a certain Joseph and of the Iturean Sohemus. Again he commanded that his wife should be killed in the event of his death. The king had hoped to find love on his return; instead he found himself hated and avoided. The king's mother and sister found him ready to listen to their slanders. Salome told him that Mariamne sought to poison him. Thereupon the king questioned Mariamne's favorite eunuch, who said he knew nothing of the poison, but that the queen was offended because of what Sohemus had told her in regard to his secret instructions. Sohemus met the same fate as had Herod's brother-in-law, and Herod caused Mariamne to be accused before a tribunal composed of his friends, which pronounced sentence of death. The king and some of the judges did not wish to hasten the execution, desiring merely to put Mariamne in prison; but Salome represented that the people might raise a disturbance and seek to release Mariamne, and the latter was consequently led to death. During the entire route to the place of execution her own mother, Alexandra, desiring to rehabilitate herself in Herod's eyes, reviled her, accusing her of adultery and of ingratitude toward Herod. Mariamne answered not a word, and died calm and composed ("Ant." xv. 6, § 5; 7, § 6), being about twenty-eight years of age (29 B.C.).

Discrepancy in the Sources.

The fact that Mariamne was twice accused under similar circumstances of adultery with the regent, makes it probable that Josephus' account contains some inaccuracies, the more so as the second account is wholly lacking in "B. J." (Destinon, "Di Quellen des Josephus," p. 113). The second account, however, can not be a simple repetition on the part of Josephus of the first, since Josephus himself, in relating the second incident, refers to the first ("Ant." xv. 7, § 1). It is remarkable that Josephus mentions Joseph the second time without any further particulars (*ib.* 6, § 5), which looks, it is true, as though he had before him two parallel accounts which he tried to combine in this way. According to "B. J.," Mariamne was put to death in the first case—that is, in the year 34. But this is impossible, since she could not have borne five children between the years 37 and 34. Indeed on closer scrutiny the two incidents do not appear at all identical, since in the second case it is not the regent Phreroras with whom Mariamne is associated, but Sohemus, who was of comparatively low rank. Hence the two incidents are probably historical, and the omission of the second account in "B. J." is due to the fact that Josephus, as usual, has condensed his narration in that work. The historian Nicholas of Damascus believed in Mariamne's guilt ("Ant." xvi. 7, § 1).

Talmudic Legends.

There is a Talmudic legend concerning the marriage and death of Mariamne, although her name is not mentioned. It is to the effect that when the whole house of the Hasmoneans had been rooted out, she threw herself from the roof and was killed (B. B. 3b). Out of love for her, Herod is said to have kept her body preserved in honey for seven years (*ib.*; S. Geiger, in "Oẓar Neḥmad," iii. 1). In the Talmud this sort of mental derangement is called a "deed of Herod" (Sanh. 66b). Josephus relates also that after her death Herod tried in hunting and banqueting to forget his loss, but that even his strong nature succumbed and he fell ill in Samaria, where he had made Mariamne his wife ("Ant." xv. 7, § 7). The Mariamne tower in Jerusalem, built by Herod, was without doubt named after her; it was called also "Queen" (*Βασιλίς*; "B. J." ii. 17, § 8; v. 4, § 3).

Josephus writes the name *Μαριάμη*, adding the inflectional ending to *Μαριάμ* (= מרים), the Septuagint form of the name. In some editions of Josephus *Μαριάμμη* stood with double "*μ*"; this was dissimilated to "mn" in the Middle Ages, and the name has so remained (S. Pape-Benseler, "Wörterbuch der Griechischen Eigennamen," 3d ed. 1870, *s.v.*).

Bibliography: Grätz, *Gesch.* 4th ed., iii. 187, 200, 216; Derenbourg, *Hist.* p. 151; Schürer, *Gesch.* 3d ed., i. 358-383; Wellhausen, *I. J. G.* 4th ed., pp. 325, 328.

2. Wife of Herod the Great; the second of this name. She was held to be very beautiful; and Herod, on first seeing her, was seized with an ardent passion for her. Since he did not wish to obtain possession of her by force, he thought it best to marry her. He advanced her father, Simon the son of Boethus (a man of humble birth, originally from Alexandria, but at that time living in Jerusalem), to the position of high priest (25 B.C.) a few years after the execution of the first Mariamne (Josephus, "Ant." xviii. 5, § 4; comp. *ib.* xvii. 1, § 2; *idem*, "B. J." i. 28, § 4).

Mariamne bore Herod one son, also called Herod ("Ant." xvii. 1, § 2), who married Herodias (*ib.* xviii. 5, § 4), and who was in fact the destined heir to the throne ("B. J." i. 29, § 2; comp. *ib.* 30, § 3). Mariamne knew of Herod's intention in regard to her son (*ib.* 30, § 7). Josephus always writes *Μαριάμη* or *Μαριάμμη*, as he does also in the case of other persons of the same name.

G. S. Kr.

MARIAMPOL (Polish, **Marjampol**; called formerly **Staripole**): Town situated in the government of Suwalki, Russian Poland. The Jewish community there, like the town itself, is of comparatively recent date. At first the community was dependent, in communal affairs, upon the neighboring town of Kalvariya. Its first rabbi, Ḥayyim Shershaver, was elected in 1780, though the community was too poor to build a synagogue; and the rabbi then visited a number of towns in order to collect money for that purpose. In the Polish revolution of 1831 a Polish regiment passed through Mariampol and carried away four of the Jewish elders who were faithful to the Russians, and left them, bound, in the forest. In the same year, on the occasion of an encounter between the Russians and the Poles at Mariampol, the latter locked all the Jews in the synagogue, with the result that only one Jew was killed. Mariampol has (1897) a total population of 6,298, of which over two thousand are Jews.

MARINI, SOLOMON B. ISAAC: Italian rabbi of the seventeenth century; died in 1670. He was the only rabbi at Padua who survived the plague of 1631, which decimated the community. His wisdom and his eloquence contributed much to the restoration of order. He wrote a commentary to Isaiah entitled "Tiḳḳun 'Olam" (Verona, 1652). He was renowned as a scholar, teacher, and pastor, and among his pupils was the physician and rabbi Isaac Ḥayyim Cantarini. His brother, **Shabbethai b. Isaac Marini** (d. 1685), was a physician.

MARIX, ADOLPH: American naval commander; born Apr. 24, 1848, in Saxony. He went to America while still a boy, and in 1864 entered the United States Naval Academy at Annapolis, Md., graduating in 1868. In 1869 he was promoted to the rank of ensign, and in the following year was assigned to special duty on the U. S. S. "Congress." He was promoted master in 1870, served on the "Canandaigua" with the North Atlantic squadron during 1871–72, was commissioned lieutenant in 1872, and served thereafter on various ships in the North Atlantic and Asiatic stations until 1879, when he was assigned to service in the Hydrographic Office. In 1880 he was ordered to the training-ship "Minnesota," from which, in 1882, he was transferred to the battle-ship "Brooklyn," then with the South Atlantic squadron. From 1883 to 1886 he served again on the Asiatic station, after which he was assigned to special service in the judge-advocate-general's office. In connection with his duties in this department he was sent to Australia (1888), and on his return (1889) was ordered to the training-ship "Jamestown," from which he (1892) was transferred to the Hydrographic Office in New York. In 1893 he was promoted lieutenant-commander and assigned to the receiving-ship "Minnesota," until in 1895 he was transferred to the ill-fated battle-ship "Maine," on which he served until January, 1898, when he took command of the U. S. S. "Scorpion." He served as recorder of the Maine court of inquiry. In March, 1899, he was promoted to the rank of commander.

Commander Marix was by act of Congress advanced two numbers for "eminent and conspicuous conduct in battle in two engagements at Manzanillo July 1 and July 18, 1898," during the Spanish-American war.

MARK. See Seal; Signature.

MARK. See New Testament.

MARKENS, ISAAC: American writer; born in New York city Oct. 9, 1846; son of Elias Markens, a linguist and Orientalist. Isaac Markens was educated in the public schools of his native city. He became a merchant, and afterward private secretary to Railway Commissioner Albert Fink. Subsequently he entered the journalistic field, and wrote for the New York "Commercial Advertiser" and the "Mail and Express." In 1888 he published "The Hebrews in America," a series of historical and biographical sketches of value as being the first of their kind on American Jewish history.

Markens was for several years secretary to the board of arbitration of the Joint Executive Committee of Eastern and Western Railways.

A.

MARKS, B. S.: English artist; born in 1827 at Cardiff, where he received his art education and followed the profession of portrait-painter until his removal to London in 1867. As a native of Wales he became Royal Cambrian Academician. During the more than thirty years of his professional career in London he has executed commissions for many distinguished sitters, including the Prince of Wales, Lord Rothschild, Chief Rabbi N. M. Adler, the late Lord Shaftesbury, Lord Aberdare, and Field-Marshal Sir John Burgoyne. Marks is an active communal worker in connection with Jewish schools and institutions. He was a member of the committees of the Jews' Free School and of the Westminster and the Bayswater schools, and for a long period acted as honorary art teacher to the pupils and teaching staffs.

In the general community Marks has been active in the free-library and art-school movements, and contributed to the establishment of the Cardiff and Ealing libraries. His son, **Percy L. Marks,** is an architect, and has published "Principles of Planning" (London, 1901). His daughter, **Constance Isabelle,** has shown considerable mathematical talent, having become editor of the mathematical department of the "Educational Times." Two other daughters, **Anne** and **Gertrude,** follow their father's profession, while another, **Helena,** has published several songs.

J. G. L.

MARKS, DAVID WOOLF: The "father" of Anglo-Jewish Reform; born in London Nov. 22, 1811; educated at the Jews' Free School, London. He acted as pupil-teacher at Solomon's boarding-school at Hammersmith for five years, and then became assistant reader at St. Alban's Synagogue, but resigned the latter position to go to Liverpool as assistant reader and secretary. At Liverpool his desire for Reform found expression in his refusal to read the Law on the second days of festivals. Meanwhile Marks devoted himself to general literature, and ultimately secured the appointment of professor of belles-lettres at Wigan College, Liverpool. About 1840 a movement was in progress in London for establishing a Reform synagogue, and the sympathy with Reform of which Marks had given evidence brought him under the notice of the founders of that movement; he was accordingly elected, at the age of twenty-nine, minister of the West London Synagogue of British Jews.

During his sixty years' ministration to that congregation Marks has effected important changes in the community. He has been active in furthering educational projects, in instituting regular pulpit instruction, and in improving decorum in Jewish public worship. In 1848 he was appointed to the chair of Hebrew at University College, London, which he filled until 1898.

Marks has published three volumes of sermons, and a pamphlet entitled "The Law is Light"; he was one of the editors of Smith's "Dictionary of the Bible," and he compiled and published the order of service used in the Reform synagogues.

Bibliography: *Jew. Chron.* Nov. 22, 1895; *Young Israel*, Jan., 1898; Morais, *Eminent Israelites of the Nineteenth Century*; *Jewish Year Book*, 1903-4.

MARKS, HENRY HANANEL: English journalist and politician; born April 5, 1855, in London; fifth son of the Rev. Prof. D. W. Marks; educated at University College, London, and at the Athenée Royale, Brussels. At the age of sixteen he went to the United States, where he entered the journalistic field, meeting with varying success. Finally, when his resources were at their lowest ebb, he returned to London (1883), and soon after established the "Financial News." Beginning in a very small way, he made the paper a power in the financial world. In 1889 Marks was elected member for Marylebone of the London County Council; three years later at the parliamentary election he contested the Northeast Bethnal Green division; and in 1895 he was elected member of Parliament for St. George's Tower Hamlets. He retained his seat until 1900.

Bibliography: *Who's Who*, 1904; *The Jewish Year Book*, 1904.
J. E. Ms.

MARKS, MARCUS M.: American merchant; born at Schenectady, N. Y., March 18, 1858. In 1877 he started a business at Passaic, N. J., and later entered the wholesale clothing firm of his father, David Marks & Sons. He has held many prominent positions in connection with the clothing trade, being president of the Clothiers' Association of New York, president of the National Association of Clothiers, president of the Clothing Trade Association of New York, and chairman of the Hospital Saturday and Sunday Association Trade Auxiliary. He has served also as trustee of the Hospital Saturday and Sunday Association, director of the Educational Alliance, member of the Conciliation Committee of the National Civic Federation, director of the National Butchers' and Drovers' Bank, and is now (1904) organizing credit cooperation in several trades, with the view of establishing a central clearing-house for direct trade information. Marks has been a contributor to labor and trade journals on subjects of labor and conciliation and on credit cooperation.
A. F. H. V.

MARKS, SAMUEL: South-African pioneer; born in Sheffield about 1850. He went to Cape Colony about 1868 and commenced trading in the country. He entered the diamond trade, and, gaining the confidence of the diggers, bought claims and worked them. He was joined subsequently by his brothers; working harmoniously together, they amassed an enormous fortune. In 1884 Marks left the diamond-fields for the Transvaal, where he became acquainted with President Kruger, advanced the government considerable sums of money, and acquired numerous farms in the Transvaal. These farms turned out to be extensive and valuable coal-mines, and the Cape government contracted with the firm of Lewis & Marks for the supply of coal for its railway. The interests of the firm in South Africa at the end of the century were almost colossal. It gave great impetus to the trade of the country by its opening up of coal- and silver-mines and by its establishment of glass, jam, and other factories. It furthermore held the monopoly of the manufacture of spirits and possessed a distillery near Pretoria.

J. G. L.

MARKUS, LUDWIG: German Orientalist; born in Dessau Oct. 31, 1798; died in Paris July 15, 1843. He attended the Franzschule and the ducal gymnasium in Dessau; he was sent to the latter by the hereditary Prince of Anhalt-Dessau, his father having lost his means. He then studied medicine at Berlin University (1818–21), but when in the last year of his course he abandoned medicine for philosophy, and studied astronomy under Encke at the Berlin Observatory so ardently that his mind was for a time affected. When scarcely recovered he became a member of the Society for Jewish Culture and Science in Berlin. In its "Zeitschrift für die Wissenschaft des Judenthums" for 1822 (pp. 401–418) appeared his first publication, the beginning of a work on the natural history of Palestine, which was still unfinished when the periodical discontinued publication. He then began his life labor—a work on the foreign colonies in Abyssinia and Sennaar from the seventh century B.C. to the fourth century C.E. In 1825 Markus went to Paris, where Cuvier appreciated his attainments; through Cuvier's influence Markus was engaged to edit part of the notes to Panckoucke's Latin-French edition of Pliny (1829). He steadily proceeded with his work on Abyssinia, though he was without means to publish it; but two extracts from it appeared in the "Journal Asiatique" for 1829. In 1830 Cuvier secured for him an appointment as teacher of German in the royal college at Dijon, where he wrote the elementary works needed by the pupils.

The loss of his devoted mother in 1835 having left Markus almost alone in the world (he already had lost nearly all his brothers and sisters), he fell into a state of melancholy which made teaching in Dijon distasteful to him. His work on the Vandals having been very well received, he resigned his position in Dijon and (1838) returned to Paris. It was one day about this time that Markus met Heine and a companion walking on the boulevard. Heine's companion, struck by Markus' somewhat ludicrous appearance, inquired, "Who is that man?" Heine, who had known the Orientalist at the university, replied, "That is the King of Abyssinia." This title, so thoughtlessly conferred, thereafter clung to him. Markus died in Dr. Pinel's asylum for the insane. Baroness de Rothschild bore the funeral expenses, and Heine wrote an obituary. Markus had a remarkable memory and was called the "walking library." He was very modest, and, in spite of his poverty, charitable to the extent of his means.

He wrote: "Storia dei Vandali" (1836); "Géographie Ancienne des Etats Barbaresques" (1842; translation of a part of K. Mannert's "Geographie der Griechen und Römer," with extensive notes and additions); a comparative chronology of the principal nations of antiquity; and a prosody of the Greek and Latin languages.

MARMOREK, ALEXANDER: Austrian physician; born at Mielnica, Galicia, Feb. 19, 1865; educated at a gymnasium and at the University of Vienna (M.D. 1887). He removed to Paris, where he became a pupil, later an assistant, at the Pasteur Institute. He is the author of "Versuch einer Theorie der Septischen Krankheiten," Vienna, 1894.

In 1900 Marmorek claimed to have discovered an antidote (antistreptococcus serum) against puerperal fever; but his remedy did not prove efficacious. It is still, however, used at the Pasteur Institute. Again, in 1903 he appeared before the French Academy of Medicine in Paris, claiming to have found an antidote for tuberculosis. He stated that the tuberculin discovered by Koch was not the toxin (or poison) of the tubercle-bacillus, but a product which only stimulates the cells to produce the toxin; that the real toxin had been found by him (Marmorek), and that he had discovered also the antituberculosis vaccine. He claimed good results for his remedy, which he had sent to Duyen of Paris and Von Mikulicz of Breslau. The first-named expressed himself in favor of Marmorek's antidote; the other condemned it.

Marmorek is known also as an ardent Zionist. As a student he had been a member of the Ḳadimah, the first students' Zionist society of Vienna; he is therefore one of the earliest of the modern Zionists. He was made an officer of the first Zionist Congress, and has held office in each succeeding one. He is at the head of the French Zionist Federation and is the founder of the Jewish Popular University in Paris. He has taken an active part also in communal work in Paris, and was one of the founders of the "Echo Sioniste," the Zionist monthly published in Paris. Marmorek has been decorated with the Legion d'Honneur

S. F. T. H.

MARMOREK, OSKAR: Austrian architect; brother of Alexander Marmorek; born at Skirta, Galicia, April 9, 1863. He studied at the polytechnic high school at Vienna and took a postgraduate course at Paris. Returning to Vienna in 1889, he settled there as an architect. Several important works have been undertaken by him, including the illuminated fountain at the Forestry Exposition of 1890 at Vienna, the music-hall at the Vienna Musical Exposition of 1892, and the plan of the villa district of Assee.

Marmorek, like his brother Alexander, is an enthusiastic Zionist, having been a member of the Vienna Ḳadimah. At the first Zionistic Congress he was appointed member of the Actions Committee, which office he has since held. In 1902 he was a member of the 'Arish Expedition.

At the Congress of Basel in 1901 Marmorek proposed to recognize the hospitality of Basel by erecting a Zionist Congress Home, and exhibited plans therefor which he had prepared.

Forms of the Marriage Relation.

MARRIAGE.—Biblical Data: The earliest Hebrew literature represents a comparatively high development of social and domestic life. Of primitive conditions of polyandry, such as existed among the early Arabs, there is no certain evidence in the Old Testament. Even of the matriarchate, or reckoning of kinship through the mother, which W. Robertson Smith holds to have been originally the universal rule of Arabia ("Kinship and Marriage," 2d ed., pp. 145–190), there is no clear indication. Traces thereof have been supposed to remain in certain family connections, such as those of Milcah and Sarah, or in tribal groups, such as the sons of Leah and of Rachel, and also in the evidently closer and more intimate relationship between children of the same mother or with relatives on the maternal side. There is, however, probably nothing more in these than such distinctions as would necessarily arise in polygamous families and in the natural intimacy between full brothers and sisters. Polygamy, or, more correctly, polygyny, was the prevalent form of the marriage relation in Old Testament times. There seems to have been no limit to the number of wives or concubines a man might have, except his ability to maintain them and their children. As a matter of fact, however, only men of wealth, chiefs, or kings had many wives; the historian draws special attention to the large households of Gideon, David, and Solomon (Judges viii. 30; II Sam. v. 13; I Kings xi. 1 *et seq.*). The Patriarchs had not many wives; Isaac appears to have been content with one. Cases such as those of Elkanah (I Sam. i. 1–2) and Jehoiada (II Chron. xxiv. 3), each of whom had two wives, may have been common (comp. Deut. xxi. 15).

Not infrequently the Hebrew slave-girl became the wife or the concubine of her master. Instances are given of the wife voluntarily giving her maid to be wife to her husband (Gen. xvi. 3; xxx. 3, 9). The lot of the childless wife in such a home was evidently an unhappy one. The law of later times was designed to limit the practise and to correct the abuses of polygamy. The king is enjoined not to multiply wives, "that his heart turn not away"

(Deut. xvii. 17). A man may not "take a woman to her sister to be a rival to her" (Lev. xviii. 18, R. V.). The interests of the less loved, or the hated, wife and her children are guarded (Deut. xxi. 15–17). Even in the earliest legislation the slave-girl who is espoused by her master and the slave's wife are protected in their rights (Ex. xxi. 2–11; comp. Deut. xxi. 10 *et seq.*).

By the Prophets polygamy was discouraged. In the prophetic history monogamy is presented as the ideal original state (Gen. ii. 18 *et seq.*). Plurality of wives first occurs among the degenerate Cainites (Gen. iv. 23); but Noah is the husband of one wife, and so, apparently, is the patriarch Job. The idyllic pictures of II Kings iv., Ps. cxxviii., Prov. xxxi. 10 *et seq.*, are of monogamous homes. Hosea and Isaiah were monogamists. When the Prophets represent Jehovah's relation to Israel by the figure of marriage, it is as a jealous husband choosing and betrothing to himself one beloved wife (Hos. ii.; Isa. l. 1, liv. 5). The books of Proverbs and Ecclesiasticus exalt the place and character of the wife in the undivided home (Prov. xii. 4, xviii. 22, xix. 14, xxxi. 10 *et seq.*; Ecclus. [Sirach] xxv. 1, 8; xxvi. 1 *et seq.*, 13 *et seq.*; comp. Eccl. ix. 9). Monogamy was the rule among the Jews in Roman times, but there were notable exceptions. While the New Testament does not expressly prohibit, it discredits and discourages, polygamy (*e.g.*, Matt. xix. 4–5; I Tim. iii. 2, 12).

Kinship and Marriage.

In the earliest Hebrew history endogamy prevails; particular care is taken that Isaac and Jacob shall contract marriage only with their own kin. The Canaanite wives of Esau were "a grief of mind unto Isaac and to Rebekah" (Gen. xxvi. 34–35; comp. xxvii. 46). Some of the sons of Jacob also departed from this custom (Gen. xxxviii. 1–2, xli. 45). Moses married outside his own people, but he was a fugitive, and became an adopted member of his wife's tribe (Ex. ii. 21; comp. iv. 18). It was, nevertheless, looked upon as right and fitting that marriage should take place within the circle of one's own kindred (Gen. xxiv. 2–4, xxix. 19; comp. Judges xiv. 3).

However, the changed conditions subsequent to settlement in Canaan made an intermingling of races inevitable (see Judges iii. 6; Ruth i. 4; II Sam. xi. 3; I Kings vii. 14; I Chron. ii. 17; II Chron. xxiv. 26), and the custom of the kings in making foreign alliances by marriage favored this (II Sam. iii. 3; I Kings iii. 1, xi. 1, xvi. 31). The Deuteronomic law forbids marriage with the Canaanites, but, apparently, makes an exception to the endogamous rule in favor of the Edomites and Egyptians (Deut. vii. 3, xxiii. 7; comp. Ex. xxxiv. 16). The period of the Exile and the century following was also a period of laxity, but strict laws prohibiting marriage with the foreigner were enforced in the time of Ezra and Nehemiah (Ezra ix. 10; Neh. xiii. 23–30).

The older custom of intermarriage within the circle of kinship was governed by no strict rules. Of course marriage with a daughter or uterine sister was not tolerated, but there was no bar to union with close relatives on the father's side, and even down to the Babylonian exile such unions appear to have been common (Gen. xx. 12; Ex. vi. 20; Num. xxvi. 59; II Sam. xiii. 13; Ezek. xxii. 10–11). Deuteronomy prohibits certain marriages with near relatives (xxii. 30; xxvii. 20, 22–23), but the most elaborate legislation in this direction is found in Leviticus (xviii. 7–17, xx. 11–21). According to this law a man may not marry his mother, stepmother, mother-in-law, father's sister, mother's sister, paternal uncle's wife, half-sister, stepsister (daughter of stepmother and her former husband), sister-in-law (brother's wife), living wife's sister, daughter-in-law, stepdaughter, granddaughter, or daughter of stepson or stepdaughter. It is clear that marriage with a deceased wife's sister is not forbidden, but it has been argued that the near relatives of the wife equally with those of the husband are within the forbidden degree to him and that, as the wife's mother and daughter are barred, so also, by analogy, is the wife's sister. Whatever its anomalies or defects, there is no doubt that by this law a high ideal of domestic and social purity was maintained. The pre-Islamic Arabic custom, authorized by Mohammed, was closely similar. See INCEST.

The ancient custom of levirate marriage requires to be considered here. According to the story in Gen. xxxviii., it was an obligation resting upon a man to take in marriage the childless widow of a deceased brother and "to raise up seed to his brother." The Deuteronomic law provides that where brothers live together, if one die without sons, the widow shall not marry a stranger, but that her husband's brother shall take her, and that the first-born son shall be reckoned the son of the dead brother and shall succeed to his inheritance. Apparently there is a twofold purpose here—to perpetuate the husband's name and to prevent the alienation of the property. The widow is permitted to insult publicly an unwilling brother-in-law by loosing his shoe and spitting in his face (see ḤALIẒAH). Thenceforth his name is to be called in Israel "the house of him that hath his shoe loosed" (Deut. xxv. 5–10; comp. Matt. xxii. 24–25; Mark xii. 19; Luke xx. 28). A slightly different example of the same custom is presented in the Book of Ruth. Indeed, the custom has been shown to have been widely prevalent outside of Israel (Westermarck, "History of Human Marriage," pp. 510–514). It is difficult to determine whether or not the law in Lev. xviii. 16 and xx. 21 is intended as an abrogation of the old levirate law. More probably Leviticus states the general rule to which the levirate is a particular exception (see Nowack, "Lehrbuch der Hebräischen Archäologie," i. 346; Driver, "Deuteronomy," *ad loc.*). See LEVIRATE MARRIAGE.

Duties of Husband and Wife.

The wife was regarded as property (see Ex. xx. 17; comp. the Hebrew terms "ba'al" = "husband" and "be'ulah" = "wife"; literally, the "owner" or "master" and the "owned"). She was, however, valuable property and was, as a rule, well cared for. She was not isolated as among the Mohammedans, but had considerable freedom and influence. In the wealthier homes she must often have had a large measure of independence, and in the royal household she sometimes became an important power in the state. It will be sufficient to recall the stories of Sarah and Rebekah; of Deborah, a prophetess, the wife of Lappidoth, who judged Israel; of Jael, the wife of Heber the Kenite; of Abigail (Nabal's wife) and the Shunammite woman; of Jezebel and Athaliah. In the prophetic account of the Creation (Gen. ii., iii.) she is made a helpmeet for her husband, bone of his bone and flesh of his flesh. In the home the innermost apartment was hers, or, in some instances, a separate house (Judges xv. 1, xvi. 9; I Kings vii. 8). She performs the ordinary household duties or manages the affairs of her household and directs her servants (I Sam. ii. 19; Prov. xxxi. 10 *et seq.*). She must be chaste and obedient, and infidelity on her part is looked upon as a gross sin (Gen. iii. 16; Deut. xxii. 20 *et seq.*; Ezek. xvi.; John viii. 5–7). A false accusation against her is severely punished (Deut. xxii. 13 *et seq.*); a curious ordeal is prescribed in Num. v. 11–31 for testing the truth or falsity of a charge of infidelity. Adultery is strictly forbidden in the moral code and is denounced by the Prophets as a crime comparable to stealing, murder, false swearing, and idolatry (Ex. xx. 14; Jer. vii. 9, xxiii. 10; Hos. iv. 2; Mal. iii. 5). The husband must provide his wife with food and raiment. While greater laxity was evidently permitted to him than to the wife, yet conjugal fidelity was highly esteemed and sexual license regarded as foolish and even fatal (Judges xix.–xx.; II Sam. xi.–xii.; Prov. ii., v., vi., vii.). In the New Testament love and fidelity on the part of the husband, and obedience on the part of the wife, are inculcated (Acts xv. 29; Ephes. v. 22–33; Coloss. iii. 18–19; I Thes. iv. 3–6).

Betrothal and Nuptial Rites.

The first step toward marriage was betrothal, involving the consent of the parent or guardian of the girl and the payment of a price. The act of betrothal is expressed by the Hebrew word "aras"; the price paid, by "mohar" (see Gen. xxxiv. 12; Ex. xxii. 16–17; Deut. xx. 7, xxii. 29; Hos. ii. 19–20). The mohar may be in the form of service in the field or in war (Gen. xxix.; I Sam. xviii. 25). Probably it was customary, even in early times, to give the bride some portion of the mohar, or at least to give her presents (Gen. xxiv. 53, xxxi. 15, xxxiv. 12). After betrothal the bride might be taken to her husband's house and the nuptials celebrated either immediately or later (Gen. xxiv. 49-67; Judges xiv. 5 *et seq.*). The initial steps, it appears, were customarily taken by the parents of the suitor, who formally made the proposal (Gen. xxiv., xxxiv. 4–6; Judges xiv. 2, 10). Not infrequently, however, in the comparatively free social intercourse of those days, the young man and woman had met and formed a mutual attachment resulting in a love-match (Gen. xxix. 9–12, 18; I Sam. xviii. 20, 28).

The bride did not always go to her husband empty-handed. Sometimes she received gifts from her father, and a king's parting gift to his daughter was in one case a conquered city (Josh. xv. 16 *et seq.*; Judges i. 12 *et seq.*; I Kings ix. 16). In post-exilic times mention is made of a wife's dowry and of a woman being able, by her own wealth, to support her husband (Tobit viii. 21; Ecclus [Sirach] xxv. 22). Mention is made also of a written marriage-contract (Tobit vii. 14).

After betrothal the bride was subject to the same restrictions as a wife (Deut. xxii. 23–24). Of the marriage ceremonial little is known; it is not mentioned at all in the story of Isaac, while in that of Jacob (Gen. xxix.) a marriage-feast and a nuptial week are spoken of. The central features in later times were the wedding-procession and the wedding-feast. The bridegroom in festive attire and accompanied by his friends went to the home of the bride, whence she, likewise in bridal garments, veiled, and accompanied by her companions, was led to the house of his parents (Isa. lxi. 10; Judges xiv. 10–11; Jer. ii. 32; Isa. xlix. 18; Ps. xlv. 8–15). The procession was enlivened with songs by, or in praise of, the bride and bridegroom, and was lighted, if in the evening, by torches or lamps (Jer. vii. 34, xvi. 9, xxv. 10; I Macc. ix. 37–39; Matt. xxv. 1–12; comp. Ps. xlv. and the Canticles, possibly representing such wedding-songs). There followed the nuptial feast in the house of the bridegroom, and the subsequent festivities sometimes continued for several days (Matt. ix. 15, xxii. 1–14; John ii. 1).

Divorce.

The husband has the right to divorce his wife, but he was required by the Deuteronomic law to give her a writing of divorce (Deut. xxiv. 1). She may remarry, but if she is again divorced or is left a widow her former husband may not receive her again (Deut. xxiv. 2–4). Older practises are probably represented in Hos. ii. and II Sam. iii. 14. In two cases the right to divorce was withdrawn (Deut. xxii. 19, 29). The prophet Malachi protested most strongly against the practise (Mal. ii. 10–16). In the teaching of Jesus it is expressly condemned except on the ground of adultery (Matt. v. 31–32; Mark x. 2–12; Luke xvi. 18; comp. I Cor. vii. 11–13). See DIVORCE and GET.

——**In Rabbinical Literature:** Wedded life was regarded by the Rabbis as the most natural and the most exalted state. The unmarried man lives without joy, without blessing, and without good; also, according to others, without the Torah, without a wall (protection), and without peace (Yeb. 62b; Gen. R. xvii. 2). R. Ḥisda, in interpreting the expression "in want of all things" as used in Deut. xxviii. 48, said that it meant "without a wife" (Ned. 41a). Another amora, R. Eleazar, referring to Gen. v. 2, wished to deprive the unmarried man of his manhood (Yeb. 63a). It is therefore permitted for one to sell a scroll of the Law if the money is needed for the purpose of getting married (Meg. 27a; Yer. Bik. iii. 6; comp. DESECRATION). At marriage all sins are forgiven (Yeb. 63a; Yer. Bik. iii. 3).

One should be careful in selecting a wife. A say-

Choice of Wife.

ing current among the Rabbis was, "Hasten to buy land; deliberate before taking a wife; descend one step in choosing a wife; ascend one step in choosing the best man" ("shushbin"; Yeb. 63a). One should first establish a home and plant a vineyard, and then marry (Soṭah 44a). The pursuit of the study of the Law, however, should be postponed until after marriage, when a man is settled in mind and can devote himself entirely to that vocation (Yoma 72b; Men. 110a; comp. Ḳid. 29b).

To marry a woman for her wealth was deprecated by the Rabbis (Ḳid. 70a; "Seder Eliyahu Zuṭa," ch. iii., ed. Friedmann, Vienna, 1902; Shulḥan 'Aruk, Eben ha-'Ezer, 3, 1, Isserles' gloss; "Sefer Ḥasidim," §§ 1094, 1096, ed. Wistinetzki, Berlin, 1891; see Dowry). The daughter of a respectable family is most to be desired (B. B. 109b); especially should the brothers of the bride be good and respectable men, for the character of the children is like that of the brothers of the mother (B. B. 110a; "Sefer Ḥasidim," §§ 1092, 1099, 1100). One should sell all he possesses in order to marry the daughter of a learned man (Pes. 49a, b; Ket. 111b; Yalḳ., Ex. 269; comp. Yoma 71a). A marriage between the daughter of a priest or of a learned man and an ignoramus ("'am ha-areẓ") will not be a successful one (Pes. 49a). All the promises of the Prophets will be fulfilled upon him who gives his daughter in marriage to a learned man (Ber. 34b); it is as if he united himself with the divine presence itself ("Shekinah"; Ket. 111b). It is deemed advisable that the wife should not be of a higher rank than the husband, in accordance with the homely saying, "A shoe that is larger than my foot I do not desire" (Ḳid. 49a). The Rabbis were very much opposed to marriage between an old man and a young woman, or vice versa (Yeb. 44a; Sanh. 76a, b); they also advised against marrying a divorced woman or a widow (Pes. 112a). Marriage should be contracted with no other intention than that of doing the will of God (Soṭah 12a; "Seder Eliyahu Zuṭa," ch. iii.).

Influence of Wife.

The acquisition of a good and virtuous wife was regarded by the Rabbis as one of the greatest blessings. The praise given to the virtuous woman in Prov. xxxi. is elaborated in Ecclesiasticus (Sirach), from which the Rabbis frequently quote the sentence: "Blessed is the man that hath a virtuous wife, for the number of his days shall be doubled" (xxvi. 1, Hebr.; comp. Yeb. 63b). He is rich who has a wife whose deeds are noble (Shab. 25b), for the wife can influence her husband more than he can influence her (see Gen. R. xvii. 1). In Palestine the custom was to address a man who had just been married with the question, "Maẓa o Moẓe?" referring to the initial words of two passages, Prov. xviii. 22 ("Whoso findeth a wife findeth a good thing") and Eccl. vii. 26 ("And I find more bitter than death the woman. . . ." (Ber. 8a; Yeb. 63b). The quarrelsome woman was abhorred by the Rabbis of the Talmud, so that one would rather have all the evils combined than a bad wife (Shab. 11b). Some of the prominent Rabbis are recorded as having suffered much from the spitefulness of their wives (Yeb. 63a; comp. B. B. 145b).

Physical beauty in woman was highly appreciated by the Rabbis; a beautiful wife is one of the things that contributes to man's happiness (Ber. 57b; comp. Yoma 74b). A woman that has beautiful eyes needs no further recommendation (Ta'an. 24a). "The highest attribute of a woman is her beauty" was the song of the maidens of Jerusalem at their gatherings on the Fifteenth of Ab and the Day of Atonement when wishing to attract the attention of the assembled youths (Ta'an. 31a). While it is commendable to marry soon after betrothal (Midr. Shemuel xvii. 4 and note, ed. Buber, Cracow, 1893), no one should marry a woman unless he has seen her beforehand (Ḳid. 41a; "Sefer Ḥasidim," § 1143). Similarity in stature or in complexion between the man and the woman was regarded with disfavor. A tall man should not marry a tall woman, nor a short man a short woman; a dark man should not marry a dark woman, nor a fair-complexioned man a fair-complexioned woman (Bek. 45b).

Marriages Made in Heaven.

The proverb that "marriages are made in heaven" is illustrated by a story in the Midrash. A Roman matron, on being told by R. Jose ben Ḥalafta that God arranges all marriages, said that this was an easy matter, and boasted that she could do as much herself. Thereupon she assembled her male and female slaves and paired them off in couples; but on the morrow they all went to her with complaints. Then she admitted that divine intervention is necessary to suitable marriages (Gen. R. lxviii. 3-4). Even God Himself finds it as difficult an undertaking as the dividing of the Red Sea. Forty days before a child is born its mate is determined upon (Gen. R. lxviii. 3-4; Soṭah 2a; Sanh. 22a; comp. M. Ḳ. 18b; "Sefer Hasidim," § 1128).

R. Jose asked of Elijah, "The Bible calls the wife a helpmeet; in what manner does she assist her husband?" To this Elijah replied, "A man brings wheat to his house, but he would have to chew the grains of wheat; he brings flax to his house, but he would have to clothe himself in flax—were it not for the wife, who [in preparing these materials] enlightens his eyes and helps him onto his feet" (Yeb. 63a; Leḳaḥ Ṭob to Gen. ii. 18; comp. "Seder Eliyahu Rabba," x. [ix.], where the story is given at greater length). To the worthy man the wife is a helpmeet; to the unworthy man the wife is a hindrance (Yeb. 63a).

The term "ḳiddushin" (sanctification), by which the act of marriage is designated in rabbinical writings, points to the reverence in which this ceremony was held. "He thus prohibits her to the whole world as a sacred object" is the explanation given to that term (Ḳid. 2b). Marriage was the symbol frequently employed by the Prophets to designate the relation between God and Israel (Hos. ii. 2-22; Isa. lxii. 4-5, liv. 6; Jer. iii. 1, 20; Ezek. xvi.; *et al.*). The love-songs of Canticles were taken by the Rabbis to refer to the love of God for Israel (see "Aggadat Shir ha-Shirim" to Cant. viii. 5; "Seder Eliyahu Rabba," ch. vii. [vi.] and x. [ix.]; *et al.*); God betrothed Israel with few gifts in this world, but the marriage which will take place in the Messianic time will be attended with many gifts (Ex. R. xvi. 30). The relation of Israel to the Torah is also symbolized as that of man to wife. The Torah is betrothed to Israel and therefore forbidden to every other nation (Ex. R. xxxiii. 8; Sanh. 59a; Pes. 49b).

——**Statistics:** The number of marriages and the conditions under which they are contracted differ in the Jewish from those of the surrounding population. A smaller proportion marry, though these, for the most part, marry earlier than their neighbors. However, the changed social conditions in Germany in recent years are tending to modify the proportions. **Frequency.** The number of Jews marrying to every thousand of the Jewish population (including children) is almost invariably less than among the general population, as may be seen from the following table:

Jews live generally in towns, and fewer town-dwellers marry than country people. There is a larger preponderance of Jewesses over Jews in most of the countries of western Europe, where emigration removes the young men, and this slightly reduces the rate of marriage. In fact, the rate is probably illusory because reckoned on the whole of the population, including children. The larger the number of marriages the larger the number of children, and, therefore, the larger the population. Thus because the number of marriages among Jews is really greater, it has the appearance of being smaller.

Age. The age at which marriage is contracted affects more than any other circumstance the physical, mental, and social characteristics of the offspring, determining the average duration of a generation, the fertility of marriage, and the physical and mental health of children, and, it has been conjectured, the proportion of sex to sex in the offspring. The most important ages are those below 20 and those between 20 and 30, the latter being the normal and more desirable period for marriage. The following details are known with regard to Jewish marriages at these ages. The figures in parentheses refer to females.

The relatively early marriage of Jews was noticed in 1841 by Hoffmann, who mentions that 78.6 per cent of Jewish marriages in Prussia between 1822 and 1840 occurred under the age of 40 as against 74.6 of the general population ("Jour. Stat. Soc." ix. 80). Körösi attempts to prove that Jews have the fewest abnormal marriages (that is, where the bride is under 18, or over 40, and the bridegroom over 40)—12 per cent as against 35 per cent among Catholics, and 33 per cent among Protestants ("Statistisches Jahrbuch," 1873, p. 37). In Russia, however, the general population appears to marry earlier than the Jewish. The proportion of protogamous marriages, or first marriages, is larger among Jews than among Gentiles, as may be seen from the following table giving the percentage of such marriages:

Place.	Epoch.	Jews.	Christians.	Authority.
Austria....	1861-70	87 (93)	82 (89)	Schimmer, "Stat. der Jud." 1873, p. 6.

Russia......	1870	74 (80)	82 (87)	"Jour. Stat. Soc." 1880, p. 363.
St. Petersburg.	1866-72	83 (78)	85 (87)	Körösi, *l.c.* p. 172.

This is probably due to the greater viability of Jews, since the longer husband and wife live the less likely either is to contract a second marriage. Thus among Jews in Budapest in 1870 no less than 66 per cent of those over 50 had husband, or wife, living, as against 51 per cent among Catholics and 53 per cent among Protestants ("Statist. Jahrb." 1873, p. 38). **Consanguineous Marriages.** It is probable that Jews more frequently than others marry their cousins. Jacobs has shown this for England, where marriage of cousins occurs to the extent of 7.5 per cent of all marriages as against 2 per cent in the general population ("Studies in Jewish Statistics," ch. i.); Stieda has shown the same for Lorraine, where such marriages occur in the proportion of 23.02 per 1,000 among Jews as against 1.86 among Protestants, and 9.97 among Catholics.

The following table gives the proportion of intermarriages between Jews and Christians, and between Christians and Jewesses, at the times and places mentioned:

Place.	Epoch.	Jews–Christians.	Christians–Jewesses.	Authority.

Vienna....	1865–74	2.60	3.06	Körösi, *l.c.* p. 18.

Relatively speaking, mixed marriages are not very numerous (see INTERMARRIAGE).

Divorces.

The creeds professed by divorced persons are rarely given, so that it is difficult to ascertain whether Jews are divorced more frequently than others. In Bavaria, between 1862 and 1865, divorces were 5.1 per cent in Jewish marriages as against 6.1 per cent in Protestant and 5.7 per cent in Catholic marriages ("Annales de Demographie," 1882, p. 290). In Berlin, 1885–86, Jewish divorces were 2.7 as against 3.6 for Protestants and 2.7 for Catholics; ten years later the figures were—Jews, 3.3; Protestants, 4.7; Catholics, 3.3 (Ruppin, *l.c.* 1902, p. 385).

J.

MARRIAGE-BROKER. See SHADKAN.

MARRIAGE CEREMONIES: Association of the sexes was much restricted among the Jews, and the BETROTHAL was generally brought about by a third person, often a professional match-maker ("shadkan"). The latter received a brokerage-fee fixed by law, as a rule a small percentage of the dowry, the sum being doubled when the contracting parties came from a distance. It was paid by either of the parties, or each paid one-half, at the betrothal or after the wedding. The rabbi, as a person enjoying special confidence, was also often employed as intermediary; it is well known that Jacob Levi of Mayence lived upon fees thus derived, while he devoted his income as rabbi to assisting his pupils. Although the marriage preliminaries were exclusively the concern of the parents and their agents, yet the young people were in nowise forced into the contract.

Early marriages were frequent; apart from moral considerations, they were often due to political conditions; in Russia, for example, the Jews were subject to conscription, but those who were married men were excused from military service. Social conditions also had some influence: a father, possessing the dowry for his child, urged the marriage so as to secure the dowry to her before one of the numberless persecutions robbed him of it. The betrothal was concluded, conditionally or definitely, as soon as the amount of the "ḳenas" (the penalty for breaking the contract) was fixed; however, it had, generally, no religious or legal significance, since the Talmudic custom of immediately connecting the betrothal ("ḳiddushin") and the nuptial ceremony ("erusin"), and of having the marriage proper follow later ("nissu'in"), fell more and more into disuse in the Middle Ages. At the betrothal the stipulations made by each party were fixed ("tena'im rishonim"), and a glass was thrown upon the floor, the broken pieces of which were saved to be laid upon the eyes of the espoused pair after death.

In Poland, even to-day, the bridegroom receives pastry ("chosenbrod") when he visits his betrothed.

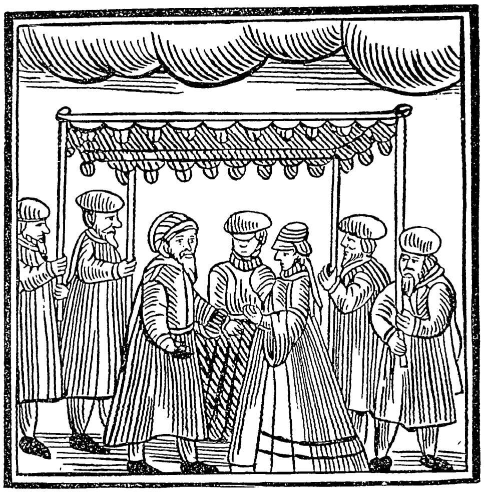
Preliminaries.

During the week before the wedding-day the betrothed pair was allowed to leave the house only when accompanied. On Friday evening, or sometimes two Sabbaths, before the wedding, a feast was given in honor of the parents; this feast was commonly called "spinnholz" ("sponsalia" or "spindel"), or, in Poland, "vorspiel." On the day before the wedding the most prominent members of the community carried the presents of the groom to the bride with special ceremonies; as was customary also in non-Jewish circles, the presents consisted generally of a girdle, veil ("covering" before the ceremony still obtains, in conformity with Rebekah's example), mantle ("kursen"), and wreath, subsequently also of a "siflones tefillah," a prayer-book with the inscription אהבה ואחוה שלום ורעות ("Love, fraternity, peace, and good-fellowship"). Among the Greco-Turkish Jews a ring was included, called "nissu'in"; among the Greeks and Romans it was called "symbolum" (hence the Jewish "siflones"). The groom received a ring and shoes, later a ṭallit and a shroud. The rings were handed down in the family; the rings were formerly often of fine workmanship, having the miniature model of a synagogue carved on them and the inscription בטב גדא, later מזל טוב (= "good luck").

Day of Wedding.

Two weddings on one day, especially of brothers or sisters, were avoided, and it was considered unlucky if the father-in-law and the son-in-law had the same name. In Talmudic times virgins were married preferably on Wednesday, and widows on Thursday (later, on Friday afternoon), a custom that still obtains in the East. A wedding in Mayence at the end of the fourteenth century took the following course: Early in the morning the "schulklopfer" invited the whole community to the ceremony. The leaders took the bridegroom, with music and candles, to the court of the synagogue; then the musicians and candle-bearers brought the bride with her friends and an escort of women. At the door of the synagogue the groom took the bride's hand, while the two were showered with wheat and coins (given afterward to the poor), and Ps. cxlvii. 14, and later Gen. i. 28 ("Be fruitful, and multiply"), were recited as a greeting; after this they sat for a short time, hand in hand, on the bench in front of the synagogue. Then the bride was escorted home, where she put on the festive robe of the married, and under it the shroud ("sargenes"). The groom also modified his festive appearance by drawing the hood ("gugel") over his head, which he strewed with ashes; even to-day the groom in eastern Europe wears the sargenes. With this sign of mourning for Zion even at the height of human felicity, belonged in Talmudic times another—the breaking of a glass, the pieces of which were gathered up by girls "for luck," while the "shammas" cried out "Zeh ha-ot" (= "This is the sign"), and all present responded "Mazzal ṭob." The grief at Zion's loss appeared likewise in the mournful strains of the wedding-songs in the Talmud, as also in the poems of Judah ha-Levi, who first composed individual "carmina" on the model of Ps. xlv. and the "kallah" songs down to the eighteenth century.

As soon as the groom had sat down beside the Ark of the Law, the morning prayer began, after which the bride was led with music to the door of the synagogue; thence she was escorted by the rabbi and the elders of the community to the bemah (see ALMEMAR), taking her place at the right of the groom (comp. Ps. xlv. 10 [A. V. 9], in which the last letters of the words נצבה שגל לימינך ["upon thy right hand did stand the queen"], taken in reverse order, spell כלה ["bride"]), where the mothers of the young couple stood. Bride and groom were covered with the ṭallit, or with the long end of the groom's gugel, and wedded. Later the wedding-tent ("ḥuppah") came into use; this was a reminiscence of the litter in which the bride was formerly carried or of the room in which the couple were left alone for a time. **The Ḥuppah.** Then the groom was escorted home, and after him the bride, whom he met at the door and as she entered he placed her hand on the upper post, thus making her the mistress of the house. The wedding-festival proper, in the bride's house, did not begin until the evening; it lasted until Sunday morning, but was interrupted by the Sabbath morning service. At this, as at every service, the groom was the center of interest; in his honor songs were rendered that grew more numerous as marriages became less frequent, and more solemn as the social and political condition of the Jews was rendered more unfortunate. On returning home the groom handed to his young wife his mantle, girdle, and hat to signify that she shared his property.



Marriage Ceremony.
(From a Passover Haggadah, Amsterdam, 1695.)

The bridal procession (mentioned in Biblical writings) was headed, among the Spanish Jews, by mimes, fiddlers, and armed riders. In Egypt the bride was decked with helmet and sword, while the groom and his escort wore feminine garments and colored their finger-nails with henna, as women did. The women played the cymbals and danced. Even the most dignified scholars, also, danced in Talmudic times. Later, music was regarded as an essential part of the wedding, non-Jews being engaged to play on the Sabbath, while on the other hand Jewish musicians played at the festivities of Christians. The garlanding of the bridal pair, a custom of Biblical origin that was carried to an extreme of extravagance, ceased with the destruction of the Temple; yet the myrtle-wreath of the bride has been retained. Even in New Testament times young girls with torches escorted the pair (Matt. xxv.); in Arabia a pole to the top of which a light has been fastened is carried at the head of the procession. In Bagdad the groom is accompanied to the house of the bride by poor people carrying lamps, and he distributes for this service coins among them. On the way the poor thrust live sheep in front of him, and whenever he steps on the head of one he gives a certain amount to its owner. The bride is usually led seven times (or at least once) around the groom; or both sit while the people, old and young, dance around them. According to an ancient Persian custom in Talmudic times, nuts and flowers were strewn in the path of the pair, and they were showered with barley which had been planted in a pot shortly before the wedding (on the use of hops in this connection see Hehn, "Kulturpflanzen," p. 488; and on the use of rice among the Indians, whose wedding-customs are very similar to those of the Jews, see Dorville, "Gesch. der Verschiedenen Völker des Erdbodens"). On the birth of a boy a cedar was planted; on that of a girl, an acacia; and when the girl became a bride her litter was made from the branches of that acacia. In Germany the young couple's first meal consisted of milk and honey, and salt was sprinkled in the house (comp. Num. xviii. 19). **Wedding-Feast.** In Ṭur Malka two hens are carried before the couple, and after the wedding chicken is placed before them ("chosenhühndel"). In the East they jump over a vessel containing a fish, and in Germany fish was formerly eaten on the second day of the wedding-week; all these customs are symbols of fertility.

The fasting of the bridal pair dates back to the Talmud; it is either due to the fact that their sins are forgiven or is intended to remind them of the duty of temperance. The wedding-songs were often in the form of riddles, following Biblical precedent (Samson's wedding), and were improvised especially by the jester ("marschalik"), who, however, at times moved his hearers to tears by serious speech, as he still does in eastern Europe. Plays also were given, a practise which prevailed otherwise only at Purim.

Before the fourteenth century the presence of the rabbi was not required; nor did he speak at the ceremony, though he did at the feast, when the groom likewise delivered a "derashah" (Talmudic discourse; hence the use of the word "derashah" for wedding-gifts). Weddings were occasionally celebrated in the open air in the Middle Ages, although the Talmud protested against the custom; it was done probably because of the limited space in the synagogue or in the bride's house; later the custom was interpreted symbolically (comp. Gen. xv. 5). At the synagogue service on the Sabbath after the wedding the congregation read to the groom the chapter on Isaac's marriage, a custom that ceased in Europe with the seventeenth century. In the East the Arabic translation is read in addition to the Hebrew.

During the seven blessings at the ceremony the bride and the groom, in accordance with a widespread superstition, each tried to secure the mastery in the household by putting one of the feet on the foot of the other. At the time of the Geonim (as occasionally to-day in the East) these seven blessings were uttered twice—once in the house of a relative of the bride, whither the latter had been taken from her father's house on the evening before the day of the wedding, and once in the house of the groom.

The "Ketubah."

The ring, without stone or inscription, is put on the first finger of the bride's right hand. The marriage certificate, the wording of which varies according to time and place (Chorny, "Sefer ha-Massa'ot," p. 242; Rinman, "Mas'ot Shelomoh," pp. 156, 159; Kaufmann, in "Monatsschrift," 1897; S. Krauss, in "Zeit. für Hebr. Bibl." 1901; A. Berliner, in "Meḳiẓe Nirdamim," ix.), dates from the Hellenistic period; among the Sephardim, especially the Italian Sephardim, and in Cochin, it was artistically ornamented. In early times it often bore the portraits of the bridal pair. Among the Jews of the Caucasus it is sometimes put in the grave (Chorny, *l.c.* p. 26).

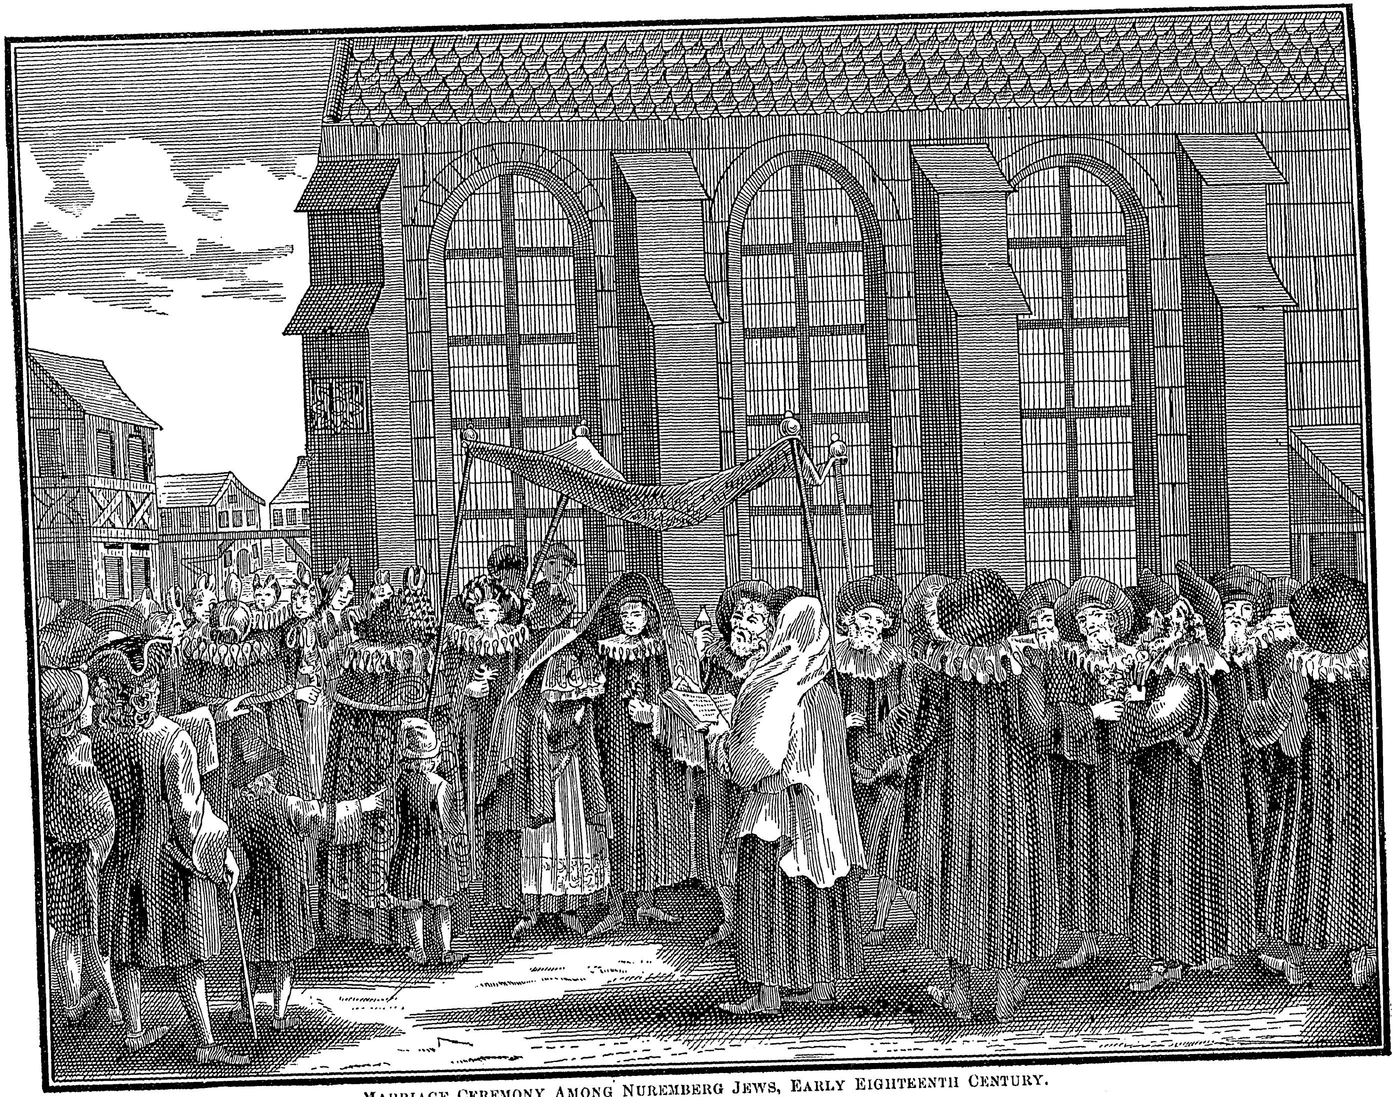
The reports of travelers concerning the marriage ceremonies among the Oriental Jews are interesting. Thus Rinman tells of the White Jews at Cochin: If the contracting parties have come to an understanding, the couple are taken before the elders of the community, the eldest of whom asks the groom whether he consents to the union; if he has parents, he answers, "The will of my parents is my will"; if not, "I desire her." Then the bride is questioned, and if she also consents, the elder takes a cup of wine and drinks to the health of the pair, the others present doing likewise; then they partake of coffee and confectionery and leave. On the day of the wedding the groom wears a white turban and the bride a fine cap; after the ceremony both clothe themselves in red silk, and on the seventh day in green silk or in silk of some other color.

Customs of Cochin.

The costs of the feast are borne by the father of the bride, the father of the groom furnishing only wine and meat (often forty beeves during the fifteen days of the feast, although beef is given only to the servants, the guests being fed with fowl). The owner of the largest house in the community surrenders his apartments for the wedding festivities. On the Sabbath the groom spreads a feast for his friends; then the whole community goes to the house of the bride to escort her to the house of one of her relatives, who serves coffee to them. At the end of the Sabbath the bride is led to the house in which the ceremony is to take place, and there the people eat and drink until after midnight. On the following evening the bride is led to the miḳweh, or ritual bath. On Tuesday morning the goldsmith comes to make the ring for the bride, which she wears until her death. While she puts the ring on, the women sing Malabarian songs. In the evening the groom is led with music to the synagogue, where he stands on the steps before the Ark of the Law and recites the evening prayer with the congregation. Then the whole community, with the sound of trumpets and drums, calls for the bride, who walks under a kind of sun-umbrella carried by her father, in accordance with a Talmudic law. She sits down with her bridesmaids to the right of the Ark; before her stands a silver inkstand, to be used by the signatories to the ketubah.

The groom, in the ṭallit, sits down opposite her with his two best men; the ḥazzan thereupon fills a golden cup with wine and gives it to the groom, receiving in return 7½ francs; and the groom, reciting the first blessing, drinks part of the wine and gives some to the bride. Then he hands her the ring, with the words: "Thou,——, daughter of——, art betrothed unto me, ——, son of ——, according to the law of Moses and Israel." Thereupon the ketubah is read to a certain melody, and the groom gives it to the bride, after having thrice repeated, "Here is thy ketubah." The ḥazzan then causes the groom to take hold of his ṭallit, and to promise that he "will fulfil his duties as husband." After the ḥazzan has pronounced the seven blessings, the bride is unveiled, to the song "Yafah kalebanah," based on Cant. vi. 10. Hand in hand, the young couple now proceed, with music and torch-bearers, and followed by the people, to the house in which the festivities are to be held. There the groom dances with his friends and the bride with hers, and all partake of refreshments. At 10 o'clock they sit down to the feast, the bridal couple at the head of the table, and next to them the leaders of the community, men on the one side and women on the other. The old people call out "Yeḥi he-ḥatan weha-kallah!" (Long live groom and bride!), and the young people answer, "Hep! Hep!" (This custom is derived from the Portuguese.) The ḥazzan then sings, the community responding, after which the elders sing, and the ḥazzan pronounces grace and intones Ps. cxi., "Eshet Ḥayil," and finally the seven blessings (a different elder of the community blesses the bride and groom on each of the seven wedding-days). Then the young people dance with the groom, clap their hands, and again sing Ps. cxi.

On Wednesday evening the groom goes to the bride, who has assumed a white gown, which the women take away as soon as the groom is gone. The next day the elder women, after a meal, gather to pass judgment on the virtue of the young wife. On the following Sabbath there is another feast. In the synagogue is read from a printed copy of the Torah the section, "And Abraham had reached the days," with the Aramaic translation. After the service



Marriage Ceremony Among Nuremberg Jews, Early Eighteenth Century.

(From Kirchner, "Jüdisches Ceremoniel," 1726.)

every one gathers in the house of festivity; the bride, in gorgeous garments, with a wreath of pearls on her head, stands in front of her throne, the women sing before her, the men eat, drink, and dance, and then all sit down to dinner. Smaller feasts are held daily until the following Wednesday. On Tuesday evening there is a greater feast, when the guests present their gifts. There is no difference between the weddings of the rich and the poor, since the rich give to the poor everything that is required for the occasion.

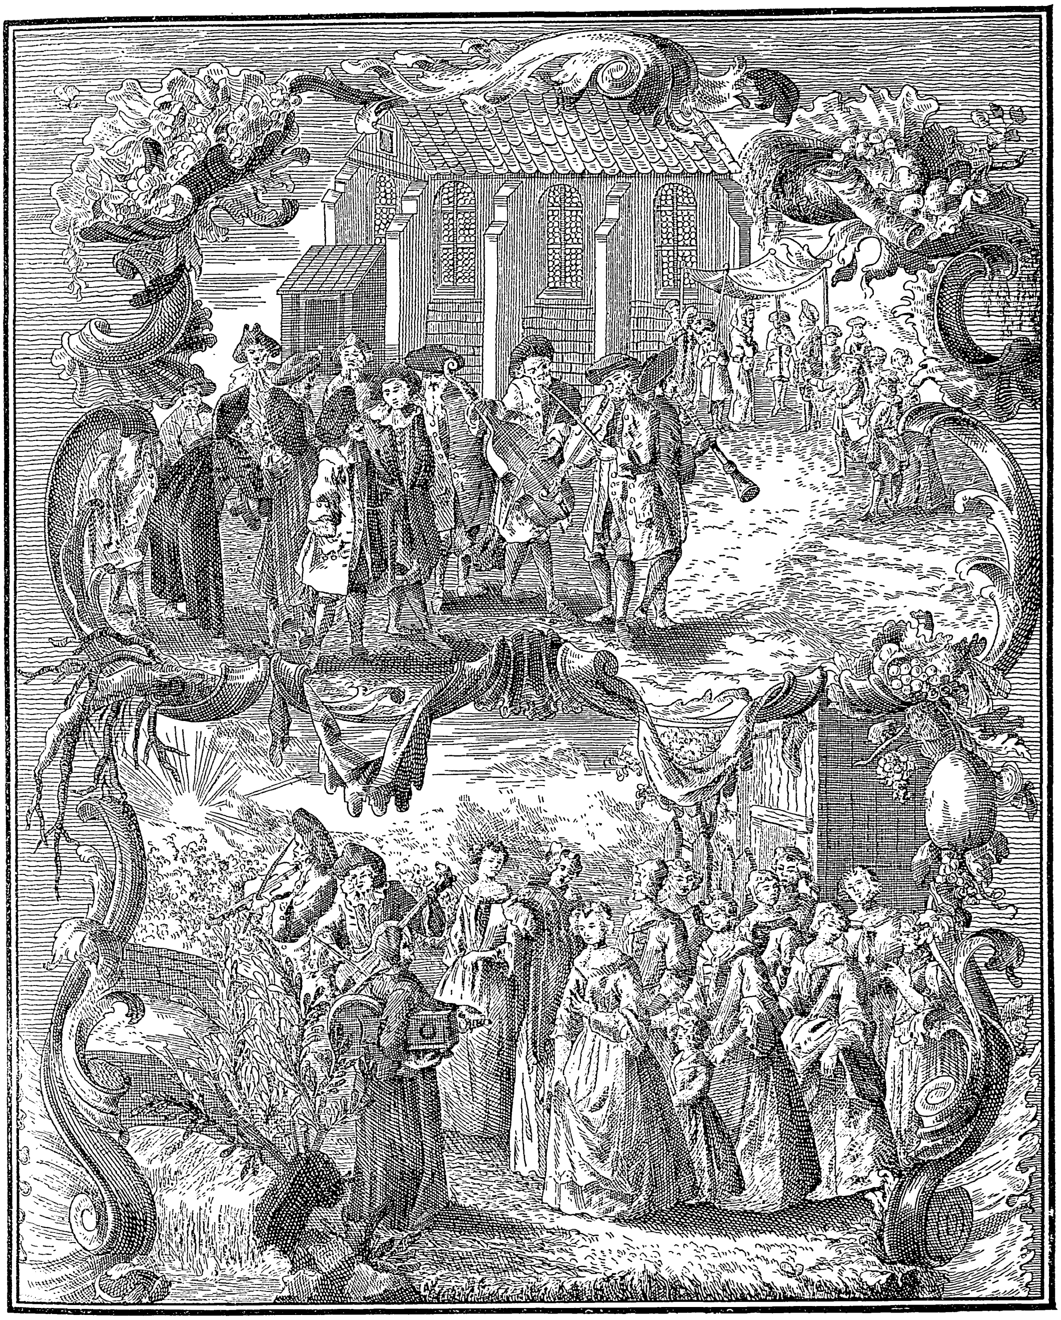
In Ceylon.

In Cochin and among the Cingalese the following order is observed: The bride counts seven days from the day on which the groom declares his intention of marrying her. On the night before the eighth day she takes a bath, the women assisting her, and singing. The next night, called "kofa," she is led with music to the women's ritual bath, after which the rabbi sings a song beginning "Yafah kalebanah Torah" (an acrostic containing "Yiẓḥaḳ"); a Torah-roll, opened at the Decalogue, is placed before the bride, who kisses it while putting her hand to her eyes. Then the rabbi blesses her, placing his hand on her head. The people eat, and sing acrostics with the names "Abraham" and "Solomon"; after washing their hands they say grace and go home. On the following day they gather again in the wedding-house; the bride places the presents of the groom in a vessel, and the goldsmith examines the gold and silver to see that they are not below the minimum value of one "peruṭa" or mite each. Here, also, the women sing. At a second gathering on the same day the groom appears with his hair cut, having bathed and donned new garments, including a new turban; as soon as he comes to the table the guests sing Ps. cxxii., the groom is placed among them, and they recite Esth. viii. 15 *et seq.*; he is then blessed and sits down at table. This meal is called "ajni." After dinner the rabbi sings "Kalil ḥatan li-beraḳah," and the several blessings of grace are recited in turn by various guests. The next evening the people proceed with music and songs to the synagogue, where the groom and his best men ("shushbinim") light four wax candles; then the procession marches to the wedding-house, where the bride is waiting. She is placed on a chair, wrapped in a large cloth, and the groom stands in front of her and quotes again from the Book of Esther (viii. 15 *et seq.*). Then the groom himself, as is customary in Yemen, pronounces, according to the version of Maimonides, the first blessing over a cup of wine, to which a silver ring is attached by a white thread. He tastes the wine, takes off the ring, and gives the cup to the bride with the words "Ba ḳiddushiki." After drinking she gives the cup to some one in the circle. The groom next places the ring on the little finger of her right hand, using the same words as before, and the rabbi reads the marriage certificate, after having obligated the groom (by taking hold of his mantle—"meḳabbel ḳinyan"—three times) to fulfil the chief duties of the husband as stated in the certificate. The certificate is signed by the groom and two witnesses, and then given to the bride. Songs follow, the bride is unveiled and placed in a litter, and cups of wine are given to the groom and the rabbi, who pronounces the seven blessings. The ceremony ends with a song.

On the Sabbath morning the groom goes with his relatives to the synagogue, where he is received by the rabbi with the words of Ps. cxxii. He is called up as the eighth to read the Torah, while the leader in prayer recites a piyyuṭ—"'Arba'ah Kelilin." Before the second blessing the groom recites by heart from Gen. xxiv. After the Hafṭarah the words of Isa. lxi. 10 are pronounced before the blessings. When the groom leaves the synagogue the rabbi repeats Ps. cxix., etc. Arrived at home, the bride and groom are blessed by the rabbi, and the people eat and sing. On the eve of the seventh day of the wedding-week the bride and groom are led with music to the synagogue, the rabbi reads Ps. xliv., and the groom recites the evening prayer; then they go to the wedding-house, where the rabbi repeats "Yafah kalebanah," and the people feast and sing "Yismaḥ ḥatan be-kallah."

In the town of Tilla on the Sabbath the passage Gen. xxiv. is read to the groom from a second Torah-roll, and the superintendent of the synagogue renders the song "Mi Kamoka," by Judah ha-Levi (in the Sephardic maḥzor for Purim). On the morning of the third day the friends of the groom color his hands and feet red (the people go barefoot in Tilla); in the evening there is a great feast, after which they shave the groom's head and put on the turban the bride has given him, he, on his part, having presented his friends and the brothers of the bride with turbans; all then proceed, with dancing and singing and with torches, to the house of the bride. There the groom pronounces one blessing over a cup of wine and the others over a second cup; he takes a ring and coins of gold, copper, and (chiefly) silver, and says to the bride, in Aramaic: "Be hallowed and be betrothed unto me, ——, the bridegroom, thou, bride and virgin [divorcée or widow], by this cup of wine and by this coin; on account of them thou shalt pass into my possession, according to the law of Moses and of Israel." After having given her wine, he offers her the money and the ring, before witnesses, and translates from the Arabic the marriage certificate, which he also gives her. The congregation sings the seven blessings together with songs in honor of the couple, and the choir-leader recites Ps. iii., the people responding "Hallelujah." Then the groom says, "You have blessed me, may God bless you; you have made me glad, may God make you glad," and drinks the wine. On Friday evening there is a feast in the house of the bride, at which the groom gives her the wedding-gift. On the Sabbath she is taken to the house of the groom, where the festivities last for seven days, on each of which the seven blessings are recited. During this time the groom sits daily for one hour under the ḥuppah.

In Bagdad the palms and the soles of the bride and her friends are colored with henna the night before the wedding. The people make merry first in the house of the bride, then in that of the groom. The next day, about five hours before sunset, the "ḥakamim" accompany the groom and his relatives to the house of the bride. The ḥakam lifts the bride's veil in order to show her to the groom, but lets it fall



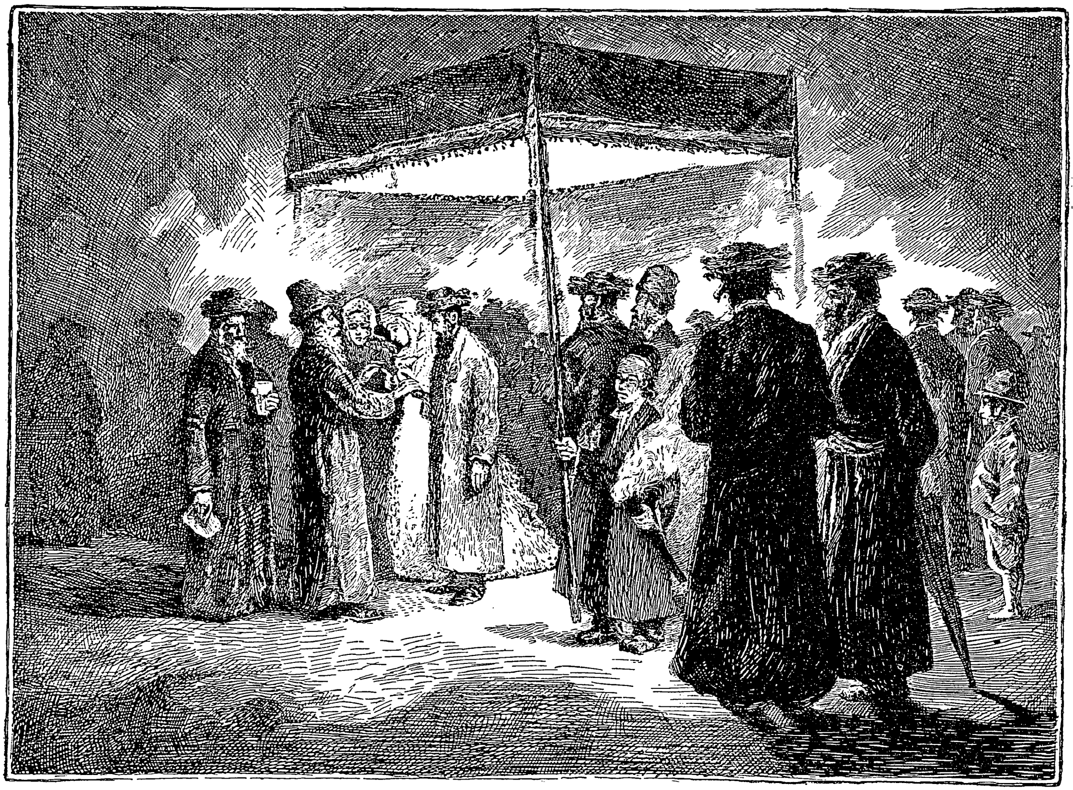
Marriage Processions Among German Jews, Eighteenth Century.
(From Bodenschatz, "Kirchliche Verfassung," 1748.)

again immediately. In Bagdad also the celebration lasts seven days.

In the Caucasus.

Chorny (*l.c.* p. 298) says that in the Caucasus the ceremony is always performed on Wednesday. On the preceding Thursday three or four girls, relatives of the bride, put on her clothes and invite other girls to sleep in a special room with her. Toward evening the groom sends meat and rice-flour to the bride and her friends. The latter go out to sprinkle the flour on the young people, who dance while the boys and girls clap their hands. On this evening also the groom spreads a feast for his friends. On Sabbath morning the friends of the bride, among whom there must be at least five grown persons, clad in the bride's garments, go from house to house leaving invitations to the feast and receiving wherever they may stop sugar, coffee, apples, or eggs.

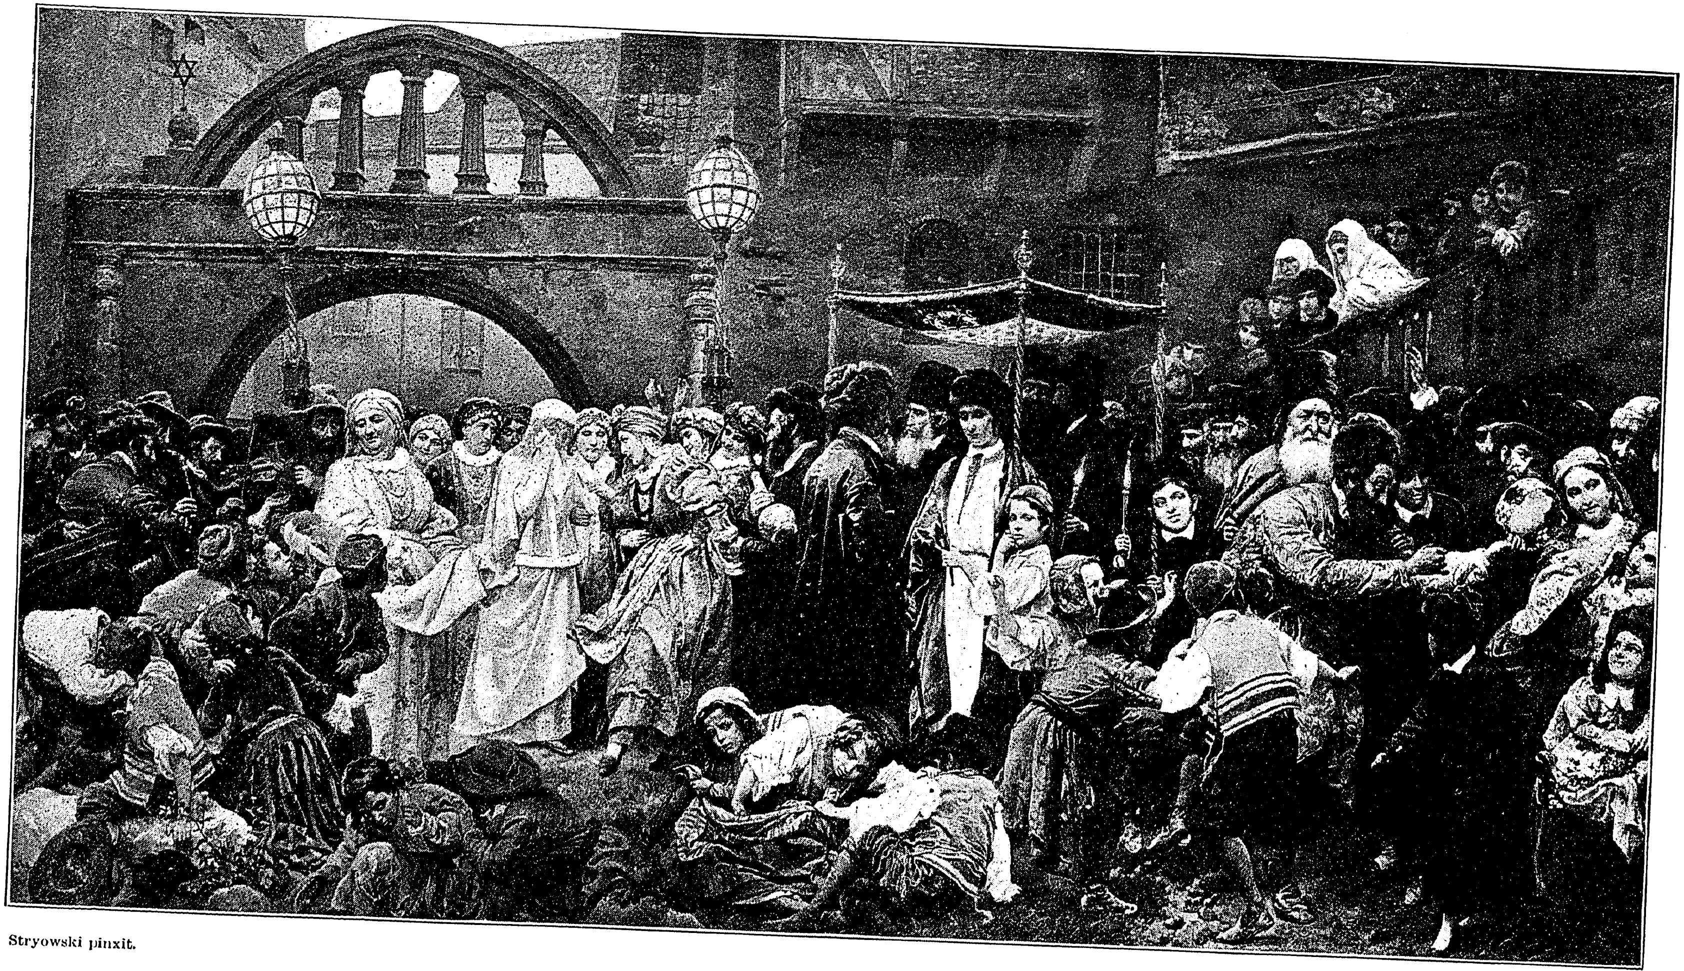
After the service, at which the groom is not called up for the Torah, which is read only after the ceremony, the guests accompany the pair to the house of the groom for a feast, and then to the house of the bride, where the men eat first and the women afterward, the girls furnishing music with harmonicas, trumpets, etc. On the Sabbath, as well as on the following day, the bride spreads a table for her friends; on Sunday the groom for his friends. On Monday and Tuesday the bride visits the friends of her household with her girl companions, who sing a Tatar song. She is clad in mourning to indicate her sorrow at leaving her parents' house. The visitors everywhere receive presents and refreshments. As they approach the house of the groom, his companions appear and pelt the procession with sand and small stones. The groom is similarly led about among his friends. If he is rich he is even obliged to have silk wedding-garments made for the members of his household.



Marriage Scene at Cracow.
(From "Oesterreichisch-Ungarische Monarchie in Wort und Bild.")

On Tuesday evening the father of the groom spreads a feast for the whole community. On Wednesday the bride and groom fast. About noon the rabbi, with a male relative of the groom and some women, goes to the house of the bride in order to inspect the clothing which she has had made with the money of the groom. Quarrels often arise on this occasion. If the father is wealthy he adds a sum of money to that which has been provided by the groom.

Then the groom and bride are taken to the sea for the bath, after which they put on the wedding-garments. The groom is preceded by young men, and the bride by girls, with drums and with hand-clapping and Tatar songs. While the hair of the weeping bride is being combed, the girls light the lamps; then the bride, kneeling, receives her mother's blessing. The brothers of the bride, if she has any, otherwise an uncle, lead her to the ceremony in the court of the synagogue, the girls following with lights, generally white candles ornamented with blossoms.



Stryowski pinxit.

MARRIAGE SCENE IN GALICIA.

The groom also is brought with songs from the sea; girls go to meet him in festive train, with dishes of confectionery, and with a branch hung with silken kerchiefs and coins. Arrived at home, he is kissed on the forehead by all the women; then, after having been blessed by his relatives, he is led with music to the court of the synagogue, where, under the ḥuppah, the rabbi with two pupils awaits the pair. The music ceasing, the groom goes under the ḥuppah, while the bride's parents are mourning at home for their child and those of the groom are preparing for the ceremony. The bride is led a few times around the groom, the bridesmaids and the others carrying lights. The ritual is that of the Sephardim; the rabbi sits during the ceremony, and both he and the groom hold a glass of wine during the blessings, drinking after each of them.

After the ceremony, guns and rockets are discharged; the bride, closely veiled by her attendants, is put on a horse, which a relative of the groom leads while another holds a mirror before her face; and with shouting and music the couple are led home, showered on the way with rice. Arrived at the house of the bride, the girls dance, and as soon as she crosses the sill the door-posts are smeared with honey, while a light burns over the door; at the same time the young men again discharge pistols. The musicians are then paid, and the wedding procession is ended.

Afterward the groom goes walking with his friends until the evening, when the men and the women eat in separate rooms without music. After the meal is finished the gifts, of gold only, are presented, the rabbi blessing each giver. The bride keeps with her in the room of the women only a sister and an aunt, if she has any, and a few friends. Late in the evening, after the guests have departed, the groom is led to the bride. After a time the young men call him out, discharging guns. The bride's mother must prepare for them a cock and a hen, or all her chickens will be stolen and killed. The bride and groom receive also money and fruit, the latter being eaten in the bride's room. The bride herself remains for twelve days behind a curtain, guarded by girls who demand pay from the groom.

In Grusia.

In Grusia (Georgia; Chorny, *l.c.* p. 129) the groom and bride are led in festive train from their homes to the synagogue, where they take their places beside the bemah. The ḥakam recites some piyyuṭim, translating them into Grusian, the ketubah also being written in Hebrew and Grusian. After a blessing upon the czar the groom covers himself and the bride with a ṭallit. While the ḥakam pronounces the first blessings the groom holds a ring and an earthen vessel containing wine. Then handing the ring to the bride, he breaks the vessel; covered by a cloth, the ends of which both hold, the bride and groom circle around the bemah, kiss the curtain of the Ark of the Law, and leave the synagogue.

A. M. Gr.

MARRIAGE LAWS: The first positive commandment of the Bible, according to rabbinic interpretation (Maimonides, "Minyan ha-Miẓwot," 212), is that concerning the propagation of the human species (Gen. i. 28). It is thus considered the duty of every Israelite to marry as early in life as possible. Eighteen years is the age set by the Rabbis (Ab. v. 24); and any one remaining unmarried after his twentieth year is said to be cursed by God Himself (Ḳid. 29b). Some urge that children should marry as soon as they reach the age of puberty, *i.e.*, the fourteenth year (Sanh. 76b); and R. Ḥisda attributed his mental superiority to the fact that he was married when he was but sixteen years old (Ḳid. *l.c.*). It was, however, strictly forbidden for parents to give their children in marriage before they had reached the age of puberty (Sanh. 76b). A man who, without any reason, refused to marry after he had passed his twentieth year was frequently compelled to do so by the court. To be occupied with the study of the Torah was regarded as a plausible reason for delaying marriage; but only in very rare instances was a man permitted to remain in celibacy all his life (Yeb. 63b; Maimonides, "Yad," Ishut, xv. 2, 3; Shulḥan 'Aruk, Eben ha-'Ezer, 1, 1-4; see Celibacy).

Age for Marriage.

The duty of marriage is discharged after the birth of a son and a daughter (Yeb. 61a). Still no man may live without a wife even after he has many children (*ib.*). Women are exempted from the duty of marriage, although, to avoid suspicion, they are advised not to remain single (*ib.* 65b; "Yad," *l.c.* 2, 16; *ib.* Issure Biah, xxi. 26; Eben ha-'Ezer, 1, 13; see Woman).

The consent of parents is not essential to the validity of a marriage (Shulḥan 'Aruk, Yoreh De'ah, 240, 25, Isserles' gloss). The Rabbis, however, urge great care in the choice of a wife. He who marries a woman unworthy of him is bound by Elijah and chastised by God; and concerning him Elijah writes, over the signature of God, "Wo unto him who profanes his children and degrades his family" (Ḳid. 70a; Derek Ereẓ R. i.). According to R. Akiba, he who marries a wife that is unworthy of him transgresses five Biblical commandments (Ab. R. N. xxvi. 4). While all families are presumptively pure and respectable, those that are at constant warfare with one another, or whose members are accustomed to call one another shameful names, or are known for their acts of cruelty and uncharitableness, are under suspicion of being of impure descent (Ḳid. 71b, 76b). The families most desirable for matrimonial alliances, according to the Rabbis, were classified in the following order: those of the scholar; the most prominent man of the community; the head of the congregation; the collector for charity; and the teacher of children. The family of the ignoramus ("'am ha-areẓ") is to be avoided, and one should not give his daughter in marriage to such a person (Pes. 49b; "Yad," Issure Biah, xxi. 32; Eben ha-'Ezer, 2; see 'Am ha-Areẓ).

To the degrees of prohibited marriages enumerated in the Bible (Lev. xviii. 6-18, xx. 11-21), the Rabbis added some new degrees, besides extending those mentioned in the ascending and the descending line. These additions are known in the Talmud by the name of "sheniyyot," *i.e.*, secondary, such as are given on the authority of the Soferim ("Scribes"). See Ḥaliẓah; Incest; Levirate Marriage.

Prohibitions of Marriage.

Prohibitions of marriage on grounds other than those of consanguinity refer to the following: (1) Mamzers, persons born of incest or of adultery; they are not permitted to marry Israelites (see Bastard; Foundling; Illegitimacy; Incest). (2) Ammonites or Moabites; they may not marry Israelitish women. (3) Egyptians or Idumeans to the third generation. (4) Nethinim or Gibeonites. The Rabbis declare: "Now all proselytes are permitted to marry Israelites; and we do not suspect that they are descendants of any of the nations forbidden in the Bible" ("Yad," Issure Biah, xii. 25; Tosef., Ḳid. v. 6; Yad. iv. 4; Ber. 28a; see Intermarriage; Proselytes). (5) Slaves. (6) Spadones, *i.e.*, persons forcibly emasculated, but not those that are born so. When the defect is the result of a disease, there is a difference of opinion among the authorities (Eben ha-'Ezer, 5).

Prohibited Degrees.

One who is suspected of having committed adultery with another man's wife is not permitted to marry her after she has been divorced or after she has become a widow (Soṭah 25a; Yeb. 24b; see Adultery). The Biblical prohibition forbidding one to remarry his divorced wife after she has been married to another (Deut. xxiv. 4) is extended by the Rabbis to the following cases: No one may remarry his divorced wife if he divorced her on suspicion of adultery, or because she had subjected herself to certain vows, or on account of her barrenness (see Divorce). Those who assist at a divorce proceeding, or the witnesses who testify to the death of an absent husband, may not marry the woman thus released (Yeb. 25a; Giṭ. 45a; "Yad," Gerushin, x. 13; Eben ha-'Ezer, 10, 3; 12, 1–2).

Besides the proselyte and the profane (Ḥalalah) or the divorced woman (Lev. xxi. 17 [A. V. 14]), the descendants of Aaron were forbidden to marry also the "ḥaluẓah," the woman who performed the ceremony of Ḥaliẓah ("loosening the shoe") upon her deceased husband's brother (Yeb. 24a). A priest's wife who had been criminally assaulted had to be divorced by her husband (*ib.* 56b). A woman captured by an enemy in time of war was under suspicion of having been assaulted by her captors, and hence priests were forbidden to marry her, unless witnesses who were with her during the whole time of her captivity testified that she had not been assaulted (Ket. 22a, 27a). The Rabbis insisted on the fulfilment of these laws even after the Temple had been destroyed and the priestly office abolished; and they compelled an Aaronite, under penalty of excommunication or other means, to divorce the woman that he had married contrary to the Law ("Yad," Issure Biah, xvii.-xx.; Eben ha-'Ezer, 6, 7; see Priestly Code).

Remarriage.

There are some prohibitions which relate specifically to the woman's remarriage. A woman who was twice widowed, if both husbands died natural deaths, might not marry again (Yeb. 64b; "Yad," *l.c.* xxi. 31; Eben ha-'Ezer, 9). A widow or a divorced woman might not remarry before the expiration of ninety days from her husband's death or from the time when the bill of divorce was handed to her. This provision was made in order to ascertain whether she was pregnant, and that in the event of her being so the paternity of her child might be established. For the sake of uniformity the Rabbis required the woman to wait that length of time even when there could be no suspicion of pregnancy. If she was visibly pregnant, she might not remarry until after her delivery, and even then, if the child lived, she was required to wait until it was twenty-four months old. A woman who had an unweaned child was required to wait the same period. If the child died during the interval, she might remarry immediately (Yeb. 41a, 42a; "Yad," Gerushin, xi. 18–28; Eben ha-'Ezer, 13; see Divorce; Widow).

There are certain times during which marriage is forbidden. During the first thirty days of mourning after the death of a near relative no marriage may be entered upon. A widower may not remarry until three festivals have passed after the death of his wife. If, however, she left him with little children needing the care of a mother, or if he had not yet discharged his duty of propagating the species, *i.e.*, if he had no children (see above), he might remarry after a lapse of seven days (M. Ḳ. 23a; "Yad," Ebel, vi. 5; Yoreh De'ah, 392). No marriage might be entered upon on Sabbaths, holy days, or the week-days of the holy days, except in very urgent cases (Beẓah 36b; "Yad," Shabbat, xxiii. 14; *ib.* Ishut, x. 14; Eben ha-'Ezer, 64, 5; Oraḥ Ḥayyim, 339, 4, 524, 1, Isserles' gloss). The first nine days of the month of Ab were regarded as days of mourning and no marriage might then be performed. Some extended this prohibition to the three weeks intervening between the fast of the Seventeenth of Tammuz and that of the Ninth of Ab (Oraḥ Ḥayyim, 551, 2, 10, Isserles' gloss, and commentaries). The period between Passover and Shabu'ot ("Sefirat ha-'Omer") was also regarded as one of mourning; and no marriage might be performed during this time, except on a few specified days. In some places it was customary to refrain from marriage only until the thirty-third day of the Omer (*ib.* 493, 1, Isserles' gloss; see Mourning; Omer).

Conditions.

Marriage, being regarded also as a civil transaction, required the consent of the contracting parties in order to make it valid (see Consent). Hence idiots or imbeciles were considered incapable of contracting a legal marriage (see Insanity). The deaf-mute was also debarred from entering a legal marriage for the same reason, but the Rabbis sanctioned the marriage of a deaf-mute if contracted by means of signs (see Deaf and Dumb in Jewish Law). Minors (*i.e.*, such as have not reached the age of puberty, which was held to begin at thirteen years in males, and twelve in females), are also precluded from contracting marriages (see Majority). A daughter who was a minor could be given in marriage by her father; and such a marriage was valid. In the case of her father's death, her mother or her brothers could give her in marriage, subject to her confirmation or annulment on her reaching the age of puberty (see MI'UN). A marriage contracted under certain conditions was valid when the conditions were fulfilled. The conditions had to be formulated in accordance with the general laws governing conditions (see CONDITIONS).

In rabbinic times there were two distinct stages in the marriage ceremony: (1) its initiation or the BETROTHAL ("erusin"), and (2) its completion or the marriage proper ("nissu'in"). These might or might not have been preceded by an engagement ("shiddukin"), although the prevailing custom was to have a formal engagement before marriage, when a contract ("tena'im") was drawn up in which the parties promised, under the penalty of a fine ("ḳenas"), to be married at an appointed time (see BREACH OF PROMISE OF MARRIAGE). The Rabbis regarded it as improper to marry without a previous engagement, and would punish one who did so, although the act itself was considered valid (Ḳid. 12b; "Yad," Ishut, ii. 22; Eben ha-'Ezer, 26, 4).
